జీయ - rámánujíya, obl., Tel.). Also called Shree veishnava. Followers of Ramaunoojacharry. See vol. I (74), (89).——*Ramauramy* (రామారామి - ramárami, Tel.). From (rámaráma, san. the word of salutation). Strictly means equality, implying that the two sides can meet on terms of salutation. An average [sarausaree].——*Ramavurma* (രാമവർമ്മ - rámavarmma, Mal.). From (ráma, san. the hero + varma, san. coat of mail); Rama who bears armour as king. Hindoo 2nd or pers. name [peyar].——*Ramayanam* (रामायण - rámáyana, San.). See sep. title.——*Ramayya* (రామయ్య - rámayya, Tel.). From (ráma, san. the hero + ayya, tel. master, titular affix). Hindoo 2nd or pers. name [peyar].——*Ramchendran* (रामचन्द्र - rámachandra, San.). From (ráma, san. the hero + chandra, san. moon). Moon-like Rama. Common in northern india. The second Rama [q.v.]. See vol. I (74), (79). Hindoo 2nd or pers. name [peyar].——*Ramchendrapooram* (రామచంద్రపురము - rámachandrapuramu, Tel.). See sep. title.——*Ramchendrayya* (இராமசந்திரய்யன் - irámasandirayyan, Tam.). Hindoo 2nd or pers. name.——*Ramdoss* (இராமதாசன் - irámathásan, Tam.). From (ráma, san. the hero + dása, san. servant), slave of rama. Hindoo 2nd or pers. name [peyar].——*Rameshwaram* (रामेश्वर - ráméshvara, San. rámesvaram *). From (ráma, san. the hero + íshvara, san. shiva, the lord); eeshvaran worshipped by second rama [q.v.], the older deity. Sanscrit name (dévanagara), meaning god + city. Tamul name (pámbandívu), meaning paumben island. Greek name for the promontory was *κῶρυ*, for the island *ἀργάλος νῆσος*. The bay between Point calimere and the island of Rameshwaram is called Rama's bow, and is the Sinus colchicus of the ancients. Each end is called Dhanooshcoty, the tip of the bow, or simply Coty. The most celebrated of the two was that at Rameshwaram, and this word became Greek *κῶρυ*. Cf. (kóti) and crore. Island, Town, Place of pilgrimage, Promontory; Madura dist., Ramnaud zemindarry; pop. 5,930; lat. 9° 18′; long. 79° 22′; from Dindigul E.S.E. 117 miles; from Kodaykarnal E.S.E. 141 miles; from Madras S.S.W. 270 miles; from Madura E.S.E. 92 miles; from Mantapam E.N.E. 12 miles; from Paumben E. 7 miles; from Ramnaud E. 33 miles. Rameshwaram is a low sandy island at the extremity of Adam's bridge extending east and west between Ceylon and the south-eastern coast of the peninsula at the entrance of Palk's passage, and forming the northern boundary of the Gulf of Manaar. The eastern half is merely a narrow strip of sand. About 14 miles length from south-east to north-west, and five in breadth. It is in a line with Manaar island with which it is united by a bank of sand and was probably once connected with the mainland. It is to their control of the passage from the mainland that the chiefs of Ramnaud owe their hereditary title of Saitoopaty [q.v.], or lord of the causeway. The island is to a great extent covered with babool [q.v.] trees. Cocoanut [q.v.] palms and a few gardens make up all the cultivation. The inhabitants are principally Bramins and their followers, who are supported by the profits derived from the temples. The great temple of Ramalingasawmy stands on rising ground in the northern part of the island. It is near the sacred Dhanooshcoty teertam on a spit of sand that runs out south-east of the island, and great wealth has been lavished on it by the Saitoopaty. Originally founded by Rama after invasion of Ceylon. Has two lingams [q.v.], one which Seetay made, and one which Hanooman [q.v.] brought from Mount keilausam [q.v.]. The temple buildings are surrounded by a high wall covering an area about 865 feet from east to west by 657 feet from north to south, height about 120 feet. There are unfinished gopoorams [q.v.], built wholly of stone from the base to the summit, on the north, south and east, and a single complete one on the west. The best and oldest portion is built of a dark and hard limestone [choonam cull], to which there is nothing similar in the rest of the building. The gateway on the west is 78 feet high and is elaborately carved with mythological figures, its form being trapezoid. The workmanship is massive and regular, and the architecture resembles the Egyptian style. The other three gopoorams are 19 feet high, composed of single upright stones, with others laid across at the top. The largest of these three is that on the east. It is not on the wall of the present outer enclosure, but on that of an inner one surrounding the second praucauram [q.v.]. Outside the main wall on the same side are two large porticos, one opposite this gopooram and leading up towards it, and the other to the south, leading into a subordinate gopooram [q.v.] in line with the last and surmounting the gateway in front of the goddess Amman [q.v.]. Inside the gateway is a colonnade, having a passage between a triple row of pillars to a square of about 600 feet, into which the sacred temples open. The colonnade runs along the four sides of the quadrangle. It measures from north to south 353 feet, and east to west 671 feet, by 17 feet in breadth. The ceiling is composed of large slabs of granite, supported by numerous carved granite [caroom cull] pillars, each 12 feet high, raised on each side on a platform 5 feet high. Most of the pillars are single blocks of stone, all brought from a distance of 40 miles. The corridors are the most celebrated feature of the temple. These extend to nearly 4,000 feet in length from 20 to 38 feet broad, and from the floor to the centre of the roof about 30 feet in height. Each pillar is compound, and highly elaborate in design. The impression produced by such a display of labor when extended to an immense length is unique. None of the European cathedrals are more than 500 feet, and even the nave of St. Peter's is only 600 feet from the door to the apse. Here the side corridors are 700 feet long and open into transverse galleries as rich in detail as themselves. These, with the varied devices and modes of lighting, produce an effect that is not equalled certainly anywhere in India. Unfortunately the whole has been so extensively whitewashed and painted that the general effect is altered, and much of the intrinsic sharpness of detail is destroyed. The art displayed is perhaps not so good as in some other temples. Much of the effect produced on the mind of the observer is due to the immensity of the labor employed, combined with a certain picturesqueness and mystery. Inside the great enclosure is third praucauram [q.v.], abutting on the east wall and measuring about 690 feet by 435. Like the entrance passage it has a corridor on a raised platform on each side of it and runs round the four sides of the rectangle, which it encloses. This praucauram alone is open to all castes. Within it, and nearer the east face than the west, is an area 386 feet from east to west by about 314 feet from north to south, also surrounded by a high wall enclosing the second praucauram. This praucauram is by no means so imposing as, though somewhat older than, the third. Within this again is the first praucauram, or inner enclosure, round the shrines of the god Ramalingasawmy and of his consort Parvatavardhiny amman, of Vishwanauta sawmy and Vishaulautchy amman, besides a number of smaller chapels and rooms. It is difficult to judge of the age of the temple because it is so injured by sea air, but it is probably older than the Seven pagodas [q.v.]. The principal shrines were built by Oodeiyaun saitoopaty, with the aid of a Ceylon prince styled Pararaja shekharan in A.D. 1414, the latter having had the stones hewn at Trincomalee and numbered on the spot ready to be put together. The north and south gopoorams were built by Keerana royer of the Deccan [q.v.] about 1420 A.D. The western gopooram and the outer surrounding walls are the work of Oodeyaun saitoopaty and a Comaty of Nagore, in 1434 A.D.; and statues of the merchant and his wife surmount the eastern wall. In 1450 additions were made to the inner buildings by a wealthy Hindoo from Madura, and others in 1560 by Chinna wodeyan saitoopaty cautta tevar, then a feudatory of Vishwanauta naickar of Madura, whose statue and that of his son Krishnappa were set up in front of the nundy [q.v.]. The southern half of the second praucauram was erected about 1650 by Tirmullay saitoopaty, whose statue and that of his son, Raghoonautan, stand by the side of the south entrance into the Amman temple, and are honored with garlands and an offering of betel-nut [q.v.] and flowers every Friday night when the image of the sawmy is brought to this place on its way to pulliyaray or bed in the Amman temple. Raghoonauta tirmullay saitoopaty also built the rest of the second praucauram. The great unfinished eastern gopooram is the work of Dalavoy saitoopaty, about 1640, who also built the Sabhaupaty [q.v.] shrine in the north-east corner of the third praucauram. Half a century later Hiranya garbhayaujee ravicoola vijaya raghoonauta saitoopaty, besides other buildings, erected the pulliyaray or bed room of the Amman temple, and the mantapam [q.v.] in front, in which are statues of himself and his brother Cadamba tevar. About 1740 the Saitoopaty began the third praucauram, setting up the entrances into it from the gopoorams on all four sides, and it was completed by Moottoo ramalinga saitoopaty, in 1769. The statues of the latter and of his two muntries [q.v.] Moottiroolappa pillay, son of Sowndra paundya pillay and Krishna iyengar, with members of his family, are conspicuous in the western entrance corridor. The temple is therefore not the work of one age, but extends over a period of 350 years, and has been erected and endowed almost exclusively by one family, the Saitoopaty chiefs of Ramnaud. It is one of the last great works of the Hindoos, and the latest addition to it is the finest of all. On a small hillock near Rameshwaram stands a peculiarly constructed mantapam [q.v.] of two storeys. It is here that Hanooman [q.v.] ascended in order to get a view of Lunka [q.v.]. South of the great temple is a fresh-water tank about three miles in circumference. The great pagoda [q.v.] is under the guardianship and management of a chief, styled Pundauram [q.v.], who must observe celibacy through life, and on his death is succeeded by his sister's son, or, should there not be any such, by the next eldest collateral male relative. The image of the deity is every morning drenched with water brought on the shoulders of fakeers [q.v.] from the Ganges, and poured over it, and which, having received additional sanctity by this rite, is sold to devotees at a high price. The temple, its ceremonies, and its attendant Bramins are maintained from the revenue of fifty-seven villages, yielding an annual income of about Rs. 40,000, granted by former Rajahs of the Ramnaud zemindarry. It is still visited daily by scores of pilgrims from all parts of India, who come through Ramnaud to the crossing, and at seasons by hundreds and thousands. More come from Nepaul and north of the Ganges than from the Tamul districts in the immediate vicinity, while the Deccan and Mysore contribute the majority. Veishnavites as well as Sheiveites congregate, but Sheiveites predominate. Many Teloogoo and Tamul astronomers, as Baulaudityacan and Mullicarjoonan, refer their computations to the meridian [raikhay] of Rameshwaram. See vol. I (7). There is a Tamul proverb:—

இராமேசுரத்துக்குப் போயும் சனீசுரன் தொலையவில்லை

186

—"though he went on a pilgrimage to rameshwaram, saturn "[shany] has not left him;" he is still unlucky.——*Rameshwaran* (रामेश्वर - rāméshvara, San.). From (ráma, san. the hero + íshvara, san. lord); shiva, the lord of rama. Name of the lingam [q.v.] at Rameshwaram.——*Ramnaud* (இராமநாதப்புரம் - irámanáthappuram, Tam.). See sep. title.——*Ramoolamma* (రాములమ్మ - rámulamma, Tel.). From (ráma, san. the hero + amma, tel. mother, titular affix). A village goddess [graumadevatay].——*Ramoonny* (രാമുണ്ണി - rámunni, Mal.). From (ráma, san. the hero + unni, mal. infant); rama, the darling. Hindoo 2nd or pers. name [peyar].——*Rampore* (రామపురం - rámapuram, Tel.). From (ráma, san. the hero + pura, san. town). Pass; Kurnool dist., Putticondah tal.; lat. 15° 19'; long. 78° 02'; from Kurnool S.S.W. 36 miles; from Putticondah E.S.E. 32 miles. Southernmost pass [ghaut] in Yerramalas between Putticondah talook and Bunganapully state. Used by carts carrying the produce of Coondair valley to Gooty railway station.——*Ramrauz* (రామరాజు - rámarádzu, Tel.). From (ráma, san. the hero + rájá, san. king).—"*a*" Family of hereditary Deshmookhs [q.v.] of Pulnaud.—"*b*" Same as Rama rajah above.—"*c*" One Ramrauz was local governor of the Jinjee country. Sold to the East india company the fort at Tegnapatam, since known as Fort saint david, in 1690. Fled to Sattaura on the capture of Jinjee by Zoolfacar khan [charitram]. See vol. I (169).——*Ramtil* (काळातीळ - kálátíla, Mahr.; رام تل - rámtil, Hind.; کالی تل - kálítil, Dec.; ಹುಚ್ಚೆಳ್ಳುಗಿಡ - huççellugida, Can.; వెఱ్ఱినువ్వు - verrinúgu, Tel.; காணெல் - kánel, Tam.). Title from hindostany. Mahr. from deccany. Hind. from (rám, hind. rama + til, hind. sesamum indicum, dec.). Dec. from (kálí, hind. black + til, hind. sesamum indicum, dec.). Can. from (huççu, can. madness + yellu, can. sesamum + gida, can. plant). Tel. from (verri, tel. wild + núgu, tel. gingelly plant, sesamum indicum, dec.). Tam. from (kán, tam. forest + el, tam. sesamum). Can. also (kádellu), meaning wild + sesamum; (kutrellu). Tel. also (gúréllu); (tilalu), meaning gingelly seed; (adavinuvvu), meaning jungle + gingelly plant; (kondanuvvu), meaning hill + gingelly plant; (valise); (ulisi). Tam. also (káttel), meaning forest + sesamum. Title otherwise Hill gingelly, Niger seed, Nook, Oil seed, Wild gingeliy, Wild sesamum. Botanically Guizotia abyssinica, cass, compositæ [vriesham, 74]. Alias Anthemis mysorensis; Bidens ramtilla; Buphthalmum ramtilla; Guizotia oleifera; Helianthus oleifera; Heliopis platyglossa, werinnua; Jægeria abyssinica; Parthenium luteum; Polymnia abyssinica, frondosa; Ramtilla oleifera; Tetragonotheca abyssinica; Verbesina sativa. Ramtilla from hindostany. Werinnua from teloogoo. Annual, herbaceous, erect; leaves opposite, long lanceolate, coarsely serrated; peduncles elongated, sub-corymbose; flowers large, bright yellow. The achenes are of a greyish-black color, about $\frac{3}{16}$ of an inch long, somewhat angular from lateral compression, tapering towards the base, quite smooth, taste oily and nutty. Ramtil oil expressed from the large seeds is the common lamp-oil [q.v.] of upper india and is very cheap; it is sweet tasted, and used like gingelly-oil [gingelly] for culinary purposes, &c.; the cake [ponnauk] given to milk-cows; the oil mixes with colors as well as linseed [alsee] and dries without litharge [moordarsing]. No other common species here.——*Ramyajamautry* (रम्यजामातृ - ramyajámátri, San.). From (ramya, san. beautiful + jámátri, san. son-in-law). Another name of Manavaula maumoony [q.v.], the founder of the Tengalay [q.v.] sect. See vol. I (85).——*Raticauthalan* (இரதிகாதலன் - irathigáthalan, Tam.). From (rati, san. wife of cupid + káthalan, tam. husband). Manmatan [q.v.].——*Ratnagandhy* (रत्नगन्धि - ratnagandhi, San.). Means gem + fragrance; from showy flowers. Botanically the Poinciana genus, leguminosæ [vriesham, 48]. Trees; leaves twice-pinnate; flowers showy orange or yellowish. The species best known to the natives are:—elata [soonkeshwaram], regia [foreign tungaid].——*Ratnagherry* (இரத்தினகிரி - irattinagiri, Tam.). From (ratna, san. precious stone + giri, san. mountain); from the varied landscape. Hill; Trichinopoly dist., Coolitalay tal.; lat. 10° 53'; long. 78° 26'; height 1,179 feet; from Coolitalay S.S.W. 5 miles; from Trichinopoly W. 22 miles. A boss of gneiss, pear-shaped [amrood] and resting on small end. Within limits of Shivauyam village and close to road from Coolitalay to Manapauray. A flight of 952 steps leads to summit, which commands magnificent view. On summit is small Shiva temple.——*Ratnam* (रत्न - ratna, San.; جوهر - jauhar, Ar. and Dec.; گوهر - gauhar, Pers.; رتن - ratan, Hind.; ರತ್ನ - ratna, Can.; రత్నము - ratnamu, Tel.; രത്നം - ratnam, Mal.; மணி - mani, Tam.). San. from (ram, san. to please). Ar. from (jahr, ar. to become plain). Hind. from sanscrit. Tam. from (man, tam. excellence). Gem.—"*a*" The following is a key-list of the commonest gems of S. india:—Agate [akeek], Amber [karbah], Amethyst [martees], Ammonite [shalagram], Beryl [zabarjad], Bloodstone [hajrdam], Cambay pebble [q.v.], Carbuncle [shabcharaugh], Cat's eye [lahsanyah], Chalcedony [akeek i soofeed], Cinnamon stone [q.v.], Coral [moongah], Cornelian [akeek i soorkh], Corundum [q.v.], Crystal [spaticam], Diamond [vajram], Emerald [zamarrood], Garnet [tamrah], Gold stone [sang i sitaura], Jacinth [pudmaraugam], Jasper [yashab], Lapis lazuli [veidooryam], Mocha stone [akeek i bahree], Onyx [sang i soolimauny], Opal [csheera spaticam], Pearl [moty], Porphyry [sang i samauk], Ruby [laul], Sapphire [neelam], Sardonyx [akeek i siyah], Tamarind stone [q.v.], Topaz [pookhrauj], Turquoise [firozah].—"*b*" The following is the list reversed:—Akeek, agate; Akeek i bahree, mocha stone; Akeek i siyah, sardonyx; Akeek i soofeed, chalcedony; Akeek i soorkh, cornelian; Csheera spaticam, opal; Firozah, turquoise; Hajrdam, blood-stone; Karbah, amber; Lahsanyah, cat's eye; Laul, ruby; Martees, amethyst; Moongah, coral; Moty, pearl; Neelam, sapphire; Pookhrauj, topaz; Pudmaraugam, jacinth; Sang i samauk, porphyry; Sang i sitaura, gold stone; Sang i soolimauny, onyx; Shabcharaugh, carbuncle; Shalagram, ammonite; Spaticam, crystal; Tamrah, garnet; Vajram, diamond; Veidooryam, lapis lazuli; Yashab, jasper; Zabarjad, beryl; Zamarrood, emerald.—"*c*" Hindoo 2nd or pers. name. Suffix in names as Naugaratnam, Ramaratnam [peyar].——*Ratnamaulay* (रत्नमाला - ratnamálá, San.). From (ratna, san. gem + málá, san. necklace). Gem-necklace. Term of praise appended to titles of works.——*Ratnasabhaupaty* (இரத்தினசபாபதி - irattinasabáppathi, Tam.). From (ratna, san. gem + sabhá, san. assembly + pati, san. lord). Epithet of Shiva, as lord of ratnasabhay a sacred decorated hall in the temple of chidambaram. Hindoo 2nd or pers. name [canacasabhaupaty, peyar, sabhay].——*Ratnaucaram* (रत्नाकर - ratnákara, San.). From (ratna, san. gem + ákara, san. mine). Jewel mine. Title of various works, especially dictionaries [nigantoo].——*Ratnavailoo* (రత్నవేలు - ratnavélu, Tel.). From (ratna, san. gem + vélu, tam. familiar contraction of vélan, tam. skanda, the lance-bearer). Means scandan with the beautiful decorated spear. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Raty* (रति - rati, San.; இரதி - irathi, Tam.). From (ram, san. to make happy). The shacty [q.v.] or wife of Manmatan [q.v.]. When Manmatan attacked Shiva [q.v.] doing penance [tapas], by shooting an arrow [cauma bannam], Shiva opened his frontlet eye and burnt the assailant to ashes [cauman pundigay]. Raty went to Shiva, who agreed to restore her husband to life with the proviso that he should be visible to her eyes alone. Compare the legend of Cupid and Psyche. Raticauthalan is manmatan, raty's husband; see sep. title.

RAMAH (రామ - ráma, *Tel.*). From (ram, san. to please) [ram]; from appearance. The genus Gobioides, gobiidæ, acanthopterygii, teleostei, pisces [matsyam, 23], of naturalists [jantoo]. Coasts, estuaries, and tidal rivers; frequent muddy localities and use their teeth as organs of attack or defence. The species best known to the natives are Crooked ramah, Eating ramah. Cf. also Black ramah which is another genus.——*Black ramah* (चांगल - chángala, Mahr.; నల్లరామ - nallaráma, Tel.; ପିତଲୁ - pitallu, Oor.). Title from dark dorsal bands. Mahr. from (changa, san. handsome). Tel. from (nalla, tel. black + ráma, tel. gobioides genus). Oor. from (pittala, san. brass); from brown spots. Apocryptes lanceolatus, gobiidæ, acanthopterygii, teleostei [matsyam, 23], of naturalists [jantoo]. Alias Apocryptes changua; Eleotris lanceolata; Gobius changua; Pseudapocryptes lanceolatus; Scartelaos calliurus. Changua from mahratta. Jaws of nearly equal length anteriorly; scales minute, becoming most distinct in posterior portion of body; colors dull greenish superiorly, with numerous fine brown spots and usually many dark bands descend from back towards abdomen; dorsals with several rows of fine spots; caudal barred in a few or many rows; sea; 8 inches in length. No other common species here.——*Crooked ramah* (గొగ్గిరామ - goggiráma, Tel.). Title from wavy motion of body. Tel. from (goggi, tel. irregular shaped + ráma, tel. fish, gobioides genus). Gobioides [ramah] cœculus, gobiidæ, acanthopterygii, teleostei [matsyam, 23], of naturalists. Alias Amblyopus cæculus; Cæpola cæcula. Body rounded, lower jaw the longer, with some small barbels on it; cleft of mouth oblique; scales absent; colors are mostly of leaden hue, becoming light on abdomen; vertical fins gray, central caudal rays black; pectorals and ventrals reddish, or they may be coppery color along back, shot with blue along sides, fins reddish except caudal which is deep brown with reddish outer edges; some are of general reddish brown color; exceedingly vicious, and when captured snaps at everything near it; should its tail be touched it springs round and anything it seizes it holds on to; sea, estuaries, tidal rivers and tanks along the coasts.——*Eating ramah* (ఆహారరామ - áháraráma, Tel.). Title from use. Tel. from (áhára, san. food + ráma, tel. gobioides genus). Gobioides [ramah] anguillaris, gobiidæ, acanthopterygii, teleostei [matsyam, 23], of naturalists. Alias Amblyopus hermannianus; Gobioides anguliformis; Gobius anguillaris; Tænioides hermannii. Lower jaw the longer and anterior, with its cleft nearly vertical; scales absent; colors pinkish, caudal darkest in its centre; sea; nearly 15 inches long.

RAMALCOTTAH (رامل کوٹ - rámalkot, *Hind.*; రామల్లకోట - rámallakóta, *Tel.* rámallakot *). From (ráyi, tel. stone, here precious stone + mala, tel. hill + kóta, tel. fort) [rye]. Otherwise Rolaconda of Tavernier.——(1) Talook, Kurnool district. Tahsildar's pay Rs. 200. Area 846 square miles. Population 100,595. Teloogoo is the vernacular but Hindostany is spoken by all Mahomedans and about ¼ Hindoos. W. centre of district. Bounded N. by Toongabudra, excepting near Kurnool, where

five villages on the north side of the river; E. by Nundicotcore and Nundiaul talooks; and S. and W. by Putticondah talook. Includes Yerramala hills. In N.W soil is black. Towards S. from Taicore to Pyaupaly, soil is blended with reddish alluvial sandy soil, while in E. parts, which comprise a great portion of the flat-topped hills of the Yerramalas, the soil is generally red. The soil is generally not deep, and rocks are sometimes so near the surface that the land is hardly cultivable. The chief industry is weaving [nesavoo]. Cotton [q.v.] carpets [jamkhana], turbans [puggry] and woollen blankets [cumbly] are manufactured at Kurnool and silk [puttoo] cloths at Goodoor. Agriculture is chief occupation. Cotton [q.v.], indigo [q.v.], hides [chamrah], melons [oorvauroo], tobacco [pogauk], betel [q.v.] leaves, blankets [cumbly, jamkhana], mahomedan women's clothes called soosies [q.v.], turbans [q.v.], wheat [geung], gram [q.v.], pulses [dholl] and ghee [q.v.] are the chief articles of export. Talook is watered by Hindry and Toongabudra. Kurnool-Cuddapah irrigation canal irrigates eleven villages. Several streams of which Donnavaugoo is chief run from south and fall into Hindry. Some have been dammed. Camping grounds:—Kurnool, Taicore, Veldoorty, and Dhone on the Kurnool-Gooty road; Narnoor on the Nundiaul road; and Naugalaupooram on the Bellary road. Places of archæological interest:—Anoogonda, Bollavaram, Caloogotla, Culloor, Gorintla, Johaurapooram, Kurnool, Lanja polore, Narnoor, Nauyacull, Poollagoommy, Pooslore, Punchalingaula, Ramalcottah, Tadacanapulley, Veldoorty. Principal trig. stations:—Cautamrauz, Coilacondah, Donacondah, Juggernautghaut. The leading places, &c., in the talook are the following.——*Auladoddicondah* (ఆవుదొడ్డికొండ - áúdoddikonda, Tel.). From (ávu, tel. cow + doddi, tel. pound + konda, tel. hill). Hill; lat. 15° 27′; long. 78° 00′; from Kurnool S.S.W. 27 miles.——*Candenavole* (కందెనవోలు - kandenavólu, Tel.). See Kurnool.——*Cautamrauz* (కాటమరాజు - kátamarádzu, Tel.). Means proper name. Trig. station; lat. 15° 25′ 23·13″; long. 78° 01′ 01·92″; height 2,053 feet; from Caumagaunicoontla E. 4 miles; from Kurnool S.S.W. 28 miles.——*Coilacondah* (కోయిలకొండ - kóyilakonda, Tel.). From (kóyila, tel. temple + konda, tel. hill). Trig. station; lat. 15° 19′ 16·25″; long. 77° 39′ 03·85″; height 1,947 feet; from Chityaula S.W. 15 miles; from Kurnool S.W. 46 miles.——*Donacondah* (దోనకొండ - dónakonda, Tel.). From (dóne, tel. boat + konda, tel. hill). Trig. station; lat. 15° 22′ 51·50″; long. 77° 53′ 40·60″; height 2,035 feet; from Dhone S.W. 2 miles; from Kurnool S.S.W. 34 miles.——*Dronauchellam* (ద్రోణాచలం - drónáchalam, Tel.). From (dróna, san. a wooden trough + achala, san. mountain). Means situated in hollow formed by surrounding hills. Village, Railway station; pop. 1,917; acres 13,071; lat. 15° 24′; long. 77° 55′; height 2,035 feet; from Kurnool S.S.W. 32 miles. On the Kurnool-Gooty road. Travellers' bungalow [q.v.]. A spring channel [q.v.] runs through village.——*Ganighaut* (గనిగట్టు - ganigattu, Tel.). From (gani, tel. a mine + gattu, tel. hill). Hill; lat. 15° 34′; long. 78° 04′; from Kurnool S. 18 miles. Diamond [vajram] mines worked in old days.——*Goodoor* (గూడూరు - gúdúru, Tel.). From (gúdu, tel. hovel + úru, tel. village). Village; pop. 5,063; acres 13,413; lat. 15° 46′; long. 77° 51′; from Kurnool W.S.W. 16¾ miles. Former head-quarters of talook. Cotton cloths and silk-weaving. Cloths exported to Mysore and S. districts.——*Gorintla* (గోరింట్ల - górintla, Tel.). From (górinta, tel. the nail dye plant, lawsonia alba, lamk.). Village; pop. 1,454; acres 7,768; lat. 15° 38′; long. 77° 53′; from Kurnool S.W. 20 miles. Temple of Maudhavasawmy with inscription of Vijianugger dynasty [raj], recording grant by Runga roya. Shiva temple with inscription.——*Hindry* (హింద్రి - hindri, * Tel.). See sep. title.——*Juggernautghaut* (జగన్నాథగట్టు - jagannát'haghattu, Tel.). From (jagannát'ha, san. lord of the universe + gattu, tel. hill). Hill; lat. 15° 46′; long. 78° 04′; height 1,452 feet; from Kurnool S.S.W. 5 miles. Spur of the Yerramalas. Vishnoo temple with annual festival. Trig. station in lat. 15° 45′ 51·97″; long. 78° 04′ 30·01″; height 1,452 feet; from Dinney devarapaud S. 1 mile; from Kurnool S.S.W. 5 miles.——*Kurnool* (కర్నూలు - karnúlu, Tel.). See sep. title.——*Ladagherry* (లద్దగిరి - laddagiri, Tel.). From (laddi, tel. dung of elephants and horses + giri, tel. hill). Village; pop. 2,068; acres 8,294; lat. 15° 38′; long. 77° 56′; from Kurnool S.W. 17 miles. On the Hindry.——*Malacaupore* (మలకాపురం - malakápuram, Tel.). From (mala, tel. mountain + kápuramu, tel. residence). Village, Railway station; pop. 1,665; acres 7,089; lat. 15° 81′; long. 78° 02′; from Kurnool S. 33 miles.——*Narnoor* (నర్నూరు - narnúru, Tel.). From (nari, can fox + úru, can. village). Village; pop. 2,518; acres 10,575; lat. 15 43′; long. 78° 08′; from Kurnool S.S.E. 8 miles. On a rock, on the Cuddapah road. Temple of Veerabhadran [q.v.]. Large ancient temple of Maudhavasawmy, well sculptured. Good limestone [choonam cull] as well as nodular kankar [q.v.]; also yellow chundoo or magnesia [caunta munn] used for plastering walls.——*Polecull* (పోలేకల్లు - pólékallu, Tel.). From (póli, tel. martin + kallu, tel. rock). Village; pop. 2,394; acres 7,459; lat. 15° 50′; long. 77° 47′; from Kurnool W. 21 miles. Black abruck [q.v.].——*Pyaulacoorty* (ప్యాలకుర్తి - pyálakurti, Tel.). From (peyya, tel. calf + kurti, tel. place). Village; pop. 1,216; acres 7,151; lat. 15° 44′; long. 77° 51′; from Kurnool W.S.W. 18 miles. Quarry of black abruck [q.v.]. Old temple to Chennakeshwarasawmy. Inhabited by Gollas [q.v.] only. They say if Boya [q.v.] settle here they would die.——*Ramalcottah* (రామల్లకోట - rámallakóta, Tel.). See below.——*Sanoogondla* (సనుగొండ్ల - tsanugondla, Tel.). From (tsannu, tel. breast + konda, tel. hill). Village; pop. 1,334; acres 5,536; lat. 15° 44′; long. 77° 49′; from Kurnool W.S.W. 19 miles. Inscriptions.——*Soonkesala* (సుంకేసల - sunkésala, Tel.). See sep. title.——*Taicore* (తేకూరు - tékúru, Tel.). From (téku, tel. teak wood, tectona grandis, linn. + úru, tel. village). Village; pop. 747; acres 3,135; lat. 15° 43′; long. 78° 02′; from Kurnool S.SW. 9 miles. On the Gooty road. Travellers' bungalow [q.v.].——*Toongabudra* (తుంగభద్ర - tungabhadra, Tel.). See sep. title.——*Veeranna ghaut* (వీరన్నగట్టు - vírannaghattu, Tel.). From (víranna, tel. the god vírabhadra + gattu, tel. hill). Sanscrit name (vírabhadráchala), meaning same. Village, Hill; Temple of Veerabhadra sawmy.——*Veldoorty* (వెల్దుర్తి - veldurti, Tel. veldurti *). From (velugu, tel. hedge + durti, tel. village). Village; pop. 2,587; acres 12,109; lat. 15° 33′; long. 77° 59′; from Kurnool S.S.W. 21 miles. On Kurnool-Gooty road. Temple of Ramasawmy. Shiva temple on hill. Travellers' bungalow [q.v.]. Tepid spring.——*Yerramala* (ఎర్రమల - erramala, Tel.). See sep. title.——**(2)** Village; pop. 1,424; acres 3,005; lat. 15° 35′; long. 78° 02′; from Cumbum W. 73 miles; from Kurnool S. 18 miles; from Madras N.W. 228 miles; from Nundiaul W.N.W. 33 miles; from Pyaupaly N.E. 29 miles. Former head-quarters of talook. Vencateshwarasawmy temple with elaborately carved pillars built by Goozeratty [q.v.] diamond [vajram] merchants. Diamond-field near the town.

RAMAYANAM (रामायण - rámáyana, *San.*). From (ráma, san. the god + ayana, san. going) [ram]. Many poems bearing this name all relating to same hero; but most famous is that of Valmeeky [q.v.]. First and greatest epic of the Hindoos. Prior to Mahabhaurat [q.v.]. Not committed to writing till long after original composition. In the 4th chapter of the 1st book there is special reference to the reciters [cooshan, lavan], the Greek ῥαψῳδοί. Ramayanam is the legend of the solar race [aryan, vamsham] and Rama may be regarded as the first real Cshatriya [q.v.] hero of the post-vedic age. Dasharatan, king of Ayodhyay [cosalam], had four sons, Rama [q.v.] now worshipped as an incarnation [avatar] of Vishnoo [q.v.], Lutchmanan [q.v.], Bharatan [q.v.] and Shatroognan [q.v.]. The mother of Bharatan was Keikeyee. Soomitray was mother of Lutchmanan and Shatroognan. Cowsalyay was mother of Rama. Rama was married to Seetay, daughter of Janacan [q.v.], king of Mitilay or Tirhoot; and by the voice of the people was designated his father's coadjutor [yoova rajah]. Keikeyee, to whom the king had promised whatever she should ask, demanded the banishment of Rama and the appointment of her son Bharatan. Rama accordingly departed into exile, attended by Seetay and Lutchmanan. The wanderers, after traversing the districts around the Jumna and the Ganges, at length reached the great forest of Dandacam [q.v.] to the south. Dasharatan now died, worn out with grief, and Bharatan refusing to supplant Rama, the shoe of the latter was placed on the vacant throne. The exiles visited Agastyan [q.v.], the mighty rishy [q.v.], and Rama received from him the bow and arrows of magical power. Proceeding southward, they met with raucshasans [q.v.], incarnate demons of huge size. One of this race, called Ravanan [q.v.], was king of Ceylon at the time, and he carried off Seetay to his palace in that island. Rama, after destroying an army of fourteen thousand raucshasans, hastened to Ceylon to recover his wife. His allies were the monkeys [bandar], of whom an innumerable host accompanied him. Soogreevan [q.v.], was the monkey-king, whose capital [kishkindyay] was on the site where Vijianugger [humpy, vijianugger] afterwards stood; and the famous Hanooman [q.v.] was the monkey general. This latter passed over to Ceylon in search of Seetay and set the island on fire. In extinguishing the flames he blackened his face; but Seetay promised that on his return he should not be singular on that account, as he should find all his race with black faces; hence the dark color of the Dravidians. A bridge [saitoo] was then constructed from the mainland to Ceylon. This was at Ramnaud, the zemindar of which claims the title of Saitoopaty [q.v.], or guardian of the bridge. Ravanan was slain, Seetay was freed, her purity was ascertained by an ordeal of fire, the whole party returned in triumph to Ayodhyay the fourteen appointed years of exile being accomplished, and Rama ascended his ancestral throne. The Ceylon portion of the Ramayanam is almost certainly a north asian or european legend transposed. The two vulture [gidh] kings, Sampauty [q.v.] and Jatauyoo [q.v.], recall to mind the winged sons of Oreithyia in the Argonautic expedition; they watch over Seetay, and, when she is carried off by the demon king Ravanan, Jatauyoo throws himself in the path of the ravisher, and endeavours to defeat his purpose, but is slain in the struggle. As Laomedon drew a curse upon Ilium when he oppressed the gods and used threats to Apollo and Poseidon, so the behaviour of Ravanan the demon-king, who had enslaved gods and men and was ever boasting of his power, brought on his city Lunka [q.v.] the wrath of the deities. The oldest commentary on the Ramayanam known is the Catacateecay; so called after the clearing-nut [q.v.], for reasons given by the author that 'the ambrosia of the holy pool of the ramayanam had been made muddy

'by the dust of unsuitable commentaries.' The Tamul version of Ramayanam, reduced to half the size of the original by the poet Cumban [q.v.], is a work of great poetic merit, and without doubt the most popular book in S. india, notwithstanding that Sheivism predominates here. It is an imitation rather than a translation. The Chintanmany [q.v.] alone can rival it. It is written in a metre called the Vroottam [q.v.]. It is sung in every Tamul village, in bazaars and houses, on festive occasions, by wandering Cavy royans [q.v.], native minstrels. It is the folk-song of Southern india, but it is not intelligible to ordinary people, and a running comment is kept up by the singer or an assistant. The following is a specimen :— தள்ளரும்பாரந்தாங்கிய வொட்டகத் தெள்ளுதண்கரும்பி யாவையுந்தின்கில உள்ளமென்னத்தம் வாயுமுலர்ந்தன கள்ளுண்பார் களிற்கைப்பனதேடியே—"the camels [ottagam] that carried burdens difficult to move, refused to eat "the pure and cool sugar-cane [q.v.]; but their mouths and "stomachs being parched up, sought for bitter things like men "who drink intoxicating liquors." There is a Tamul proverb :— இராமுழுதும் ராமாயணம் கேட்டுச் சீதைக்கு ராமன் என்ன என்ற கதை—"the story of one who having listened "to the reading of the ramayanam a whole night, asked what "relationship existed between seetay and rama." There is a Teloogoo translation, the Dwipada ramayanam, usually called the Runganauta ramayanam by Cona boodharauz, son of Cona vittala bhoopaty. The Molla ramayanam again is an imitation of Valmeeky, written by Molla [q.v.], the daughter of a Nellore potter. It is called the Niroshtam or non-labial Ramayanam, a feat of ingenuity, without using (p, p'h, b, bh, m) a single labial letter [varnamaulay]. Besides the ancient Ramayanam, there is another popular work of comparative modern times called the Adhyautma ramayanam. The authorship of it is ascribed to Vyausan [q.v.], but it is generally considered to be a part of the Bramhaunda pooraunam [q.v.]. It is a sort of spiritualised version of the poem, in which Rama is depicted as a saviour and deliverer, as a god rather than a man. It is divided into seven books, which bear the same names as those of the original poem, but it is not so long. There is also an Oottara ramayanam, relating a previous transmigration [samsauram]. Valmeeky's ramayanam is divided into seven Caundams [q.v.] and contains about 24,000 shlocams [q.v.] thus.—"*a*" *Baula caundam* (बालकाण्ड - bálakánda, San.). From (bála, san. boy + kánda, san. section). The boyhood of Rama.—"*b*" *Ayodhya caundam* (अयोध्याकाण्ड - ayódhyákánda, San.). From (ayódhyá, san. the country, so called). The scenes at Ayodhyay and the banishment of Rama by his father, King Dasharatan.—"*c*" *Aranya caundam* (अरण्यकाण्ड - aranyakánda, San.). From (aranya, san. forest). Forest section. Rama's life in the forest and the kidnapping of Seetay by Ravanan.—"*d*" *Kishkindya caundam* (किष्किन्ध्याकाण्ड - kishkindhyákánda, San.). From (kishkindhyá, san. place, so called). Rama's residence at Kishkindyay [humpy], the capital of his monkey ally, King Soogreevan.—"*e*" *Soondra caundam* (सुन्दरकाण्ड - sundarakánda, San.). From (sundara, san. beautiful). Beautiful section. The marvellous passage of the straits by Rama and his allies and their arrival in Ceylon.—"*f*" *Yooddha caundam* (युद्धकाण्ड - yuddhakánda, San.). From (yuddha, san. war). War section. The war with Ravanan, his defeat and death, the recovery of Seetay, the return to Ayodhyay, and the coronation of Rama. This is sometimes called the Lunka or Ceylon caundam.—"*g*" *Oottara caundam* (उत्तरकाण्ड - uttarakánda, San.). From (uttara, san. later). Later section. Rama's life in Ayodhyay, his banishment of Seetay, the birth of his two sons [cooshun, lavan], his recognition of them and of the innocence of his wife, their reunion, her death, and his translation to heaven.

RAMBHAY (रम्भा - rambhá, *San.*). From (rabh, san. to embrace). A damsel in Indran's paradise [swargam]; the Venus of this mythology. Also a plantain [q.v.]; also a bamboo [q.v.]. ——*Rambha** (రంభ - rambha, Tel.). Village; Ganjam dist., Biridy zemindarry; pop. 3,508; lat. 19° 31′; long. 85° 08′; from Chetterpore N.N.E. 13 miles; from Russellcondah E.S.E. 44 miles. Picturesquely situated at southern extremity of Chilka lake, of which it is principal port. The scenery is Italian in character. On border of lake is a large house built by a former Collector in 1792. Since purchased by Aska sugar factory. Trig. station, Biridy zemindarry; lat. 19° 30′ 59·98″; long. 85° 09′ 35·02″; height 514 feet; from Berhampore E.N.E. 26 miles; from Chetterpore N.N.E. 13 miles; on a point in the Chilka lake.——*Rumpa* (రంప - rampa, Tel.). From (rambha, san. bamboo, bambusa arundinacea, willd.).—"*a*" Division, Godavery. Area 821 square miles. Hill division on north bank of Godavery, constituting a portion of the Agency tract of the district. Lat. 17° 18′ to 17° 52′ N., long. 81° 34′ to 82° 05′ E. Extends from about 20 miles north of Rajahmundry almost to the Sillair river, which forms the southern boundary of Jeypore. Bounded :—west by Rekapully talook; east and north by Golcondah talook, Vizagapatam; south by Rajahmundry talook. Very thinly populated. Yields no revenue to Government. Originally granted to the mansabdar [q.v.] as a jagheer [q.v.] for the maintenance of a force of peons [q.v.]. When these were disbanded he was ordered to pay their annual cost to government. Disturbances broke out in 1858, and lasted until 1862. A police force was in consequence recruited from the hillmen. In 1879 another rising again involved the employment of troops. It lasted until December 1880, when Chundrayya the rebel leader was killed, the rebels dispersed, and the mansabdar deported to Gopalpore as a State prisoner, his mansabdarry tenure being cancelled. A fresh settlement has been made with the mittahdars [q.v.], who held groups of villages on condition of paying a quit-rent [jody] to government, and of assisting to preserve peace. The Deputy tahsildar of Chotapully has charge of Rumpa under the Sub-collector, and is also invested with a limited civil jurisdiction. Police forces are maintained at Chodavaram and Kotah. Both stations are stockaded. The country presents a succession of hills from two to four thousand feet high, covered with dense jungle, and separated by valleys. The highest peak is Daumcondah, 4,478 feet above sea-level. There is a good road from Rajahmundry to Chodavaram, 33 miles; a rough road, made by the Madras sappers during the Rumpa revolt, from Chodavaram to Kotah, 14 miles; and a third from Chodavaram to Mauraidpully, 14 miles. The rest are jungle tracts. A passable road, two miles long, connects Chodavaram with the village of Rumpa. The hills are infested with tigers [pooly], leopards [kerkal], bears [ricsham], bison [gowr], and wolves [konye]. The climate is very cold in the winter months. Fever is common, and malaria is prevalent throughout the year. The inhabitants are chiefly Khonds [q.v.] and Reddies [q.v.]. Their bamboo [q.v.] huts are stockaded to keep out wild beasts. Products are bamboos [q.v.] and tamarinds [q.v.], which grow to an enormous size. Cultivation is principally of the nomadic kind locally termed Paidoo, in which the forest is burned down and the seed sown among the ashes [coomry]. A little tobacco [pogauk] is grown to satisfy local wants.—"*b*" Village; Godavery dist., Rumpa division; lat. 17° 27′; long. 81° 49′; from Cocanada N.W. 45 miles; from Coonavaram E.S.E. 35 miles; from Ellore N.E. 68 miles; from Madras N.N.E. 316 miles; from Narsapore N.N.E. 70 miles; from Rajahmundry N. 32 miles.

RAMBIYA (رامبيا - rámbiya, *Malay*). Same as Sago.

RAMBOOTAN (رمبوتن - rambutan, *Malay*). Title from (rambut, malay, hair), from shaggy covering of fruit. Title otherwise Rampostan. Botanically Nephelium lappaceum, linn., sapindaceæ [vricsham, 43]. Lofty tree; leaves 3–18 inches; leaflets 2–9 by 1–4 inches, shining and dark green above, paler and marked with sub-parallel lateral veins beneath; petioles $\frac{1}{12}$–$\frac{1}{4}$ inches; branches of the panicle spreading; flowers fascicled, pubescent, $\frac{1}{12}$–$\frac{1}{10}$ inches diameter; calyx campanulate, at length patent; stamens five to eight, exserted; filaments pubescent, especially towards base; style deeply two to three-lobed; lobes recurving; fruit lobes $\frac{1}{2}$–2 inches long, red yellowish orange or nearly black, setæ subulate; aril transparent, milky, fleshy, edible. The fruit is oval, red, covered with long, soft, fleshy spines; introduced into gardens from china and straits; nearly allied to the Litchy [q.v.] and Longan [q.v.].

RAMCHENDRAPOORAM (రామచంద్రపురము - rámachandrapuramu, *Tel.* rámachandrapuram*). From (rámachandra, san. proper name + pura, san. town) [ram].——**(1)** Talook, Godavery district. Tahsildar's pay Rs. 250. Area 400 square miles. Population 261,194. Language Teloogoo. Centre of inland district. Bounded :—south and east by the Gowtamy branch of the Godavery, north by Peddapore talook and Ccanada division, and west by Rajahmundry talook. It is a plain talook, mostly intersected by canals. Is productive and healthy, but in the cold season feverish, being almost entirely under water. The Gowtamy branch of the Godavery flows to the south and east. In it there are several islands or Lunkas [q.v.], formed by the accumulation of sand [manal] and alluvium [adaimunn, vandalmunn] brought down by the freshes. These Lunkas are continually changing, some years being fertilized anew by the Godavery freshes, but sometimes completely washed away, covered with sand, and thus rendered unfit for cultivation. Soil alluvial. Trade is chiefly in paddy [q.v.] grain, oil-seeds [yennay], jaggery [q.v.] and tobacco [pogauk], and in cloths manufactured in the talook. Nearly half of the products is consumed in the talook, and the rest is exported. Six anicut [q.v.] main canals run through in various directions; Cocanada, Coringa bank, Inzaram, Mundapett and Samulcottah. These are used both for irrigation and navigation. Numerous minor irrigation channels [q.v.], branches of the main. Zemindarries:—Capileshwarapooram, Goodigalla bhaugam, Paunangipully, Veeravallipollem, Vegayammapett, Vella. Places of archæological interest:—Bickavole, Cotipully, Cowzalore, Drauksharaumam, Mautsavaram, Someshwaram, Vegayammapett. The leading places, &c., in the talook are the following.—*Alamore* (ఆలమూరు - álamúru, Tel.). See sep. title.—*Anaparty* (అనపర్తి - anaparti, Tel.). From (ana, tel. bank + parti, tel. village). Village; pop. 4,088; acres 4,477; lat. 16° 55′; long. 82° 00′; from Cocanada W. 8 miles; from Ramchendrapooram N.N.W. 18 miles. Between Cocanada and Samulcottah canals. Jaggery [q.v.] and grain [paddy].—*Artamore* (అర్తమూరు - artamúru, Tel.). From (art'ha, san. wealth + úru, tel. village). Village; pop. 3,110; acres 1,641; lat. 16° 53′; long. 81° 58′; from Cocanada W.S.W. 20 miles; from Ramchendrapooram N.W. 7 miles. The Vautaupy and Ilvalaa

[kankar] legend is found here [ippanapaud, taupeshwaram]. —*Bickavole* (బిక్కవోలు - bikkavólu, Tel.). From (bikki, tel. walnut, gardenia latifolia, ait. + prólu, tel. town). Tel. also (birudánkaráyapuramu), meaning birdaunca roya, a king + town. Village; pop. 3,699; acres 4,841; lat. 16° 57′; long. 82° 05′; from Cocanada W. 12 miles; from Ramchendrapooram N. 9 miles. The earlier Chalookya [q.v.] kings resided here. Extensive ruins. Temple of Golingeshwaran and deserted Shiva temple.—*Capileshwarapooram* (కపిలేశ్వరపురము - kapiléshvarapuramu, Tel.). From (kapiléshvara, san. shiva, the lord of kapila + pura, san. town). Zemindarry, Village; pop. 5,590; acres 6,311; lat. 16° 44′ N.; long. 81° 57′ E.; from Cocanada S.W. 26 miles; from Ramchendrapooram S.W. 10 miles. Peshcush Rs. 8,742. On the Godavery. Originally the monastery of Capilamahamoony [capilan], who built a temple for Shiva.—*Chennore* (చెన్నూరు - chennúru, Tel.). From (chennu, tel. beauty + úru, tel. village). Zemindarry, Village; pop. 2,540; acres 3,594; lat. of village 16° 49′; long. 82° 2′; from Cocanada W.S.W. 18 miles; from Ramchendrapooram W.S.W. 3 miles. On the route from Rajahmundry to Coringa.—*Cotipully* (కోటిపల్లి - kótipalli, Tel.). See sep. title.—*Cowzalore* (కాజులూరు - kádzulúru, Tel.). From (kauzu, tel. partridge + úru, tel. village). Village; pop. 2,948; acres 3,372; lat. 16° 47′; long. 82° 13′; from Cocanada S.S.W. 12 miles; from Ramchendrapooram E.S.E. 10 miles. Two Jeina [q.v.] statues.—*Draucsharaumam* (ద్రాక్షారామము - drákshárámamu, Tel. drákshárámam *). From (daksha, san a proper name + áráma, san. garden). Sanscrit name (daksháráma), meaning same. Otherwise Dracharam by corruption. Dacsha prajaupaty [dacshan], one of the nine Bramhas [q.v.], performed a yanyam [q.v.] here. Town; pop. 3,103; acres 1,166; lat. 16° 47′; long. 82° 06′; from Cocanada S.W. 17 miles; from Ramchendrapooram S.E. 4 miles. Former head-quarters of the talook. Sacred place with large temple of Bheemeshwaran [lingam]. Two carved Dutch tombs, at a place which still goes by the name of Olandoo dibba or Holland mound. Large market on Monday.—*Godavery* (గోదావరి - gódávari, Tel.). See sep. title.—*Gollalamaumidauda* (గొల్లలమామిడాడ - gollalamámidáda, Tel.). From (golla, tel. shepherd + mámidi, tel. mango tree, mangifera indica, linn. + váda, tel. village). Village; pop. 4,719; acres 1,927; lat. 16° 56′; long. 82° 07′; from Cocanada W. 11 miles; from Ramchendrapooram N.N.E. 8 miles. Delta [conamoogam] village; jaggery [q.v.], tobacco [pogauk] and rice [q.v.]; market on Saturday.—*Gollapollem* (గొల్లపాలెము - gollapálemu, Tel.). From (golla, tel. shepherd + pálemu, tel. fortified village). Village; pop. 1,505; acres 985; lat. 16° 51′; long. 82° 13′; from Cocanada S.S.W. 8 miles; from Ramchendrapooram E. 10 miles. In 1787 in possession of the Dutch. Noted for dyeing [shauyam] of cloths.—*Goodigalla bhaugam* (గుడిగడ్లభాగము - gudigadlabhágamu, Tel.). From (gudi, tel. temple + gadda, tel. mound + bhága, san. portion). Zemindarry, Village; pop. 155; lat. of village 16° 45′; long. 82° 08′; from Cocanada S.S.W. 16 miles; from Ramchendrapooram S.E. 8 miles. Peshcush Rs. 57.—*Ippanapaud* (ఇప్పనపాడు - ippanapádu, Tel.). From (ippa, tel. tree, bassia longifolia, linn. + pádu, tel. village). Sanscrit name (ilvalapura), meaning ilvalan, the giant + town [artamore, kankar, taupeshwaram]. Village; pop. 1,190; acres 594; lat. 16° 51′; long. 81° 58′; from Cocanada W.S.W. 21 miles; from Ramchendrapooram N.W. 8 miles. Delta village.—*Masakapully* (మసకపల్లి - masakapalli, Tel.). From (maskara, san. hollow bamboo + palli, tel. village). Sanscrit name (maskaríkshétra), meaning bramin mendicant + place. Village; pop. 2,066; acres 1,506; lat. 16° 42′; long. 82° 08′; from Cocanada S.S.W. 18 miles; from Ramchendrapooram S.S.E. 10 miles. Northern side of the bank canal.—*Mautsavaram* (మాచవరం - mátsavaram, Tel.). From (mátsanna, tel. proper name + pura, san. town). Village; pop. 2,349; acres 1,756; lat. 16° 50′; long. 82° 01′; from Cocanada W.S.W. 19 miles; from Ramchendrapooram W.N.W. 4 miles. Two Jeina [q.v.] statues in a tank west of the village. —*Mundapett* (మండపేట - mandapéta, Tel.). See sep. title. —*Poottacondah* (పుట్టకొండ - puttakonda, Tel.). From (putta, tel. ant-hill + konda, tel. hill). Sanscrit name (valmíkyáshrama), meaning valmeeky, the sage + hermitage. An agrahauram [q.v.]; pop. 1,074; acres 383; lat. 16° 55′; long. 82° 08′; from Cocanada W.S.W. 9 miles; from Ramchendrapooram N.E. 8 miles. A great ant-hill here grew up on Valmeeky [q.v.], author of Ramayanam [q.v.], when he was in deep meditation for ages. —*Ramchendrapooram* (రామచంద్రపురము - rámachandrapuramu, Tel.). See below.—*Someshwaram* (సోమేశ్వరము - sóméshvaramu, Tel.). From (sóma, san. the moon + íshvara, san. lord), from temple of shiva, the moon lord. Village; pop. 2,497; acres 1,963; lat. 16° 51′; long. 82° 01′; from Cocanada W.S.W. 18 miles; from Ramchendrapooram N.W. 4 miles. Two old temples. —*Taupeshwaram* (తాపేశ్వరము - tápéshvaramu, Tel.). From (tápa, san. torment + íshvara, san. lord). Sanscrit name (vátápéshvara), meaning vautaupy, the giant + shiva, the lord; place of Shiva as worshipped by Vautaupy [artamore, kankar, ippanapaud]. Village; pop. 2,852; acres 1,569; lat. 16° 53′; long. 81° 58′; from Cocanada W.S.W. 21 miles; from Ramchendrapooram N.W. 8 miles. Delta village; jaggery [q.v.] and grain [dhaunyam, paddy].—*Tekky* (టేకి - téki, Tel.). From (tenki, tel. abode), meaning hermit abode. Village; pop. 2,496; acres 2,557; lat. 16° 45′; long. 81° 59′; from Cocanada S.W. 23 miles; from Ramchendrapooram S.W. 7 miles. Delta village. —*Veeravallipollem* (వీరవల్లిపాలెము - víravallipálemu, Tel.). From (víravalli, tel. the heroic goddess + pálemu, tel. fortified village). Zemindarry, Village; pop. 2,091; acres 3,229; lat. of village 16° 42′; long. 82° 02′; from Cocanada S.W. 23 miles; from Ramchendrapooram S.S.W. 9 miles. Peshcush Rs. 3,534. —*Vegayammapett* (వేగాయమ్మపేట - végáyammapéta, Tel. végayammapet *). From (végáyamma, tel. proper name + péta, tel. suburb). Tel. also (doddammapéta), meaning the great queen + suburb. Zemindarry, Village; pop. 1,702; acres 1,456; lat. of village 16° 46′; long. 82° 08′; from Cocanada S.W. 16 miles; from Ramchendrapooram S.E. 6 miles. Peshcush Rs. 8,234. Named after Vegayammah, relative of a former zemindar. West near a shrine of a village goddess, is a Jeina [q.v.] statue.—*Vella* (వెల్ల - vella, Tel.). Means white. Zemindarry, Village; pop. 3,431; acres 1,712; lat. of village 16° 49′; long. 82° 06′; from Cocanada S.W. 14 miles; from Ramchendrapooram E.S.E. 3 miles. Peshcush Rs. 1,240.—*Yedida* (ఏడిద - yédida, Tel.). From (édu, tel. seven). Literally seven villages. Sanscrit name (sangaméshvara), meaning junction + lord. Village; pop. 3,676; acres 5,391; lat. 16° 51′; long. 81° 55′; from Cocanada W.S.W. 24 miles; from Ramchendrapooram W.N.W. 9 miles. Composed of the seven villages:—Bademiyapaud, Canoopurtipaud, Juggernautpore, Narsimharajpore, Pencoolapaud, Savaram, Seetanagaram. Delta village. A mile distant are three temples to Shiva and Vishnoo. Festival at Shivarautry [pundigay, 6a]. People bathe in the drainage channel, originally old Toolyabhauga, a branch of the Godavery.——**(2)** Village, Talook head-quarters; Godavery dist., Ramchendrapooram tal.; pop. 3,622; acres 2,226; lat. 16° 50′; long. 82° 04′; from Cocanada W. 16 miles; from Coonavaram S.E. 17 miles; from Ellore E.N.E. 60 miles; from Madras N.N.E. 280 miles; from Narsapore N.E. 34 miles; from Rajahmundry E. 20 miles. Ancient zemindarry bought in by Government for arrears of revenue. Old fort.

RAMEE (اُتنگن - utangan, *Hind.*). Malay archipelago name for China grass.

RAMNAUD (இராமநாதப்புரம் - irámanáthappuram, *Tam.*). From (ráma, san. the hero + nát'ha, san. lord + pura, san. town); lord rama's town [ram]. Tam. also (mugavai), meaning chief + place.——**(1)** Zemindarry, Madura district. Area 2,104 square miles. Population 128,452. Language Tamul. E. coast of district. Bounded on the north by Shivagunga, Poodoocottah and Tanjore, on the east by Palk's strait, on the south by the Gulf of Manaar and Ottapidauram and Shauttore talooks in Tinnevelly district, and on the west by Shivagunga, Tirmungalam talook of the Madura district and also by the Shreevillipoottore talook of Tinnevelly district. Peshcush Rs. 3,13,997. For history see vol. I, 55. There are no mountains or hills and very little jungle. Near the coast palmyras [q.v.] and coconut [q.v.] flourish especially towards the east. The waters from the high lands form a wide stream, discharging itself into the sea at Vaulimookham bay. There are three large salt water lakes; one near Vaulimookham, the second near Tirpoollauny, and the third east of the first and communicating with a salt water basin east of Poothoomadam. The principal manufactures are cotton [q.v.] cloths and carpets [jamkhana]; the chief manufacturing towns being Abhiraumam, Arooppoocottah, Cadalady, Camoothy, Chittracottah, Cottapatam, Keelakaray, Numboodalay, Paramacoody, Polliemputty, Poonnacoolam, and Tondy. Salt [ooppoo] is manufactured in the neighbourhood of the sea coast, and saltpetre [shorah] at Poonalcoody. Country arrack [q.v.] is distilled in several places. The chunk-fishery [chunk] lasts from April to September on the eastern coast and from October to March on the southern coast. It is usually rented by the zemindar for about 3,000 rupees per annum. About one million chunks [q.v.] are collected annually. Those fished on the eastern coast are reckoned better than those of the southern. The commercial transactions were formerly extensive. A commercial resident and assistant were for many years established at Ramnaud by the Company, for the purpose of procuring cloth for the English market; and the Mahomedans carried on an extensive trade in piece goods with the Eastern island and Persian gulf, &c. Exports are chayroot [q.v.], chunks [q.v.], salt [ooppoo], salt-fish, tobacco [pogauk], cotton [q.v.], skins [chamrah], paddy [q.v.], coarse cloth, &c. Imports are shawls [q.v.], woollen cloths, wheat [geung], sugar [q.v.], sugar-candy [candy], pepper [q.v.], nuts [areca], nutmegs [jautikye], cinnamons [q.v.], cloves [lavangam], cardamoms [q.v.], mace [jautipatry], brimstone [gandhac], quicksilver [rasam], iron [auhan], pearls [moty], corals [moongah], and a variety of precious stones [ratnam], teakwood [teak], blackwood [q.v.], and Ceylon wood, red and yellow ochre [cauvy]; and, in times of scarcity, grain [paddy] from the west and from Tanjore. The zemindarry is well stocked with cattle [maud], but of small size. Antelope [jinka] and hog [soor] are found in small numbers in the plains and jungles. The streams, of which there are many, are not navigable, and are as a rule nothing more than broad rivulets, and all are everywhere fordable. They supply several lakes. Freshes occur in October and November, and occasionally water comes down in April. A small supply of water is procurable even in the hottest months by digging in

the beds of the rivers, and picottahs [q.v.] are erected on the banks for the purposes of irrigation. At some seasons of the year a dam is thrown across Toravoo lake, and portion of the bed cultivated with rice [q.v.]. Places of archæological interest:—Armoogam cottay, Arooppoocottah, Audy sait teertam, Aukkalore, Cadoogoosanday, Camoothy, Chokkalingapooram, Codoomalore, Coolashekharanullore, Covilaungoolam, Cunnagoody, Deviputnam, Hanoomantagoody, Kedauram, Keelakaray, Lutchmeepooram, Manjiyore, Mauriyore, Moodookkancoolam, Mookkore, Moothoocoolatore, Moottoonaud, Neinaurcoil, Nullcoorchy, Ooppooteroo, Oottara coshamungay, Pandalgoody, Parlatchay, Paulvanuttam, Paumben, Periyaputnam, Peroongarnay, Pidauranendal, Pillcoody, Poolaungal, Poottore, Pullimadam, Puttamungalam, Rajasingamungalam, Rameshwaram, Ramnaud, Shaukkivayal, Shaulagraumam, Shayalgoody, Sheloovanore, Shooranore, Taraicoody, Teetaundadaunam, Tirmaul cauttauncottay, Tirpaulacoody, Tirpoollauny, Tirshooly, Tirtervalay, Tirvadaunay, Veeracholan, Velimootty, Vengadangoorchy, Vidauttacoolam. Principal trig. stations:—Annappanaickenputt, Appateev, Arapothoo, Cadalady, Caunjirangoody, Codicoolam, Coottipauray, Gandhamaudanam, Kidatirkkay, Manigundy, Marcauyaputnam, Maunicancottah, Moothooputnam, Moottoorny, Mosal teev, Neinarcoil, Numboodalay, Oorannancoody, Oottaracoshamungay, Oppilaun, Pandalgoody, Periyaputnam, Pishauchmundalam, Poolaputty, Pooliyamputty, Poomooritchan, Poragoody, Ramasawmy mutt, Ramnaud bastion, Shendatty yendal, Shircaumbore, Shoolacaray, Tanichanday, Taraicoody, Vaulay teev, Venniyore, Yervaudy. The leading places, &c., in the talook are the following.——*Abhiraumam* (அபிராமம் - abirámam, Tam.). Means delightful. Village; pop. 6,278; lat. 9° 27′; long. 78° 29′; from Madura S.E. 40 miles; from Ramnaud W. 27 miles; from the sea N. 20 miles. On the Madura road below a large lake named from it. Inhabited principally by Mussalmans [q.v.], Chetties [q.v.], Maravar [q.v.] and Vellaular [q.v.]. Trade considerable in grain [dhaunyam], cotton [q.v.] and cloths. Popular belief is that within an area of 2 miles of the village, the bite of a snake is harmless. Weekly market on Wednesday.——*Adam's bridge* (சேது - shéthu, Tam.). See sep. title.——*Annappanaickenputt* (அன்னப்பநாயக்கன்பட்டு - annappanáyakkanbattu, Tam.). From (annappanáyakkan, tam. proper name + pattu, tam. village). Trig. station; lat. 9° 11′ 45·91″; long. 78° 20′ 13·42″; from Moothoocoolatore W.S.W. 19 miles; from Pernauzhy S.W. 3 miles; from Ramnaud W.S.W. 38 miles.——*Appa teev* (அப்பத்தீவு - appattívu, Tam.). From (appam, tam. plant, cissampelos pareira, linn. + dvípa, san. island). Trig. station in island; lat. 9° 09′ 52·86″; long. 78° 52′ 14·02″; height 10 feet; from Ramnaud S. 13 miles.——*Arapothoo* (அரப்போது - arappóthu, Tam.) From (aral, tam. low jungle + póthi, tam. hill). Trig. station; lat. 9° 18′ 55·05″; long. 78° 38′ 48·18″; height 54 feet; from Moothoocoolatore E.S.E. 7 miles; from Ramnaud W.S.W. 17 miles.——*Arooppoocottah* (அருப்புக்கோட்டை - aruppukkóttai, Tam. aruppukóta *). From (aruppu, tam. harvest + kóttai, tam. fort). Town, Zemindarry; pop. 12,673; lat. 9° 31′; long. 78° 08′; from Madura S. 28 miles; from Ramnaud W. 51 miles; from the sea N.N.W. 34 miles. Small ancient Shiva temple said to have been built by Soondra paundyan [soondra paundy tevar]. Sub-registrar's office. Weekly market on Monday. Inhabited by weavers, who make long cloths.——*Attangaray* (ஆத்தங்கரை - áttangarai, Tam.). From (áru, tam. river + karai, tam. bank); at the mouth of the veigay. Village, Port, Zemindarry; pop. 1,393; lat. 9° 21′; long. 79° 02′; from Madras S.S.W. 270 miles; from Madura E.S.E. 71 miles; from Moodiapatam S.S.E. 8 miles; from Pillaymadam N.W. 7 miles; from Ramnaud E. 11 miles. On the coast of Palk strait at the place where the surplus waters of the Veigay enter the sea. Noted for chunk [q.v.] fishery in the south-west monsoon [q.v.]; these shells, with rice [q.v.] and excellent tobacco [pogauk], are the principal exports and maintain an active coasting trade.——*Audy sait teertam* (ஆதிசேதுத்தீர்த்தம் - áthiséthuttírttam, Tam.). From (ádi, san. first + sétu, san. causeway + tír'tha, san. place of sacred water). Sacred bathing place on the coast frequented by pilgrims on their return from Rameshwaram. Rama [q.v.] bathed here on his expedition to Lunka [q.v.].——*Cadalady* (கடலடி - kadaladi, Tam.). From (kadal, tam. sea + adi, tam. vicinity). Trig. station, Ramnaud talook; lat. 9° 13′ 25·17″; long. 78° 32′ 20·46″; from Auppanore S. 3 miles; from Moothoocoolatore S.S.W. 9 miles; from Ramnaud W.S.W. 25 miles.——*Camoothy* (கமுதி - kamuthi, Tam. kamuti *). Town, Head-quarters of a Zemindarry; pop. 6,483; lat. 9° 25′; long. 78° 25′; from Madura S.S.E. 38 miles; from Ramnaud W. 31 miles; from the sea N. 21 miles. On south bank of Coondair. Old fort about 150 years old and Shiva temple said to have been built by Soondra paundyan [soondra paundy tevar]. The fort, on high ground above the Goondaur, built by a French engineer. Captured and dismantled by British after capture of Punchaulamcoorchy fort. Considerable trade in cotton [q.v.]. Weekly market on Tuesday.——*Caumancottay* (காமன்கோட்டை - kámangóttai, Tam.). From (káman, tam. god of love + kóttai, tam. fort). Village; pop. 1,267; lat. 9° 28′; long. 78° 45′; from Madura S.E. 51 miles; from Ramnaud W.N.W. 11 miles; from the sea W. 14 miles. North of the Madura-Ramnaud road. Opposite is a pavilion on south bank of a large reservoir from Veigay. Neighbourhood is richly cultivated.——*Caunjirangoody* (காஞ்சிரங்குடி - káñjirangudi, Tam.). From (káñjiram, tam. nux vomica tree, strychnos nux vomica, linn. + kudi, tam. village). Trig. station, Ramnaud talook; lat. 9° 14′ 48·17″, long. 78° 51′ 11·25″; height 55 feet; from Keelakaray N.E. 2 miles; from Ramnaud S.S.E. 9 miles.——*Chuckracottay* (சக்கரைக்கோட்டை - shakkaraikkóttai, Tam.). From (shakkarai, tam. man's name + kóttai, tam. fort); founded by mussalman of that name. Village; pop. 3,769; lat. 9° 21′; long. 78° 53′; from Madura S.E. 61 miles; from Ramnaud S.E. 1¼ miles; from the sea N. 7 miles.——*Codicoolam* (கோடிக்குளம் - kódikkulam, Tam.). From (kódi, tam. corner + kulam, tam. tank). Trig. station; lat. 9° 30′ 06·68″; long. 78° 50′ 50·90″; height 30 feet; from Poothoovayal W. 2 miles; from Ramnaud N. 9 miles.——*Coottipauray* (குட்டிப்பாறை - kuttippárai, Tam). From (kuttai, tam. short + párai, tam. rock). Trig. station; lat. 9° 28′ 47·55″; long. 78° 03′ 05·90″; height 345 feet; from Ramnaud W.N.W. 56 miles; from Tirshooly W.S.W. 13 miles.——*Cottacaraiyaur* (கொட்டக்கரையாறு - kottakkaraiyáru, Tam.). See sep. title.——*Cottapatam* (கோட்டப்பட்டணம் - kóttappattanam, Tam.). From (kóttai, tam. fort + pattana, san. town). Village, Port; lat. 9° 58′; long. 79° 15′; from Ammaputnam S.S.W. 4 miles; from Madras S.S.W. 228 miles; from Mimisal N.E. 5 miles; from Poodoocottah S.E. 38 miles; from Tanjore S.S.E. 55 miles. On Palk's bay. Salt factory.——*Damodaraputnam* (தாமோதரப்பட்டணம் - támótharappattanam, Tam.). See sep. title.——*Devacottah* (தேவக்கோட்டை - tévakkóttai, Tam. devakóta *). From (déva, san. proper name + kóttai, tam. fort). Town, Sub-registrar's office; pop. 9,929; lat. 9° 57′; long. 78° 52′; from Madura E. 48 miles; from Ramnaud N. 39 miles; from the sea W. 21 miles. Principal residence of Nautcottay chetties [q.v.]. Weekly market on Wednesday and Saturday.——*Deviputnam* (தேவிப்பட்டணம் - tévippattanam, Tam.) See sep. title.——*Gandhamaudanam* (கெந்தமாதன் - kendamáthan, Tam.). From (gandha, san. fragrance + mad, san. to intoxicate); place of high fragrance. Trig. station; lat. 9° 18′ 07·21; long. 79° 20′ 51·60″; height 100 feet; from Paumben E. 7 miles; from Rameshwaram N.W. 1¼ miles; from Ramnaud E. 32 miles.——*Goondaur* (குண்டாறு - kundáru, Tam.). See sep. title.——*Gungaycondaun* (கங்கைக்கொண்டான் - kangaikkondán, Tam.). From (gangá, san. river + kondán, tam. one who brought); cf. caumeshwaram. Epithet of a Paundyan king. Village; pop. 1,020; lat. 9° 28′; long. 78° 46′; from Madura S.E. 52 miles; from Ramnaud N.W. 11 miles; from the sea W. 12 miles. Mosque [musjid] and Roman catholic church. Considerable trade in paddy [q.v.].——*Hanoomantagoody* (அனுமந்தக்குடி - anumandakkudi, Tam.). From (hanumanta, can. monkey-god + gudi, can. temple). Village; lat. 9° 56′; long. 78° 55′; from Madura E. 52 miles; from Ramnaud N. 38 miles; from the sea W. 15 miles. Formerly gave its name to a tract in Madura country. The Zameen [q.v.] talook of Hanoomantagoody is called after this place; the head-quarters of which is at Cunnangoody. Old Shiva temple and old musjid [q.v.] with inscriptions.——*Keelacaray* (கீழக்கரை - kízhakkarai, Tam.). See sep. title.——*Kidatirkkay* (கிடாத்திருக்கை - kidáttirukkai, Tam.). From (kidá, tam. male of cattle + irukkai, tam. village). Trig. station; lat. 9° 18′ 02·14″; long. 78° 30′ 04·71″; from Auppanore N.W. 3 miles; from Moothoocoolatore S.W. 5 miles; from Ramnaud W.S.W. 26 miles.——*Manaar gulf* (மன்னார்க்குடாக்கடல் - mannárkkudákkadal, Tam.). See sep. title.——*Manaar island* (மன்னார்த்தீவு - mannárttívu, Tam). See sep. title.——*Manigundy* (மணிகண்டி - manigandi, Tam.). From (mani, tam. beauty + gandi, tel. pass). Trig. station; lat. 9° 46′ 17·88″; long. 78° 57′ 48·95″; height 48 feet; from Ramnaud N.N.E. 28 miles; from Tirvadaunay S. 1 mile.——*Mantapam* (மண்டபம் - mandabam, Tam.). Means hall. Village, Port; pop. 2,925; lat. 9° 17′; long. 79° 12′; from Madras S.S.W. 272 miles; from Madura E.S.E. 82 miles; from Rameshwaram W.S.W. 12 miles; from Ramnaud E.S.E. 21 miles; from Vedaulay E.N.E. 3 miles. Fishing village on Gulf of Manaar, four miles west of Paumben channel.——*Mantapa shaulay* (மண்டபசாலை - mandabasálai, Tam.). From (mandapa, san. consecrated hall + shálá, san. room). Village; pop. 2,975; lat. 9° 13′; long. 79° 24′; from Madura E.S.E. 95 miles; from Ramnaud E.S.E. 36 miles; from the sea W. ¼ mile. Mission station.——*Marcauyaputnam* (மரக்காயப்பட்டணம் - marakkáyappattanam, Tam.). From (maraikkáyan, tam. member of so called mahomedan class + pattana, san. city). Village, Port; pop. 130; lat. 9° 17′; long. 79° 11′; from Madras S.S.W. 276 miles; from Madura E.S.E. 82 miles; from Vedaulay E. 14 miles; from Ramnaud E.S.E. 20 miles; from Moottoopett E. 1¾ miles. On the Gulf of Manaar. Trig. station in lat. 9° 16′ 32·33″; long. 79° 10′ 18·84″; height 46 feet; from Mantapam S.W. 1½ miles; from Paumben W.S.W. 6 miles; from Ramnaud E.S.E. 21 miles.——*Maunicancottah* (மாணிக்கங்கோட்டை - mánikkangóttai, Tam.). From (mánikkam, tam. proper name + kóttai, tam. fort). Trig. station; lat. 9° 54′ 35·02″; long. 78° 57′ 31·56″; height 86 feet; from Devacottah E.S.E. 7 miles; from Ramnaud N.N.E. 36 miles; from Tirvadaunay N. 9

miles.——*Moothoocoolatore* (முதுகுளத்தூர் - muthugulattúr, Tam.). See sep. title.——*Moothooputnam* (முதுப்பட்டணம் - muthuppattanam, Tam.). Means old town. Trig. station; lat. 9° 40′ 16·03″; long. 78° 50′ 53·37; height 36 feet; from Rajasingamungalam N.W. 4 miles; from Ramnaud N. 21 miles; from Tirvadaunay S.W. 10 miles.——*Moottoopett* (முத்துப்பேட்டை - muttuppéttai, Tam.). From (muttu, tam. pearl + pétttai, tam. suburb); from the fishery. Village, Port; pop. 1,336; lat. 9° 16′; long. 78° 58′; from Keelakaray E.N.E. 10 miles; from Madras S.S.W. 275 miles; from Marcauyaputnam E. 15 miles; from Madura S.E. 66 miles; from Ramnaud S.S.E. 8 miles. Hamlet of Periyaputnam. Fishing village on Gulf of Manaar, chiefly inhabited by Roman catholics. Large Roman catholic church, Goanese priest. Mahomedar inhabitants are chunk-fishers [chunk].——*Moottoorny* (முட்டூறணி - muttúrani, Tam.). From (muttu, tam. rising ground + úrani, tam. fountain). Trig. station; lat. 9° 17′ 25·76″; long. 78° 19′ 02·72″; from Ramnaud W.S.W. 39 miles; from Tirshooly S.S.E. 17 miles.——*Mosal teev* (முசற்றீவு - musattívu, Tam.). Means hare island. Trig. station; lat. 9° 12′ 26·61″; long. 79° 06′ 41·90″; height 1 foot; from Ramnaud S.E. 19 miles.——*Neinaurcoil* (நயினார்க்கோவில் - nayinárkkóvil, Tam.). From (nayinár, tam. aiyyanár, the god + kóyil, tam. temple). Tam. also (maruthúr), meaning marootham tree, terminalia tomentosa, bedd., var. typica + village. Village; pop. 1,085; lat. 9° 33′; long. 78° 44′; from Madura E.S.E. 46 miles; from Ramnaud N.W. 16 miles; from the sea W. 16 miles. Old Shiva temple in the centre of the village well sculptured. Two annual festivals in April and July. Trig. station in lat. 9° 32′ 26·64″; long. 78° 44′ 26·67″; height 69 feet; from Maroothoor S. ½ mile; from Ramnaud N.W. 16 miles.——*Nullatunniteev* (நல்லதண்ணித்தீவு - nallathannittívu, Tam.). From (nalla, tam. fresh + tannír, tam. water + tívu, tam. island). Sanscrit name (shuddhódakadvípa), meaning the same. Island uninhabited; lat. 9° 06′; long. 78° 37′; from Madura S.S.E. 62 miles; from Ramnaud W.S.W. 24 miles. The island is by the Zemindar planted with trees of all sorts.——*Numboodalay* (நம்புதலை - nambuthalai, Tam.). From (namban, tam. shiva + talai, tam. place). Village, Port; pop. 1,947; lat. 9° 44′; long. 79° 03′; from Madras S.S.W. 245 miles; from Madura E.S.E. 62 miles; from Poothooputnam N.N.E. 4 miles; from Ramnaud N.N.E. 27 miles; from Tondy S.W. 1½ miles. On Palk's bay. A fishing village. Trig. station in lat. 9° 44′ 02·67″; long. 79° 02′ 49·73″; height 3 feet; from Ramnaud N.N.E. 28 miles; from Tirvadaunay S.E. 6 miles; from Tondy S.W. 1¼ miles.——*Ooppootunniteev* (உப்புத்தண்ணித்தீவு - upputtannittívu, Tam.). From (uppu, tam. salt + tannír, tam. water + tívu, tam. island). Sanscrit name (lavanódakadvípa), meaning the same. Island uninhabited; lat. 9° 05′; long. 78° 32′; from Madura S.S.E. 60 miles; from Ramnaud W.S.W. 30 miles. Close to Nullatunniteev covered with low shrubs.——*Oorannancoody* (ஊரண்ணன்குடி - úrannangudi, Tam.). From (úrannan, tam. proper name + kudi, tam. village). Trig. station; lat. 9° 37′ 21·73″; long. 78° 57′ 33·53″; height 13 feet; from Ooppoor N. ¾ mile; from Ramnaud N.N.E. 18 miles; from Tirvadaunay S. 11 miles.——*Oottaracoshamungay* (உத்தரகோசமங்கை - uttarakkósamangai, Tam.). From (uttara, san. north + kósha, san. véda + mangai, tam. goddess). Trig. station; lat. 9° 18′ 52·33″; long. 78° 46′ 52·41″; height 65 feet; from Ramnaud W.S.W. 8 miles.——*Oppilaun* (ஒப்பிலான் - oppilán, Tam.).——From a person of that name. Trig. station; lat. 9° 08′ 13·40″; long. 78° 33′ 36·17″; from Moothoocoolatore S. 13 miles; from Periyacoolam S. 1¾ miles; from Ramnaud W.S.W. 26 miles.——*Palamanaar* (பலமன்னார் - palamannar, Tam.). From (pazha, tam. old + mannár, tam. place so called). Village. In Manaar island.——*Pandalgoody* (பந்தற்குடி - pandargudi, Tam.). From (pandal, tam. booth + kudi, tam. village). Sub-division, Zemindarry, Village; pop. 5,114; lat. 9° 23′; long. 78° 09′; from Madura S. 36 miles; from Ramnaud W.N.W. 50 miles; from the sea N.W. 28 miles. Peshcush Rs. 8,140. Best stone choonam [q.v.] in this province. Saltpetre [shorah] manufactured. Weekly market on Saturday. Trig. station in lat. 9° 23′ 30·36″; long. 78° 08′ 22·24″; from Andiputty S.S.E. 51 miles; from Ramnaud W. 50 miles; from Tirshooly S.S.W. 12 miles.——*Paramacoody* (பரமக்குடி - paramakkudi, Tam.). See sep. title.—*Paulvanuttam* (பாலவனத்தம் - pálavanattam, Tam.). From (pálavan, tam. proper name + nattam, tam. habitation). Sub-division, Zemindarry, Village; pop. 2,430; lat. of village 9° 34′; long. 78° 03′; from Madura S.S.W. 25 miles; from Ramnaud W.N.W. 58 miles; from the sea N.N.W. 40 miles. Peshcush Rs. 8,204. Old Shiva temple built by Soondra paundyan [soondra paundy tevar].——*Paumben* (பாம்பன் - pámban, Tam.). See sep. title.——*Pausiputnam* (பாசிப்பட்டணம் - pásippattanam, Tam.). From (pási, tam. seaweed + pattana, san. city). Village, Port; lat. 9° 49′; long. 79° 07′; from Damodaraputnam N.N.E. 1½ miles; from Madras S.S.W. 240 miles; from Madura E.S.E. 64 miles; from Ramnaud N.N.E. 34 miles; from Soondrapaundyaputnam S.S.W. 2 miles. On Palk's bay. Northernmost coast village of Madura.——*Pausiyaur* (பாசியாறு - pásiyáru, Tam.). From (pási, tam. moss + áru, tam. river). River. Lower branch of the Varshalaiyaur.——*Periyaputnam* (பெரியப்பட்டணம் - periyappattanam, Tam.). Means large town. Trig. station; lat. 9° 15′ 05·62″; long. 78° 57′ 03·26″; height 16 feet; from Ramnaud S.S.E. 9 miles; from Vunnaungoondoo S.S.E. 3 miles.——*Pishauch mundalam* (பிசாசமண்டலம் - pisásumandalam, Tam.). Means spirit region. Trig. station; lat. 9° 19′ 38·12″; long. 79° 21′ 11·49″; height 5 feet; from Paumben E.N.E. 7 miles; from Ramnaud E. 32 miles.——*Pogalore* (போகளூர் - pógalúr, Tam.). From (pugazh, tam. praise + úr, tam. village). Village; pop. 1,395; lat. 9° 24′; long. 78° 45′; from Madura S.E. 52 miles; from Ramnaud W.N.W. 9 miles; from the sea W. 15 miles. Ancient capital of Ramnaud. Below a large lake. Ceremony performed here on installation of the zemindar as Saitoopaty.——*Poolaputty* (புலப்பட்டி - pulappatti, Tam.). From (pulam, tam. field + patti, tam. village). Trig. station; lat. 9° 14′ 13·70″; long. 78° 25′ 07·95″; from Moothoocoolatore S.W. 12 miles; from Ramnaud W.S.W. 33 miles.——*Pooliyamputty* (புளியம்பட்டி - puliyambatti, Tam.). From (puli, tam. tamarind tree, tamarindus indica, linn. + patti, tam. village). Otherwise Black station. Trig. station; lat. 9° 31′ 04·00″; long. 78° 05′ 26·93″; from Aroopoocottah W.N.W. 4 miles; from Ramnaud W.N.W. 55 miles; from Tirshooly W. 11 miles.——*Poomooritchan* (பூமுரிச்சான் - púmuriççán, Tam.). Trig. station; lat. 9° 14′ 30·51″; long. 79° 13′ 18·16″; height 29 feet; from Paumben S.W. 4 miles; from Ramnaud E.S.E. 25 miles.——*Poragoody* (பொரைகுடி - poragudi, Tam.). From (porai, tam. mountain + kudi, tam. village). Trig. station; lat. 9° 29′ 45·66″; long. 78° 55′ 52·11″; from Deviputnam N.N.W. 1¼ miles; from Ramnaud N.N.E. 9 miles.——*Rajasingamungalam* (இராசசிங்கமங்கலம் - irásasingamangalam, Tam.). From (rájá, san. king + singam, tam. lion + mangala, san. prosperity). Talook head-quarters; pop. 4,519; lat. 9° 38′; long. 78° 53′; from Madura E.S.E. 53 miles; from Ramnaud N. 18 miles; from the sea W. 8 miles. An ancient Shiva temple.——*Ramappayyan's causeway* (இராமப்பையனணை - irámappaiyananai, Tam.). From (irámappaiyyan, tam. proper name + anai, tam. causeway). Between Mantapam and Paumben. Erected by Ramappayya, general of Trimal naick [q.v.], in order to capture Dalavoy saitoopaty, who had taken refuge in Paumben and defied the authority of the Naick [q.v.] ruler of Madura. Now in ruins; only a few detached rocks being visible.——*Ramasawmy mutt* (இராமசுவாமிமடம் - irámasuvámimadam, Tam.). From (irámasuvámi, tam. proper name + mat'ha, san. convent). Trig. station; lat. 9° 16′ 04·40″; long. 79° 06′ 11·21″; height 36 feet; from Paulcoolam S. ¾ mile; from Ramnaud E.S.E. 16 miles.——*Rameshwaram* (இராமேசுவரம் - irámésuvaram, Tam.). See sep. title.——*Ramnaud* (இராமநாதப்புரம் - irámanáthappuram, Tam.). See below.——*Shaulagraumam* (சாளக்கிராமம் - shálakkirámam, Tam.). Means the sacred ammonite stone [shalagram]. Village; pop. 2,459; lat. 9° 37′; long. 78° 46′; from Madura E.S.E. 46 miles; from Ramnaud N.N.W. 18 miles; from the sea W. 15 miles. Inhabited by Vellaular [q.v.]. Old Shiva temple. Manufacture of brown sugar [q.v.]. Weekly market on Tuesday.——*Shayalgoody* (சாயல்குடி - shályalgudi, Tam.). From (sháyal, tam. beauty + kudi, tam. village). Village; pop. 942; lat. 9° 10′; long. 78° 29′; from Madura S.S.E. 56 miles; from Ramnaud W.S.W. 30 miles; from the sea N. 3 miles. Ancient Shiva temple. The jungles abound with deer [mrigam].——*Shendatty yendal* (செந்தட்டியேந்தல் - shendattiyéndal, Tam.). From (shendatti, tam. nettle plant, tragia involucrata, mueller, var. cannabina + éndal, tam. height). Trig. station; lat. 9° 23′ 18·06″; long. 78° 44′ 34·10″; height 45 feet; from Ariyacoody S.S.E. 2 miles; from Ramnaud W.N.W. 10 miles.——*Shircaumbore* (சிறுகாம்பூர் - shirugámbúr, Tam.). From (shiru, tam. small + kámbu, tam. bamboo, bambusa arundinacea, willd. + úr, tam. village). Trig. station; lat. 9° 52′ 29·23″; long. 79° 03′ 29·75″; height 31 feet; from Pathanacoody S. 6 miles; from Ramnaud N.N.E. 37 miles; from Tirvadaunay N.E. 10 miles.——*Shoolacaray* (சூலக்கரை - shúlakkarai, Tam.). From (shúla, san. trident + karai, tam. field). Trig. station; lat. 9° 32′ 15·95″; long. 77° 59′ 19·38″.——*Tanichanday* (தனிச்சந்தை - taniççandai, Tam.). From (tani, tam. solitary + shandai, tam. market). Trig. station; lat. 9° 13′ 06·92″; long. 78° 40′ 14·21″; height 37 feet; from Cottangoolam E.S.E. ¾ mile; from Moothoocoolatore S.E. 12 miles; from Ramnaud S.W. 17 miles.——*Taraicoody* (தரைக்குடி - taraikkudi, Tam.). From (tarai, tam. surface + kudi, tam. village). Trig. station; lat. 9° 09′ 20·11″; long. 78° 26′ 00·63″; from Cokkady S. 1¾ miles; from Moothoocoolatore S.W. 15 miles; from Ramnaud W.S.W. 34 miles.——*Tirpoollauny* (திருப்புல்லாணி - tiruppallâni, Tam.). From (tiru, tam. holy + pul, tam. grass + ani, tam. excellence). Sanscrit name (darbhashayana), meaning darbhay grass, eragrostis cynosuroides, retz. + bed; also (p'hullapura), meaning poollan, the sage + town; also (p'hulláranya), meaning poollan, the sage + forest. Village, Place of pilgrimage; pop. 2,300; lat. 9° 17′; long. 78° 52′; from Madura E.S.E. 66 miles; from Ramnaud S. 6 miles; from the sea N. 3 miles. On a commanding plain. Held sacred. Rama laid himself on a bed of darbhay [q.v.] grass here and invoked Varoonan's [q.v.] aid in crossing the straits to Lunka. Temple

to Shiva [q.v.] as Juggernaut [q.v.] highly sculptured, very sacred with inscriptions of Chola [q.v.] and Wodeyar [q.v.] dynasties [raj], dated A.D. 1374. Annual festivals in April and July.——*Tirshooly* (திருச்சுழி - tiruççuzhi, Tam.). See sep. title.——*Tirvadaunay* (திருவாடானை - tiruvádánai, Tam.). See sep. title.——*Tondy* (தொண்டி - tondi, Tam.). See sep. title.——*Tonitory* (தோணித்துறை - tónitturai, Tam.). From (tóni, tam. boat + turai, tam. ford). Village, Hamlet of Mantapam; pop. 2,925. A large choultry [q.v.] for pilgrims. ——*Varshalaiyaur* (வரிசலையாறு - varisalaiyáru, Tam.). See sep. title.——*Vaulay teev* (வாளைத்தீவு - válaittívu, Tam.). From (válai, tam. fish so called, wallago attu + tívu, tam. island). Trig. station in island; lat. 9° 11′ 11·63″; long. 78° 59′ 07·01″; height 5 feet; from Ramnaud S.S.E. 15 miles.——*Vaulimookham* (வாலிமுகம் - válimugam, Tam.). From (váli, san. myth. person + mukha, san. face). Hamlet, Port; lat. 9° 10′; long. 78° 41′; from Madras S.S.W. 294 miles; from Madura S.S.E. 64 miles; from Mookkore E. 11 miles; from Ramnaud S.W. 19 miles; from Yemanangoondoo W.S.W. 27 miles. On the west of a small bay on the Madura side of the Gulf of Manaar. This bay is the western entrance of the Paumben navigation. Good harbour for coasting vessels during land winds [q.v.] and monsoon [q.v.]. Contiguous to the bay is a large salt water lake extending 7 miles west, greatest breadth 1½ miles.——*Vedaulay* (வேடாலை - védálai, Tam.). See sep. title.——*Veeracholan* (வீரசோழன் - vírasózhan, Tam.). After a chola ruler of that name. Village; lat. 9° 33′; long. 78° 25′; from Madura S.E. 31 miles; from Ramnaud W.N.W. 34 miles; from the sea N. 32 miles. On the south bank of the Credama nuddy. Former residence of Rajahs and of great importance. Traditional residence of Chola [q.v.] king. Old Shiva temple attributed to Vicramarca paundyan. Abounds with remains of antiquity. Present population consists of Cullar [q.v.], Marwarries [q.v.], and Mussalmans [q.v.]. Weekly market on Monday.——*Veigay* (வைகை - vaigai, Tam.). See sep. title.——*Venniyore* (வென்னியூர் - venniyúr, Tam.). From (vanni, tam. the suma tree, prosopis spicigera, linn. + úr, tam. village). Trig. station; lat. 9° 48′ 57·57″; long. 78° 51′ 20·79″; height 87 feet; from Ramnaud N. 31 miles; from Tirvadaunay W.N.W. 8 miles.——*Yervaudy* (எருவாடி - eruvádi, Tam.). From (eru, tam. manure + vádi, enclosure). Village, Port; lat. 9° 14′; long. 78° 45′; from Keelakaray W.S.W. 5 miles; from Madras S.S.W. 286 miles; from Madura S.E. 62 miles; from Ramnaud S.W. 13 miles; from Yemanangoondoo W.S.W. 22 miles. On the Gulf of Manaar. Attached to Keelakaray. Trig. station in lat. 9° 13′ 30·83″; long. 78° 46′ 20·24″; height 65 feet; from Mayaucoolam S.W. 6 miles; from Moothoocoolatore S.E. 17 miles; from Ramnaud S.W. 13 miles.——**(2)** Deputy tahsildarry, Madura district. Pay Rs. 100.——**(3)** Town, Deputy tahsildar's station, Sub-registrar's office, Head-quarters of the Head assistant collector of Madura and Assistant superintendent of Police, S.P.G. high school; Madura dist., Ramnaud zemindarry; pop. 13,619; lat. 9° 22′; long. 78° 53′; from Dindigul S.S.E. 90 miles; from Kodaykarnal E.S.E. 110 miles; from Madras S.S.W. 271 miles; from Madura S.E. 62 miles; from Rameshwaram W.N.W. 33 miles; from the sea N. 9 miles. About three miles from where the Veigay empties itself into Ramnaud large tank. Surrounded by a wall and a ditch and defended by numerous small bastions, now ruined. Stormed by Trimal naick in 1638-39 and the Saitoopaty captured and taken to Madura; captured by General Smith in 1772; occupied by the British in 1792; zemindar deposed for rebellion in 1795. The place was formerly garrisoned by a company of native infantry. A mile west are the remains of the fort and palace of the Saitoopaties, called the Shoorancottay; built by Raghoonaut or khizhavan saitoopaty, 1673–1708 A.D. Near the palace is a handsome residence built by Colonel Martinez, who commanded here previous to 1804. Within the fort the majority of the inhabitants are Vellaular [q.v.] and Maravar [q.v.], depending for their livelihood upon the palace. Outside live Chetties [q.v.] and Lubbays [q.v.], in whose hands is the whole coast trade. West is an old Amman [q.v.] temple and north is an old musjid [q.v.]. A neat Protestant church belongs to the Society for the Propagation of the Gospel, who have a mission here. Two Roman catholic churches. Several large rest-houses, the resort of pilgrims passing through Ramnaud on their way to Rameshwaram. The only manufacturing industry is that of coarse cloths for native wear. Artizans [cummaulan, punchaula] are gold and silversmiths, braziers, and ironsmiths; the latter are Mussalmans and reside in the town. The east part is inhabited by manufacturers of chintzes [q.v.] and printed cloths. A market is held every Wednesday, when cotton, grain, and other provisions are brought in for sale. Ramnaud bastion trig. station in lat. 9° 21′ 54·71″; long. 78° 51′ 45·81″; height 34 feet; from Ramnaud W. 1½ miles; from Shoorancottay S. 1 mile.

RAMZAUN (رمضان - ramazán, *Hind.*). From (ramaza, ar. to scorch); it was the hot season when the name was given. Mahomedan fasting month. Ninth month of Mussalman [q.v.] year [hijra, saul], following Shabaun [maheena]. The year being lunar [maunam], each month occurs at all periods of the solar year [madhyama sowra maunam]. Ramzaun is observed as a fast [roza] because the revelation of the Koran [q.v.] began in it [leilat ool kadr]. Ramzaun ends with the Eed ool fitr [q.v.]. Both sufficiently described at vol. I (97). Sometimes alam; as Ramzaun ally, double alam [ism].——*Ramzaunkah roza* (رمضان کا روزہ - ramazánkározah, Hind.). From (above + rozah, ar. fast). The fast of Ramzaun.——*Ramzaunkee eed* (رمضان کی عید - ramazánkíid, Hind.). From (above + íd, ar. festival). The festival following the fast of Ramzaun [eed ool fitr].

RANAM (रण - rana, *San.*). From (ran, san. to sound). War.——*Ranabhadracauly* (இரணபத்திரக்காளி - iranabattirakkáli, Tam.). From (above + bhadrakálí, san. the goddess). Goddess of war.——*Ranaveeran* (रणवीर - ranavíra, San.). From (above + víra, san. hero). The hero in war. A deity whose image stands in Ancaulamman's [q.v.] temple. Hindoo 2nd or pers. name [peyar].——*Ranavicraman* (இரணவிக்கிரமன் - iranavikkiraman, Tam.). From (above + vikrama, san. valour). The valorous in war. Hindoo 2nd or pers. name [peyar].

RAND (രണ്ടു - randu, *Mal.*). Two [ir].——*Randatarra* (രണ്ടുതറ - randutara, Mal.). From (randu, mal. two + tara, mal. village). Mal. also (póyanátu), meaning gone + country, because cherma permaul [q.v.] took his final departure to mecca from this place [colachel]. Village; Malabar dist., Chiracal tal.; lat. 11° 52′; long. 75° 33′; from Calicut N.N.W. 46 miles; from Cannanore E. 9 miles; from the sea E. 11 miles. Same as Anjarcundy.——*Ruttera* (രട്ടറ - rattara, Mal.). From (randu, mal. two + tara, mal. village). Same as Covalam in Travancore.

RANDOM SHOT (குண்டுக்கிராமம் - kundukkirámam, *Tam.*). Tam. from (gundu, tel. ball + gráma, san. village). Villages included within range of cannon fired from Fort st. david, South arcot dist., Cuddalore tal. This comprises about eleven villages round the fort purchased by the Company from the Mahrattas [q.v.] in 1690 for 32,000 pagodas [q.v.].

RANGH (वर्ण - varna, *San.*; رنگ - rang, *Hind.*; ಬಣ್ಣ - banna, *Can.*; రంగు - rangu, *Tel.*; വർണ്ണം - varnam, *Mal.*; வண்ணம் - vannam, *Tam.*). San. from (varn, san. to paint). Hind. from (rañj, san. to dye) [ranj]. Pigment. Various kinds of mineral pigments are sold in bazaars [q.v.], but only two of these are indigenous, viz., yellow ochre or gopy [q.v.], and red ochre or poon cauvy [q.v.]. A reddish-brown pigment is also obtained by roasting the yellow ochre [cauvy]. From the animal kingdom the well-known shell-lime [kilinjal choonam] is obtained and used for whitewashing houses. In the vegetable kingdom there is indigo [q.v.], used sometimes with oil and water for paints; and a black pigment is produced by the burning of empty shells of the cocoanut [q.v.]. A yellow wash is obtained from yellow mixed with lime [choonam] according to the shade desired; a red wash from red ochre [cauvy] used as above; a blue or grey wash from indigo [q.v.] and lime [choonam] for internal work, and lime [choonam] and burnt cocoanut [q.v.] shell for external work; a pink wash from lime and red ochre mixed in due proportions; a whitewash from lime alone. In some parts the natives also use a whitish kind of earth, vellay munn [jaidy munn], for whitewashing their houses. Other colored washes can be obtained by admixture of these in varying proportions. The following are the principal pigments.——*Caroopoo* (कृष्ण - krishna, San.; کالا - kálá, Hind.; ಕಪ್ಪು - kappu, Can.; నలుపు - nalupu, Tel.; കറുപ്പ് - karuppu, Mal.; கறுப்பு - karuppu, Tam.). Dark wash. This consists of burnt cocoanut [q.v.] shells reduced to powder, used in color-washing or plastering [cauray] mixed with lime [choonam]; it forms various shades of grey. A small portion mixed with yellow or red tones down those colors.——*Gopy* (गोपीचन्दन - gópíchandana, San.; گوپی - gopí, Hind.; ಗೋಪಿಚಂದನ - gópichandana, Can.; పసుపుకావి - pasupukávi, Tel.; ഗോപി - gópi, Mal.; கோபிச்சந்தனம் - kóbiççandanam, Tam.). San. from (gópí, san. a cowherd's wife + chandana, san. sandal). Tel. from (pasupu, tel. yellow + kávi, tel. ochre). Title otherwise Manjalcauvy, Yellow ochre. Is the pigment commonly used in color-washing buildings. May be used with water or oil. If burnt it passes into red ochre [cauvy], and various shades of warm tints can be obtained by mixing these together. It is well adapted for distemper work and does not lose its color when mixed with lime [choonam].——*Poon cauvy* (रक्तोपल - raktópala, San.; گیرو - gerú, Hind.; ಕಾವಿಕಲ್ಲು - kávikallu, Can.; ఎర్రకావి - errakávi, Tel.; കാവി - kávi, Mal.; பூங்காவி - púngávi, Tam.). Title from (pú, tam. flower + kávi, tam. ochre). San. from (rakta, san. red + upala, san. stone). Can. from (kávi, can. red ochre + kallu, can. stone). Tel. from (erupu, tel. red + kávi, tel. ochre). Red ochre. Used with water or oil.——*Sookkaun cull* (मृत्स्ना - mritsná, San.; کھری - kharí, Hind.; ಸುದ್ದಿಮಣ್ಣು - suddimannu, Can.; సుద్ద - sudda, Tel.; ചേടി - chéti, Mal.; சுக்கான்கல் - shukkángal, Tam.). Title from (shukkán, tam. lime + kal, tam. stone). San. from (mrit, san. earth). Can. from (shuddhi, can. pure + mannu, can. earth). Tel. from (shuddha, san. purity). Pipe clay. Used as a primary coat. When purified, is used for sectarial marks [naumam] on foreheads.——*Vellay* (श्वेत - shvéta, San.; سفیدہ - sufedah,

Hind.; ಬಿಳುಪು - bilupu, Can.; తెలుపు - telupu, Tel.; വെള്ള - vella, Mal.; வெள்ளை - vellai, Tam.). Whitewash from calcined chalk [sheemay choonam] shells almost equal to paint. Now much superseded by white lead [moottoo velly], which is imported at cheaper rates [shauyam].

RANGOON (இரங்கூன் - irangún, *Tam.*). Means war-end. Chief town in Lower Burmah.——*Rangoon creeper* (विलायतीचमेली - viláyatíchamélí, Mahr.; رنگون کی بیل - rangúnkíbel, Dec.; రంగూనుమల్లె - rangúnumalle, Tel.; இரங்கூன்மல்லி - irangúnmalli, Tam.). Mahr. from (viláyatí, mahr. foreign + chamélí, mahr. jasminum grandiflorum, linn.). Dec. from (rangún, hind. rangoon + bel, hind. creeper). Tel. means rangoon jasmine. Tam. from (irangún, tam. rangoon + malli, tam. jasmine, jasminum sambac, ait.). Title otherwise Chinese honeysuckle, Rangoon jasmine. Botanically Quisqualis indica, linn., combretaceæ [vricsham, 55]. Shrub, with scandent branches; young branches densely pubescent; leaves opposite, ovate, quite entire, rounded or slightly cordate at the base, when young more or less villous or pubescent, afterwards almost glabrous; bracts ovate-rhomboid, acuminated, slightly hairy, particularly on the margin; spikes axillary and terminal; flowers lax, red; calycine tube slender; stamens ten, protruded, inserted into the throat of the calyx, alternately shorter; style filiform, exserted; drupe dry, five-furrowed, acutely five-angled; seed solitary, pendulous, five-angled. Extensively growing; bears during hot and rainy seasons in constant succession profuse clusters of flowers of middling size, at first white, but turning on the following day to a blood color; the fruits are about an inch in length, oval or oblong, pointed at either extremity, and sharply pentagonal; they dehisce from the apex; the woody pericarp is thin, fragile and of a deep mahogany color; it encloses a pentagonal seed nearly black when dry, yellowish and oily internally; the seeds afford 7 per cent. of an alkaline deliquescent ash; cultivated in gardens; a native of burmah and the malayan archipelago. Seeds are anthelmintic; given with honey [shahad] in electuary for expulsion of entozoa in children; in pharm. non-officinal. No other common species here.——*Rangoon kino* (رنگون کا کنیا گوند - rangúnkákinyágond, Hind.). Same as Padouk.

RANJ (रञ्ज - rañj, *San.*). To redden, dye; to be affected, please.——*Racta chamoondy* (இரத்தசாமுண்டி - irattasámundi, Tam.). From (rakta, san. blood + chámundi, san. the goddess). One of the seven matrons [mautah] in the temple of Ayenaur [ayen].——*Ractam* (रक्त - rakta, San.). From (rañj, san. to redden). Red. So also blood.—"*a*" Plant first term, in the sense of red. Ex., where transl. is of second term:—Adhatoda vasica (raktapittaghní), meaning plethora + killing; Bombax malabaricum (raktapushpá), flower; Dioscorea purpurea (raktálu), esculent root; Ipomæa batatas (raktapindaka), ball; Mangifera sylvatica (raktámra), mango; Plumbago rosea (raktashikhá), crest; Pterocarpus santalinus (raktachandana), santalum album; Ventilago maderaspatana (raktavallí), creeper. See gloss. paragraphs.—"*b*" Plant second term. Ex.:—Crocus sativus (bhavaraktá), meaning shiva's blood; Hibiscus hirtus (pushparaktá), meaning flower blood. See gloss. paragraphs.——*Ractaumram* (रक्ताम्र - raktámra, San.). From (rakta, san. red + ámra, san. mango tree, mangifera indica, linn.). Title otherwise Gamboge tree, Mangosteen, Red mango. Botanically the Garcinia genus, guttiferæ [vricsham, 22]. Evergreen trees or shrubs, mostly natives of tropical india; yield a viscid, yellow, acrid and purgative resinous juice or gamboge [q.v.], which is obtained by removing the bark, or by breaking the leaves or young shoot; fruits of many species eaten; leaves glossy, laurel-like, leathery; flowers white or yellow, arranged in clusters or in panicles; wood close-grained, hard. The species best known to the natives are:—cambogia [malabar gamboge], indica [mate mangosteen], mangostana [mangosteen], morella [ceylon gamboge], morella, var. pedicellata [siam gamboge], pedunculata [tickor], xanthochymus [yellow mangosteen]. Other s. indian species indigenous or naturalized are:—cowa, eugeniæfolia, travancorica, wightii.——*Racteshwary* (रक्तेश्वरी - raktéshvarí, San.). From (rakta, san. red + íshvarí, san. goddess). Doorga [q.v.].——*Raggy* (रागी - rágí, San.). See sep. title.——*Rajas* (रजस् - rajas, San.). From (ranj, san. to dye). Passion. One of the three cosmic qualities; the other two being Satwam [q.v.] and Tamas [goonam, tamas].——*Rajogoonam* (रजोगुण - rajóguna, San.). The second property of humanity, the quality of passion [goonam].——*Rangh* (رنگ - rang, Hind.). See sep. title.——*Raugam* (राग - rága, San.; راگ - rág, Hind. and Dec.). From (rañj, san. to be affected). Properly signifies an affection of the mind; thence a mode of music, each mode being intended to move one of such. The six primary modes, in the system ascribed to Pavana, were ranged according to the six ritoos [q.v.] or seasons, each consisting of two months [mausam]. In mythology, the raugams are modes, or melodies personified, six or more in number; the Rauginies are their consorts, and the Raugapootras are their sons. Both the latter are secondary and derived raugams [sangeetam, swaram].——*Raugola* (రాగోల - rágóla, Tel.). From (rága, san. mode of music + kóla, tel. stick). A pitch-fork.——*Raujasam* (राजस - rájasa, San.). Relating to rajas or passion. Raujasam, taumasam and sautwicam are choler, depravity, and purity [goonam].——*Raury* (రావి - rávi, Tel.). Means red. Same as Peepul. Cf.:—Ficus vagans (kondarávi), hill peepul; Michelia champaca (gangarávi), large peepul; Thespesia populnea (gangarávi), excellent peepul. See gloss. paragraphs.——*Retty* (रत्ती - ratí, Mahr.; رتی - rattí, Hind.; రతి - rati, Tel.). From (rakta, san. red). Seed of the abrus precatorius, linn. [indian liquorice], used as a goldsmith's weight. 4 dhauns or paddy grains = 1 retty; 8 retties = 1 mausham [niray, 3e]. Used as the basis of weights for gold, silver and drugs; the seed varies, but from various trials appears to average about $1\frac{3}{16}$ths of a grain; the artificial weight has been found to average nearly $2\frac{1}{4}$ grains. Same as sanscrit Goonjam, hindostany Gocmchy or goonj, canarese and teloogoo Gooriginja, malayalam Coonnycooroo, and tamul Coondrimany. See vol. I, 609; II, 518. In arabic and persian called Cock's eyes. Also called Prayer bead; compare specific name of plant.——*Rungabhashyam* (இரங்கபாஷியம் - irangappásiyam, Tam.). From (ranga, san. vishnu + bháshya, san. short for bháshyakára, san. the commentary maker); meaning ramaunoojan who is supposed to be a form of vishnoo or sheshan incarnate. Hindoo 2nd or pers. name. Common among Veishnavas [peyar].——*Rungam* (रङ्ग - ranga, San.). From (ranj, san. to please); place of pleasure. River-island, raised platform or stage of theatre, so any place of public amusement or assembly. Vishnoo [q.v.] worshipped in the river island at Shreerungam. Compare Sabhay and Ambalam. Applied to females. Also suffix in proper names as Vencatrungam, Vijiarungam [peyar].——*Rungammah* (రంగమ్మ - rangamma, Tel.). From (ranga, san. vishnu + amma, tel. mother, titular affix). Familiarly Rungoo, Rungy. Proper name [peyar].——*Rungamunnaur* (இரங்கமன்னா - irangamannár, Tam.). From (ranga, san. vishnu + mannan, tam. king); epithet of vishnoo at Shreerungam. Hindoo 2nd or pers. name [peyar].——*Rungan* (இரங்கன் - irangan, Tam.). Feminine Rungy, familiarly Rungoo. Hindoo 2nd or pers. name [peyar].——*Runganautan* (रङ्गनाथ - ranganát'ha, San.). From (ranga, san. vishnu, island god + nát'ha, san. lord). Vishnoo, as lord of Shreerungam.——*Rungappah* (ರಂಗಪ್ಪ - rangappá, Can.). From (ranga, san. vishnu + appa, can. father, titular affix). Hindoo 2nd or pers. name [peyar].——*Rungappan* (இரங்கப்பன் - irangappan, Tam.). From (ranga, san. vishnu + appan, tam. father, titular affix), vishnoo, the father. Hindoo 2nd or pers. name [peyar].——*Runga row* (రంగారావు - rangarávu, Tel.). Name + third name. Title given by the fowjdar [q.v.] of Chicacole to one Peddaroyadoo for rescuing his son out of the hands of certain rebels, for which he was rewarded with Rajam estate since known as Bobbily. The title has been borne by all his successors [charitram]. See vol. I, 60.——*Rungasawmy* (இரங்கசாமி - irangasámi, Tam.). From (ranga, san. vishnu + svámi, san. master); epithet of vishnoo, lord of the island, Shreerungam. Hindoo 2nd or pers. name [peyar]. Nearly as common as Ramasawmy.——*Rungasawmy's peak* (ರಂಗಸ್ವಾಮಿಮಲೆ - rangasámimale, Can.). From (rangasvámi, san. the deity + male, can. hill). Hill; Neilgherry dist., Paranginaud div.; lat. 11° 27′; long. 77° 01′; height 5,865; from Coonoor E.N.E. 14 miles; from Ootacamund E.N.E. 18 miles. At extreme E. of Neilgherries, at top of Guzzelhutty pass [ghaut]. Conical shape. The god of this place is worshipped by all the hill tribes.——*Rungasheshan* (இரங்கசேசன் - irangasésan, Tam.). From (ranga, san. vishnu + shésha, san. the serpent god), sheshan, the serpent god with vishnoo. Hindoo 2nd or pers. name [peyar].——*Rungiah* (రంగయ్య - rangayya, Tel.). From (ranga, san. vishnu + ayya, tel. master, titular affix). Hindoo 2nd or pers. name [peyar].

RASAM (रस - rasa, *San.*; पार - pára, *Mahr.*; زیبق - zíbak, *Ar.*; سیماب - símáb, *Pers.*; پارا - pára, *Hind.* and *Dec*; رسا - rasa, *Malay*; ಪಾದರಸ - pádarasa, *Can.*; ಪಾರದ - párada, *Too.*; పాదరసము - pádarasamu, *Tel.*; രസം - rasam, *Mal.*; රසදිය - rasadiya, *Singh.*; இரசம் - irasam, *Tam.*). Title means juice, essence. Ar. from persian. Pers. from (sím, pers. silver + áb, pers. water). Hind. from (párada, san. mercury). Malay from sanscrit. Can. from (páda, san. foot + rasa, san. essence); by corruption from (páradarasa), meaning quicksilver. Tel. from (páda, san. foot + rasa, san. essence), but really like canarese. Singh. meaning mercury + water. Tam. from sanscrit. San. also (súta), meaning producing, supposed to produce gold from base metals, cf. rasauyanam; (párada), meaning expeller of diseases. Pers. also (jíva), from sanscrit meaning life. Title otherwise Mercury, Quicksilver. A brilliant silver-white metal, fluid at a natural temperature. Boils at 670°, and becomes solid at 40° below zero. Easily divisible into spherical globules. Hydrargyrum of chemists. Not indigenous; see vol. II, 33. Greater part is brought from Japan, both in its native state and combined with sulphur [gandhac] as cinnabar [shangarf]. No medicine so often adulterated. Impurity seen by its dull aspect; by its tarnishing, and becoming covered with a grey film; by its diminished mobility. It is commonly adulterated by lead [eeyam], bismuth, zinc [tootnaug], and tin [tagaram]. For native preparations of mercury see Raseshwaram, Rasapaspam, Rascapoor, Shangarf, Shavveeram, Rasa

sindooram. Diseases in which it is used by veidyans [q.v.] are anasarca or neercovay, ascites or mahodaram, apoplexy or asthijanny, venereal disease or maiha vyaudhy, and leprosy or cooshtam [q.v.]. Pharm. articles are numerous and well known. The tamul shastram, Congana neinaur nool is a work on preparations of mercury, and other powerful minerals. Similarly Bhoga neinaur tirmuntram. In sanscrit, the most celebrated works are Rasa ratna samootchayam, Rasa sauram and Rasa ratnaucaram. The following are the different kinds of Rasam. For cinnabar see Shangarf, for corrosive sublimate see Shavveeram, for black sulphide of mercury see Cajjaly.——*Rasa choornam* (रसचूर्ण - rasachúrna, San.; இரசச்சுண்ணம் - irasaççunnam, Tam.). From (rasa, san. mercury + chúrna, san. powder). Peroxide of mercury.——*Rasa goondoo* (രസമണി - rasamani, Mal.; இரசக்குண்டு - irasakkundu, Tam.). Mal. from (rasa, san. mercury + mani, san. bead). Tam. from (rasa, san. mercury + kundu, tam. ball). A globular glass filled with mercury as a decoration at weddings. Also called Rasa coodookkay, meaning mercury bottle.——*Rasa paspam* (रसभस्म - rasabhasma, San.; کشتۂسیماب - kushtahisímáb, Pers.; پارے کی خاک - párekíkhák, Hind.; రసభస్మము - rasabhasmamu, Tel.; രസഭസ്മം - rasabhasmam, Mal.; இரசப்பற்பம் - irasapparbam, Tam.). From (rasa, san. mercury + bhasma, san. ashes). Pers. from (kushtah, pers. calcined + símáb, pers. mercury). Hind. from (párá, hind. mercury + khák, hind. ashes). Calcinated mercury. Sulphate of mercury. Hydrargyri sulphas of chemists. The following recipe for preparation is taken from Agastya veidya einnoor:—Twelve pagodas [q.v.] weight of sulphur [gandhac] is to be puti nto an earthen pot, and fused over a slow, but strong fire; when in a state of fusion, eighty pagodas weight of quicksilver must be added to it, and kept gently stirred till the whole is reduced to a black powder; another pot is then to be taken, and filled half full of small pieces of brick [shengal], over which is to be laid one measure of common salt [ooppoo]; on the top of this salt is to be put the black powder just mentioned, covering the whole with another earthen vessel; the part where the mouth of the two vessels meet is to be well coated over with soft clay, and afterwards bound round with five piles of coarse cloth; the pots thus joined are then to be placed on a strong fire, and there to be kept for twelve hours; after which time they are to be taken off and left to cool, when the rasa paspam will be found collected in the uppermost. According to the same the mode of administering is as follows:—Four pagodas weight of omam [ajwaun] seed must be roasted, and reduced to a powder; four pagodas weight of palmyra [q.v.] jaggery [q.v.] is to be added to this, and the whole to be well ground; eight fanams [q.v.], weight of the rasa paspam is then to be mixed with the other two ingredients, when all are to be rubbed together for a considerable time, and afterwards made into sixteen boluses; one of which is to be taken morning and evening for eight days, at the end of which period the mouth will generally be found to be much affected. The Einnoor says that rasa paspam is a most useful and efficacious remedy in eighteen different kinds of contractions of the sinews, the same number of granty or venereal affections, twenty sorts of scurvy eruptions, the dangerous ulcer which makes its appearance over or near the back-bone [rajah boil], the boil which assumes the appearance of an ant-hill, in spreading or corroding sores, swellings on the neck or scrofulous affections and leprosies [cooshtam].——*Rasa sindooram* (रससिन्दूर - rasasindúra, San.; రససింధూరము - rasasindúramu, Tel.; இரசசெந்தூரம் - irasasendúram, Tam.). From (rasa, san. mercury + sindúra, san. vermilion). Red precipitate of mercury. Hydrargyri oxidum rubrum of chemists. Used by native practitioners as an escharotic, and for cleaning foul ulcers. Veidyans [q.v.] prepare it in the following manner:—Ten pagodas [q.v.] weight of tootnaug [q.v.] or zinc is first melted in an earthen pot, in a sand-bath, after which ten pagodas weight of rasam or quicksilver is added to it. Two and-a-half pagodas weight of blue vitriol [mayil toottam] and twenty pagodas weight of nitre [shorah] are then reduced to fine powder, which fine powder is sprinkled over the metals, at the same time stirring the whole with the root of the plant, Amarantus campestris, willd. [field spinach]; this having been done, the heat of the sand-bath is increased, and the process continued till such time as the Rasa sindooram is found.——*Rasauyanam* (रसायन - rasáyana, San.). From (rasa, san. mercury + ayana, san. manner). Originally alchemy, the art of converting base metals [loham] into gold [pon]; later chemistry [ilm, shastram].——*Rascapoor* (रसकर्पूर - rasakarpúra, San.; رسکپور - raskapúr, Hind. and Dec.; రసకర్పూరము - rasakarpúramu, Tel.; രസകർപ്പൂരം - rasakarppúram, Mal.; රසකර්පූර - rasakarpúra, Singh.; இரசக்கருப்பூரம் - irasakkaruppúram, Tam.). From (rasa, san. mercury + karpúra, san. camphor), being white like camphor. Calomel. Otherwise Bichloride of Mercury. Hydrargyri sub-chloridum of chemists. Impure as procured in the bazaar [q.v.] and there contains some perchloride or corrosive sublimate [shavveeram]. The article should properly be white, with an acrid metallic and persistent taste, without smell; in small crystals or in semi-transparent masses. It has been long known to natives. The following method of preparing it is taken from the Poorna sootram:—Sixteen pagodas [q.v.] weight of sulphur [gandhac] is to be fused in an earthen pot; after which eighty pagodas weight of quicksilver is to be added to it, and the whole to be kept stirred until reduced to a black powder; another earthen vessel is then to be taken and filled half full of small pieces of brick [shengal], over which is to be laid half a measure of common salt [ooppoo]; upon the top of this salt is to be put the black powder, and the whole to be covered with another empty earthen pot; the part where the mouths of the two pots meet is now to be well coated with soft clay and bound round with seven piles of coarse cloth. The two vessels, thus joined with their contents, are to be kept on a strong fire for twelve hours, and then the pots are to be taken off and left to cool. When perfectly cool, the uppermost is to be carefully removed from the other; when in the uppermost will be found a whitish saline substance in a lump. A sort of phial called cooppy [q.v.] is then to be well coated over in every part with clay, which phial is to be half filled with the white saline substance just mentioned. An open hollow earthen vessel is now to be taken, and, after being filled quarter full of river sand [manal], is to be placed upon a strong fire; into this sand thus heated is to be set the bottom of the cooppy, at the same time heaping up fresh sand to near its mouth. In this situation the white saline substance is to be kept purifying or subliming from six in the morning until twelve in the middle of the day, at which time the fire is to be extinguished and the whole left to cool until six in the evening; then again the fire is to be lighted and kept burning until twelve o'clock at night; and in this manner is the process to be continued for three days successively; after which period the rascapoor will be found in the upper part of the cooppy. Veidyans [q.v.] employ it for external and internal use more frequently than any other preparation of mercury. When given in a large dose, or its use continued for some time, it is apt to produce salivation, purging, palsy and erethism. Is purgative in moderate doses, and alterative in small. It is also used as an ointment, gargle, lotion, &c., in various complaints. According to Poorna sootram the mode of administering is thus;—One copper cash [q.v.] weight of palmyra [q.v.] jaggery [q.v.] and a quarter of a silver fanam [q.v.] weight of the rascapoor are to be well mixed together and made into a bolus; one half of which is to be taken in the morning and the other half in the evening, till the mouth is properly affected. In stronger habits double this dose may be given. When the rascapoor is administered in nervous or convulsive habits, or when the stomach is weak, five grains of long pepper [q.v.] must be added to the bolus. Rascapoor is according to the Poorna sootram a medicine of great efficacy in all the the eighteen kinds of leprosy [cooshtam], in twenty sorts of scurvy eruptions, in contractions of the sinews, in the venereal disease, in the dangerous ulcer which comes over the back-bone [rajah boil], in spreading ulcers, in deep-seated sores, in fistulas, in infectious itches, and in a certain species of hypochondriasis.——*Raseshwaram* (रसेश्वर - raséshvara, San.; రసము - rasamu, Tel.). From (rasa, san. fluid + íshvara, san. lord); as being the most valuable and useful of fluids. Same as Rasam. For the philosophical sect so called see Sarwa darshana sangraham.——*Rasnah* (रास्ना - rásná, San.; رسنا - rasná, Hind.; కణపబదనిక - kanapabadanika, Tel.). Title from hindostany. San. from (rasa, san. juice) [galangal]. Hind. from sanscrit meaning tasty. Tel. from (kanapa, tel. barringtonia acutangula, gærtn. + badanika, tel. parasitic plant). San. also (vandáka), meaning praising, parasitical; (gandhanákuli), meaning fragrant ichneumon plant; (vriksharuha), meaning growing on tree. Tel. also (chitteduru), meaning small + bamboo, bambusa arundinacea, willd.; (mar-dáru); (vadanika). Title otherwise Ichneumon plant, Vanda. Botanically Vanda roxburghii, r. br., orchidaceæ [vricsham, 141]. Generic from sanscrit. Alias Cymbidium tessaloides. Stem short, thick; leaves obliquely three-toothed at the apex; racemes erect, longer than the leaves; sepals and petals oblong-obovate, wavy, tessellated, obtuse; middle lobe of the lip convex, ovate, emarginate, very obtuse, channelled, obtusely callous before the spur, auricles acuminate, nearly equalling the column. Flowers above checkered with yellow and dusky ferruginous purple, beneath white; flowering nearly all the year. Root fragrant, bitter and useful in rheumatism. No other common species here.——*Rasoot* (رسوت - raswat, Hind.). From (rasa, san. juice + vat, san. suffix of possession). Watery extract from sliced root of berberry [q.v.].——*Rastauly* (రస్తాళి - rastáli, Tel.; இரசதாளி - irasathálí, Tam.). From (rasa, san. juice + dálu, tel. color). Having good color and taste. Same as Plantain.

RASHEED (رشيد - rashíd, *Hind.*). From (rushada, ar. to lead aright). Prosperous, rightly directed. Also director. Attribute of God [allah]. Forms an alam; as Abdoor rasheed, slave of god. Also part of lacab; as Rasheed ood dowlah, director of the kingdom [ism].

RASOOL (رسول - rasúl, *Ar.*). From (rasala, ar. to send message). Messenger. Lacab of the prophet. Common alam; as Ghoolaum rasool, slave of the prophet [ism].

RATA (රට - rata, *Singh.*). From (ráshtra, san. country). Foreign [europe, faranghee, firangy, foreign, seema, vilaayaty].——*Ratadel* (රටදෙල් - ratadel, Singh.). Same as Foreign jack.

RATANHIA (कुकुरजिह्वा - kukurajihvá, *San.*; कर्कनि - karkani, *Mahr.*; అంకదోస - ankadósa, *Tel.*). Title from portuguese. San. from (kukura, san. dog + jihvá, san. tongue). Tel. from (anka, tel. side + dósa, tel. country melon). Title otherwise Ankados, Bois de sureau, Dino. Botanically Leea sambucina, willd., ampelideæ [vricsham, 42]. Alias Leea gigantea, ottilis, staphylea. Stems shrubby, with straight branches, leaves pinnate or tripinnate, often 3½ by 4 feet, leaflets stalked, very variable in size and shape, nerves arcuate; flowers greenish-white, anthers connate; fruit the size of a small cherry [q.v.], dry; grows in patches in thick jungle, looking something like elder; the root is woody, porous and tough, and covered with a striated, dark brown slightly scabrous bark, the internal surface of which is of a deep red color; the bark has an astringent and rather agreeable flavor. A decoction of the root is given in colic, cooling and relieves thirst; the roasted leaves are applied to the head in vertigo; the juice of the young leaves is digestive; much used in diarrhœa and chronic dysentery; a sudorific.

RATH (रथ - rat'ha, *San.*; رتھ - rath, *Hind.*). From (ramh, san. to go) [raghoo]. Chariot. The sun [sooryan], moon [chundran], and planets [graham] are all represented in the pooraunams [q.v.] as having chariots or vehicles [vauhan]. That of the sun is stated in Vishnoo pooraunam [q.v.] to be nine thousand leagues [yojanam] in length, and the pole of twice that length; that of the moon has three wheels and is drawn by ten white horses [ghorah]; the chariot of Mercury [boodhan] is composed of air and fire and is drawn by eight bay horses; the chariots of Mars [coojan, mungalan] and Jupiter [brihaspaty] are of gold [pon]. So an idol car [tair]. To every South indian temple [coil, pagoda] of any celebrity a large wooden car is attached, in which once a year an image of the divinity to whom the temple is dedicated is placed with ceremonies, and paraded in triumph, accompanied by Bramins, who are seated beside it. The car is decorated by a profusion of flags and banners, garlands of flowers, pictures, &c., and is frequently painted for the occasion. A long open space before the temple is kept level for the purpose of the procession; and ropes having been attached to the rings and axles of the large vehicle, it is dragged by as many as can lay hold of them amidst the din of drums, trumpets, and clarionets. In other cases the car is taken by a prescribed route through the streets of the town, the streets being constructed and preserved specially with a view to this occurrence. The image is afterwards removed, bathed, and put to rest, and for the year the festival is over [ratotsavam]. The tamul Cooral has the following:—உருவுகண் டெள்ளாமை வேண்டு முருள் பெருந்தேர்க் கச்சாணி யன்னா ருடைத்து—"let none be despised for size; the world has those who "resemble the linch-pin of the big rolling car." The Seven pagoda [q.v.] temples are called Raths.——*Rata saptamy* (రథసప్తమి - rat'hasaptami, Tel.). Car + seventh; so called as anniversary of a manwantaram [q.v.] when a new sun ascended his car. Lunar [chaundramaunam] festival [pundigay, 3e], subject to intercalation [adhicam]. The seventh tity [q.v.] of the waxing moon [shooclapacsham] in the eleventh lunar month Maugham [mausam] between 21st January and 19th February. On this day the present Manwantaram [q.v.] began [veiwaswatan]. The sun [sooryan] is worshipped after bathing in water mixed with the green leaves of the gigantic swallow-wort [yercum], and ancestral rites [tarpanam] are performed [maryanday].——*Ratotsavam* (రథోత్సవం - rat'hótsavam, Tel.). From (above + utsava, san. festival). Temple festival when the car [tair] with the idol [shilay, vigraham] is drawn round the streets. See Rath above [pundigay, 6d].

RAT'S EAR (शम्बरी - shambarí, *San.*; उंदीरकानी - undírakání, *Mahr.*; ఎలుకచెవ్వి - elukachevvi, *Tel.*; എലിച്ചെവി - eliççevi, *Mal.*; எலிக்காது - elikkáthu, *Tam.*). Title from leaves. San. from (sham, san. happiness + vri, san. to cover); from usefulness. Mahr. from (undura, san. rat + karna, san. ear). Tel. from (eluka, tel. rat + chevvi, tel. ear). Mal. from (eli, mal. rat + chevi, mal. ear). Tam. from (eli, tam. rat + káthu, tam. ear). Tam. also (perattai); (eliççevi), meaning rat + ear. Botanically Ipomæa [calamby] reniformis, chois., convolvulaceæ [vricsham, 93]. Alias Convolvulus reniformis; Evolvulus emarginatus. Stem creeping and rooting; leaves kidney-shaped, waved and dentate on the margin, obtuse; petioles hairy; peduncles very short, one to two-flowered; corolla small, yellow; common in places where water has lodged, flowering in the cold weather. Medicinally deobstruent and diuretic; leaves used as greens [keeray] mixed with tamarind [q.v.].

RAT SNAKE (دھامن - dhámin, *Hind.*; دھامن - dhámin, *Dec.*; జెర్రిపోతు - jerripótu, *Tel.*; ଧମନ - dhamana, *Oor.*; ചേര - chéra, *Mal.*; சாரைப்பாம்பு - sháraippámbu, *Tam.*). Title from its habit of feeding on rats. Hind. from (dháv, san. to run quickly). Tel. from (jerri, tel. centipede + pótu, tel. male); centepede's husband. Mal. from (chéru, mal. to join). Tam. from (shárai, tam. stripes + pámbu, tam. snake). Tel. also (tsárapótu), meaning stripe + male. Title otherwise Dhauman, Male cobra, Whip snake [q.v.]. Ptyas mucosus, colubridæ [paumb], ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 17], of naturalists [jantoo]. Not dangerous. Natives assert that its bite occasions blindness in persons aged above forty. Often found in company with the Cobra de Capello. It is believed by natives to breed with it. Brownish or yellowish olive with interstitial skin coloring of yellow and black scales with black tips forming a fasciolation posteriorly and often a reticulated pattern on the tail; belly greenish or yellowish white. When young this snake often has delicate green color unlike the adult. Its food consists of mammals [sastanam], birds [pacshy], and frogs [bhaicam]; it frequently enters the dwellings of man in search of mice [shoondely], rats [ely], and young fowls [moorghy]; it is of fierce habits, always ready to bite, and never becomes tame; utters when irritated a peculiar sound, not unlike that produced by a gently struck tuning fork. The natives hold that the rat snake does not bite. And there is a Malayalam proverb:—അളമുട്ടിയാൽ ചേരയും കടിക്കും—"stop its hole, even a rat snake will bite;" meaning the same as tread on a worm and it will turn. The Tamulians recognize the following different kinds. ——*Black rat snake* (నల్లచార - nallatsára, Tel.; കരിഞ്ചേര - kariñchéra, Mal.; கருஞ்சாரை - karuñjárai, Tam.).——*Hill rat snake* (மலஞ்சாரை - malañjárai, Tam.).——*Large rat snake* (పెద్దచార - peddatsára, Tel.; பெருஞ்சாரை - peruñjárai, Tam.). ——*Long rat snake* (పొడుగుచార - podugutsára, Tel.; நெடுஞ்சாரை - neduñjárai, Tam.).——*White rat snake* (తెల్లచార - tellatsára, Tel.; வெண்சாரை - vensárai, Tam.).——*Yellow rat snake* (పసిచార - pasitsára, Tel.; മഞ്ഞച്ചേര - maññaççéra, Mal.; மஞ்சட்சாரை - mañjadchárai, Tam.).

RATTA (ರಟ್ಟ - ratta, *Can.*). From (ratte, can. arm). Dynasty [raj]. By some considered to be of the same stock as Rashtracootas [q.v.] whom they succeeded. Flourished for about 3½ centuries either as feudatories of Rashtracootas or Western chalookyas [q.v.], or independent. They were of Jeina [q.v.] religion. Finally conquered by Yaudavas [q.v.] of Devagiry. Did not come much in contact with southern chiefs. See vol. I (138) [charitram].

RATTAN (روتن - rotan, *Malay*); meaning pared or trimmed. The long stem of various species of climbing palms [taur], belonging to the genus calamus [vaitasam] and its allies, of which canes are made.——*Country rattan* (वतस - vétasa, San.; वेत - véta, Mahr.; बेत - béta, Conc.; خیزران - khaizurán, Ar.; خزران - khuzrán, Pers. بیت - bet, Hind. and Dec.; روتن - rotan, Malay; ಬೆತ್ತ - betta, Can.; ಸುರಳ್ಬೆತ್ತ - suralbetta, Too.; పేము - pému, Tel.; ചൂരൽ - chúral, Mal.; වේවැල - vévala, Singh.; மெல்லிசுப்பிரம்பு - mellisuppirambu, Tam.). San. from (vé, san. to plait); from stems being split into strips which are plaited into baskets, mats, &c. Mahr. from sanscrit. Conc. from sanscrit. Ar. from (khuzara, ar. slender). Pers. from arabic. Hind. from sanscrit. Can. from sanscrit. Too. from (surali, too. coil + betta, too. rattan). Tel. from (vétra, san.). Mal. from (churul, mal. coil). Singh. from (vé, singh. rattan + val, singh. creeper). Tam. from (meli, tam. thinness + pirambu, tam. rattan). San. also (vétra), meaning plaiting plant; (dírgha-vallí), meaning long creeper; (latávamsha), meaning creeper bamboo, bambusa arundinacea, willd. Pers. also (bed). Tel. also (prabba), meaning spreading; (prabbali), meaning spreading; (níruprabba), meaning water + the plant; (sannabettamu), meaning slender + rattan; (bettamu), from (vétra, san.). Mal. also (nírvaññi), meaning water + reed; (punambu), meaning hill plant. Tam. also (pirambu), meaning hill plant; (vaníram), meaning water-rattan. Title otherwise Chair-bottom cane, Creeper bamboo, Slender rattan, Water rattan. Botanically Calamus [vaitasam] rotang, linn., palmaceæ [vricsham, 149]. Specific name from malay. Alias Calamus roxburghii. Stem scandent; fronds without tendrils, pinnæ somewhat equidistant, linear-lanceolate, acuminate; prickles of the sheaths frequent, compressed, straight, of the rachis straight and recurved, of the spathes and tendrils bent; spadix compound; male calyx three-cleft, campanulate, a half shorter than the broad triangular segments of the corolla; berries ovate, sub-globose, size of a small cherry [q.v.]; moist jungles, flowering in the rains; a very graceful small palm [taur]. Seeds are surrounded by fleshy kind of substance, which is eaten, as well as young tender shoots. Yields the best rattan cane of commerce; split into strips and plaited or woven into baskets [tokrah], chairs, sofas, and carriages; twisted into ropes, or stretched entire across rivers, as the main supports of indigenous suspension bridges; burnt makes a black paint [rangh]. The actual article chiefly used here for making the mats [boriyah] with which the floors of rooms are covered is imported from singapore.——*Walking-stick rattan* (अम्बुवेतस - ambuvétasa, San.; بری بیت - baríbet, Hind.; బెత్తము - bettamu, Tel.; ചൂരൽ - chúral, Mal.; பிரம்பு - pirambu, Tam.). San. from (ambu, san. water + vétasa, san. calamus rotang, linn.). Hind. from (barí, hind. large + bet, hind. calamus rotang, linn.). Tel. from (vétra, san. cane). Mal. from (churul, mal. coil). Tam. from (punam, tam. hill tract). San. also (sahasravédhí), meaning thousand + piercer, from confluent prickles. Tel. also (ámlavétasamu), meaning sour cane. Title otherwise Rattan-cane, Sour cane, Water cane. Botanically Calamus [vaitasam] fasciculatus, roxb., palmaceæ [vricsham,

149]. Stem scandent, elongated; fronds without tendrils; pinnæ aggregated into many distant fascicles, ensiform; prickles of the fronds straight, scattered, and confluent; spadix decompound, abortive ones whip-shaped; berries ovate. Stems when divested of their sheaths are about as thick as the forefinger; used as walking-sticks. Cf. Penang lawyer.——*Water rattan* (నీరుప్రబ్బ - níruprabba, Tel.). Title from habitat. Same as Country rattan.——*Wild rattan* (هرچرل - harcharal, Hind.; ಪನಂಬುವಳ್ಳಿ - panambuvalli, Can.; వనచంద్ర - vanachandra, Tel.; പനമ്പുവള്ളി - panambuvalli, Mal.). Tel. from (vana, tam. forest + chandra, san. moon); probably from white flowers. Mal. from (panambu, mal. rattan, calamus rotang, linn. + valli, mal. creeper). Hind. also (banchandar), meaning forest moon; (ranchandar), meaning forest moon. Title otherwise Forest moon, Rattan creeper. Botanically Flagellaria indica, l., commelynaceæ [vricsham, 139]. Perennial, scandent; leaves narrow, ending in long slender spiral tendrils, contracted and sheathing at the base; flowers terminal, panicled, bracteolate, white, inconspicuous; berries globose, red, smooth, pulpy, one-seeded, with two abortive ovules; flowering in the rains. Leaves are astringent and vulnerary. No other species here.

RATTEL (رطل - ratl, *Ar.*; ರಾತ್ಲು - rátlu, *Can.*; റാത്തൽ - ráttal, *Mal.*; இறாத்தல் - iráttal, *Tam.*). Ar. from (ratala, ar. to weigh in the hand). A weight equal to the english avoirdupois pound. Scale in Malabar:—4 west coast pollums = 1 rattel; 25 rattels = 1 toolaum [niray, 2d]. Scale in S. canara:—40 rupee weights = 1 rattel; 28 rattels = 1 canara maund [niray, 2c]. Used in Tamul districts by Lubbays [q.v.] for weighing leather [chamrah]. See vol. I, 609; II, 508, 515.

RAUBIA (رابعه - rábiah, *Ar.*). A female devotee who promoted soofeeism [soofee]. Taken as alam, as:—Raubia bee, alam + alaumat [ism].

RAUDHAY (राधा - rádhá, *San.*). From (rádh, san. to be favorable). Wife of Krishnan [q.v.]. Proper name among the Madhwas. Hindoo 2nd or pers. name [peyar]. The following is a Hindostany proverb:—اپنی رادھا کو یاد کرو—"attend to your own raudhay;" mind your own business.——*Raudha krishnan* (राधाकृष्ण - rádhákrishna, San.). From (above + krishna, san. the god). Compound name, meaning krishnan with his mistress. Vishnoo [q.v.].——*Raudhaupooram* (இராதாபுரம் - iráthâppuram, Tam. rádhápuram *). From (above + pura, san. city).—"*a*" Deputy tahsildarry, Tinnevelly district. Pay Rs. 70.—"*b*" Town, Deputy tahsildar's station; Tinnevelly dist., Nangoonairy tal.; pop. 2,235; acres 9,436; lat. 8° 16′; long. 77° 44′; from Madras S.S.W. 372 miles; from Nangoonairy S. 15 miles; from Palamcottah S. 32 miles; from Shermadevy S.S.E. 30 miles; from Shreevillipoottore S. 84 miles; from Tinnevelly S. 32 miles; from Tuticorin S.W. 49 miles; from the sea W. 7 miles. Large temple. Festival in Chittray [mausam] April-May. Weekly fair on Monday. S.P.G. mission station. The Cape comorin base line of the Great trigonometrical survey is measured from Codangoolam in the extreme south to this village. Trig. station here in lat. 8° 17′ 02·07″; long. 77° 44′ 35·95″; height 163 feet; from Nangoonairy S.S.E. 15 miles; from Vijayapathy N.N.W. 7 miles; from the sea N. 8 miles.

RAUHAT (راحت - ráhat, *Ar.*). From (rauha, ar. to be pleasant). Comfort. Prefixed to an alam forms a lacab; as Rauhat ally, comfort of ally [ism].

RAUL (सर्जरस - sarjarasa, *San.*; رال - rál, *Hind.*; گتہ - gátah, *Malay*; సజ్జరసము - sajjarasamu, *Tel.*; കുങ്കില്യം - kunkilyam, *Mal.*; குங்கிலியம் - kungiliyam, *Tam.*). Title from hindostany. San. from (sarja, san. the tree, shorea robusta, gærtn. + rasa, san. juice). Hind. from (rála, san. shorea resin). Tam. from (guggulu, san. the fragrant gum resin) [googal]. Resin. Inflammable substance of vegetable origin. Obtained either by spontaneous exudation from plants, or by extraction by heat and alcohol. Resins are solid, brittle, of a certain degree of transparency, and of a color commonly inclining to yellow. Under friction electric. When pure, they are soluble in alcohol and in oils [yennay] but not in water, in which respect they differ from gums [gond]. They are more or less acted upon by the alkalies [alkali, cauram]. The acid resins comprise rosin, dammer [q.v.], gamboge [q.v.], sandrach [q.v.], benzoin [q.v.], lac [q.v.], &c.; the neutral resins elemi [q.v.], guaiacum, dragon's-blood [q.v.], and storax [q.v.]. Europe resin from the pine [cheer] is prized by tinmen, who employ it with borax [swauga, vengauram] in soldering [pattoo]; for which purpose country resin or dammer [q.v.] does not answer so well. There are also so-called mineral resins; as amber [karbah], asphalt [shilajit], bitumen [shilajit], petroleum [naphtha, niftroomy, munnteilam] and other mineral hydrocarbons.

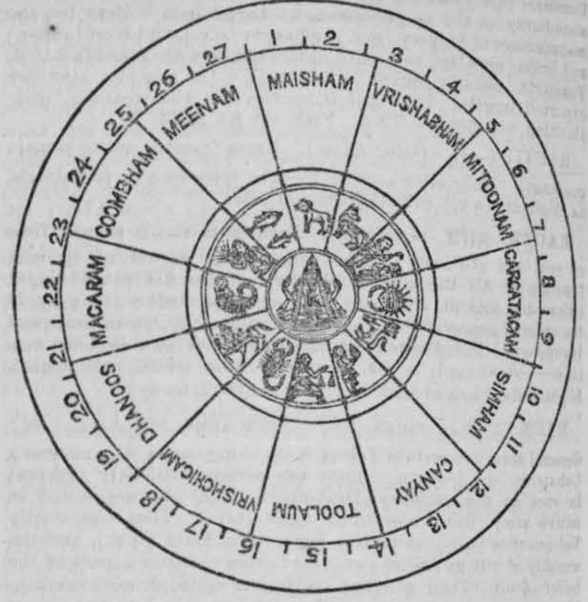
RAUNA (रान - rána, *Mahr.*). From (aranya, san. forest). Wild. Plant first term, often joining two genera. Ex., where transl. is of second term:—Jatropha curcas (ránaérandí), ricinus communis; Lagenaria vulgaris (ránabhómpalí), benincasa cerifera; Spondias mangifera (ránaámba), mangifera indica; Urginia indica (ránakándá), allium cepa; Vernonia anthelmintica (ránajírem), cuminum cyminum. See gloss. paragraphs.——*Ramoosy* (रामोसी - rámósí, San.). From (rána, mahr. forest + vásí, san. inhabitant). The Thugs' [q.v.] slang dialect.

RAUPORE (రాపూరు - rápúru, *Tel.* rápúr *). From (rádzu, tel. king + pura, san. town). The town of krishna deva royel [raj]. Sanscrit name (ráhupura), meaning rahoo, the giant + town.——(1) Talook; Nellore district. Tahsildar's pay Rs. 150. Area 596 square miles. Most southerly of the inlying Government talooks. Bounded north by Atmacore talook, south by Vencatagherry division, east by Nellore and Goodoor talooks, west by Poollampett and Sidhout talooks of Cuddapah district. The Candlair, which rises from the Veligondas, and the Vencatagherry river, run through it. These receive the drainage from the Eastern ghauts [q.v.], and uniting in the Manoobole valley flow into the Kistnapatam backwater. The Veligondas run by the west of the talook, of which Penchalcondah is a prominent peak. Penchalcondah might be made a sanitarium for Nellore, and a road is now under construction towards it. There are also some scattered hills here and there. Valuable jungle, especially at foot of Veligondas. The country is generally of black loamy soil. The sub-soil is rocky, and wells are in consequence deep and costly. Abruck [q.v.], or native talc [q.v.] is found mixed with the sand in the villages of Griddalore and Ootcore and elsewhere. Fuel exports give occupation to many. Except weaving to a limited extent in a few villages there is no industry worth mention. Tobacco [pogauk] and chillies [q.v.] and dyeing [shauyam] barks are exported to Madras. The irrigation is mostly from rain-fed tanks [q.v.]. A large number of private wells irrigate the garden lands. The largest tanks are those of Podalacore, Raupore, Sydapore and Vadlapoody. There are also large tanks irrigating more than 200 acres of their ayacut [q.v.] in the villages of Joreypully, Marpore, Rama saugaram, Siddhavaram, and Todair. Camping grounds:—Marlapoody, Podalacore, Raupore, Sydapore. Places of archæological interest:—Aultoorty, Calichaid, Chauganam, Cheecavole, Commipaud, Dausore, Deoggoonta, Gilacapaud, Gonoopulley, Goondavole, Griddalore, Marpore, Mogullore, Nairnore, Ootcore, Palicherlapaud, Pautagoonta, Penoobarty, Permaulpaud, Podalacore, Raupore, Sydapore, Taunamcherla, Toorimerla, Vadlapoody, Wooyyaulpulley, Yaipore, Yettoor, Yinoocoorty. Principal Trig. stations:—Allicondah, Ootcore, Paulcherla, Pullacondah. The leading places, &c., in the talook are the following.——*Allicondah* (అల్లికొండ - allikonda, Tel.). From (allu, tel. to spread + konda, tel hill). Trig. station; lat. 14° 22′ 41·93″; long. 79° 43′ 50·76″; height 639 feet; from Nellore W. 20 miles; from Raupore N.E. 16 miles.——*Biradavole* (బిరదవోలు - biradavólu, Tel.). From (birudu, tel. badge + prólu, tel. town). Village; pop. 1,052; acres 7,174; lat. 14° 21′; long. 79° 49′; from Nellore S.W. 16 miles; from Raupore E.N.E. 19 miles. A high bald hill, is seen for miles around as a land mark. Much reserved jungle and considerable pasture. There is a Rauzoopollem here, the Rauzooloo [rauz] having come down from the north and settled. Is on the road from Manoobole to Podalacore, 6 miles from the latter place.——*Caukoolacondah* (కాకులకొండ - kákulakonda, Tel.). From (káki, tel. crow + konda, tel. hill). Hill; lat. 14° 14′; long. 79° 32′; height 500 feet; from Nellore W.S.W. 36 miles; from Raupore N.W. 3 miles.——*Chauganam* (చాగణం - cháganam, Tel.). From (chágamu, tel. charity). Village; pop. 1,440; acres 7,473; lat. 14° 13′; long. 79° 44′; from Nellore S.W. 26 miles; from Raupore E. 10 miles. Half a mile from the right side of the road from Goodoor to Raupore, half way between Sydapore and Marlapoody which is 6 miles from Raupore. Has a large tank. The people of Rauz [q.v.] caste live in a separate pollem [q.v.]. Their houses are surrounded by high walls to protect females from public view.——*Goondavole* (గుండవోలు - gundavólu, Tel.). From (gundamu, tel. deep gorge + prólu, tel. town). Village; pop. 1,206; acres 7,532; lat. 14° 17′; long. 79° 34′; from Nellore W.S.W. 32 miles; from Raupore N. 6 miles. On the road from Raupore to Penchalcondah. Has a large tank.——*Gooticondah* (గూటికొండ - gútikonda, Tel.). From (gúdu, tel. recess + konda, tel. hill). Hill; lat. 14° 17′; long. 79° 41′; height 3,635 feet; from Nellore W.S.W. 26 miles; from Raupore N.E. 9 miles.——*Marla condah* (మర్లకొండ - marlakonda, Tel.). From (marri, tel. ficus bengalensis, linn. + konda, tel. hill). Title also Mullemcondah, hill of mountain goddess. Hill; lat. 14° 19′; long. 79° 40′; height 2,000 feet; from Nellore W.S.W. 26 miles; from Raupore N.E. 10 miles.——*Ootcore* (ఊటుకూరు - útukúru, Tel.). See sep. title.——*Paulcherla* (పాలచెర్ల - pálacherla, Tel.). From (pálu, tel. milk + cherla, tel. village). Trig. station; lat. 14° 10′ 19·11″; long. 79° 30′ 41·29″; height 2,156 feet; from Raupore S.W. 5 miles; from Yaipore S.S.W. 7 miles.——*Penchalcondah* (పెంచెలకొండ - penchelukonda, Tel.). See sep. title.——*Podalacore* (పొదలకూరు - podalakúru, Tel.). See sep. title.——*Potecondah* (పోతుకొండ - pótukonda, Tel.). From (pótu, tel. ox + konda, tel. hill). Hill; lat. 14° 15′; long. 79° 37′; height 800 feet; from Nellore W.S.W. 31 miles; from Raupore N.E. 4 miles.——*Pullacondah* (పల్లెకొండ - pallekonda, Tel.). From (palle, tel. village + konda, tel. hill). Village; pop. 365; acres 4,810; lat. 14° 26′; long. 79° 33′;

from Nellore W. 32 miles; from Raupore N. 16 miles. Trig. station in lat. 14° 24′ 19·03″; long. 79° 30′ 28·95″; height 1,178 feet; from Raupore N.N.W. 14 miles; from Tirmalpaud W.S.W. 3 miles.——*Raupore* (రాపూరు - rápúru, Tel.). See below.——*Siddhoolacondah* (సిద్ధులకొండ - siddhulakonda, Tel.). From (siddulu, tel. proper name + konda, tel. hill). Sanscrit name (siddhagiri), meaning sage + hill. Hill; lat. 14° 19′; long. 79° 47′; height 200 feet; from Nellore W.S.W. 18 miles; from Raupore E.N.E. 16 miles. Soapstone [sowcaura cull] quarries.——*Sydapore* (సైదాపురము - saidápuramu, Tel.). See sep. title.——*Toommalatalpore* (తుమ్మలతలుపూరు - tummalatalupúru, Tel.). From (tumma, tel. babul tree, acacia arabica, willd. + talupúru, tel. place so called). Village; pop. 1,202; acres 9,139; lat. 14° 18′; long. 79° 44′; from Nellore W.S.W. 22 miles; from Raupore E. 13 miles. Formerly head-quarters of a Tahsildar.——*Vadlapoody* (వడ్లపూడి - vadlapúdi, Tel.). From (vadlu, tel. paddy + púdi, tel. village). Village; pop. 2,221; acres 9,608; lat. 14° 19′; long. 79° 51′; from Nellore S.W. 15 miles; from Raupore E.N.E. 20 miles. A large village with a revenue next to Raupore. Has a large tank. Is on the road from Manoobole to Podalacore. The Candlair passes by. It is dammed and its waters are taken for irrigation to zemindarry [q.v.] villages by a canal excavated by the Zemindar [q.v.] of Vencatagherry.——*Veligonda* (వెలిగొండ - veligonda, Tel.). See sep. title.——*Yerracondah* (ఎఱ్ఱకొండ - errakonda, Tel.). See sep. title.——**(2)** Village, Head-quarters of Tahsildar; Nellore dist., Raupore tal.; pop. 3,217; acres 10,190; lat. 14° 12′; long. 79° 35′; from Madras N.W. 93 miles; from Naidoopett N.W. 32 miles; from Nellore W.S.W. 34 miles; from Ongole S.S.W. 96 miles. Remains of a fort built by Velgoty yautsama naidoo, Zemindar of Vencatagherry, and held by Krishna deva royel, subsequently by rulers of the Gajapaty [q.v.] dynasty [raj] of Vizianagram, then by the Mahomedan rulers of the Golcondah dynasty, and lastly by the Nawaub [q.v.] of the Carnatic [q.v.]. At the beginning of the present century there was a jagheerdar [q.v.] in the fort named Abd ool mabood shumsheer jung related to Nawaub wallajah [q.v.]. The fort walls are massive, and there is a fine ditch. Inside are the remains of the old palace and other buildings. Raupore has a large tank which is supplied by a hill stream. With a hill on one side and three tanks on different sides it presents picturesque scenery. A ghaut [q.v.] over the hills goes into Chitwail. A German mission. A newly built mosque [musjid].——**(3)** *Rauporecanama* (రాపూరుకనమ - rápúrukanama, Tel.). From (rápúru, tel. the town + kanama, tel. pass). Ghaut; Cuddapah dist., Poollampett tal.; lat. 14° 11′; long. 79° 26′; from Cuddapah S.E. 54 miles; from Poollampett E.N.E. 13 miles. Over the Veligondas between Cuddapah and Nellore districts [ghaut].

RAUSHY (राशि - ráshi, *San.*; راس - rás, *Hind.*; రాశి - ráshi, *Tel.*; രാശി - ráshi, *Mal.*; இராசி - irási, *Tam.*). From (ash, san. to heap). Literally a heap. Sum total in arithmetic [ganitam]. Oobhaya raushy is a heap of grain comprising both the government share [mailvauram] and the cultivator's share [coodivauram].——**(1)** A sign of the zodiac [raushy chuckram] as being a certain sum of degrees [bhaugam].—"*a*" One-twelfth part of the ecliptic [craunty mundalam] containing 30 degrees; equal to 2¼ Nacshatrams [q.v.] or lunar mansions.—"*b*" The signs are called by specific names when reckoned on the sidereal zodiac, when counted on the tropical sphere they are only called numerically. Raushy chuckram [q.v.] or Raushy mundalam [q.v.] is the zodiacal circle or zodiac. The twelve raushies are also called twelve Lagnams [q.v.].—"*c*" The terms Kriyam [maisham] *κριός*, Tauvoory [vrishabham] *ταῦρος*, Jitoomam [mitoonam] *δίδυμος*, Cooleeram [carcatacam] *κόλουρος*, Leyam [simham] *λέων*, Pauthonam [canyay], *παρθένος*, Joocam [toolaum] *ζυγόν*, Cowrpyam [vrishchicam] *σκορπίος*, Towcshicam [dhanoos] *τοξότης*, Aukokeram [macaram] *αἰγοκέρως*, Hridrogam [coombham] *ὑδροχόος*, and Antyabham [meenam], are other names for the signs of the Zodiac; all these excepting Antyabham Greek, as shown.—"*d*" In astrology the signs have the following terrestrial and applied significations:—Maisham represents cotton [q.v.] and woollen fabric [pushmeenah], leathern oil jars, beans [shimbicam], wheat [geung], raggy [q.v.], barley [jow], dry crops [dry grain] in general, and gold [pon]. Vrishabham represents cloths in general, flowers [phool], wheat [geung], rice [q.v.], barley [jow], buffalo [khoolgah] and cows [pashoo]. Mitoonam represents the autumnal crops, creepers, the root of the lily [indian water-lily] and cotton [q.v.]. Carcatacam represents kodravam [khoda], plantains [q.v.], bent grass [hurrially], fruits [pazham], roots, leaves and bark. Simham represents food grains [dhaunyam], juice, the skin of the lion and the like animals, and jaggery [q.v.]. Canyay represents common flax [alsee], barley [jow], horse-gram [q.v.], wheat [geung], kidney-beans [moodgam] and nishpauvam [cow gram]. Toolaum represents black gram [q.v.], wheat [geung], and mustard seed [rayaun]. Vrishchicam represents sugar-canes [q.v.], wet crops [q.v.], metals [loham], and woollen fabric [pushmeenah]. Dhanoos represents horses [ghorah], salt [ooppoo], cloth, weapons, gingelly [q.v.] seeds, and roots. Macaram represents trees, bushes, wet crops [q.v.], sugar-canes [q.v.], gold [pon], and black-lead [eeyam]. Coombham represents water-fruits and flowers [phool], gems [ratnam] and articles of various shapes. Meenam represents pearls [moty] and other shell gems, diamonds [vajram], various oils [yennay] and fishes [matsyam].—"*e*" Signs that rise by their feet are known as Prishtodaya raushies, viz., Maisham, Vrishabham, Carcatacam, Dhanoos, and Macaram; powerful astrologically by night. Signs that rise by their heads are known as Shírodaya raushies, viz., Mitoonam, Simham, Canyay, Toolaum, Vrishchicam, and Coombham; powerful by day. The two fish [hoot] rise by both head and foot; powerful by day and night.—"*f*" The odd numbered signs are all astrologically malefic and masculine; the even numbered signs are all benefic and feminine.—"*g*" Maisham, Carcatacam, Toolaum, and Macaram are called movable signs; Vrishabham, Simham, Vrishchicam, and Coombham are fixed signs; Mitoonam, Canyay, Dhanoos, and Meenam are both movable and fixed.—"*h*" Maisham, Simham and Dhanoos are called eastern signs; Vrishabham, Canyay and Macaram are southern signs; Mitoonam, Toolaum and Coombham are western signs; Carcatacam, Vrishchicam and Meenam are northern signs.—"*i*" The signs Maisham, Vrishabham, Macaram, Canyay, Carcatacam, Meenam, and Toolaum are respectively the ootcham or exaltation or astrologically highest signs of the sun and the six other planets [graham]; the sun and moon being here treated as planets, and the five others as per the days of the week [vauram]. Each sign is divided into 30 degrees [bhaugam]; the 10th, 3rd, 28th, 15th, 5th, 27th, and 20th degrees are the degrees of main exaltation of the several planets. The seventh sign from ootcham of a planet, is its neecham, e.g., sun is ootcham in maisham and seventh from maisham is toolaum, and the sun is neecham in that sign. The degrees of main depression are the same as given above. A planet in his exaltation sign is considered as exceedingly powerful and one in his depression sign as exceedingly weak. The following table shows the above:—

Planets.	Ootcham or exaltation signs.	Neecham or depression signs.	Degree of main exaltation or main depression.
Sooryan.	Maisham.	Toolaum.	10
Chundran.	Vrishabham.	Vrishchicam.	3
Coojan.	Macaram.	Carcatacam.	28
Boodhan.	Canyay.	Meenam.	15
Brihaspaty.	Carcatacam.	Macaram.	5
Shoocran.	Meenam.	Canyay.	27
Shany.	Toolaum.	Maisham.	20



—"*j*" The twelve signs beginning from the ascendant [lagnam] or sign which happens to be rising at time of a birth, &c., are known technically as the signs of:—1, Calpam or power, 2, Swam or wealth, 3, Vicramam or prowess, 4, Graham or dwelling place, 5, Pratibhay or intelligence, 6, Cshatam or wound, 7, Manmatam or desire, 8, Randhram, or aperture, 9, Gooroo or preceptor, 10, Mannam or respectability, 11, Bhavam or acquisition, 12, Vyayam or loss.—"*k*" The following diagram, a common mode of constructing the astrological figure of the heavens, exhibits the signs in their order as shown by numerals, and the places among them of sun moon and five planets who are considered to occupy particular signs as their houses or fixed residences. The planets are the lords of the houses thus constituted. Thus coojan, shoocran, boodhan, chundran, sooryan, boodhan, shoocran, coojan, brihaspaty, shany, shany and brihaspaty are respectively the lords of the signs or raushies in their order; or coojan is the lord of maisham and vrishchicam; shoocran, of vrishabham and toolaum; boodhan, of mitoonam and canyay; brihaspaty, of dhanoos and meenam; shany, of macaram and coombham; chundran, of carcatacam and sooryan, of simham. It will be seen that the sun and moon have each a house while the other planets have each two houses. The houses are known as swacshetrams. Compare Dashavargam under Vargam:—

12 Meenam, pisces. Brihaspaty, jupiter.	1 Maisham, aries. Coojan, mars.	2 Vrishabham, taurus. Shoocran, venus.	3 Mitoonam, gemini. Boodhan, mercury.
11 Coombham, aquarius. Shany, saturn.	Raushy chuckram showing planetary houses in the fixed sidereal zodiac.		4 Carcatacam, cancer. Chundran, Moon.
10 Macaram, capricornus. Shany, saturn.			5 Simham, leo. Sooryan, sun.
9 Dhanoos, sagittarius. Brihaspaty, jupiter.	8 Vrishchicam, scorpio. Coojan, mars.	7 Toolaum, libra. Shoocran, venus.	6 Canyay, virgo. Boodhan, mercury.

The fourth and eighth houses are known as Chatoorashram or quadrangular signs; the seventh house is known as Dyoonam; the tenth house is known as Anyam.——(2) The following table shows the signs of the fixed sidereal zodiac displayed against lunar mansions [nacshatram]. 10, 11, 12, 1, 2 and 3 are Oottaranyanam [q.v.], and 4—9 are Dacshinauyanam [q.v.]. Sign Maisham consists of the asterisms of Ashwiny [q.v.], and Bharany and the first quarter of Kritticay [q.v.]. Sign Vrishabham consists of the last three quarters of Kritticay [q.v.], the asterism of Rohiny [q.v.] and the first two quarters of Mrigashiras [q.v.]. Sign Mitoonam consists of the last two quarters of Mrigashiras, the asterism of Ardray [q.v.] and the first three quarters of Poonarvas [q.v.]. Sign Carcatacam consists of the last quarter of Poonarvas [q.v.] and the asterisms of Pooshyam [q.v.] and Aushlaisham [q.v.]. Sign Simham consists of the asterisms of Magham [q.v.] and Poorva phalgoony [poobbam], and the first quarter of Oottara phalgoony [oottaram]. Sign Canyay consists of the last three quarters of Oottara phalgoony [oottram], the asterism of Hastam [q.v.], and the first two quarters of Chitta [q.v.]. Sign Toolaum consists of the last two quarters of Chitta [q.v.], the asterism of Swauty [q.v.], and the first three quarters of Vishaukham [q.v.]. Sign Vrishchicam consists of the last quarter of Vishaukham [q.v.] and the asterisms of Anooraudhay [q.v.] and Jyeshtay [q.v.]. Sign Dhanoos consists of the asterisms of Moolam [q.v.] and Poorvashaudham [q.v.] and the first quarter Oottarashaudham [q.v.]. Sign Macaram consists of the last three quarters of Oottarashaudham [q.v.], the asterism of Shravanam [q.v.] and the first two quarters of Shravishtay [q.v.]. Sign Coombham consists of the last two quarters of Shravishtay [q.v.] the asterism of Shatabhishay [q.v.], and the first three quarters of Poorvabhaudram [q.v.]. Sign Meenam consists of the last quarter of Poorvabhaudram [q.v.] and the asterisms of Oottarabhaudram [q.v.] and Raivaty [q.v.]. Signs Maisham, Simham and Dhanoos begin respectively with the asterisms of Ashwiny, Magham and Moolam and the several signs end with the first, second, third or fourth quarters of the odd asterisms succeeding the said three asterisms:—

No.	Hindoo name.	European name.	Arabic name.	Sign.	Corresponding nacshatrams [q.v.] of the fixed lunar zodiac [bhamundalam].	Dravidian solar months [madhyamasowra maunam], solilunar nomenclature [mausam], during which the sun is supposed to be in these signs.	Beginning of month mentioned in Column 7 in terms of Gregorian calendar.	No.

——(3) The following is a diagram of the same as used in the native calendars [punchaungam, vaunashastram, zyecha]:—

——(4) The following are the names of the signs in alphabetical order.——*Canyay* (కన్య - kanya, Tel.; கன்னி - kanni, Tam.). Sixth. The Virgin. Virgo [soomboola].——*Carcatacam* (కర్కాటకము - karkátakamu, Tel.; கடகம் - kadagam, Tam.). Fourth. The Crab. Cancer [sartaun].——*Coombham* (కుంభము - kumbhamu, Tel.; கும்பம் - kumbam, Tam.). Eleventh. The Pot. Aquarius [dalo].——*Dhanoos* (ధనుస్సు - dhanussu, Tel.; தனுசு - tanusu, Tam.). Ninth. The Bow. Sagittarius [kows].——*Macaram* (మకరము - makaramu, Tel.; மகரம் - magaram, Tam.). Tenth. The Alligator. Capricornus [jaddy].——*Maisham* (మేషము - méshamu, Tel.; மேடம் - médam, Tam.). First. The Ram. Aries [hamel].——*Meenam* (మీనము - mínamu, Tel.; மீனம் - mínam, Tam.). Twelfth. The Fishes. Pisces [hoot].——*Mitoonam* (మిథునము - mit'hunamu, Tel.; மிதுனம் - mithunam, Tam.). Third. The Twins. Gemini [jowzah].——*Simham* (సింహము - simhamu, Tel.; சிங்கம் - shingam, Tam.). Fifth. The Lion. Leo [asad].——*Toolaum* (తుల - tula, Tel.; துலாம் - tulám, Tam.). Seventh. The Balance. Libra [meezaun].——*Vrishabham* (వృషభము - vrishabhamu, Tel.; இடபம் - idabam, Tam.). Second. The Bull. Taurus [sowr].——*Vrishchicam* (వృశ్చికము - vrishchikamu, Tel.; விருச்சிகம் - viruççigam, Tam.). Eighth. The Scorpion [akrab]. Scorpio [jyotisham, nacshatram].——(5) Raushy also stands for a gold coin with fourteen dots, twelve representing the signs of the zodiac and the remaining two the sun and the moon, called raushy fanam [q.v.]. 10 chuckrams = 1 raushy fanam; 3 raushy fanams = 1 rupee [naunyam, 2d]. Approximate actual value, 1 raushy fanam = 5 annas 4 pies. The most ancient of the indigenous fanams. Still found in large numbers in Coimbatore, both buried in the ground and picked up after heavy rains in the approach to fords of the principal rivers. Tradition says that Parshooraman [q.v.] sowed them broadcast over Keralam [q.v.], depositing what remained in the kistvaens [paundicoozhy] on the eastern slope of the hills some of which are called by his name to this day and held sacred by the hill Arayans or Malaiyarasar [q.v.]. Though seldom seen in circulation, it is still the denomination used in Northern malabar for recording the value of lands and the ancient revenue assessed on them. The Raushy fanam has been superseded by the Kaliyoog fanam, the Veeroye fanam, and others.——(6) *Raushicoor* (രാശിക്കൂറ - ráshikkúru, Mal.). From (above + kúr, mal. part). Class of soil [desham, munn] in which particles appear as if heaped up or placed one above the other without pashima or cohesion. Poor light soil, consisting of loose sand [manal] chiefly; it will not fill again the hole from which dug.——*Raushipashimacoor* (രാശിപ്പശിമക്കൂറ - ráshippashimakkúru, Mal.). From (above + pashima, mal. moisture + kúr, mal. part). Class of soil in which the particles firmly cohere to each other. Soil of an equal or middling sort, a quantity of which exactly fills up a pit or hole from which it is dug on being placed in it again.——*Razipore* (இராசிபுரம் - irásippuram, Tam.). From (ráshi, san. a heap + pura, san. town), meaning thereby that the soil is very productive. Hind. name (gházípúr), meaning warrior + town.—"*a*" Deputy tahsildarry, Salem district. Pay Rs. 70.—"*b*" Deputy tahsildar's head-quarters, Mittah village; Salem dist., Salem tal.; pop. 10,539; acres 1,996; lat. 11° 27'; long. 78° 14'; from Madras S.W. 179 miles; from Namcull N. 16 miles; from Oossoor S.E. 91 miles; from Salem S. 14 miles.

from Tripatore S. 76 miles; from Yercaud S. 22 miles. On the Salem-Namcull road in the valley between the Collimullay and the Bodhamullay. Inhabitants chiefly Putnoolcaurar [putnool], Comaties [q.v.] and Jeydar [q.v.]. Sugar-cane [q.v.] is grown abundantly in the neighbourhood. Large iron boilers for the manufacture of jaggery [q.v.] and sugar [q.v.], and iron [auhan] and brass [pittalay] vessels of different kinds are manufactured. Turmeric [country saffron] and rice [q.v.] of superior kind are exported largely. Principal industries are silk-weaving, iron-smelting, and sugar-boiling. Peshcush Rs. 2,914.

RAUTIB (راتب - rátib, *Hind.*). From (rataba, ar. to remain constant). Daily allowance of food to laborers; or to animals, as elephants [q.v.], camels [ottagam], &c.

RAUTRY (रात्रि - rátri, *San.*). From (ram, san. to stop). Time of rest and stillness. Night. One of the forms of Bramha [caulam]. All the ancient Sanscrit authorities placed night before day, and the Asoorans [q.v.] or Titans before the gods, in the order of appearance. Compare Hesiod. Cf. Ahorautram and Irauppagal. For Pauncharautram, the work so called see sep. title.——*Raut* (رات - rát, Hind.). From (rátri, san. night). Night. Raut kah khanah is supper [knanah, teeny].

RAUZ (రాజు - rádzu, *Tel.*). From (rájá, san. king) [raj]. General term for certain Teloogoo-speaking castes who profess a Cshatriya [q.v.] origin. They are certainly slightly different in race to the ordinary Dravidians. They do not enlist in native army, being now quite agricultural. They are mostly Veishnavites [q.v.], though a few follow Shiva [q.v.], and the worship of village deities [grauma devatay] forms a part of the belief of all. Their peculiar goddess is called Nimishaumbah. They generally assume sacred thread [poonool]. In all the more well-to-do families the women are gosha [q.v.]. Also merely a Hindoo third name [jauty, peyar].——*Bhatrauz* (భట్రాజు - bhatrádzu, Tel.). From (bhatta, san. learned man). Branch of the Rauz class. Originally the bards who sung the praises of the various petty rajahs [q.v.] and poligars [q.v.] of the country; but their employment in this way has almost disappeared, and they now live by cultivation and by singing traditions current regarding Shoodra castes at marriages and other ceremonies. Some are Mussalmans [q.v.] or members of other castes, who, possessing an aptitude for extempore versification, were taken by rajahs to sing their praises and so called themselves Bhatrauzool. They bury their dead [jauty, shavacaud].——*Mootrauz* (ముత్తరాజు - muttarátsa, Tel.). From (mutta, tel old). Also called Yecary. Teloogoo caste; take the title of naidoo [q.v.]; most of them poor; serve as village watchmen; probably immigrants during the time of the Vijianugger kings [jauty]. The Oodayagherry droog is occupied by a remnant of this race, formerly in all probability superior servants of the fortress.——*Rauzooloo* (రాజులు - rádzulu, Tel.). Plural of Rauz. Hindoo third name [peyar].

RAUZEE (راضي - rází, *Hind.*). Consent, compromise. Rauzeenauma is a written assent or deed of compromise, e.g., resignation of office, or deed of relinquishment executed by the cultivator [ryot] when he wishes to give up land in his puttah [q.v.] or enjoyment.——*Razah* (رضا - razá, Ar.). From (razú, ar. to be pleased). Title of eighth Imaum. Common alam; as Razah ally, double alam; Razah khan, alam + alaumat [ism].——*Razah sahib* (رضا صاحب - razásáhib, Hind.). Alam + alaumat. Son of Chundah sahib [q.v.], who when engaged in besieging Mahomed ally [q.v.] at Trichinopoly, was sent to relieve Arcot which Clive had attacked to create a diversion. Defeated there Razah sahib fell back upon Arnee, and then retreated to Cauverypauk where he suffered another defeat.

RAVAM (रव - rava, *San.*). From (ru, san. to cry). Cry, shriek.——*Rauvanauttam* (இராவணத்தம் - irávanáttam, Tam.). From (rávana, san. the giant + hasta, san. hand). A small old-fashioned lute formed with a hollow cocoanut [q.v.] shell.——*Ravanan* (रावण - rávana, San.). From (ráva, san. shriek). Mythological king of Lunka [q.v.], a state supposed to comprise Ceylon and the whole of southern India. He was the son of Vishravan moony by his wife Nicashah. He had a brother Coombhacarnan and a sister Shoorpanakhay. Ravanan carried off Seetay [q.v.], wife of Rama [q.v.], and brought on an invasion of his island by Rama, in which Rama was assisted by the uncivilised races of the southern part of the peninsula. The story of the Ramayanam [q.v.] purports to recount this war. There may have been some large national convulsion in the south, to which the Hindoo legend was fitted. A festival is celebrated in honor of Ravanan by the Shaunaur [q.v.] race. Ravanan is also called Dashagreevan, the ten-necked, and Powlastyan, and also Veishravanan as son of Vishravan, the father also of Coobairan [q.v.]. His numerous heads and his hundred hands, sometimes reduced to twenty, are the usual symbols of dominion. Compare Briareus. See vol. I (63), (115).——*Ravanan's whiskers* (రావణాసురునిమీసము - rávanásurunimísamu, Tel.; എലിമുള്ള - elimullu, Mal.; இராவணன்மீசை - irávananmísai, Tam.). Title from stiff, pointed leaves. Tel. from (rávanásura, san. the giant + mísamu, tel. whiskers). Mal. from (eli, mal. rat + mullu, mal. thorn). Tam. from (rávana, san. the giant + mísai, tam. whiskers). Tam. also (elikkuççippul), meaning rat + stalk + grass; (irávananbul), meaning ravana grass. Title otherwise Ground rattan, Rat thorn, Sea pink, Water pink. Botanically Spinifex squarrosus, linn., graminaceæ [vricsham, 156]. Frutescent; culms large, glaucous, fasciculate-leafy at the knots; leaves convolute, recurved, spreading, stiff, pointed; sheaths woolly at the mouth, the rest striated, and with the spikelets and leaves glabrous; male axils flower-bearing; bracts of the capitules fascicled, very large, involucres mucronate. Sand-binding [manal] diœcious grass; grows abundantly on the coromandel coast; it comes nearest to the sand carex of england in its habit of growth, creeping along horizontally, sometimes above, sometimes below, the surface of the earth emitting roots and shoots at short intervals of a few inches; extremely tenacious of life, the shoot at every node capable of renewing the existence of the individual as fast as destroyed, and the whole plant offering a resistance to the storm which is rarely overcome; seeds are contained in a circular head, composed of a series of spine-like divisions, which radiate from the stalk in all directions; when the seeds are mature, these heads become detached and are carried with great velocity along the sands; the globular heads float lightly on water, and the uppermost spines acting as sails, they are carried across narrow estuaries to continue the process of embanking on newly-formed sand bars. The fishermen collect it for fuel and thus destroy their greatest protection; they do so as the spiny leaves injure their naked feet, and the turf does not answer for spreading nets [valay] upon. No other common species here.——*Ravy* (रवि - ravi, San.). From (ru, san. to sound), the praised one. Sun. Identical with Sooryan [q.v.] and Audityan [q.v.].——*Ravy madhya graham* (रविमध्यग्रह - ravimadhyagraha, San.). From (ravi, san. sun + madhya, san. middle + graha, san. the place of a planet). Sun's mean place in sidereal ecliptic [craunty mundalam].——*Ravy mandotcham* (रविमन्दोच्च - ravimandóçça, San.). From (ravi, san. sun + mandóçça, san. upper apsis). Sun's apogee [mandam].——*Ravy palam* (रविफल - ravip'hala, San.). From (ravi, san. sun + p'hala, san. equation). Sun's anomalistic equation [palam].——*Ravy punchaungam* (रविपञ्चाङ्ग - ravipañchánga, San.). The solar calendar [punchaungam].——*Ravy vauram* (रविवार - ravivára, San.). From (ravi, san. sun + vára, san. day). Sunday [jyotisham, shoolam, tisay, vauram].

RAVINE DEER (हरिण - harina, *San.*; काळसिपि - kálasipi, *Mahr.*; کالپونچھ - kálpúnchh, *Hind.*; ಬುದರಿ - budari, *Can.*; బూరదుజింక - búradujinka, *Tel.*; കലമാൻ - kalamán, *Mal.*; வெளிமான் - velimán, *Tam.*). Title from its habitat. San. means reddish white. Mahr. means black tail. Hind. from (kálá, hind. black + puchha, san. tail). Tel. from (búradu, tel. a haughty person + jinka, tel. deer). Mal. from (kala, mal. stag + mán, mal. deer). Tam. from (velil, tam. whiteness + mán, tam. deer). Hind. also (chikárá); (bárásinghí), meaning twelve-horned. Can. also (tiska), from its hiss; (mudari). Tel. also (irri), meaning butting. Title otherwise Goat antelope, Indian gazelle. Roe and Roebuck of the Bible. Cf. Jinka. Gazella bennettii, antilopinæ, bovidæ, ruminantia, mammalia [sastanam, 23], of naturalists [jantoo]. Color above deep fawn brown, darker where it joins the white on the sides and buttocks, chin, breast, lower parts and buttocks behind white; tail, knee tufts and fetlocks behind black; a dark brown spot on the nose, and a dark line from the eyes to the mouth, bordered by a light one above. Length of a buck 3½ feet; tail 8½ inches; height 26 at shoulder, 28 at the croup; horns 12–13. The horns [sing] of the female are small, rarely longer than 6 inches, usually 4–5, slender, slightly wrinkled at the base, inclining backwards with the tip bent forwards. Found very generally, but not on the Malabar coast. Never found in forest country, nor in districts having a damp climate. When alarmed it utters a sort of hiss by blowing through the nose and stamps with the fore feet. Indian species not here found are:—Fuscifrons or beloochistaun gazelle, Picticaudata or thibetan gazelle, Sub-gutterosa or persian gazelle.

RAVY (రవిక - ravika, *Tel.*). A bodice or close fitting jacket [cholee]. Now sometimes used by Hindoo women; generally however no special needle-made covering for this purpose is worn [sheelay]. See vol. I (98).

RAYAUN (राजसर्षप - rájasarshapa, *San.*; मोहरी - móharí, *Mahr.*; सासम - sásama, *Conc.*; خردل - khardal, *Ar.*; سپندان - sipandán, *Pers.*; رائی - ráí, *Hind.*; رایان - ráyán, *Dec.*; ಸಾಸಿವೆ - sásive, *Can.*; దాసేమి - dásemi, *Too.*; ఆవాలు - áválu, *Tel.*; ସୋରିଷ - soriso, *Oor.*; കടുക് - katuku, *Mal.*; අබ - aba, *Singh.*; கடுகு - kadugu, *Tam.*). Title from deccany [raj]. San. from (rájá, san. king + sarshapa, san. mustard), from its strength. Conc. from (sarshapa, san. mustard). Hind. from (ráji, san. black mustard). Dec. from (ráji, san. black mustard). Can. from (sarshapa, san. mustard). Mal. from tamul. Tam. from (kadumai, tam. sharpness). San. also (sarshapa), meaning pervading, medicinally influential; (raktaráji), meaning red + shining; (rájiká), meaning shining [raggy]; (tívraka), meaning

pungent; (kshutábhijanana), meaning hunger producing [raggy]; (ásuri), meaning sorceress, because witches are discovered by means of mustard oil. Hind. also (sarsún); (barírái), meaning large mustard; (bádsháhírái), meaning royal mustard; (sháhzádahrái), meaning princely mustard. Can. also (sásimegida). Tel. also (chinnaávalu), meaning small + mustard; (sarsávalu), meaning mustard; (sásuvulu), meaning mustard. Tam. also (shirugadugu), meaning small + mustard. Title otherwise Brown mustard, Country mustard, Indian mustard, Royal mustard, Small mustard, Sorceress mustard. Botanically Brassica [sarshapam] juncea, h. f. & t., cruciferæ [vricsham, 10]. Alias Sinapis brassicata, juncea, nigra, ramosa. Herbaceous; lower leaves ovate-lanceolate, deeply serrated, upper ones lanceolate, attenuated at the base, quite entire; branches fascicled; siliqua somewhat erect, upper joint valveless, awl-shaped; flowers yellow; seeds of a brown color; cultivated. The seeds are hotter and more active than the imported articles; they are ground and the husks sifted from the flour, the residue yielding to expression a useful fixed oil [yennay]; this is bright yellow, and has a strong smell and a slight taste of mustard. Cultivated in black and red loam dry fields, often along with raggy [q.v.]; ground prepared in south in pungoony [mausam] or march and subsequently, on coromandel in aushweejam or october and caurteecam or november, on w. coast from maidom or april to yedavam or may; seed sown broadcast in south in chittray or april, on coromandel in margashiram or december and pooshyam or january, on w. coast in yedavam or may; manuring and weeding where necessary; if there be no drizzle it must be watered after a fortnight; full-grown crop shows green, 4 or 5 feet high; cut three or four months after with sickles; plant is dried and beaten with sticks; seed is then winnowed from the chaff; produce brought to market any time after; average price 12 imperial seers for 1 rupee. Chemically, mustard seeds consist of a bland fixed oil and a peculiar inodorous substance called myroxcic acid, together with a third substance which has been called myrosyne; essential oil known as pyrosyne. Seeds medicinal substitute for black and white mustard, especially in poultices; fixed fat oil is superior to all other oils for anointing and invigorating the body; in medicine given internally as a remedy for colic, but not very safe; more frequently applied as a rubefacient and as a cure for burns and wounds; used in pharm.; in veterinary practice a counter irritant for rheumatism. Seeds, whole or broken, used to flavor curries [q.v.]; a small quantity of mustard seed is put into boiling cocoanut oil and the whole poured into the curry [q.v.]; ground into flour used to adulterate european mustard flour. The two mustards shown below are foreign articles. For dog mustard see Cleome viscosa, linn. [dog vailay], and jungle mustard see Gynandropsis pentaphylla, dec. [vailay].——*Cauly rayaun* (सर्षप - sarshapa, San.; خردل اسود - khardaliaswad, Ar.; سپندان سیاه - sipandánsiyáh, Pers.; کالی رائی - kálírái, Hind.; کالی رایان - kálíráyán, Dec.; ಸಾಸಿವೆ - sásive, Can.; ఆవాలు - áválu, Tel.; കടുക - katuku, Mal.; கடுகு - kadugu, Tam.). Title from color of seed. San. from (sri, san. to go), pervading; medicinally influential. Ar. from (khardal, ar. mustard + aswad, ar. black). Pers. from (sipandán, pers. mustard + siyáh, pers. black). Hind. from (kálí, hind. black + rái, hind. mustard brassica juncea, h. f. & t.). Dec. from (kálí, hind. black + ráyán, hind. mustard). Mal. from tamul. Tam. from (kadumai, tam. sharpness). San. also (rájiká), meaning shining, from reddish color. Hind. also (rái); (aslrái), meaning true mustard seed. Can. also (karisásivegida), meaning black + mustard + plant. Title otherwise Black mustard, European mustard, True mustard. Greek νᾶπυ, σίνηπι. Botanically Brassica [sarshapam] nigra, koch., cruciferæ [vricsham, 10]. Alias Sinapis erysimoides, nigra. Semen sinapis nigræ of chemists. Annual, 2–3 feet high, rigid, branched, more or less hispid; leaves 4–8 inches; flowers $\frac{1}{3}$–$\frac{1}{2}$ inch in diameter, bright yellow; pod $\frac{1}{4}$–$\frac{1}{2}$ inch, subulate; valves keeled, torulose; cells three to five-seeded; seeds small and roundish; externally of a reddish or blackish brown color, internally yellow; inodorous, but have an acrid oleaginous taste. Uses just like country mustard, but a less powerful article.——*Soofaid rayaun* (सिद्धार्थक - siddhártt'haka, San.; पांढरामोहरी - pándharámóharí, Mahr.; خردل ابیض - khardaliabyaz, Ar.; سپندان سپید - sipandánisupíd, Pers.; سفید رائی - sufedrái, Hind.; سفید رایان - sufedráyán, Dec.; ಬಿಳಿಸಾಸಿವೆ - bilisásive, Can.; తెల్లఆవాలు - tellaáválu, Tel.; വെള്ളക്കടുക - vellakkatuku, Mal.; සුදුඅබ - suduaba, Singh.; வெள்ளைக்கடுகு - vellaikkadugu, Tam.). Title from color of seed. San. from (siddha, san. accomplished + art'ha, san. object); from medicinal value. Mahr. from (pándhará, mahr. white + móharí, mahr. mustard, brassica juncea, h. f. & t.). Ar. from (khardal, ar. mustard + abyaz, ar. white). Pers. from (sipandán, pers. mustard + sufíd, pers. white). Hind. from (sufed, hind. white + rái, hind. mustard). Dec. from hindostany. Can. from (bili, can. white + sásive, can. mustard). Tel. from (tella, tel. white + áválu, tel. mustard). Singh. from (sudu, singh. white + aba, singh. mustard. Tam. from (vellai, tam. white + kadugu, tam. mustard). Title otherwise Charlock mustard, Salad mustard, White mustard. Botanically Brassica [sarshapam] alba, h. f. & t., cruciferæ [vricsham, 10]. Alias Sinapis alba. Seed is Semen sinapis albæ of chemists. Erect, annual, 2 feet high, with a hispid, or rarely glabrous stem; leaves all petioled, usually hispid; segments ovate, toothed or lobulate; pods about 1 inch, stalked, spreading, cylindric, beak half as long, flattened, sometimes two-seeded, valves and base of beak white with hispid hairs. Cultivated; smallish bright yellow flowers, seeds white or yellowish and much larger than those of black mustard. Flour used in pharm. mixed with black mustard flour [cauly rayaun]; similarly for table when young, leaves are eaten as salad; seeds yield by expression a bright yellow edible oil [yennay] having a strong smell and slight taste of mustard.

REAPER (रीप - rípa, *Mahr.*). Lath work of a roof.

RED (रक्त - rakta, *San.*; لعل - lál, *Hind.*). Prefix.——*Red cedar* (மலைக்கோன் - malaikkón, Tam.). Title from resemblance to toon [q.v.] timber. Tam. means mountain king. Same as Shingle tree.——*Red cliffs* (വർക്കലക്കുന്നു - varkkalakkunnu, Mal.). Means Warkully hills. πυῤῥὸν ὄρος of the Periplus. Hill; Travancore state, Trivandrum division, Cherankeel tal. Nautical name of steep coast below Quilon. This presents the only bluffs on the shore from Mount delly to Cape comorin. Is near Warkully and formed by the Warkully bar.——*Red cotton* (پوتی - potí, Hind.; ಕೆಂಬತ್ತಿ - kembatti, Can.; ఎర్రపత్తి - errapatti, Tel.; ചെമ്പഞ്ഞി - chempaññi, Mal.; செம்பஞ்சு - shembañju, Tam.). Can. from (kempu, can. red + hatti, can. cotton). Tel. from (erra, tel. red + patti, tel. cotton). Otherwise Shempunjy, Potee. For this product see Red-cotton wool under Cotton.——*Red dog* (வேர்க்குரு - vérkkuru, Tam.). Tam. means sweat + pricking. An old name for Prickly-heat [q.v.].——*Red gum* (لال گوند - lálgond, Hind.). Same as Eucalyptus resinifera [australian gum tree].——*Red hills* (புழல் - puzhal, Tam.). Vern. means a hollow. Chingleput dist., Sydapett tal.; lat. 13° 10′; long. 80° 14′; from Sydapett N.W. 10 miles; from the sea W. 10 miles. Trig. station in lat. 13° 9′ 32·07″; long. 80° 14′ 27·99″; from Mauthavaram W. 4 miles; from Sydapett N. 10 miles; from the sea W. 9 miles. For description of tank, see vol. I, 404 [pozhal].——*Red sanders* (لال چندن - lálchandan, Hind.). See sep. title.——*Red wood* (رکت چندن - rakatchandan, Hind.). ചെമ്മരം - chemmaram, Mal.; செம்மரம் - shemmaram, Tam.). Hind. means red sandal. Same as False red sanders, Rohitacam, and Deccany deodar. Cf. also:—Gluta tavoyana, mergui red wood; Pterocarpus indicus, andaman red wood; Soymida febrifuga, coromandel red wood, indian red wood. See gloss. paragraphs.

RED SANDERS (रक्तचन्दन - raktachandana, *San.* and *Mahr.*; रचंदन - rachandana, *Conc.*; صندل احمر - sandaliahmar, *Ar.*; صندل سرخ - sandalisurkh, *Pers.*; رگت چندن - ragatchandan, *Hind.*; لال چندن - lálchandan, *Dec.*; ರಕ್ತಚಂದನ - raktachandana, *Can.*; ಬೆಂಞ - béñña, *Too.*; ఎర్రగంధపు చెట్టు - erragandhapuchettu, *Tel.*; രക്തചന്ദനം - raktachandanam, *Mal.*; රත්සඳුන් - ratsandun, *Singh.*; சிவப்புச்சந்தனம் - shivappuççandanam, *Tam.*). Title from color of wood [red]. San. from (rakta, san. red + chandana, san. sandalwood, santalum album, linn.); from use similar to that of sandal. Ar. from (sandal, ar. sandalwood, santalum album, linn. + ahmar, ar. red). Pers. from (sandal, ar. sandalwood + surkh, pers. red). Hind. from (rakta, san. red + chandan, pers. red wood). Dec. from (lál, hind. red + chandan, hind. red wood). Can. from (rakta, san. red + chandana, san. sandal). Tel. from (erra, tel. red + gandhapuchettu, tel. santalum album, linn.). Singh. from (rata, singh. redness + chandana, san. sandalwood). Tam. from (shivappu, tam. redness + chandana, san. sandalwood). San. also (kuchandana), meaning bad sandal [false red sanders]; (harichandana), meaning tawny sandal; (agarugandhá), meaning smelling like agaroo; (tilaparní), meaning sesamum-leaved; (rañjana), meaning red; cf. indigo. Mahr. also (támbadáchandana), meaning red sandal. Can. also (honne), meaning gold colored; (kempugandha), meaning red + sandal. Tel. also (agarugandhamu); (errachandanamu), meaning red + sandalwood; (tsandam); (raktagandhamu), meaning red + sandal. Tam. also Mal. also (cheñchandanam), meaning red sandal. Tam. also (shivappuççendúram), (sheñjandanam), meaning red sandal; (shivappuççendúram), meaning red + red powder. Title otherwise Indian red-wood, Red chandanam, Red sandalwood, Ruby wood, Three-leaved pterocarpus, Whonnay. Botanically Pterocarpus [vengay] santalinus, linn. f., leguminosæ [vricsham, 48]. Tree, 60 feet or more; leaves unequally pinnated; calyx five-cleft; corolla papilionaceous; leaflets three, roundish, retuse; racemes axillary, simple or branched; petals long-clawed, waved or curled on the margins; stamens triadelphous, five, four, and one; legume one-seeded, slightly membranaceous, waved; flowers yellow, streaked with red; closely related to common vengay [q.v.]; plentiful in kurnool and cuddapah districts. The dye-wood is usually seen in billets of 2 to 3 feet in length, of a deep red color, the concentric circles being divided by dark lines; the coloring principle is called santalin; it communicates a deep-red to alcohol, but gives no tinge to cold water. The wood given internally in hæmorrhages in powder ground up with milk [paul], and externally mixed with honey [shahad] in case of scabies; in certain cases of ophthalmia and sore eyes, beaten up into a paste and applied to the eyes; gives to pharm. lignum

santalinum rubrum, coloring principle santalin ; officinal only as a coloring agent. Cattle during dry season are fed on leaves and young saplings. Bark contains much coloring juice ; roots and stumps yield the red sandalwood of commerce, much used by dyers and color makers [shauyam] ; this sold by weight and forms a regular article of export ; with different mordants [cauram], it yields various shades of red ; the powdered wood mixed with oil is used for bathing and purifying the skin much as the true sandalwood powder also is used. The timber is compact, heavy, red internally, becoming brown by exposure to the air, sonorous, in squared pieces, of fibrous texture, when polished numerous cells filled with resin are exposed ; it sinks in water ; the odour is weak, taste slightly astringent, it reddens the saliva, is unalterable by time ; water has but little action on this wood ; used for carved work in houses and temples.——*False red sanders* (ताम्रक - támraka, San. ; थोरलागुंज - t'hóralágunja, Mahr. ; मंजटिरूकु - manjutirúku, Conc. ; رکت چندن - rakatchandan, Hind. ; هاتهی گمچی - háthígumchí, Dec. ; ಮಂಜೆಟ್ಟಿ - manjetti, Can. ; బండిగురివెంద - bandigurivenda, Tel. ; മഞ്ചാടി - mañcháti, Mal. ; මදටිය - madatiya, Singh. ; ஆனைக்குன்றி - ánaikkunri, Tam.). Title from timber which resembles red sanders when fresh cut. San. from (támra, san. copper); from bright red berries. Mahr. from (t'horalá, mahr. great + gunjá, san. abrus precatorius, linn.). Hind. from (rakta, san. blood + chandana, san. sandalwood, santalum album, linn.) ; from structure of wood. Dec. from (háthí, hind. elephant + gumchí, hind. abrus precatorius, linn.) ; from similarity of seeds. Tel. from (bandi, tel. round + gurivenda, tel. abrus precatorius, linn.). Mal. from (mañju, san. beautiful), from seeds. Tam. from (ánai, tam. elephant + kunri, tam. abrus precatorius, linn.). San. also (kuchandana), meaning inferior sandalwood, properly pterocarpus santalinus, linn. f. [red sanders]. Hind. also (kuchanduna), meaning inferior sandal. Can. also (mandatíya). Tel. also (bandigurigindza), meaning round + abrus precatorius, linn. ; (peddagurigindza), meaning large + abrus precatorius, linn. Tam. also (manjádi), meaning beautiful and variegated, from seed ; (tilam), meaning spot, originally of the size of sesamum, from paste used to mark foreheads. Title otherwise Barbadoes pride, Barricary seed plant, Bastard flower fence, Coral pea tree, Elephant goomchy, False red sandal, Large goomchy, Munjaudy tree, Peacock flower fence, Wheel goomchy. Botanically Adenanthera pavonina, linn., leguminosæ [vricsham, 48]. Large tree, unarmed : leaves bipinnated ; pinnæ four to six pair ; leaflets oval, obtuse, glabrous, ten to twelve pair, on short petioles ; calyx five-toothed ; petals five ; racemes terminal or from the upper axils, spike-like ; legumes somewhat falcate, twisted, ten to twelve-seeded ; flowers numerous, small, yellow and white mixed, fragrant, producing pods, early opening and displaying seeds of a shining, scarlet color with a circular streak in centre. The seeds are poisonous if taken internally, especially when in a powdered state ; large leaves given in decoction for chronic rheumatism. Seeds are strung as beads [munkah] ; seeds are used as weights by jewellers, each of them weighing four grains [goomchy, munjaudy, retty] ; a cement [pattoo] is made by beating the seeds up with borax [q.v.] and water ; heart-wood yields a dye which bramins use after bathing for marking their foreheads [pottoo], merely rubbing the wood on a wet stone [shaunay cull] ; stem gives a gum [gond] ; oil from seeds ; tree well suited for avenues [shaulay]. Timber, when fresh cut, resembles red sanders ; has a pleasant smell ; strong, but not stiff, hard, durable, tolerably close and even-grained, takes a good polish ; when fresh of a red color, streaks of a darker shade, afterwards turns purple ; used for house-building and cabinet making purposes. No other common species here.

REETAH (रिठा - rit'há, *Mahr.*). From (arishta, san. soapnut). Same as Soapnut.——*Rintah* (रिंथ्या - rint'hyá, Conc.). Same as above.

REG (ریگ - reg, *Hind.*). Sand [manal].——*Regar* (ریگر - regar, Hind. ; لیگر - legar, Dec. ; రేగడ - régada, Tel. ; கரிசல் - karisal, Tam.). Tam. means darkness. Otherwise Regady by corruption from the Tel. genitive. Rich black loam ; a soil in which cotton [q.v.] is usually planted, and thence commonly termed black-cotton soil. Met with in great tracts of country in this presidency, especially in the ceded districts [q.v.] ; it is not found near the coast ; similar to the soil which forms the plains of surat and broach in guzerat. When uncultivated usually support but few trees, and those, as a rule, of no great size, but the principal product is grass, commonly growing to a height of 3 to 4 feet ; when cultivated the fertility is so great that it has produced crops for two thousand years without manure, without having been left fallow, and without irrigation. It is a true alluvium [adaimunn], deposited from still water ; it consists chemically of silica [manal] in a minute state of division, with portions of lime [choonam], alumina [calimunn], and oxide of iron [auhan] ; it fuses readily before the blow-pipe into a dry, black slag ; in composition it nearly resembles that of basalt [caroom palingoo cull]. The purest regar is of a deep bluish-black color, or greenish or dark-greenish black, shining ; when placed in water, it crumbles slowly, with emission of air bubbles, and forms a tenacious paste ; when moistened, it gives out an argillaceous odour. The muriate and carbonate of soda [sowdoo] are frequently accidental ingredients in the composition of the regar ; they render it sterile when in large quantities. During the dry season, it rends into gaping cracks ; contracting under the powerful heat of the sun, it is divided, like the surface of dried starch, by countless and deep fissures, into figures usually affecting the pentagon, hexagon, and rhomboid ; while the upper part for a few inches in depth is dried to an impalpable powder, raised in clouds by the wind and darkening the air, the under portions, of the depth of 8 or 10 feet, retain their character of a hard black clay [calimunn], approaching a rock, usually moist and cold, when the surface dust has a temperature of 130°. On the other hand regar is absorbent of moisture and very retentive ; and during the rainy season it presents a uniform glazed surface of black tenacious clay.——*Regmahee* (إسقنقور - iskinkúr, Ar. ; ریگ ماهی - regmáhí, Pers. and Hind.). Ar. from greek. Hind. from (above + máhí, pers. fish). The terms may be considered co-extensive with the family Scincidæ, sauria [godhicay], reptilia [sarpy, 8], of naturalists [jantoo]. The Skinks or Scincidæ have generally four limbs, moderately developed, sometimes feeble or hidden below the skin. Species exceedingly numerous ; land lizards [chipkalee] preferring dry ground and hiding themselves in the sand, under stones, &c. ; none of them enter the water ; do not attain any considerable size ; deposit from eight to twelve globular eggs. The following are the representative species in Southern india :—" *a* " Anguis melanosticta. Small blind worm-like reptile ; coast of Coromandel ; reddish brown ; part of tail is cineritious, or of a pale blue ; abdominal and subcaudal squamæ glossy white, without dots ; quickly buries itself in the sand when pursued.—" *b* " Chiamela lineata. Brownish, with black lines corresponding to the series of scales ; slow-worm-like lizard.—" *c* " Eumeces albopunctatus. The White-dotted skink. Alias Eumeces punctata ; Riopa albo-punctata. Back uniform olive-colored, or with line of small dots along each series of scales ; anterior part of sides blackish brown, with numerous small white spots ; uniform whitish below.—" *d* " Eumeces bilineatus. The Black-striped skink. Alias Mocoa bilineata. Limbs rather feeble ; brownish olive above, greenish below ; broad brown or black band from shoulder along upper half of the side, enclosing below whitish longitudinal line ; pair of black lines along the back.—" *e* " Eumeces hardwickii. The White-streaked skink. Alias Mabouya elegans ; Riopa hardwickii. Back brownish, with four series of black dots and with yellowish-white band arising from the nose and from the superciliaries ; series of black dots along each edge of bands ; each scale on the sides with a black dot, the upper dots being largest and confluent ; lower parts uniform white.—" *f* " Eumeces punctatus. The dotted skink. Alias Lacerta interpunctata, punctata ; Riopa punctata ; Seps scincoides. Each scale with a black dot, the dots forming longitudinal series ; largest on the back of tail, sometimes entirely absent on belly ; outer series of scales on each side of back has very small dots rather large.—" *g* " Euprepes rufescens. The common Indian skink. Alias Lacerta rufescens ; Plestiodon sikkimensis ; Scincus multifasciatus ; Tiliqua affinis, carinata, rubriventris, rufescens. Limbs of moderate strength ; the coloration varies ; specimens have a distinct yellowish band along the upper part of the side of the neck ; sides below yellow band are dark brown ; upper parts brown, with blackish streak ; lower parts whitish ; may be seen basking in the sun, in bamboo [q.v.] hedges, or on trees ; fearlessly enter houses in pursuit of insects [poochy], in which this displays great agility. The largest of the family.—" *h* " Euprepes trilineatus. Alias Euprepes trilineata. Yellowish olive, with three yellowish-white longitudinal bands ; first from crown of head to the middle of the back ; from upper lip to the loin ; edged with black superiorly and with red inferiorly ; hinder part of back dotted with yellow ; limbs and tail rose-colored ; found in sandy ground near the sea concealing itself in holes and fissures, and under shrubs.——*Renaud* (రేనాడు - rénádu, Tel.). From (régada, tel. black-cotton soil + nádu, tel. country). Name of the black cotton land [regar] along the valley of the Coondair, Cuddapah.

REGULATION (ஒழுங்கு - ozhungu, *Tam.*). From (ozhugu, tam. to act). Legislative enactment under the Company as distinguished from the Acts of the later legislative councils.

REH (ریه - reh, *Hind.*). Same as Sujjee matty.

REIS (രേസ്സ - réss, *Mal.*). From the portuguese. A small copper coin. 2 reis = 1 cash or pie [naunyam, 1d]. Approximate actual value, 1 reis = $\frac{1}{400}$ of a rupee. This imaginary coin was introduced into the public accounts of Malabar, when the company became possessed of it, from Bombay. Eighty of these were equivalent to one Tellicherry fanam [q.v.]. Not in current use unless to mean a very small sum of money. Similar to Cochin cash [q.v.].

REKAPULLY (రెక్కపల్లి - rékapalli, *Tel.*). From (rekka, tel. wing + palli, tel. village), meaning side village.——**(1)** Talook, Godavery district. Area with Bhadrachellam 911 square miles. Language Teloogoo. N.W. of district. Bounded :—N. Bustar and Vizagapatam, E. Rumpa, S. Godavery, W. Bhadrachellam talook. Transferred from the Central provinces in 1874. Now forms part of the Agency tract. Western portion is flat, Eastern portion mountainous, except a strip of land on the banks of the Godavery, and Severy, which is covered with dense forest. Soil

good black cotton [regar] on the banks of Godavery and Severy rivers. The rest is sandy and rocky. Trade in timber and forest produce. No irrigation at all. Camping grounds :—Abbicherla, Bendiraiv, Candoolore, Chintore, Cottapully, Gandicottagoodem, Jeedigooppa, Lakkavaram, Maroomore, Nauracondah, Peddacondah, Posaram, Soppoomaumidy, Vaddigoodem, Vankagoodem, Yedoogooraullapully. Places of archæological interest:—Comaursawmygoodem, Rekapully, Shreeramagherry, Vaddigoodem. Trig. stations :—Cullair, Nauracondah, Peddacondah and Raupauk. The leading places, &c., in the talook are the following.——*Chintore* (చింతూరు - chintúru, Tel.). From (chinta, tel. tamarind tree, tamarindus indica, linn. + úru, tel. village). Zemindarry, Village; pop. 268; lat. 17° 45′; long. 81° 26′; from Rekapully N.N.E. 14 miles; from Cocanada N.W. 77 miles. Weekly market; timber trade.——*Coonavaram* (కూనవరము - kúnavaramu, Tel.). From (kúna, tel. young + pura, san. town). Zemindarry, Village, Division head-quarters, Post office; pop. 958; lat. 17° 34′; long. 81° 18′; from Bhadrachellam E.S.E. 25 miles; from Cocanada W.N.W. 76 miles; from Rekapully W.N.W. 3 miles. At junction of Godavery and Severy.——*Cullair* (కల్లేరు - kalléru, Tel.). From (kallu, tel. stone + éru, tel. river). Trig. station; lat. 17° 48′ 15·78″; long. 81° 28′ 10·86″; height 833 feet; from Rekapully N.N.E. 18 miles; from Cullair E. 2 miles.——*Godavery* (గోదావరి - gódávari, Tel.). See sep. title.——*Marrigoodem* (మర్రిగూడెము - marrigúdemu, Tel.). From (marri, tel. banyan tree, ficus bengalensis, linn. + gúdemu, tel. village). Zemindarry, Village, Head-quarters of forest ranger; village, pop 336. On Godavery. Formerly head-quarter station of Soory reddy vencatrama narsiah, Mittahdar [q.v.]. Weekly market.——*Nauracondah* (నారకొండ - nárakonda, Tel.). From (nárâyadu, tel. proper name + konda, tel. hill). Trig. station; lat. 17° 50′ 37·88″; long. 81° 13′ 31·30″; height 1,688 feet; from Rekapully N.N.W. 20 miles; from Nauracondah N. 1¼ miles.——*Peddacondah* (పెద్దకొండ - peddakonda, Tel.). From (pedda, tel. great + konda, tel. hill). Hill; height 4,476 feet. Highest point in talook, situated in Eastern ghauts [q.v.]. Temple of goddess worshipped by Reddies [q.v.] and Gonds [q.v.]. Trig. station; lat. 17° 50′ 23·27″; long. 81° 48′ 56·46″; height 4,476 feet; from Rekapully N.E. 36 miles.——*Raupauk* (రాపాక - rápáka, Tel.). From (ráyi, tel. rock + páka, tel. village). Trig. station; lat. 17° 39′ 17·75″; long. 81° 17′ 10·03″; height 2,002 feet; from Rekapully N.W. 7 miles; from Raupauk W.S.W. 3 miles.——*Rekapully* (రేకపల్లి - rékapalli, Tel.). See below.——*Severy* (శబరి - shabari, Tel.). See sep. title.——*Shreeramagherry* (శ్రీరామగిరి - shrírámagiri, Tel.). From (shrírâma, san. holy ráma + giri, san. hill). Zemindarry, Village; pop. 103; lat. 17° 32′; long. 81° 20′; from Cocanada W.N.W. 72 miles; from Rekapully S. 3 miles. Temple of Rama [q.v.] on hill close by.——*Sillair* (సీలేరు - síléru, Tel.). See sep. title.——*Socoolair* (సోకులేరు - sókuléru, Tel.). See sep. title.——*Vaddigoodem* (వడ్డిగూడెము - vaddigúdemu, Tel.). From (vadde, tel. a caste name + gúdemu, tel. village). Zemindarry, Village; pop. 1,289; lat. 17° 33′; long. 81° 19′; from Bhadrachellam E.S.E. 26 miles; from Cocanada W.N.W. 75 miles; from Rekapully W.S.W. 1¾ miles. Largest village in talook. Remains of an earthwork fort dating from time of Reddy [q.v.] chiefs.——**(2)** Zemindarry, Village; Godavery dist., Bhadrachellam tal.; pop. 535; lat. of village 17° 34′; long. 81° 20′; from Bhadrachellam E.S.E. 28 miles; from Cocanada W.N.W. 73 miles; from Coonavaram E.S.E. 3 miles; from Ellore N.N.E. 60 miles; from Madras N.N.E. 312 miles; from Narsapore N.N.W. 81 miles; from Rajahmundry N.W. 48 miles. Formerly head-quarters station of Soory reddy vencayya, proprietor of the talook. Weekly market much frequented by hill people. Peshcush Rs. 16,709.

REKLA (ریکلا - reklah, *Hind.*). Small kind of bullock car [bandy], generally for one bullock between shafts.

RENOOCAY (रेणुका - rénuká, *San.*). From (rénu, san. proper name). A matronymic from renoo, her mother. Wife of jamadagny [q.v.] and mother of parshooraman [q.v.]; same as Yellamma. See vol. I (77).

REPULLY (రేపల్లె - répalle,* *Tel.*). From (vrédu, tel. shepherd + palle, tel. village).——**(1)** Talook, Kistna district. Tahsildar's pay Rs. 250. Area 644 square miles Population 222,757. Language Teloogoo. On right bank of Kistna extending from sea to within few miles of Seetanagaram and Mungalagherry hills. S. coast of district. Bounded north by the Kistna, south Bay of Bengal, west Baupatla and Guntoor talooks, east the Kistna. With the exception of a slight sandstone [manal cull] ridge at Colacalore, the talook is wholly river alluvium [adaimunn] and in fact it lies below flood level, protected by embankments, like Holland. Many villages are situated on mounds, a few feet above surrounding fields. Irrigation by Kistna anicut [q.v.]. Places of archæological interest :—Anantavaram, Bhattiprole, Booddaum, Casooparroo, Chauvaly, Chiloomore, Chiloovore, Chinna parimy agrahauram, Colacalore, Collipara, Collore, Cootchellapaud, Dauvoolore, Dooggiraula, Goodavully, Intoor, Jampany, Modecoor, Moolcoodore, Moparroo, Nadimipully, Nandiveloogoo, Nidbrole, Nizampatam, Pedda condore, Peddapoody, Peddapully, Pedda rauvore, Peravaly, Pinnapaud, Ponnapulley, Poolivarroo, Sundavole, Tenally, Vaimore, Vallabhapooram, Vellatore, Vettapollem, Wolair, Yedlapulley, Yeevany. Principal trig. stations :—Adavooladivy, Cottapollem beacon, Pesarlunka, Potoomeraca, Repully fort, Shingoopollem. The leading places, &c., in the talook are the following.——*Adavooladivy* (అడవులదీవి - adavuladívi, Tel.). From (adavi, tel. forest + dívi, tel. island). Trig. station; lat. 15° 54′ 42·27″; long. 80° 50′ 10·82″; from Adavooladivy E. 2 miles; from Repully S.S.W. 8 miles; from the sea N. 4 miles.——*Bhattiprole* (భట్టిప్రోలు - bhattiprólu, Tel.). From (bhatti, tel. proper name + prólu, tel. town). Village; pop. 2,880; acres 2,461; lat. 16° 06′; long. 80° 49′; from Masulipatam W.S.W. 24 miles; from Repully N.W. 7 miles; from the sea N. 16 miles. High mound called Lanja dibba, belonging to time of Jeinas [q.v.]. Demolished Booddhist [booddha] stoopam [q.v.]. Inscriptions at temples of Vittaleshwaran and Mulleshwaran dated A.D. 1144, 1252, 1260, 1528, and 1542.——*Colacalore* (కోలకలూరు - kolakalúru, Tel.). From (kolanu, tel. tank + úru, tel. village). Village; pop. 3,333; acres 6,295; lat. 16° 19′; long. 80° 39′; from Masulipatam W.N.W. 35 miles; from Repully N.W. 24 miles; from the sea N. 30 miles. Several old inscriptions and hidden treasure [nidhy] have been discovered. Agasteeshwaran temple with inscriptions of Chola [q.v.] kings, dated A.D. 1202 and 1241; and on a slab south of the eastern gateway an inscription, dated A.D. 1318, recording a grant by a son of the General of Prataupa roodran. Two other inscriptions at the south gateway of the Keshavasawmy temple record grants by the same authority.——*Collipara* (కొల్లిపర - kollipara, Tel.). From (kolli, tel. tree, ipomæa hederacea, jacq. + parra, tel. a swamp). Village; pop. 4,025; acres 4,292; lat. 16° 18′; long. 80° 47′; from Masulipatam W.N.W. 26 miles; from Repully N.N.W. 19 miles. Inscription near the Moocteshwaran temple. Gives its name to a channel.——*Collore* (కొల్లూరు - kollúru, Tel.). From (kollu, tel. pond + úru, tel. village). Village; pop. 3,989; acres 4,589; lat. 16° 11′; long. 80° 50′; from Masulipatam W. 22 miles; from Repully N.N.W. 11 miles; from the sea N. 21 miles. Temples with inscriptions dated A.D. 1172, 1173, 1177 and 1533. Lock.——*Cottapollem beacon* (కొత్తపాలెము - kottapálemu, Tel.). From (kotta, tel. new + pálemu, tel. fortified village). Trig. station; lat. 15° 52′ 18·53″; long. 80° 49′ 6·77″; from Cottapollem W. 2 miles; from Repully S.S.W. 12 miles. On seashore.——*Dindey* (దిండె - dinde, Tel.). Means a sheaf of corn. Village; pop. 2,014; acres 11,882; lat. 15° 54′; long. 80° 44′; from Masulipatam W.S.W. 35 miles; from Repully S.W. 13 miles; from the sea N. ½ mile. Bungalow [q.v.] on beach built by Mr. Rhode, former judge of Guntoor.——*Dooggiraula* (దుగ్గిరాల - duggirála, Tel.). From (dugga, tel. goddess párvatí + ráyi, tel. stone). Village, Head-quarters of Executive engineer in charge of Kistna western delta; pop. 1,991; acres 1,990; lat. 16° 20′; long. 80° 40′; from Masulipatam W.N.W. 34 miles; from Repully N.N.W. 25 miles; from the sea N. 30 miles. On main canal. Temple of Keshavasawmy repaired by Reddies [q.v.] of Condaveed, built by Chola kings.——*Gungarole* (గంగవోలు - gangavólu, Tel.). See sep. title.——*Intoor* (ఇంటూరు - intúru, Tel.). From (illu, tel. house + úru, tel. village). Village; pop. 2,483; acres 5,374; lat. 16° 04′; long. 80° 40′; from Masulipatam W.S.W. 34 miles; from Repully W. 14 miles; from the sea N. 13 miles. Ancient temple of Veerabhadran [q.v.]. Public bungalow [q.v.]. Choultry [q.v.].——*Keitpully* (కైతేపల్లి - kaitepalli, Tel.). From (kaitamu, tel. poetic talent + palli, tel. village). Village; pop. 1,051; acres 2,299; lat. 15° 56′; long. 80° 54′; from Masulipatam S.W. 25 miles; from Repully S.S.E. 7 miles; from the sea N.E. 6 miles. On the Kistna. Formerly important but much deteriorated by inundation of 1864. It formed part of the old Nellore Oodayagherry circar [q.v.], of which the Zoopully [q.v.] family were joint deshmookhs [q.v.] in past centuries and so did not come under the jurisdiction of the Guntoor zemindars [q.v.]. Basaulut jung gave it as a jagheer [q.v.] to his Diwaun [q.v.] futteh ally khan. In 1801 it was formally restored to him and considered part of Nellore district. In 1811 Futteh ally khan died. In 1813 Keitpully was tranferred to Masulipatam and in 1823 to Guntoor.——*Kistna* (కృష్ణ - krishna, Tel.). See sep. title.——*Lunkevaunidibba* (లంకెవానిదిబ్బ - lankevánidibba, Tel.). From (lankevádu, tel. proper name + dibba, tel. mound). Trig. station; lat. 15° 49′ 27·99″; long. 80° 54′ 5·52″; from Lunkevaunidibba N.N.E. 3 miles; from Repully S. 14 miles; from the sea N. 7 miles.——*Modecoor* (మోదుకూరు - módukúru, Tel.). From (módugu, tel. palásha tree, butea frondosa, r. + úru, tel. village). Village; pop. 2,538; acres 4,199; lat. 16° 08′; long. 80° 37′; from Masulipatam W. 37 miles; from Repully W.N.W. 19 miles; from the sea N. 17 miles. Temples founded by Cholans [q.v.].——*Mortota* (మోర్తోట - mortóta, Tel.). Village, Port; pop. 1,517; lat. 15° 59′ N.; long. 80° 56′ E. Ancient temple.——*Nandiveloogoo* (నందివెలుగు - nandivelugu, Tel.). From (nandi, san. sacred bull + velugu, tel. hedge). Village; pop. 1,891; acres 1,158; lat. 16° 18′; long 80° 41′; from Masulipatam W. 33 miles; from Repully N.W. 22 miles; from the sea N. 28 miles. Agasteshwara sawmy temple, with inscription, dated A.D. 1132. Seetaramasawmy temple built by Cholans [q.v.].——*Nidbrole* (నిడుబ్రోలు - nidubrólu, Tel.). From (nidu, tel. long + prólu, tel. town). Village; pop. 2,127; acres 3,990; lat. 16° 04′; long. 80° 36′; from Masulipatam W. 39 miles; from Repully

W. 19 miles; from the sea N. 14 miles. Temple with inscription recording its erection in A.D. 1132.——*Nizampatam* (నిజాముపట్టణము - nijámupattanamu, Tel.). See sep. title.——*Oollipollem* (ఉల్లిపాలెము - ullipálemu, Tel.). From (ulli, tel. onion, allium cepa, linn. + pálemu, tel. fortified village). Village; pop. 2,235; lat. 16° 00′; long. 80° 50′; from Repully W.S.W. 3 miles. Nizampatam ex-zemindar's fort.——*Penoomoody* (పెనుమూడి - penumúdi, Tel.). From (penu, tel. great + múdi, tel. village). Village, Port; pop. 1,374; acres 1,059; lat. 16° 02′; long. 80° 55′; from Madras N. 206 miles; from Masulipatam W.S.W. 20 miles; from Repully E.N.E. 2 miles; from the sea W. 20 miles. Bungalow [q.v.]. Ferry.——*Peravaly* (పెరవలి - peravali, Tel.). From (pera, tel. great + vali, tel. god of the winds, father of hanumán). Village; pop. 2,653; acres 4,575; lat. 16° 09′; long. 80° 45′; from Masulipatam W. 28 miles; from Repully N.W. 12 miles; from the sea N. 17 miles. Two temples built by Chola [q.v.] kings. Inscription dated A.D. 1439. Lake called Gungavole.——*Pesarlunka* (పెసర్లంక - pesarlanka, Tel.). From (pesara, tel. green gram, phaseolus mungo, linn. + lanka, tel. island). Trig. station; lat. 16° 4′ 43·59″; long. 80° 53′ 52·35; from Pesarlunka S.S.E. 8 miles; from Repully N.N.E. 4 miles; from the sea W. 21 miles.——*Potoomeraca* (పోటుమెరక - pótumeraka, Tel.). From (pótu, tel. high water + meraka, tel. high ground). Trig. station; lat. 15° 55′ 32·45″; long. 80° 53′ 5·16″; from Potoomeraca S. ¾ mile; from Repully S. 7 miles; from the sea N. 14 miles.——*Repully* (రేపల్లె - répalle, Tel.). See below. ——*Repully fort* (రేపల్లెకోట - répallekóta, Tel.). Trig. station; lat. 16° 1′ 25·80″; long. 80° 53′ 6·90″; from Repully S.E. ¾ mile; from the sea N.N.E. 20 miles.——*Singoopollem* (శింగుపాలెము - shingupálemu, Tel.). From (shingu, tel. proper name + pálemu, tel. fortified village). Trig. station; lat. 15° 57′ 53·77″; long. 80° 54′ 20·06″; from Repully S.S.E. 5 miles; from Singoopollem N.W. ¼ mile; from the sea N. 16 miles.——*Sundavole* (సండవోలు - tsandavólu, Tel.). See sep. title.——*Tenally* (తెనాలి - tenáli, Tel.). See sep. title.——*Vellatore* (వెల్లటూరు - vellatúru, Tel.). From (vella, tel. white + úru, tel. village). Village; pop. 1,738; acres 1,581; lat. 16° 07′; long. 80° 51′; from Masulipatam W. 21 miles; from Repully N.N.W. 7 miles; from the sea N. 24 miles. Ancient temple of Agasteeshwarasawmy. Vishnoo [q.v.] temple with inscription.——*Wolair* (వోలేరు - vóléru, Tel.). From (óli, tel. line + éru, tel. river). Village; pop. 2,319; acres 2,820; lat. 16° 04′; long. 80° 54′; from Masulipatam W.S.W. 20 miles; from Repully N. 3 miles; from the sea N. 22 miles. Last century the village was almost wholly Christian and part of the large church then built is still standing. About 50 families of Cumma [q.v.] cultivators migrated in 1787 under Father Manenti and settled at Keelcherry [q.v.] in Chingleput district, where they still form a Teloogoo christian colony. Near the church is an epitaph in French and Teloogoo on the grave of Ignatius, a native of Pondicherry, who died in 1792. Old villagers recollect that the festival of St. francis xavier was kept with some splendour. The only Christians in the village are seven or eight Pariah [q.v.] families. The chancel of the church fell in during the cyclone of 1864. Madana gopalsawmy temple, with inscription, of A.D. 1538 in the reign of Atchoota deva roya of Vijianugger.——**(2)** Town, Talook head-quarters, Sub-registrar's office; Kistna dist., Repully tal.; pop. 3,248; acres 2,039; lat. 16° 02′; long. 80° 53′; from Bezwada S.S.E. 36 miles; from Guntoor E.S.E. 31 miles; from Madras N. 208 miles; from Masulipatam W.S.W. 22 miles; from Vinoocondah E. 72 miles; from the sea N. 19 miles. Ruined fort.

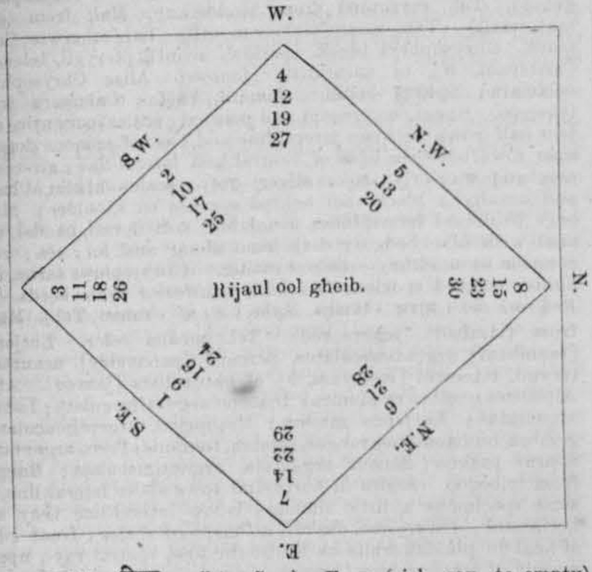
RHEEA (اُتنگن - utangan, *Hind.*). Title from assamese. Same as China grass.

RHETSA (चिरफळ - chirap'hala, *Mahr.*; तेपळिरूकु - tópalirúku, *Conc.*; ಜಿಮ್ಮಿಮರ - jimmimara, *Can.*; ಕಾವಟೆ - kávate, *Too.*; రత్సమాను - rattsamánu, *Tel.*; മുള്ളില - mullila, *Mal.*; කඩුකින - katukína, *Singh.*; இரச்சைமரம் - iraççaimaram, *Tam.*). Title from teloogoo. Mahr. from (chira, san. long time + p'hala, san. fruit). Tel. from (rattsa, tel. assembly + mánu, tel. tree), from hill people assembling under the tree to determine public affairs. Mal. from (mul, mal. sharp-pointed + ila, mal. leaf). Singh. from (katu, singh. thorny + kína, singh. calophyllum tomentosum, wight.). Tam. from teloogoo. Mahr. also (tirap'hala); (tisala), by corruption. Mal. also (karimurikku), meaning black erythrina indica, lamk.; (mulakila), meaning pepper leaf. Title otherwise Black palaus, Pepper leaf, Thorn leaf, Toothache tree. Botanically Zanthoxylum [toomroo] rhetsa, dec., rutaceæ [vricsham, 32]. Specific name from teloogoo. Alias Fagara rhetsa; Lacuris illicioides; Tipalia limonella; Xanthoxylon rhetsa. Tipalia from concany. Tree, 50 feet, everywhere armed with prickles; bark corky; leaves alternate, equally pinnated; leaflets eight to sixteen pair, lanceolate, unequal-sided, entire, glabrous; panicles terminal; petals and stamens four; capsule sessile, solitary, globose; seeds solitary, round, glossy black; flowers small, yellow; capsule one-celled Unripe capsules aromatic, tasting like fresh orange-peel; inner lamina of the bark bitter and acrid; seeds like that of black pepper [q.v.] and used as a stimulant.

RHOODA (رده - rúdah, *Hind.*). From (rúd, pers. a bow string). Catgut, made of the twisted intestines of sheep [and].

RICE (तण्डुल - tandula, *San.*; ارز - aruz, *Ar.*; برنج - biranj, *Pers.*; چاول - chával, *Hind.*; బియ్యము - biyyamu, *Tel.*; അരി - rai, *Mal.*; அரிசி - arisi, *Tam.*). Title through arabic, and perhaps others, from tamul. San. from (tad, san. to beat). Tam. from (ari, tam. to beat). Greek ὀρύζα from tamul. Husked paddy [paddy, wet crop]. Raw rice is rice husked after sun-drying. Prepared rice is parboiled.——*Millet rice* (باجرا چاول - bájráchával, Hind.). Same as Matted purple grass.——*Mountain rice* (پہاڑی چاول - pahárichával, Hind.). Oryza mutica, roxb; otherwise upland rice, wild rice [nivvary].——*Pearl rice* (മുത്താരി - muttári, Mal.). Title from round seeds. Mal. means same. Same as Raggy.

RICSHAM (ऋक्ष - riksha, *San.*; असवल - asavala, *Mahr.*; دب - dubb, *Ar.*; خرس - khirs, *Pers.*; ریچھ - richh, *Hind.*; ریچ - rích, *Dec.*; بروڠ - bruvang, *Malay*; ಕರಡಿ - karadi, *Can.* and *Too.*; ఎలుగు - elugu, *Tel.*; ଭାଲୁ - bhallu, *Oor.*; പന്നിക്കരടി - pannikkarati, *Mal.*; උස - usa, *Singh.*; கரடி - karadi, *Tam.*). San. from (riksh, san. to hurt). Tam. from (karadu, tam. rough). San. also (bhalluka), injuring animal. Hind. also (bhál); (ádamzád), meaning son of man. Can. also (kaddi). Mal. also (karati). Tam. also (aiváymirugam), meaning five-mouthed animal; from prehensile power of its four feet and mouth.—"*a*" Title otherwise Bear, Indian black bear Sloth bear. Melursus ursinus, ursidæ, plantigrada, carnivora, mammalia [sastanam, 7], of naturalists [jantoo]. Alias Bradypus ursinus; Melursus lybicus; Ursus inornatus, labiatus. The brown bear of Europe, Ursus arctos is the type of the family, and has been known from the earliest ages. An extinct species of bear, Ursus spelæus, commonly called the cave bear, seems again to have been the ancestor of the brown bear. The present species are large, heavy animals, strictly plantigrade. Black, hair very long and shaggy; muzzle and tip of feet dirty white or yellowish; a white crescentic, or V-shaped mark on the breast. Soles of the feet usually devoid of hair; ears small; snout lengthened; tail usually very short. Their claws are adapted for digging, being long and stout, and they are mostly expert climbers. The sole of the hind foot leaves a mark not unlike that of a human print. Found chiefly in hilly districts; especially where there are decomposed masses of granite [caroomcull] with natural caverns. They ascend the top of the Neilgherries and other high ranges in spring to feed. Their food is black ants [choomtee], termites, beetles [zeerangy], fruit [pazham], particularly the seeds of Cassia fistula [common condray], of the date tree [kharjooram], honey [shahad], &c. The power of suction in the bear as well as of propelling wind from its mouth is great. They are commonly led about to perform various antics. Among the Poligars [q.v.] of the south bears used to be hunted by dogs [nye]. When pursued, they carry their cubs on their back. They are long-lived, living in a state of captivity for forty years. They do not rise to hug their adversary; they use their claws however with great effect. Bear's hair is enclosed in amulets and tied around the neck of children. Its skin is cut into straps and tied round the necks of bulls as a safeguard against disease. Sometimes its blood is preserved on cloths and used in rheumatic pains. Bear's grease is also used as an emollient in rheumatism. Indian species not here found are:—Ailuropus melanoleucos, Ursus isabellinus or himalayan brown bear, Ursus malayanus or bruang or malayan sun bear, Ursus torquatus or himalyan black bear.—"*b*" Ricsham is in very ancient sanscrit astronomy the general term for a constellation [nacshatram]; in this sense probably originally from (ruch, san. to shine), but corrupted to present meaning [rooch]. Maha ricsham is then not only the Great bear [doobhe acbar] but any other large constellation. Very ancient hindoo astronomers ascribe to the stars in the great bear [doobhe acbar] a particular motion or variation of longitude, different from other stars, and unconnected with the precession [ayanaumasham] of the equinoxes [maunam]; but this appears to be an error of confusion arising out of the line of the rishies [rishy raikhay]. The line of the rishies or rishy raikhay [ayanaumsham, craunty pautam, maunam, rishy raikhay] so called in bengal appears by corruption as the line of the ricshams in teloogoo [jyotisham, nacshatram].—"*c*" Plant first term meaning shaggy. Ex., where transl. is of second term:—Hemigyrosa canescens (karadippungam), pongamia glabra; Methonica superba (karadikannina-gadde), eye + root. See gloss. paragraphs.



RIDY (റിടി - riti, *Mal.*). From (ridí, singh. silver). Coin consisting of two silver wires hooked, &c. Fish-hook coin [larin].

RIFAT (رفعت - rifat, *Ar.*). From (rafa, ar. to raise). Exalted. Part of lacab; as Rifat ool moolk, exalted in the state [ism].

RIG (ऋक् - rik, *San.*). From (rich, san. to praise). The first Vedam [q.v.].

RIJAUL (رجال - rijál, *Hind.*). Plural of (rajul). Men.——*Rijaul ool gheib* (رجال الغيب - rijálulghaib, Hind.). From (above + ghaib, ar. concealed). An invisible spiritual being who moves in a circular orbit round the world. On different days his station

is in different places. His influence on each day [roz] is especially exerted during nine ghurries [q.v.] or three hours and thirty-six minutes at the close of that lunar day [tity], and in this interval it is unfortunate to begin a journey. Amongst the Mahomedans when a man starts on a journey his friends and relations often tie on his left upper arm a band of silk riband containing silver or gold coin, which they call Imaum zaumin or imaum's protection. When the journey is accomplished in safety, these deposits are distributed amongst the poor. Rijaul ool gheib should not be in front of the traveller nor on his right, but either behind or to his left. The following table shows his position on different days of the month; always noted in the calendar. Compare Rahoo caulam and Goolica caulam of the hindoos :—

RIKTAM (रिक्त - rikta, *San.*). From (rich, san. to empty). Empty. Riktatity is the name of the fourth, ninth and fourteenth days in a lunar fortnight [jayay, pacsham].

RINAM (ऋण - rina, *San.*). Literally decrease. Minus in mathematics [ganitam]. Also debt. Funeral rites, anniversary rites [shrauddham], and tarpanam [q.v.], &c., are termed Pitry rinam or debt of obligation to deceased ancestors.

RISAULAH (رساله - risálah, *Hind.*). From (rasula, ar. to go or send a message). Detachment of native irregular cavalry. Now current in Mysore. Rissaldar is the native officer commanding the same. Next come in order the Jemadar, Havildar, Duffedar, and Sillahdar; which see in their places.

RISHABHAM (ऋषभ - rishabha, *San.*; بیل - bail, *Hind.*; ಗೂಳಿ - gúli, *Can.*; ఎద్దు - eddu, *Tel.*; കാള - kála, *Mal.*; எருது - eruthu, *Tam.*). San. from (rish, to sprinkle, the idea of impregnating being involved). Mal. from (kálu, mal. to bellow). Bull [raushy]. Second note of gamut, represented by abbreviation Ri [sangeetam, swaram]. Also applied to Nundy [nundy, poonya prauny, vauhan] ——*Rishabha devan* (ऋषभदेव - rishabhadéva, San.). From (above + déva, san. god). Basava [q.v.], the founder of Lingayet [q.v.] sect [jauty].

RISHY (ऋषि - rishi, *San.*; இருடி - irudi, *Tam.*). From (drish, san. to see). One who has seen the words of revelation. A holy sage. Distinguish from Moonies who are a minor class and much more numerous [matam].—"*a*" The vishnoo pooraunam [q.v.] says there are three kinds of rishies :—royal rishies or princes, who have adopted a life of devotion, as Vishwamitran [q.v.]; divine rishies or sages, who are demi-gods also, as Nauradan [q.v.]; and bramharishies, or sages who are the sons of bramha [q.v.] or bramins, as Vasishtan [q.v.] and others. In the epic period rishy is merely a name for historical personages, distinguished for their piety and wisdom, either by their acts or their writings. In the pooraunic period the chief rishies are seven primeval personages, born of Bramha's mind, and presiding under different forms over each Manwantaram [caulam, menoo]. The seven great rishies [saptarishy] usually named are:— Angiran, Atry, Bharadwaujan, Gowtaman, Jamadagny, Vasishtan, Vishwamitran. Another list is:—Agastyan, Angiran, Caushyapan, Gowtaman, Marcandeyan, Poolastyan, Vasishtan. These with Satyavratan escaped the waters of the deluge [pralayam] by the favor of Vishnoo [q.v.].—"*b*" The names of these seven rishies have been given to the seven stars [nacshatram] of Ursa major [doobhe acbar]; their festival is the fifth of waxing fortnight [pacsham] of bhaudrapadam [mausam] or September. The following are the great bear rishies usually enumerated:— Mareechy, Atry, Angiran, Poolastyan, Poolahan, Cratoo and Vasishtan. The seven rishies have wives, but probably by a later poetical invention; these are then in astronomy the Pleiades [kritticay, sooreiyah]. There is also a list of thirty-one astronomical rishies, probably connected with the stars in the Fishes [hoot, meenam]. See vol. I (78), (115).——*Rishicondah* (ఋషికొండ - rishikonda, Tel.). From (above + konda, tel. hill). Village, Hill; Vizagapatam dist., Vizagapatam division; pop. 307. Otherwise Sugar-loaf hill. On seashore between Vizagapatam and Bimlipatam. Formerly abode of Rishies. At foot is a Shiva temple. Rishicondah beacon trig. station is in lat. 17° 46′ 40·38″; long. 83° 25′ 30·62″; from Rajpollem N.E. 5 miles; from Vizagapatam N.E. 8 miles; from the sea W. ¾ mile.——*Rishy punchamy* (ఋషిపంచమి - rishipanchami, Tel.). Means sage + fifth. Lunar [chaundramaunam] festival [pundigay, 3a], subject to intercalation [adhicam]. On the fifth lunar day [tity] in the waxing moon [shooclapacsham] of sixth lunar month Bhaudrapadam [mausam] between 19th August and 20th September. Sacred to the seven sages [saptarishy]. Follows after Pillaiyaur chatoorty [q.v.]. Women of advanced age are in general charged with performance of ceremony, which consists in ornamenting and worshipping seven stones intended to represent the sages. They are obliged to fast [oopavausam] the whole day and night on the occasion. ——*Rishy raikkay* (ऋषिरेखा - rishirékhá, San.). From (above + rékhá, san. line). The line of the Rishies. A great circle passing through the pole of the ecliptic [craunty mundalam], and according to some shastrams cutting a certain star in the constellation [nacshatram] of the great bear or Maha ricsham [doobhe acbar, maha ricsham], supposed by some to β [alanak] by others to be γ or δ Ursæ majoris, and meeting the yogam [q.v.] star Veidhrity [q.v.], the same as either η or ζ Piscium [hoot] or some neighbouring star; although no great circle [mundalam] passing through the pole of the ecliptic [craunty mundalam] could now be made to intersect these points [madhyama sowra maunam, ricsham]. The line of the Rishies is really only a great circle drawn through the pole of the ecliptic and the equinoctial colure [maishauyana mundalam, vishoo mundalam] of the time being. This passed through the great bear some 5,000 years B.C., whence may have come the tradition mentioned above. See Madhyama sowra maunam. ——*Rooshcoolya* (ఋషికుల్య - rishikulyá, Tel. rushkulya*). From (above + kulyá, san. channel). River; Ganjam dist., Berhampore and Goomsoor tals., Dhauracote zemindarry, Aska estate, and Chinna kimedy maliahs. Largest river in district. Rises in Chinna kimedy maliahs in lat. 19° 51′ and long. 84° 04′ and runs south-east to Aska, where it is joined by Mahanuddy; thence south-east and east till it enters the sea at Ganjam in lat. 19° 22′ north and long. 85° 7′ east. Length about 115 miles. Principal towns on its banks; Sooradah, Aska, Poorshottapore and Ganjam. Spanned at Aska by a masonry bridge of 19 arches. For account of Rooshcoolya project, see vol. I, 407.——*Sapta rishy* (सप्तर्षि - saptarshi, San.). From (sapta, san. seven + above). Ursa major [doobhe, acbar, maha ricsham]. See under Saptam.

RISHYAM (ऋष्य - rishya, *San.*). From (rish, san. to go). White-footed antelope [jinka].——*Rishyamoocam* (ऋष्यमूक - rishyamúka, San.). From (above + múka, san. mute); with silent antelopes. A mountain in the Deccan [q.v.], the temporary abode of Rama [q.v.] with the monkey chief Soogreevan [q.v.]; somewhere in north of Mysore, near source of Pumpah river. See vol. I (1), (3).

RITOO (ऋतु - ritu, *San.*). From (rí, san. to go). A fixed time epoch [caulam, 2]. A season, a period of two months, dividing the year according to the sanscrit into the six seasons of:— Vasantam, spring; Greeshmam, hot weather; Varsham, rains; Sharad, autumn; Hemantam, cold; Shishiram, dewy or foggy. The following is given by a Bramin to a rajah as a blessing:— "May you enjoy in Hemantam the congenial warmth of your "wife, in Shishiram, the gentle heat of the sun; the pleasures "of a shady garden in Vasantam, and of cool bathing in Greesh- "mam; comfortable high room in Varsham, and a copious "draught of fresh milk in Sharad." The dravidians reckon their first season from August after the establishment of the S.W. monsoon, thus Caur, Coothir, Moon pany, Pin pany, Yila venil, Moothir venil; but they have terms which correspond to the weather [caulam, caur, caurtey, mausam]. See vol. I, 610.— *Caur* (கார் - kár, Tam.). Means blackness. First Tamul season. Corresponding to August and September, Auvany-Pooratausby [mausam].——*Coothir* (கூதிர் - kúthir, Tam.). Cold. Second Tamul season. Corresponding to October-November or Arpisy Caurtigay [mausam].——*Greeshmam* (ग्रीष्म - gríshma, San.). From (gras, san. to consume). Hot season. Second Sanscrit. Comprehending Teloogoo months Jyeshtam and Ashaudham, when the sun [sooryan] is in the signs [raushy] Mitoonam ♊ and Carcatacam ♋, answering to the Tamul months Auny or june and Audy [mausam] or july.——*Hemantam* (हेमन्त - hémanta, San.). From (hima, san. dew). Fifth Sanscrit. The cold season. Comprehending Teloogoo months Margashiram and Pooshyam, when the sun [sooryan] is in the signs [raushy] Dhanoos ♐ and Macaram ♑, answering to the Tamul months Maurgaly or december and Tye [mausam] or january.——*Moon pany* (முன்பனி - munbani, Tam.). From (mun, tam. fore + pani, tam. dew). Early dewy season. Third Tamul. Corresponding to December-January or Maurgaly-Tye [mausam].— *Moothir venil* (முதிர்வேனில் - muthirvénil, Tam.). From (muthir, tam. mature + vénil, tam. heat). Very hot season. Sixth Tamul. Corresponding to June-July or Auny-Audy [mausam].——*Pin pany* (பின்பனி - pinbani, Tam.). From

(pin, tam. after + pani, tam. dew). Later dewy season. Fourth Tamul. February-March or Maushy-Pungoony [mausam].——*Sharad* (शरद् - sharad, San.). From (shri, san. to wither). Autumn. Fourth Sanscrit. Comprehending Teloogoo months Aushweejam and Caurteecam, when the sun [sooryan] is in the signs [raushy] Toolaum ♎ and Vricshicam ♏, answering to the Tamul months Arpisy or october and Caurtigay [mausam] or november.——*Shishiram* (शिशिर - shishira, San.). Cold or dewy season. Sixth Sanscrit. Comprehending the Teloogoo months Maugham and Phaulgoonam, when the sun [sooryan] is in the signs [raushy] Coombham ♒ and Meenam ♓, answering to the Tamul months Maushy or february and Pungoony [mausam] or march.——*Varsham* (वर्षा - varshá, San.; வருடம் - varudam, Tam.). From (vrish, san. to rain). Rainy season. Third Sanscrit. Comprehending the Teloogoo months Shrauvanam and Bhaudrapadam, when the sun [sooryan] is in the signs [raushy] Simham ♌ and Canyay ♍, answering to the Tamul months Auvany or august and Poorataushy [mausam] or september.——*Vasantam* (वसन्त - vasanta, San.). From (vas, san. to shine). Spring. First Sanscrit. Comprehending the Teloogoo months Cheitram and Veishaukham, when the sun [sooryan] is in the signs [raushy] Maisham ♈ and Vrishabham ♉, answering to the Tamul months Chittray or april and Veiyaushy [mausam] or may.——*Yila venil* (இளவேனில் - ilavénil, Tam.). From (ilam, tam tender + vénil, tam. heat). Milder hot season. Fifth Tamul. Corresponding to April-May or Chittray-Veiyaushy [jyotisham, mausam].

RIWAUJY (رواجى - riwájí, *Hind.*). Means current. A gold coin of Jehaungeer [q.v.]. Weight ¼ tolah [q.v.].

RIYAUZY (رياضى - riyází, *Hind.*). From (rowza, ar. to train). Mathematics [ganitam] or exact sciences [ilm, shastram].

RIYOYATY (رعايت - riáyat, *Hind.*). From (rau, ar. to abstain). Otherwise Royaty. Favor, especially a remission of the government claim.

RIZYE (رضائى - razái, *Hind.*). From (razú, ar. to please). A coverlet quilted with cotton [sheelay].

ROBAUL (காலா - kálá, *Tam.*). Title otherwise Indian sturgeon. The genus Polynemus, polynemidæ, acanthopterygii, teleostei, pisces [matsyam, 11], of naturalists [jantoo]. The species best known to the natives here are Golden robaul, Screw-pine robaul. Cf. also Streaked robaul in another genus. The Pilgrim fish of bengal, from going up the ganges to benares, or from long fibres resembling unshaven hairs of penitent [tupsee]; otherwise Mango fish [q.v.], because it fills the ganges in the mango [q.v.] season; is Polynemus, paradisea.——*Golden robaul* (रावस - rávasa, Mahr.; మాగజెల్ల - mágajella, Tel.; വാഴിമീൻ - vázhimín, Mal.; பொலங்காலா - polangálá, Tam.). Title from color. Tel. from (mága, tel. robaul, polynemus indicus + jella, tel. sphyræna jello). Mal. from (vázhu, mal. to rule + min, mal. fish). Tam. from (polam, tam. gold + kálá, tam. sturgeon, polynemus genus). Mahr. also (chéláchi). Tel. also (errakála), meaning red robaul. Polynemus [robaul] tetradactylus, polynemidæ, acanthopterygii, teleostei [matsyam, 11], of naturalists. Alias Eleutheronema tetradactylus; Polynemus magajellee, salliah et quadrifilis, teria. Magajellee from teloogoo. Silvery-green, becoming yellowish-white on sides and abdomen, dorsal and caudal grayish with minute black points and nearly black at edges; ventral and anal pale orange in outer halves, pectoral filaments white; dark mark on upper portion of opercle; sea; 6 feet and upwards in length; excellent eating; well-known to sportsmen; the best fish to be caught in estuaries on the west coast.——*Screw-pine robaul* (भात - bhát, Mahr.; کالامچھی - kálámaççhí, Hind.; మాగబొచ్చ - mágaboççe, Tel.; ഏട്ട - étta, Mal.; தாழங்காலா - tázhangálá, Tam.). Title from color like the yellow screw-pine flower. Hind. from tamul. Tel. from (mága, tel. robaul + boççe, tel. robaul, polynemus indicus). Mal. from (chétta, mal. elder), mischievous. Tam. from (tázhai, tam. screw-pine + kálá, tam. sturgeon, polynemus genus). Mahr. also (dára). Tel. also (mága); (máva). Polynemus [robaul] indicus, polynemidæ, acanthopterygii, teleostei [matsyam, 11], of naturalists. Alias Polynemus magabooshee, sele, uronemus; magabooshee from teloogoo. Air-vessel oval and thick, occupying entire length of abdomen; lateral-line continued along lower caudal lobe almost to its end; vertical fins rather densely scaled; back purplish-black, abdomen silvery-white, dashed with gold; first and second dorsals also anal stained with black, as is the lower half of the opercle; caudal with many black points; sea; 4 feet in length; rarely above 20 lbs. weight; yields about two ounces of rough isinglass [meen vajram].——*Streaked robaul* (माल - mála, Mahr.; తాళ్ళమేవ - tállaméva, Tel.; ମୋରର - morara, Oor.). Title from markings. Mahr. means streaked. Tel. from (tádu, tel. rope + méva, tel. polynemus indicus). Mahr. also (chitala), meaning spotted antelope, from markings on back. Amblypharyngodon mola, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists [jantoo]. Specific name from mahratta. Alias Cyprinus mola; Leuciscus chitul, mola; Mola buchanani; Rhodeus macrocephalus. Chitul from mahratta. Silvery lateral band, and usually dark markings on the dorsal, caudal, and anal fins. No other common species here.

ROBIN (اربعين - arbaín, *Hind.*). From (ruba, ar. fourth). Canara measure of capacity, one-fourth of candy [alavay, 3c]. Same as Mooda.

ROCK (چٹان - chatán, *Hind.*). Prefix indicating habitat and resort, or hardness and mass [cull].——*Black rock cod* (खार्वा - khárvá, Mahr.; کالامدوان - kálámadwán, Hind.; కలమరి - kalamari, Tel.; അരി - ari, Mal.; மட்டிவாயன் - mattiváyan, Tam.). Hind. from (kálá, hind. black + madwán, hind. chrysophrys genus). Tel. corrupted from hindostany. Mal. from (aru, mal. small). Tam. means clumsy mouth. Title otherwise Calamara. Chrysophrys berda, sparidæ, acanthopterygii, teleostei [matsyam, 5], of naturalists [jantoo]. Alias Chrysophrys calamara; Sparus berda, calamara, hasta; Calamara from teloogoo. Snout compressed and pointed; scales four entire and two half rows between lateral-line and base of spinous dorsal; nine rows between base of ventral and lateral-line; air-vessel notched posteriorly; colors silvery-grey; scales darkest at bases and usually a black spot behind opercle on shoulder; black edge to dorsal interspinous membrane, soft dorsal, caudal, and anal with black edges; dark band along anal fin; sea; very common at madras; excellent eating. Chrysophrys sarba, is a lighter colored species; as food it is inferior to the berda.——*Red rock cod* (ताम्बा - támba, Mahr.; రంగు - rangu, Tel.). Mahr. from (támbadá, mahr. red). Tel. means color. Lutjanus [taumbam] argentimaculatus, percidæ [panayairy], acanthopterygii, teleostei [matsyam, 1], of naturalists [jantoo]. Alias Alphestes gembra et sambra; Diacope argentimaculata; Labrus argentatus; Lutjanus sambra; Mesoprion argentimaculatus, gembra, immaculatus, rangus, sambra, tœniops; Perca argentata; Sparus rangoo; Sciæna argentata, argentimaculata; Rangoo from teloogoo. Scales in horizontal rows above lateral-line, in some specimens a little sinuous; below lateral-line they are horizontal; cherry-red, darkest at bases of scales; front edge of anal fin pinkish-white as is also the first ventral ray; upper margin of spinous dorsal orange; in some specimens dark spots on dorsal, caudal and anal fins; very young have six to nine narrow, vertical, silvery-white bands, which become more or less lost as age increases; sea; attains upwards of two feet in length, and is good eating.——*Rock dammer* (உரப்புப்பிசின் - urappuppisin, Tam.). Title from being found in rock-like masses. See under Dammer.——*Rock oil* (மண்ணெண்ணெய் - mandailam, Tam.). Petroleum. Same as Munn teilam.——*Rock pigeon* (بن تیتر - bantítar, Hind.; డ్జాముపొలంక - dzámupólanka, Tel.; ବଟେଲ - battel, Oor.; മലമ്പ്രാവ് - malamprávu, Mal.; கற்கவுதாரி - kargavuthári, Tam.). Title from haunt and from fancied resemblance in flight to pigeon: is a misnomer; distinguish from blue rock pigeon [q.v.]. Hind. from (ban, hind. forest + títar, hind. partridge). Tel. from (dzámu, tel. time equal to three hours + pólanka, tel. sand grouse), from being seen only in the morning; the first jaumam [q.v.] of the day. Mal. from (mala, mal. mountain + právu, mal. pigeon). Tam. from (kal, tam. stone + kavuthári, tam. partridge). Hind. also (kumartíl); (bakhttítar); (kubar). Tam. also (káttukkózhi), meaning forest + fowl. Title otherwise Common sand-grouse. Pterocles exustus, pteroclidæ, rasores [paeshy, 31], of naturalists [jantoo]. Male general color fulvous isabelline, brighter and more yellow about lores, face, and chin, mixed with dusky greenish on back, wings and upper tail-coverts; primaries black, tips of all, except first three, white, broader on inner web; longitudinal median line on wing, formed by some coverts and secondaries being brighter buff; tail with central pair of feathers elongated and highly attenuated, isabelline yellow; lateral feathers deep brown, edged and tipped pale; fulvous; narrow black band in breast; abdomen deep chocolate brown burnt or singed color, hence exustus, paling on a vent, under tail-coverts creamy white, as are tarsal plumes; bill leaden; orbits lemon yellow; irides dark brown; feet plumbeous; length 13 inches; female has whole upper plumage, including tail-feathers, except plain bar on wing formed by greater coverts, fulvous, closely barred deep brown; also the space between pectoral band and abdomen; neck and breast unspotted dingy isabelline, abdomen as in male; central rectrices not elongated; commonest species of sand-grouse, never occurring in forest districts; unknown in malabar; frequents open plains, ploughed lands and bare fallow fields; feeds chiefly in the morning; when seated on ground, difficult to observe, from similarity of color to ground; flesh with high game flavor. No other common species here. The painted sand-grouse called in tel. (sandapólanka), or evening sand-grouse is Pterocles fasciatus.——*Rock salt* (கல்லுப்பு - kalluppu, Tam.). From hard mass. Same as Indooppoo, Soudah namak.——*Rock snake* (अजगर - ajagara, San.; اژدها - azhdahá, Pers.; اژدها - azhdahá, Hind. and Dec.; ಹೆಬ್ಬಾವು - hebbhávu, Can.; కొండచిలువ - kondachiluva, Tel.; പെരിമ്പാമ്പ് - perimpámbu, Mal.; வெண்ணாந்தை - vennándai, Tam.). Title from their size and strength. San. from (aja, san. goat + gri, san. to devour). Pers., &c., from sanscrit. Can. from (hedda, can. large + hávu, can. snake). Tel. from (konda tel. hill + chiluva, tel. snake). Mal. from (peru, mal. large + pámbu, mal. snake). Tam. from (vana,

san. wilderness + ándai, tam. lord). Tel. also (peddapoda), meaning large + stripe; (kondashila), by corruption. Tam. also (malaippámbu), meaning hill-snake; (másunam). Title otherwise Indian boa, Python. Terms co-extensive with family Pythonidæ ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 24], of naturalists [jantoo]. The Rock-snakes have the body and tail of moderate length or rather slender, rounded; tail prehensile; head with the snout rather long, depressed, truncated or rounded in front. Adult individuals with a spur-like prominence on each side of the vent; it is the extremity of a rudimentary hind limb hidden between the muscles. Individuals which measured 30 feet are on record. Rock-snakes from 15–20 feet long have the thickness of a man's thigh and will easily overpower a small deer [mrigam], a sheep [aud], or a good-sized dog [nye]. But although able to kill these animals, the width of their mouth is not so large that they can swallow one larger than a half-grown sheep. After having seized the victim, they smother it by throwing several coils of the body over and round it. In swallowing they always commence with the head; they live entirely on mammals [sastanam] and birds [pacshy]. During the time of digestion they move but slowly when disturbed, or defend themselves with little vigour when attacked; at any other time they will fiercely defend themselves. Rock-snakes must attain to a considerable age. The males remain smaller than the females. Rock-snakes will propagate in captivity. They are found in the hottest parts; climb as well as they swim; most prefer the neighbourhood of water. This family contains the largest snakes. The only South indian species is Python molurus. Alias Coluber molurus; Python bivittatus, tigris. The ground-color is light greyish brown; brown spot, shaped like the head of a lance, occupies the crown of the head and nape. Dark-brown streak runs from the nostril through the eye to behind the angle of the mouth, another band running along the lower jaw; sub-triangular brown spot below the eye; back of the body and tail with large quadrangular spots; sides of the body with irregular brown spots; lower parts yellowish, brownish or blackish on the sides. Prefers swampy ground, or at least the neighbourhood of water. Feeds on birds [pacshy], rodentia [moosham], young or small deer [mrigam], sheep [aud], &c. There is a Tamul stanza in Neetinery vilacam :—கண்கூடாப்பட்டது கேடெனினுங் கீழ்மக்கட் குண்டோவுணர்ச்சிமற் றில்லாகும்—மண்டெரி தான்வாய்மடுப்பினு மாசுணங்கண்டுயில்வ பேரி பெருமூச்செறிந்து—"though ruin be before their eyes, will "fools perceive it? no, they will not; though conflagration "rages near it, the sleeping rock-snake will not awake from its "loud-breathing slumbers."

RODA (రొడ - roda, *Tel.*). Marsh.——*Roddacumma* (రొడ్డకమ్మ - roddakamma, Tel.). From (above + amma, tel. goddess). Deity of the marsh and other sterile tracts. Compare Chowdamma. ——*Roddam* (రొడ్డము - roddamu, Tel.). From (roda, tel. marsh); village goddess is roddacumma. Sanscrit name by corruption (rudrapáda), meaning shiva + footstep. Village; Anantapore dist., Penoocondah tal.; pop. 2,901; acres 13,542; lat. 14° 06′; long. 77° 28′; from Anantapore S.S.W. 42 miles; from Penoocondah W. 11 miles. On the Pennair. There is an irrigation project here to supply the Roddam large tank [q.v.] by a channel [q.v.] which, it is proposed to lead from an anicut [q.v.] to be built across the Pennair river about two miles below where it is joined by the Jayamungaly. The length of the channel will be 6 miles by 15 yards broad with an average depth of from 4 feet of water. It will pass above the tanks of Calipy, Cottapully and Nulloor, and Cholmary, and greatly improve their supply. When the Cholmary tank is filled, its surplus water will be discharged into the Roddam large tank. 1,344 acres will be brought under cultivation. Two large tanks [q.v.] and a river channel [q.v.] irrigate a large extent. On the southern bank of Pennair is a small ancient temple supposed to contain Shiva's footstep [dharmaraja cull].

ROGAM (रोग - róga, *San.*). From (ruj, san. to injure). Disease. For Ashwarogam or horse diseases and Pashoorogam or cattle diseases see those heads. For fevers see Jwaram. For information on hindoo pathology generally see Veidyan and Ospitry. For hindoo astrology on rogam see Nacshatram.

ROGUE (ಕಳ್ಳಾನೆ - kalláne, *Can.*; దొంగఏనుగు - dongaénugu, *Tel.*; திருட்டுயானை - tiruttuyánai, *Tam.*). Tel. from (donga, tel. rogue + énugu, tel. elephant). Tam. from (tirudu, tam. to steal + yánai, tam. elephant). An elephant [q.v.], generally if not always a male, living in isolation from a herd and usually predacious.

ROHITACAM (रोहितक - róhitaka, *San.*; रोहिडा - róhidá, *Mahr.*; هرن هرا - harinhará, *Hind.*; రోహితక - róhitaka, *Tel.*; ചെമ്മരം - chemmaram, *Mal.*; රොහින් - róhin, *Singh.*; செம்மரம் - shemmaram, *Tam.*). San. from (róhita, san. red) [rohy, soymida]. Mahr. from sanscrit. Tel. from sanscrit. Mal. from (chem, mal. red + maram, mal. tree) [alanjy]. Singh. from sanscrit. Tam. from (shem, tam. red + maram, tam. tree). San. also (plíhaghna), meaning spleen destroying; (plíhashatru), meaning spleen + enemy, from being useful in enlargement of spleen. Hind. also (harinkhána). Can. also (shina); (mulen). Tel. also (chévamánu), meaning strong wood. Title otherwise Amoora bark tree, Red wood, Rohira, Rohiny, Spleen tree. Botanically Amoora rohituka, w. and a., meliaceæ [vricsham, 36]. Specific name from sanscrit. Alias Andersonia rohituka. Small tree; leaves unequally pinnated; leaflets six pair, opposite, obliquely-oblong, glabrous; young petioles slightly hairy on their lower part; male flowers in panicles shorter than the leaves, subsessile; calyx three-leaved; female flowers numerous, sessile, solitary, erect on spikes, which are rather more than half the length of the leaves; petals three; capsule pale yellow, three-celled, three-valved; seeds solitary, enclosed in a fleshy scarlet aril; flowers small, white, or cream-colored. Rohitacam bark is of a blackish-brown color externally, and rough from the presence of numerous small, elliptic, warty projections, arranged longitudinally, and from minute fissures; its substance is of a deep reddish-brown, and shows a striated internal surface; fracture short; when fresh it is soft and easily cut; the bulk of the bark is composed of parenchyme cells, containing starch and coloring matter; there are numerous yellow stone cells arranged in broken concentric layers, and very little woody fibre; the bark has a very astringent taste and turns of a greenish black when touched with a solution of ferric chloride; it has no particular odour. Bark is used as a medicinal astringent; oil [yennay] from seeds is stimulant in rheumatism. Wood reddish, close and even-grained, hard. Other species are :—cucullata, lawii, spectabilis. ——*Fever rohitacam* (சுரக்கள்ளி - shurakkalli, Tam.). Tam. means fever milk-hedge. Same as Soymida.——*Red rohitacam* (रक्तरोहिता - raktaróhitá, San.; रक्तरोहिडा - raktaróhidá, Mahr.; பேய்ப்பூலா - péyppúlá, Tam.). Title from flower and fruit. San. from (rakta, san. red + róhitá, san. red, amoora rohituka w. and a.). Mahr. from (rakta, san. red + róhidá, mahr. the plant so called, amoora rohituka, w. and a.). Tam. from (péy, tam. devil + púlá, tam. many-flowered phyllanthus, phyllanthus multiflorus, willd.). Mahr. also (raktaródá), by corruption. Title otherwise Demon poolah, Indian buck-thorn. Botanically Rhamnus wightii, w. & a., rhamneæ [vricsham, 41]. Alias Ceanothus wightiana. Common shrub upon the highest hills of the western ghauts, and extends to the neilgherries and ceylon; the leaves are glabrous, sub-opposite, elliptic, shortly acuminate, sharply serrate, and sub-coriaceous; pedicels axillary, fascicled, much shorter than the petiole; calyx five-cleft; petals cuneate-obovate; flowers greenish-yellow; styles three to four, diverging; ovary three to four-celled. The dried bark occurs as single quills or in curved pieces from two to three millimetres in thickness; the outer surface is dull brown; the younger bark is ashy-grey; the fracture is short externally, and tough and fibrous internally; the taste is astringent and bitter, but not unpleasant, a sweetish after-taste being left on the palate; the odour of the bark recalls that of tan. Bark is medicinally tonic, astringent and deobstruent. Common buck-thorn, otherwise purging buck-thorn, rain-berry thorn, rhine-berry thorn, way-thorn, is botanically Rhamnus catharticus, linn.; gives to pharm. buck-thorn juice the recently expressed juice of the ripe berries, rhamni succus, hydragogue cathartic; officinal; the pigment [rangh] sap green is made from the juice. Dahurian buck-thorn, chanto in hindostany, otherwise siberian buck-thorn, slender-branched buck-thorn, is botanically rhamnus dahuricus, pall., rhamneæ, a large erect shrub, flowers small, greenish yellow; sap-wood whitish, heart-wood brown, very hard and close-grained; used as firewood; there is a variety of this, hirsutus.

ROHITAM (रोहित - róhita, *San.*). Means red [rohy]. The genus Labeo, cyprininæ, cyprinidæ, physostomi, teleostei, pisces [matsyam, 39], of naturalists [jantoo]. Large tropical genus, of importance as food. Mouth situated below the snout, lips thickened, and sometimes fringed, with a horny inner fold on one or both. The genus can be divided into species having a pair of barbels on the snout, and species without barbels on the snout. The species best known to the natives are shown below. Other S. indian species are :—bata, boga, gonius, nigrescens.——*Black labeo* (रोहित - róhita, San.; कानोषि - kánóshi, Mahr.; کالا بهینس - kálábhains, Hind.; ಕರಿಮೀನು - karimínu, Can.; నల్లగండుమీను - nallagandumínu, Tel.; କାଳାବିୟେନ୍ସ - kálábiyense, Oor.). San. means red. Hind. from (kálá, hind. black + bhains, hind. buffalo); from size. Can. from (kari, can. black + mínu, can. fish). Tel. from (nalla, tel. black + gandumínu, tel. fish, labeo fimbriatus). Oor. from hindostany. Labeo [rohitam] calbasu, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Specific name from hindostany. Alias Cirrhina micropogon; Cirrhinus affinis, belangeri, calbasu; Cyprinus calbasu; Labeo velatus; Rohita belangeri, calbasu, reynauldi. Rohita from sanscrit. Mouth narrow; snout depressed; lips thick, fringed, more especially the lower one, and each having a distinct inner fold; caudal deeply forked; colors blackish; sometimes, especially in examples from clear streams, many scales have scarlet centre; fins black, occasionally end of upper lobe of the caudal white; in some districts adults have very elongated fins; southern india and malabar, from kistna through orissa; grows to 3 feet in length; were it not for its numerous bones, it would be excellent eating.——*Fringed labeo* (रोहित - róhita, San.; तांब्र - támbra, Mahr.; గండుమీను - gandumínu, Tel.; ବହ୍ରମ - bahrum, Oor.; சாலை - shálai, Tam.).

San. means red. Mahr. means copper colored. Tel. from (gandu, tel. male + mínu, tel. fish). Tam. also (vengendai), meaning white + carp, barbus genus. Labeo [rohitam] fimbriatus, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Alias Cirrhinus fimbriatus, leschenaultii, nancar; Cyprinus fimbriatus, nancar; Labeo leschenaultii; Leuciscus bobree; Rohita fimbriata, leschenaultii; Varicorhinus bobree. Rohita from sanscrit; bobree from mahratta. Colors silvery along back, lighter on sides and beneath; fins, more especially the ventral, anal, and lower caudal lobe, stained with black; sometimes a diffused dark blotch at the base of the caudal, and which is almost invariably present in the young; southern india to orissa, recorded from malabar or canara; attains a foot and a half in length, and is good eating, but bony.——*Red labeo* (ಕೆಮ್ಮೀನು - kemmínu, Can.; கருமணிக்கெண்டை - karumanik-kendai, Tam.). Title from fleshy tinge. Can. from (kempu, can. red + mínu, can. fish). Tam. from (karumai, tam. blackness + mani, tam. apple of the eye + kendai, tam. carp, barbus genus). Tam. also (karumuzhikkendai), meaning blackness + eyeball + carp, barbus genus. Labeo [rohitam] kontius, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Alias Cirrhinus rubropunctatus; Cyprinus kontius. Muzzle blunt, truncated, covered with pores, and having a short fleshy lateral prolongation; colors general reddish or fleshy tinge, darkest along back; rivers along the base of the neilgherries, and cauvery and coleroon in all their branches down to the coast; it grows to two feet in length.——*Scaled labeo* (रोहित - róhita, San.; തൂലി - túli, Mal.). Title from reddish scales. San. from (róhita, san. red). Mal. means scales of fish. Labeo [rohitam] dussumieri, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Alias Cirrhinus dussumieri, rouxii; Labeo rouxii; Rohita dussumieri, rouxii. Grayish, lightest beneath, scales with reddish centre, edged with darker shade; usually a dull diffused dark spot on either side of the tail; fins dusky; rivers of south malabar; attains at least 13 inches in length.

ROHY (रोही - róhí, *San.*). Means red. Fourth lunar mansion [nacshatram, rohiny], personified as the favorite wife of Chundran [q.v.].——*Rohan* (روهن - rohan, Hind.). Same as Soymida.——*Rohicaunta* (రోహికాంతుడు - róhikántudu, Tel.). From (above + kánta, san. lover). Moon. Hindoo 2nd or pers. name [peyar].——*Rohidoss* (ರೋಹಿದಾಸ - róhidása, Can.). From (above + dása, san. slave). Hindoo 2nd or pers. name [peyar].——*Rohiny* (रोहिणी - róhiní, San.; உரோகிணி - urógini, Tam.). Literally red. One of the daughters of Dacshan [q.v.], and the favorite wife of Soman or Chundran [q.v.]. The mother of Balaraman [q.v.]. For the lunar mansion so called see under Nacshatram.——*Rohitacam* (रोहितक - róhitaka, San.). See sep. title.——*Rohitam* (रोहित - róhita, San.). See sep. title.

ROLONG (سوجی - sújí, *Hind.*; இரவை - iravai, *Tam.*). Corruption of portuguese Ralão. The hard central part of wheat grains [geung]. Cf. Soojee.

ROO (رو - rú, *Hind.*). Face.——*Roobcaury* (روبکاری - rúbakárí, Hind.). From (above + ba, pers. to + kár, pers. face). Proceedings on record of a case. Letter from an equal.——*Roobroob* (روبرو - rúbarú, Hind.). From (above + ba, pers. with + rú, pers. face). Face to face [mookhautib].——*Roomaul* (رومال - rúmál, Hind.). From (above + mál, pers. to wipe). A handkerchief. Also a square shawl [q.v.]. A roomaul is used in the place of a turban [puggry] by the poorer natives. Although the end of the saury [q.v.] is made to act as a covering for the head, in many instances roomauls are specially used by women also. In trade it is applied to thin silk piece-goods with handkerchief patterns. The strangling cloth of the Thug [q.v.]. Khauny roomaul are loom-manufactured, and Amlee roomaul are needle embroidered [sheelay] handkerchiefs.——*Roshan* (روشن - roshan, Hind.). From (above + shan, pers. suffix of similarity). Same as Rowshan. Conspicuous.——*Roshanbaugh* (روشن باغ - roshan-bágh, Hind.). From (roshan, hind. bright + bágh, pers. garden). One of the Nawaub's gardens at Sydapett. Now occupied by the Government farms.——*Roshan chowky* (روشن چوکی - roshan-chaukí, Hind.). From (roshan, hind. bright + chaukí, pers. guard). A band of musical instruments playing at the residence of the chief Mahomedan authority.——*Rowshan* (روشن - raushan, Ar.). Bright. Same as Roshan. In composition makes a lacab; as Rowshan banno, enlightened lady [ism].

ROOBAH (روبه - rúbah, *Pers.*). Fox. Plant second term, meaning wild and inferior. Ex., where transl. is of first term:—Citrullus colocynthis (kharbúzahirúbah), melon; Solanum nigrum (angúrrúbáh), grape. See gloss. paragraphs.

ROOCH (रुच् - ruch, *San.*). To shine.——*Ricsham* (ऋक्ष - ricsha, San.). Constellation. See under Ricsham, bear.——*Rokkadauyam* (உரொக்காதாயம் - urokkáthâyam, Tam.). From (rókam, san. cash + ádáya, san. taking). Ready money collections from sources other than land.——*Rokkam* (रोक - róka, San.). From (ruch, san. to shine). Cash [q.v.], in contradistinction to goods. Rokka jaumeen is money security [nagad jaumeen].——*Roocmam* (रुक्म - rukma, San.). Means gold [bangaur, pon, tungam]. Hindoo 2nd or pers. name [peyar].——*Roocminy* (रुक्मिणी - rukminí, San.; உருக்குமணி - urukkumani, Tam.). The wife of Krishnan [q.v.], an incarnation [avatar] of Lutchmy [q.v.].

ROODRAN (रुद्र - rudra, *San.*; உருத்திரன் - uruttiran *Tam.*). From (rud, san. to roar). In the Rig vedam the god of tempests. In the pooraunams [q.v.] a name of Shiva [q.v.] denoting the destroying power of deity. There are eleven forms or manifestations of Roodran according to South indian books; Bhavotbhavan, Bheemadevan, Capauly, Eeshaunan, Haran, Mahadevan, Neela lohitan, Roodran, Shuncaran, Sowmyan, Vijayan. There is some similarity with Apollo. Both gods bear the bow. Roodran knows a thousand medicines [veidyanautan]; so Apollo is called ἀκέσιος, and is father of Asklepios. Roodran goes through storm and clouds, and has his hair therefore made up in a great knot, whence he is called Capardy he who has his hair wound into the form of a shell [chunk]; so Homer Il, 20, 39 calls Apollo ἀκερσεκόμης. Roodran is called vankan, going athwart, as god of the storm; so Apollo is Λοξίας from λοξός, oblique. Roodran had a sister Ambicay [q.v.]; so Apollo had a sister Artemis. The mouse [shoondely] is sacred to Roodran, while Apollo was called Smintheus from σμίνθος a mouse, and was represented by the sculptor Skopas with a mouse at his feet. See vol. I (73) [matam].——*Roodramma deva* (రుద్రమ్మదేవ - rudrammadéva, Tel.). From (above + ammá, tam. mother, title). Queen of Ganapaty deva of Warangal. Assumed government on her husband's death and reigned for 38 years when she abdicated in favor of her grandson Prataupa roodran [charitram]. See vol. I (132), (142); II, 83.——*Roodra's flower* (रुद्रपुष्प - rudrapushpa, San.). Same as China rose bendy.——*Roodra's hair* (రుద్రజడ - rudrajada, Tel.). Same as Fragrant toolsy.——*Roodrauck* (رودراک - rudrák, Hind.). See sep. title.——*Roodraucsham* (रुद्राक्ष - rudráksha, San.). From (above + akshi, san. eye). Roodran's eye and so his tear. When Shiva, once in a war with the Asooran [q.v.], had burned three cities [tripooram], he wept at the loss of lives, and his tears falling to the ground sprung up as shrubs, producing berries. Roodraucsham is the fruit of the Elæocarpus, and resembles as to form, size, and color the nutmeg [jautikye].——*Roodrauny* (रुद्राणी - rudrání, San.). The shacty [q.v.] of Roodran; a name sometimes applied to Parvaty [q v.].

ROODRAUCK (रुद्राक्ष - rudráksha, *San.*; वावलि - vávali, *Conc.*; رودراکش - rudrákash, *Hind.*; رودراک - rudrák, *Dec.*; ಬಿಕ್ಕಿ - bikki, *Can.*; ರಾಹುಬೀಜ - ráhubíja, *Too.*; రుద్రాక్ష - rudráksha, *Tel.*; ആവിൽ - ávil, *Mal.*; වෙරළු - weralu, *Singh.*; உருத்திராட்சம் - uruttirádcham, *Tam.*). San. from (rudra, san. shiva + aksha, san. bead) [roodran, roodraucsham]. Hind. from sanscrit. Dec. from sanscrit. Too. from (ráhu, san. sudden fit of apoplexy or paralysis + bíja, san. seed). Tam. from sanscrit. San. also (aksha), meaning to accumulate, from ball-like seed; (chiribilva), meaning long + bael tree, ægle marmelos, corr. [karanj]. Hind. also (kassau). Can. also (guddanérale), meaning hill + eugenia jambolana, lamk.; (kuntanérale), meaning crippled + eugenia jambolana, lamk.; (kalbikki), meaning stone + the plant; (bigadamara); meaning distention + tree, removes, distention; (guddarenji), meaning hill + the tree, mimusops elengi, linn. Mal. also (perinkára), meaning large + thorny plant, canthium. Title otherwise Bracelet tree, Linden bloom, Perincara, Saw-leaved elæocarpus. Botanically the Elæocarpus genus, tiliaceæ [vricsham, 27]. Trees or large shrubs with simple leaves and racemes of small flowers; natives of india, java and other tropical parts; fruit contains a very hard rough-shelled nut, with edible pulp surrounding the stone used in curries [q.v.] or pickled [chutney]; the hard, dry, deeply-grooved and elegantly-sculptured seeds are frequently worn as beads [munkah] by bramins [q.v.] and fakeers [q.v.], and set in gold are sometimes sold as ornaments. Different species are:—Cuneatus, middling-sized tree, quilon. Ferrugineous, leaves boat-shaped, timber used for building. Ganitrus; flower middle-sized, white; sacred tree; found on the higher ghauts of the western coast; the common roodrauck. Lanceæfolia; flowers small, white; called hill neraly. Munroii; large tree throughout western forests; timber valuable; whitish, with a brown heart; called stone bikky. Oblongus; wood white, strong and tough, and adapted for the lathe; called bikky. Serratus; tree; western coast; numerous small, white flowers; fruit called rahoo seed [q.v.], very hard, oblong-shaped and smooth; dried and used in curries [q.v.] by the natives, and also pickled [chutney]; fleshy exterior of fruit eaten; has a strong wood. Tuberculatus; very fine tree; flowers largish, white; western forests. Distinguish from the next item.——*Roodrauck tree* (بندوقکاجھار - bandúkkájhár, Hind.; ರುದ್ರಾಕ್ಷಿಮರ - rudrákshimara, Can. and Too.; రుద్రాక్షపుచెట్టు - rudrákshapuchettu, Tel.; உருத்திராட்சமரம் - uruttirádchamaram, Tam.). Title from resemblance. Hind. from (bandúk, ar. musket + jhár, hind. tree), from seeds resembling shot. Can. from (rudráksha, san. the berry of the elæocarpus ganitrus, roxb. + mara, can. tree). Tel. from (rudráksha, san. braminy bead, berry of the elæocarpus genus + chettu, tel. tree). Tam. from (rudráksha, san. braminy bead, berry of the elæocarpus genus + maram, tam. tree). Tam. also (téngáy-

maram), meaning honey + fruit + tree; (tubákkimaram), meaning musket + tree; (ténbaççai), meaning honey + greenness; (valamburi), meaning turned to the right [screw-tree]. Title otherwise Bastard cedar [chickrassy, large neem, soymida, wild anaur], Cedar, Honey-fruit tree, Musket tree, West-indian elm. Botanically Guazuma tomentosa, kunth., sterculiaceæ [vricsham, 26]. Alias Boubroma tomentosa; Guazuma ulmifolia. Tree, 40-60 feet, not unlike english elm; leaves alternate, ovate or oblong, unequal at the base, toothed, acuminate at the apex, stellately puberulous on the upper side, tomentose beneath; petals five, yellow, with two purple awns at the apex; capsules five-celled, many-seeded; seeds angular; peduncles axillary and terminal; flowers scented; introduced from w. indies. The bark is very scaly, but the scales are separated easily when dry; the bark underneath the scales is reddish-brown, without any particular taste or smell; the fruit is tubercled, about the size of a cherry [q.v.]. A decoction of inner bark is of medicinal use in elephantiasis [cochin leg]; the older bark is used as a sudorific and is given in diseases of the chest and cutaneous complaints. Decoction; take of the inner bark, cut into small pieces or in coarse powder, four ounces; water, one pint and half; boil till the liquid is reduced to one pint, and strain when cool. Substituted for calumba [q.v.] and gentian [chiretta]. Fruit filled with mucilage, gives good fodder; leaves used as famine food; the bark is very mucilaginous and is used by arrack [q.v.] manufacturers in clarifying their liquors; grows quickly and is suited for avenues [shaulay]; bark yields fibre [naur]; but slightly woody, only fit for rope. Wood, light and loose-grained, light brown, used for furniture, by coach-makers for pannels, and for packing cases, pannelling, &c.——*Roodrauck yam* (రుద్రాక్షపెండలము - rudrákshapendalamu, Tel.). See under Auloo.

ROOH (روح - rúh, *Hind.*). From arabic. Spirit, the Koran [q.v.], Jesus Christ. Forms an alam; as Rooh ool lah, spirit of god, lacab of Jesus. Is now itself an alam [ism].——*Roohauda coodisha* (روح القدس - rúhulkuds, Hind.; റൂഹാദക്കുദിശ - ruhádakudisha, Mal.). The Holy Ghost with the Malabar syrian christians [syrian].——*Rooh i haiwauny* (روح حیوانی - rúhihaiwání, Hind.). Animal spirit, or the life the seat of which is in the heart and moves in the veins with the pulsations of the body.——*Rooh i insauny* (روح انسانی - rúhiinsání, Hind.). Also (aklulawwal), meaning first intelligence. Human spirit. Mind or spiritual faculty of man of the true essence of which nothing is known.——*Rooh i jaury* (روح جاری - rúhijárí, Hind.). Means travelling spirit. That which leaves the body in sleep and gives rise to dreams.——*Rooh i nabauty* (روح نباتی - rúhinabátí, Hind.). Vegetable spirit.——*Rooh i siflee* (روح سفلی - rúhisiflí, Hind.). Means the lower spirit, that which belongs merely to animal life.

ROOKH (رخ - rukh, *Hind.*). Castle in chess [chatrangam, chowsar, shatranj].

ROOKHSAT (رخصت - rukhsat, *Hind.*). From (rakhusa, ar. to relax). Leave, the dismissal of a guest. It is usual here for the host, not at all the visitor, to close an interview. This act may be signalized by the host putting a garland of flowers round the guest's neck, and sometimes also bracelets of flowers on his wrists, and presenting him with bouquets and attar [q.v.] and paunsoopyaury [q.v.], and sprinkling rose water [goolaub, panneer] on his handkerchief [roomaul, shelavoo, tambool].

ROOKIA (رقیہ - rukiyah, *Ar.*). From (rakí, ar. to enchant). Name of the prophet's daughter. Common female alam; as Rookia bee, alam + alaumat [ism].

ROOKN (رکن - rukn, *Ar.*). From (rakana, ar. to rely on). Pillar. Part of lacab; Rookn ood deen, pillar of religion [ism].

ROOM (روم - rúm, *Hind.*). Constantinople.——*Roomy* (رومی - rúmí, Hind.). Turkey.——*Roomy mustukee* (रुमामस्तकी - rumámastakí, Mahr.; مصطکی - mastakí, Ar.; کندر رومی - kundurirúmí, Pers.; مصطکی - mastakí, Hind.; رومی مصطکی - rúmímastakí, Dec.; పిల్లికండ్లగుగ్గిలము - pillikandlaguggilamu, Tel.; பூனைக்கண்குங்கிலியம் - púnaikkangungiliyam, Tam.). Title from deccany. Pers. from (kundur, ar. olibanum + rúm, ar. turkish empire). Hind. from arabic. Dec. from (rúmí, hind. turkish empire + mastakí, ar. mastich), as chewed by the turks to preserve the gums and teeth and to sweeten breath. Tel. from (pilli, tel. cat + kannu, tel. eye + guggilamu, tel. dammer). Tam. from (púnai, tam. cat + kan, tam. eye + kungiliyam, tam. resinous gum); from the yellow white and semi-transparent color. Ar. also (ilakirúmí), meaning turkish gum. Title otherwise Mastich. A resin [gond, raul] from Pistacia lentiscus, linn., anacardiaceæ [vricsham, 45]. An astringent in diarrhœa, and phlegm diseases. Dissolved in turpentine [carpoora teilam], spirits of wine [sharaub] or oil [yennay] makes a pale brilliant varnish [rangh]; transparent, tough and tenacious.

ROOPAM (रूप - rúpa, *San.*). From (rúp, san. to form). Outward appearance; object of vision, as color, &c.; one of the seventeen qualities of the Neiyauyican [nyauyam]. An entire number. Known quantity in algebra [beejaganitam]; the unknown quantity being caulak [q.v.].——*Roopa vilutchanan* (రూపవిలక్షణుడు - rúpavilakshanudu, Tel.). From (above + vilakshana, san. strange). Referring to shiva [q.v.] with his three eyes [viroopauncshan]. Hindoo 2nd or pers. name [peyar].——*Roopyam* (रूप्य - rúpya, San.). Silver [velly], especially a piece of such, bearing a stamp or figure.——*Rupee* (روپیہ - rúpiyah, Hind.; உருப்பாய் - urúppáy, Tam.). From (rúpa, hind. silver). Silver coin, the unit of the standard of value in India since commencement of Mahomedan rule. The Government rupee in make and size resembles the English florin; weighs 180 grains, of which 165 are pure silver [velly]. It used to exchange at the rate of ten to a sovereign, but its exchange value is now greatly reduced. Rupees of many older coinages are still current. The rupee is divided for purposes of account into annas [q.v.] and pies [q.v.], twelve pies making one anna and sixteen annas one rupee. The divisions coined are:—in silver, the half, quarter, eighth; in copper, the thirty-second, sixty-fourth, one hundred and ninety-second part or pie [q.v.]. The following are different kinds of old rupee:—Adony; from place so called; 376 and 5 fanams 50 cash to 100 star pagodas. Arcot; the rupee at madras was originally that of the nawaub [q.v.] of the carnatic [q.v.] otherwise called the nawaub of arcot from his residence and was known usually as the arcot rupee; its issues varied from 171 to 177 grains in weight, and from 160 to 170 of pure silver. Chalawany; the current rupee of account, in which the company's accounts were kept, of which 116 were with them equal to 100 sicca rupees; the following have been varieties; bellary old, 426 and 7 fanams and 2 cash to 100 star pagodas; bellary new, 492 and 2 fanams and 65 cash to 100 star pagodas; old salauk, 436 and 3 fanams and 60 cash to 100 star pagodas; new salauk, 518 and 7 fanams and 78 cash to 100 star pagodas. Char goshah; means four-cornered; rupee of acbar; value about 40 daums. Char yauree, from (chár, hind. four + yár, hind. friend); rupee having the names of the first four caliphs on the margin. Chinnamaila, from (mélam, tam. a drum); tinnevelly coin, equal to 11 fanams 60 $\frac{32}{33}$ cash. Furruckabad rupee; weighed 180 grains, containing 165·215 of pure silver. Goa; canara coin, 437½ to 100 star pagodas. Gold; madras coin, of 15 silver rupees, weighing 180 grains troy. Goozerat; coined at ahmedabad. Haley vijianugger; rajaram's stamp in nagry. Isfahaun; persian rupee coined at isfahaun. Lucknow; also called furruckabad rupee; struck at fategarh. Mahratta; issued from mints of mahratta states on disruption of moghul empire; emperor's name was however retained. Mekhy, from (mekhí, hind. nailed); a rupee that is plugged, hollowed and filled with lead. Mooba urak shahy; coin of moobaurak shah of the syed dynasty. Mullars, from (mallarasu, can. king so called); canara coin 388 ¾ to 100 star pagodas. Poonhacutt; poona band rupee; ganjam coin, 350 to 100 star pagodas. Rajah; seringapatam coin, 343 and 11 fanams and 76¼ cash to 100 star pagodas. Sicca; weighed 192 grains, and contained 176 grains of pure silver; the exceptional sicca was abolished as a coin in 1836; and the universal rupee of british territory has since been the company's rupee, as it was long called, of 180 grains weight and 165 pure silver, representing therefore in fact the furruckabad rupee; see sep. title. Sultauny; coin of tippoo sultan; bore hindostany letter "h." for hyder. Zodiacal; pieces of twelve different impressions, representing the twelve signs of the zodiac [raushy]; they were coined between the years 1616 and 1624 of the christian era by jehaungeer; these rupees are exceptions to the mahomedan law which forbids the representations or embossment of figures.

ROOSTAM (رستم - rustam, *Hind.*). The Hercules of Persia. One of the twelve champions. Hero in general. Heroic alam; as Roostam beg, alam + alaumat. Also part of lacab; as Roostam jung, hero of war [ism].

ROOWA (రువ్వ - ruvva, *Tel.*). A pie. 2 roowas=1 doogauny [naunyam, 2b]. Same as Hind. pie, damree, Tam cash.

ROSE (گلاب - guláb, *Hind.*). Prefix [goolaub].——*Rose apple* (जम्बुराज - jamburája, San.; जांब - jámba, Conc.; گلابی جامن - gulábíjáman, Hind.; گلابی جام - gulábíjám, Dec.; ಜಂಬುನೇರಳು - jambunéralu, Can.; ಪನ್ನೇರಳೆ - pennérale, Coorg; జంబునేరేడు - jambunérédu, Tel.; ಜಂಬುನೇರೊಳು - jambunérolu, Too.; ଗୋଲାପଜାମ - golápjám, Oor.; ജംബു - jambu, Mal. and Singh.; சம்புநாவல் - shambunával, Tam.). Title from appearance and perfume of fruit. San. from (jambu, san. jaumoon tree, eugenia jambolana, lamk. + rájá, san. king); the large jaumoon fruit. Conc. from sanscrit [common jaumoon, dark vail, malacca jaumoon]. Hind. from (gulábí, hind. rose-colored + jám, hind. eugenia jambolana, lamk.). Dec. from hindostany. Coorg from canarese. Tel. from (jambu, san. the tree + nérédu, tel. eugenia jambolana, lamk.). San. also (jambu), meaning edible; (rájajambú), meaning king + jaumoon tree. Hind. also (jamrúl), meaning eugenia malaccensis, linn. Can. also (pannéralemara), meaning rose water + jaumoon tree; from delicate rose water perfume. Tel. Coorg also (mallenérale), meaning hill + jaumoon tree. Tel. also (allanérédu), meaning famous + eugenia jambolana, lamk. Tam. also (perunával), meaning large + the jaumoon tree. Title otherwise Large-fruited jaumoon, Malabar plum, Smaller jaumoon. Botanically Eugenia [jamboo] jambos, linn., myrtaceæ [vricsham, 56]. Specific name from sanscrit. Alias Eugenia vulgaris; Jambosa vulgaris; Myrtus jambos. Moderate-sized tree; branchlets compressed or sub-tetragonous; leaves variable in length, 1½-2 inches broad; nerves reticulate beneath; midrib stout; petiole short and stout, ¼ inch or less; calyx-tube

produced above the ovary; lobes round; berries 1-2 inches diameter. Has opposite, lanceolate, oleander-formed [gannair] short-stalked leaves and large flowers, greenish white followed by a sub-globular berry of rich pink and white colors, but of an indifferent flavor; flowers in february and bears fruit during cold season. Fruit is of the size and somewhat of the form of a small apple [seb], of a fine opaque apricot color with a blush of red upon it, and with a fine delicate rose water [goolaub] perfume; hardly eatable, being of a poor flavor and of a dry, pithy consistency; sometimes made into preserve [chutney]; differs from the smaller jaumoon [q.v.] fruit. Rose water can be distilled from the fruit, taking the seed out first. The tree grows rapidly, yielding much firewood.——*Roselle* (لال انبارا - lálambárá, Hind.). From (lál, hind. red + ambárá, hind. hemp plant). Same as Red hemp bendy.

ROSE MALLOES (دخان الذرّ - dukhánuddarrú, *Ar.*; استلبان - astlubán, *Hind.*; رسمل - rasamala, *Malay*). Title from malay. Ar. from (dukhán, ar. smoke + darrú, ar. liquidamber orientale, miller). Latin Rasimilius. Same as Java storax.

ROTEE (روٹی - rotí, *Hind.*). Bread. For coarse wheaten bread see Choopatty. For cakes of rice see Hopper.

ROUSSA (भूस्तृण - bhústrina, *San.*; रोशें - róshém, *Mahr.*; اذخر هندی - izkhirihindí, *Ar.*; کاه مکه - káhimakkah, *Pers.*; روسا - rúsá, *Hind.*; گنجنی کا گھاس - ganjníkághás, *Dec.*; ಬೋದೆಹುಲ್ಲು - bódehullu, *Can.*; కామంచిగడ్డి - kámanchigaddi, *Tel.*; ചോരപ്പുല്ല - chórappullu, *Mal.*; சுன்னாரிப்புல் - shunnárippul, *Tam.*). Title from hindostany. San. from (bhú, san. earth + trina, san. grass). Mahr. from (rúksha, san. rough). Ar. from (izkhir, ar. andropogon iwarancusa, roxb. + hindí, ar. indian). Pers. from (káh, pers. hay + makkah, ar. mecca). Hind. like mahratta [ibharancoosha, stunted jack]. Dec. from (gandha, san. aromatic + ghás, hind. grass). Tel. from (káru, tel. forest + manchi, tel. good + gaddi, tel. grass). Mal. from (chóra, san. perfume + pullu, mal. grass). Tam. from (shukku, tam. dried ginger + náru, tam. to smell + pul, tam. grass). Pers. also (gaznahidashtí), meaning desert nettle. Hind. also (gandbel), meaning fragrant grass; (akhiyághás), meaning bird, alauda aggia + grass. Can. also (sambárahullu); (cháhullu), meaning tea + grass; (shunt'hihullu), meaning ginger, zingiber officinale, roscoe + grass; (doddabilikáchihullu), meaning large + white + andropogon schœnanthus, roxb. Tel. also (kámákshigaddi), by corruption; (allapugaddi), meaning ginger, zingiber officinale, roscoe + grass. Mal. also (kámákshippullu), meaning beautiful grass, corruption from teloogoo. Tam. also (shukkunárippul), meaning dried ginger + to smell + grass [ginger grass, indian grass]; (kagattambul), meaning bitter + grass; (kámátchippul), by corruption from teloogoo; (mándappul), meaning indigestion + grass. Sometimes confounded with Cuscus [q.v.] grass or Andropogon muricatus, retz. Title otherwise Bitter grass, False spikenard, Geranium grass, Ginger grass, Indigestion grass, Juncus odoratus, Mecca hay, Nemaur oil plant, Palmarosa oil plant, Roussa oil grass, Roussa paper grass, Tea grass. Botanically Andropogon [beard grass] martini, roxb., graminaceæ [vricsham, 156]. Alias Andropogon calamus, aromaticus, nardoides; Cymbopogon martinianus, pachnodes. Root long, fibrous; culm erect, branched, 5-6 feet, glabrous; leaves elongated, very delicate, soft, glabrous, acuminate; ligula membranaceous; panicles linear, sub-secund; spikelets twin; rachis jointed, woolly; corolla of the hermaphrodite floret one-valved, awned, male muticous. A coarse-looking grass; grows wild; the roots, &c., have a peculiar smell, between lemon [q.v.] and turpentine [gauda firoza]. Oil [yennay] by distillation from fresh plant assimilates in characters, properties, and uses with that of andropogon schœnanthus, roxb. [lemon grass]; the color varies from pale greenish-yellow to yellowish brown. Oil is valuable as a rubefacient, substitute for cajeput [q.v.] oil, externally in rheumatism, also stimulant and diaphoretic; prevents the hair of the head from falling off after acute diseases. Fresh leaves used as substitute for tea [q.v.]; white succulent centre of the leaf-bearing culms put into curries [q.v.] to give them flavor; cattle are fond of it, notwithstanding its strong aromatic and pungent taste, but not only the flesh of the animals, but also the milk and butter, get a strong scent of it. Oil much used in perfumery; after oil [yennay] extracted fibres [naur] used for paper [caugaz].

ROWGHAN (روغن - raughan, *Hind.*). Oil [tel, yennay].——*Rowghany cupdah* (روغنی کپڑا - raughaníkaprá, Hind.). Oil cloth; used for packages in monsoon [q.v.].

ROYACHOTY (రాయచోటి - ráyatsóti, *Tel.* ráyachóti *). From (rádzu, tel. king + tsótu, tel. place) [raj].——**(1)** Talook, Cuddapah district. Tahsildar's pay Rs. 175. Area 997 square miles; lat. 13° 50′ to 14° 20′ N.; long. 78° 27′ to 79° 13′ E. Population 113,236. Language Teloogoo. S. centre of district. Bounded north by Cuddapah talook from which it is separated by the Sheshachellam hills and Poolivendla talook; south by Voilpaud talook; west by Cadiry and Madanapully talooks; and east by Poollampett talook, from which it is divided by the Sheshachellam hills running north-west to south-east. The general appearance is level, with here and there scattered granite [caroom cull] rocks, and with a horizontal line of unbroken hills to the north and east. The talook is well provided with roads. There are good pasture lands, and there is generally no lack of grazing ground [shekadah]. A very large portion lies waste. Some of this land is saline [oovar] and unproductive, but a great deal is of the same quality as that cultivated. Soils are of different kinds, red soil [sevval munn] being predominant. There is no black-cotton soil [regar], and none of the rich loam [pasalay munn] found in the main division. Timber generally is scarce, with the exception of tamarind [q.v.] trees, of which there are a large number of thick topes [q.v.], teak [q.v.], sandal-wood [sandal], rose and black-wood [q.v.] are found in the hill jungles. Principal products paddy [q.v.] and sadza [bajrah]. Manufactures are confined to indigo [q.v.], common cloths, coarse cumblies [q.v.], and gunny [q.v.] bags. There is some trade in skins [chamrah], which are exported, and also in tamarind fruits. Travelling merchants bring round pearls [moty] and corals [moongah] for sale. The horned cattle [maud] are small, but hardy. The Paupughny flows into Poolivendla and Cuddapah talooks and joins Pennair at Camalaupooram. Bauhooodah and Pinchah nuddy join at Royavaram in this talook thence run into Poollampett talook; after running through Palcondah hills they join Maundavair in Poollampett talook and there they are known by name Cheyair. Places of archæological interest:—Gadicote, Hasanpore, Royachoty, Vangimulla. Principal trig. stations:—Booditaid, Nelacoorty, Rajanmala, Saunipoya. The leading places, &c., in the talook are the following.——*Anantapooram* (అనంతపురము - anantapuramu, Tel.). From (ananta, san. vishnu; the eternal + pura, san. town). Village, Place of pilgrimage; pop. 572; acres 2,536; lat. 14° 11′; long. 78° 47′; from Cuddapah S. 22 miles; from Royachoty N. 9 miles. At Gunga jautra festival [pundigay, 6d] held here, the Shoodra community of surrounding talooks assemble and buffaloes [khoolgah] and goats [velland] are sacrificed.——*Arvaid* (అరవేడు - aravédu, Tel.). From (arava, tel. tamul + vídu, tel. town). Village; pop. 2,412; acres 6,906; lat. 14° 00′; long. 78° 34′; from Cuddapah S.W. 39 miles; from Royachoty W.S.W. 16 miles. Former residence of a poligar [q.v.].——*Bauhoodah nuddy* (బాహుదనది - báhudanadi, Tel.). See sep. title.——*Bonamulla* (బోనమల - bónamala, Tel.). From (bónamu, tel. sacrificial meal + mala, tel. hill). Village; acres 2,988; lat. 13° 54′; long. 78° 44′; from Cuddapah S.S.W. 40 miles; from Royachoty S.S.W. 12 miles. Once the seat of a poligar.——*Booditaid* (బుదితేడు - buditédu, Tel.). From (búdide, tel. ashes + vídu, tel. town). Trig. station; lat. 13° 55′ 05·05″; long. 79° 09′ 00·44″; height 3,063 feet; from Moodoompaud E. 7 miles; from Royachoty E.S.E. 26 miles.——*Calibunda* (కలిబండ - kalibanda, Tel.). From (kali, san. battle + banda, tel. rock). Village; pop. 350; acres 4,434; lat. 13° 57′; long. 78° 38′; from Cuddapah S.S.W. 40 miles; from Royachoty S.W. 12 miles. Once the seat of a poligar.——*Cheyair* (చెయ్యేరు - cheyyéru, Tel.). See sep. title.——*Chinnamundem* (చిన్నమండెము - chinnamandemu, Tel.). From (chinna, tel. small + mandemu, tel. factory). Town; pop. 2,795; acres 9,167; lat. 13° 57′; long. 78° 43′; from Cuddapah S.W. 39 miles; from Royachoty S.S.W. 10 miles.——*Gopagoodipully* (గోపగుడిపల్లి - gópagudipalli, Tel.). From (gópa, san. vishnu, the cowherd + gudi, tel. temple + palli, tel. village). Village; pop. 2,169; acres 13,534; lat. 14° 17′; long. 78° 46′; from Cuddapah S.W. 16 miles; from Royachoty N. 16 miles. Once residence of a poligar.——*Hasanpore* (హసనాపురము - hasanápuramu, Tel.). From (hasan, hind. proper name + pura, san. town). Sanscrit name (ayódhyápura), meaning ayodhyay, the city + town. Village; pop. 3,400; acres 29,102; lat. 14° 10′; long. 78° 50′; from Cuddapah S. 22 miles; from Royachoty N.N.E. 8 miles.——*Lakkireddipully* (లక్కిరెడ్డిపల్లి - lakkireddipalli, Tel.). From (lakkireddi, tel. proper name + palli, tel. village). Village; pop. 1,210; acres 5,954; lat. 14° 11′; long. 78° 45′; from Cuddapah S.W. 22 miles; from Royachoty N.N.W. 10 miles. Battle fought in vicinity in 1751 between Cuddapah nawaub and Moozuffer jung, in which latter was killed.——*Matly* (మట్లి - matli, Tel.). From (mattu, tel. limit). Village; pop. 2,311; acres 10,144; lat. 14° 06′; long. 78° 52′; from Cuddapah S.E. 27 miles; from Royachoty E.N.E. 5 miles. The source of the family of the Chitwail rajahs, who ruled over Chitwail, Sidhout, and Budwail.——*Maundavair* (మాండవేరు - mándavéru, Tel.). See sep. title.——*Moodoompaud* (ముదుంపాడు - mudumpádu, Tel.). From (mudi, tel. cluster + pádu, tel. village). Village; pop. 1,031; acres 34,266; lat. 13° 56′; long. 79° 03′; from Cuddapah S.E. 40 miles; from Royachoty E.S.E. 19 miles. Seat of the old poligar family of Boodavauda.——*Motacutla* (మోటకట్ల - mótakatla, Tel.). From (móta, tel. load + katla, tel. place). Village; pop. 1,000; acres 6,803; lat. 14° 00′; long. 78° 49′; from Cuddapah S.E. 34 miles; from Royachoty S.E. 5 miles. Once residence of a poligar family, being a branch of the Saunipoya.——*Nelacoorty* (నెలకుర్తి - nelakurti, Tel.). From (nela, tel. moon + gurtu, tel. mark). Trig. station; lat. 14° 17′ 48·40″; long. 78° 40′ 23·40″; height 2,966 feet; from Bramhana yerragoody N. 5 miles; from Royachoty N.N.W. 18 miles.——*Palcondah* (పాలకొండ - pálakonda, Tel.). See sep. title.——*Paupughny* (పాపఘ్ని - pápaghni,

Tel.). See sep. title.——*Rajanmala* (రాజనమల - rájanamala, Tel.). From (rájanna, tel. proper name + mala, tel. hill). Trig. station; lat. 13° 58′ 01·05″; long. 78° 39′ 46·44″; height 3,580 feet; from Royachoty S.W. 11 miles; from Saukibunda S.W. 3 miles.——*Raullamadoogoo canama* (రాళ్లమడుగుకనమ - rállamadugukanama, Tel.). See sep. title.——*Royachoty* (రాయచోటి - ráyatsóti, Tel.). See below.——*Saunipoya* (సానిపాయ - sánipáya, Tel.). From (sáni, tel. dancing girl + páya, tel. portion). Village; pop. 1,883; acres 9,571; lat. 14° 07′; long. 79° 00′; from Cuddapah S.E. 26 miles; from Royachoty E.N.E. 14 miles. A fine ghaut [q.v.] road forms a feeder to the railway. Trig. station in lat. 14° 08′ 09·05″; long. 78° 59′ 53·44″; height 2,392 feet; from Saunipoya N.E. 1 mile.——*Sheshachellam* (శేషాచలము - shéshàchalamu, Tel.). See sep. title.——*Soondoopully* (సుండుపల్లె - tsundupalle, Tel.). From (tsundu, tel. to dry up + palle, tel. village). Village; pop. 3,580; acres 17,861; lat. 13° 59′; long. 78° 58′; from Cuddapah S. 35 miles; from Royachoty E.S.E. 12 miles. On the Bauhoodah. Weekly market.——*Timma samoodram* (తిమ్మసముద్రము - timmasamudramu, Tel.). From (timma, tel. monkey + samudra, san. ocean). Village; pop. 1,734; acres 5,921; lat. 13° 58′; long. 78° 58′; from Cuddapah S. 36 miles; from Royachoty E.S.E. 13 miles.——*Toommalgoondy* (తుమ్మలగుండి - tummalagundi, Tel.). From (tumma, tel. babul tree, acacia arabica, willd. + gandi, tel. gorge). Village; pop. 1,458. On E. bank of Bauhoodah. Once residence of a poligar.——*Yegoova goottivaid* (ఎగువగొట్టివేడు - eguvagottivédu, Tel.). From (eguva, tel. up + gotti, tel. a thorny tree, zizyphus xylopyrus, willd. + vídu, tel. town). Village; pop. 890; acres 4,758; lat. 14° 01′; long. 78° 38′; from Cuddapah S.S.W. 36 miles; from Royachoty W.S.W. 12 miles. Very wealthy merchants.——*Yerramnainipollem* (ఎర్రంనేనిపాలెం - erramnénipálem, Tel.). From (erramanáyadu, tel. proper name + pálemu, tel. fortified village). Village; pop. 607; acres 6,795; lat. 13° 56′; long. 78° 56′; from Cuddapah S. 38 miles; from Royachoty S.E. 13 miles. Once seat of a poligar, a branch of the Saunipoya family.——**(2)** Town, Talook head-quarters; Cuddapah dist., Royachoty tal.; pop. 4,383; acres 4,514; lat. 14° 04′; long. 78° 48′; height 1,600 feet; from Cuddapah S. 30 miles; from Madanapully N.N.E. 39 miles; from Madras W.N.W. 124 miles; from Sidhout S.S.W. 32 miles. On the Maundavair, with seven roads converging on it. Old pagoda [q.v.] to Veerabhadra sawmy. Car festival [ratotsavam] in middle of February for seven days. Weekly market.

ROYADROOG (ರಾಯದುರ್ಗ - ráyadurga, *Can.* ráyadrug *). From (ráya, can. king + durga, san. fort) [raj].——**(1)** Talook, Bellary district. Tahsildar's pay Rs. 175. Area 815 square miles. Population 97,801. Language Teloogoo and Canarese. S.E. of district. Bounded N. by Bellary talook, E. by Gooty and Anantapore talooks, S. by Dharmavaram and W. by Mysore territory. There are a few hills in the extreme west, the highest point being the droog [q.v.], at the foot of which Royadroog is built. The soil in the north and west round Honnore and Bellagooppa is regar [q.v.]; in the rest a poor kind of red stony soil. The chief crops are paddy [q.v.], cholum [q.v.], raggy [q.v.], gram [q.v.], cotton [q.v.], and corra [tinay]. Coarse country cloths are woven at Royadroog. Rice [q.v.] from Canacull and fried rice from Royadroog are largely exported in to Bellary. The Pennair and Hagary flow through the talook, but, with the exception of a few, small channels which are made afresh every year through the sand [manal], are not utilized for irrigational purposes. The most important tanks [q.v.] are Canacull, Codihully, Talikerey and Yerradikerey. Places of archæological interest:—Ancampulley, Audagooppa, Auvooladotla, Bandore, Bauginaickenhully, Belagooppa, Bheirasamoodram, Bheirownitippa, Bhoopasamoodram, Bidaracoonta, Boodigoomma, Bramhasamoodram, Caloogode, Canacull, Caudoolore, Codihully, Coodlore, Coontanahully, Coorlagoonda, Cowcoontla, Dharmapoory, Doodagootta, Doorgacondaupooram, Eigarhully, Eitanahully, Ganigera, Garoodacheroo, Garoodaudry vencatanahully, Gollapully, Goommagutty, Govindavauda, Hadgully, Hanacanhully, Hanoomaupooram, Harisamoodram, Hoolikerey, Keidevanhully, Keriyauganahully, Maulyam, Metchaury, Mooradv, Mullakaity, Mullapooram, Naugalaupooram, Naugenhully, Naugireddipulley, Nemacull, Oopparhully, Pedda cowcoontla, Pillahully, Poolacoonta, Poolacoorty, Rampooram, Raucutla, Rautsamurry, Royadroog, Rungasamoodram, Shaittore, Shreedharaghatt, Shreerungapooram, Singanahully, Sirpy, Taggoopurty, Taullakera, Teetecull, Toombiganore, Vaiparaulla, Vaiplapurty, Veerapore Vyausapooram, Woodegolam, Yailanjy, Yautacull, Yerradikerey, Yerragoody, Yerragoonta. Principal trig. stations:—Bandore, Honnore, Royadroog, Yerragoonta. The leading places, &c., in the talook are the following.——*Bandore* (బందూరు - bandúru, Tel.). From (bandu, tel. vulture + úru, tel. village). Trig. station; lat. 14° 57′ 43·11″; long. 77° 02′ 33·91″; height 1,659 feet; from Bandore village N. 2 miles; from Bellary S.S.E. 14 miles; from Royadroog N.N.E. 21 miles.——*Bidaracoonta* (బిదరకుంట - bidarakunta, Tel.). From (biduru, can. bamboo, bambusa arundinacea, willd. + kunta, tel. pond). Village; pop. 417; acres 2,930; lat. 14° 53′; long. 77° 08′; from Bellary S.S.E. 21 miles; from Royadroog N.E. 20 miles. On bank of Hagary.——*Canacull* (ಕಣಕಲ್ಲು - kanakallu, Can.). From (kana, can. threshing floor + kallu, can. stone). Village; pop. 5,602; acres 15,703; lat. 14° 48′; long. 77° 07′; from Bellary S. 25 miles; from Royadroog N.E. 17 miles. Tank. Market Friday.——*Codihully* (ಕೋಡಿಹಳ್ಳಿ - kódihalli, Can.). From (kódi, can. a weir + halli, can. village). Village; pop. 928; acres 6,727; lat. 14° 31′; long. 76° 57′; from Bellary S. 42 miles; from Royadroog S. 14 miles. Tank.——*Hagary* (ಹಗರಿ - hagari, Can.). See sep. title.——*Honnore* (ಹೊನ್ನೂರು - honnúru, Can.). From (honnu, can. gold + úru, can. village). Village; pop. 1,782; acres 6,771; lat. 14° 55; long. 77° 08′; from Bellary S.S.E. 18 miles; from Royadroog N.E. 20 miles. On the military road from Bellary to Bangalore on the right bank of the Hagary. Near this place are some singular dunes, formed by the sand [manal] raised from the wide bed of the Hagary by the strong westerly winds. Their progress like that of similar drifting sands on the southern coast of France renders barren the country immediately to the leeward of them. Boodoorty, a village about 3 coss [q.v.] hence, was totally overwhelmed some years ago by one of these moving hills. Trig. station in lat. 14° 55′ 21·61″; long. 77° 08′ 30·29″; height 1,583 feet; from Bellary S.E. 20 miles; from Honnore village N.E. 1½ miles; from Royadroog N.E. 22 miles.——*Royadroog* (ರಾಯದುರ್ಗ - ráyadurga, Can.). See below.——*Talikerey* (ತಲೆಕೆರೆ - talekere, Can.). From (tale, san. head + kere, can. tank). Village; pop. 1,515; acres 10,733; lat. 14° 35′; long. 76° 52′; from Bellary S. 39 miles; from Royadroog S. 9 miles. Contains a tank. There are eight inscriptions on stone in this village, two being dated A.D. 1329 and 1727.——*Yerradikerey* (ಯೆರ್ರಡಿಕೆರೆ - yerradikere, Can.). From (eradu, can. two + kere, can. tank). Village, Hill; pop. 920; acres 5,021; lat. 14° 31′; long. 76° 58′; from Bellary S. 43 miles; from Royadroog S. 15 miles. Contains two tanks.——*Yerragoonta* (ఎర్రగుంట - erragunta, Tel.). From (erra, tel. red + gunta, tel. pond). Trig. station; lat. 14° 48′ 25·89″; long. 77° 00′ 45·26″; height 1,703 feet; from Bellary S.S.E. 22 miles; from Royadroog N.E. 15 miles.——**(2)** Town, Talook head-quarters; Bellary dist., Royadroog tal.; pop. 10,382; acres 12,290; lat. 14° 42′; long. 76° 54′; from Adony S.S.W. 71 miles; from Bellary S. 30 miles; from Hospett S.E. 48 miles; from Hurpanhully E. 57 miles; from Madras W.N.W. 258 miles; from Tadpatry W. 76 miles. Consists of a citadel and lower fort, the latter containing the town, which is regularly laid out. The citadel occupies the summit of a mass of granite [caroom cull] rocks, rising to the height of 1,200 feet, and connected by a lower ridge with a group of hills which from the north-eastern boundary of the plain of Chitaldroog. The south face of the rock is abrupt and inaccessible. The lower fort is guarded by a triple line of works, and a narrow path-way hewn in the rock leads from it to the citadel. At intervals along this path are gateways of solid masonry and fresh lines of fortification. About half-way up the hill is the old palace of the poligar [q.v.], said to have been built about the beginning of the sixteenth century, and close by are two handsome temples [coil, pagoda] dedicated to Rama [q.v.] and Krishnan [q.v.]. There are also the ruins of houses and gardens on the rock. This fortress was founded about A.D. 1371 by Bhoopaty row, who was entrusted with the management of this part of the country by Harichendra row of Vijianugger. It was originally of mud. About A.D. 1517 it was given to the Beydar [boya] chief Junga naick, who built the present fort and palace on the top of the hills. It remained under the Beydar poligars, tributary to Vijianugger, till the fall of the latter place in 1564, when it became tributary to the Mahomedan sovereigns of Beejapore, paying at first an annual peshcush [q.v.] of 12,000 rupees to the Beejapore leader Dowlat khan ameer-ool-oomrah. It subsequently was governed by a Telinga rajah of the Balije [q.v.] caste. The town below the hill was founded by Timmappa naidoo. The Diwaun vencatapaty succeeded Timmappa. He died leaving three sons, Cably naidoo, Gopaul rajah, and Timmappa naidoo, and two daughters, Nicajamma and Roodramma. Cably succeeded, but was assassinated by his brother Gopaul, who died through remorse and was shortly afterwards succeeded by the youngest brother Timmappa naidoo. This chief having convicted his Paurpatyagar [q.v.] or secretary of embezzlement, threw him into prison. On this the Paurpatyagar wrote secretly to Hyder ally, inviting him to come and take the place. Hyder accordingly sent a large army for this purpose under Jehaun khan and Makhdoom sahib, who took the chief and his family prisoners to Seringapatam, but afterwards reinstated him. About the end of the sixteenth century the family of the poligars of Royadroog were deposed, and one of the descendants of the ex-commander-in-chief of Vijianugger made himself master of Royadroog and the adjacent fort of Coondarpy droog. In 1766 the poligar assisted Hyder ally in the reduction of Sheerah, as a reward for which his tribute was reduced as soon as Hyder became master of the country. Subsequently the poligar Vencatapaty naidoo gave offence to Tippoo by refusing to join him when about to attack Adony. Tippoo captured Royadroog and sent the poligar to Seringapatam, where he was assassinated in 1791, just before Royadroog was stormed by Lord Cornwallis. In 1799, his sister's son, Gopaul naidoo, was released from Seringapatam and made his way to Royadroog, where he attempted to collect a following. He was taken prisoner by Mahomed ameen khan, who had been sent by the Nizam [q.v.] to settle the district, and removed to Hyderabad. After the cession to the British, he was sent to Gooty where he resided as a quasi-State prisoner till his death. Pensions were granted to his

family, which are now extinct. Trig. station; lat. 14° 42′ 19·30″; long. 76° 53′ 09·10″; height 2,727 feet; from Bellary S. 31 miles; from Royadroog village N.W. ½ mile.

ROYAGADA (رایگڑھ - ráigarh, *Hind.*; రాయఘడ - ráyaghada, *Tel.*). From (ráyadu, tel. king + ghada, cor. fort) [raj].—**(1)** Division; Vizagapatam district; population 91,228; language Ooriya, Teloogoo and Khond in some parts. Boundaries:—North, Central provinces and Bissemcuttack division; south, Parvatipore division; east, Goonapore division; west, Coraputt division and Calahundy. A large dry plain surrounded with hills covered with jungle. Soil black and red. South of the division unfertile. In Calyauna singapooram very fertile. Brinjarry trade from Central provinces. Grain [dhaunyam], &c., imported and salt [ooppoo] from the Parvatipore market exported. The leading places, &c., in the division are the following.—*Bijauya* (బిజయ - bijáya, Tel.). See sep. title.—*Calyauna singapooram* (కళ్యాణసింగుపురము - kalyánasingupuramu, Tel.). From (kalyánasingu, tel. proper name + pura, san. town). Distinguish from Bheirava singapooram in Jeypore. Village, Head-quarters of Mokhausa zemindarry; pop. 2,768; lat. 19° 30′; long. 83° 21′; from Jeypore N.E. 65 miles; from Royagada N. 24 miles; from Vizagapatam N. 122 miles. On route to Calahundy. Shiva temple on top of high mountain. Near it are caves and wells, also an inscription. The estate is a feudatory under Jeypore.—*Devagherry* (దేవగిరి - dévagiri, Tel.). See sep. title.—*Keilausacote* (కైలాసకోట - kailásakóta, Tel.). From (kailása, san. the sacred mountain in the himalayas + kóta, san. fort). Town; lat. 19° 14′; long. 83° 35′; from Jeypore E. 68 miles; from Royagada N.E. 10 miles; from Vizagapatam N. 104 miles.—*Langoolga* (లాంగూలియా - lángúliyá, Tel.). See sep. title.—*Poycapaud* (పాయకపాడు - páyakapádu, Tel.). From (páik, hind. village watchman + pádu, tel. village). Village; pop. 544; lat. 19° 09′; long. 83° 34′; from Jeypore E.N.E. 64 miles; from Royagada E. 7 miles; from Vizagapatam N. 99 miles. Mokhausa [q.v.] given to a Bramin [q.v.] family by the Maharajah of Jeypore. Old temple with inscription, much resorted to at Shivarautry [pundigay, 6a]. At the foot of hill near is a temple of Pautaleshwaran, built by Balaraman [q.v.], elder brother of Krishnan [q.v.].—*Royagada* (రాయఘడ - ráyaghada, Tel.). See below.—**(2)** Deputy tahsildarry; Vizagapatam district. Pay Rs. 150.—**(3)** Village, Head-quarters of Deputy tahsildar, Ameen of Maharajah of Jeypore, Government hospital; Vizagapatam dist., Jeypore zemindarry, Royagada magisterial division; pop. 2,286; lat. 19° 09′; long. 83° 27′; from Coraputt N.E. 50 miles; from Jeypore N.E. 56 miles; from Madras N.E. 460 miles; from Narsapatam N.N.E. 112 miles; from Parvatipore N. 26 miles; from Vizagapatam N. 98 miles; from Vizianagram N. 70 miles. Population almost entirely Khonds and Ooriya bramins. Former capital of the Jeypore rajah, Vishwanauta deo, who built a large mud fort the ruins of which are still visible. The site of the self-immolation of his 116 wives who ascended the funeral pyre in a body on the occurrence of his death, is still pointed out [suttee]. Emporium of trade between Central provinces and coast.

ROYASAM (రాయసము - ráyasamu, *Tel.*). Tel. from (ráyu, tel. colloquial form of vráyu, meaning to write). The business of a clerk. So a clerk [goomastah].

ROZ (روز - roz, *Hind.*). From persian. A day [dinam, naul]. The Mahomedans attach some importance to their luckiness or the reverse [rijaul ool gheib], but not so much as the Hindoos do. Daily wages. For Nowroz or new year's day see that heading.—*Roza* (روزہ - rozah, Hind.). From the persian. A daily fast, especially during Ramzaun [q.v.].—*Rozeenah* (روزینہ - rozínah, Hind.). From (above + distributive suffix). A daily allowance granted to Bramins [q.v.], fakeers [q.v.], poor persons, &c., to be enjoyed during their lifetime [yeomiah].—*Rozmurrah* (روزمرہ - rozmarrah, Hind.). From (above + marrah, ar. once). Same as Rozeenah.—*Roz nauma* (روزنامہ - roznámah, Hind.). From (above + námah, pers. writing). A journal.—*Rozwar* (روزوار - rozwár, Hind.). Daily.

RUBY WOOD (لال چندن - lálchandan, *Hind.*). Red sanders.

RUDD (رد - radd, *Hind.*). From (radda, ar. to send back). Rejection, repeal. In Mahomedan law applies especially to the return or surplus of an inheritance which remains after legal portions have been distributed among sharers, and which in default of a residuary heir returns or is to be divided amongst the original sharers [vaurs]. Rudd nauma is a deed abrogating a former one.

RUNJA (రంజ - ranja, *Tel.*). A brazen drum [paray].

RUSSELLCONDAH (రసూలుకొండ - rasúlukonda, *Tel.* russellkonda). Town, Head-quarters of General deputy collector and talook, Telegraph office, Registrar's station; Ganjam dist., Goomsoor tal.; pop. 3,412; lat. 19° 56′; long. 84° 38′; from Balligooda E.S.E. 46 miles; from Berhampore N.N.W. 45 miles; from Chetterpore N.N.W. 47 miles; from Chicacole N.N.E. 123 miles; from Madras N.E. 544 miles. On the Loharacundy, here spanned by a bridge; at the foot of a small hill, on N.W. frontier towards Orissa. Made a cantonment in 1837 at end of second Goomsoor campaign, and named after Mr. Russell, Special Commissioner, deputed to Ganjam to suppress disturbances caused by Dhananjaya bhoonj. Cantonment abandoned in 1863. Two small rivers flow south-east through the cantonment. In the rains when the hills are very feverish the Special assistant agent and the Assistant superintendent of Police reside here. Chief mart for the product of the Goomsoor hills consisting chiefly of wheat [geung], turmeric [country saffron], wax [mom], honey [shahad], hides [chamrah] and horns [sing] which the Khonds [q.v.] exchange for saltfish, iron [auhan], brass [pittalay] vessels, beads [munkah], &c. Salt [ooppoo] is taken through Russellcondah by Brinjarries [q.v.] and others for the Boad zemindarry and the Central provinces.

RUSSOOM (رسوم - rusúm, *Hind.*). Plural of (رسم - rasm, ar. usage). Fees. Ready-money payments received by public officers, as perquisites attached to their situations. Russooms formerly often took the form of right to levy transit duties, e.g., the right to collect three pies on every basket of paddy [q.v.] entering a certain market, &c. [merah, swatantram, vartanay]. See vol. I, 112.

RUSSUM (رسم - rasm, *Hind.*). From (rasama, ar. to mark or sketch). Prescribed form, vestige.—*Russum col arz* (رسم العرض - rasmularz, Hind.). From (above + arz, ar. earth). Mathematical geography [ilm].—*Russum ool khatt* (رسم الخط - rasamulkhatt, Hind.). From (above + khatt, ar. writing). Orthography [ilm].

RUZZAUK (رزاق - razzák, *Hind.*). From (rizk, ar. food). Provider. Epithet of God [allah]. Common alam; as Abd oor ruzzauk, slave of god [ism].

RYE (रै - rai, *San.*; റൈ - rai, *Mal.*). From (rá, san. to bestow). Wealth. Prefix in place names, as Ryemungalam meaning wealthy prosperous town.—*Raivaty* (रेवती - révatí, San.). From (rai, san. wealth + vat, san. suffix of possession); having prosperity. The last of the twenty-seven lunar mansions [nacshatram] or asterisms, comprising thirty-two stars of the fishes [hoot, meenam], figured by a tabor. Yogam [q.v.] or leading star is Veidhrity [q.v.], and this star is the starting-point [maisham] whether exact or inexact of the present hindoo fixed solar zodiac [ayanaumsham, maunam, mausam, raushy chuckram, rishy]. Veidhrity is either η or ζ piscium.

RYE (రాయి - ráyi, *Tel.*). Stone. Suffix in place names. Distinguish from Rye meaning king.—*Ramalcottah* (రామల్లకోట - rámallakóta, Tel.). See sep. title.—*Raula* (రాల - rála, Tel.). From (ráyi, tel. stone). Stone. Plural locative form. Suffix in place names; as Dooggiraula, meaning the stones dedicated to doorga.—*Raullamadoogoo canama* (రాళ్లమడుగుకనుమ - rállamadugukanama, Tel.). From (ráyi, tel. stone + madugu, tel. pool + kanama, tel. pass). Tel. also (sampájekanama), meaning sumpaujey, proper name + ghaut. Ghaut [q.v.]; Cuddapah district, Poollampett and Royachoty talooks; from Cuddapah S.S.E. 42 miles; from Poollampett S.W. 16 miles. In the Sheshachellam hills between Royachoty and Poollampett talooks.

RYOT (رعیت - raiyat, *Hind.*). From (rai, ar. to pasture). A peasant, a cultivator [coody].—*Ryotwarry* (رعیتواری - raiyatwárí, Hind.). From (above + wár, hind. distributive suffix). Relating to the cultivator; especially as ryotwarry settlement, a settlement with each individual cultivator without the intervention of a third party [graumam, zemindarry]. See vol. I, 112.

S

S (स - sa, श - sha, सा - sá, *San.*; ث - se, س - sín, ص - sád, *Hind.*; ஶா - shá, *Tam.*). San. श for shiva [q.v.]. San. स for Lutchmy [q.v.]. Hind. ث in enumeration, symbol for 500. Hind. س numerically symbol for 60; astronomically the sun [sooryan] in its sextile aspect. Hind. ص numerically symbol for 90; abbreviation for the second Mahomedan month [maheena]; for the word 'correct' as a mark of attestation, being the first letter of sahee [q.v.].

SA (स - sa, *San.*). With [sam]. Also intensive.—*Sabhaupaty* (சபாபதி - shabáppathi, Tam.). From (sabhá, san. asssembly + pati, san. lord). Shiva, as lord of the sacred hall at Chidambaram [q.v.]. Hindoo 2nd or pers. name [peyar.—*Sabhauratnam* (சபாரத்தினம் - shabárattinam, Tam.). From (sabhá, san. assembly + ratna, san. gem). Ornament of an assembly. Hindoo 2nd or pers. name [peyar].—*Sabhay* (सभा - sabhá, San.; சபை - shabai, Tam.). From (sa, san. together + bhá, san. to appear). A society [samauj, sangam, sangham]. Also a council chamber. There are five mantapams [q.v.] in Chidambaram wherein Shiva is said to manifest himself:—Cancasabhay, Chitrasabhay, Chitsabbey, Deva sabhay and Nritya sabhay. Either of these names is used as a proper name, especially the first. Suffix in proper names among the non-bramin

classes. Compare Ambalam and Rungam [peyar].——*Sadah* (सदा - sadá, San.). Always.——*Sadauchauram* (सदाचार - sadáchára, San.). From (sadá, san always + áchára, san. practice). The perpetual obligations of a householder [grihastan], consisting of daily purifications [samscauram], ablutions [snaunam], libations [savam], oblations [baly, yanyam], hospitality, obsequial rites [tarpanam], ceremonies to be observed at meals, at morning and evening worship [sundhyauvandanam], and on going to rest [maryauday].——*Sadaunandan* (சதாநந்தன் - shathánandan, Tam.). From (sadá, san. always + ánanda, san. happiness). Epithet of Shiva. Hindoo 2nd or pers. name [peyar, sadaushivan].——*Sadaushivan* (சதாசிவன் - shathásivan, Tam.). From (sadá, san. always + shiva, san. happiness). Epithet of Shiva. Hindoo 2nd or pers. name [peyar, sadaunandan]. Name of a minor rajah of the Vijianugger of the Narsimha [q.v.] dynasty [raj], who was set up as nominal successor of Krishna deva roya [q.v.]. See vol. I (153); II, 251. ——*Saha* (सह - saha, San.). With.——*Sahely* (سہیلی - sahelí, Hind.; ಅರಸಿನಬುರದಿ - arasinaburadi, Can.; కుంకుమపిట్ట - kunkumapitta, Tel.) [soohely]. Hindostany, from (sa, san. with + hélá, san. sport); playful, companion. Tel. from (kunkuma, tel. red saffron powder + pitta, tel. bird). Hind. also (pabaríbalalchashm); (sátsahelí), meaning seven companions, from being seen in groups of seven; (bulalchashm); (sátbháí), meaning seven brothers or companions. Can. also (sulisang), male. Title otherwise Minivets. The Pericrocotus genus, campephaginæ [aukroy], laniadæ [pingalam], dentirostres, insessores [pacshy, 19], of naturalists [jantoo].—"*a*" The orange minivet is Pericrocotus flammeus, confined to jungles of South-west india; bright and showy colors; males keep up continuing whistling call, wheet-wheet-wheet.—"*b*" The rosy minivet is Pericrocotus roseus.—"*c*" The small minivet is Pericrocotus peregrinus. Always in flocks, at times six or seven females seen with only one male, hence the Hindostany name Saut sahely.—"*d*" The white-bellied minivet is Pericrocotus erythropygius.——*Sam* (सम् - sam, San.). Same as title.——*Samashrayanam* (समाश्रयण - samáshrayana, San.). From (sam, san. well + áshri, san. to adhere) Branding of the shoulders with chunk [q.v.] and chuckram [q.v.]; performed on Veishnavites [moodrah dhauranam]. See vol. I (85).——*Samasyam* (సమస్య - samasya, Tel.). From (sam, san. together + as, san. to throw). Part of a stanza proposed by one person to be completed by another as a trial of skill. ——*Samaudhy* (समाधि - samádhi, San.). From (sam, san. with + ádhá, san. to place), collecting the mind. Abstract meditation. The eighth or last stage in the practice of yogam [q.v.].——*Samaugamam* (समागम - samágama, San.). From (sam, san. together + ágama, san. coming). The occultation of star [jyotisham, nacshatram, sangamam].——*Samauj* (समाज - samája, San.). From (sam, san. together + aj, san. to go). Assembly [sabhay, sangam, sangham].——*Samausam* (समास - samása, San.). From (sam, san. together + ás, san. to sit); combination. Ellipsis in grammar [vyaucaranam].——*Samayam* (समय - samaya, San.). From (sam, san. together + i, san. to go); covenant. Any religious persuasion or system.—"*a*" There are twelve principal religious sheiva systems of which six are orthodox or approved and six heterodox or rejected. The oolsamayam [ootchamayam] or six orthodox systems are:— Veiravam [q.v.], making bheiravan [q.v.] supreme; Vaumam [q.v.], regarding the female principle [shacty] in nature as the primeval form of deity and teaching the worship of the female organ; Caulaumookham [q.v.], similar to vaumam; Mauvratam [q.v.], teaching that the deity is a pure spirit; Paushoopatam [q.v.], similar to mauvratam; Sheivam [q.v.], teaching that deity is both spirit and matter assuming forms [avatar, moorty] for accomplishing his purposes [augamam]. The poorasamayam or other heterodox systems are:—Locauyatam [q.v.], a species of atheism regarding sensual gratifications as the chief good, as taught by chaurvaucan [q.v.]; Bowddham [booddha], which rejects the notion of a supreme being, maintaining that all material existences proceed from a fortuitous combination of the four primitive elements [bhootam] earth, water, fire and air, and that mental phenomena are the mere results of organization; Shamanam [q.v.], the jeina [q.v.] system, being a modification of booddhism, and regarding arghan [arhat] as the deified preceptor and object of worship; Mimaumsam [q.v.], regarding bramh [q.v.] as the soul [autmam] of the universe; Pauncharautram [q.v.] or the system taught by vishnoo [q.v.] during five successive nights; Bhattauchauryam or the system of bhattaucharry who regard the vedams [q.v.] as god and consider that virtuous actions of themselves result in felicity. Other systems are Caupaulam, Sowtrauntiam, Yogachauram, Autmicam, Veibhaushicam, Nirgranta yaudam, Neiyauyicam, Veishaishicam, Patanjalyam, Saunkhyam, Siddhauntam, Vedauntam.—"*b*" The six orthodox veishnava systems are Yaudavam, that of yaudava mishran; Mauyah vaudam, that of shuncaracharry [shuncaran]; Hiranyagarbham, that of hiranyagarbhan; Ramaunoojeeyam, that of ramaunoojan [q.v.]; Bhauscaram, that of bhauscaran; Tatwa vaudam, that of madhwacharry [madhwa, matam]. The six heterodox veishnava systems are the same as the above six heterodox sheiva systems. For the various systems of Hindoo philosophy see Darshanam.——*Sambandham* (सम्बन्ध - sambandha, San.). Tie. Relationship by birth or marriage generally; but commonly understood of relationship by marriage. Sambandha calapp or mixing by marriage is intermarriage. Sambandhy is the parents of the married pair in their relation to one another. Coorangoo sambandham is the monkey grasp in philosophy; as the cub clings to its mother so the soul clings to the deity [samsauram, g]; the doctrine of Vadagalays [q.v.]. Poonay sambandham or cat's grasp is the hold of the deity on a soul; the stronger carrying the weaker; the doctrine of the Tengalays [q.v.]. Pausha sambandham is a cord-tie, applied to bondage of soul [autmam] in body [pashoo, paty, pausham, shareeram]. ——*Sambandhamoorty* (சம்பந்தமூர்த்தி - shambandamúrtti, Tam.). From (sam, san. well + bandha, san. tie + múrtti, san. image of deity, title to pious persons); means an attached soul, a pious devotee. Hindoo 2nd or pers. name [peyar]. ——*Sambandhan* (सम्बन्ध - sambandha, San.; சம்பந்தன் - shambandan, Tam.). From (sam, san. well + bandh, san. to tie); well tied or attached; devotee. One of the three champions of the Sheiva [q.v.] faith against the Jeinas [q.v.] in the reign of the Madura ruler Coon paundyan [soondra paundy tevar]; his life related at length in the Tirtondar pooraunam [aroopatt moover, periya pooraunam]. Born of the Bramin tribe of Cownya at Shiyally, while yet a child acquired distinction as a poet [pauvalan]. Coon paundyan embraced the Jeina religion, but Sambandhan having succeeded in curing the king of a fever, reconverted him to the Sheiva religion, and instigated him to impale alive on the bank of the Veigay river eight thousand Jeinas. In his sixteenth year married daughter of Numbiyandaur numby, a Bramin of Tirnellore; but both he and his wife died on their wedding day, whilst worshipping in the temple at Tirnellore. The number of Pathigams [q.v.] he composed was 16,000 [matam].—— *Samber* (शांबर - shambara, San.; सांबर - sámbara, Mahr.; سانبر - sánbar, Hind.; سامبر - sámbar, Dec.; ಕಡವೆ - kadave, Can.; ಕಡಮು - kadama, Too.; కణితి - kaniti, Tel.; ସମ୍ବର - somboro, Oor.; കട്ടമാൻ - katumán, Mal.; ගෝනාරුසා - gónárusa, Singh.; கடம்பை - kadambai, Tam.). Title from hindostany. San. from (sam, san. together + vri, san. to surround). Tel. means a hump, perhaps from its having one. Oor. from sanscrit. Mal. from (katu, mal. fierce + mán, mal. deer). Tam. from (kadam, tam. forest). Title otherwise Samber stag. Sometimes wrongly called Elk. The Jerrow of Himalayas. Greek ἱππέλαιος. Rusa aristotelis, rusinæ, cervidæ [mrigam], ruminantia, mammalia [sastanam, 24], of naturalists [jantoo]. Alias Cervus aristotelis, equinus, hippelaphus, leschenaultii. The largest of Indian stags. Horns with a basal antler springing directly from the burr or base of the horn, and pointing forwards, upwards and outwards, the beam bifurcating at the extremity, a snag separating posteriorly and pointing obliquely to the rear. Color dark brown, in summer somewhat slaty; the chin, limbs within, tail beneath, and irregularly marked patch on the buttocks pale yellowish, or orange yellow; neck and throat with long hair, forming a sort of mane; tail moderately long. Female and young dusky olive brown, lighter than the buck. Ordinary length, 6 to 7 feet; height, 13–14 hands at the shoulder. The horns vary much in thickness and length, and the divergence varies much, as well as the degree of curvature, and the relative size of the terminal snags. The horns are considered to attain their complete form in the fourth year, and after that go on increasing in size for several years more, without any normal alteration of form. The length of the horns rarely exceeds 40 inches, but some are recorded 4 feet along the curvature. The basal antler 10-12 inches or more. The color too varies, some being much darker than others. Found in the Western ghauts [q.v.] throughout their whole extent, the Wynaud, Coorg, the Neilgherries, many parts of Mysore, the Eastern ghauts [q.v.], where sufficient cover is afforded by the forests. They prefer hilly ground to flat land. They may be seen morning and evening outside a patch of jungle, grazing on the new grass that springs up after the old grass is burnt off. They still abound, but have become very wary. The stags drop their horns in April, sometimes earlier, and the new horns are not perfected till the end of September, about which time the rutting season commences, and their peculiar call may be heard, especially morning and evening. The eye-pit or suborbital sinus is very large in these deer [mrigam], and when the animal is excited it is distended. In hunting it, it is either stalked or else driven by a line of beaters. It has been killed by fox hounds on the Neilgherries. According to native shikarries [q.v.] the samber drinks only every third day, whereas the Nilghye [q.v.] drinks daily. Soft leather, somewhat resembling chamois leather, is prepared from the hide [chamrah].——*Samhauran* (सहार - samhára, San.). From (sam, san. completely + hri, san. to draw). A form of Shiva [q.v.], destroyer. Called also Samhaura bheiravan. Shoora samhauran is Soobramanyan [q.v.], the destroyer of Shooran, the giant, which is commemorated in Scanda shashty [q.v.]. ——*Samhitay* (संहिता - samhitá, San.; சங்கிதை - shangithai, Tam.). From (sam, san. together + dhá, san. to put). Collection of prayers, invocations, or hymns. The ancient Samhitays of each vedam [q.v.] constitute the Shaukhays or branches of each vedam [q.v.]. Every such collection belonging to one Vedam is entitled its Samhitay. The arrangement of the Samhitays is in a liturgical form, containing petitions addressed to the sun [sooryan], to fire [agny], earth moon [chundran] and stars [nacshatram],

[bhoomy], and water [neer], to Indran [q.v.], Yaman [q.v.], Vishnoo [q.v.], Roodran [q.v.], and other deities. The prayers are partly homologatory, partly doxological, and partly supplicatory. They are the devotions for the most part of particular rishies [q.v.] expressed in particular metres, and addressed to particular deities, specified in the prayers themselves. The names of the rishy [q.v.], metre [chandas], and god [devatay], for every hymn, are inscribed at the head. In this respect, compare the Psalms of David. The tune or metre is also occasionally given. See vol. I (74). Samhitay means at present day a treatise on any branch of knowledge [vidyay].——*Samit* (समित् - samit, San.). From (sam, san. well + indh, san. to kindle). Fuel for feeding sacred fire [agny, homam, yanyam]. The common sacrificial woods are:—Achyranthes aspera [indian burr], Butea frondosa [palaus], Calotropis gigantea [yercum], Cynodon dactylon [hurrially], Eragrostis cynosuroides [darbhay], Ficus bengalensis [banyan], Ficus glomerata [cluster fig], Ficus religiosa [peepul], Prosopis spicigera [shamee].——*Sammaty* (सम्मति - sammati, San.). From (sam, san. together + mati, san. mind). Consent.——*Samoodauyam* (समुदाय - samudáya, San.). From (sam, san. together + ut, san. forwards + í, san. to go). Anything held in common. Especially by villagers, such as trees, fisheries, grazing land, firewood, irrigation, jungles, and the like [aroothycaray, graumam, palabhogam]. Underlying the government control there is a vast system of samoodauyam or communal organization, too often ignored.——*Samoodra devy* (समुद्रदेवी - samudradévi, San.). The sea-goddess; Lutchmy [q.v.].——*Samoodram* (समुद्र - samudra, San.). From (sam, san. with + udra, san. water).—"*a*" Ocean. The soorans [q.v.] and asoorans [q.v.] are said to have churned the ocean after the deluge [pralayam] with the mountain mandaram [q.v.] for the recovery or production of the fourteen sacred things [coormam], viz.:—Lutchmy, the goddess of prosperity; Cowstoobham, the jewel of krishnan; Paurijautam, the tree of paradise; Soorah, spirituous liquor personified as a nymph; Dhanwantary, the physician of the gods; Chundran, the moon; Caumadhain, the cow of plenty; Eirauvatam, elephant of indran; Ootcheishravas, horse of indran; Apsaras, nymph of indran's heaven; Caulacootam or halauhalam, the deadly poison; Amritam, ambrosia; Indra dhanoos, bow of indran; and the Conch [chunk]. The following are the 7 seas:—salt sea, sugar-cane juice sea, toddy sea, sea of ghee, sea of curds, sea of milk, sea of fresh water [bhoogolashastram].—"*b*" Any place with a large sheet of water [saugaram].—"*c*" Chapter of a book.——*Samoodricam* (सामुद्रिक - sámudrika, San.). From (sa, san. with + mudrá, san. mark). Palmistry. Very similar to the science introduced to Europe from Arabia. It dwells on the marks on the palms, on warts, moles, size, and shape of the different visible members, shape and height of person, length of arms and feet, and draws inferences from the whole. The Poorsha samoodrica lutchanam, is a treatise said to have been dictated by Soobramanyan [q.v.], son of Shiva [q.v.], to Agastyan [q.v.], the father of the Tamul language. The following are specimen mottoes of Samoodricam:—He will have wealth and long life whose lines in the palm of the hand are reddish and small; if they are thick, he will have sorrow; a person having lines in the palm of the hand like the chunk [q.v.] and the wheel [chuckram] will have ample income, and he will be charitable and liberal to everybody that may resort to him; if one has matsya raikhay, or the lines like the fish, he will be very liberal; if they are like the windpipe, he will win applause, if they are like the saw, he will be energetic and brave; one will be meek and humble whose lines in the palm are like the pitcher; and he will be a pundit [q.v.] if they are like the moon [chundran]; he will live in the company of several souls who has these lines like the white cowry [q.v.]; if they are like the lotus [nelumbo], he will always be a favorite of lutchmy [q.v.], the goddess of wealth; he will lead a happy life who has these lines in the form of a string of flowers; if they are like the spear or javelin, he will have success in his undertakings; if they are like the lingam [q.v.], he will be a devout worshipper of shiva [q.v.] and other gods [deva]; if they are like the ox [rishabham], he will have many conveyances; it is the sign of a wise man to have one line from the wrist to the foot of the middle finger; and if it runs as far below the middle finger, he will be a pundit or a proficient; if it runs as far below the little finger, he will be wealthy; if it is below the ring finger he will have ornaments but will have extreme sorrow; if it extends below the little finger, he will become a libertine; if it is in the palm of the hand, he will have riches and offsprings; a want of such a line in the palm of a man is a sign of stupidity and dullness; if the line in the palm of the hand has the color of smoke, the person will become a great sinner. For indications of the curling mark see Shooly. For external omens see Shacoonam. Samoodrican is one versed in samoodricam, an interpreter of these marks, a chiromancer.——*Samoodry* (सामुद्रि - sámudri, San.). From (samudra, san. sea). Sea king. The Calicut zamorin [q.v.]. See vol. I (129), (139).——*Samoogam* (సముఖము - samukhamu, Tel.; சமுகம் - samugam, Tam.). From (above + mukha, san. face). Presence. Used in correspondence, as equivalent to your excellency [hazrat, huzoor].——*Sampauty* (सम्पाति - sampáti, San.). From (sam, san. well + pat, san. to fly). A fabulous bird. Eldest son of Garoodan [q.v.] and elder brother of Jatauyoo [q.v.]. Informed Hanooman [q.v.] that Ravanan [q.v.] had carried off Seetay [ramayanam, seetay].——*Sampradayee* (सम्प्रदायी - sampradáyí, San.). From (sam, san. well + pra, san. intensive prefix + dá, san. to give); traditionist. The Veishnava sect in Bengal; worshippers of Krishnan [q.v.] and Raudhay [q.v.] conjointly. To be distinguished from the Shree sampradayees or ramaunoojeeyans [ramaunoojan], and the Bramha sampradayees or madhwacharries [madhwa].——*Sampraty* (சம்பிரதி - shambirathi, Tam.). From (sam, san. together + prati, san. duplicate). Assistant to a village accountant [curnum].——*Samrajyam* (साम्राज्य - sámrájya, San.). From (sam, san. together + ráj, san. to shine, rule). Empire. Universal sovereignty. But applied to all prosperity and felicity. Samrajya lutchmy or lutchmy [q.v.] as conferring all felicity and prosperity is a common epistolary compliment. Compare Ashta lutchmy.——*Samsauram* (संसार - samsára, San.). From (sam, san. together + sar, san. to move). The world, the mundane state, secular condition, domestic life [illaram]. Transmigration; in which sense otherwise Jenmam [q.v.], Pirapp [q.v.] or Yaunam [q.v.]. Transmigration means transition of the soul into another body at death. Belief in a future life is first expressed positively in the Bramhanams [q.v.]. They assert that a recompense awaits all beings in the next world according to their conduct in this. The doctrine of transmigration in its present form, namely eternity of soul [autmam] backwards and forwards, is fully developed in the Oopanishads [q.v.], Darshanams [q.v.] and Menoo [q.v.].—"*a*" Expressed in its shortest terms the doctrine is this; Jenmam [q.v.] or birth is the result of Carmam [q.v.] or action; and action leads to continual existence, carried on through innumerable bodies [shareeram] till acts are adequately rewarded or punished.—"*b*" Philosophical hindooism, that is to say, looks upon soul as of two kinds, the Paramautman [q.v.] or supreme soul and the Jeevautman [q.v.] or the personal and individuated soul [autmam]. The union of the personal soul with the body is productive of bondage and misery, for when once so united the soul begins to apprehend objects through the senses [indriyam], receiving therefrom painful or pleasurable impressions. It also becomes conscious of personal existence and individuality [ahancauram]. Then it commences acting. But all action whether good or bad leads to bondage, because every act inevitably entails a consequence which must be rewarded or punished. An evil act follows a man through a hundred thousand transmigrations, says the Pauncharautram [q.v.]. This theory of actions is called shortly Carmam [q.v.].—"*c*" The conditions of existence just indicated are summed up in the theory of the Nidaunams, or twelve successive causes each of which is the consequence of the one which precedes. These are:—ignorance [anyaunam], the predispositions of mind which determine our acts or more simply the carmam or action, consciousness, individuality, sensibility, contact of the senses [indriyam] with objects, sensation, desire or thirst, clinging to existence, birth, old age, death or suffering. As regards the being which undergoes existence, it is viewed as a composite being resulting from the scandhams or aggregates; which in the case of the human being are reckoned as five, viz.:—Roopam, form or materiality; Vaidanay, sensation; Vinyaunam, perception; Sanyay, notion or abstract ideas; Samscauram, faculties and dispositions of mind or intellect. These scandhams or elements of being unite and arrange themselves so as to form a distinct being, undergo incessant modifications along with it, and dissolve at its death. The influence of its Carmam [q.v.] alone survives the being, and through this the formation of a new group of scandhams is immediately effected and a new individual rises into existence.—"*d*" In order to accomplish Carma vipaucam or the entire working out of these consequences, a life in conformity with the precepts of the sacred books is enjoined, and penances [tapas] and prauyaschittams [q.v.] or expiatory ceremonies are prescribed. The living personal soul [jeevautman] must shake off the fetters of action [carmam] and getting rid of body [shareeram], mind [manas] and all sense of separate personality return to the condition of simple soul [autmam]. This constitutes Pramay or Nyaunam [q.v.], the true measure of all existing difficulties, the right apprehension of truth, which if once acquired by the soul confers upon it final emancipation whether called Moocty, Mocsham, Nishreyasam, Apavargam or Nirvaunam.—"*e*" But to attain this the soul has to pass through innumerable bodies, migrating into higher, intermediate or lower forms, from a god to a demon, man, animal or plant or even a stone, according to its various shades of merit or demerit. The triple order of transmigrations through deities, men and beasts, and plants, is according to the dominance of one or other of the three goonams [q.v.] or cosmic qualities:—Satwam [q.v.], Rajas [q.v.] and Tamas [q.v.]. And each of these three degrees of transmigration has three sub-degrees. The grades of promotion are to Swargam [q.v.], the paradise of indran [q.v.], to Veicoontam [q.v.], the paradise of vishnoo [q.v.], and to Keilausam [q.v.], the paradise of shiva [q.v.]; and higher still to mocsham [q.v.], or liberation from a material body [cosham, shareeram] in the Satya locam [q.v.], or Bramha locam [q.v.], or highest heaven. The highest ascent is only for the mortified ascetic [beiraugy, sanyausy, yaty, yogy], who in the present life is considered to be Parama hamsan

[q.v.] a portion of the deity, or Jeevan mooctan a living divinity. Great crimes, on the other hand are punished by special forms of hell for a series of years, and then the guilty souls relapse into existence [jenmam, pirapp] and pass through various bodies. A bramin killer enters the body of a dog [nye], bear [ricsham], ass [gadhah], camel [ottagam], bull [maud], goat [vellaud], sheep [aud], stag [mrigam], birds [pacshy], &c. The violater of the bed of a gooroo [q.v.] migrates a hundred times into the forms of grasses, shrubs, plants, &c. It is implied under this theory that vegetables of all kinds have internal consciences and are susceptible of pleasure and pain.—"*f*" In connection with this system, a human being is regarded as a three-fold existence; the Stooladeham or visible body, the Soocshmadeham a minute or spiritual body, and Cauranadeham the causal or superior soul. The second is also called Yautanadeham, as capable of suffering, and therefore not wholly immaterial, but subtle and refined from grosser particles [cosham, shareeram].—"*g*" The belief in transmigration proceeds from the theory that human souls, being of divine essence, are originally pure, but during their earthly career lose more or less of their purity; being destined however to regain their original quality, they are reborn again and again, until they have become free from fault and thus worthy of returning to the place of their origin; the doctrine is obscurely taught, and among any but the philosophic is scarcely grasped at all; it is however common to all the hindoo systems, being a natural attempt to account for the existence of moral and physical evils, for all the inequalities of life, and for the dispensations of providence.—"*h*" The dravidians proper have no theory of transmigration; compare the following from the shivavaucyam [q.v.]:—*கறந்தபால் முலைபுகா கடைந்த வெண்ணெய் மோர்புகா உடைந்த சங்கினோசையும் உயிர்களு முடல்புகா வடிந்த வோரடையினி யுதிர்ந்த பூமரம்புகா இறந்துபோன மானிட ரினிப்பிறப்ப தில்லையே*—"as "milk once drawn cannot again enter the udder, nor butter "[vennay] churned be recombined with milk [paul]; as sound "cannot be produced from a broken conch [chunk], nor life be "restored to a corpse; as a decayed leaf and a fallen flower "cannot be reunited to the parent tree; so a man once dead "is subject to no future birth." However the idea has been largely imported by hindooism, even into purely tamul literature. The Cooral has the following:—*அறத்தாறிதுவென வேண்டா சிவிகை பொறுத்தானோடூர்ந்தா னிடை*—"you need not describe the course of virtue [aram, dharmam]; "look at the bearer of a palankeen [q.v.] and him who rides in "it;" one, as the fruit of his virtues in a former birth, rides in a palankeen; while the other from former sin, is doomed to bearing it.—*வீழ்நாள்படாஅமை நன்றாற்றினஃ தொருவன் வாழ்நாள்வழியடைக்குங் கல்*—"he who acting well "permits no failing days; this will be a stone to stop the course "of births;" such a man delivered from the numerous births and deaths, to which other creatures are liable, will obtain absorption [matam, mocsham, pirapp, shivavaucyam].—*பிறவிப் பெருங்கட னீந்துவர் நீந்தா ரிறைவ னடிசேரா தார்*—"none can swim the great sea of births, but those who are "united to the feet of the deity."—*உறங்குவது போலுஞ் சாக்கா டுறங்கி விழிப்பது போலும் பிறப்பு*—"death is "like sleep; birth is like awaking from it."—*புக்கி லமைந்தின்று கொல்லோ வுடம்பினுட் டுச்சி லிருந்த வுயிர்க்கு*—"it seems as if the soul, which takes a temporary shelter in "a body, had not attained a home."—*பொருளல்ல வற்றைப் பொருளென் றுணரு மருளானா மாணாப் பிறப்பு*—"inglorious births are produced by the confusion of mind "which considers those things to be real which are not real."—*இருணீங்கி யின்பம் பயக்கு மருணீங்கி மாசறு காட்சி யவர்க்கு*—"a clear, undimmed vision of things will deliver its "possessors from the darkness of future births, and confer the "felicity of heaven."—*ஓர்த்துள்ள முள்ள துணரி னொருதலையாப் பேர்த்துள்ள வேண்டா பிறப்பு*—"let it not be "thought that there is another birth for him whose mind having "thoroughly considered all it has been taught, has known the "true being."—*அவாவென்ப வெல்லா வுயிர்க்குமெஞ் ஞான்றுந் தவாஅப் பிறப்பீனும் வித்து*—"the wise say "that the seed, which produces unceasing births, at all times, to "all creatures, is desire."—*அன்போ டியைந்த வழக்கென்ப வாருயிர்க் கென்போ டியைந்த தொடர்பு*—"they say "that the union of soul and body in man is the fruit of the union "of love and virtue in a former birth."—*இழத்தொறூஉங் காதலிக்குஞ் சூதேபோற் றுன்ப முழத்தொறூஉங் காதற் றுயிர்*—"as the gambler loves his vice the more he "loses by it, so does the soul love the body the more it suffers "through it."—*பொருளானா மெல்லாமென் றீயா திவறு மருளானா மாணாப் பிறப்பு*—"he who knows that wealth "yields every pleasure and yet is so blind as to lead a miserly "life will be born a demon."—*ஒருமையு ளாமைபோ லைந்தடக்க லாற்றி னெழுமையு மேமாப் புடைத்து*—"should "one throughout a single birth, like a tortoise keep in his five "senses, the fruit of it will prove a safeguard to him through- "out the seven-fold births."—"*i*" See vol. I (70) to (94).——*Samscauram* (संस्कार - samskára, San.). From (sam, san. well + kri, san. to do); well-doing.—"*a*" Purificatory rite. These purify a man from the taint of sin derived from his parents, and are enjoined with certain variations on all the three first classes [dwijan, jauty] of Hindoos alike. They are as follows:—Garbhadaunam, ceremony on conception. Poomsavanam, on the first indication of a living male's conception. Seemantonnayanam, arranging the parting of the mother's hair in the fourth, sixth, or eighth month of pregnancy. Jautacarmam, touching an infant's tongue with honey [shahad] and ghee [q.v.] out of a golden spoon thrice at birth before cutting the navel string. Nauma caranam [naumam, peyar], giving a name on the tenth or twelfth day after birth. Nishcramanam, taking out a child in the fourth month to see the sun [sooryan]. Annapraushanam, feeding an infant with rice between the fifth and eighth month or when he has cut teeth. Choodahcarmam, or chowlam, tonsure of the hair except one lock [coodoomy] on the crown of the head in the third year. Oopanayanam [q.v.], induction into the order of a twice-born [dwijan] man by investiture with the sacred cord [poonool]. Kaishauntam, cutting off the hair, performed on a bramin [q.v.] in his sixteenth year, on a cshatriya [q.v.] in his twenty-second, on a veisya [q.v.] in his twenty-fourth. Samauvartanam, solemn return home after completing a course of study with a preceptor. Vivauham, marriage [calyaunam], which completes the purification and regeneration of the twice-born [matam]. See vol. I (107).—"*b*" Samscauram is also faculty of memory, one of the twenty-four qualities of the Veishaishicam [q.v.] branch of Nyauyam [q.v.] philosophy.—"*c*" Also faculty and dispositions of mind or intellect influencing transmigration or samsauram [q.v.].——*Samstaunam* (संस्थान - samst'hána, San.). From (sam, san. well + st'há, san. to stand). Residence of a family of rank; zemindarry estate.——*Samvat* (संवत् - samvat, San.). From (sam, san. with + vas, san. to dwell); the seasons [ritoo] are supposed to abide in the year. A year [samvatsaram, saul, varsham]; especially of the era [saca] of Vicramadityan [q.v.].——*Samvatsaram* (संवत्सर - samvatsara, San.). From (sam, san. with + vas, san. to dwell). A year [samvat, saul, varsham]; mostly of the luni-solar reckoning [chaundramaunam]. The european calendar or common year contains 365 days. The european solar year, called also a tropical year [ayana caulam], is the period in which the sun [sooryan] moves from the vernal equinox [maishauyanam] to the vernal equinox again, and its average value, called a mean solar year [madhyama sowra maunam], is 365·24222 mean solar days, or $365^{d}\ 5^{h}\ 48^{m}\ 48^{s}$; the odd time being nearly a quarter of a day it is allowed to accumulate till every fourth year, when february has 29 days; but the excess of the tropical year over 365 days is about 11¼ minutes less than a quarter of a day; hence the gregorian correction made by pope gregory xiii in 1582, and adopted in great britain in 1752, when the 3rd day of september was by act of parliament called the 14th. The european sidereal year is the time which elapses between the sun's leaving a fixed star [nacshatram] until his next return to it, and consists of $365^{d}\ 6^{h}\ 9^{m}\ 9{\cdot}4^{s}$. The european anomalistic year denotes the time between two successive passages of the earth through its aphelion or perihelion [ootcham] points, and consists of $365^{d}\ 6^{h}\ 13^{m}\ 45{\cdot}7^{s}$ [maunam, mausam]. The teloogoo year consists of a certain number of lunar months [chaundramausam] reckoned from new moon to new moon [amavausyay, mookhyam, shooclaudy]; the luni-solar [chaundramaunam] years of the era [saca] of vicramadityan [q.v.] commencing with the year of the kaly [q.v.] age 3045 or 57 b.c. are those chiefly used in telingana [q.v.]; rare in the peninsula; fifteen days [tity] of thirty moohoortams [q.v.] each make a pacsham [q.v.] or lunar fortnight, two of these make a month [mausam], two months a solar season [ritoo], three seasons a northern or southern declination [ayanam], and these two compose a year; as to when the teloogoos begin their year, see Teloogoo new year. The tamul year consists of solar months [madhyama sowra maunam, mausam] containing as many days and parts of days [dinam] as the sun stays in each sign [raushy] of the zodiac [jyotisham, raushy chuckram]; for the commencement of the year among the tamuls, see Tamul new year. For Canarese, same as Teloogoo new year. For Malayalam see Collam and Vishoo. For Mahomedan see Hijra. For Persian see Nowroz. See vol. I, 612.——*Samvatsaraudy* (సంవత్సరాది - samvatsarádi, Tel.). From (samvatsara, san. year + ádi, san. beginning). Same as Teloogoo new year. Otherwise Yoogaudy.——*San* (सम् - sam, San.). Same as Sam [q.v.] before gutturals, palatals, linguals, and dentals [varnamaulay].——*Sancalpam* (सङ्कल्प - sankalpa, San.). From (sam, san. well + klip, san. to resolve). Declaration of purpose; solemn vow. Solemn and formal enunciation of purpose preparatory to entrance upon any important religious rite [carmam] or work, as on the occasion of an ablution or snaunam [q.v.] at a place of sacred water [teertam], anniversary or shrauddham [q.v.], daunam [q.v.], or vratam [q.v.]. This utterance is made either by the subject [yejmaun] himself or by the poorohit [q.v.] or acharry [q.v.] for him.——*Sancramanam* (संक्रमण - sankramana, San.). From (sam, san. together + kram, san. to go). Means approach. In astronomy [jyotisham], passage of the sun [sooryan] or a planet [graham] into a sign [raushy] of the zodiac [raushy chuckram, sancraunty]. In algebra [ganitam] the working out

of two unknown [caulak] quantities of which the sum and difference are given; also the rule for finding two such quantities.——*Sancraunty* (सङ्क्रान्ति - sankránti, San.). From (sam, san. together + kram, san. to go). Meeting. The passage of the sun [sooryan], &c., from any one sign [raushy] into another [sancramanam]. The corresponding day is observed as a fast [oopavausam, pundigay, 2b]. In common usage specially applied to Macara sancraunty [q.v.], otherwise Mahasancraunty, the passage of the sun into the tenth sign macaram [q.v.] or capricorn, when he turns north or when dacshinauyanam [q.v.] ends and oottarauyanam [q.v.] begins. This is the season of Pongal [q.v.]. See vol. I (93).——*Sangam* (सङ्ग - sanga, San.). From (sam, san. with + gam, san. to go).—"*a*" Junction; a place of junction of two or more rivers [sangamam]. The debouche of a river [aur] into the sea. Assembly [sabhay, samauj, sangham].—"*b*" Village, Hill; Nellore dist., Nellore tal.; pop. 1,392; acres 5,357; lat. 14° 35′; long. 79° 47′; from Nellore N.W. 18 miles; from the sea W. 30 miles. Situated 8 miles from where Beerapair joins Pennair. On north bank of Pennair. Ancient Shiva and Vishnoo temples. In front of temple is a monolith pillar [laut] 30 yards in height and 2 yards in width. Annual festival in april in honor of Sangameshwara sawmy. An anicut [q.v.] across the Pennair and important irrigation works have been made. See the article on Irrigation in volume I. Trig. station on hill in lat. 14° 36′ 18·38″; long. 79° 47′ 24·35″; from Nellore N.W. 18 miles; from Shreecolan S.S.W. 5 miles; from the sea W. 29 miles.——*Sangamam* (संगम - sangama, San.; قران - kirán, Ar.). From (sam, san. together + gam, san. to go). Conjunction [crauntam]. When two celestial bodies have the same longitude [sauyanam], or right ascension [lagnam], they are in conjunction; when they have a difference of longitude of 180°, and are therefore in diametrically opposite parts of the heavens [bhagolam], they are in opposition; when the difference of longitude is 90°, they are in quadrature. The moon [chundran] is in conjunction with the sun [sooryan] at the time of new moon [amavausyay, pacsham], in opposition at the time of full moon [powrnimay]. With regard to mercury [boodhan] and venus [shoocran], they are said to be in inferior conjunction when passing between the sun [sooryan] and the earth [bhoomy]; and in superior conjunction when on the opposite of the sun to the earth [jyotisham]. For occultation see Samaugamam. Sangamam means also the confluence of two rivers [aur, sangam]. The junction of three rivers is called trivainy, meaning triple braid, or Trivainy sangamam; by pre-eminence applied to the place near Allahabad where Ganges and Jumna join Saraswaty.——*Sangameshwaram* (సంగమేశ్వరం - sangaméshvaram, Tel.). From (sangama, san. confluence + íshvara, san. shiva); so called from a temple of eeshwaran situated at the confluence of the rivers. Sanscrit name (nivrittisangama), meaning absolution + confluence. Village, Place of pilgrimage; Kurnool dist., Nundicotcore tal.; pop. 378; acres 941; lat. 16° 01′; long. 78° 22′; from Kurnool N.E. 23 miles; from Nundicotcore N.E. 12 miles. At the confluence of Toongabudra, Kistna and Bhavanausy. Double rock-cut cave with stone image. Important and sacred temple of Sangameshwaran with inscriptions. One of the temples has a gopooram [q.v.] in the form of a car [rath]. Several deserted temples. Annual festival on Shivarautry [pundigay, 6a].——*Sangapalagay* (சங்கப்பலகை - shangappalagai, Tam.). From (sanga, san. assembly + p'halaka, san. plank). The seat of the learned in former times at Madura on the tank of Pottaumaray [madura college, paundya rajaukkal].——*Sangaputnam* (సంగపట్నము - sangapatnamu, Tel.). From (sanganna, tel. proper name + pattana, san. town). Village; Kurnool dist., Coilcoontla tal.; pop. 1,144; acres 4,306; lat. 15° 09′; long. 78° 11′; from Coilcoontla W.S.W. 13 miles; from Kurnool S. 47 miles. The poligar [q.v.] family of this place is a branch of that of Nossam, from which it separated in 1644. Polliem [q.v.] now resumed.——*Sangattaur* (சங்கத்தார் - shangattár, Tam.). A collegiate body [madura college, paundya rajaukkal].——*Sangeetam* (सङ्गीत - sangíta, San.). From (sam, san. prefix meaning together + gá, san. to sing). Means symphony. Music in its largest sense, by the union of voices, instruments and action. Native books on this art consist of three parts, gaunam [pautt], vaudyam [q.v.], nrityam [q.v.]; or song, percussion, and dancing. The first comprises the measures of poetry [pah], the second instrumental music of all sorts, and the third theatrical representation [nautacam]. In all religious ceremonies and on the occasions of celebrating marriages [calyaunam], &c., music is an essential accompaniment. The tamul Cooral [q.v.] has the following:—பண்ணென்னும்பாடற்கியைபின்றேற் கண்ணென்னுங் கண்ணோட்ட மில்லாத கண்—"of what "avail is a song if it be inconsistent with harmony? so what is "the use of eyes which possess no kindliness?" Stringed instruments played with the fingers with fixed frets are the veenay [q.v.] and kingry [q.v.]; with movable frets, the sitaur [q.v.]; without frets, the tambore [q.v.]. Played with bow are the saurangy [q.v.] or native fiddle and rabaub [q.v.]. Played with a plectrum of ivory [dant] or wood is the soorbut [q.v.]. Ancient stringed instruments out of use are the yauzh [q.v.] family. The rauvanauttam [q.v.] is also ancient. Reed instruments are the naugaswaram [q.v.], mailam [q.v.], mookha veenay [q.v.], jeenboorra [q.v.], magady [q.v.], toortty [q.v.] shahnaye [q.v.], tauray [q.v.], and bankah [q.v.]. Wind instruments without reed are algoja, chunk, comboo, pillangrovy, shree choornam, toortoory. Metal instruments of percussion are jaulry, jhaunj, taulam, jaugatey, morchang, ghuntay, and shalangay; secondly of wood and skin as jamadica, chitikey, daf, damaroo, dole, dunkah, mridangam, maddalam, kanjily, nowbut, tacorah, nakkaura, runja, paray, tappattay, tom-tom; thirdly of mud as ghatam and jala tarangam. The musical instruments chiefly in use in the Tamul districts are drums, the mookha veenay or clarionet, cymbals and toortty as bagpipe. The Teloogoos are less advanced than the Tamuls. A sketch account of the S. Indian musical system has been given at vol. I (103).——*Sangham* (संघ - sangha, San.). An assembly, especially of Booddhist [booddha] priests [sabhay, samauj, sangam].——*Sangharaumam* (सङ्घाराम - sangháráma, San.). From (sangha, san. assembly + aráma, san. garden). Same as Vihauram [q.v.].——*Sangraham* (संग्रह - sangraha, San.). From (sam, san. well + grah, san. to take). Epitome [sankshaipam].——*Sanjeevan* (சஞ்சீவன் - shañjívan, Tam.). From (sam, san. well + jíva, san. life); enlivening. Hindoo 2nd or pers. name [peyar]. Compare Sanjeevy.——*Sanjeevy* (సంజీవి - sanjívi, Tel.). From (sam, san. well + jíva, san. life); restorative. Applied to a revivifying medicament restoring from swooning or suspended animation, death, &c., and insuring long life; an elixir [amritam]. Proper name [peyar]. Long liver [chiranjeevy]. Priest of the Pariahs [q.v.].——*Sankhyay* (संख्या - sankhyá, San.). From (sam, san. well + khyá, san. to tell). Number; one of the seventeen qualities of the Neiyauyicans [nyauyam]. Sankhyah ganitam is algebra [beejaganitam].——*Sankshaipam* (सङ्क्षेप - sankshépa, San.). From (sam, san. well, together + kship, san. to throw). Abstract [sangraham].——*Sanscrit* (संस्कृत - samskrita, San.). From (sam, san. well + kri, san. to do), elaborated; language perfected by grammatical rules; also polished, elegant, embellished language. The classical language of the Bramins [q.v.]. See vol. I (52); II, 205, 209.—"*a*" The following declension of a noun and conjugation of two verbs show the similarity between Latin and Sanscrit and the dissimilarity between Latin and Tamul. "i" Noun "Father" (pater, Lat.; pitá, San.; appan, Tam.; patrem, Lat.; pitaram, San.; appanai, Tam.; patre, Lat.; pitrá, San.; appanál, Tam.; patri, Lat.; pitré, San.; appanukku, Tam.; patre, Lat.; pitus, San.; appanodu, Tam.; patris, Lat.; pitus, San.; appanudaiya, Tam.; patre, Lat.; pitari, San.; appanil, Tam.; patre, Lat.; pitah, San.; appané, Tam.; patres, Lat.; pitaras, San.; appanmár, Tam.; patres, Lat.; pitrín, San.; appanmárai, Tam.; patribus, Lat.; pitribhis, San.; appanmárál, Tam.; patribus, Lat.; pitribhyas, San.; appanmárukku, Tam.; patribus, Lat.; pitribhyas, San.; appanmárodu, Tam.; patrium, Lat.; pitrínám, San.; appanmárudaiya, Tam.; patribus, Lat.; pitrishu, San.; appanmáril, Tam.; patres, Lat.; pitaras, San.; appanmárgalé, Tam.). "ii" Verb "To be" (sum, Lat.; asmi, San.; irukkirén, Tam.; es, Lat.; asi, San.; irukkiráy, Tam.; est, Lat.; asti, San.; irukkirán, Tam.; sumus, Lat.; smas, San.; irukkiróm, Tam.; estis, Lat.; st'ha, San.; irukkirír, Tam.; sunt, Lat.; santi, San.; irukkirár, Tam.). "iii" Verb "To give" (do, Lat.; dadámi, San.; tarugirén, Tam.; das, Lat.; dadási, San.; tarugiráy, Tam.; dat, Lat.; dadáti, San.; tarugirán, Tam.; damus, Lat.; dadmas, San.; tarugiróm, Tam.; datis, Lat.; datt'ha, San.; tarugirírgal, Tam.; dant, Lat.; dadati, San.; tarugirárgal, Tam.).—"*b*" For the oldest Sanscrit literature see Vedam. The second large class of Sanscrit literature consists of the epic poems [mahabhaurat, ramayanam], pooraunams [q.v.], and tantrams [q.v.], which may be divided thus:—Epics. Pooraunic literature, containing first pooraunams, secondly stotrams and tracts connected with them, thirdly miscellaneous pooraunic works, abridgments, &c. Tantric literature, containing first tantrams, secondly digests and compilations. The third large class is modern Sanscrit literature, which may be divided thus:—"i" Technical literature, containing grammar [lacshanam], lexicography [nigantoo], prosody, rhetoric, music [sangeetam], dancing [nrityam], &c., architecture [stanpatyam], &c., medicine [veidyan], astronomy and astrology [jyotisham, vaunashastram]. "ii" Philosophy, containing Poorva mimaumsam [q.v.], Vedauntam [q.v.] or Oottara mimaumsam, which comprises the orthodox school [adweitam] of Shuncaracharry [shuncaran], the Vishishtaudweitam [q.v.] system of Ramaunoojan [q.v.], the Dweitam [q.v.] or school of Ananta teertan [madhwa], and the Sheiva [q.v.] system, Saunkhyam [q.v.] system, Yogam [q.v.] system, logical systems [tarcam], namely, the Nyauyam [q.v.] of Gowtaman [q.v.] and the Veishaishicam [q.v.] system, Booddhistic [booddha] and Jeina [q.v.] systems. "iii" Dharma shastram [q.v.], containing first original Smrities [q.v.], secondly digests, thirdly dissertations on special topics, such as Auchauram [q.v.], Caula nirnayam, Daunam [q.v.], Neety [q.v.], Prauyaschittam [q.v.], Vyavahauram [q.v.], Shrauddham [q.v.], &c. "iv" Cauvyam or artificial poetry and nautacams [q.v.] or drama, containing Maha cauvyams [q.v.], Cauvyams, including rhetorical compositions in prose, shatacams and anthologies, collections of popular tales [katay], and dramatic poems or nautacams [bhaushay].——*Santa* (సంత - santa, Tel.). From (sandhá, san. junction). Fair [chunda, melah, santey, shandy].——*Santapilly* (సంతపల్లె - santapalle, Tel.). From (santa, tel. fair + palle, tel. village). Otherwise Chantapully.

Village, Port; Vizagapatam dist., Bimlipatam tal., Magisterial division; pop. 907; lat. 18° 04′; long. 83° 42′; from Bimlipatam N.E. 18 miles; from Conauda N.E. 7 miles; from Madras N.E. 406 miles; from Vizagapatam N.E. 34 miles. Light on Santapilly hill, three-quarters of a mile inland; lat. 18° 04′ 11·03″; long. 83° 40′ 35·02″; white; fixed; 16 miles range; visible from all directions seaward; on a small basement on the top of a small hill with a small building by the side of the lantern on the west side; to warn off the Santapilly rocks, from which this light bears N.W. ⅝ W., distant 6½ miles.——*Santauna lutchmy* (सन्तानलक्ष्मी - santánalakshmí, San.). From (sam, san. well + tan, san. to stretch + lakshmí, san. the goddess). The goddess of lineage [ashta lutchmy].——*Santaunam* (सन्तान - santána, San.). From (sam, san. along + tan, san. to stretch).—"*a*" Meritorious act [dharmam] by which it is hoped to attain salvation [mocsham]. The seven are:—Construction of tanks, endowments of money for charitable purposes, performance of the sacred thread ceremonial to a Bramin [oopanayanam], construction of temple [coil, pagoda] dedicated to the supreme deity, plantation of topes [q.v.], writing of books, and digging wells.—"*b*" Also progeny, issue.—"*c*" In natural history an order. For category, see Padaurtam; for elementary substance, see Dravyam; for matter, see Bhootam; for organic and inorganic, see Indriyam and Anindriyam; for organic kingdom, see Ganam [jantoo, vricsham]; for organic class, see Vargam; for organic order, see present head; for organic family, see Coolam; for organic genus, see Jauty; for organic species, see Bhaidam. Oopa prefixed to either of the above means a sub-head. For inorganic minerals, see Dhautoo.——*Santey* (ಸಂತೆ - sante, Can. సంత - santa, Tel.; சந்தை - shandai, Tam.). From (sam, san. together + dhá, san. to hold). Market [chunda, melah, santa, shandy].——*Sanyausayyan* (சன்னியாசியய்யன் - shanniyásiyayyan, Tam.). From (sanyásí, san. ascetic + aiyyan, tam. master, titular affix). A composite Hindoo 2nd or pers. name [peyar].——*Sanyausy* (सन्यासी - sanyásí, San.). From (sam, san. completely + nyas, san. to throw up); abandoning world. Original meaning is one occupying the last of the four estates of a Bramin [aushramam]. An ascetic, who, renouncing all wordly affections and possessions, becomes legally dead. He is defined as one who performs no rite whatever, and appears sometimes in a state of nudity; who has renounced social life, with all its enjoyments and attachments, and subjected his passions; who lives on what is given him unasked, and remains in a village only one day, in a town not more than three days, and in a city only five; lest his mind become secularized. Menoo [q.v.] says:—"having performed "religious acts in a forest during the third portion of his life "[vaunaprastan], let a man become a sanyausy for the fourth "portion of it, abandoning all sensuous affections, and wholly "reposing in the supreme spirit [bramh]." In the present day the term is applied to various kinds of religious mendicants who wander about and subsist upon alms, generally devotees of Shiva [q.v.]. Asceticism is not at all a Dravidian idea. There is a Canarese proverb:—ಬೇಕು ಅಂದಾಕ್ಷಣ ನಾಕಾ ಸೇರುವನೇ—"can any one attain heaven by desiring it?" The tamul Cooral has the following:—அறத்தாற்றினில்வாழ்க்கையாற்றிற் புறத்தாற்றிற் போஒய்ப்பெறுவதெவன்—"what will he "who lives virtuously in the domestic state [illaram] gain by "going into the other state?" that is to say by becoming an ascetic [aram, matam]. Sanyausy is also Hindoo 2nd or pers. name; taken even by pariahs [peyar]. See vol. I (77).——*Sapindam* (सपिण्ड - sapinda, San.). From (above + pinda, san. sacrificial ball). An ancestor or descendant in the male line, and of the first, second, or third generation. These kinsmen are so called because they, and they only, are entitled to offer the pindam [q.v.] at a shrauddham [q.v.] to a deceased person.——*Sastanam* (सस्तन - sastana, San.). See sep. title.——*Saugaram* (सागर - ságara, San.; ساگر - ságar, Hind.). From (sagara, san. the myth. king); from tradition that sagaran and his descendants dug the ocean. Ocean. So any large sheet of water [samoodram]. Suffix in place names, indicating existence of a tank or other large sheet of water.——*Saulokyam* (सालोक्य - sálókya, San.). From (sa, san. with + lóka, san world); within sight and in the same place or sphere. Saulokyam, Saumeepyam, Sauroopyam, Sauyoojyam are the four states of bliss. Saulokyam is obtaining the happiness of being in the place of God; Saumeepyam, that of being near to God; Sauroopyam, that of bearing the image of God; Sauyoojyam, that of being identified with God, being absorbed into his essence [mocsham]. See vol. I (88).——*Saumagree* (सामग्री - sámagrí, San.). From (sam, san. together + ang, san. to go round). Apparatus.——*Saumantan* (सामन्त - sámanta, San.). From (sam, san. with + anta, san. border); on all borders, neighbouring. West coast chief. Eight are specified:—Calicut, Colattiry, Cooroombranaud, Nedoonganaud, Travancore, Valavanaud, Vimbalanaud [vembanaud], Wonanaud.——*Saumaunyam* (सामान्य - sámánya, San.). From (samána, san. common). Community; one of the seven padaurtams [q.v.] or categories of the Neiyauyicans [nyauyam]. The other six are dravyam or substance, goonam or quality, carmam or act, vishaisham or particularity, samavauyam or co-inherence, and abhauvam or non-existence.——*Saumbamoorty* (சாம்பமூர்த்தி - shámbamúrtti, Tam.). From (sa, san. with + ambá, san. párvati + múrti, san. form); shiva with parvaty [ardhanaury]. Hindoo 2nd or pers. name [peyar, saumban, saumbashivan].——*Saumban* (साम्ब - sámba, San.). From (sa, san. with + ambá, san. párvatí). Shiva [saumbamoorty, saumbashivan].——*Saumbashivan* (சாம்பசிவன் - shámbasivan, Tam.). From (sa, san, with + ambá, san, párvatí + shiva, san. shiva) [ardhanaury]. Hindoo 2nd or pers. name [peyer, saumbamoorty, saumban].——*Saumbayyan* (சாம்பய்யன் - shámbayyan, Tam.). From (sámba, san. shiva with párvatí + aiyyan, tam. master), shiva, the master. Hindoo 2nd or pers. name [peyar].——*Saumeepyam* (सामीप्य - sámípya, San.). From (samípa, san. nearness). Proximity to the deity; state of beatitude [mocsham, saulokyam]. See vol. I (88).——*Saunkhyam* (सांख्य - sánkhya, San.). From (sankhyá, san. numbering). The name arises from its enumeration of entities [tatwam]. One of the six ancient Braminical systems of philosophy [darshanam]. The reputed author was Capilan, a bramin, of whose history nothing is known.—"*a*" It offers no explanation of the existence of the soul [autmam], but all other existences, including mind and intellect as well as the material world, it derives from a rootless germ called pracrity [q.v.]. Beginning with this original eternal germ or element, it reckons up synthetically various other Tatwams [q.v.] or entities, which are productions of the first.—"*b*" The root and substance of all things except soul is the Pracrity. It is no production. Seven things produced by it are also producers. Thence come sixteen productions. Soul, the twenty-fifth essence, is neither a production nor producer. That is to say from an original Pracrity, variously called Moolapracrity or root-principle, Amoola moolam or rootless root, Pradhaunam or chief one, Avyactam or unevolved evolver, Bramham or supreme, Mauyay or power of illusion, seven other producers are evolved, and as so evolved are regarded as Vicaurams or productions.—"*c*" The first production of the original producer is Booddhy, commonly called intellect or intellectual perception, or otherwise Mahat from its being the great source of the two other internal faculties, Ahancauram and Manas or self-consciousness and mind. Third in order comes this Ahancauram, the I-making faculty, that is, to say self-consciousness or the sense of individuality, which produces the next five principles, called Tanmautrams or subtle elementary particles, out of which the grosser elements Maha bhootam are evolved. These Tanmautrams nearly correspond to the πρῶτα στοιχεῖα of Plato.—"*d*" The above eight constitute the producers, then follow the sixteen that are productions only.—"*e*" First in order, as produced by the Tanmautrams, come the five grosser elements [bhootam]:—Aucausham, ether, with the distinguishing property of sound, or, in other words, the substratum of sound, which sound is the vishayam or object for a corresponding organ of sense, the ear. Vayoo, air, with the property of tangibility, which is the vishayam for the skin. Tejas or jyoty, fire or light, with the property of form or color, which is the vishayam for the eye. Aupas, water, with the property of savour or taste, which is the vishayam for the tongue. Pritivy or bhoomy, earth, with the property of odour or smell, which is the vishayam for the nose. Each of these elements after the first has also the property or properties of the preceding besides its own. Aucausham must not be exactly identified with the modern ether, though this word is usually taken as its nearest possible equivalent. In some of its properties and functions it more corresponds with the inane, vacant space, of Lucretius.—"*f*" Next follow the eleven organs [indriyam] produced, like the Tanmautrams, by the third producer Ahancauram, viz., the five organs of sense, the five organs of action, and an eleventh organ standing between these two sets, called manas the mind, which is an internal organ of perception, volition, and action.—"*g*" The eight producers then, with the five grosser elements, ether, air, fire, water, earth, and with the eleven organs, form the true elements and constituent substances of the phenomenal world. As however the most important of the producers after the mere unintelligent original germ is the third, called Ahancauram, self-consciousness or individuality, it may be held that according to the Saunkhyam view the whole world of sense is practically created by the individual Ego, who is nevertheless quite distinct from the soul, as this soul is supposed to possess in itself no real consciousness of separate individuality, though deluded by it. This idea of personal individual creation is what chiefly distinguishes the Saunkhyam from the pantheism of the Vedauntam [q.v.], which denies all real personal individuality.—"*h*" It should also be noted that, according to the Saunkhyam theory, Pracrity, though a subtle elementary essence, is yet to be regarded as consisting of three ingredients or constituent principles in equipoise, called Goonams [q.v.]. These are Satwam [q.v.], Rajas [q.v.] and Tamas [q.v.], goodness or purity, passion or activity, and darkness or ignorance.—"*i*" The Saunkhyam creed has never been known in South india except to the studious; mention of it or fragments of it is found in books, but no one professes it [matam]. See vol. I (74).——*Saunnidhyam* (सान्निध्य - sánnidhya, San.). From (sannidhi, san. proximity). Nearness, the divine presence.——*Saurangy* (سارنگی - sárangí, Hind.). From (sa, san. with + ranga, san. color); variegated, spotted. The native fiddle, with five wires, played with bow. European fiddles are largely superseding

[sangeetam].——*Sauraty* (சாரதி - shárathi, Tam.). From (sárat'hi, san. charioteer). Hindoo 2nd or pers. name [peyar]. Paurtasauraty is Krishnan [q.v.] as the charioteer of Arjoonan [q.v.].——*Sauroopyam* (सारूप्य - sárúpya, San.). From (sa, san. same + rúpa, san. form). Assimilation to the deity; a state of beatitude [mocsham, saulokyam]. See vol. I (88).——*Saushtaungam* (साष्टाङ्ग - sáshtánga, San.). From (above + ashta, san. eight + anga, san. limb). Whole body. Saushtaunga namascauram is salutation so as to touch the ground with the eight parts of the body; the two hands, two feet, two knees, the breast, and the forehead [maryauday, namascauram].——*Sautchy* (साक्षी - sákshí, San.). From (above + aksh, san. to see). Evidence, so a witness [pramaunam, shahidy].——*Sauyanam* (सायन - sáyana, San.). From (sa, san. with + ay, san. to go). Tropical celestial longitude, with double meaning according as theoretical or practical.—"*a*" The longitude of a celestial body in the european system is the arc [chaupam] of the ecliptic [craunty mundalam] lying between the vernal equinoctial point [maishauyanam] and the point where a circle of celestial latitude so called passing through the object cuts the ecliptic; a circle of celestial latitude meaning a great circle drawn from the pole of the ecliptic to any point on the ecliptic; celestial longitude is reckoned in the order of the signs [raushy]; it is movable or tropical, that is to say subject to the increments of precession [ayanaumsham, craunty pauta gaty, madhyama sowra maunam].—"*b*" In theoretical hindoo astronomy Sauyanam is exactly the same as above, that is to say reckoned by taking great circles proceeding from the pole of the ecliptic as intercepting circles [rishy raikhay]. The recognition of this method is rare in the shastrams. However it is indicated in the following rough translation of a passage in the comparatively modern Siddhaunta saurwabhowmam of Mooneeshwaran, the commentator of Bhascara charry, where he quotes from a more ancient Siddhaunta soondaram:—" A tube, adapted to the summit of a gnomon, is "directed towards the star on the meridian; and the line of the "tube, pointed to the star, is prolonged by a thread to the "ground; the line from the summit of the gnomon to the base is "the hypothenuse, the height of the gnomon is the perpendicular, "and its distance from the extremity of the thread is the base of "the triangle; therefore, as the hypothenuse is to its base, so is "the radius to a base, from which the sine of the angle and "consequently the angle itself are known; if it exceed the "latitude the declination is south, or if the contrary it is north; "the right ascension of the star is ascertained by calculation from "the hour of the night, and from the right ascension of the sun "for that time; the declination of the corresponding point of the "ecliptic being found, the sum or difference of the declinations, "according as they are of the same or of different denominations, "is the distance of the star from the ecliptic; the longitude "of the same point is computed; and from these elements "with the actual precession of the equinox may be calculated "the true longitude of the star, as also its latitude on a "circle passing through the poles of the ecliptic."—"*c*" In practical hindoo astronomy however, while the ecliptic is still taken as the line of measurement, the intercepting circles are great circles from the pole of the equator, otherwise meridian circles, which fall upon the ecliptic thus at an angle and not perpendicularly [golayantram]. In the former case the longitude is called aspootam or invisible, in the latter case it is called spootam or visible. This is the same as european Right ascension, except that the distances are measured along the ecliptic instead of along the equator.—"*d*" The difference between the two sorts of longitude is large, being equal to the whole base of a right angled triangle, and it becomes larger the greater the distance from ecliptic. For terrestial longitude see Deshauntaram.—"*e*" Fixed celestial longitude or Dhroovacam [q.v.] is the same as Sauyanam in all respects in its two senses, except that it disregards precession and reckons from an assumed fixed sidereal point. All the recorded longitudes in hindoo astronomical books are Dhroovacams, or in other words they are sauyanams which once made have never been corrected for precession; add to this the fact above-mentioned that they are all from the pole of the earth which is constantly shifting and not from that of the ecliptic, and it will be understood how difficult it is to locate the stars indicated by the shastrams. It is generally assumed that the longitudes of extant shastrams were reckoned from the equinoctial point of the Hamel epoch [madhyama sowra maunam, g], when the pole was between 17 and 18 degrees from its present position and stood somewhat beyond the star near the ear of the Giraffe; and with these data some approximations are made to the facts. However among the hindoos themselves at any rate the stars pertaining to the different mansions, &c., are really identified by tradition only.—"*f*" For celestial latitude see Vicshaipam. There too there is a theoretical from the pole of the ecliptic and a practical from the pole of the earth. However the difference there is not so great, being only the difference between the hypothenuse and the perpendicular of a right-angled triangle.——*Sauyoojyam* (सायुज्य - sáyujya, San.). From (sa, san. with + yuj, san. to join). Absorption into the deity [mocsham, saulokyam]. See vol. I (88).——*Savah* (సవా - savá, Tel.). From (saha, san. along with + pávu, tel. a fourth). One and one-fourth. Liquid measure [alavay, 4b]. Approximate actual value, 1 savah = 15 oz. 10 $\frac{4}{9}$ drs. avoir. $\frac{5}{4}$ of a cutcha seer, though not used with that value. Bellary, for ghee [q.v.]. Compare Mal. nauzhy, Tam. oyak.——*Shakkalatty* (சக்களத்தி - shakkalatti, Tam.). From (saha, san. with + kalatra, san. wife), joint wife. Rival wife. Plant second term, meaning like but inferior. Ex., where transl. is of first term:—Hydrolea zeylanica (ponnángannisakkalatti), alternanthera sessilis; Oldenlandia dichotoma (imbúrarchakkalatti), oldenlandia umbellata. See gloss. paragraphs.——*Shalagram* (शालग्राम - shálagráma, San.). From (sa, san. with + ala, san. ring + gráma, san. multitude). A fossil with the impression of ammonites having mystic virtues, found in certain rivers, especially connected with Veishnava [q.v.] doctrine. Akin to the eagle stone [q.v.] of the ancients. The principal sorts are the Lutchmy narayany, the Vaumanam, the Daumodaram, the Narsingam, &c. Their abundance in the beds of mountain torrents has been long known. They are used in propitiatory oblations to Vishnoo [q.v.], as well as in funeral [shoodcaud] and other ceremonies. They are black, mostly rounded, and are commonly perforated in one or more places by worms, or, as the Hindoos believe, by Vishnoo in the shape of a reptile. According to the number of perforations and of spiral curves in each, the stone is supposed to contain Vishnoo in various characters. The possessor of a shalagram preserves it wrapped in clean cloth. It is frequently perfumed and bathed [abhishaicam]; and the water thereby acquiring virtue is drunk, and prized for its sin-expelling property. It is always placed near persons when they are about to die. A garden or plantation is consecrated by the Hindoos by marrying the shalagram stone carried by one man to represent the bridegroom, to a branch of the toolsy [q.v.] tree carried by another to represent the bride. After this consecration, the fruit can be eaten. As Vishnoo [q.v.] is represented by this stone, so Shiva [q.v.] is represented by a small oval agate [akeek], and Vigneshwaran [q.v.] by a globular cornelian [akeek i soorkh]. There is a Tamul proverb:—கங்கையிலே பிறந்த நத்தை சாலக்கிராமம் ஆகாது—"a snail of the "ganges is not a shalagram." See vol. I (77).——*Shandy* (సంత - santa, Tel.; சந்தை - shandai, Tam.). From (sandhá, san. junction). A fair [chunda, melah, santa, santey].——*Shaurang* (शारङ्ग - sháranga, San.). From (saha, san. with + ranga, san. color). Means variegated in color. Spotted cloth. Term for chintz [q.v.], once employed in the Northern circar [q.v.] trade.——*Soohely* (സുഹേലി - suhéli, Mal.) [sahely]. Means companion. Island; Malabar district. One of the Laccadives, still uninhabited.——*Sundhy* (சந்தி - shandi, Tam.). From (sam, san. together + dhá, san. to put). Angle, juncture. Combination of words in grammar [lacshanam]. In Sanscrit all contiguous vowels are combined or changed, so that hiatus is unknown. In Tamul and Canarese, and generally in the Dravidian languages, hiatus between contiguous vowels is prevented by the use of v or y. Vowels are rarely combined or changed in the Dravidian languages, as in Sanscrit, except in the case of compounds which have been borrowed directly from Sanscrit itself; nor are final vowels elided in these languages before words commencing with a vowel, with exception of some short finals, which are considered as mere vocalisations. The rule of Tamul, which in most particulars is the rule of Canarese also, is that v is used after the vowels a, u, and o, with their long vowels, and au, and that y is used after i, e, with their long vowels and ei. Compare in Greek *συν* with *γνώμη* becoming *συγγνώμη*. *εν* with *λάμπω* becoming *ἐλλάμπω*. Compare in Latin with rogo becoming irrogo; rego making in the perfect not regsi but reksi contracted orthographically into rexi. See vol. I (52).——*Sundhyaumsham* (सन्ध्यांश - sandhyámsha, San.). From (sandhyá, san. twilight + amsha, san. part). The period which follows a yoog [q.v.].——*Sundhyauvandanam* (सन्ध्यावन्दन - sandhyávandana, San.). From (sandhyá, san. twilight + vand, san. to adore). Religious ceremonies performed at stated periods in the course of the day; as morning at sunrise, noon, and evening at sunset [sooryan, sundhyay]. There is a Tamul stanza from Shiva vaucyam [q.v.]:—நீரை யள்ளிநீரில்விட்டு நீர்நினைந்தகாரியமாரையுன்னி நீரெல்லாமவத்திலேயி றைக்கிநீர்வேரையுன்னி வித்தையுன்னி வித்திலேமு ளைத்தெழுந்த சீரையுன்னவல்லிராய் சிவபதங்கள்சே ரலாம்—"while taking up the water and throwing it again into "the water, what is the object on which you think? on whatever "you think you have thrown all the water vainly. Think on the "root, think on the seed and on the benefit arising from that "seed; when you are thus able to think, you may approach "the feet of God". For daily prayers of mahomedans see Namauz and Salaut.——*Sundhyay* (सन्ध्या - sandhyá, San.). From (sam, san. together + dhá, san. to place). Either sunrise, noon, or sunset [sooryan]. So twilight. So figuratively the name of the period preceding a yoog [q.v.]. This is equal to $\frac{1}{8}$th part of the same; the sundhyay of bramha [q.v.] consists of 1,728,000 solar sidereal years; the same duration as the krita [q.v.] or satya [q.v.] yoog, which quantity is used in its double capacity for constructing the calpam [q.v.]. Sundhyay or twilight is also personified as the daughter of Bramha [q.v.]. From the peculiar indications of twilight mundane effects are predicted in astrology [jyotisham, yaunashastram]. These indications are derived from animals, birds, the wind, the halo, the parhelion or mock-sun, the parigham or appearance in the

sky of the shape of an iron bar, the abhravricsham or appearance resembling a tree in shape assumed by the clouds, the rainbow, the gandharvanagaram [q.v.], the solar rays, the dandam or appearance in the sky resembling a club, dust clouds as to their gloss and color, &c.——*Sundhy veety* (सन्धिवीथि - sandhivít'hi, San.). From (sandhi, san. junction + vít'hi, san. street). Street [veety].——*Sundoor* (ಸಂದೂರು - sondúru, Tel.). See sep. title.

SABDARIFFA (سبدریفه - sabdarífah, *Hind.*). From turkish. Same as Red-hemp bendy.

SABZ (سبز - sabz, *Hind.*). From Persian. Green.——*Sabjah* (سبزه - sabzah, Hind.). Green leaves of cannabis sativa [kinnab], from which Bhang [q.v.] is made.——*Sabjee* (سبزی - sabzí, Hind.). Same as Bhang.

SACA (शक - shaka, *San.*). From (shak, san. to be able) [shac]. Dynasty [raj]. So era, epoch; especially that of shalivahanan [q.v.]. The following are the different South indian eras. See vol. I, 609.——*Brihaspaty chuckram* (बृहस्पतिचक्र - brihaspatichakra, San.). Means jupiter's cycle. Cycle of sixty years approximating to solar years. This cycle is constructed on the hypothesis that revolution [bhaganam] of the planet [graham] Jupiter [brihaspaty] is equal to twelve of the cycle years, and consequently five of his revolutions to sixty of the cycle years. These kind of years are no longer used as an immediate measure of time; but as each of them bears a specific name, they serve for giving a particular designation to every solar [varsham] and luni-solar year [samvatsaram] during its scope of sixty years, after which the series begins anew in the same order. In Northern india, when astronomers compute the succession of these years, they refer still to the revolutions of the planet; in consequence of which one year is expunged every eighty-sixth solar year. The Dravidian astronomers make no difference between the Brihaspaty and solar years, and consequently expunge nothing; so that their years correspond to a different point of the cycle, or Chuckram [q.v.], and bear a different name. For the planet and the years of the cycle see Brihaspaty.——*Collam* (കൊല്ലം - kollam, Mal.). From the town [collam, quilon]. Called also Aundoo. Modern form of the Parshooraman [q.v.] cycle. The collam era commenced originally on 25th August 825 A.D. when the second cycle of Parshooraman era ended; but local circumstances have introduced a change in the initial day of the year. As there are two Collam towns, so there are two different dates on which the malayalies begin the year under this era. In the north, the year begins on 1st of Cunny [mausam] or September 15 when the sun enters Virgo [canya, raushy, soomboola]; in the south on 1st of Chingom or August 15 when the sun enters Leo [asad, simham]. This change in the initial day is accounted for in many ways:—"*a*" As referring to the foundations of the two towns, north and south.—"*b*" As indicating the dates of acquiring independence by rulers of the Colattiry [q.v.] families of north and south.—"*c*" As indicating the dates on which Shuncaracharry [shuncaran] introduced Vedantism in the north and south.—"*d*" As being the date of Wonam [q.v.], taken in one case in one year, and in another case in another year; this and either of the three explanations preceding may be identical.

——*Graha parivritty* (ग्रहपरिवृत्ति - grahaparivritti, San.). From (graha, san. planet + parivritti, san. revolution). Era of ninety solar years, used in Southern districts. Constructed of the sum of the products in days, of fifteen revolutions [bhaganam] of Mars [coojan, mungalan], twenty-two of Mercury [boodhan], eleven of Jupiter [brihaspaty], five of Venus [shoocran], twenty-nine of Saturn [shany], and one of the Sun [sooryan]. Its epoch is A.A.C. 24. Its years vary by a few hours.——*Hijra* (هجری - hijrí, Hind.). From (hijr, ar. separation); flight of mahomed from mecca to medina to escape persecution, from which the era dates. An era followed by the Mahomedans all over the world. Its years are lunar [chaundramaunam, cumree], and of 354 and 355 days according as they are common or intercalaries [nasee]. It has a cycle of 30 years, eleven of which are always of 355 days. Its epoch is here the 16th July 622, but according to most Arabian astronomers the 15th of the same month.——*Parshooraman* (परशुराम - parashuráma, San.). From (parashu, san. axe + ráma, san. the hero). Called also Aundoo. Reckoned in cycles of 1,000 years; each of which begins on the sun's entrance [sancramanam, sancraunty] in the sign [raushy] Canyay [q.v.] ♍, Indian Virgo. Began B.C. 1176. The first cycle ended 176 B.C.; the second 825 A.D.; and the third should have ended A.D. 1825. But the termination in the last case was neglected and the following year was reckoned 1,001 instead of one. For initial month date see Collam. To find the year subtract 824 from the year of Christ. Used from Mangalore to Cape comorin.——*Shalivahanan* (शालिवाहन - shálivâhana, San.). From (sháli, san. the saul tree + váhana, san. vehicle). A celebrated king, descendant of Vicramadityan [q.v.]. His capital was Pratishtaunam on the Godavery. The era, Shalivahana saca, dates from A.D. 78. It is still commonly used in the Deccan [q.v.]. Often called simply Saca. The Saca year is a solar year [madhyamasowramaunam, mausam]. The beginning of the era is possibly the date of the expulsion of the Bramins from the Magadha kingdoms; as their forefathers dated the beginning of the Kaliyoog [q.v.] from some previous historic event. The era still exists in Baly; and nominally in Java, but there, in consequence of the adoption of lunar [chaundramaunam] time in A.D. 1633, the years no longer correspond. To find the year of Shalivahanan subtract 78 from the Christian year.——

——*Vicramadityan* (विक्रमादित्य - vikramáditya, San.). From (vikrama, san. prowess + áditya, san. sun). Titular name of a king at Ojjein. An era was formed in his reign; sometimes termed the Samvat [q.v.] era. The era is more generally used with lunar [chaundramaunam] time. To find the year of Vicramadityan, add 56 years to the year of Christ. In the northern parts of India, instead of numbering the luni-solar [chaundramaunam] years from the beginning of the Kaliyoog [q.v.], the Hindoos count them from the accession of Vicramadityan. This denomination however makes no difference in the construction of the luni-solar year.——*Vypeen* (പുതുവെപ്പ് - putuveppu, Mal.). Portuguese corruption of malayalam. Mal. from (putu, mal. new + veppu, mal. deposit). An era near Cochin. It dates from A.D. 1341, the year in which the new island Vypeen was formed by deposit of sand and silt between the mouths of the Cranganore and Cochin rivers, or in which perhaps this island was first inhabited.

SACALAUT (سقلات - sakilát, *Hind.*). From (sikiliya, ar. sicily); which during the arab domination had a large cotton [q.v.] and silk [puttoo] manufacture. Woollen stuff, particularly European broadcloth. Chaucer uses it, spelt Checklatoun.

SACK TREE (वल्कलवृक्ष - valkalavriksha, *San.*; चांदोड - chándóda, *Mahr.*; करवट - karavata, *Conc.*; چنڈال - chandál, *Hind.*; ಬೈರಿಮರ - bairimara, *Can.*; നെട്ടാവിൽ - nettávil, *Mal.*; රිටි - riti, *Singh.*; நெட்டாவில் - nettávil, *Tam.*). Title from use of bark as clothing. San. from (valkala, san. garment of bark + vriksha, san. tree); bark used by hill tribes for clothing. Mahr. from (chánda, mahr. moon + vada, mahr. ficus bengalensis, linn.), from white bark and fruit-like fig. Conc. means bitter. Mal. from (netu, mal. tall + ávil, mal. cæsalpinia bonducella, flem.). Tam. from malayalam. Can. also (sággurí), meaning the sack bark tree. Mal. also (arayáññali), meaning half + artocarpus hirsuta, lamk. Tam. also (alli), probably from shining dark gum; known on anamullays; (pattaimaram), meaning bark tree. Title otherwise Bark tree, Half wild jack, Malay arrow poison tree, Sacking tree, Tall bonduc, Upas tree. Botanically Antiaris saccidora, dalz., artocarpaceæ [vricsham, 122]. Alias Antiaris toxicaria; Lepurandra saccidora. Large tree found on west coast, but native of java; runs to 100 feet; bark pale and smooth; leaves alternate, ovate oblong, acuminate, entire, glabrous above, slightly villous beneath; capitule axillary, aggregated; drupe, shape and size of a small fig [atty], covered with purple down; flowers in rains and ripens fruit in january. On wounding fruit a milky viscid fluid exudes, which shortly hardens, becoming of a black and shining color and of the consistency of bees' wax [mom]; the inner bark is composed of very strong tenacious fibres. The nuts intensely bitter, contain an azotised principle; the upas poison is prepared with this juice, mixed with chilly [q.v.] seed and other aromatics; the poison acts first as a purgative and emetic, then as a narcotic causing death by violent fits of tetanic convulsions; plant gives to pharm. bark and seeds, non-officinal. The hill-tribes strip the bark into large pieces, soak it in water, and beat it well, when it becomes white and furry; in this state they use it as clothing and for sacks; a white resin [raul] used for poisoning arrows. Wood soft and of no value. No other species here.

SACRIFICE (बलि - bali, *San.*). Prefix.——*Sacrifice grass* (कुश - kusha, San.). Title from use in sacrifices of bramins. San. from (ku, san. earth + shi, san. to strew); strewn on ground to sit upon during religious ceremonies. Same as Darbhay.——*Sacrifice rock* (വെള്ളിയാങ്കല്ല് - velliyánkallu, Mal.). Mal. from (velli, mal. white + kallu, mal. stone); from appearance. Can. name (bilikallúru), meaning white + stone + village. Greek λευκὴ νῆσος. Island; Malabar dist., Cooroombranaud tal.; lat. 11° 29′; long. 75° 34′; from Badagara S.S.W. 8 miles; from Tellicherry S. 18 miles; from Calicut N.N.W. 23 miles. Small steep rocky island opposite Cottacull, whitish in appearance, and 40 feet high, lying six miles off the coast. So called from having been the scene of sacrifice of crew of an English ship by pirates at beginning of seventeenth century. Has 12 and 13 fathoms close to it, 16 fathoms 2¾ miles outside, 10 fathoms within it, to 7 fathoms about midway between it and mainland in a very good channel. Ships passing through inside channel ought to give point a berth of 3 miles by borrowing towards the rock. Passing outside in the night, ships should not come under 16 or 17 fathoms water. Famous for edible birds' nests.

SADAF (मुक्तामाता - muktámátá, *San.*; صدف - sadaf, *Ar.*; سیپی - sípí, *Hind.*; ಮುತ್ತುಚಿಪ್ಪು - muttuchippu, *Can.*; ముత్యపుచిప్ప - mutyapuchippa, *Tel.*; മുത്തുചിപ്പി - muttuchippi, *Mal.*; முத்துச்சிப்பி - muttuççippi, *Tam.*). San. from (muktá, san. pearl + mátá, san. mother). Can. from (muttu, can. pearl +

chippu, can. shell). Tel. from (mutyamu, tel. pearl + chippa, tel. shell). Mal. from tamul. Tam. from (muktá, san. pearl + shippi, tam. shell). Mother-of-pearl [chippy, moty].

SADAUF (ब्राह्मी - bráhmí, *San.*; सदाब - sadába, *Mahr.*; فيجن - faijan, *Ar.*; سداب - sadáb, *Pers.* and *Hind.*; سداف - sadáf, *Dec.*; سدب - sadab, *Malay*; ಹಾವ್ರನಂಜಿನಗಿಡ - hávunanjinagida, *Can.*; ಸದಾಪು - sadápu, *Too.*; సదాపు - sadápa, *Tel.*; സോമരായം - sómaráyam, *Mal.*; අරුදා - arudá, *Singh.*; அர்வதா - arvathá, *Tam.*). Title from deccany. San. from (brahma, san. holy). Ar. connected with greek. Can. from (hávu, can. snake + nanju, can. poison + gida, can. plant). Too. and Tel. from hindostany. Mal. from (sóma, san. moon + rájá, san. king). Tam. corruption from botanic name. San. also (sómalatá), meaning moon creeper [somam]. Ar. also (sadáb). Can. also (sudábu). Tel. also (arudu). Mal. also (arúta). Greek πήγανον. Title otherwise Herb grace, Mooncreeper [gandhaulee, somam], Rue. Botanically Ruta graveolens, linn., rutaceæ [vricsham, 32]. Alias Ruta angustifolia, chalepensis. Small shrubby plant; cultivated in gardens; hoary-green foliage, greenish yellow flowers; leaves very small, have peculiar strong odour, bitter nauseous taste, possessing considerable acrimony in fresh state, dissipated on drying. The leaves are medicinally stimulant, carminative, stomachic, antispasmodic and emmenagogue. Infusion; take of the rue leaves, dried, ten drachms; boiling water, one pint; infuse in a covered vessel for two hours, and strain. Tincture; take of the leaves, in coarse powder, ten drachms; proof spirit, ten ounces; macerate the powder for seven days in seven ounces of the spirit in a closed vessel, agitating occasionally; then transfer to a percolator, and when the fluid ceases to pass, continue the percolation with the remaining three ounces of the spirit, and add more, if necessary, to make ten ounces. Fresh juice; press out the juice by bruising the fresh leaves without water. Doses; of the infusion, from an ounce and-a-half to three fluid ounces; of the tincture, from one to three fluid drachms; of the fresh juice a tea to a dessert spoonful. Substituted for sp. ammon. aromat., ol. anisi, tinct. cascarilæ, tinct. valerianæ, and pil. rhei. co.

SADDLE BACK (वनछाग - vanachhága, *San.*; جنگلی بکرا - janglíbakrá, *Hind.*; ಕಾಡುಆಡು - káduádu, *Can.*; కొండగొర్రె - kondagorre, *Tel.*; വരയാട - varayátu, *Mal.*; வரையாடு - varaiyádu, *Tam.*). San. from (vana, san. wild + chhága, san. goat). Hind. from (janglí, hind. wild + bakrá, hind. sheep). Can. from (kádu, can. forest + ádu, can. goat). Tel. from (konda, tel. hill + gorre, tel. sheep). Tam. from (varai, tam. mountain + ádu, tam. sheep). Title otherwise Ibex, Neilgherry wild goat, Precipice goat, Steinbock. Hemitragus hylocrius, caprinæ, bovidæ, ruminantia, mammalia [sastanam, 23], of naturalists [jantoo]. Alias Kemas hylocrius, warrayato. Warrayato from malayalam. Adult male dark sepia-brown with a pale reddish-brown saddle, more or less marked, and paler brown on the sides and beneath; legs somewhat grizzled with white, dark brown in front, and paler posteriorly. The head is dark, grizzled with yellowish-brown, and the eye is surrounded by a pale-fawn colored spot. Horns short, much curved, nearly in contact at the base, gradually diverging; strongly kneeled internally, round externally, with numerous close rings, not so prominent as in himalaya species. There is a large callous spot on the knees surrounded by a fringe of hair, and the male has a short stiff mane on the neck and withers. The hair is short, thick and coarse. Length of adult to root of tail 4 feet 2 to 4 feet 8; tail 3 inches; height at shoulder about 32 to 34 inches; horns occasionally 15 inches, rarely more than 12. Found on the Neilgherry and neighbouring hills, extending south along the Western ghauts nearly to Cape comorin. It chiefly frequents the northern and western slopes, where the hills run down in a succession of steep stony slopes or rocky ridges to the high tableland of Mysore and the Wynaud. These animals have become very wary and it is difficult to shoot them.

SADER (صادر - sádir, *Hind.*). From (sadara, ar. to issue). Going.——*Saderwared* (صادرِوارد - sádirwárid, Hind.). From (above + wárid, ar. coming). Contingent charges for office stationery, oil, &c. There was a charge formerly levied on ryots [q.v.] for supplying the public cutcherry [q.v.] with these.——*Sadrahee* (صدر - sadr, Hind.; సదరహీ - sadarahí, Tel.). From (sadara, ar. to go back). Abovesaid.

SADKA (صدقه - sadakah, *Hind.*). From (sadaka, ar. to bestow from religious motives). Charitable offerings; or propitiatory offerings in the name of God [allah], had recourse to in order to get rid of any distemper. This is supererogatory, as opposed to zakaut [q.v.] which is obligatory.——*Sadaucat* (صداقت - sadákat, Ar.). From (sadaka, ar. to utter truth). Sincerity. Prefixed to an alam forms a lacab; as Sadaucat hoossain, term of devotion + alam [ism].——*Saudic* (صادق - sádik, Ar.). From (sadaka, ar. to be true). The upright; just. Lacab of the sixth Imaum. Common alam; as Saudic hoossain, double alam [ism].——*Siddeek* (صدیق - siddík, Ar.). From (sadaka, ar. to be true). Just. Title of Aboo bakr, Mahomed's companion and father-in-law. Common Mahomedan alam; as Siddeek ally, double alam [ism].——*Siddeeky* (صدیقی - siddíkí, Hind.). A class of Mahomedan sheikhs [q.v.], named after the Caliph [ism].

SADRAS * (சதுரங்கப்பட்டணம் - shathurangappattanam, *Tam.*). From (chatur, san. four + anga, san. military arms, viz., infantry, cavalry, elephant and cars + pattana, san. town). Sanscrit name (chaturangapattana), meaning same; also town of chatoorangan, an asooran of the place [seven pagodas]. Greek σοβούρας ἐμπόριον. The Tamul name is Sadooray, being abbreviation of sanscrit, altered by the Teloogoos to Sadrauz. Compare Madras. Village, Port; Chingleput dist., Chingleput tal.; pop. 1,395; acres 640; lat. 12° 31′; long. 80° 12′; from Arcot S.E. 62 miles; from Chingleput S.E. 17 miles; from Covelong S. 20 miles; from Cuddalore N. 62 miles; from Madras S. 40 miles; from Mercaunum N.E. 24 miles; from Sydapett S. 35 miles. On Coromandel coast, north of mouth of Palaur. The river has silted up and its bar cannot be crossed by seagoing ships. The coast is low and wooded, though inland three or four miles is a range of rugged hills of no great height, called the Sadras hills. Dutch established a settlement in 1647. Captured by the English in 1765, temporarily restored to the Dutch in 1818, and an English possession since 1824. Ruins of the brick fort of considerable extent and strength still remain close to the shore. There are also the remains of the houses of the officials, one of which has long been used as a halting place for European travellers. The old Dutch cemetery within the fort is still maintained in order under treaty. The oldest tombstone is dated 1679. There is a German lutheran mission church on the esplanade opposite the fort. Wesleyan mission have also a small settlement. Once famous for the fine muslin [q.v.] produced. There are still a few looms [tarry], but the skill is lost.

SAF (صف - saf, *Hind.*). Rank.——*Safder* (صفدر - safdar, Hind.). From (above + dar, pers. breaker). Breaker of the ranks. Lacab of Ally. Common alam; as Safder hoossain, double alam [ism].

SAFAR (صفر - safar, *Hind.*). From (sifr, ar. empty). Second Mahomedan month [maheena], so called because it was in this that the arabs used to vacate their houses and go to war. In this month the mahomedan festivals [eed] Teyrah teyzee [q.v.] and Aukhiry chahaur shamba [q.v.] occur.

SAFEE (صفی - safí, *Ar.*). Sincere friend. In composition makes a lacab; as Safee oollah, sincere friend of god. Title of Adam, now an ordinary alam [ism].

SAFFRON (कुंकुम - kunkuma, *San.*; केशर - késhara, *Mahr.*; कुंकुम - kunkuma, *Conc.*; درخت زعفران - darakhtizafrán, *Ar.* and *Pers.*; کیسر کا پیڑ - kesarkáper, *Hind.*; کیسرکا جہاڑ - kesarkájhár, *Dec.*; کمکما - kumkuma, *Malay*; ಕುಂಕುಮ - kunkuma, *Can.*; కుంకుమపువ్వుచెట్టు - kunkumapuvvuchettu, *Tel.*; കുങ്കുമം - kunkumam, *Mal.*; කොකුම් - kokum, *Singh.*; குங்குமம் - kungumam, *Tam.*). Title from arabic (zafrán), yellow. San. from sound of dried leaves. Mahr. means gold. Ar. from (darakht, ar. tree + zafrán, ar. saffron). Hind. from (késara, san. the plant + per, hind. tree). Dec. from (késara, san. the plant + jhár, hind. tree). Can. from sanscrit. Tel. from (kunkumapuvvu, tel. the drug + chettu, tel. plant). Tam. from sanscrit. San. also (agnishikha), meaning fire flame [bastard saffron, chitramoolam, wild bachnaug]; (bhavaraktá), meaning shiva's blood; (káshmírajanma), meaning produced in cashmere; cf. arabian costum; (késara), meaning gold [ilanjy, kamela, nauga champak, poison bamboo]. Hind. also (kumkumkájhár), meaning saffron + tree; (abír), meaning abeer powder. Malay also (zafron); (kungkuma). Can. also (kunkumakésari); (késari). Tam. also (turukkam), meaning red tree. Greek κρόκος. Title otherwise Common saffron, Crow saffron, Flame plant [flame tree], Gold plant, Saffron crocus, Shiva's blood. Botanically Crocus sativus, linn., irideæ [vricsham]. Alias Crocus autumnalis, hybernus, officinalis. Generic from Hebrew. Perennial bulbous plant, ½ a foot high; stigmas very long, reflexed, crenate at the end; flowers violet, flowering in september and october; much resembling the common spring crocus of gardens. Saffron prepared from the stigmas, with proportion of style, of flowers; when good has sweetish, penetrating, diffusive odour, taste little bitter, with warmth and pungency, color, deep-red; brought to india from seaports of red sea, persia, cashmere; very subject to adulteration. Ordinary article is called hay-saffron; if compressed into cakes it is called cake saffron, but all cake saffron is now practically from safflower [bastard saffron]. When taken internally in moderation, saffron as a medicine gives tone to stomach, strengthens circulation, favors functions of the skin, being stimulant and antispasmodic; taken in an over-dose, acts as narcotic poison and injures the brain and nerves; supposed to promote eruption of small-pox [ammay], keep off sea-sickness, relieve palpitation of the heart, induce sleep. Veidyans [q.v.] prescribe saffron in nervous affections, unattended with vertigo, and where there is no disposition to apoplexy; also in melancholia, hysteric depressions, and typhus fever; to women after child-birth, infusion administered to prevent fever, support spirits, and to assist in carrying off the lochia; external

application in ophthalmia, mixed with small portion of pounded, chebulic myrobalan [q.v.] and lime-juice [lime], and applied round eye. Gives to pharm. saffron, at present chiefly as a coloring and flavoring agent; officinal. Saffron is used as a condiment [chutney]. The stigmas contain a strong-scented volatile oil [yennay] and a rich yellow dye [shauyam] and are largely used by dyers and liquor-manufacturers; moollahs [q.v.] make ink [mashy, shye] with the dye with which they write charms. No other common species here. Saffron is a common plant first term; ex., where transl. is of second term:—Mallotus philippensis (kunkumadamara), tree; (kunkumapuvvuchettu), flower + tree; Phaseolus aconitifolius (kunkumapesara), phaseolus mungo; Rhynohocarpa fœtida (kunkumadonda), cephalandra indica. See gloss. paragraphs.——*Bastard saffron* (कुसुम्भ - kusumbha, San.; कुसुंबा - kusumbá, Mahr.; قرطم - kurtum, Ar.; شجرخسکدانه - shajarikhaskdánah, Pers.; کرڑ کا پیر - kararkáper, Hind.; کسم کا جہاڑ - kusamkájhár, Dec.; ಕುಸುಂಬೆ - kusumbe, Can. and Too.; కుసుంబా - kusumbá, Tel.; കസുംഭ - kusumbha, Mal.; செந்துருக்கம் - shendurukkam, Tam.). Title from resemblance of dried flowers. San. from (kus, san. to embrace); from flower used to dye clothes red. Mahr. from sanscrit. Pers. means saffron tree. Dec., &c., from sanscrit. Tam. from (shem, tam. red + turukkam, tam. crocus sativus, linn.). San. also (kamalóttara), meaning lotus, nelumbium speciosum, willd. + superior; (vahnishikha), meaning fire + flame [flame tree]; (mahárajana), meaning great dye. Ar. also (asfar), meaning yellow. Pers. also (muasfir), meaning saffron dyed; (shajarikájirah). Hind. also (kusam), meaning safflower. Can. also (kushibigida). Tel. also (kusuma) [champak]; (agnishikha) [saffron, chitramoolam, wild bachnaug]. Mal. also (chentúrakam), meaning red saffron. Tam. also (muttirukkañjedi), meaning spiny saffron. Greek κνῆκος, κνίκος. Title otherwise Coosambah, Coosam, Curdy oil plant, False saffron, Flame tree, Officinal carthamus, Parrot seed, Safflower, Sendoorkum. Botanically Carthamus tinctorius, linn., compositæ [vricsham, 74]. Generic from arabic. Annual, 1–2 feet; stem erect, cylindrical, branching near the summit; leaves oval, sessile, much acuminated, somewhat spiny; heads of flowers enclosed in a roundish spiny involucre; flowers large, deep orange. The fruits are about the size of barley [jow] corns, somewhat four-sided, white and shining like small shells [chunk]. The flowers contain two colored principles, one yellow, soluble in water, and of no use in dyeing; the other red, soluble in alkalies, and precipitable by acids from its alkaline solutions, this is carthamin. To prepare carthamin, safflower is first washed repeatedly with water to free it from the yellow substance, then treated with solution of carbonate of sodium, the liquid is saturated with acetic acid [sirkey ka tezaub] and pieces of cotton [q.v.] are immersed in it, on which the carthamin is deposited; after twenty-four hours the cotton is removed and treated with solution of carbonate of sodium, which redissolves the coloring matter; the solution is mixed with citric acid, whereby the carthamin is precipitated in red flocks; and lastly these flocks are dissolved in alchol; the solution evaporated in vacuo yields the carthamin in the form of a powder, having a deep red color with greenish iridescence; it is sparingly soluble in water insoluble in ether, but easily soluble in alcohol, yielding a fine purple solution. The dried flowers, which are like saffron, often adulterate that drug; fixed oil [yennay] from seed used in rheumatism and paralysis; seeds laxative, employed in dropsy. Poultry fatten on seeds. The light-yellow oil from seeds is used for lamps and for culinary purposes; the coloring matter of safflower attaches itself without a mordant [cauram]; it is chiefly used along with chay [chay root], for coloring cotton [q.v.], and produces various shades of pink, rose, crimson, scarlet, &c.; an alkaline extract precipitated by an acid [poolipp, tezaub], as lime-juice, will give a fine rose [gool] color either to silk [puttoo] or cotton [q.v.], but the results are not permanent; the coloring matter is not suitable to wool [pushm]; this dye forms the basis of rouge, which is a mixture of the dry carthamic acid and finely powdered talc [abruck]. Chinese safflower is superior to present article. No other common species here.——*Country saffron* (हरिद्रा - haridrá, San.; हळद - halada, Mahr.; کرکم - kurkum, Ar.; زرد چوبه - zardchobah, Pers.; هلد - halad, Hind.; هلدی - haldí, Dec.; کونتبا سر - kunitbásar, Malay; ಅರಸಿನ - arasina, Can.; ಮಂಜಲ್ - manjal, Too.; పసుపు - pasupu, Tel.; ହଳଦି - holodi, Oor.; മഞ്ഞൾ - maññal, Mal.; කහ - kaha, Singh.; மஞ்சள் - mañjal, Tam.). Title originally given by portuguese. San. from (hari, san. yellow + dru, san. tree). Mahr. from sanscrit. Ar. means saffron. Pers. from (zard, pers. yellow + chob, pers. stick). Hind. from sanscrit. Dec. from sanscrit [false calumba]. Mal. from (maññа, mal. yellow). San. also (káñchaní), meaning gold; (ranginí), meaning coloring; (varnavatí), meaning having color; (gaurí), meaning yellowish; (pítá), meaning yellow; (nishá), meaning night; (yóshitpriyá), meaning women beloved, used by all women; (krimighná), meaning insect killer. Ar. also (zarsúd); (arúkuzzafrán), meaning saffron root; (hashíshatussafrá), meaning yellow leguminous plant; (arúkussifr), meaning yellow root; (arúkussabbághín), meaning dyer's yellow root; (bakalatulkhatátíf), meaning potherb of swallows. Pers. also (dárzard), meaning yellow wood. Can. also (haladigida), meaning yellow + plant. Tel. also (pampi). Mal. also (maññakkúva), meaning yellow + curcuma. Singh. also (ratakaha), meaning foreign turmeric. Tam. also (arisanam). Greek κύπειρος ἰνδικὸς; Latin Cypria herba indica. Title otherwise Crocus indicus, Gold root, Haridrah, Huldee, Indian saffron, Manjal, Turmeric, Woman root, Yellow root. Botanically Curcuma [haridrah] longa, roxb, zingiberaceæ [vricsham, 144]. Alias Amomum curcuma. Curcuma from arabic. Perennial herb; leaves broad lanceolate, long-petioled; bulbs small, and with the palmate tubers inwardly of a deep orange color; flowers large, whitish, with a faint tinge of yellow, the tuft greenish white; flowering from july to september. The fresh root has an unpleasant smell, which goes off when it becomes dried; the dried roots or bulbs occur oblong, tough, externally yellowish gray, and internally of a deep yellow color, with an aromatic smell and a bitterish acrid taste; the coloring matter of the dried root is bright yellow, soluble in alcohol and water and changed to a deep red by alkalies [cauram]; the condiment and stem-powder turmeric is the old tuber boiled, dried in sun and rubbed to powder; the drug contains an essential oil [yennay] and a coloring matter called curcumin. Country saffron or turmeric is cultivated in black loam, or in red soil rich in decayed vegetable matter; ground prepared in south in maushy [mausam] or february; on coromandel in cheitram or april and veishaukham or may; on w. coast in vrishchicam or november; ground is ploughed four or five times then hand-hoed, furrows opened and tubers deposited; weeds cleared; water used once in ten days; manure [yeroo] applied; when matured, stems and leaves become yellow and decay; the tuber alone remain, below ground; ten months after sowing tubers are hoed out; the stem, &c., is then removed and the root is brought into store; produce brought to market generally a month or two after; average price before drying three pies and after drying one anna per lb. Turmeric root is medicinally a cordial and stomachic and is prescribed internally in diarrhœa; mixed with juice of the emblic myrobalan [q.v.] it is given in diabetes and jaundice; the juice of the fresh root is anthelmintic; the burnt root mixed with margosa [neem] oil applied to soreness in the nasal organs; powdered root a favorite application to recent wounds and bruises, leech-bites, &c.; also as a collyrium in ophthalmia; mixed with cow's urine an application in skin diseases; also for cleaning foul ulcers; gives to pharm. tubers, curcuma, officinal only as a chemical test for free alkalies. The starch of the young tubers forms one of the east indian arrowroots [coova]; old tubers one of the indispensable ingredient in curries [q.v.] Hindoo females who are not widows, grind turmeric and rub it over their bodies; similarly used by all at marriage ceremonies [calyaunam] and religious festivals [pundigay]; turmeric paper is unsized paper steeped in tincture of turmeric, and dried by exposure to the air, employed as a test for alkalies, which render it reddish or brownish. The rhizomes afford without a mordant [cauram] a yellow dye [shauyam] which is brilliant, but not permanent, with alkalies changes into a deep-red; this is used by the dyers in dyeing yellow and green; women dye the face with it; it makes in conjunction with lime-juice [lime], the veishnavites' yellow tirchoornam [q.v.], or perpendicular mark on foreheads [nammam]. Madras turmeric is considered the most showy of all kinds of turmeric. There is a Tamul proverb:—கையிலே மஞ்சள் ஆனால் காரியம் மஞ்சூர்தான்—"if the hands "are dipped in turmeric water, the undertaking will prove "successful." A wild turmeric grows in mysore. Turmeric is a common plant second term; ex., where transl. is of first term:—Berberis aristata (dárhald), wood; Berberis asiatica (maramaññal), tree; Berberis lycium (dárhald), wood; Bixa orellana (kurannumaññal), monkey; Coscinium fenestratum (jhárkíhaldí), tree; Costus speciosus (kúgaimañjal), meaning arrowroot; Curcuma zedoaria (ámbihaldí), spontaneous, (janglíhaldí), jungle, (kapúrhaldí), camphor; Morinda umbellata (maramañjal), tree; Rubia cordifolia (dárhald), wood. See gloss. paragraphs.——*Monkey country saffron* (केसरी - késarí, Mahr.; कुंकुमिफल - kumkumip'hala, Conc.; زعفرانجی - zafaránji, Hind.; شال کے پنڈو کا جہاڑ - shálkepandúkájhár, Dec.; کسمبا کلنگ - kusumbakling, Malay; ಭಂಗಾರಕಾಯಿಮರ - bhangárakáyimara, Can.; జాఫరాచెట్టు - jáp'haráchettu, Tel.; କଳାଗୁଲବସ - gúlbas, Oor.; കുരന്നുമഞ്ഞൾ - kurannumaññal, Mal.; කහ - kaha, Singh.; குரகுமஞ்சள் - kuragumañjal, Tam.). Title from red seeds like monkey's cheek. Mahr. from (késara, san. gold); from color of pulp of fruit. Conc. from (kumkuma, san. saffron, crocus sativus, linn. + p'hala, san. fruit); from color of fruit. Dec. from (shál, hind. shawl + pandú, hind. fruit + jhár, hind. tree); from soft spines of capsules. Malay from (kusumbha, san. safflower, carthamus tinctorius, linn. + kling, malay, telinga country). Can. from (bhangára, can. gold + káyi, can. unripe fruit + mara, can. tree). Tel. from (záfarán, hind. a light red tint + chettu, tel. tree). Mal. from (kurannu, mal. monkey + maññal, mal. turmeric, curcuma longa, roxb.). Singh. means saffron. Tam. from (kudakku, tam. west + mañjal, tam. turmeric), west coast turmeric. Mahr. also (shéndarí), meaning having color of red lead. Mal. also (kuppamaññal), meaning heap + turmeric. Tam. also (vennayviraiççedi), meaning butter + seed + plant; from soft pulp of fruit; (sháppiráviraiççedi), meaning light red + seed + plant. Title otherwise Anatto,

Anotta, Arnatto, Arnotta, Arnotto, Butter seed tree, Cheese dye tree, Cooppa manjal, Gold fruit tree, Heart-leaved arnotto, Kling saffron, Monkey huldee, Monkey turmeric, Roucou, Saffron tree, Shawl fruit tree. Botanically Bixa orellana, linn., bixineæ [vricsham, 14]. Alias Bixa americana. Generic is S. american name. Tree, 30 feet; leaves cordate-ovate, acuminated, entire or angular, smooth on both surfaces; sepals five, orbicular; petals five, capsule two-valved, prickly on the outside; seeds eight to ten attached to each placenta, surrounded by a red pulp; corymbs terminal, panicled; peduncles two to four-flowered. Panicles of numerous white or rose flowers with very numerous stamens, resembling large peach-blossoms [shaft auloo]; followed by green or red capsules furnished with soft spines, and enclosing seeds which have a covering of a deep orange coloring matter. American origin; naturalized, particularly on western coast. The orange-colored pulp hardens when dry, and being separated forms arnatto used for coloring; that of the naturalized indian plant is inferior to the west indian; arnotto dye is soluble in alkalies [cauram], by which means it is fixed to silk [puttoo] or wool [pushm]; when properly made it should be of a bright yellow color; the dye [shauyam] may be extracted from the seeds direct, or the pulpy matter may by boiling be separated from the seeds and made into cakes like those of lac [q.v.] or indigo [q.v.]; sometimes the coloring matter is mixed with oil before drying. The root-bark is medicinally antiperiodic and antipyretic, and the seeds slightly astringent and remedy for gonorrhœa; seeds also antiperiodic and antipyretic, but to less extent. For decoction of the root-bark; take of root-bark, in coarse powder, six ounces; water two pints and-a-half; boil on a slow fire till the liquid is reduced to one pint, and strain when cool. For tincture of root-bark; take of root-bark, in coarse powder, six ounces; proof spirit one pint; macerate for seven days with occasional agitation; strain and add more proof spirit to make one pint. Dose of decoction of root-bark is from two or four fluid ounces; of tincture, from two or four fluid drachms; and of root-bark powder from one to two drachms; doses of seeds are similar. Substituted for warburg's tincture and james' powder as an antipyretic; for quinine [koinah] and other alkaloids of cinchona [koinah] as an antiperiodic; for copaiba as remedy for gonorrhœa. Seeds are used in malabar as beads [munkah] in necklaces [maulay] by the moplah [q.v.] women and are called moollah [q.v.]; the dye imparts flesh or pale rose color to silk [puttoo] and cotton [q.v.], it is not very durable, and requires to be renewed from time to time; dye also used by milkmen to color butter and cheese, and by others for tinging oils [yennay], spirits and varnishes [rangh]; bark yields a good cordage [naar]. Wood good for producing fire by friction; pinkish-white, soft, even-grained. No other species here.——*Saffron wood* (బందారు - bandáru, Tel.). Title from color of wood. Same as Yellow cadamba.

SAG (سگ - sag, *Pers.*). Dog [nye]. Plant first term meaning wild or inferior. Compare:—Atropa belladonna (sagangúr), and Solanum nigrum (sagangúr); both meaning dog vine. See gloss. paragraphs.——*Sebesten* (سپستان - sapistán, Pers.). See sep. title.

SAGAPENUM (سکبینج - sakbínaj, *Ar.*; کندل - kandal, *Hind.*). Title from persian. Greek *σαγάπηνον*, Latin Sacopenium. Title otherwise Persian asafœtida. Botanically Ferula [baulhicam] persica, wight, umbelliferæ [vricsham, 67]. Perennial deciduous herbaceous plant, 2 feet high; leaves supra-decompound, many cut acute, decurrent; first umbel sessile; flowers yellow, flowering in july and august; native of persia. The gum [gond] is found in masses formed of soft, adhesive fragments, somewhat transparent, reddish-yellow externally, pale within, of waxy or brittle consistence; its odour resembles that of garlic [lussoon] and asafœtida [q.v.], its taste is hot, nauseous, and rather bitter; sometimes adulterated with bdellium [q.v.], gandafiroza [q.v.] and other similar gum resins [googal].

SAGLAIR (సగిలేరు - sagiléru, *Tel.* sagilér *). From (sagili, tel. richness + éru, tel. river). River; Kurnool and Cuddapah districts. Tributary of the Pennair. Rises among higher peaks of hills near Cumbum. Flows in a southerly course in a deep precipitous channel along a narrow valley under the Eastern ghauts [q.v.], draining the greater portion of Budwail and Sidhout talooks. Perennial. Not navigable in any portion.

SAGO (ساگو کا پیڑ - ságúkáper, *Hind.*; ساگو کا جھاڑ - ságúkájhár, *Dec.*; سگو - sagu, *Malay*; ಸಬ್ಬಕ್ಕಿ - sabbakki, *Can.*; - dzavvubiyyamu, *Tel.*; சவ்வரிசி - shavvarisi, *Tam.*). Title from malay. Hind. from (ságú, malay, sago + per, hind. tree). Dec. from (ságú, malay, sago + jhár, hind. tree). Can. and Tel. and Tam. mean sago rice. Hind. also (ságúdánah), meaning sago grain. Dec. also (ságúcháwal), meaning sago rice. Malay also (rámbiya). The farinaceous pith from stem of many plants, mostly palms [taur].——*Bastard sago palm* (सुरमाड - suramáda, Mahr.; बिर्लिमाद् - birlimád, Conc.; ماڑی - márí, Hind.; ماڑی کا جھاڑ - máríkájhár, Dec.; نیبونگ - nibung, Malay; ಬೈನಿ - baini, Can.; - índ, Too.; - kondajílugu, Tel.; - salopa, Oor.; - írampana, Mal.; - kitul, Singh.; கூந்தற்பனை - kúndarbanai, Tam.). Title from the pith of old trees producing a kind of sago. Mahr. from (surá, san. spirituous liquor + mádá, mahr. young tree). Tel. from (konda, tel. hill + jilugu, tel. the plant, æschynomene aspera, linn.). Mal. from (íram, mal. moist + pana, mal. palm). Tam. from (kúndal, tam. woman's hair + panai, tam. palmyra, borassus flabelliformis, linn.); from long pendulous spadix. Can. also (bagini); (painemara). Tel. also (máre); (jirugudu); (jirugu); (chirugu); (jiguru). Mal. also (chúntappana), meaning fishing hook + palm; its branches serve for fishing lines; (ánappana), meaning elephant + palm, from trunk being favorite food of elephant. Tam. also (írambanai), meaning moist + borassus flabelliformis, linn.; (udalimbana). Title otherwise Bynee, Coondalpanay, East indian wine palm, Elephant's palm, Fishing line palm, Four-leaved caryota, Ghaut palm, Jaggery palm, Kittal, Malabar sago, Stinging palm, Toddy palm, Torn-leaved caryota, Woman's hair palm. Botanically Caryota urens, linn., palmaceæ [vricsham, 149]. Trunk erect, 50–60 feet, slightly marked with the cicatrices of the fallen leaves; leaves pinnate; leaflets sub-alternate, sessile, obliquely præmorse, jagged with sharp points; spathe many-leaved; spadix pendulous, 6–16 feet long; branches covered with innumerable sessile flowers, regularly disposed in threes, one male on each side, and a single female between them; male calyx three-leaved; petals three, larger than the calyx, greenish outside; female flowers on the same spadix, with the calyx and corolla as in the male; flowering in december, march; fruit or berry roundish, one-celled, size of a nutmeg [jautikye], covered with thin yellow bark; seed or nut solitary, dark colored, oval. The rind of fruit is very acrid, and if applied to the tongue will produce a burning sensation, hence specific name. Yields more toddy than any other palm, as much as a hundred pints in twenty-four hours. Most easily cultivated and abundant. The toddy [q.v.] and arrack [q.v.] are well adapted for pharmaceutical purposes. The pith furnishes an inferior kind of sago, which is made into bread and boiled as a thick gruel; the trunks are favorite food of elephant [q.v.]; jaggery [q.v.] from the sap; fruit used as masticatory [charvanam]. Fibre from the sheathing petiole used for fishing-lines and bow-strings, the indian gut of english market; it is strong and durable, and will resist for a long time the action of water, but is liable to snap if suddenly bent or knotted; the fibre of the leaf stalks called kittal [q.v.] fibre is made into ropes and used for tying wild elephants [q.v.]; seeds used by mahomedans as beads [munkah]; the woolly substance found at bottom of leaves employed for caulking ships. Outer part of stem is hard and durable and the vascular bundles crowded, black, very large; wood used as rafters in building. No other species here [taur].——*Borneo sago palm* (رامبیا - rámbiya, Malay). Title otherwise Brown sago, Common sago, Pearl sago, Rambiya, True sago. Botanically Metroxylon sagu, rottl., palmaceæ [vricsham, 149]. Specific name from malay. Alias Sagus laevis. Unarmed; 20–25 feet high; trunk thick marked by the scars of fallen leaves, and usually invested towards the summit with the withered remains of leaf stalks; above these, the large, pinnate, smooth, stalked, rather erect leaves form a crown, from out of the centre of which the alternately branched, pyramidal flower spikes arise, their bases being enveloped by smooth sheaths. Native of moluccas, sumatra and borneo. Sago is farinaceous substance from the pith; occurs in partially rounded grains of ash-white color, smooth, hard, the size of mustard seed [rayaun]. First brought to europe by marco polo [taur].——*Common sago palm* (குமுதிப்பனை - kumuthippanai, Tam.). Same as Gomooty palm.——*Indian sago palm* (ساگو کے چاول کا پیڑ - ságúkecháwalkáper, Hind.; جنگلی مدن مست کا جھاڑ - janglímadanmastkájhár, Dec.; کبنگ - kabung, Malay; ಗೊಡ್ಡುಈಚಲು - godduíchalu, Can.; - ranaguvva, Tel.; - orasmaro, Oor.; - tutappana, Mal.; - madu, Singh.; காமமரம் - kámamaram, Tam.). Title from habitat and the produce of the nuts. Hind. from (ságú, hind. sago + cháwal, hind. rice, oryza sativa, linn. + per, hind. tree). Dec. from (janglí, hind. wild + madanmast, dec. artabotrys odoratissimus, r. br. + jhár, hind. tree) [madmaunty]. Can. from (goddu, can. barren + íchalu, can. wild date, phœnix sylvestris, roxb.); from appearance. Mal. from (tuda, mal. thigh + pana, mal. palm, borassus); as high as thigh. Tam. from (káma, san. desire + maram, tam. tree), from flower supposed to excite venery. Hind. also (ságúdáná), meaning sago grain. Dec. also (pahárímadanmastkájhár), meaning mountain variety. Can. also (mundíchalu), meaning stunted wild date. Tel. also (varaguna), meaning possessing excellent quality; (madanakámákshi), meaning intoxication + desire + eye; (madanamastu); (dzavvubiyyamu), meaning sago rice. Mal. also (varagudu); (dzavvubiyyamu), meaning sago rice. Mal. also (úránpú); (íntu) [wild date]. Tam. also (shavvarisi), meaning sago rice [sago]; (táthappanai), corruption from malayalam meaning thigh + palmyra tree, borassus flabelliformis, linn.; (mathanagámamaram), meaning intoxicating + desire + tree; (mathanagámésuvaramaram), meaning same; (úrai), from malayalam. Title otherwise Barren wild date, Broad-leaved cycas, Love tree, Stunted palmyra, Taddappanay, Wild madmaunty. Botanically Cycas circinalis, linn., cycadaceæ [vricsham, 129]. Alias Cycas rumphii, sphærica; Olus calappoides. Small palm-like tree; trunk cylindrical, unbranched, surmounted with a terminal bud, consisting in the male of a cone composed of peltate scales; leaves pinnated, thorny, springing from the apex of the trunk; cultivated in gardens; very fertile and easily

propagated from both nuts and branches. Sago prepared from nuts; these are dried in sun for a month, beaten in a mortar, and the kernel made into flour. Tree also yields a clear transparent gum [gond] something like tragacanth [kateerah], which, when dried in the air, coagulates into a gummy mass. The scales of the cone are useful narcotic medicine; gum [q.v.] applied to malignant ulcers. Sago much used by forest tribes; it however will not keep long. Nuts themselves are used for snuff-boxes; cf. Bael. No other species here.

SAHASRAM (सहस्र - sahasra, *San.*). Thousand [hazaur]. Also one of the twenty-eight sheiva augamams [q.v.]. Sahasra bhojanam or feeding a thousand bramins with appropriate ceremonies is considered a highly meritorious act among hindoos. Plant first term. Ex.:—Albizzia lebbek (sahasrakí), meaning lasting for a thousand years; Celosia cristata (sahasránghri), thousand roots; Cynondon dactylon (sahasravírá), thousand powers; Nelumbium speciosum (sahasrapatra), thousand leaves. See gloss. paragraphs.——*Sahasranaumam* (सहस्रनाम - sahasranáma, San.). From (above + náma, san. name). The thousand names of Vishnoo [q.v.], Shiva [q.v.], or any deity. Sahasranauma archanay is worshipping the deity with the leaves of toolsy [q.v.] or bael [q.v.] reciting the names of the deity.

SAHEE (صحیح - sahíh, *Hind.*). From (sahha, ar. to be sound). Correct, right. Often written, even by Hindoos, in lieu of signing their names.

SAHIB (صاحب - sahíb, *Hind.*). From (sahaba, ar. to keep company). A master. The usual designation of a respectable European. Also ordinary title like English "Mr." A lacab of the prophet; and so taken as alam, as Sahib ally, double alam [ism].——*Sahiba* (صاحبہ - sáhibah, Hind.). Feminine of Sahib; mistress, lady.——*Sahibakhauna* (صاحبہ خانہ - sáhibahkhánah, Hind.). The lady of the house.——*Sahiblog* (صاحب لوگ - sáhiblog, Hind.). English gentlemen.——*Sahibzauda* (صاحبزادہ - sáhibzádah, Hind.). From (above + zádah, pers. born). Noble.

SAHYAM (सह्य - sahya, *San.*). From (sah, san. to bear). One of the seven principal chains of mountains [parvatam] in Bhauratam [q.v.]; northern portion of Western ghauts [q.v.], or mountains of Concan [sukhein].——*Sahyadry* (सह्याद्रि - sahyádri, San.). Means sahyam mountain. Western ghauts [q.v.]. See vol. I (3), (4).——*Sukhein* (സഹ്യൻ - sahyan, Mal.). Corruption of Sahyam or Sahyachellam, the Western ghauts [q.v.].

SAINT (سینٹ - sent, *Eng.*). Prefix.——*Saint mary's isles* (ತೊನಸೆಪಾರ - tonasepára, Can.). Islands; South canara district, Oodipy talook; Vasco de Gama, on his return from the East indies in 1498, landed at one of these islands now known as Cocoanut island, and called it El Padron de sancta Maria. Small islands off Tonsey.——*Saint thomas* (പരിശുദ്ധതോമൻ - parishuddhatóman, Mal.; பரிசுத்ததோமாசு - parisuttatómásu, Tam.). From (parishuddha, san. pure + tómásu, tam. thomas). The foundation of a Christian church in the Malayalam country was effected by the apostle Thomas, who, after a residence in Arabia Felix and the island of Socotra, which lay in the direct line of trade at a little distance from the most eastern point of the coast of Africa, passed over to Cranganore. After a period of labor there, he delegated the care of the infant church to others, crossed the peninsula, and arrived at Mylapore, then a populous city under a Hindoo ruler. After that he proceeded to Pekin in China, whence returning he found himself exposed to the hostility of the Bramins [q.v.], who excited a tumult against him and caused his assassination. A crowd rushed upon him with stones, and one at last transfixed him with a lance. This was on the 21st December A.D. 68, as some say at the spot now known as St Thomas' mount, and as others say at the Little mount near the Marmelong bridge [q.v.], six miles from Fort St. George. At the latter place is shown a cave as the actual site of his death. There are writers who maintain that it was not the apostle, but Thomas the disciple of Manes A.D. 277, who first preached Christianity in India; but the tradition above given is supported by good evidence. It embodies the belief of all the Syrians, Arabs and Armenians, who have from time immemorial visited the shrine of St. Thomas on pilgrimage. Mylapore or St. Thomé was visited by the ambassador of Alfred the Great of England, as recorded in the Anglo-Saxon Chronicle:—"this year, A.D. 883, Sighelm and Athelstan "carried to Rome the alms which the king had vowed to send "thither and also to India to St. Thomas and to St. Bartho-"lomew." This fact is also mentioned by William of Malmesbury, Degestis Reg. Ang., vol. ii, c. 4, p. 44. In the "Ancient Accounts of India and China by two Mahomedan travellers," of the same period, the ninth century, mention is made of a place on the coast corresponding to Mylapore, which is named Betuma. This is evidently a corrupt form of Beit-Touma, meaning both in Arabic and Syriac, the house or church of St. Thomas. Ecclesiastical records confirm the facts at least as early as the third century, and perhaps in the first century. The Apocryphal history of the Apostles, by Abdias, was written at the end of the first century. The work has undoubtedly since been greatly interpolated, but the legend of St. Thomas contained in it bears no marks of interpolation. He names Gondaphorus as the Indian king at the time of St. Thomas' visit to India. In a Tamul manuscript translated from the Latin, which was found among the Mackenzie MSS., the ruler of Mylapore bears the Tamul name of Cundappa rajah. In the Paschal Chronicle is a fragment of a work by Bishop Dorotheus, born A.D. 254, in which he relates the acts and journeyings of the Apostles. He says of St. Thomas:—"the Apostle Thomas, "after having preached the Gospel to the Parthians, Medes, "Persians, Germanians, an agricultural people of Persia, men-"tioned by Herodotus, Bactrians and Magi, suffered martyrdom "at Calamina, a town of India." St. Hippolytus, Bishop of Portus, who flourished about A.D. 220, has a memorandum to the same effect. St. Gregory Nizianzen, A.D. 370, shows the belief of the Oriental church. Answering the remark that he himself was a stranger, he says:—"What had Paul in common with the "Gentiles, Luke with Achaia, Andrew with Ep'rus, John with "Ephesus, Thomas with India, or Mark with Italy?" St. Jerome, A.D. 390, shows the belief of the Western church. He speaks of the mission of St. Thomas to India as a fact universally believed in his time, and mentions Calamina as the town which was the place of his death. Calamina is supposed to be Mylapore. The statements of later European travellers to india indicate the undiminished strength of the traditionary belief and the existence of a Christian church and community on the spot keeping it alive. Marco Polo, A.D. 1220 says:—"the body of "St. Thomas the Apostle lies in this province of Malabar at a "certain little town having no great population; it is a place "where few traders go, because there is little merchandize to "be got there, and it is a place not very accessible. Both "Christians and Saracens however greatly frequent it in pilgri-"mage." See Syrian. See vol. I (161).——*Saint thomas' mount* (பரங்கிமலை - parangimalai, Tam.). Tam. from (farangi, pers. european + malai, tam. mountain). Sanscrit name (bhringigiri), meaning bhringy, the three-legged sage who worshipped shiva + mountain. Town, cantonment, Hill, Railway station; Chingleput dist., Sydapett tal.; pop. 13,137; acres 1,419; lat. 13° 01′; long. 80° 16′; height 34 feet miles; from Bangalore E. 178 miles; from Cuddalore N. 95 miles; from Fort St. George S.W. 8 miles; from Madura N.E. 252 miles; from Sydapett S.W. 2 miles; from Tanjore N. 170 miles; from the sea W. 5 miles. Cantonment is laid out at base of eastern and southern sides of hill and occupies 750 acres. The hill is the most northern and least elevated of a small range running parallel to the coast, and about 5 miles west of it. The barracks and most of the buildings have an eastern aspect and are open to the sea-breeze. The soil is gravelly, and the health of the station is exceptionally good. The mount itself is a granite [caroom cull] and syenite rock, about 220 feet above sea-level. In Anglo-indian history and notably in the wars of the Carnatic [q.v.], was of great importance. In battle fought here on the 7th February 1759 Colonel calliaud, who had been summoned from south to assist in raising siege of Madras with 2,200 horse, 2,500 foot and 6 cannon, of which only 1,500 natives, 80 Europeans, and 12 artillery men were disciplined, defeated Lally with 8 guns, and 2,600 men, half of whom were Europeans and all disciplined. The fight lasted from early morning till 5 P.M. On the 20th March 1769, the treaty of 2nd April was signed here between Hyder ally and Mr. Dupie. In 1774, the mount was established as the head-quarters of the artillery. The garrison of the mount formed the major part of the force under Sir Hector Munro that ought to have saved Baillie in 1780. During its absence, only five companies of sepoys [q.v.] and, four guns had been left for the protection of the Mount, and a temporary earthwork was raised to strengthen the place against attack. This has long been levelled, but a slight depression crossing the plain midway between Pullavaram and the Mount indicates the position of what went by the name of the Mahratta ditch [q.v.]. Former head-quarters of the old Madras artillery, and still an important station of that arm. The town possesses numerous military buildings, including a handsome mess-house. The church, at south end of parade ground, is one of the best-looking edifices of its kind in the country. There are besides a Wesleyan chapel at foot of the Mount steps; and a Roman catholic church, 74 feet long by 25 wide, built in 1764 by the boatmen of Madras, and dedicated to the Presentation of the Blessed Virgin. On the summit of Mount stands the curious old Portuguese church of the Expectation of the Blessed Virgin. This is built over the spot where the Portuguese in 1547 discovered the celebrated Mount Cross, attributed to the legendary evangelism of St. Thomas. The Portuguese first visiting the Mount found the Christian church in ruins and occupied by a native fakeer [q.v.]. The cross is built into the wall behind the altar in the church. The date of the cross tablet and its Pehlvi [pahlava] inscription is probably about the eighth century. The church was plundered in 1752 by the troops of Chundah sahib, under his son Razah sahib, and the advanced force of Hyder ally later in the century again plundered it. There is a double ring of stones [azhauram] surrounding a mound near St. Thomas' mount, but the cromlech [paundoo cull] belonging to this, if it existed, has disappeared. An annual festival attracts a large assemblage of Native christians. Trig. station in lat. 13° 00′ 14·79″; long. 80° 14′ 08·56″; height 250 feet; from Nandambaukam S. ¾ mile; from Sydapett S.W. 2 miles; from the sea W. 5 miles.

SAIT (سیٹھ - set, *Hind.*; శేటు - shétu, *Tel.*). From (shrésht'ha, san. best), through hindee. Title assumed by certain mer-

chants, both Hindoo and Mahomedan [peyar].——*Senth* (سینٹھ - senth, Hind.). Same as Sait.——*Senthee* (سینٹھی - senthí, Hind.). From (senth, hind. merchant), as being used by them for pens. Same as Moonshee grass.

SAJJAUD (سجاد - sajjád, *Ar.*). From (sajada, ar. to prostrate). Frequent adorer. Lacab of the fourth Imaum. Mahomedan alam; Sajjaud ally, double alam; mostly taken by shiahs [ism].

SAKEENA (سکینہ - sakínah, *Hind.*). From (sakana, ar. to rest). Tranquillity, repose. Name of the daughter of Hoossain. Common female alam; as Sakeena bee, alam + alaumat [ism]. ——*Saukin* (ساکن - sákin, Hind.). From (sakana, ar. to become steady). Inhabitant [coody].

SALAAM (سلام - salám, *Hind.*). From (salama, ar. safe). Peace. The common word of salutation among Mussalmans [q.v.] and now in general use by all classes of persons; sent as a message, as compliments. General name for a salutation; the usual form of this is by lifting the right hand to the forehead and bending the body [namascauram].——*Salaam oon aleik* (سلام علیک - salámunalaik, Hind.). Peace be on you. Salutation amongst Mahomedans. The reply is Aleikoom oos salaam, on you be peace. Among fakeers [q.v.] it is Ishk allah or love to God.

SALAKA (సలక - salaka, *Tel.*). Small bag. Measure of capacity. 80 maunicas = 1 salaka; 8 salakas = 1 pootty [alavay, 3b]. Approximate actual value, 1 salaka = 6 cubic feet 132 cubic inches. Kistna. Compare Calam of North arcot, South arcot, Chingleput and Madura.——*Shalagay* (சலகை - shalagai, Tam.). Measure of capacity, especially for grain. 32 bullahs = 1 shalagay; 3 shalagays = 1 pothy [alavay, 3a]. Approximate actual value, 1 shalagay = 4 cubic feet 1,152 cubic inches. Coimbatore. Compare Parrah of madras. See vol. I, 609; II, 509.

SALAR (سالار - sálár, *Pers.*). Chief. Mahomedan alam; as Salar beg, alam + alaumat. Also part of lacab; as Salar jung, chief in war [ism].

SALAUBUT (صلابت - salábat, *Ar.*). From (saluba, ar. to become hard). Terror. Part of lacab; as Salaubut jung, terror of war [ism].

SALAUK (సలాకు - saláku, *Tel.*). The dent or mark on coin that denotes its goodness. A Salauk rupee is a proved coin.

SALAUT (صلوٰة - salát, *Hind.*). From (salla, ar. to pray). Same as Namauz [q.v.]. Prayer, the repetition of which is directed five times a day [roz]. See five items below. For hindoo daily prayer see Sundhyauvandanam. For hours of sunrise and sunset see Sooryan.—"*a*" *Soobh* (صبح - subh, Hind.). Between day break and sunrise.—"*b*" *Zohar* (ظہر - zohr, Hind.). Immediately after noon.—"*c*" *Asr* (عصر - asr, Hind.). Shortly before sunset.—"*d*" *Magrib* (مغرب - maghrib, Hind.). Before dusk.—"*e*" *Yishah* (عشا - ishá, Hind.). On retiring to bed.

SALEM * (سیلم - sailam, *Hind.*; சேலம் - shélam, *Tam.*). From (shéram, tam. the ancient kingdom so called) [cheram, sheram]. Canarese name (shálya), corruption of (shálika, san. weaver), village of weavers, probably by confusion.——**(1)** Revenue district; situated inland; between 11° 01′ and 12° 54′ N. lat., and between 77° 31′ and 79° 04′ E. long.; bounded N. by Mysore and North arcot district, E. by North arcot, South arcot and Trichinopoly districts, S. by Trichinopoly and Coimbatore districts, W. by Coimbatore and Mysore; square miles 7,529; pop. 1,962,591; language Tamul, Canarese and Teloogoo. Contains rivers Cauvery, Palaur, Ponniaur, Sanatcomauranuddy, Sharabhunganuddy, Shwetanuddy, Tirmany moottaur, Toppoor, Vasishtanuddy, Vauniyaur; mountains Arnoottimullay, Bodhamullay, Collimullay, Cullroyen, Jawaudy, Melagherry, Putchamullay, Shevaroy, Talamullay, Tennaunday mullay, Toppoor hills, Valasamullay, Vattalamullay, Yelagherry, Yeralvauny; sanitarium Shevaroy hills. The whole area of the district is represented by the following sub-areas:—Ahtoor, Dharmapoory, Krishnagherry, Namcull, Oossoor, Ootancaray, Salem, Trichengode and Tripatore talooks. For general administrative purposes, the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge. Collector, Salem; Sub-collector, Oossoor, in charge of Dharmapoory, Krishnagherry and Oossoor talooks; Head assistant collector, Tripatore, in charge of Tripatore and Ootancaray talooks; General deputy collector, Namcull, in charge of Namcull and Trichengode talooks. Personal assistant deputy collector, Salem, in charge of Salem and Ahtoor. Tahsildars; Ahtoor, Rs. 200; Dharmapoory, Rs. 175; Krishnagherry, Rs. 150; Namcull, Rs. 225; Oossoor, Rs. 200; Ootancaray, Rs. 150; Salem, Rs. 250; Trichengode, Rs. 225; Tripatore, Rs. 200. Deputy tahsildars; Dencanicottah, Rs. 70, range situated in the south of Oossoor talook; Haroor, Rs. 70, range situated in the south of Ootancaray talook; Paramatty, Rs. 70, range situated in the south of Namcull talook; Pennagaram, Rs. 70, range situated in the west of Dharmapoory talook; Razipore, Rs. 70, range situated in the south of the Salem talook; Salem, Rs. 100, range situated in the centre of the Salem talook; Shevaroy hills, Rs. 150, range situated in the north of the Salem talook; Shunkerrydroog, Rs. 70, range situated in the west of the Trichengode talook; Tauramungalam, Rs. 70, range situated in the north-west of the Salem talook; Vaniyambaudy, Rs. 70, range situated in the north of the Tripatore talook. Similarly judicial officers:—Judge, Salem. District moonsifs, Krishnagherry, Namcull, Salem, Tripatore. Contains Registration sub-districts:—Ahtoor, Dencanicottah, Dharmapoory, Krishnagherry, Namcull, Omalore, Oossoor, Ootancaray, Paramatty, Pennagaram, Razipore, Salem, Shevaroy hills, Shunkerrydroog, Trichengode, Tripatore, Vaniyambaudy. Contains Forest ranges:—Ahtoor, Dharmapoory, Krishnagherry, Namcull, Oossoor, Ootancaray, Salem, Trichengode, Tripatore. Contains Municipalities:—Salem, Tripatore, Vaniyambaudy. Contains District board and talook boards; Salem talook board embracing Salem and Ahtoor talooks, Oossoor talook board embracing Oossoor, Dharmapoory, and Krishnagherry talooks, Tripatore talook board embracing Tripatore and Ootancaray talooks, and Namcull talook board embracing Namcull and Trichengode talooks. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; comparative population, II, 172; location of revenue officers, II, 389; revenue settlement of the district, II, 416; registrars' and sub-registrars' stations, II, 421; rain-guage stations, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 516; zemindarries, II, 299; special public works, I, 402. A special gazetteer account of the whole district is given at II, 120. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Ahtoor, Dharmapoory, Krishnagherry, Namcull, Oossoor, Ootancaray, Salem, Trichengode, Tripatore. ——**(2)** Talook, Salem district. Tahsildar's pay Rs. 250. Area 1,071 square miles. Population 349,669. Language Tamul prevailing. In the west centre of district, lying between 11° 24′ and 11° 55′ N. lat. and 77° 49′ and 78° 31′ E. long. Extreme breadth from north to south is about 41 and from east to west 47 miles, average breadth being about 35 and 30 miles respectively. Bounded north by Dharmapoory talook running along the Toppoor river from the Cauvery at Sholapaudy to Chikkannanputty, and by the Ootancaray talook from that village to Malapooram; north-east by Ootancaray talook from Malapooram, whence the boundary follows the Veppaudy river to the Shevaroys, and then follows their slopes to a point on the Arnoottimullay; east by Ahtoor talook from the Arnoottimullay to the northernmost spur of the Collimullay; south by Namcull talook as far as Moonchauvady, where the south-western boundary is formed by Trichengode talook up to Poolamputty on the Cauvery, which river, from Poolamputty to Sholapaudy, separates it on the west from Coimbatore district. Chief hill ranges are the Alavye mullay, Bodhamullay, Chera royan mullay, Coodmullay, Cunjoomullay, Jergoomullay, Keddamullay, Ramasawmy mullay and Vanavausy mullay. Besides these there are detached peaks or ranges of minor importance, such as the chalk hills, &c. The greater part is composed of valleys, from five to twelve miles wide, shut in by the hills. The talook consists of a gneissic formation with black cotton [regar] and red soils [sevval munn] at the surface. Of hornblende [shalavay cull] schist there is little trace, but trap [padicutt cull] dykes and beds of magnetic iron [cauntam] are common, especially in the east centre, where they cross each other at right angles. There is very little granite [caroom cull]. Weaving [nesavoo] is carried on to a great extent, and jewellers, cloth merchants and grain merchants generally drive a good trade. Iron [auhan] works at Naumagiripett. Brass [pittalay] works in Salem, Moottoonaickanputty, Razipore and Wodoovancoorchy and dyeing [shauyam] of silk [puttoo] and twist in Salem. Coffee [q.v.] on the Shevaroys is the chief speciality. Some tea [q.v.] plants also are to be found there. Indigo [q.v.] was formerly manufactured at Ponnammapett and is now to a small extent at Shooramungalam and Camalaupooram. Principal exports are rice [q.v.], lamp-oil seeds [aumanac], lamp-oil [q.v.], ghee [q.v.], cloths, coffee [q.v.], graft mangoes [q.v.], oranges [q.v.], tobacco [pogauk], saffron [country saffron], jaggery [q.v.], groundnuts [q.v.], horse-gram [q.v.], onions [piyauz], bamboos [q.v.], bamboo mats [boriyah] and pulses [dholl]. Imports are salts [ooppoo], wheat [geung], areca [q.v.] nuts, tobacco [pogauk], pulses [dholl], saffron [country saffron], garlic [lussoon], pepper [q.v.], gingelly [q.v.] seeds, coriander [cassibor] seeds, paddy [q.v.], jaggery [q.v.], plantain [q.v.] fruits, indigo [q.v.], sugar [q.v.] and spices. The chief sources of irrigation are the Sharabhunganuddy and Tirmany moottaur. There are only twelve tanks [q.v.] having an ayacut [q.v.] of over 200 acres, viz., Ammapolliem periyairy, Anaipolliemairy, Camalaupooram chinnaairy, Gownden anicut, Neycaurputty coottay, Noothanairy, Periyairy, Ponparappy, Putnam periyairy, Shaimore, Shirapuliyairy, Somashekhara gowndenʼs tank and Vadaman,

Camping grounds are:—Cauriputty, Chinnappanputty, Mecherry, Mettore, Moon chauvady, Mullore, Poojarryputty, Salem chalk hills and Sholapaudy. Zemindarries:—Alagaupooram, Annadaunaputty, Arasampolliem, Canaka bommamputty, Carcalvaudy, Caucauvery, Chundrashekharapooram, Cunnancoorchy, Raukiputty, Razipore, Salem, Shingalauntapooram. Places of archæological interest:—Amaragoondy, Coilvellaur, Nangavelly, Omalore, Pottipooram, Salem, Sholapaudy, Tauramungalam, Yilavamputty. Principal trig. station:—Cunjoomullay. The leading places, &c., in the talook are the following.——*Alagaupooram* (அளகாப்புரம் - alagáppuram, Tam.). From (azhagan, tam. name of a person who founded the village + pura, san. town). Sanscrit name (alakápura), meaning alacay, capital of coobairan + town. Zemindarry, Village; pop. 1,376; square miles 9; lat. of village 11° 41′; long. 78° 11′; from Salem N.W. 2 miles. Principal village in the Mittah [q.v.] of the same name. Peshcush Rs. 2,817.——*Alavye mullay* (அலவாய்மலை - alaváymalai, Tam.). From (ulaiváy, tam. furnace mouth + malai, tam. mountain). The tradition being that Congana siddhar [q.v.], who practised alchemy [rasauyanam], melted rock and made gold [pon] here. Village. The inhabited portion is Alavyeputty. Place of pilgrimage, Hill; pop. 1,091; acres 4,216; lat. 11° 28′; long. 78° 10′; from Salem S.S.W. 13 miles.——*Ammapett* (அம்மாப்பேட்டை - ammáppéttai, Tam.). See sep. title.——*Annadaunaputty* (அன்னதானப்பட்டி - annathánappatti, Tam.). See sep. title.——*Arnoottimullay* (அறுநூற்றிமலை - arunúttimalai, Tam.). See sep. title.——*Auttayamputty* (ஆட்டையாம்பட்டி - áttaiyámbatti, Tam.). From (áttayán, tam. name of the founder + patti, tam. cattle-fold). Village; pop. 3,094; acres 529; lat. 11° 32′; long. 78° 06′; from Salem S.W. 12 miles. A weekly market every Sunday. Cloth chiefly sold.——*Ayodhyapatam* (அயோத்தியாப்பட்டணம் - ayóttiyáppattanam, Tam.). From (ayódhyá, san. the city so called + pattana, san. town). Village; pop. 311; acres 1,548; lat. 11° 41′; long. 78° 17′; from Salem E. 5 miles. Formerly a place of pilgrimage named after Oudh on account of its fine temple dedicated to Rama [q.v.].——*Bodhamullay* (போதமலை - póthamalai, Tam.). See sep. title.——*Carcalvaudy* (கருக்கல்வாடி - karukkalvádi, Tam. karukalvádi *). From (karumai, tam. blackness + kal, tam. stone + vádi, tam. village); from the black granite stones found in the neighbourhood. Zemindarry, Village; pop. 1,019; area 9,376 acres; lat. of village 11° 41′; long. 78° 04′; from Salem W. 10 miles. Chief village in mittah [q.v.] of same name. Peshcush Rs. 7,642.——*Caucauvery* (காக்காவேரி - kákkávéri, Tam.). See sep. title.——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.——*Chundrashekharapooram* (சந்திரசேகரப்புரம் - shandiraségarappuram, Tam.). From (chandrashékhara, san. shiva, the moon-crested lord + pura, san. town). Called so having been dedicated to Shiva [q.v.] by the founder Toolookkanna gownden of the Agrahauram village. Zemindarry, Inam village; pop. 857; area 1,944 acres; lat. of village 11° 26′; long. 78° 14′; from Salem S. 17 miles. Peshcush Rs. 1,816.——*Cunjoomullay* (கஞ்சுமலை - kañjumalai, Tam.). See sep. title.——*Cunnancoorchy* (கண்ணன்குறிச்சி - kannánguriççi, Tam. kannánkurchi *). From (kannán, tam. blacksmith + kuriççi, tam. village). Zemindarry, Village; pop. 2,695; area 7,791 acres; lat. of village 11° 42′; long. 78° 13′; from Salem N.E. 3 miles. Extensive iron [auhan] works former times. Peshcush Rs. 9,597.——*Dinnamputty* (தினம்பட்டி - tinambatti, Tam.). From (dinne, tel. mound + patti, tam. cattle-fold). Village; pop. 1,299; lat. 11° 49′; long. 78° 09′; from Salem N N.W. 12 miles. Near foot of Shevaroy hills; railway station.——*Green hills* (பச்சமலை - paççamalai, Tam.). See sep. title.——*Hastamputty* (அத்தம்பட்டி - attambatti, Tam.). See sep. title.——*Mecherry* (மேச்சேரி - méççéri, Tam.). From (méyççal, tam. pasturage + éri, tam. tank), large grazing ground. Village, Place of pilgrimage; pop. 4,181; acres 4,770; lat. 11° 50′; long. 77° 59′; from Salem N.W. 19 miles. About half way between Omalore and Sholapaudy in an unhealthy tract. Annual festival and cattle [maud] fair. Potstone [sowcaura cull] utensils manufactured.——*Moottanaud* (முட்டநாடு - muttanádu, Tam.). See sep. title.——*Moottoonaickanputty* (முத்துநாயக்கன்பட்டி - muttunáyakkanbatti, Tam.). Means moottoonaicken village. Village; pop. 776; lat. 11° 45′; long. 78° 04′; from Salem N.W. 10 miles. Large weekly grain [dhaunyam] and cattle [maud] market.——*Nangavelly* (நங்கவெள்ளி - nangavelli, Tam.). From (nangai, tam. a woman of quality + palli, tam. village). Tam. also (narasingappázhi), meaning vishnoo, the man-lion god + fountain. Village; pop. 2,023; acres 2,023; lat. 11° 46′; long. 77° 56′; from Salem W. 20 miles. Two old temples with inscriptions; market every Sunday.——*Naumagiripett* (நாமகிரிப்பேட்டை - námagirippéttai, Tam.). From (námagiri, san. the name of the goddess at námakkal + péttai, tam. suburb). Village; pop. 3,345; acres 2,973; lat. 11° 27′; long. 78° 19′; from Salem S.S.E. 16 miles. On the Vadagamcoorchy, a small stream fed by mountain torrents from the Collimullay; chiefly inhabited by rich Comaties [q.v.] who live in hovels. The mound of ashes and cinders at corner of the town testifies to former iron-works. The denuded hills indicate cause of downfall of industry, viz., want of fuel. The ore still smelted on a small scale and is very superior.——*Omalore* (ஓமலூர் - ómalúr, Tam.). See sep. title.——*Poymaun* (பொய்மான் - poymán, Tam.). See sep. title.——*Pulliputty* (பள்ளிப்பட்டி - pallippatti, Tam.). From (palli, tam. member of the caste + patti, tam. cattle-fold). Village; pop. 939; acres 966; lat. of village 11° 23′; long. 78° 18′; from Salem S. 20 miles. Near Belcoorchy.——*Raukiputty* (இராக்கிப்பட்டி - irákkippatti, Tam.). From (irákki, tam. name of a person + patti, tam. cattle-fold). Zemindarry, Village; pop. 1,033; area 552 acres; lat. of village 11° 34′; long. 78° 05′; from Salem S.W. 11 miles. Peshcush Rs. 517.——*Razipore* (இராசிப்புரம் - irásippuram, Tam.). See sep. title.——*Salem* (சேலம் - shélam, Tam.). See below.——*Sharabhunganuddy* (ಶರಭಂಗನದಿ - sharabhanganadi, Can.). From (sharabhanga, san. a sage, so called + nadí, san. river). Otherwise the Omalore river. River. Drains the Omalore division and the western slopes of the Shevaroy hills.——*Shevaroy hills* (சேர்வராயன்மலை - shérvaráyanmalai, Tam.). See sep. title.——*Shevvapett* (செவ்வாய்ப்பேட்டை - shevváyppéttai, Tam.). See sep. title.——*Shingalauntapooram* (சிங்களாந்தப்புரம் - shingalándappuram, Tam. singalántapuram *). From (simhala, san. ceylon + andan, tam. enemy + pura, san. town). Zemindarry, Village; pop. 2,693; area 5,057 acres; lat. of village 11° 25′; long. 78° 16′; from Salem S.E. 18 miles. Chief village of mittah [q.v.] of same name. Peshcush Rs. 4,555.——*Sholapaudy* (சோலப்பாடி - shólappádi, Tam.). From (shólai, tam. grove + pádi, tam. village). Village; pop. 330; acres 4,694; lat. 11° 54′; long. 77° 54′; from Salem N.W. 27 miles. Old Vishnoo [q.v.] temple and a fort. Principal portion of the village is within the Dharmapoory talook.——*Shooramungalam* (சூரமங்கலம் - shúramangalam, Tam.). See sep. title.——*Shorgamullay* (சொர்க்கைமலை - shorkkaimalai, Tam.). From (dzarugu, tel. to slide + malai, tam. mountain). Hill; lat. 11° 37′; long. 78° 16′; from Salem W. 5 miles. Otherwise Jergoomullay.——*Siddheshwaram coil* (சித்தேசுவரன்கோவில் - shittésuvarangóvil, Tam.). See sep. title.——*Tauramungalam* (தாரமங்கலம் - táramangalám, Tam.). From (táran, tam. name of founder + mangala, san. prosperity). Village, Place of pilgrimage; pop. 4,933; acres 2,381; lat. 11° 42′; long. 78° 01′; from Madras S.W. 183 miles; from Namcull N.N.W. 35 miles; from Oossoor S.S.E. 72 miles; from Salem W. 12 miles; from Tripatore S.S.W. 68 miles; from Yercaud W.S.W. 18 miles. Former head-quarters of a Deputy tahsildar, but abandoned for unhealthiness. Temple of great architectural beauty. Inscriptions of Chola, Paundy and Vijianugger dynasties [raj]. Car festival in January.——*Tennaunaay mullay* (தென்னண்டைமலை - tennándaimalai, Tam.). See sep. title.——*Tirmany moottaur* (திருமணிமுத்தாறு - tirumanimuttáru, Tam.). See sep. title.——*Yercaud* (ஏர்க்காடு - érkkádu, Tam.). See sep. title.——**(3)** Deputy tahsildarry, Salem district. Pay Rs. 100.——**(4)** Town, Head-quarters of Collector, Judge, Zillah surgeon, Superintendent of Police, Superintendent of Jail, Assistant collector, Treasury deputy collector, the District forest officer, the Local fund district engineer, Tahsildar and Town sub-magistrate, Zemindarry; Salem dist., Salem tal.; pop. 67,710; acres 21,543; lat. 11° 39′; long. 78° 12′; height 947 feet; from Madras S.W. 172 miles; from Namcull N. 30 miles; from Oossoor S.E. 77 miles; from Tripatore S. 64 miles; from Yercaud S. 9 miles. In a picturesque valley about 5 miles from the foot of the Shevaroy hills on the Tirmany moottaur, which is bunded just outside the town. The valley is formed by the Shevaroy hills to the northward and a smaller and undistinguished range to the southward. It is about 7 miles in width, and is prolonged about 5 miles from Salem in an easterly direction, when by the termination of the smaller hills the country again becomes open. The town is centrally situated as regards Madras, Bangalore, Calicut, Coimbatore, Madras, Trichinopoly, and other places on the line of rail. The climate is fluctuating, the thermometer ranging in December from 60° to 87°; in January from 58° to 82°; in February from 60° to 91°; in March from 66° to 95°; in April from 72° to 95° and in May from 75° to 96°. Early in June the south-west monsoon [q.v.] falls in short but heavy and frequent showers, attended with thunder and lightning, continuing till late in September; by the end of October the north-east monsoon sets and showers recur with a very clouded sky till the middle of December. Between June and December the extremes of the thermometer are 68° and 90°. A north-easterly wind prevails steadily from the beginning of November to about or middle of February, which is for the first two months rather moist, cool and agreeable, but becomes more and more arid as the season advances. In January the wind becomes disagreeably cold in the morning and unpleasantly warm at noon, being dry and parching at both periods. After the middle of February, the wind at times variable with frequent lulls, shifts round to the south and south-west and blows from that quarter in hot puffs and with much uncertainty during April and May. Cooled by the rains of the south-west monsoon, this wind blows freshly in June and July and more moderately in the two following months. In October the wind becomes again variable, till the setting in of the north-east monsoon [q.v.]. The town is straggling and

extensive, being about three miles long and two broad. On the eastern side is Salem proper, where most of the merchants and officials live; on the south is Coogay, so named from a cave in which a hermit is supposed to have lived and died. The inhabitants are weavers. The western side comprises the fort, now no longer existing, and Shevvapett, the latter named from a fair held there on Tuesdays. Adjacent to the fort are most of the public buildings, but the Jail and District court are on the road to the Shevaroy hills beyond Hastamputty. The mahaul [q.v.] in the fort was originally the palace of Ismail khan, one of the tributary chiefs of Salem. Hastamputty is the European quarter, and Shooramungalam the railway station. A London mission church. Other public buildings are the Memorial hall, the Jail, and a pretty church. The chief industry is weaving [nesavoo] in silk [puttoo] and cotton [q.v.], the grain trade comes next and the remaining population are agricultural laborers, lace-makers, cloth printers, jewellers, braziers, manufacturers of all kinds of work in bamboo, carpenters, &c. Though never a place of any military strength, its position in a much contested district has made it the scene of frequent fighting. It was first captured by Captain Wood in 1768. The Tirmany is traversed by a substantial bridge of three arches. There is a zemindarry [q.v.] of same name. Peshcush Rs. 15,959. The following are the travelling distances by road from Salem to different places :—

SALEP (خصی الثعلب - khusiyussalab, *Ar.*; ثعلب مصری - salabmisrí, *Pers.*, *Hind.* and *Dec.*; సాలామిసిరి - sálámisiri, *Tel.*; സാലാമിസ്രി - sálámisri, *Mal.*; சாலாமிசிரி - shálámisiri, *Tam.*). Title abbreviated from arabic. Ar. from (khusiya, ar. testicle + salab, ar. fox); from form of tubers. Pers. from (salab, ar. fox + misrí, ar. egyptian). Tel. from hindostany. Mal. from hindostany. Tam. means egyptian salep. Tel. also (górutsuttugadda), meaning whitlow + root; (ráyedurudumpa), meaning king + bamboo, bambusa arundinacea, willd. + root; (vedurugadda), meaning bamboo + root. Mal. also (káttuttékkumaravázha), meaning wild + teak + parasite. Greek ὄρχις; Latin Satyrium; cf. english dogstone, foxstone, harestone and goatstone. Title otherwise Bamboo root, Egyptian salep, Fox's testicles, Oriental salep, Salep misry, Whitlow root. Distinguish from Jalap. Botanically Eulophia sp., orchidaceæ [vricsham, 141]; as Eulophia campestris, wall.; Eulophia herbacea, lindl., &c. Article is imported from the north. The bulb radix satyrii, or radix salep, used as a vegetable drug; natives ascribe great virtues as an aphrodisiac; it is simply nutritive, and idea of aphrodisiac properties is derived from the tubers having a resemblance in shape to the testes; the chief constituent of salep is a kind of mucilage. Most species of orchis are provided with tubers capable of furnishing salep.

SAL GEM (ملح الحجر - milhulhajar, *Hind.*). Title from salt like crystal [palingoocull]. From (milh, ar. salt + hajar, ar. stone). Commercial name for native rock-salt [sondah namak].

SALWA (సాల్వ - sálva, *Tel.*). From the country so called, near Narrainavaram in North arcot district. A family of Reddies [q.v.], who migrated from neighbourhood of Pittapore in delta [conamoogam] of Godavery, to country at base of Nagary hills about the eighth century.——*Saulvancooppam* (சாலுவன்குப்பம் - sháluvanguppam, Tam.). From (sháluvan, tam. petty ruler + kuppam, tam. village). Village; Chingleput dist., Chingleput tal.; pop. 363; acres 944; lat. 12° 40′; long. 80° 16′; from Chingleput E. 15 miles; from Sydapett S. 25 miles; from the sea W. ½ mile. Contains a tiger [pooly] cave two miles N. of Seven pagodas [q.v.]. Inscriptions.

SALYE (سلائی - salái, *Hind.*). From (sallakí, san. indian olibanum). Same as Indian olibanum.

SAM (صم - sam, *Hind.*). Sharp.——*Samsaum* (صمصام - samsám, Ar.). Sharp sword. Part of lacab; as Samsaum ood dowla, sword of the empire [ism].

SAMAD (صمد - samad, *Hind.*). From (samada, ar. to go to); from recourse being had to him in exigencies. Attribute of God [allah]. Common alam; as Abd oos samad, slave of god [ism].

SAMADARAH (കരിഞൊട്ട - karinnotta, *Mal.*; සමදර - samadará, *Singh.*; நீபம் - níbam, *Tam.*). Title from singhalese. Mal. from (kari, mal. black + ñotta, mal. the tree), from dark brown outer bark. Tam. from (nípa, san. low ground), commonly applied to the common cadamba [q.v.] anthocephalus cadamba, miq. Mal. also (ñotta). Title otherwise Caringhote, Niepa bark tree, Niota. Botanically Samadera indica, gærtn., simarubeæ [vricsham, 33]. Generic name from singhalese. Alias Niota lamarckiana, tetrapetala; Vittmannia elliptica. Niota from malayalam. Tree, 30–35 feet; leaves alternate, oblong, elliptical, very long; calycine segments four to five each, marked with an external gland; petals five, longer than the calyx; flower-bearing peduncles longer than the leaves, pendulous, compressed, axillary or terminal, divided at the apex into a small umbel; drupe with a thick pericarp; flowers yellowish white. Fruit is oval, 1½ by 1 inch, and is one-seeded; its surface is coriaceous, smooth, or slightly reticulated, and of a brown color; the seed is brown and curved; the bark and the seeds are very bitter; the bark from the smaller branches occurs in quills from half an inch to one inch in diameter, its external surface is minutely fissured in every direction, of a dark brown color, with light-colored patches here and there caused by exfoliation of the suber; beneath the suber, which can be easily separated, the bark is yellowish-white, and this color extends through its substance to the inner surface; the bark has a short fibrous fracture and bitter taste like quassia. An infusion of the wood used medicinally as a general tonic, and is substitute for infusion of quassia; it is of a light lemon [q.v.] color and a good vehicle for the administration of iron [auhan], iodide of potash; bark febrifuge; oil [yennay] extracted from kernels of fruit is application in rheumatism; bruised leaves externally applied in erysipelas; seeds are worn round the neck as a preventive of asthma and chest affections. The wood is light but durable, and is used for shoes and other articles; it takes a good polish. No other species here.

SAMBRAUNY (देवधूप - dévadhúpa, *San.*; لوبان عود - lobáníúd, *Hind.*; ಸಾಂಬ್ರಾಣಿ - sámbráni, *Can.*; సాంబ్రాణి - sámbráni, *Tel.*; സാംബ്രാണി - sámbráni, *Mal.*; சாம்பிராணி - shámbiráni, *Tam.*). Gum-resin [googal] of Styrax, Boswellia and Hardwickia species. See below. Natives call this female frankincense, and dammer [coongilyam, dammer] male frankincense.——(1) *Sambrauny poo* (अश्मपुष्प - ashmapushpa, San.; عودکاست - údkásat, Hind.; సాంబ్రాణిపువ్వు - sámbránipuvvu, Tel.; சாம்பிராணிப்பூ - shámbiránippú, Tam.). Title and Tam. from (above + pú, tam. flower). San. from (ashma, san. stone + pushpa, san. flower). Hind. from (úd, ar. benzoin + sat, hind. essence). Tel. from (sámbráni, tel. benzoin + puvvu, tel. flower). Benzoic acid. Acidum benzoicum of chemists.——(2) *Common sambrauny* (சாம்பிராணி - shámbiráni, Tam.). Same as Benzoin.——*Foreign sambrauny* (பரங்கிசாம்பிராணி - parangisámbiráni, Tam.). Same as True olibanum.——*Madeiyan sambrauny* (ചുരലി - churali, Mal.; மடையன்சாம்பிராணி - madaiyansámbiráni, Tam.). Title and Tam. from (madaiyan, tam. fool + shámbiráni, tam. frankincense). Mal. also (kolla). Tam. also (kolávu), used in tinnevelly. Gum-resin of Hardwickia binata and pinnata [yaipy].——*Malacca sambrauny* (மலாக்காச்சாம்பிராணி - malákkáççámbiráni, Tam.). Same as benzoin [q.v.].

SAMJHASH (سمجھایش - samjháish, *Hind.*). From (samjhána, pers. to make one understand). Satisfaction. Explaining. Reckoning.

SAMPUNGY (சம்பங்கி - shambangi, *Tam.*). Tamul corruption of (champaka, san. the tree, so called). Hindoo 2nd or pers. name. Common among non-bramins [peyar].

SAMT (سمت - samt, *Ar.*) [azimuth, zenith]. Direction [dic, tisay].——*Sammat* (سمت - samat, Hind.). Corruption of (samt, ar. direction). A sub-division of a talook [q.v.], corresponding to a hobly [q.v.]. Sammatdar is the manager thereof. Compare Taraf and Zillah.——*Samoot* (سمت - saműt, Hind.). Means road or way. Quarter.

SAMULCOTTAH (చామర్లకోట - tsámarlakóta, Tel. sámalkót *). From (sámari, tel. gymnast + kóta, tel. fort). Town, Cantonment, Canal; Godavery dist., Cocanada div.; pop. 7,313; lat. 17° 03′; long. 82° 13′; from Cocanada N.N.W. 9 miles; from the sea W. 10 miles. On right side of a stream falling into Bay of Bengal. Connected with Cocanada, Dowlaishweram and Rajahmundry by a navigable canal. The cantonment, north-west of village, is about three-quarters of a mile in diameter. Former residence of rajah of Pittapore. Ceded by Nizam in 1766. Originally a sanitarium for troops in Godavery district. Barracks were built in 1786. Fort demolished in 1838. Abandoned as a military station in 1868, but owing to Rumpa disturbances of 1879, two companies under a British officer were stationed here. There are a few tanks in the neighbourhood, but there are good wells in the cantonment. The soil is alluvial and the surrounding country cultivated. Lutheran church mission station.

SAN (سن - san, *Hind.*). From (saná, ar. to turn round); so a single revolution of the sun. Year. The old arabic year prior to fusly. Consisted of four seasons each of three months. These months were lunar, and to adapt the year to solar the arabs added a month [nasee] at the end of every three years [hijra].——**(1)** The seasons [ritoo] were as follows:—"*a*" *Khareef* (خریف - kharíf, Ar.; خزان - khazán, Pers.; پت جهڑی - patjharí, Hind.). Ar. from (kharafa, ar. to pluck or gather). Pers. from (khazz, pers. woollen cloth); which people put on during the season. Hind. from (pat, hind. leaf + jharí, hind. falling). Autumn. Began when the sun entered Libra [meezaun]. September to November.—"*b*" *Shitah* (شتاء - shitá, Ar.; زمستان - zamistán, Pers.; جاڑا - járá, Hind.). Ar. means intensely cold. Pers. from (zam, pers. cold + sitán, pers. denoting excess). Hind. from (jada, san. chill). Hind. also (sarmá); (thandkálá). Winter. Began when the sun entered Capricornus [jaddy]. December to February.—"*c*" *Sayeef* (صیف - saif, Ar.; ربیع - rabí, Pers.; بہار - bahár, Hind.). Hind. also (basant). Means to stay. Also called Rabee. Spring. Began when the sun entered aries [hamel]. March to May.—"*d*" *Kyze* (قیظ - kaiz, Ar.; تابستان - tábistán, Pers.; گرما - garmá, Hind.; دهوپ‌کالا - dhúpkálá, Dec.). Means the intense heat from the auroral rising of the pleiades [sooreiyah] to that of canopus [sooheil]. Summer. Began when the sun entered cancer [sartaun]. June to August.——**(2)** *Sanwar* (سن‌وار - sanvár, Hind.). From arabic. Yearly [saul].——*Saul* (سال - sál, Hind.). Year. 12 maheenas or lunar months = 1 saul [caulam]. Same as Samvatsaram [caulam, 4], Varsham [caulam, 2]. Saul e cumree is lunar year. Saul e einda is ensuing year. Saul e haul is current year. Saul e muzcoor is above-mentioned year. Saul e shumsee is solar year. Saulgoojasta is last year [hijra].——*Sonnat* (سنت - sanat, Hind.). Plural Sanwaut. Years.——*Sonnat rupee* (سنات روپیہ - sanátrúpiya, Hind.). An old rupee. Formerly rupees were distinguished by the years in which coined, and after four or five years suffered a depreciation and became Sonnat [rupee].

SANA (सन - sana, *San.*). Old.——*Sanatcomauran* (सनत्कुमार - sanatkumára, San.). From (sanat, san. bramha, the ancient + kumára, san. son). One of the four sons of Bramha [q.v.].——*Sanautanan* (सनातन - sanátana, San.). Means eternal. One of the secondary avatars [avatar] of Vishnoo [q.v.]. Distinguish from Sautauny.

SANAH (ثنا - saná, *Hind.*). Praise, congratulation. Prefixed to an alam forms a lacab; as Sanah ally, ally's praise [ism].

SANDAL (चन्दन - chandana, *San.*; गंध - gandha, *Mahr.*; श्रीगांद - shrígánda, *Conc.*; شجر صندل ابیض - shajarisandaliabyaz, *Ar.*; درخت صندل سپید - darakhtisandalisupíd, *Pers.*; سفید چندن - sufedchandan, *Hind.*; صندل کا جهاڑ - sandalkájhár, *Dec.*; ಶ್ರೀಗಂಧಮರ - shrígandhamara, *Can.*; గంధపు చెట్టు - gandhapuchettu, *Tel.*; ചന്ദനം - chandanam, *Mal.*; සඳුන් - sandun, *Singh.*; சந்தனம் - shandanam, *Tam.*). Title from arabic. San. from (chand, san. to gladden). Mahr. means fragrant. Conc. from means holy fragrance. Ar. from (shajar, ar. tree + sandal, ar. sandalwood + abyaz, ar. white). Pers. from (darakht, pers. tree + sandal, ar. sandal + supíd, pers. white). Hind. from (sufed, hind. white + chandana, san. sandalwood). Dec. from (sandal, ar. sandalwood + jhár, hind. tree). Can. from (shrí, san. holy + gandha, san. sandal + mara, can. tree). Tel. from (gandha, san. fragrance + chettu, tel. tree). Singh. from sanscrit. Tam. from sanscrit. San. also (pañchasugandha), meaning five good scented trees; (anindita), meaning not shunned; (shrígandha), meaning holy fragrance; (gandhasára), meaning essence of fragrance; (malayaja), meaning produced in malayam; (bhadrashrí), meaning auspicious + grace; (shríkhanda), meaning auspicious portion; (harichandana), meaning yellow sandal; (tailaparna), meaning produced in tilaparnam, is yellow sandal; (góshírsha), meaning produced in the cow head-like peak of malayam, is yellow sandal; (krishnachandana), meaning black sandal; (valgaka), meaning lovely. Hind. also (katchandan); (gandsárú), from sanscrit. Can. also (gandhácheckke), meaning chip of sandalwood. Tel. also (chandanapuchettu), meaning sandal + tree; (malayamu); (raktakrishnachandanamu), meaning red + black + sandal; (krishnachandanamu), meaning black + sandal; (tellachandanamu), meaning white sandal. Singh. also (sudusandun), meaning white sandal. Tam. also (ulósitham), meaning red sandal; (kulavuri), meaning shining is red sandal. Greek *σάνταλον*, *σάνδαν*. Late greek *ξύλα σαγάλινα*. Lignum santalinum album vel citrinum, Lignum santali of chemists. Title otherwise Algum, Almug, Chandanam, Malayam tree, Sandalwood, Saunders, True sandalwood, White sandalwood. Botanically Santalum album, linn., santalaceæ [vricsham, 116]. Generic name from sanscrit through arabic. Alias Sirium myrtifolium. Tree, 20-25 feet; branches numerous, much dividing and spreading, and forming nearly spherical heads; leaves opposite on short petioles, oblong, smooth, entire, glaucous below; thyrsi axillary and terminal, shorter than the leaves; pedicels opposite, lower pair of each thyrsi usually three-flowered; flowers numerous, small, first straw-colored, afterwards deep ferruginous purple, inodorous; calyx campanulate, four-cleft; corolla none; berry round, smooth, black when ripe, succulent, crowned with the calyx, one-celled; nut solitary; flowering nearly all year; found up to 4,000 feet; the trees attain their prime in twenty to thirty years, and have then trunks as much as a foot in diameter; often cultivated in gardens. Essential volatile pale yellow oil [yennay] is obtained by distillation of the heart-wood and roots; its specific gravity is about 0·980. Sandal is one of the trees of the booddhistic [booddha] paradise. It is a somewhat delicate tree, is killed outright by fire, is very impatient of injuries to the roots and bark, and requires shade and protection while young; the value of the wood is dependent upon a volatile oil which is contained in the heart-wood only, and in order that this oil may be developed in the highest possible degree, it is necessary that the growth of the tree should be slow, consequently sandalwood grown in arid situations on poor stony soil is, though small, of far more value than is that produced by large well-grown trees growing in moist situations and in richer soil; sandalwood is not eaten by white-ants [q.v.], and its contained oil preserves it from decay in a remarkable degree, of which the present collection of old sandal roots left in the ground for many years past is a conclusive proof; in former times it was the custom not to uproot, but to fell, sandal trees, whereas for many years past the trees have been uprooted, and the roots, which contain a higher percentage of oil than the wood, are in great demand and command high prices. The method of preparation is as follows:—the trees having been uprooted are roughly deprived of bark and of some of the sap-wood; the trunks are then sawn off above the roots, cut into lengths, all the white wood removed, the billets adzed and subsequently planed and smoothed, the roots adzed and freed of all adhering bark, mud and white wood, and the various products, billets, chips, small pieces, hollow wood, saw powder, &c., collected and classified. Sandalwood oil is procured from the wood by distillation, the roots yielding the largest quantity and finest quality of oil; the body of the still is a large globular clay pot [chatty] with a circular mouth, and is about 2½ feet deep by 6½ in circumference at the bilge; no capital is used, but the mouth of the still, when charged, is closed with a clay lid having a small hole in its centre, through which a bent copper tube about 5½ feet long is passed for the escape of the vapour; the lower end of the tube is conveyed inside a copper receiver, placed in large porous vessel containing cold water; when preparing the sandal for distillation, the white or sap-wood is rejected, and the heart-wood is cut into small chips, and distillation is slowly carried on for ten days and nights, by which time the whole of the oil is extracted; as the water from time to time gets low in the still, fresh supplies are added from the heated contents of the refrigerator; the quantity of oil yielded by wood of good quality is at the rate of 10 oz. per maund, or 2·5 per. cent; it is transparent and of a pale yellow color, and has a resinous taste [raul] and sweet peculiar smell, which is best appreciated by rubbing a few drops of the oil on the warm hand; its specific gravity is about 0·980; the average price is about Rs. 8 per lb. The finest sandalwood is that which has grown slowly on rocky, dry and poor land; the trees found in a rich alluvial soil, though of very fine growth, produce no heart-wood and are consequently valueless; the wood is reduced, by rubbing on a stone, to a fine powder; the roots and chips go to the still for oil. The wood ground up with water to the consistence of paste is a common emulsion in cutaneous inflammations; the oil, a remedy in gonorrhœa, superior to copaiba and cubebs [cubeb pepper]; veidyans [q.v.] prescribe the wood in powder in ardent, remittent fever from its supposed sedative and cooling qualities; in cases of morbid thirst, the powder is taken in cocoanut [q.v.] water [yilaneer]; it is rubbed to the body after bathing in the hot weather, with a view to cool the system and check too copious a perspiration; the best remedy for prickly heat [q.v.]; gives to pharm. nonofficinal sandalwood oil, like copaiba. Wealthy natives add sticks of sandalwood to the funeral pyre [shoodcaud]; the wood rubbed up into a paste, is used by bramins [q.v.] for caste-marks [naumam]; wood and saw-dust are burned as incense in temples; wood is a preservative against insects; large quantities of sandalwood oil are annually exported; the oil forms the basis of many scents. Two kinds of the wood known in commerce,

white and yellow :—white sandalwood is coated with thick compact bark having a grey and brownish epidermis, the wood is very hard heavy susceptible of a fine polish, in billets of middling size, is nearly inodorous, its taste being slightly bitter; yellow or citron sandalwood is straight or twisted, lighter than water when taken from the trunk, heavier if from the roots in yellow, fawn-colored, or reddish billets, slightly shining, of middling hardness, taking a fine polish, and being very easily cleft; wood cannot be procured of a large size; the sap-wood and branches are worthless; heart-wood is used for carving, for incense and perfume. A variety with the wood almost scentless is found on eastern coast mountains; only differs slightly in the shape of the leaves which are more lanceolate, and in the scales or lobes of the disk being jagged. What is called agil cuttay [eagle wood] in tamul and agarkah khor in hindostany is reddish-colored resinous fragrant bitter wood, sometimes added in powder to powdered sandalwood to increase its fragrance. There is a Tamul proverb :—அரைக்கினும் சந்தனம் அதன் மணம் அறு து—"though sandalwood be rubbed, its fragrance "will not be destroyed." There is another :—சந்துக்கள் ஓடு சந்துக்கள் சேர்வார், சந்தனத்தோடு கற்பூரம் சேரும்—"the powerful associate with the powerful, sandal "paste mixes with camphor [q.v.]." Sandal with Mahomedans is a ceremony in honor of saints [walee] celebrated the day prior to Oors [q.v.], when pots containing sandal [q.v.] paste, &c., are carried in procession through town and placed at the tomb [durgah] for use of votaries [cawder wally].——*Bastard sandal* (காட்டுச்சந்தனம் - káttuçandanam, Tam.). Tam. means wild sandal. Same as Deccany deodar.——*False sandal* (నక్కెరు - nakkéru, Tel.). Title from yellow wood. Tel. also (kondanakkera), meaning hill + the tree; (úranakkera), meaning village + the plant. Title otherwise Hog plum [wild mango], Mountain plum, West indian sea-side plum. Botanically Ximenia americana, willd., olacineæ [vricsham, 38]. Straggling shrub, 15 feet; calyx small, four-cleft; petals four, very hairy inside; thorns axillary or terminating the branchlets, solitary, bearing occasionally leaves or flowers or even smaller thorns; leaves alternate, oval, emarginate; peduncles four to six-flowered; drupe oval, flesh thick; nut crustaceous; flowers small, dull white, fragrant; smelling of cloves [lavangam]. Small, oval, red or yellow pulpy fruit, an inch long, of an acid-sweet aromatic taste, with some degree of austerity; when ripe eaten by the natives; kernels also eaten taste much like filberts [findak]. Powder of wood used by bramins in religious ceremonies. Wood yellow, somewhat like sandalwood. No other common species here.——*Santoor* (سنتور - santur, Malay). Same as Malay red wood.

SANDRACH (चंद्रस - chandrasa, *Mahr.*; سندروس - sandrús, *Ar.* and *Pers.*; چندروس - chandrús, *Hind.*; چندرس - chandras, *Dec.*; சாந்திராசு - shándirásu, *Tam.*). Title from arabic. Mahr. from hindostany. Ar., &c., from persian. Title otherwise Citrus wood, Jointed arborvitæ, Pounce tree, Sandarach gum tree. Botanically Callitris quadrivalvis, vent., coniferæ [vricsham]. Evergreen ornamental tree 20 feet high; leaves flattened, articulated; female catkin tetragonal, with four oval valves each furnished with a point, and two of which bear seed only. Sandrach resin exudes naturally from the bark, but is commonly obtained from incisions. Formerly of wide renown as a medicine, now only an ingredient in varnishes [rangh]. Imported from Morocco.——*Sandroos* (سندروس - sandrús, Hind.). Same as Sandrach.

SANG (سنگ - sang, *Pers.*). Stone [cull].——*Sang i samauk* (سنگ سماق - sangisamák, Hind.; చలవరాయి - tsalavaráyi, Tel.). Hind. from (sang, pers. stone + samák, pers. sumach). Tel. from (tsalava, tel. coolness + ráyi, tel. stone). Tel. also (chandrakántamu), meaning moon + loving; from melting in moonlight. Porphyry. Granitic porphyry [dhoomra cull] is common in Mysore. It takes a fine polish, and is used in making ornaments of public buildings. It is chiefly composed of large masses of felspar [mauvayira cull] in a small grained mixture of grey quartz [vencull] and black mica [abruck, ratnam, shalavay cull].——*Sang i sitaura* (سنگ ستاره - sangisitárah, Pers.). Pers. from (sang, pers. stone + sitárah, pers. star). Gold stone. A fossil. The ground is of a cinnamon [q.v.] color; it is opaque and completely marked and engrained in every part with small golden-colored speckles, which give it the appearance of glass filled with gold dust [ratnam].——*Sang i soolimauny* (गोमेद - goméda, San.; جزع - jaza, Ar.; سنگ سلیمانی - sangisulaimání, Pers.; సులిమానిరాయి - sulimánráyi, Tel.). San. from (gó, san. cow + méda, san. fat); of the color of cow's fat; being same as sardonyx and cinnamon stone. Pers. from (sang, pers. stone + sulaimán, ar. solomon). Tel. from (sulimánu, tel. solomon + ráyi, tel. stone). Onyx. A species of agate [akeek], in which the silicious particles are arranged in alternating horizontal layers of opaque, white and translucent, grey or brown. Found in the Godavery [ratnam].

SANGCOOPPY (कुण्डली - kundalí, *San.*; वनजाई - vanajái, *Mahr.*; سنگ کوپی - sangkúpi, *Hind.*; اسمدھاری - ismdhári, *Dec.*; ವಿಷಮಧಾರಿ - vishamadhári, *Can.*; పిసినిక - pisinika, *Tel.*; ശങ്കുങ്കുപ്പി - shankunkuppi, *Mal.*; වල්ගුරන්ද - valguranda, *Singh.*; சங்கங்குப்பி - shangangruppi, *Tam.*). Title from tamul. San. means circular [hazaurdanah]. Mahr. from (vana, san. forest + jáí, san. jasminum auriculatum, vahl.). Hind. from (sang, hind. companion + kúpí, hind. acalypha indica, linn.), by corruption. Dec. from canarese. Can. from (visha, san. poison + dhara, san. holder), from bitter root and leaves. Tel. from (pisini, tel. gum) [neilgherry satin wood]. Mal. from tamul [crow creeper]. Singh. from (val, singh. wild + gúranda, singh. celtis cinnamomea). Tam. from (shangu, tam. the plant, azima tetracantha, lamk. + kuppai, tam. heap of rubbish). Can. also (kundali). Tel. also (pisangi); (nallauppi), meaning black + capparis sepiaria, linn.; (érupittsa), meaning river + the plant; (étipisinika), meaning river + the tree; (áti), meaning strong [neilgherry satin wood]; (takkólamu). Mal. also (nírnoççi), meaning water + vitex negundo, linn. [water notchy]. Tam. also (pínárisanganguppi), meaning excrement + to smell + the plant; (pínárisangu), meaning excrement + to smell + azima tetracantha, lamk. Title otherwise Smooth volkameria. Botanically Clerodendron [bhaurgam] inerme, gærtn., verbenaceæ [vricsham, 102]. Alias Clerodendron buxifolium; Volkameria inermis. Climbing branched shrub; leaves small, smooth, shining, oval or elliptic; cymes axillary, as long as the leaf, three-flowered, collected into a terminal corymbose panicle; flowers white; the tubes of the corolla long and slender, greenish-white; common along the coast, near the sea; flowering nearly all the year. Juice of root and leaves bitter, prescribed as alterative in scrophulous and venereal affections; given either pure, or in conjunction with castor-oil [lamp-oil]. The medicinal properties closely resemble those of chiretta [q.v.]. Often cultivated for hedges [vaily]. Another species is infortunatum [saraswaty's leaf].

SANNAM (సన్నము - sannamu, *Tel.*; சன்னம் - shannam, *Tam.*). Slender. Plant first term. Ex., where transl. is of second term :—Acacia farnesiana (sannajáli), acacia; Eragrostis plumosa (sannapurulehullu), parrot + grass. See gloss. paragraphs.——*Sanna biyyam* (సన్నబియ్యము - sannabiyyamu, Tel.). From (above + biyyamu, tel. rice). Paddy. Anantapore, Bellary and N. arcot. Capila sannabiyyam means brown; Garica sannabiyyam means bent grass, cynodon dactylon, pers., perhaps from stalks; Poolla sannabiyyam means whitish or reddish; Tella sannabiyyam means white [paddy].——*Sannauloo* (సన్నాలు - sannálu, Tel.). Means fine grain. A Vizagapatam paddy. Caushy sannauloo means benares; Eety sannauloo means lance, as fine as lance, point; Gutty sannauloo means solid, from hard rice; Jaltaur sannauloo means gold lace, from color and fineness; Vanka sannauloo means curved, from shape of grain; Yerra sannauloo means red, from color of grain [paddy].

SANOO (చను - tsanu, *Tel.*). Breast.——*Sanapaul* (చనుపాలు - tsanupálu, Tel.). Short for (tsanupáluvittulu), meaning breast-milk seeds, from paste of powdered seeds being applied in ophthalmia with breast milk. Same as Black horse-gram.——*Sanoobanda* (చనుబండ - tsanubanda, Tel.). From (tsanu, tel. breast + banda, tel. rock). Zemindarry, Village; Kistna dist., Vissanapett division; pop. 2,869; lat. of village 17° 02'; long. 80° 50'; from Masulipatam N.N.W. 61 miles; from Tirvore S.E. 14 miles. Built by the Zoopully [q.v.] zemindar about 100 years ago. Peshcush Rs. 1,357.

SAPPAN (पत्त्राङ्ग - pattránga, *San.*; पतंग - patanga, *Mahr.*; सप्पंगु - sappangu, *Conc.*; بقم - bakm, *Ar.* and *Pers.*; پتنگ کا پھر - patangkáper, *Hind.*; پتنگ کا جہاڑ - patangkájhár, *Dec.*; ساپنگ - sápang, *Malay*; ಪತಂಗ - patanga, *Can.*; ಚಪ್ಪಂಗ - chappanga, *Too.*; బుక్కాపుచెట్టు - bukkápuchettu, *Tel.*; ବକମ - bokmo, *Oor.*; ചപ്പന്നം - chappannam, *Mal.*; පතංගි - patangi, *Singh.*; வத்தங்கி - vattangi, *Tam.*). Title from malayalam. San. from (patra, san. leaf + anga, san. body); from dye used in decorating body in fancy lines and figures. Mahr., &c., from sanscrit. Tel. from arabic. Mal. from (chappu, mal. leaf + anga, san. body), cf. sanscrit. Singh. from sanscrit. Tam. from sanscrit. San. also (raktamukta), meaning blood + liberator; from red dye. Pers. also (bakmikirmiz), meaning crimson sappan. Hind. also (tairí), referring to pods. Can. also (patangachekke); (chapengamara); (sappanga) [long zedoary]. Tel. also (bakánuchettu), by corruption from arabic; (patangachettu); (ókánuchettu). Tam. also (shappangam); (pattanam); (vattékku), meaning strong teak. Title otherwise Brasiletto, Brazil wood, Buckum, Narrow-leaved sappan, Red-wood tree, Vattangy. In mediæval commerce known as brazil wood, from color of the braise or hot coals of its wood; when on the discovery of brazil a similar dye wood was found there, the name of the indian wood was given to both country and dye; hence the term brazil; the present article is now generally called either sappan or buckum; botanically Cæsalpinia [coobairauchy] sappan, linn., leguminosæ [vricsham, 48]; specific name from malayalam. Tree 40 feet, armed; pinnæ ten to twelve pair, leaflets ten to twelve, unequal-sided, obliquely oval-oblong, emarginate, pale on the under side; terminal panicles; legumes compressed, glabrous, elliptic-obovate, obliquely truncated, cuspidate at the apex, three to four-seeded; flowers yellow; flowering in hot season; common especially on w. coast. Wood contains much

tannic and gallic acids, and is a good substitute medicinally for log-wood; decoction is astringent in diarrhœa; mentioned in pharm., but non-officinal. Cultivated on w. coast for sake of red dye [shauyam] yielded by chips of wood in decoction; the straw of palghaut mats [boriyah] is dyed with this; so also cheap cloths in many places; powder [goolaul] used at holy [q.v.] festival is extracted from it; a custom prevails among malabar moplahs [q.v.] to plant on the birth of a female child forty or fifty seeds of sappan, and the trees which reach maturity in ten or twelve years are her dowry when she is married; the wood is exported in timber, or with the dye in cakes; the dye is precipitated dark brown with iron [auhan] and red with alum [padicauram]; it is also employed along with chayroot [q.v.]; alcohol forms a deep red tincture. The wood takes a fine polish and does not warp or crack; it is solid, heavy, hard, compact, whitish while recent, but reddening on exposure to the air; it is tasteless and inodorous; communicates a fine red color to water.

SAPTAM (सप्त - sapta, *San.*). Seven [haft, saut]. Constant in combination, see below. For sapta locam or seven regions of the world see Locam. For sapta nagaram or seven sacred cities of the hindoos see **Nagaram**. For sapta naracam or seven hells see Locam, Pautaulam and Swargam. For sapta swaram or seven principal notes or tones in music [sangeetam] see Swaram. For saptauvastay or seven stages of soul in its progress from ignorance to pure knowledge see Avastay. For sapta vauram or seven days of the week see Vauram. For sapta padaurtam or seven categories in logic [nyauyam] see Padaurtam.——*Saptacam* (सप्तक - saptaka, San.). Collection of seven; the musical gamut [swaram]; also a religious ceremony performed on the twelfth day after death, which consists in giving seven kinds of things as rice, money, &c., to seven bramins.——*Sapta caranam* (सप्तकरण - saptakarana, San.). From (above + karana, san. action). The funeral rite of joining seven ingredients. Raw rice, milk, honey, curds, cow's urine, ghee and oil seeds are mixed into a mass, and then divided into three portions intended to represent three of the ancestors of the deceased. By this rite the deceased becomes assimilated with his ancestors [pitry], and is entitled to admission to the lowest station in the divine region [locam] up till this time occupied by his father, who now ascends higher. See vol. II, 237.——*Sapta dweepam* (सप्तद्वीप - saptadvípa, San.). The seven continents:—Coosham, Crowncham, Jamboo, Placsham, Pooshcaram, Shaucam, Shaulmaly [bhoogolashastram, dweepam]. See vol. I (2).——*Sapta jauty* (सप्तजाति - saptajáti, San.). More commonly Sapta jenmam. The 7 kinds of birth, or 7 genera, are:—gods, men, beasts, birds, reptiles, subaqueous creatures and inanimate things [jauty]. The idea of seven births is a common one among hindoos. There is a stanza from Cooral:—எழுபிறப்புந் தீயவை தீண்டாபழிபிறங்காப், பண்புடைமக் கட்பெறின்—"the evils of the seven births shall not touch those who "obtain children of a good disposition, free from vice." And another:—எழுமையெழுபிறப்பு முள்ளுவர்தங்கண், விழுமந்துடைத்தவர்நட்பு—"the wise will remember through-"out their seven-fold births the love of those who have wiped "away their affliction." And another:—ஒருமையுளாமை போலைந்தடக்கலாற்றி, னெழுமையுமேமாப்புடைத்து—"should one throughout a single birth, like a tortoise keep in, "his five senses, the fruit of it will prove a safeguard to him "throughout the seven-fold births." But compare the remarks under Samsauram.——*Sapta loham* (सप्तलोह - saptalóha, San.). Means seven metals [loham]. Applied by natives to:—five simple metals, of gold [pon], silver [velly], copper [taumram], iron [auhan] and lead [eeyam] or tin; and two mixed metals, of vengalam [cunts] a mixture of copper and tin making bell-metal, and tarah a compound of copper and zinc [tootnaug] making pinchbeck [tambauk].——*Sapta maigham* (सप्तमेघ - saptamégha, San.). The seven clouds; named from Sanscrit words respectively denoting:—gem, water, gold, flower, sand, stone, fire [maigham].——*Saptamautah* (सप्तमाता - saptamátá, San.). From (above + mátá, san. mother). Seven matrons; seven small figures of stone standing in the first enclosure of the temple [coil, pagoda] of Ayenaur [ayen, mautah].——*Saptamy* (స ప్త మి - saptami, Tel.). Seventh lunar day. Lunar [chaundramaunam] festival [pundigay, 3e]. The seventh tity [q.v.] of the waxing [shooclapacsham] or waning [krishnapacsham] moon of any lunar month [bhauscara saptamy, rata saptamy].——*Sapta nuddy* (सप्तनदी - saptanadí, San.). Means seven rivers. The seven sacred rivers:—Gungay, Yamoonay, Saraswaty, Nerbudda, Cauvery, Coomary and Godavery. According to a later classification four more are added making the list eleven, as follows:—Sindhoo or indus, Tamrapurny, Toongabudra and Kistna.——*Saptapady* (सप्तपदी - saptapadí, San.). From (above + pada, san. foot). Pacing seven steps round the sacred fire, an essential part of a hindoo marriage [calyaunam]. They are taken towards the north-east quarter [ashtadic, tisay]; the first for bodily energy, the second for valour, the third for increase of wealth, the fourth for well-being, the fifth for offspring, the sixth for happy seasons [ritoo], and the seventh for devoted friendship.——*Saptaparnam* (सप्तपर्ण - saptaparna, San.). From (above + parna, san. leaf); from leaves appearing in whorls of seven. Botanically the Alstonia genus, apocynaceæ [vricsham, 87]. Trees or erect shrubs with milky juice; leaves entire, opposite, often whorled; flowers small, white and disposed in cymes at the ends of branches; fruits consist of two cylindrical pods; seeds have a tuft of silky hairs at each end. The species best known to the natives are:—scholaris [dita], venenata [wild gannair].——*Sapta parvatam* (सप्तपर्वत - saptaparvata, San.). The seven mountains; Mahendram, Malayam, Pauripautram, Ricsham, Sahyam, Shooctimat, Vindhyam [coolaparvatam].——*Sapta rishy* (सप्तर्षि - saptarshi, San.). From (above + rishi, san. sage). Seven sages [moony, rishy]. The seven vedic sages or patriarchs, otherwise bramharishies or mind-born sons of bramha [q.v.], are:—Mareechy, Atry, Angiran, Poolastyan, Poolahan, Cratoo, Vasishtan. These form in astronomy [jyotisham], the constellation [nacshatram] of Ursa major or the Great bear [doobhe acbar, maharicsham]. Seven sages are also assumed for each manwantaram [q.v.], and the names of these differ with different series. The names for the present manwantram are:—Atry, Bharadwaujan, Cashyapan, Gowtaman, Jamadagny, Vasishtan, Vishwaumitran.——*Sapta samoodram* (सप्तसमुद्र - saptasamudra, San.). The seven seas; salt, sugar-cane, toddy, ghee, curd, milk and fresh-water [bhoogolashastram, samoodram].——*Sapta santaunam* (सप्तसन्तान - saptasantána, San.). From (above + santána, san. extension). The seven méritorious acts by the performance of which a hindoo hopes to attain salvation [mocsham, santaunam]. These acts are:—digging of tanks, digging of wells, endowments for charitable purposes, performance of the oopanayanam [q.v.] ceremony to a bramin, erecting a pagoda [q.v.] to the supreme deity, planting groves [tope], writing of books.——*Sapta saugara yautray* (सप्तसागरयात्रा - saptaságarayátrá, San.). From (above + ságara, san. ocean + yátrá, san. festival). A religious ceremony which consists in a gift of the seven seas, i.e., a quantity of each of the seven substances respectively composing the seven samoodrams [q.v.], milk, curd, ghee, honey, wine, salt water, and fresh water.——*Saptavaudy* (सप्तवादी - saptavádí, San.). From (above + váda, san. proposition). Jeinas; assertors of seven propositions or categories. The categories are:—a thing is; it is not; it is and it is not; it is not definable; it is but not definable; it is not neither is it definable; it is, and it is not, and it is not definable [jeina]. Compare Padaurtam.——*Saut* (سات - sát, Hind.). Seven [haft, saptam.]——*Sautghur* (ساتگڑھ - sátgarh, Hind.; సాతఘడి - sátghadi, Tel. satghur *). From (sát, hind. seven + garh, hind. hill). Sanscrit name (saptagiri), means seven hills. Tel. also (édukondaladurgamu), means seven-hill fort. Village; North arcot dist., Goodiyattam tal.; lat. 12° 57′; long. 78° 47′; from Chittore S.W. 31 miles; from Goodiyattam W. 10 miles. Small place. Seven hills with hill forts. The highest of the fortified peaks rises to 2,367 feet, the other six somewhat lower. They all form portions of one mass of hills, some of them with very precipitous sides. Narrow approaches exist which are easily defended, though the forts are scattered and must have required a large garrison. The works were improved by Mahrattas and Mahomedans. The Nawaubs [q.v.] of Carnatic [q.v.] had large gardens here of orange [q.v.] and mango [q.v.] trees, known as the Sautghur baughayets [q.v.]. Sautghur oranges still well known. Mango grafts originally taken from hence to Vellore and other places now produce noted fruits. The descendants of the people who used to tend the gardens are almost the sole inhabitants of the village. The jagheer [q.v.], worth three lakhs [q.v.], was originally granted by Mahomed shah to one Hirausat khan, who upon the assassination of Sufder ally at Vellore acted as Naib [q.v.] of the minor Mahomed Sayeed. When the latter was assassinated at Arcot, Anwarood deen sent Hirausat khan back to his jagheer. He was succeeded by his son and grandson, but Wallajah removed the latter on account of his relationship to Chundah Sahib, and gave him the small jagheer of Cauvanore worth Rs. 40,000. This was resumed after Hyder's war, and a small pension substituted. Trig. station in lat. 12° 57′ 24·94″; long. 78° 47′ 05·95″; height 2,317 feet; from Goodiyattam W. 9 miles; from Pernambutt N.E. 3 miles.

SAR (سر - sar, *Pers.*). Head. Prefix in compounds; as Sarhad, head + limit.——*Saranjaum* (سرانجام - saranjám, Hind.). From (above + anjám, pers. end). Baggage [saumaun].——*Sarausaree* (سراسری - sarásarí, Hind.). Means end to end. An average [ramauramy].——*Sar carcoon* (سرکارکن - sarkárkun, Hind.). From (above + kárkun, pers. workman). Head vernacular clerk; also port officer.——*Sarfarah* (سربراهی - sarbaráhí, Hind.). From (above + ba, pers. for + ráh, pers. road). Furnishing supplies.——*Sarfrauz* (سرفراز - sarfaráz, Hind.). From (above + faráz, pers. one who raises). Exalted. Part of lacab; as Sarfrauz ood dowla, exalted of the empire [ism].——*Sarhad* (سرحد - sarhadd, Hind.). From (above + hadd, ar. boundary). Boundary [hudd].——*Sarpech* (سرپیچ - sarpech, Hind.). From (above + pech, pers. coil). A band consisting of square pieces of gold plates, threaded together, and 2 or 2½ cubits long. Worn by the Mahomedan nobles [puggry].——*Sarwar* (سرور - sarvar, Ar.). Sovereign. Name of a Mahomedan saint. Alam; as Mahomed sarwar, double alam. Also part of lacab; as Sarwar ool moolk, chief of the empire [ism].——

Serang (سرهنگ - sarhang, Hind.; സ്രാങ്കു - sránku, Mal.). From (above + hang, pers. soldier). A head native boatman [tindal]. ——*Sherishta tahreer* (سررشته تحرير - sarishtahtahrír, Hind.). Fees paid for preparing accounts, &c.——*Sherista* (سررشته - sarishtah, Hind.). From (above + rishtah, pers. thread). Record; file. ——*Sheristadar* (سررشته‌دار - sarishtahdár, Hind.). From (sarishtah, pers. a record + dár, pers. holder). Keeper of the records. The Recorder in a court of justice under the Company's government. The head manager in a revenue office or in a court. In the talook [q.v.] the Sheristadar ranks after the Tahsildar [q.v.] and has charge of the treasury work. The Huzoor [q.v.] sheristadar is the head of the Collector's office.——*Sirdar* (سردار - sardár, Hind.). From (above + dár, pers. holder). A chieftain. Prefixed to an alam forms a lacab; as Sirdar ally, ally the chief [ism].——*Sirkele* (سرخيل - sarkhail, Hind.; சர்க்கீல் - sharkkíl, Tam.). From (above + khail, pers. a body of men). A minister [muntry]. The head of a clan or sect. A title of rank amongst the Mahrattas [peyar].

SAR (सर् - sar, *San.*). To move, flow, extend, pervade; connected with roots (srij) to create and (srip) to creep.——*Sarakk* (சரக்கு - sarakku, Tam.). See sep. title.——*Saramay* (सरमा - saramá, San.). Means the runner. The dog of Indran [q.v.]. Compare Cerberus.——*Saras* (सरस् - saras, San.). From (sri, san. to go); originally applied to flowing water. Water.——*Saraswaty* (सरस्वती - sarasvatí, San.). From (saras, san. water + vat, san. suffix of possession); originally a river deity. Goddess of learning. The shacty [q.v.] or consort of Bramha [q.v.] as the author of the vedams [q.v.]. In the Rig vedam Bramha is a word, Saraswaty its utterance. Hence Saraswaty is the goddess of eloquence and poetry; as indicated by the name Vauny frequently applied to her. As such she is invoked by poets, but less frequently in modern times than Vigneshwaran [q.v.]. The local Sheiva legend at Madura states that Saraswaty became manifest in the letters of the Tamul alphabet [varnamaulay] in various localities. She is represented in the south by the image of a female in a standing posture, with four arms and hands; in one of the two right hands she holds a flower, which she offers to her husband by her side, and in the other right hand a book of palm-leaves [grantam], indicating that she is fond of learning and imparts knowledge to those who study; in one of her two left hands she holds a string of pearls [moty], called shiva maulay, which serves her as a rosary [maulay]; and in the other left hand a small drum; the color of her body is usually white; in her black hair she wears pearls and other ornaments, whilst her hair is so long as to reach to her feet. Her image is not worshipped in any pagoda, but, like that of her husband, only painted or carved as an ornament at pagodas [q.v.] and idol [shilay, vigraham] cars [rath]. Nor does she receive any of the usual offerings. But there are some books setting forth her praise, of which one called Saraswaty antaudy is best known. Also a great festival [navarautry], lasting nine days, is celebrated in her honor in the month of September, more especially by the teachers and their pupils, and by the poets and other writers [saraswaty poojay]; all of whom adore Saraswaty and ask her to grant them good understanding and knowledge. Compare Pillaiyaur chatoorty. The devout make also an image of the goddess, and carry it about in the streets with music; and on the ninth day, Saraswaty, together with Parvaty [q.v.] and Lutchmy [q.v.], is worshipped by teachers and pupils under the form of their iron styles and books, by soldiers under the form of their weapons, by artisans under that of their tools, &c. This is called Saraswatypoojay; also Ayoodha poojay, instrument worship. Of Saraswaty various stories are related in the Pooraunams [q.v.], and many names are given her, viz.:—Bhauraty, the goddess of speech; Devy; Gayatry, the most sacred verse of the vedams, being personified as saraswaty; Nyauna moorty, wisdom's form; Isaimadanday, music-girl; Calay magal, science daughter; Naumagal, tongue-lady; Oolagamautah, mother of the world; Panoovalautty, science dame; Vaukkaul, the same as bhauraty; Vauny, the same as bhauraty, &c. To Saraswaty poets are indebted for their skill and inspiration. The Jeinas [q.v.] have a female deity of this name peculiar to themselves [matam]. See vol. I (73), (79).——*Saraswaty bhandaura* (ಸರಸ್ವತಿಬಂಡಾರ - sarasvatibandára, Can.). From (sarasvatí, san. goddess of wisdom + bhandára, san. treasury). Library.——*Saraswaty poojaurambham* (సరస్వతీపూజారంభం - sarasvatipújárambham, Tel.). Means saraswaty, the water goddess, the muse of science and art + worship + beginning. The fourth to ninth days of Dusserah [q.v.]. On these days natives collect their books and instruments of trade and profession for future adoration.——*Saraswaty poojay* (సరస్వతీపూజ - sarasvatipúja, Tel.). Means saraswaty, the water goddess, the muse of science and art + worship. The ninth day of Dusserah [q.v.] between 24th September and 23rd October. Same as Mahanavamy. Adoration now takes place [maryanday]. See vol. I (93).——*Saraswaty pooroogoo* (حردون - hirdún, Ar. and Pers.; بامهنى - bámhaní, Hind.; సరస్వతీపురుగు - sarasvatipurugu, Tel.; அரணை - aranai, Tam.). Hind. from (báman, hind. bramin + female suffix). Tel. from (sarasvatí, san. the goddess + purugu, tel. worm). Tam. from (aran, tam. beauty). House lizard [chipkalee] with red tail [aranay].——*Saraswaty's leaf* (भाण्डीर - bhándíra, San.; بهانت - bhánt, Hind.; సరస్వతీఆకు - sarasvatiáku, Tel.; പിരകു - piraku, Mal.; പിന്ന - pinna, Singh.; கருக்கண்ணி - karukkanni, Tam.). Title as mental tonic. San. from (bhand, san. to prosper), useful plant. Tel. from (sarasvatí, san. the goddess + áku, tel. leaf). Mal. from (peru, mal. large); from strengthening quality. Tam. from (karumai, tam. blackness + kanni, tam. the plant). Hind. also (bhat). Tel. also (mandúkabrahmi), meaning frog + the plant, clerodendron siphonanthus, r. br.; (gurrapugaddiáku), meaning horse + grass + leaf; (bokkada). Tam. also (vellaikkanni), meaning white + the plant. Title otherwise Bhaunt. Botanically Clerodendron [bhaurgam] infortunatum, gærtn., verbenaceæ [vricsham, 102]. Alias Clerodendron viscosum; Volkameria infortunata. Under shrub, 2–3 feet; branchlets quadrangular; leaves long-petioled, rounded or ovate-cordate, the upper ones ovate, entire or dentate, strigose and hairy on both sides; panicle terminal, large, spreading, naked; flowers white, tinged with rose inside, the calyx increasing and turning red after the flower withers; drupe black within the increased calyx. Cheap substitute for chiretta [q.v.] as medicinal tonic and antiperiodic; fresh juice of leaves employed as vermifuge and bitter tonic and febrifuge in malarious fevers especially of children; leaf-juice quoted in pharm. but nonofficinal. Another species is Inerme [sangcooppy].——*Saraswaty vilausam* (सरस्वतीविलास - sarasvatívilása, San.). From (sarasvatí, san. goddess of wisdom + vilása, san. sport). Recreations of the goddess of learning. An extensive work embracing the entire range of the religious moral and civil laws of the Hindoos. The dauyabhaugam portion of it or the law of inheritance has been translated into English. A book of some authority to the northward of the Pennair, parallel to the commentary of Vinyauneshwaran, the prevailing authority in the south. Its authorship is ascribed to Prataupa roodra deva, who belonged to the Gajapaty [q.v.] dynasty [raj] of Orissa, and succeeded to that kingdom in A.D. 1503, on the extinction of the Gunga [q.v.] line of kings which had ruled over that country since A.D. 1131.——*Sargam* (सर्ग - sarga, San.). From (srij, san. to create). Creation of the universe [srishty]; one of the five topics which every pooraunam [q.v.] is supposed to treat of. The other four are pratisargam, vamsham, manwantaram and vamshaunoocharitam [punchalutchanam].——*Sarooloo* (సరులు - sarulu, Tel.). Means garland. A Vizagapatam paddy. Ank sarooloo means seedling + the paddy; Canaca sarooloo means gold, from appearance of ears; Mootakauk sarooloo means coarse; Mootya sarooloo means pearl from roundness of rice; Raja sarooloo means king, coarse; Ratna sarooloo means precious stone, fine; from appearance of corn in ears; Sannauk sarooloo means fine; Vankauk sarooloo means curved [paddy]. ——*Sarpam* (सर्प - sarpa, San.). Snake. See sep. title.——*Sarpy* (सर्पी - sarpí, San.). See sep. title.——*Sarshapam* (सर्षप - sarshapa, San.). From (sri, san. to go), from round and useful seeds.—"*a*" Title otherwise Cole, Colewort. Botanically the Brassica genus, cruciferæ [vricsham, 10]. Glabrous and herbaceous plants; native of the temperate regions of the old world; leaves large, rarely entire; flowers yellow; seeds compressed. The genus is wide yielding the majority of the vegetables used by the inhabitants of temperate countries, and many of these are being introduced into southern india. To it belong mustard [rayaun], cabbage [kobee], radish [country radish], and turnip [sarsoon, shalgham], with innumerable varieties of each. The species best known to the natives are:—alba [soofaid rayaun], campestris [sarsoon], campestris, sub. sp. campestris [cauly sarsoon], campestris, sub. sp. napus [rara sarsoon], campestris, sub. sp. napus, var. toria [toriya sarsoon], campestris, sub. sp. rapa [shalgham], juncea [rayaun], nigra [cauly rayaun], oleracea [kobee].—"*b*" Mustard seed. Goldsmiths' weight. 6 sarshapams = 1 yavam [niray, 3f]. Approximate actual value, 1 sarshapam = $\frac{5}{48}$th of a grain, Compare zarrah.——*Sarsoon* (سرسون - sarsún, Hind.). See sep. title.——*Sarwabhooman* (சார்வப்பூமன் - shárvappúman, Tam.). From (sarva, san. all + bhúmi, san. earth). Universal monarch. Hindoo 2nd or pers. name [peyar].——*Sarwa darshana sangraham* (सर्वदर्शनसंग्रह - sarvadarshanasangraha, San.). From (sarva, san. all + darshana, san. philosophy + sangraha, san. epitome). A concise description of various Hindoo systems and sects, religious and philosophical, orthodox and heterodox, even including the science of applying quicksilver or raseshwaram [rasam] regarded as a form of shiva [q.v.] or its preparations to various chemical and alchemical operations, and embracing also Paniny's theory of grammar [lacshanam]. Its author was Maudhavaucharry [maudhavan]. The Sarwa darshana sangraham treats of fifteen systems:—Chaurvaucam, Bowddham, Aurhatam or jeina system, Ramaunoojam or vishishtaudweitam, Poornapranyam or dweitam, Nacooleesha paushoopatam, Sheivam, Pratyabhinyay or recognitive system, Raseshwaram or mercurial system, Owloocyam or veishaishicam, Acshapaudam or nyauyam, Jeimineeyam or poorva mimaumsam, Paunineeyam, Saunkhyam, Pautanjalam or yogam. The Vedauntam [q.v.] philosophy is not included in the list, as it is separately dealt with in a book called Punchadashy.——*Sarwa dayaubhary* (சருவதயாபரி - sharuvathayábari, Tam.). From (sarva, san.

all + dayá, san. clemency + bhri, san. to bear); bearing clemency towards all. Lover of all creatures, Parvaty [q.v.].——*Sarwa loca mautah* (சருவலோகமாதா - sharuvalógamáthá, Tam.). From (sarva, san. all + lóka, san. world + mátá, san. mother). Mother of the whole world; Parvaty [akhilaunda naicky].——*Sarwam* (सर्व - sarva, San.). From (sri, san. to pervade). All.——*Sarwa maunyam* (सर्वमान्य - sarvamánya, San.). From (sarva, san. all + mánya, san. privilege). Lands exempt from every kind of tax [inam].——*Sarwa medham* (सर्वमेध - sarvamédha, San.). From (sarva, san. all + médha, san. sacrifice). Sacrifice for universal success [yanyam].——*Sarwanyan* (सर्वज्ञ - sarvaña, San.). From (sarva, san. all + ñá, san. to know). Omniscient; epithet of the deity of the Jeinas [q.v.].——*Sarwarauz* (سرواج - sarvaráj, Hind.; సర్వరాజు - sarvarádzu, Tel.). From (sarva, san. all + rádzu, tel. king). Lord of all. Proper name [peyar].——*Sarwasautchy* (सर्वसाक्षी - sarvasákshí, San.). From (sarva, san. all + sákshí, san. witness). Epithet of the all-witnessing god.——*Sarwasiddhy* (సర్వసిద్ధి - sarvasiddhi, Tel.). See sep. title.——*Sarwauntaryaumy* (सर्वान्तर्यामी - sarvántaryámí, San.). From (sarva, san. all + antar, san. within + yá, san. to go). Epithet of god as the all-pervading spirit.——*Sarwautmam* (सर्वात्मा - sarvátmá, San.). From (sarva, san. all + átman, san. soul). The supreme spirit, as the universal soul [paramautman].——*Sarweshwaran* (சருவேசுவரன் - sharuvésuvaran, Tam.). From (sarva, san. all + íshvara, san. lord). Shiva, the lord of all [vishveshwaran]. Hindoo 2nd or pers. name [peyar].——*Sarwottaman* (சருவோத்தமன் - sharuvóttaman, Tam.). From (sarva, san. all + uttaman, san. the best). Vishnoo, the best of all [poorshottaman]. Hindoo 2nd or pers. name [peyar].——*Saump* (سانپ - sámp, Hind.). From (sarpa, san. serpent). Snake.——*Saumpmar* (سانپ مار - sámpmár, Hind.). Means serpent + killer. Bird name common to:—Circaetus gallicus; Haliætus leucogaster. See gloss. paragraphs.——*Saurasam* (सारस - sárasa, San.). See sep. title.——*Saury* (ساڑی - sári, Hind.). From (shára, san. variegated). A long cotton scarf for women. As usually worn, one end is passed twice round the waist, the upper border tied in a strong knot, and allowed to fall in folds to the ankle, thus forming a sort of skirt. The other end is passed in front across the left arm and shoulder, one edge being brought over the top of the head. It is then allowed to fall behind and over the right shoulder and arm. When used by the women employed in out-door labor, the end which falls in front is passed between the legs, and tucked in behind, forming as it were drawers reaching to the knee [sheelay]. See vol. I (98).——*Shauranay* (पुनर्नव - punarnavá, San.; ناسورجنگی - násúrjangí, Hind.; ناسرجنگی - násarjangí, Dec.; ನೊಗಟಿಕಮಾಮಿಡಿ - nogaatakumámidi, Can.; గలిజేరు - galijéru, Tel.; സാരണ - sárana, Mal.; சாரணை - sháranai, Tam.). Title from tamul. San. from (punar, san. again + nava, san. new); growing again if cut [tikry]. Hind. from (násúr, ar. ulcer + changá, hind. to heal). Dec. from hindostany. Can. from (noga, tel. yoke + atikemámidi, tel. bœrhaavia repens, linn., var. diffusa). Mal. and Tam. from (saraná, san. the plant). San. also (shvétapunarnavá) is the white variety. Hind. also (bishkoprá), meaning poisonous cocoanut kernel; (sufedsábuní), meaning white soap like; (lálsábúní), meaning red soap like. Tel. also (erragalijéru), meaning red + the plant; (ambatimádu), meaning porridge + burning; (tellagalijéru), meaning white + the plant; (nogaatikemámidi), meaning yoke, bœrhaavia repens, linn., var. diffusa; (boddupávili), meaning navel + portulaca quadrifida, linn. Tam. also (vellaiççáranai), meaning white + the plant. Title otherwise Nasar junghy, One-styled trianthema, Purslane-leaved trianthema. Botanically Trianthema monogyna, linn., ficoideæ [vricsham, 66]. Alias Trianthema obcordata, pentandra. Perennial; stems diffuse, prostrate, slightly pubescent on the upper side; leaves, one of each pair larger and obovate or obcordate, the other smaller and oblong; flowers solitary, sessile, nearly concealed within the broad sheath of the petioles; stamens fifteen to twenty; capsule six to eight-seeded, lid concave, with two spreading teeth, nearly enclosed at the bottom, including one seed; flowers small, greenish white. A diffuse, prostrate, branched, glabrous, fleshy plant, which springs up everywhere at the commencement of the rainy season; seeds black, scarcely shining, with concentric, broken, and undulating, raised lines; root pale color, much wrinkled, taste bitterish and somewhat nauseous. Root given medicinally in powder in combination with ginger [q.v.] as a cathartic. Leaves and tender tops used for food as spinach [maurisham]. Other common species are:—Crystallina, called in vernacular dog milk-greens, prostrate-branched herb; Decandra, called in vernacular white shauranay, or small shauranay; properties like monogyna; Pentandra. Red shauranay, so called in vernaculars from color of flowers, is botanically orygia decumbens, forsk., ficoideæ [vricsham, 66]; generic name from arabic; alias glinus trianthemoides; orygia trianthemoides; herbaceous, diffuse; leaves alternate, cuneate-obovate, rounded mucronate; panicles lax, axillary, leaf-opposed, dichotomously racemose; calyx-segments ovate, cuspidate, membranaceous on the margin, spreading; petals numerous, from spathulate to lanceolate, entire; style and stigma filiform; capsule smooth and shining externally, splitting from the apex; a procumbent herb with fleshy leaves of a brownish color; flower small, red; leaves used for food as spinach.——*Shauricay* (शारिका - sháriká, San.). See sep. title.——*Srishty* (सृष्टि - srishti, San.; சிருட்டி - shirutti, Tam.). From (srij, san. to create). Creation [sargam]. The Hindoo philosophers are disagreed in what manner the work of creation took place. Some say that Bramha [q.v.], the supreme being, first created nature from which the Hindoo triad [trimoorty] proceeded, as the Creator, Preserver and Destroyer of the world. Others say that the elements [bhootam] of the world were inclosed in an immense shell, called the mundane egg [bramhaundam], which burst and formed the fourteen upper and the fourteen lower worlds [locam]. Others again assert that as Vishnoo [q.v.] was sleeping on the serpent Anantan [q.v.] or eternity, on the face of the waters, after the annihilation of a former world, a lotus [nelumbo] sprung from his navel, from which issued Bramha who produced the elements [bhootam], and formed the world, Shiva [q.v.], and the human race [pralayam]. From his head he formed the Bramins, from his arm the Cshatriyas, from his thighs the Veisyas, and from his feet the Shoodras. In the Rig vedam [q.v.] is read as follows:—"Then there was neither non-existence nor existence; no world, "no air, nor anything above them; nothing anywhere in the "fortune of any one enveloping or enveloped. There was then "neither death nor immortality, nor difference between day and "night. But tat [q.v.], that, breathed without afflation, alone "with swadhay [q.v.], self-position, which is contained within it. "Besides it nothing sure existed. There was darkness, and "indistinguishable water; but the mass covered with the veil "was produced by the power of contemplation. Desire was "formed first in his mind, and this became the original "productive seed, which the wise, acknowledging it by compre-"hension in their hearts, distinguish as being in non-existence, "the bond of existence."——*Srishtyaudy dyooganam* (सृष्ट्यादियुगण - srishtyádidyugana, San.). From (above + ádi, san. beginning + dyu, san. day + gana, san. collection). The number of natural days [sauvana dinam] expired from the grand astronomical epoch when the planetary [graham] motions first commenced, to any other epoch for which their places are to be computed [aharganam]. Number of years to date is 1955,884,994.

SARAKK (சரக்கு - sharakku, *Tam.*). From (sarga, san. nature) [sar]. Production, goods, products. Minerals [dhautoo, loham] used for medicine; especially arsenic [paushaunam], of which natives reckon sixty-four kinds, half in native state, half prepared. Also alkalies [cauram] and salts [ooppoo] used in chemical preparation of medicines [ospitry, veidyan]. An alkaline or salifiable base is called Aunsarakk, masculine drug, and any acid [poolipp] which readily combines with the same is called Pensarakk, feminine drug. The following is a list of the principal alkaline bases and acids, in pairs:—Bitumen [shilajit], copper [taumram]; Camphor [q.v.], copperas [mayil toottam]; Corrosive sublimate [shavveeram], oxalis corniculata, linn. [sour auray]; Corrosive sublimate [shavveeram], zinc [tootnaug]; Crude camphor [camphor], rock salt [sondah namak]; Gold [pon], realgar [manoshilay]; Gold-colored arsenic [wurkee hartaul], averrhoa bilimbi, linn. [blimbing]; Magnet [cauntam], vinegar [caudy]; Mercury [rasam], sulphur [gandhac]; Mica [abruck], hibiscus cannabinus, linn. [hemp bendy]; Realgar [manoshilay], vitis setosa, wall. [bristly piranday], vitis carnosa, wall. [acid naralay]; Rock salt [sondah namak], vermilion [shangarf]; Salammoniac [nowshaudar], borax [vengauram]; Salt [ooppoo], tamarind pulp [tamarind]; Saltpetre [shorah], alum [padicauram]; White arsenic [soofaid soombal], palmyra toddy [q.v.].——*Asal sarakk* (அசற்சரக்கு - asarcharakku, Tam.). From (asal, ar. original). Natural substance as distinguished from artificial compound.——*Audiyodoom sarakk* (ஆடியோடுஞ்சரக்கு - ádiyóduñjarakku, Tam.). From (ádu, tam. to move + ódu, tam. to run). Mineral [dhautoo], which on being exposed to the action of fire, disappears; said to be the case with fictitious cinnabar [shangarf], yellow sulphuret of arsenic [hartaul], &c. Sixty-four kinds of this are reckoned.——*Audoom sarakk* (ஆடுஞ்சரக்கு - áduñjarakku, Tam.). From (ádu, tam. to move). Mineral which evaporates on the fire; as mercury [rasam], sulphur [gandhac], &c.——*Caday sarakk* (கடைச்சரக்கு - kadaiççarakku, Tam.). From (kadai, tam. bazaar). Drugs, curry stuff, spices, &c., sold in bazaar.——*Culla sarakk* (கள்ளச்சரக்கு - kallaççarakku, Tam.). From (kallam, tam. stealing). Contraband goods.——*Cuppal sarakk* (கப்பற்சரக்கு - kapparcharakku, Tam.). From (kappal, tam. ship). Ship-goods. Cargo.——*Cuttoo sarakk* (கட்டுச்சரக்கு - kattuççarakku, Tam.). From (kattu, tam. to concrete). Mercury [rasam], &c., consolidated.——*Nautt sarakk* (நாட்டுச்சரக்கு - náttuççarakku, Tam.). Country goods.——*Oolloor sarakk* (உள்ளூர்ச்சரக்கு - ullúrççarakku, Tam.). From (ul, tam. inside + úr, tam. village). Production of the country.——*Oorgy audiyodoom sarakk* (உருகியாடியோடுஞ்சரக்கு - urugiyádiyóduñjarakku, Tam.). From (urugu, tam. to melt + ádu, tam. to move + ódu, tam. to run). Mineral which first melts in a crucible, and then is gradually sublimated; as sulphur [gandhac], mercury [rasam], &c.——*Pala sarakk* (பலசரக்கு - palasarakku, Tam.).

From (pala, tam. sundry). Grocery.——*Sheemay sarakk* (சீமைச் சரக்கு - shímaiççarakku, Tam.). From (shímai, tam. foreign). European goods.——*Veippoo sarakk* (வைப்புச்சரக்கு - vaippuç-çarakku, Tam.). From (vaippu, tam. deposit). Artificial drug.

SARBHOJEE (شرفوجی - sharfújí, *Hind.*). From (sharf, ar. saint's name meaning high or noble + jí, mahr. honorific title). Adopted son of Toolsajee. Placed on the throne of Tanjore in 1798 by the English on the deposition of his uncle Ameer sing. Transferred the country to the English in 1799, receiving a pension. Succeeded by his son Shivajee, the last of the Tanjore rulers. See vol. I, 50; II, 254.

SARF (صرف - sarf, *Hind.*). Expenditure [curts]. Exchange [shroff].——*Sarf i khas* (صرف خاص - sarfikhás, Hind.). From (above + khás, ar. own). Crown lands [havelly].——*Shroff* (صراف - sarráf, Hind.). From (sarf, ar. to exchange) [sarf]. To shroff is to sort coins, so as to discard refuse and to fix the various amounts of discount or agio upon the rest, establishing the value in standard coin. Hence to make selection generally. So as noun, a banker, cash-keeper.

SARO (सुराह्व - suráhva, *San.*; सरू - sarú, *Mahr.*; سرو - saro, *Pers.*, *Hind.* and *Dec.*). Title from deccany. San. from (sura, san. god + hvé, san. to call); called souram or divine; from never-fading evergreen foliage. Mahr. from persian. Greek κυπάριττος εὐώδης. Title otherwise Cypress, Gopher-wood, of which the hebrew ark was built. Botanically Cupressus sempervirens, linn., coniferæ [vricsham]. Evergreen tree, 20 feet high; branches straight, quadrangular; leaves imbricate, in four rows, blunt approximate, convex; cones globose; scales unarmed; flowers apetalous, flowering in may. Habitat candia; cultivated widely; foliage dark green. The cone used medicinally. Cupressus torulosa, don., is bhootan cypress or himalayan cypress.

SARPAM (सर्प - sarpa, *San.*). From (srip, san. to creep) [sar].

—(1) Equivalent of the whole order Ophidia of the sub-class Reptile [sarpy]. The two halves of the lower jaw in snakes are not united by an osseous symphysis, but by an elastic ligament. This mobility of the jaw-bones enables most of them to extend the gape in an extraordinary degree and to work their prey down through the collapsed pharynx. Some snakes, as the Rock-snakes [q.v.] or pythonidæ and Irtalay maniyan [q.v.], or erycidæ, have rudiments of hind limbs. The organs of locomotion for the exceedingly elongate body of the snakes are the ribs, the number of which is very great, nearly corresponding to that of the vertebræ of the trunk. When a part of their body has found some projection of the ground which affords it a point of support, the ribs, alternately of one and the other side, are drawn more closely together, thereby producing alternate bends of the body on the corresponding side. The hinder portion of the body being drawn after, some part of it finds another support on the rough ground or a projection, and the anterior bends being stretched in a straight line, the front part of the body is propelled in consequence. Snakes are not able to move over a perfectly smooth surface. They are naked like all other reptiles. The epidermis is cast off in a single piece several times every year [coosam]. In non-venomous snakes [paumb], the teeth are either entirely smooth, or only the last of the maxillary series is provided with a faint longitudinal groove, which is not intended to convey a poisonous saliva into a wound. Poisonous snakes [naug], are armed with a long canaliculated tooth in front of the upper jaw; the channel terminates in a small slit at the extremity of the tooth, and is in connexion with a duct which carries the poisonous fluid from a large gland to the tooth. At the moment the snake opens its mouth to bite, these muscles compress the gland.**—(2)** The following are various popular errors about snakes:—"*a*" First that all snakes are more or less venomous. The possession of a poisonous salivary secretion is confined to a few kinds of snakes, and most of these are very rare. Of land snakes, about 10 per cent. are venomous. Of this 10 per cent., one-half are snakes fatal to human life. The half consists of two snakes only, the Cobra [q.v.], and the Chain viper [q.v.], in the proportion of about one of the former to about four or five of the latter.—"*b*" Secondly that they are slimy. This is the opposite of the truth. Most have their skin covered with smooth polished scales repellent of dirt and moisture.—"*c*" Thirdly that they have a forked sting which they dart at their victim. All snakes have a long bifid tongue, which, usually retracted in a sheath below the windpipe, is capable of rapid and vibrating protrusion through a chink in the rostral shield; it is moved by means of two long elastic bones extending along the greater part of its length in the form of a long V with the tongue rising perpendicularly from the angle of the V; muscles convert these bones into levers which jerk the tongue up and down with great celerity and freedom of play. This tongue is not peculiar to snakes; the large Water lizards, i.e., Guanas or Varanus [oodoomoo], for instance have this bifid organ still more developed. The tongue is probably used in early life for catching insects before the regular prey of the snake can be attacked; it is harmless and is never used for licking. It is said by natives that the tongue was cut in two by the blades of coosham [q.v.] or darbhay [q.v.] grass when the serpents of old licked the amritam [q.v.].—"*d*" Fourthly that the venomous kind have fangs of great length which are erected when required for use. Harmless snakes [paumb] have a row of about six to sixteen teeth in each upper jaw, besides generally two rows of palate teeth. In the venomous kinds the maxillary teeth are generally replaced by a single tubular tooth of variable length, but hardly exceeding a quarter of an inch in an adult cobra [q.v.] and half an inch in an adult Chain viper [q.v.] or Daboia. This length is from the origin of the fang to the tip, but not more than half the length can be seen by pulling up the fold of gum which envelopes the fang, and in the neutral state little or nothing can be seen of the fang, as it is entirely concealed, saving perhaps two or three hundredths of an inch of the point, in the gingival envelope. The often-mentioned erection of the fang takes place to a very slight extent in the cobra, which is unprovided with any special erective apparatus; the fang is always recurved backwards at an angle of about forty-five degrees and received into a depression in the lower lip. In some of the vipers [viriyan] there is a special erective muscle, but in every case the uncovering of the fang is a passive act as regards the snake, being effected by the gingival envelope being pushed up mechanically by the object bitten.—"*e*" Fifthly that the poison is contained in a bag at the base of the fang and is sent through the fang by the pressure of the object bitten. The fang is at the anterior extremity of the upper jaw-bone, while the poison gland is situated on the cheek behind the eye; the poison on being ejected either by direct muscular action or by a reflex nervous action similar to that excited in the human mouth by the idea of eating lemon, proceeds along a duct which passes below the eye over the jaw-bone, and terminates at the bottom of the gingival envelope of the fang, and just in front of the superior orifice of its canal. There is no continuity between the orifice of the poison duct and that of the poison fang. They are merely in apposition, and the poisonous salivary secretion is directed into the fang by the retraction of the gingival envelope round the fang in the act of biting.—"*f*" Sixthly that there are reserve fangs ready to replace those in use should they be broken off. There is no special arrangement of this kind for the poison fangs apart from the other teeth. Every tooth in the snake's mouth, whether simple tooth or poison fang, is enveloped more or less in a gingival envelope which contains at its base the matrix of a series of other teeth; these young teeth are constantly growing, and the eldest of them periodically replaces the fixed tooth and becomes fixed until it is shed in its return. This shedding is a gradual process compared to the shedding of the epidermis but the two operations coincide in time and take place about once in two months.—"*g*" Seventhly that a venomous snake [naug] may be known by a peculiar formation of the head, &c. A close inspection will alone tell whether the snake has poison fangs or not. A venomous snake has the upper maxillary row of teeth replaced by a single fang, sometimes followed by one or two short ordinary teeth rather difficult of detection. An inexperienced person is nevertheless liable to mistake the harmless long tooth that many snakes have in the front of the upper jaw for a poison fang, or else to overlook a short fang enveloped in its gingival fold. As to the external character of the head there is no single rule, but the following may be noted:—"i" A shielded head, that is to say with the crown occupied not by scales as on the rest of the body but by about seven large plates, is generally the sign of a harmless snake. Common exceptions are the Cobra [q.v.] and the Bungaur [q.v.] and the Sea-snakes [tuttapaumb], which have shielded heads. "ii" A scaly head, that is to say the crown covered with scales as on the rest of the body, is generally the sign of a poisonous snake. Common exceptions are the Irtalaymaniyans [q.v.] or erycidæ and Poodeiyans [q.v.] or acrochordidæ. The absence of a loreal shield is the only true external sign of a venomous snake; this is a small shield usually separating the antocular shield from the posterior nasal, so that there are but two shields instead of three between the eye and the nostril. On opening the mouth the presence of the poison fang of course reveals the venomous kind. Many different designations being given to the same species, this has led to the belief that there is in Southern india a very large number of poisonous snakes. A careful inquiry reduces the poisonous species to about eight. The four following, Naga tripudians or cobra [q.v.], Bungarus cæruleus or bungaur [q.v.], Daboia elegans or chain viper [q.v.], and Echis carinata or carpet snake [q.v.], are the most common in the different districts, and of these the first three are the most deadly and occasion the chief mortality. The other four poisonous snakes, Ophiophagus elaps [hill cobra] or hamadryad, Bungarus fasciatus or krait [q.v.], Trimeresurus or pit viper [q.v.], and Hypnale nepa or carawilla [q.v.], rarely cause deaths. They are never met with in the vicinity of inhabited villages, but restrict their movements to the jungles and hills or hilly districts. They are found chiefly in South canara and in the Northern provinces. Destruction of snakes is most effective during the pairing and breeding season in the months of May, June, July and August. Sea-snakes are very poisonous. Along the Eastern coast the Enhydrina bengalensis [vaulakidy] occasions the chief mortality among fishermen and boatmen. Others are the Pelamis bicolor [nulla vaulagily] and Hydrophis cyanocincta [chittal].—"*h*" Eighthly that there exist antidotes for snake poison generally. This is generally considered a popular error, but is not quite a settled question. It is stated that a snake-catcher tattooing with gradually increasing

doses of cobra poison makes himself invulnerable.—"*i*" Ninthly that the male and female cobra are very different in appearance. There is no external difference in the appearance of the two sexes, except on close examination of the organs. The Rat-snake [q.v.] or Dhauman is generally supposed by natives to copulate with the cobra [q.v.], producing a very venomous hybrid offspring; hence it is frequently called the male cobra.——**(3)** There is a Tamul proverb:—கடித்த பாம்புக்கு பால் வார்த்தால் விஷத்தைத்தரும் அதுபோலப் பொல்லாத வர்க்குச் செய்யும் உபகாரம் இருக்கும்—"when milk is "placed before a biting snake in return it gives poison, and "such is the return for the favors done to the wicked." The following is a Hindostany proverb:—کالے کاکاٹا پانی نہیں مانگتا - "bitten by a black snake does not even ask for water;" because he dies before he can do so. There is a Teloogoo proverb:—పాము కాళ్లు పాముకెరుక—"the snake knows its own feet;" natives believe that the snake has feet, though they are invisible.——**(4)** The flesh and skin of certain snakes is held by veidyans [q.v.] to possess medicinal qualities. Dried flesh of a rock-snake [q.v.] is considered useful for leprosy [cooshtam]. According to the shastram [q.v.] Dhanwantary vaugadam, the snake slough [coosam] when reduced to powder, and mixed with fixed oil [yennay], obtained from seeds of Pongamia glabra, vent. [karanj], has virtues as an external application in epilepsy. The same is used as a ligature in intermittent fevers. For the mythology of the snake tribe see Audy sheshan. For serpent worship see Naugam.——**(5)** Popularly snakes are arranged under the following heads:—"*a*" Tree-snakes [q.v.]. Those that live for the most part in trees or bushes and are characterized by their brilliant colors, generally green, their slender and whip-like form, and great activity. Both non-venomous colubrine and viperine snakes are found in this section [combairy mookkan, whip snake].—"*b*" Water-snakes [mutty paumb]. These are salt-water and fresh-water, the first all venomous, the second all innocent. Salt-water snakes [tuttapaumb] have a peculiar form adapted to their mode of life, a compressed tail and nostrils above the snout; many, if not all, are viviparous [chittal, nullavaulagily, sea bungaur, vaulakidy]. Fresh-water snakes [mutty paumb] have the nostrils like those of the salt-water snakes. They live in fresh-water though they may be found in brackish water; they have not a compressed tail; they are viviparous, and all belong to the sub-order of non-venomous colubrines.—"*c*" Ground-snakes. Representatives are found in all the three sub-orders. They live generally above ground. They are more or less cylindrical in shape and very flexible in body. The greater number of snakes are found in this section.—"*d*" Burrowing snakes [coozhay vaulan]. These live much under ground; have a rigid cylindrical body, short tail, narrow mouth, and small teeth. No ventral shields; they are all innocuous. Snakes are divided by the natives into castes as Bramins, Rajahs, Chetties, Pariahs, &c.——**(6)** A key-synopsis connecting the european and native terminology will be found included under Sarpy. Title heads in this glossary cover each family, and contained genus and species, distinguished by the natives.——**(7)** For insects see Poochy; for fishes see Matsyam; for batrachians see Bhaicam; for reptiles see Sarpy; for birds see Pacshy; for mammals see Sastanam. A general conspectus of the fauna [jantoo] of s. india was given in vol. II, appendix IV.

SARPY (सर्पी - sarpí, *San.*). San. from (srip, san. to creep) [sar]. Reptile [jantoo]. Reptiles proper, excluding Batrachia, are cold-blooded vertebrata, which undergo no metamorphosis, and breathe air by lungs during their whole existence. They are divided into three orders:—Chelonia or tortoises [coormam], Sauria or lizards [godhicay], and Ophidia or snakes [sarpam].——**(1)** The following is a key-synopsis of the reptiles of southern india, ranged down to species, connecting the european and native terminology; the small capitals indicate the orders, the small capitals in inverted commas indicate the sub-orders, the italics indicate the families, and the ordinary type indicates the species:—CHELONIA.—1 *Testudinidæ* [*aumay*].—Testudo elegans.—2 *Emydidæ* [*aumay*].—Emys trijuga; Pangshura tentoria; Batagur ellioti.—3 *Trionycidæ* [*cadalaumay*].—Emyda vittata; Trionyx javanicus.—4 *Chelonidæ* [*cadalaumay*].—Caouana olivacea; Chelonia virgata; Caretta squamata; Dermatochelys coriacea.—SAURIA.—5 *Crocodilidæ* [*mugger*].—Crocodilus palustris, porosus, pondicerianus.—6 *Varanidæ* [*oodoomoo*].—Varanus dracæna, lunatus.—7 *Lacertidæ* [*aranay*].—Cabrita leschenaultii; Acanthodactylus nilgherrensis.—8 *Scincidæ* [*regmahee*].—Euprepes rufescens, trilineatus; Eumeces bilineatus, albopunctatus, hardwickii, punctatus; Chiamela lineata, anguis, melanosticta.—9 *Geckotidæ* [*chipkalee*].—Gecko guttatus; Hemidactylus triedrus, maculatus, sykesii, leschenaultii, punctatus; Gymnodactylus mysoriensis, indicus, malabaricus, littoralis, deccanensis; Eublepharis hardwickii.—10 *Agamidæ* [*bloodsucker*].—Draco dussumieri; Sitana pondiceriana, minor; Bronchocela jubata; Calotes versicolor, nemoricola, rouxii, ophiomachus; Salea horsfieldii; Charasia dorsalis.—11 *Chamæleonidæ* [*patchonty*].—Chamæleo vulgaris.—OPHIDIA.—"OPHIDII COLUBRIFORMES."—12 *Typhlopidæ* [*domoonh*].—Typhlops braminus, pammeces; Onychocephalus acutus.—13 *Tortricidæ*.—Cylindrophis rufus.—14 *Uropeltidæ* [*coozhay vaulan*].—Rhinophis sanguineus, pulneyensis; Silybura macrolepia, beddomii, ocellata, ellioti, bicatenata, shorttii, brevis; Plectrurus perrotetii, güntheri; Melanophidium punctatum, wynaudense.—15 *Calamaridæ* [*coozhay paumb*].—Calamaria leucocephala; Macrocalamus lateralis; Geophis microcephalus, platypteryx, perrotetii; Aspidura copii.—16 *Oligodontidæ* [*cuttachootta*].—Oligodon subgriseus, spilonotus, ellioti, subpunctatus, spinipunctatus, fasciatus, affinis, modestus, brevicauda; Simotes venustus, russellii, binotatus, trilineatus, bicatenatus.—17 *Colubridæ* [*paumb*].—Ablabes olivaceus, humberti; Cyclophis calamaria, nasalis; Odontomus nympha [cutlapaumb], semifasciatus, gracilis; Nymphophidium maculatum; Coronella orientalis; Compsosoma radiatum; Cynophis helena [maigharecoolapoda], malabaricus; Ptyas mucosus [rat snake]; Zamenis ventrimaculatus, gracilis, fasciolatus; Tropidonotus quincunciatus [neer corattay], subminiatus, stolatus, monticola, beddomii, plumbicolor [tunny paumb]; Atretium schistosum [chitty paumb].—18 *Homalopsidæ* [*mutty paumb*].—Cerberus rhynchops; Hypsirhina enhydris.—19 *Psammophidæ* [*condanaroos*].—Psammophis condanarus.—20 *Dendrophidæ* [*tree snake*].—Dendrophis picta [combairy mookkan]; Chrysopelea ornata, rubescens.—21 *Dryiophidæ* [*whip snake*].—Tragops dispar, fronticinctus; Passerita mycterizans.—22 *Dipsadidæ* [*palmyra snake*].—Dipsas forsteni, trigonata.—23—*Lycodontidæ* [*vazhalay*].—Lycodon aulicus, striatus, anamallensis; Leptorhytaon jara [saurapotoo]; Ophites albofuscus.—24 *Pythonidæ* [*rock snake*].—Python molurus.—25 *Erycidæ* [*irtalay maniyan*].—Gongylophis conicus; Eryx johnii.—26 *Acrochordidæ* [*poodeiyan*].—Chersydrus granulatus.—"OPHIDII COLUBRIFORMES VENENOSI."—27 *Elapidæ* [*naug*].—Naja tripudians [cobra]; Ophiophagus elaps [hill cobra]; Bungarus cæruleus [krait], fasciatus [bungaur]; Callophis annularis, nigrescens.—28 *Hydrophidæ* [*tuttapaumb*].—Platurus [sea bungaur] scutatus, fischeri; Disteira doliata; Hydrophis [chittal] jerdonii, major, robusta, cærulescens, spiralis, cyanocincta, melanosoma, subcincta, chloris, lindsayii, diadema, gracilis, fasciata, lapemoides, longiceps, stricticollis, ornata, ellioti, viperina, curta; Enhydrina bengalensis [vaulakidy]; Pelamis bicolor [nullavaulagily].—"OPHIDII VIPERIFORMES."—29 *Crotalidæ* [*pit viper*].—Trimeresurus gramineus, anamallensis, strigatus; Peltopelor macrolepis; Halys ellioti; Hypnale nepa [carawilla].—30 *Viperidæ* [*viriyan*].—Daboia russellii [chain viper]; Echis carinata [carpet snake].——**(2)** The following is an alphabetical list of the above orders with references to the key-synopsis.——*Chelonia* (कूर्म - kúrma, San.). Means slow in motion. 1–4. Tortoise [coormam].——*Ophidia* (सर्प - sarpa, San.). From (srip, san. to creep). 12–30. Snakes [sarpam].——*Sauria* (गोधिका - gódhiká, San.). From (gudh, san. to envelope). 5–11. Lizard [godhicay].——**(3)** The following is an alphabetical list of the above families, with references to the key-synopsis.——*Acrochordidæ* (अग्रवराटीयकुल - agravarátíyakula, San.). From (agra, san. top + varáta, san. rope). Ophidii colubriformes, ophidia, 26.——*Agamidæ* (स्त्रीजन्यकुल - stríjanyakula, San.). From (strí, san. woman + jan, san. to be born). Sauria, 10.——*Calamaridæ* (कलमधरीयकुल - kalamadharíyakula, San.). From (kalama, san. pen + dhri, san. to hold). Ophidii colubriformes, ophidia, 15.——*Chamæleonidæ* (कृकलासीयकुल - krikalásíyakula, San.). From (krikalása, san. chameleon), Sauria, 11.——*Chelonidæ* (समुद्रकूर्मीयकुल - samudrakúrmíyakula, San.). From (samudra, san. sea + kúrma, san. tortoise). Chelonia, 4.——*Colubridæ* (निर्विषकुल - nirvishakula, San.). From (nirvisha, san. not venomous). Ophidii colubriformes, ophidia, 17.——*Crocodilidæ* (नक्रीयकुल - nakríyakula, San.). From (nakra, san. crocodile). Sauria, 5.——*Crotalidæ* (कूपकमण्डलेयकुल - kúpakamandaléyakula, San.). From (kúpa, san. hole + mandala, san. viper). Ophidii viperiformes, ophidia, 29.——*Dendrophidæ* (द्रुमाहिकेयकुल - drumáhikéyakula, San.). From (druma, san. tree + ahi, san. serpent). Ophidii colubriformes, ophidia, 20.——*Dipsadidæ* (तृष्यदहिकेयकुल - trishyadahikéyakula, San.). From (trishyat, san. thirsty + ahi, san. serpent). Ophidii colubriformes, ophidia, 22.——*Dryiophidæ* (द्रुणसाहिकेयकुल - drunasáhikéyakula, San.). From (drunasa, san. larger-nosed + ahi, san. serpent). Ophidii colubriformes, ophidia, 21.——*Elapidæ* (भौमाहिककुल - bhaumáhikakula, San.). From (bhúma, san. earth + ahi, san. serpent). Ophidii colubriformes, venenosi, ophidia, 27.——*Emydidæ* (जलकूर्मीयकुल - jalakúrmíyakula, San.). From (jala, san. water + kúrma, san. tortoise). Chelonia, 2.——*Erycidæ* (इरिणाहिककुल - irináhikakula, San.). From (irina, san. desert + ahi, san. serpent). Ophidii colubriformes, ophidia, 25.——*Geckotidæ* (कृकवाकीयकुल - krikavákíyakula, San.). From (kríkaváku, san. gecko). Sauria, 9.——*Homalopsidæ* (नदीसर्पीयकुल - nadísarpíyakula, San.). From (nadí, san. river + sarpa, san. serpent). Ophidii colubriformes, ophidia, 18.——*Hydrophidæ* (समुद्राहिकेयकुल - samudráhikéyakula, San.). From (samudra, san. sea + ahi, san. serpent). Ophidii colubriformes, venenosi, ophidia, 28.——*Lacertidæ* (स्थलगोधेयकुल - st'halagódhéyakula, San.). From (st'hala, san. earth + gódhá, san. lizard). Sauria, 7.——*Lycodontidæ* (वृकदन्तीयकुल - vrikadantíyakula, San.). From (vrika, san. wolf + danta, san. tooth). Ophidii colubriformes, ophidia, 23.——*Oligodontidæ* (अल्पदन्तीयकुल - alpadantíyakula, San.). From (alpa, san. small + danta, san. tooth). Ophidii colubri-

formes, ophidia, 16.——*Psammophidæ* (सिकताहिकेयकुल - sikatáhikéyakula, San.). From (sikata, san. sand + ahi, san. serpent). Ophidii colubriformes, ophidia, 19.——*Pythonidæ* (शिलासर्पकुल - shilásarpakula, San.). From (shilá, san. rock + sarpa, san. serpent). Ophidii colubriformes, ophidia, 24.——*Scincidæ* (शल्कगोधेयकुल - shalkagódhéyakula, San.). From (shalka, san. scale + gódhá, san. lizard). Sauria, 8.——*Testudinidæ* (स्थलकूर्मियकुल - st'halakúrmíyakula, San.). From (st'hala, san. earth + kúrma, san. tortoise). Chelonia, 1.——*Tortricidæ* (ह्रस्ववालेयकुल - hrasvaváléyakula, San.). From (hrasva, san. short + vála, san. tail). Ophidii colubriformes, ophidia, 13.——*Trionycidæ* (त्रिणखकूर्मियकुल - trinakhakúrmíyakula, San.). From (tri, san. three + nakha, san. claw + kúrma, san. tortoise). Chelonia, 3.——*Typhlopidæ* (अन्धाहिकेयकुल - andháhikéyakula, San.). From (andha, san. blind + ahi, san. serpent). Ophidii colubriformes, ophidia, 12.——*Uropeltidæ* (रूक्षवालेयकुल - rúkshaváléyakula, San.). From (rúksha, san. rough + vála, san. tail). Ophidii colubriformes, ophidia, 14.——*Varanidæ* (वारुणगोधेयकुल - várunagódhéyakula, San.). From (váruna, san. water + gódhá, san. lizard). Sauria, 6——*Viperidæ* (मण्डलीयकुल - mandalíyakula, San.). From (mandalí, san. viper). Ophidii viperiformes, ophidia, 30.——**(4)** The following is an alphabetical list of the above genera, showing the family to which they belong:—Ablabes, colubridæ, 17; Acanthodactylus, lacertidæ, 7; Aspidura, calamaridæ, 15; Atretium, colubridæ, 17; Batagur, emydidæ, 2; Bronchocela, agamidæ, 10; Bungarus, elapidæ, 27; Cabrita, lacertidæ, 7; Calamaria, calamaridæ, 15; Callophis, elapidæ, 27; Calotes, agamidæ, 10; Caouana, chelonidæ, 4; Caretta, chelonidæ, 4; Cerberus, homalopsidæ, 18; Chamæleo, chamæleonidæ, 11; Charasia, agamidæ, 10; Chelonia, chelonidæ, 4; Chersydrus, acrochordidæ, 26; Chiamela, scincidæ, 8; Chrysopelea, dendrophidæ, 20; Compsosoma, colubridæ, 17; Coronella, colubridæ, 17; Crocodilus, crocodilidæ, 5; Cyclophis, colubridæ, 17; Cylindrophis, tortricidæ, 13; Cynophis, colubridæ, 17; Daboia, viperidæ, 30; Dendrophis, dendrophidæ, 20; Dermatochelys, chelonidæ, 4; Dipsas, dipsadidæ, 22; Disteira, hydrophidæ, 28; Draco, agamidæ, 10; Echis, viperidæ, 30; Emyda, trionycidæ, 3; Emys, emydidæ, 2; Enhydrina, hydrophidæ, 28; Eryx, erycidæ, 25; Eublepharis, geckotidæ, 9; Eumeces, scincidæ, 8; Euprepes, scincidæ, 8; Gecko, geckotidæ, 9; Geophis, calamaridæ, 15; Gongylophis, erycidæ, 25; Gymnodactylus, geckotidæ, 9; Halys, crotalidæ, 29; Hemidactylus, geckotidæ, 9; Hydrophis, hydrophidæ, 28; Hypnale, crotalidæ, 29; Hypsirhina, homalopsidæ, 18; Leptorhytaon, lycodontidæ, 23; Lycodon, lycodontidæ, 23; Macrocalamus, calamaridæ, 15; Melanophidium, uropeltidæ, 14; Naja, elapidæ, 27; Nymphophidium, colubridæ, 17; Odontomus, colubridæ, 17; Oligodon, oligodontidæ, 16; Onychocephalus, typhlopidæ, 12; Ophiophagus, elapidæ, 27; Ophites, lycodontidæ, 23; Pangshura, emydidæ, 2; Passerita, dryiophidæ, 21; Pelamis, hydrophidæ, 28; Peltopelor, crotalidæ, 29; Platurus, hydrophidæ, 28; Plectrurus, uropeltidæ, 14; Psammophis, psammophidæ, 19; Ptyas, colubridæ, 17; Python, pythonidæ, 24; Rhinophis, uropeltidæ, 14; Salea, agamidæ, 10; Silybura, uropeltidæ, 14; Simotes, oligodontidæ, 16; Sitana, agamidæ, 10; Testudo, testudinidæ, 1; Tragops, dryiophidæ, 21; Trimeresurus, crotalidæ, 29; Trionyx, trionycidæ, 3; Tropidonotus, colubridæ, 17; Typhlops, typhlopidæ, 12; Varanus, varanidæ, 6; Zamenis, colubridæ, 17.——**(5)** Title heads in this glossary cover each family, and contained genus and species, distinguished by the natives.——**(6)** For insects see Poochy; for fishes see Matsyam; for batrachians see Bhaicam; for birds see Pacshy; for mammals see Sastanam. A general conspectus of the fauna of s. india was given in vol. II, appendix IV.

SARSOON (सर्षप - sarshapa, *San.*; درخت سرشف - darakhtisarshaf, *Pers.*; سرسوں کا پیڑ - sarsúnkáper, *Hind.*; سرسوں کا جھاڑ - sarsúnkájhár, *Dec.*). Title from hindostany [sar]. San. from (sri, san. to go), from round and useful seeds. Pers. from (darakht, pers. tree + sarshaf, pers. mustard). Hind. from (sarsún, hind. mustard, brassica + per, hind. tree). Dec. from (sarsún, hind. mustard + jhár, hind. tree). Botanically Brassica [sarshapam] campestris, linn., cruciferæ [vricsham, 10]. Erect, stout, simple or branched, glabrous or slightly hispid annual, 1-3 feet high; leaves large, petioled, more or less pinnatifid, upper oblong or lanceolate; flowers large, bright yellow; pedicels ¾ inch, ascending or spreading; pod 1½-3 inches, glabrous, sub-erect; valves with midrib and flexuous veins; seeds small, smooth, pale or dark. The turnip sub-division of Brassica. For the common turnip, which is here only acclimatized, see the sub-species rapa [shalgham]. The following are native articles.——*Cauly sarsoon* (कालसर्षप - kálasarshapa, San.; कालामोहरी - kálámóharí, Mahr.; خردل اسود - khardaliaswad, Ar.; درخت سرشف سیاه - darakhtisarshafisiyáh, Pers.; کالی سرسوں کا پیڑ - kálísarsúnkáper, Hind.; کالی سرسوں کا جھاڑ - kálísarsúnkájhár, Dec.; ఆవాలు - áválu, Tel.; കടുക - katuku, Mal.; கடுகு - kadugu, Tam.). Title from hindostany. San. from (kála, san. black + sarshapa, san. mustard). Mahr. from (kálá, mahr. black + móharí, mahr. mustard, brassica juncea, h. f. and t.). Ar. from (khardal, ar. mustard + aswad, ar. black). Pers. from (darakht, pers. tree + sarshaf, pers. mustard + siyáh, pers. black). Hind. from (kálí, hind. black + sarsún, hind. mustard + pér, hind. tree). Dec. from hindostany. Mal. from tamul. Tam. from (kadumai, tam. intensity). Pers. also (sipandánisiyáh), meaning black mustard. Hind. also (kálíráí), meaning black mustard; (bangasarsún). Title otherwise Cole seed, Colza, Navette, Sarson, Swedish turnip, Wild navew. Botanically Brassica [sarshapam] campestris, linn., sub-sp. campestris, linn., cruciferæ [vricsham, 10]. Alias Sinapis dichotoma. Root tuberous; leaves glaucous, radical hispid, upper glabrous; petals persistent till the corymb lengthens; bears smallish yellow flowers. Colza oil made from seeds; has very little smell; if properly prepared, is yellow and of rather a sweet taste; remains limpid at a much lower temperature, than most oils [yennay]. Oil medicinally less energetic than black mustard [cauly rayaun]. Oil largely used as an article of diet; leaves used for culinary purposes; oil cake [ponnauk] given to cattle. Oil used in manufacture of soap [sauboon]; also to anoint the body and for illuminating purposes.——*Rara sarsoon* (राजिका - rájiká, San.; راراسرسوں - rárasarsún, Hind.; తెల్లావాలు - tellaáválu, Tel.). Title from hindostany. San. from (ráji, san. row), means striped. Tel. from (tella, tel. white + áválu, tel. mustard, brassica juncea, h. f. and t.). Hind. also (pílásarsún), meaning yellow mustard; (sarsúnizard), meaning yellow mustard; (bangsarsún). Title otherwise Cole seed, Navew, Rape, Shwet-rye. Brassica [sarshapam] campestris, linn., sub-sp. napus, linn., cruciferæ [vricsham, 10]. Alias Sinapis glauca. Root fusiform; leaves all glabrous and glaucous; petals deciduous before the corymb lengthens; cultivated extensively; seeds are exported. Leaves used for culinary purposes; the oil is superior to colza and much used in diet, also in anointing the body before daily ablutions [snaunam]. In spite of the commercial name for this, the sub-species rapa is different, viz., the common turnip [shalgham].——*Toriya sarsoon* (तीव्रक - tívraka, San.; توریا - toriyá, Hind. and Dec.). Title from deccany. San. from (tívra, san. sharp). Dec. from sanscrit. Botanically Brassica [sarshapam] campestris, linn., sub-sp. napus, linn., var. toria, cruciferæ [vricsham, 10]. Toria from hindostany. Alias Sinapis glauca. Whole plant quite smooth and glaucous, 2-3 feet in height; lower leaves lyrate or pinnatifid, upper amplexicaul, lanceolate, entire; flowers bright yellow, sepals spreading; pods rather slender, 1¼-1¾ inches long, transversely compressed, more or less torulose; beak about ¼ inch long; seeds small roundish or semi-compressed, reddish brown or finely rugose. Leaves used for culinary purposes; oil not known.

SARWASIDDHY (సర్వసిద్ధి - sarvasiddhi,* *Tel.*). From (sarva, san. all + siddhi, san. success) [sar].——**(1)** Talook; Vizagapatam district. Tahsildar's pay Rs. 150; area 341 square miles; population 154,966; language Teloogoo. S. coast of district. Boundaries:—east, sea; west, Golcondah talook; north, Ankapully talook; south, Godavery district. The Maharajah of Vizianagram originally purchased this estate. In 1810 he sold it to Saugy ramchendra rauz, his maternal aunt's husband, whose son ran into arrears, when the Government purchased it in 1831. The talook is a plain country along the sea coast dotted with small hills and traversed by two rivers, Shaurada and Varauhanuddy. Red clay and red loam; generally fertile and especially in villages in Shaurada valley. Indigo [q.v.], gingelly [q.v.] and jaggery [q.v.] taken to Vizagapatam for exportation. Agriculture is chief industry. Shaurada and Varauhanuddy and Condakirla auva are main sources of irrigation. There are various anicuts [q.v.]. Camping grounds:—Naccapilly, Payacarowpett and Yellamanchily. Places of archæological interest:—Andalaupulley, Condakirla, Corcondah, Dimiley, Dooppitoorroo, Gopaulputnam, Madootore, Mangavaram, Maumidivauda, Naccapilly, Oopamauca, Ooppalam, Payacarowpett, Pentacote, Punchadhaurla, Royavaram, Shreerampooram, Yellamanchily. Principal trig. stations:—Dongalcondah beacon, Goommalore, Locaurap, Mabraujy, Polavaram beacon, Punchadhaurla, Rambilly beacon, Soodicondah, Tantady beacon, Vemagherry. The leading places, &c., in the talook are the following.——*Condakirla auva* (కొండకిర్లఆవ - kondakirlaáva, Tel.). See sep. title.——*Corprole* (కొరుప్రోలు - korupról u, Tel.). From (korru, tel. trident + prólu, tel. town). Proprietary estate, Village; pop. 3,455; lat. of village 17° 25′; long. 82° 48′; from Vizagapatam S.W. 38 miles; from Yellamanchily S.S.W. 10 miles; from the sea N. 4 miles. Peshcush Rs. 8,041.——*Dongalcondah beacon* (దొంగలకొండ - dongalakonda, Tel.). From (donga, tel. robber + konda, tel. hill). Trig. station; lat. 17° 20′ 00·00″; long. 82° 43′ 00·00″.——*Goodicherla* (గుడిచెర్ల - gudicherla, Tel.). From (gudi, tel. temple + cherla, tel. village). Proprietary estate, Village; pop. 1,544; lat. of village 17° 23′; long. 82° 40′; from Vizagapatam S.W. 48 miles; from Yellamanchily S.S.W. 19 miles; from the sea N. 6 miles. Peshcush Rs. 17,254.——*Goommalore* (గుమ్మలూరు - gummalúru, Tel.). From (gummamu, tel. entrance + úru, tel. village). Trig. station; lat. 17° 25′ 52·35″; long. 82° 46′ 08·18″; from Pedda goommalore S.W. ½ mile; from Sarwasiddhy S.W. 7 miles; from Yellamanchily S.W. 12 miles; from the sea N. 5 miles.——*Gopaulputnam* (గోపాలపట్నము - gópálapatnamu, Tel.). From (gópáludu, tel. proper name + pattana, san. town). Village;

pop. 798; lat. 17° 44′; long. 83° 16′; from Vizagapatam N.W. 5 miles; from Yellamanchily N.E. 27 miles; from the sea W. 8 miles. Old temple and eight rock-cut remains, six on Pandavool mittah hill and two on Boobcondah hill.——*Locaurap* ([illegible] - lókárapu, Tel.). From (lóhakára, san. iron-smith). Trig. station; lat. 17° 20′ 11·48″; long. 82° 36′ 28·41″; from Pedda ramabhadrapooram N. 92 miles; from Sarwasiddhy S.W. 20 miles; from Yellamanchily S.W. 24 miles; from the sea N. 5 miles.——*Mabraujy* ([illegible] - mabráji, Tel.). From (mabbu, tel. cloud + ráshi, san. heap). Trig. station; lat. 17° 24′ 00·83″; long. 82° 42′ 12·49″; from Chinna doddigull W. ¼ mile; from Sarwasiddhy W.S.W. 12 miles; from Yellamanchily S.W. 17 miles; from the sea N. 6 miles.——*Madootore* ([illegible] - madutúru, Tel.). From (madati, tel. woman + úru, tel. village). Village; pop. 1,712; acres 2,438; lat. 17° 34′; long. 83° 03′; from Vizagapatam S.W. 21 miles; from Yellamanchily E. 10 miles; from the sea N. 4 miles. Old temple built by a Cholan [q.v.], with inscription.——*Maumidivauda* ([illegible] - mámidiváda, Tel.). From (mámidi, tel. mango, mangifera indica, linn. + váda, tel. village). Proprietary estate, Village; pop. 659; acres 1,021; lat. of village 17° 32′; long. 82° 56′; from Vizagapatam W.S.W. 27 miles; from Yellamanchily E. 3 miles; from the sea N. 7 miles. Two old temples built by Jeinas [q.v.]. Peshcush Rs. 1,793.——*Melpauca* ([illegible] - mélupáka, Tel.). From (mélu, tel. excellent + páka, tel. hamlet). Proprietary estate, Village; pop. 2,010; lat. of village 17° 35′; long. 82° 57′; from Vizagapatam S.W. 26 miles; from Yellamanchily N.E. 4 miles; from the sea N. 10 miles. Remains of an old mud fort. Peshcush Rs. 19,442.——*Naccapilly* ([illegible] - nakkapilli, Tel.). From (nakka, tel. fox + palli, tel. village). Proprietary estate, Village, Travellers' bungalow and a native choultry; pop. 2,344; lat. of village 17° 25′; long. 82° 46′; from Vizagapatam S.W. 42 miles; from Yellamanchily S.S.W. 13 miles; from the sea N. 4 miles. Near summit of a hill; near is a grotto over which hang two enormous masses of gneiss, converted into a pagoda [q.v.]. There are 295 steps cut in the rock. Peshcush Rs. 5,393.——*Oopamauca* ([illegible] - upamáka, Tel.). From (úpa, tel. underwood + páka, tel. hamlet). Agrahauram, Place of pilgrimage; pop. 2,093; lat. 17° 24′; long. 82° 46′; from Vizagapatam S.W. 42 miles; from Yellamanchily S.W. 13 miles; from the sea N. 4 miles. Ancient pagoda [q.v.] built on a rock. There are no idols, but resemblances of the chunk [q.v.] or conch and chuckram [q.v.] or discus carried by Vishnoo [q.v.] are visible on a stone. Annual marriage festival of god [tircalyaunam] in March. Numerous marriage [calyaunam] and ceremonies of celibacy celebrated here. At foot of rock is another pagoda with image of Shree vencateshwaran.——*Pedda goommalore* ([illegible] - peddagummalúru, Tel.). From (pedda, tel. great + gummalúru, tel. the place). Proprietary estate, Village; pop. 2,983; square miles 6; lat. of village 17° 26′; long. 82° 47′; from Vizagapatam S.W. 40 miles; from Yellamanchily S.S.W. 12 miles; from the sea N. 5 miles. Peshcush Rs. 3,761.——*Pentacote* ([illegible] - pentakóta, Tel.). See sep. title.——*Polavaram beacon* ([illegible] - pólavaramu, Tel.). From (póli, tel. proper name + pura, san. town). Trig. station; lat. 17° 23′ 40·39″; long. 82° 51′ 39·03″; from Polavaram S. ½ mile; from Sarwasiddhy S. 5 miles; from Yellamanchily S. 10 miles; from the sea N. ⅛ mile. Salt factory in a swamp close by.——*Poodimadaca* ([illegible] - púdimadaka, Tel.). See sep. title.——*Punchadhaurla* ([illegible] - panchadháralu, Tel.). From (pañcha, san. five + dhárá, san. stream), from the five fountains of the place. Village, Place of pilgrimage; pop. 2,289; acres 1,964; lat. 17° 32′; long. 82° 58′; from Vizagapatam S.W. 27 miles; from Yellamanchily E.S.E. 4 miles; from the sea N. 6 miles. On a small rock is an ancient pagoda to Shiva as Dharmeshwaran. Sixteen inscriptions on the temple of Shree dharma lingeshwaran, dating from A.D. 1394 to 1526. Trig. station in lat. 17° 35′ 05·12″; long. 83° 00′ 23·27″; height 935 feet; from Condakirla S.W. 1½ miles; from Sarwasiddhy N.E. 12 miles; from Yellamanchily N.E. 7 miles; from the sea N. 8 miles.——*Rambilly beacon* ([illegible] - rámbilli, Tel.). From (ráma, san. the god + palle, tel. village). Trig. station; lat. 17° 27′ 23·01″; long. 82° 59′ 21·34″; from Rambilly S.E. 1 mile; from Sarwasiddhy E. 8 miles; from Yellamanchily S.S.E. 9 miles; from the sea W. ⅛ mile.——*Royavaram* ([illegible] - ráyavaramu, Tel.). From (ráyadu, tel. king + pura, san. town). Village; pop. 5,336; acres 1,232; lat. 17° 27′; long. 82° 51′; from Vizagapatam W.S.W. 36 miles; from Yellamanchily S.S.W. 7 miles; from the sea N. 4 miles. Inscription fixing date of conquest by Krishna deva royel of Vijianugger.——*Sarwasiddhy* ([illegible] - sarvasiddhi, Tel.). See below.——*Satyavaram* ([illegible] - satyavaramu, Tel.). From (satya, san. truth + pura, san. town). Village; pop. 1,604; lat. 17° 20′; long. 82° 38′; from Vizagapatam S.W. 52 miles; from Yellamanchily S.S.W. 22 miles; from the sea N. 4 miles. Betel [q.v.] gardens.——*Shaurada nuddy* ([illegible] - sháradánadi, Tel.). See sep. title.——*Shreerampooram* ([illegible] - shrírámapuramu, Tel.). From (shrí, san. holy + ráma, san. the god + pura, san. city). Proprietary estate, Village; pop. 3,089; lat. of village 17° 19′; long. 82° 37′; from Vizagapatam S.W. 53 miles; from Yellamanchily S.S.W. 25

SASTANAM (सस्तन - sastana,
+ stana, san. breast of female) [sa
animals which suckle their young, a
skins protected by hair.——**(1)** The
cation is the division into those in wh
in the maternal uterus by means of
mals; and those in which the young
early period, and maintained in a p
implacental or marsupial animals.
India; being chiefly developed in t
few in America; they have moreove
dentition. After deducting the mar
the mammals still remains. Taking t
number of animals are found possesse
the incisors, the canines, the praemola
in varying number and proportion;
animals with the typical forms of te
man, monkeys [bandar], bats [vav
and shrews, muskrat [q.v.], &c., in
forms of mammals. There is next f
varied association of animals of inf
organization, in which the teeth va
formation, and have rarely more
developed; this group is Diplodonti
and squirrels [anil], deer [mrigam]
[maud], the elephant [q.v.], pig [s
and the almost toothless ant-eaters [
live on vegetable matter, as the maj
on animal food. A third small divis
[timingilam] and porpoises [cadul
because the teeth when present are a
large groups are next divided into or
dontia. On examining the hairy cove
and a bat [vavvaul], it is found that
hair, no under-hair or wool being pr
this division, it goes under the gene
composed of two very distant orde
the four-handed, comprising monk
[devaunga], in most of which there
finger on the foot; and Cheiroptera
[vavvaul], which have the forearm
organ of flight. The remaining
animals have two kinds of hair, in
called Secundates. They are likewi

late, possesses two chisel-shaped teet
apparent canines, and small number

is the Rodentia, or gnawers, comprising rats [ely] and squirrels [anil], &c. Another order, likewise with claws, which are large and fossorial or capable of digging, but partially enclosing the toes and somewhat hoof-like, is distinguished by the total absence of incisors and canine teeth, and in some of all teeth whatsoever; these are called Edentata or toothless, and they include the ant-eaters [jungle carp] and armadillos. All the remaining animals of this group except one have the toes more or less joined together, and ending in a hoof, which is single and solid in the horse [ghorah], double or bisulcate in the deer [mrigam] and pig [soor], with three divisions as in the rhinoceros [gendah], with four unsymmetrical in the hippopotamus, and with five hoof-like nails terminating the pad of the elephant [q.v.]. These form the Ungulata of some writers, and are then divided into the Ruminantia, or ruminants, and the Pachydermata, or thick skinned mammals. Here they are divided into Proboscidea, Ungulata, and Ruminantia. The last-named is a very natural group and comprises all that chew the cud; deer [mrigam], cattle [maud], sheep [aud], &c. They have two hoofs and two upper supplemental ones, no upper incisors except in the camel and flattened molars. A canine is present in a few. The Ungulata and Proboscidea differ much in their dentition and only agree in the negative character of not ruminating. The herbivorous cetaceans, are separated as a distinct order called Sirenia, and are distinguished from the other Diplodonts by the absence of limbs. The Isodontia, comprising the whales [timingilam], dolphins and porpoises [cadal pundry], are as an order called Cetacea, and have no posterior extremities, whilst their anterior limbs are changed into fins.——**(2)** The following is a key-synopsis for the placental mammals of S. india, carried down to species, connecting the european and native terminology. The black letter indicates the dental divisions, the small capitals indicate orders, the small capitals in inverted commas indicate sub-orders or tribes, the italic indicates families, the italic in inverted commas indicates sub-families, and the genera and species stand in ordinary roman type. Note in abstract that the division Typodontia or teeth of all four kinds includes the orders Quadrumana or with thumb on the feet, Cheiroptera or winged, Carnivora or molars trenchant mixed with tubercular ones, and Insectivora or molars studded with cusps; that the division Diplodontia or teeth generally of two kinds only abnormal includes the orders Rodentia or front teeth long and chisel-like, Proboscidea or teeth varied with trunk and do not ruminate, Ungulata or teeth varied with hoofs, Ruminantia or upper incisors generally absent and chew the cud, Sirenia or want posterior extremities, and Edentata or incisors absent; and that the division Isodontia or teeth when present of one kind and often very numerous includes the order Cetacea with post-extremities wanting.——**Typodontia.**—QUADRUMANA.—1 *Cercopithecidæ.*—"*Semnopithecinæ [lungoor].*"—Semnopithecus priamus, hypoleucus, johnii.—"*Cercopithecinæ*" [*baboon*].—Macacus sinicus [bandar], silenus [siyah bandar].—2 *Lemuridæ.*—Loris gracilis [devaunga].—CHEIROPTERA.—3 *Pteropodidæ.*—Pteropus edwardsii [flying-fox], leschenaultii; Cynopterus marginatus.—4 *Vampyridæ* [*kaffaush*].—"*Megadermatinæ.*"—Megaderma lyra.—"*Rhinolophinæ.*"—Rhinolophus affinis, rouxi; Hipposideros speoris, murinus; Rhinopoma hardwickii.—5 *Noctilionidæ* [*chamgadal*].—Taphozous longimanus, melanopogon, saccolaimus; Nyctinomus plicatus.—6 *Vespertilionidæ* [*vavvaul*].—Scotophilus coromandelianus; Nycticejus heathii, temminckii, canus; Kerivoula picta.—CARNIVORA.—"PLANTIGRADA."—7 *Ursidæ.*—Melursus ursinus [ricsham].—"SEMI-PLANTIGRADA."—8 *Mustelidæ.*—"*Melinæ.*"—Mellivora indica [indian rattel].—"*Lutrinæ.*"—Lutra vulgaris [neernye].—"DIGITIGRADA."—9 *Felidæ.*—Felis tigris [pooly], pardus [honiga], viverrina [meencolly poonay], bengalensis [shivingy poonay], rubiginosa [poolly poonay], torquata, chaus [jungle cat], caracal [q.v.], domestica [poonay]; Cynælurus jubatus [cheetah].—10 *Hyænidæ.*—Hyæna striata [cazhoothay pooly].—11 *Viverridæ.*—"*Viverrinæ.*"—Viverra civettina [poonoogoo poonay]; Viverricula malaccensis; Paradoxurus niger [toddy cat].—"*Herpestinæ.*"—Herpestes mungo [mongoose], smithii, fuscus, vitticollis.—12 *Canidæ* [*cookooram*].—Canis [shwaunam] pallipes [konye], aureus [jackal], dukhunensis [dhole]. From (kravya, san. flesh + bhuj, san. to eat). Typodontia, 7–12. Flesh-eating animals or beasts of prey. The teeth of the lower jaw pass inside those of the upper, and one of the molar teeth, which is of large size, and furnished with a sharp cutting edge like a scissor, is hence called the flesh tooth, or scissor tooth. Feet armed with strong curved claws, and clavicles either absent or merely rudimentary. Name of order not exclusively correct; some bears live on fruit [caracal, cheetah, dhole, honiga, jackal, jungle cat, lomree, marjauram, mongoose, nye, pooly, poonay, indian rattel, ricsham, shwaunam, toddy-cat].——*Cetacea* (तिमिसन्तान - timisantána, San.). From timi, san. whale). Isodontia, 29–31. Otherwise the Whale tribes. Cetaceans are distinguished by the fish-like form of their members, and live in seas and large rivers. Bulky animals with very large heads, tapering bodies, terminated by a broad tail-fin, which is the principal agent in swimming; it is supported by cartilage only. The head is not separated from the body by a neck. The eye is of very small size, and from the great development of their facial bones, appears in some to be placed nearly in the middle of the body. Their skin is thick and intimately mixed with fat forming the blubber, which serves to preserve the warm temperature of the body in the cold seas they frequent, and at the same time renders them light. Their skin is usually devoid of hair. They have spiracles or external nostrils, sometimes on the fore part of the nose, but usually on the top of the head, which can be closed by a conical stopper or valve. They have large brains with many and deep convolutions. The organ of hearing is of great delicacy, but the ears are deficient externally. Their sense of smell is little developed. The spiracle, or blowhole, is single or double. This does not serve as an organ of smell, but is used as a respiratory aperture. The spouting of whales is the moisture of the lungs and air passages expelled along with the expired air [cadal pundry, hoot, pundry meen, timingilam].——*Cheiroptera* (करपत्रीसन्तान - karapatrísantána, San.). From (karapatra, san. bat). Typodontia, 3–6. Usually called generically bats. Of small size, with very small eyes and large ears capable of rapid and continuous flight for hours. All nocturnal. During day rest in secluded places hanging head downwards by hind claws. Most hybernate, all have acute hearing and sense of touch. The wings form an enormously expanded organ of touch, by means of which they direct flight. Most are insectivorous; a few frugivorous, such as the flying fox [q.v.]. The frugivorous differing much in their dentition from the insectivorous lead through the flying lemurs [devaunga] directly to the Quadrumana. The Harpy of the ancients was one of these large bats. Though an insignificant creature the bat ranks structurally high in the animal kingdom and is in this regard only a few removes from man [chamgadal, flying-fox, kaffaush, vavvaul].——*Edentata* (अदन्तसन्तान - adantasantána, San.). From (adanta, san. toothless). Diplodontia, 28. Incisor teeth wanting. The order is subdivided into two groups, Tardigrada or sloths and Effodientia or burrowers. The former peculiar to American continent [jungle-carp].——*Insectivora* (कीटभुकसन्तान - kítabhuksantána, San.). From (kíta, san. insect + bhuj, san. to eat). Typodontia, 13–15. Resemble the Rodents, but differ in having clavicles and in wanting the remarkable incisors of that group. Mostly small animals of nocturnal habits. Their pointed dentition enable them to pierce and crush the hard-shelled insects [poochy] on which they feed. The skull is elongated, the bones of the face and jaw especially, and those of the latter are comparatively weak. The limbs are short, feet five-toed and plantigrade, with the entire sole placed on the ground in running [moollely, musk rat].——*Proboscidea* (शुण्डीसन्तान - shundísantána, San.). From (shundi, san. elephant). Diplodontia, 20 [elephant].——*Quadrumana* (चतुर्हस्तसन्तान - chaturhastasantána, San.). From (chatur, san. four + hasta, san. hand). Typodontia, 1, 2. Toes of forefeet usually five in number; inner toe of fore limb may be wanting, but when present opposable to other digits. Hind foot five-toed with opposable hullux, or great toe. The animal can thus use both front and hind extremities for seizing things, and is quadrumanous [bandar, devaunga, lungoor].——*Rodentia* (कर्तनकरसन्तान - kartanakarasantána, San.). From (kartana, san. cutting). Diplodontia, 16–19. Gnawing animals Glires of some. Distinguished by absence of canine teeth. Have further in each jaw only two incisors, which are curved

and adapted for gnawing. The molar teeth are few in number. Are mostly animals of small size, the porcupines [kharpoosht], being unusually large specimens. Eyes are directed sideways. The opening of the mouth is small, and many have cheek-pouches. The ears are moderate or large. The limbs are usually short, the hind extremity in many much larger than the anterior. They are usually clad with hair, in a few with bristles or spines. The tail varies much in size, is sometimes hairy, at others naked or scaly. They live chiefly on vegetable substances, often on hard nuts, roots, the bark of trees, &c.; and many are nocturnal in habits. Many build artificial nests, and a few manifest a constructive instinct in association; whilst others are remarkable for migrations. They are very prolific, often producing several litters in the year, and the young quickly attaining maturity. Many hybernate like reptiles. In point of intelligence the rodents do not come up to other mammals, the brain is small and remarkably free from convolution. Rodents which have never more than two incisors, coated only in front with enamel, are sometimes termed Simplicidentata. The others which have rudimentary incisors, as in the case of hares [mosal], and in which the enamel is spread more or less over all the surface, are then termed Duplicidentata [anil, bandicoot, chamara pootcham, ely, golandy, kharpoosht, kok, malabar squirrel, moosham, mosal, pepper rat, shoondely].——*Ruminantia* (रोमन्थकरसन्तान - rómant'hakarasantána, San.). From (rómant'ha, san. ruminating). Diplodontia, 23-26. Differ greatly from families Equidæ or suidæ by construction of digestive organs. Instead of food being masticated and passed at once into the stomach, each mouthful is but slightly bruised and passed into the paunch, whence at leisure it is regurgitated into the mouth to be chewed. They comprise most of the animals useful to man, viz., camels [ottagam], deer [mrigam], cattle [maud], and sheep [aud]. They are exclusively vegetable feeders. They break or tear rather than cut their food, and this action is accompanied by a swinging motion of the head forwards. Their eyes are so placed laterally that they have a great range of vision. Their ears are large, placed well back, and very mobile. Their smell is very acute. The speed of most is great. Many are docile and can be easily tamed, but they show very little intelligence. Most of them possess horns [aud, cheetal, chowsingha, gowr, saddle back, jinka, jungle sheep, khoolgah, maud, mouse deer, nilghye, ottagam, ravine deer, samber].——*Sirenia* (जलनरसन्तान - jalanarasantána, San.). From (jala, san. water + nara, san. man). Dugong. Diplodontia, 27 [dugong].——*Ungulata* (खुरीसन्तान - khurísantána, San.). From (khura, san. hoof). Diplodontia, 21, 22. Characterised by having the foot furnished with a hoof instead of claws, an arrangement which enables them to bear without injury the concussion of vigorous leaps, and which especially fits them for carrying heavy burdens. Further distinguished by absence of clavicles and by never having more than four full-sized toes. They are vegetable feeders, and their molar teeth are furnished with broad crowns to enable them to grind and reduce their food to a pulp. The section Perissodactyla are Ungulates in which the toes are an uneven number, and in which the horns, if present, are not in pairs. They embrace the rhinoceros, the tapir, the horse [ghorah], the ass [gadhah], the zebra, and the quagga. The section Artiodactyla are Ungulates with an even number of toes, and with their horns, when present, in pairs [ashwam, gadhah, ghorah, soor].——**(4)** The following is a list of the thirty-one families arranged alphabetically, with the Sanscrit equivalents for their titles, references, and brief description of each.——*Balœnidæ* (तिमिकुल - timikula, San.). From (timi, san. whale). Cetacea, 31. Whale-bone whales. Head enormous; no teeth, but transverse horny laminæ adhering to the upper jaw. The largest of all known animals; produce one young at a birth; often found in large shoals; most abundant in high latitudes; feed on small fish [matsyam], cuttle-fish, other mollusca [chippy], and small crustacea [kavachiny]. The whalebone or baleen, sometimes, in large whales, consisting of six hundred to eight hundred plates, 12-15 feet long, forms a regular sieve through which the animal strains his food from the vast gulps of water he takes in whilst feeding. The lower jaw has neither teeth nor baleen, but is furnished with fleshy lips; skull characterized by the great predominance of the facial over the cranial portions and the curvature of the right of the lower jaw [timingilam].——*Bovidæ* (गोकुल - gókula, San.). From (gó, san. cow). Ruminantia, 23. Hollow-horned ruminants. The family is often called the Cavicornia or hollow-horned, as their horns, unlike those of the deer [mrigam], consist of a conical bony process of the temporal bone covered with a horny sheath which is persistent and mostly present in both sexes. Their dentition is the same as that of deer [mrigam]. Canines rarely present; muffle generally present. Feet-pits usually in all four feet. Inguinal-pits in some; eye-pits usually present. Four mammæ in most. This family comprises three sub-families; Antilopinæ, Bovinæ, and Caprinæ.—"*a*" Antilopinæ are Antelopes [jinka]. Horns in both sexes or only in the males; eye-pits in all and feet-pits in most; bony nucleus of the horn is generally solid, often has a sinus at the base within; horns are seated below the crest of the frontals, and are usually considerably apart at the base; inguinal-pits in many, muffle is often wanting; resemble deer in the lightness of their make; are of still more slender form, with finer limbs; and possess greater speed, but physiologically they are far removed from them. Hair is generally finer and more smooth than in deer. Horns of antelopes are variously bent, usually ringed at the base, and round and smooth at the tip, is situated well forwards, almost over the edge of the orbits; never branched, except in one species of North america. One small group has four horns. Eye, usually very large, deep brown or almost black, contrasting with the light eye of the Caprinæ [aud], is situated at the upper margin of the forehead, remote from the nostrils; head is lengthened owing to the elongation of the nasal bones; the ears are seated well back and are long. Antelope mostly live in more or less numerous herds [chowsingha, jinka, nilghye, ravine deer].—"*b*" Bovinæ are Ox-like animals [maud]. Horns always in both sexes; muffle large and broad; tail moderately long; no eye-pits; of large size, heavy and massive body; limbs stout; a dewlap often present. The horns are inserted laterally on the apex of the frontal crest. The occipital plane of the skull forms a small angle with the frontal plane. This sub-family must be further sub-divided into three groups; the Bisontine, the Taurine and the Bubaline. "i" The Bisontine group comprise the true Bison [gowr] of Europe and North america, the Musk ox of Arctic america, and the Yak of Central asia. "ii" The next group is the Taurine, sub-divided into the Zebu [maud] or humped domestic cattle; Taurus, the humpless cattle with cylindrical horns; and Gavæus, the humpless cattle with flattened horns, peculiar to South-eastern asia. The common humped cattle of India belong to the Zebu [maud]. The genus Taurus contains the cattle of Europe with cylindrical horns. The genus gavæus called also flat-horned Taurines comprises Indian wild-bull or Indian bison. "iii" The Bubaline group gives the Buffaloes [khoolgah].—"*c*" Capriuæ are Goats and Sheep [aud]. Horns usually in both sexes, or in the males only, more or less compressed, usually angulated, rugose, and curving backwards, or spiral; bony cores of the horns thick, porous and cellular; no canines; muffle generally absent; feet-pits in all feet, or in the forefeet only, or none; eye-pits in all or in pits not usual; horns seated on the crest of the forehead, are closely approximate, covering the top of the head; eyes usually pale. This sub-family must again be sub-divided into the capricorns, the goats, and the sheep. Capricorns [saddle-back], or Antelope goat or Mountain antelope, have the horns somewhat rounded, conical, curving backwards, of small size, found in both sexes. Compared with real antelope [jinka] these animals have a heavy body, stronger limbs, large hoofs and false hoofs. Next come the true goats [vellaud], having the horns distinctly angulated. Domestic goats have feet-pits in the forefeet, but not in the hind, whilst sheep have them in all four feet, and by this means, a hind quarter of goat with the foot attached can be at once distinguished from one of sheep. Male goats emit a strong odour. The characteristics of the sheep compared with goats are as follows:—a feebler structure and more slender limbs, shorter hoofs, and small false hoofs; a larger and heavier head; an arched chaffron; longer and more pointed ears; croup higher than the withers; want of hircine odour; paler eyes; shorter and more equal hair, and straighter back. The sheep bears change of climate ill, is incurious, staid and timid; does not bark trees; and in fighting, runs a tilt, adding the force of impulse to that of weight [aud, chowsingha, gowr, jinka, khoolgah, maud, nilghye, ravine deer, saddle-back].——*Camelidæ* (क्रमेलकुल - kramélakula, San.). From (kraméla, san. camel). Ruminantia, 26. Camel-like animals [ottagam].——*Canidæ* (कुकुरकुल - kukurakula, San.). From (kukura, san. dog). Digitigrada, carnivora, 12. Dogs [cookooram]. Forefeet with five toes, the thumb raised; hind feet usually with four; head conical and pointed in front, jaws being produced; legs of nearly equal length; tongue smooth; some have a dermal gland above the base of the tail; others a sac or hollow gland on each side of the anus, opening by a pore, which secretes a pungent whey-like substance with the peculiar smell of the animal. In domestic dogs these pores exist, but are evanescent, and without a distinct sac or secretion. In these too there is often a fifth claw on the hind feet, but only connected by skin, and called the dew-claw [cookooram, dhole, jackal, konye, lomree, nye, shwaunam].——*Cercopithecidæ* (लांगूलीकुल - lángúlíkula, San.). From (lángúli, san. tailed ape). Quadrumana, 1. Apes [lungoor]. Nails flat or somewhat rounded, blunt; forefeet usually with five toes; hind feet always pentadactylous; thumb remote; nostrils separated by a small and narrow septum, tail never prehensile, sometimes wanting; the region of the tuberosity of the ischium usually destitute of hair and callous. In their anatomical characters closely resemble man, differing in the relative proportions of parts. Some have cheek-pouches, others have none. Some have laryngeal pouches, or membranous expansions, sending prolongations into the muscles; these are receptacles of air and communicate with the cavity of the larynx by an aperture at the base of the epiglottis. Their probable use is to diminish the specific gravity of their body in the action of climbing. The cheek-pouches enable them to eat with rapidity; their callosities enable them to assume the sitting posture readily; and the long tails of some enable them to balance themselves in their surprising leaps. The points in which even the nearest allied species differ from man are the conspicuously longer forearms, the long flexible toes, and the thumb on the hind feet. The pelvis is narrow and does not assist the equilibrium in the erect position, and when they stand erect they cannot do so on the soles of their feet, but rest on the outer edge of the foot. The form of

the skull approaches that of man, but with age it differs much, the jaws lengthening. The skeleton generally may be said to deviate from man towards some of the larger carnivora. The mass of the brain is smaller than in man. As a general rule herbivorous, but some live on a mixed diet. Most live in societies and they are chiefly arboreal in habit.—"*a*" Cercopithecinæ are Baboons [q.v.]. Comprise the true baboons of Africa and the monkey-like baboons of India. More compactly built than the next head. Less herbivorous in their diet, eating frogs [bhaicam], lizards [chipkalee], crabs [nundoo], and insects [poochy], as well as vegetables and fruit. Their callosities and cheek-pouches are large. Chief representatives in S. india are common monkey [bandar] and lion monkey [siyah bandar].—"*b*" Semnopithecinæ are Apes. They are described under the title-head Lungoor.——*Cervidæ* (मृगकुल - mrigakula, San.). From (mriga, san. deer). Ruminantia, 24. Deer [mrigam]. Remarkable for their fine horns or osseous prominences, shed and renewed annually, more or less contemporaneously with the renewal of the hair, and called antlers. In the reindeer alone the females possess horns normally, though very rarely old and barren females of other species have been known to assume them. Feet touch the ground only at the extremity of the two principal toes, usually two rudimentary toes with small hoofs at the back of the foot; end of the muzzle is bare in almost all deer, and is sometimes called the muffle; one or two glands covered with a small tuft of hair on the hind leg, the presence of which, in some cases at least, furnishes a good character to distinguish females of this family from hornless female antelope [jinka]; and there are feet-pits also, either in all four feet or only in the hind feet. When the horns first appear they are covered with a hairy skin, commonly called the velvet, which becomes dry and is thrown off; at each successive renewal of the horns, they become larger and more developed, getting additional branches in some till excessive age, when they diminish at each renewal. In their early condition the horns are soft and yielding. The rutting season immediately follows the development of the antlers.—"*a*" Cervinæ are True stags. Comprise the red deer of Europe and its affines, the reindeer and the fallow deer; possess a median tine or royal antler, found with very rare exceptions in no other deer; body longer, and with a somewhat different carriage.—"*b*" Rusinæ. With one basal tine and no median tine; summit more or less branched, generally with only one subterminal tine; muffle high. The group includes the samber [q.v.], the cheetal [q.v.], and the muntjac [jungle sheep]; cheetal is peculiar to the tropical and sub-tropical regions of Asia and its archipelago, or to the Indian kingdom taken in its widest sense [cheetal, jungle sheep, mrigam, samber].——*Delphinidæ* (शंकुकुल - shankukula, San.). From (shanku, san. nail, dolphin). Cetacea, 29. Dolphins [pundry meen]. Nostrils open by a single transverse aperture; head of moderate size; cranium broad and high; nasal passages nearly vertical. Dolphins, or porpoises [cadal pundry], are found all over the world, inhabiting seas and many ascending large rivers; generally associate in flocks or shoals; are very active, swimming and playing near the surface of the sea, and feeding on fishes [matsyam], crustacea [kavachiny], cuttle fish, &c.; often accompany ships for miles [cadal pundry, pundry meen].——*Elephantidæ* (गजकुल - gajakula, San.). From (gaja, san. elephant). Proboscidea, 20. Elephants [q.v.]. Two large incisive tusks [dant] in the upper jaw; feet with five toes, with nails surrounded by a thick callous skin; snout elongated into a long prehensile proboscis or trunk; cranium much elevated vertically, intermaxillary bones being much developed to support the tusks [dant] which are sometimes enormous and curved upwards, and to give origin to some of the numerous muscles which support the proboscis. This organ, flexible in every direction and endowed with great sensibility, enables the elephant to procure his food from the ground or high trees, sucks up the water he drinks, and conveys it to his throat. Brain occupies but a small space in the huge cranium; nasal bones shortened; the nostrils terminate in the end of the proboscis; stomach simple [elephant].——*Equidæ* (अश्वकुल - ashvakula, San.). From (ashva, san. horse). Ungulata, 21. Horse-like animals [ghorah]. Two anterior toes are soldered together, forming a single perfect toe, covered by a broad undivided hoof; tail moderately long with long hair; ears rather large and pointed; there is a mane; skull is elongated; lower jaw is of great size and strength; humerus and femur are short; the fore-arm and shank are long partially anchylosed; three phalanges complete the foot, the last of which bears the hoof; the stomach is simple. The animals of this family comprise horses [ghorah], asses [gadhah], and zebras, which are usually placed in one genus [ashwam, gadhah, ghorah, katcher].——*Erinaceidæ* (शलीकुल - shalíkula, San.). From (shalí, san. hedge-hog). Insectivora, 14. Hedge-hogs [moollely]. Back protected by spines, or rigid bristles; feet pentadactylous, not fossorial; tail very short or none; body short, thick, and stout; and the muzzle less pointed than in the other groups of this order. The cranium approaches the form of that of the smaller carnivora [moollely].——*Felidæ* (मार्जारकुल - márjárakula, San.). From (márjára, san. cat). Digitigrada, carnivora, 9. Cats [deeptaucsham, poonay]. Forefeet with five, hind feet with four or five, toes; jaws short and strong; head rounded; limbs powerful; teeth are particularly cutting; essentially carnivorous; foot-fall is noiseless, from the thick pads with which the under surface of their feet is furnished; claws habitually kept withdrawn between the toes by action of an elastic ligament which acts on the last joint of each toe, bending it upwards; fur usually dense and short; limbs of moderate length, very powerful, can take astonishing bounds; vision adapted for night as well as for day, all are nocturnal in habits, or nearly so; sense of hearing very acute; long whiskers, delicate organs of touch; tongue furnished with rough papillæ, directed backwards and somewhat recurved; usually take their prey by suddenly springing on it from a concealed spot; if they fail in seizing it rarely pursue; generally solitary, but occasionally hunt in families. Popularly divided into lions [simham], tigers [pooly], leopards [cheetah], cats [poonay], and lynxes [caracal, cheetah, deeptaucsham, honiga, jungle cat, marjauram, pooly, poonay].——*Hyænidæ* (तरक्षकुल - tarakshukula, San.). From (tarakshu, san. hyæna). Digitigrada, carnivora, 10. Hyænas [cazhoothay pooly]. Trunk declining backwards from the shoulders; tail short; in general form hyænas resemble dogs [nye] more than cats [poonay]; in their dentition they more resemble felidæ [deeptaucsham]; hind legs are much bent, so that the hind quarters are always lower than the shoulders; feet have usually four strong claws, not retractile; tongue is rough with recurved spines [cazhoothay pooly].——*Hystricidæ* (शल्यकण्ठकुल - shalyakant'hakula, San.). From (shalya, san. thorn + kant'ha, san. neck), porcupine from sharp quills. Rodentia, 18. Porcupines [kharpoosht]. Body more or less clad with acuminate spines; hind feet with four or five toes; skull remarkable for the great size of the infra-orbital foramen; usually fourteen pairs of ribs; length of the tail very various; burrowing animals of strictly nocturnal habits, feeding on roots, fruit, bark, and young shoots [kharpoosht].——*Lemuridæ* (वनमानुषकुल - vanamánushakula, San.). From (vana, san. forest + mánusha, san. man). Lemur. Quadrumana, 2. Lemurs [devaunga]. Nostrils terminal; first finger of the hind feet with recurved claw; other nails flat; thumbs of both extremities opposable; molars with pointed and alternating tubercles. Classed by some under the name of Strepsirhini, separated into the sub-families Indrisinæ, Lemurinæ, Nycticebinæ, and Galaginæ. Distinguished from monkeys [bandar] by the two-horned uterus, by the lower jaw remaining permanently divided in the middle, and by the bony orbits being open behind, but with a bony ring separating them from the temporal fossæ. The Indian members belong to the sub-family Nycticebinæ [devaunga].——*Leporidæ* (शशकुल - shashakula, San.). From (shasha, san. hare). Rodentia, 19. Hares [mosal]. Forefeet with five toes, hind feet with four, all with hairy soles; nails long, compressed; tail short or none; distinguished from all other rodents by the possession of a small additional incisor placed behind each of the large incisive tusks of the upper jaw [mosal].——*Manididæ* (घुणकुल - ghunakula, San.). From (ghuna, san. ant-eater). Edentata, 28. Ant-eaters [jungle carp]. No teeth; body and tail covered with large, imbricate, horny scales; tail long; ears small, mostly indistinct; all feet with five toes; the scales are evidently, from their structure, a congeries of agglutinated hairs. They have the power of rolling themselves into a ball; the stomach is slightly divided in the middle [jungle carp].——*Moschidæ* (कस्तूरीमृगकुल - kastúrímrigakula, San.). From (kastúrí, san. musk + mriga, san. deer). Ruminantia, 25. Muskdeer-like animals. Without horns; feet very much cloven and large false hoofs; includes the musk-deer and the mouse-deer; mostly of small size with very slender limbs; stated to differ from other deer [mrigam] in possessing a gall-bladder [mouse-deer].——*Muridæ* (मूषिककुल - múshikakula, San.). From (múshika, san. rat). Rodentia, 17. Rat-like animals. The Jerboas [shevvely] have hind limbs much lengthened; tail long and tufted; they make most surprising jumps. Ordinary rats [ely] and mice [shoondely] have the forefeet with four wide-set toes and a hallucar unguiculate wart; hind feet with five toes; tail usually long and thinly clad or nude, short, and hairy in a few [bandicoot, ely, golandy, kok, moosham, pepper rat, shoondely].——*Mustelidæ* (नकुलकुल - nakulakula, San.). From (nakula, san. mongoose). Semi-plantigrada, carnivora, 8. Weasels and Martens, Badgers [indian rattel] and others. Claws sharp; snout short, rounded; restricted to the weasels and martens; animals of small size, elongated vermiform make, with very short limbs; head rounded in front like cats; skull has an elongated form posteriorly. They are very active and agile, highly carnivorous and blood-thirsty, destroying vast numbers of small animals and birds, which they seize by the back of the head; fur of many soft and fine, very highly prized; most abundant in cold climates.—"*a*" Lutrinæ are Otters [neernye]. Of large size; feet webbed; tail flattened.—"*b*" Melinæ are Badgers [indian rattel]. Ears small; anterior feet with large claws, fossorial in some; differ from weasels and martens by their heavy form, stout limbs and more inactive gait, by their decidedly fossorial claws and their harsh coarse hair; in this group are most animals that have the power of diffusing a fetid stench; entirely ground animals; ordinarily erect their tail, most more or less striped longitudinally [indian rattel, neernye].——*Noctilionidæ* (जतुकाकुल - jatukákula, San.). From (jatuká, san. bat). Cheiroptera, 5. Noctule bats [chamgadal]. No facial membrane; head, short and obtuse; lips, large; wings, long; tail

usually free at the tip [chamgadal].——*Physeteridæ* (मेदस्तिमिकुल - médastimikula, San.). From (médastimi, san. sperm-whale). Cetacea, 30. Sperm whales [hoot].——*Pteropodidæ* (वातुलिकुल - vátulikula, San.). From (vátuli, san. large bat). Cheiroptera, 3. Flying foxes [q.v.]. Frugivorous bats. Ears small without a tragus; index with three phalanges, generally unguiculate; tail very short, or none; interfemoral membrane small, deeply excised posteriorly; face lengthened; gape moderate. The frugivorous bats, differing so much in their dentition from the insectivorous species, seem to lead through the flying lemurs directly to the quadrumana. They comprise the largest species in the order of bats [flying fox].——*Sciuridæ* (चमरपुच्छकुल - chamarapuchhakula, San.). From (chamarapuchha, san. squirrel). Rodentia, 16. Squirrels [anil, chamarapootcham]. Tail typically long, bushy; squirrels form a well-marked group of elegant animals, mostly with arboreal habits; one group only is quite terrestrial, the marmots. Most striking feature of the skull is the distinct post-orbital process; the palate is larger than in other rodents [anil, chamarapootcham, malabar squirrel].——*Sirenidæ* (जलनरकुल - jalanarakula, San.). From (jalanara, san. water-man, dugong). Ruminantia, 27. Dugong [q.v.].——*Sorecidæ* (गन्धमूषिककुल - gandhamúshikakula, San.). From (gandha, san. fragrance + múshika, san. mouse). Insectivora, 13. Shrews [musk rat]. Body, covered with soft hair; eyes, small but distinct; external ears in most, generally small; muzzle, elongated; forefeet, ordinary form; comprise a large number of small animals of nocturnal habits. The toes are well cloven; the tail of moderate length, more or less naked, or thinly clad with hairs; snout is lengthened, pointed and very mobile. On each side of the body in certain species there is a gland under the skin surrounded by a circlet of short hairs, which secretes a fluid of the odour of musk [custoory]. It exists in both sexes, and appears to be more developed at certain periods. During the day shrews remain concealed in drains or holes, dark out-houses, under boxes, mats, &c.; and those that dwell in forests, under stones, or in holes under trees. At nightfall they sally forth and hunt for their food, which is chiefly insects [musk rat].——*Suidæ* (शूकरकुल - shúkarakula, San.). From (shúkara, san. boar). Artiodactyla, ungulata, 22. Boars [jungly soor]. Feet with the hoofs insistent, with four toes usually on all feet, the hind feet sometimes with three; snout truncate, mobile, prominent; tail short. Pigs [pundry, soor] have a somewhat movable snout with a firm cartilaginous tip, which they employ in turning up the ground in search of roots; two middle toes are large, armed with strong hoofs, and the animal walks on them alone, the two upper lateral toes with their hoofs not touching the ground; eyes small; ears moderate and upright; skin clad with strong bristles; very prolific; found in warm and temperate portions [soor].——*Tupaiadæ* (तरुगन्धमूषिककुल - tarugandhamúshikakula, San.). From (taru, san. tree + gandhamúshika, san. musk rat). Insectivora, 15. Tree shrews [musk rat]. Muzzle attenuated, lengthened; ears oval, rather large; feet pentadactylous; tail long, densely clothed with hairs, somewhat distichous; the hair of the body soft and glistening. Skull differs from that of other insectivora in having the bony orbit complete, and moreover they possess a small cœcum. Tree shrews are diurnal in their habits, live on trees, which they climb well, feed both on fruit and insects [poochy] which they hold in their paws like squirrels [anil]. Female only produces one young at a birth [musk-rat].——*Ursidæ* (ऋक्षकुल - rikshakula, San.). From (riksha, san. bear). Plantigrada, carnivora, 7. Bears [ricsham]. Soles of the feet usually devoid of hair; ears small; snout lengthened; tail usually very short; mostly large, heavy animals, strictly plantigrade in their walk; body covered with long and shaggy hair; claws adapted for digging, being long and stout; mostly expert climbers. Many live almost entirely on fruits and roots and other vegetable diet; others on insects [poochy], larvæ, honey [shahad], &c.; a few are more carnivorous in their habits. Conceal themselves in the day-time in caves, holes of trees, and thickets [ricsham].——*Vampyridæ* (काकपिशाचकुल - kákapisháchakula, San.). From (kákapishácha, san. crow-demon; vampires). Cheiroptera, 4. Vampires [kaffaush]. A nose leaf, either simple or complicated. Divided in the sub-families Magadermatinæ and Rhinolophinæ [kaffaush].——*Vespertilionidæ* (अजिनपत्रकुल - ajinapatrakula, San.). From (ajina, san. hairy skin + patra, san. wing); bat. Cheiroptera, 6. Common bats [vavvaul]. No facial leaf; ears usually separated; lips simple; tail long; wings wide; a single phalanx in the index fingers; comprises the ordinary bats [vavvaul] and is divided into two groups, differing in the number of teeth [vavvaul].——*Viverridæ* (गन्धमार्जारकुल - gandhamárjárakula, San.). From (gandha, san. fragrance + márjára, san. cat); civet cat. Digitigrada, carnivora, 11. Civets [poonoogoo poonay]. Civets comprise a varied assemblage of animals confined chiefly to warmer regions; most of them possess a pouch [mongoose, poonoogoo poonay, toddy-cat].——**(5)** The following is a list of the principal genera arranged alphabetically, with the Sanscrit equivalents for their titles, references, and brief descriptions.——*Antelope* (कुरङ्गजाति - kurangajáti, San.). From (kuranga, san. antelope). Antilopinæ, bovidæ, ruminantia, 23. The Antelope [jinka]. Horns in the males only, long, annulated with strong rings the tip smooth, spirally twisted, approximate at the base; no muffle; eye-pits, moderate, somewhat linear; no canines; large inguinal pits; feet-pits present; small knee brushes [jinka].——*Axis* (पृषतजाति · prishatajáti, San.). From (prishata, san. spotted deer). Cervidæ, ruminantia, 24. The Spotted deer [cheetal]. One basal and one sub-terminal snag; beam a good deal bent, pale and somewhat smooth; muffle large; eye-pits large; inguinal glands; feet-pits in the hind legs only; canine teeth in the upper jaw in the males only, or in both sexes; of small or moderate size; pelage more or less spotted; tail moderately long. Contains here Maculatus [cheetal].——*Balænoptera* (वाजतिमिजाति - vájatimijáti, San.). From (vájatimi, san. fin whale). Balænidæ, cetacea, 31. The Fin whale [timingilam]. An adipose fin on the back; belly marked by longitudinal grooves; head about one-fourth of total length; feed on small fishes; found in all seas. Largest animals of the family belong to this genus [timingilam].——*Bubalus* (गवलजाति · gavalajáti, San.). From (gavala, san. wild buffalo). Bovinæ, bovidæ, ruminantia, 23. The Wild buffalo [khoolgah]. Horns large, attached to the highest line of the frontals, inclining backwards and upwards; muffle large and square; no true dorsal ridge or hump; cranium elongated, narrow; thirteen pairs of ribs [khoólgah].——*Camelus* (क्रमेलजाति · kramélajáti, San.). From (kraméla, san. camel). Camelidæ, ruminantia, 26. The Dromedary [ottagam]. Cleft upper lip which is prehensile, two toes encased in skin with nail-like hoofs; the whole surface of the toes touches the ground; two upper incisors, and six in the lower jaw, and two canines in each jaw; eighteen to twenty molars; includes the camels of the old world and the alpacas of the new world; former have the two toes united below almost to the point by a common sole, and humps of fat on the back. Their humps are reservoirs of fat, which become absorbed during long fasts, and enable them to take long journeys on very little food. Their flat feet are admirably adapted for treading on loose sand [manal, ottagam].——*Canis* (श्वानजाति · shvánajáti, San.). From (shvána, san. dog). Canidæ, digitigrada, carnivora, 12. Tail moderately brushed. In this group are classed the wolf, the jackal and the dog. Wolves [konye] are of large size; muzzle obtuse, not much lengthened; tail short; no caudal gland. Jackals [q.v.] are of moderate size; gregarious; brush rather scanty. The Wild dog [dhole] has skull more uniformly arched than in domestic dogs [nye]; jaws shorter and stronger; has the odour and aspect of saccalius, but ears and tail larger, the latter more brushed, the brow and eye bolder, and the muzzle blunter. The shoulder and croup are about level ![dhole, jackal, nye, shwaunam].——*Cervulus* (न्यंकुजाति - nyankujáti, San.). From (nyanku, san. jungle sheep). Cervidæ, ruminantia, 24. The Jungle sheep [q.v.]. Horns raised on high hairy pedicles with only one small basal snag; large canines in the upper jaw in both sexes; muffle large; two conspicuous longitudinal facial creases; tail rather short; eye-pits very large and mobile; large feet-pits in the hind feet; no inguinal pits; no calcic tuft. Jungle sheep are deer [mrigam] of small size, inhabiting dense forest, and are peculiar to the Indian kingdom. By their long canines and small antlers they form a link to the moschidæ or musk-deer [jungle sheep].——*Crocidura* (गन्धमूषिकजाति · gandhamúshikajáti, San.). Sorecidæ, insectivora, 13. The Musk-rat [q.v.] or Shrew. Teeth generally wholly white; ear-conch very distinct; tail thick and tapering, and furnished with a few long scattered hairs, which certain species likewise exhibit upon the body. Some do not appear to be furnished with the musk gland [musk rat].——*Cynælurus* (चित्रकजाति · chitrakajáti, San.). From (chitraka, san. leopard). Felidæ, digitigrada, carnivora, 9. The hunting Leopard [cheetah].——*Cynopterus* (वातुलिजाति · vátulijáti, San.). From (vátuli, san. bat). Pteropodidæ, cheiroptera, 3. The Small fox bat. Snout, short; tail, very short, or none [flying fox].——*Delphinus* (शंकुजाति · shankujáti, San.). From (shanku, san. porpoise). Delphinidæ, cetacea, 29. The Porpoise [cadal pundry]. Teeth numerous, slightly recurved, vary from twenty-four to sixty on each side, both above and below; a median dorsal fin [cadal pundry].——*Elephas* (गजजाति · gajajáti, San.). From (gaja, san. elephant). Elephantidæ, proboscidea, 20. The Elephant [q.v.]. Huge tusks cylindrical with a conical tip formed of ivory and enamel only. It is said that the molars are renewed eight times in some elephants; the tusks [dant] are only renewed once, between the first and second years of age; the skin is very thick and nearly devoid of hairs; huge unwieldy animals with large ears, long and thick limbs, and a long tail [elephant].——*Equus* (अश्वजाति - ashvajáti, San.). From (ashva, san. horse). Equidæ, perissodactyla, ungulata, 21. The Horse [ashwam, gadhah, ghorah]. Sub-divides into horses [ghorah] properly so called, Equus vulgaris; asses [gadhah], Equus asinus; and zebras, Equus hippotigris. Asses are distinguished from horses by their longer head and ears, by the tail being covered with short hairs at the base and furnished with a tuft of long hairs towards the tip and on the sides only, not throughout as in horses; also want the peculiar hard horny excrescences found on the legs of horses; have almost invariably a dark, longitudinal, dorsal stripe [ashwam, gadhah, ghorah].——*Erina-*

ceus (शलीजाति - shalíjáti, San.). From (shalí, san. hedge-hog). Erinaceidæ, insectivora, 14. The Hedge-hog [moollely]. Snout lengthened; ears moderate; tail very short; body densely covered with spines on the back and sides, with hairs and bristles beneath; skin of the back furnished with muscles which enable the animal to roll itself into a ball, so as to present spines on every side. Hedge-hogs hybernate in cold countries, but do not burrow, concealing themselves under leaves, in hollow trees, ditches, and under thick bushes; feed chiefly on insects [poochy], also on slugs, frogs [bhaicam], mice [shoondely], snakes [paumb], and eggs; said at times to partake of vegetable food; nocturnal in their habits. Female produces as many as six or seven young sometimes at a birth [moollely].——*Euphysetes* (मेदस्तिमिजाति - médastimijáti, San.). From (médastimi, san. sperm whale). Physeteridæ, cetacea, 30. The Sperm whale [hoot]. Upper parts of heads cellular and filled with spermaceti [hoot].——*Felis* (मार्जारजाति - márjárajáti, San.). From (márjára, san. cat). Felidæ, digitigrada, carnivora, 9. Hind feet with four toes. Lions [simham], unspotted, of large size; pupil round distinguished by enormous head, maned neck, comparatively weak hind limbs, and a shortish tufted tail. Tigers [pooly], of large size, striped; pupil vertical. Leopards [cheetah], more or less spotted; of moderate or large size; tail long. Cats [poonay] smaller size, with shorter tails [caracal, honiga, jungle cat, marjauram, pooly, poonay].——*Gavœus* (गवयजाति - gavayajáti, San.). From (gavaya, san. bison). Bovinæ, bovidæ, ruminantia, 23. The Bison [gowr]. Head large, massive; horns slightly flattened on one side, thick, remote, spreading; tail short; muffle small; otherwise as in taurus [gowr].——*Gazella* (हरिणजाति - harinajáti, San.). From (harina, san. gazelle). Antilopinæ, bovidæ, ruminantia, 23. The Gazelle [ravine deer]. Horns rather short, lyrate, ringed, approximate at the base, diverging at the tip, present in the female but very small; ears long, acuminate; tail moderate; eye-pits small, obliquely transverse; groin-pits distinct; large feet-pits in all feet; knees tufted, and calcic tuft posteal. Comprises the gazelles, animals of rather small size, with large eyes and very active and graceful, inhabiting bare and desert countries [ravine deer].——*Gerbillus* (हरिणमूषिकजाति - harinamúshikajáti, San.). From (harinamúshika, san. mouse-deer). Murinæ, muridæ, rodentia, 17. The Jerboa rat. Ears oval; head lengthened and somewhat pointed; toes eloganted; tail long, hairy, with a tuft of hair at the tip. Field rats [varappely] have small fore limbs and well-developed hinder limbs; form somewhat slender; eyes large; extraordinarily agile; form extensive burrows in plains, especially in sandy districts, also in sand hills, but not generally in cultivated fields [shevvely].——*Globicephalus* (कायत्तिमिजाति - káyattimijáti, San.). From (kai, san. to sound + timi, san. whale). Delphinidæ, cetacea, 29. The Ca'ing whale [cadal pundry]. Head rounded in front; paddles long, narrow and pointed; teeth few in number, deciduous when old; dorsal fin distinct [cadal pundry].——*Golunda* (गुल्ममूषकजाति - gulmamúshakajáti, San.). From (gulmamúshaka, san. bush rat). Murinæ, muridæ, rodentia, 17. The Bush rat [golandy] or Field rat [varappely]. Molars when perfect low, with a broad flat crown; the cross ridges of the crown of the upper grinders divided into three distinct, slightly raised tubercles; upper incisors grooved. Two species are classed under this, which are apparently sufficiently distinct in general feature as well as in habits [golandy, varappely].——*Halicore* (जलनरजाति - jalanarajáti, San.). From (jalanara, san. dugong). Sirenidæ, sirenia, 27. The Dugong [q.v.]. Body elongated; pectoral fin without claws; caudal fin lunate, broad; the incisive teeth assume the form of pointed tusks, but are nearly covered by the thick fleshy lips which are bristled with moustaches; tongue, spiny in front, has a curious horny process on each side of its base; stomach is double; heart deeply cleft, separating the ventricles; superficial air-vessels of the lungs are large, turtle-like, and the lungs and bronchi generally are like those of the turtles [cadal aumay, dugong].——*Hemitragus* (वनच्छागजाति - vanachhágajáti, San.). From (vana, san. forest + chhága, san. sheep). Ibex. Caprinæ, bovidæ, ruminantia, 23. The Ibex [saddle-back]. Horns trigonal, compressed, knotted in front; a small muffle; no eye-pits nor feet-pits, nor inguinal pores [saddle back].——*Herpestes* (नकुलजाति - nakulajáti, San.). From (nakula, san. mongoose). Herpestinæ, viverridæ, digitigrada, carnivora, 11. The Mongoose [q.v.]. Ears small, short and rounded; feet all with five toes, with large compressed, incurved, somewhat retractile claws; tail long, thick at the base; hairs long, rigid, often ringed with distinct colors. Ichneumons or mongooses have a sharp muzzle, small eyes, short limbs, hinder ones semi-plantigrade, and toes connected by a membrane. Tongue is rough with horny papillæ; very active in their habits, bold and sanguinary in disposition; partly fossorial; in hot tropical countries of the old continent appear to take the place of the weasels of colder regions; numerously represented in India [mongoose].——*Hipposideros* (अश्वखुरत्रजाति - ashvakhuratrajáti, San.). From (ashvakhura, san. horse's hoof + trá, san. to protect). Rhinolophinæ, vampyridæ, cheiroptera, 4. The Horse-shoe bat [kaffaush]. Most species have a remarkable peculiarity, viz., a circular cavity or sac behind the nasal crest, which the animal can turn out at pleasure like the finger of a glove; it is lined by a pencil of stiff hairs, and is probably a glandular organ, as it contains a peculiar waxy matter; ears very tremulous [kaffaush].——*Hyæna* (तरक्षजाति - tarakshajáti, San.). From (taraksha, san. hyæna). Hyænidæ, digitigrada, carnivora, 10. The Hyæna [cazhoothay pooly]. Hyænas have a short solid skull; short muzzle; claws stout and blunt; beneath the tail is a deep pouch analogous to that in the civets [poonoogoo poonay] but not secreting an odorous substance; temporal muscles are very large and powerful, as are those of the neck; their jaws and teeth strong enough to crush large bones; quite nocturnal in habits, living in holes and caverns, feeding chiefly on the remains of carcases; not unfrequently carry off dogs [nye]. They are easily tamed, even susceptible of attachment [cazhoothay pooly].——*Hystrix* (शल्यकण्ठजाति - shalyakant'hajáti, San.). From (shalyakant'ha, san. porcupine). Hystricinæ, hystricidæ, rodentia, 18. The Porcupine [kharpoosht]. Hind feet with five unguiculate toes; all the claws stout; body armed with rigid spines, mixed with some longer flexible ones; tail very short, with a bundle of open tubes at the end; muzzle truncated. Take their popular name, signifying spiny pig, from their large size and grunting voice; found in the warmer regions of the old continent; peculiar open tubes of the tail are supported on slender stalks, and they make a rattling noise when shaken [kharpoosht].——*Kerivoula* (चित्राजिनपत्रजाति - chitrájinapatrajáti, San.). From (chitra, san. variegated + ajinapatra, san. bat). Vespertilioninæ, vespertilionidæ, cheiroptera, 6. The painted bat [vavvaul]. Face short, hairy; muzzle narrow; ears broad, not very acute at tip; feet hairy above, half attached; tail long [vavvaul].——*Leggada* (शल्यबालमूषिकजाति - shalyabálamúshikajáti, San.). From (shalya, san. spine + bálamúshika, san. mouse). Murinæ, muridæ, rodentia, 17. The Spiny mouse [moolloo shoondely]. Fur fine, mixed with numerous spines; somewhat flattened [shoondely].——*Lepus* (शशजाति - shashajáti, San.). From (shasha, san. hare). Leporidæ, rodentia, 19. The Hare [mosal]. Ears typically very long; tail short, recurved; hind legs much longer than the forelegs; well known for their timidity and watchfulness, increased by the situation of their eyes, which are so placed that they can see all round, and for their great speed. In some, as in hares, the young are born with their eyes open; in the rabbits with their eyes closed [mosal].——*Loris* (वनमानुषजाति - vanamánushajáti, San.). From (vanamánusha, san. forest man, loris). Lemuridæ, quadrumana, 2. The Lemur or Loris [devaunga]. Body and limbs slender; no tail; eyes very large, almost contiguous; nose, acute, slightly ascending [devaunga].——*Lutra* (उद्रजाति - udrajáti, San.). From (udra, san. otter). Lutrinæ, mustelidæ, carnivora, 8. The Otter [neernye]. Ears small; feet short; body lengthened; tail longish, stout at the base, round, depressed towards, the tip, flat beneath. Well marked group distinguished by their elongated and somewhat flattened form, short and stout limbs, with toes well webbed and spreading, and with naked soles. Fur is close, fine and short, woolly beneath, smooth glossy hairs above; eyes provided with nyctitating membrane, as a defence to them under water; teeth strong and sharp, tubercles of molars very pointed to secure their prey, which is almost entirely fish; skull said to have something in common with seals in the short muzzle, and wide and flat cranium; articulations of the extremities admit of great freedom of motion [neernye].——*Macacus* (केसरिवानरजाति - késarivánarajáti, San.). From (késarivánara, san. lion monkey). Cercopithecinæ, cercopithecidæ, quadrumana, 1. The Monkey [bandar]. Face, somewhat produced, but rounded; callosities, present; the last molar tooth of the lower jaw has five tubercles, the other two true molars with four tubercles; tail, short. The monkeys of this genus have a somewhat prominent muzzle, and protruded superciliary ridge; the nostrils open obliquely at some distance above the end of the muzzle; their canines are very strong, and the first molars are inclined backwards to make room for the large upper canine. The limbs are strong and compact, and they are as much terrestrial as arboreal. They eat frogs [bhaicam], crabs [nundoo], lizards [chipkalee] and insects [poochy] as readily as vegetable food. Their callosities are large, as are their cheek-pouches, and they have also laryngeal expansions. Their tails are short. They are quiet and intelligent in youth, but become ferocious and untameable in old age [bandar].——*Manis* (घुणजाति - ghunajáti, San.). From (ghuna, san. ant-eater). Manididæ, edentata, 28. The Pangolin or Scaly ant-eater [jungle carp]. Characteristics of the family, of which it is the only genus [jungle carp].——*Megaderma* (काकपिशाचजाति - kákapisháchajáti, San.). From (kákapishácha, san. crow demon; vampyre). Vampyridæ cheiroptera, 4. The Vampire bat [kaffaush]. Nose furnished with a complicated membranous apparatus; ears very large, connate at the base, with a small tragus; no tail [kaffaush].——*Mellivora* (भल्लशूकरजाति - bhallashúkarajáti, San.). From (bhalla, san. bear + shúkara, san. boar). Melinæ, mustelidæ, semi-plantigrada, carnivora, 8. The Badger [indian rattel]. No external ear, only a cutaneous border round the external auditory meatus; head rather short; feet short; tail very short; hair long, rigid; anterior claws very strong; very nearly allied to badgers in appearance; more ursine in its short tail and habit [indian rattel].——*Melursus* (ऋक्षजाति - rikshajáti, San.). From (riksha, san. bear). Ursidæ, plantigrada, carnivora, 7. The Indian bear

[ricsham]. Snout produced; ears small, erect, rounded; tail very short; feet with very strong claws; their cylindrical bones are nearer those of man than those of most animals; the femur, especially, closely approximates the same bone in the human skeleton; hence the faculty possessed by bears of standing erect and of dancing; sole of the foot leaves a mark not unlike that of the human foot [ricsham].——*Memimna* (गिरिकामृगजाति - girikámrigajáti, San.). From (girikámriga, san. mouse deer). Moschidæ, ruminantia, 25. The Mouse deer [q.v.] Canines only in the males, small; false hoofs of ordinary make and size; tail very short; ears moderate; hinder edge of metatarsus covered with hair; no eye-pits nor groin-pits nor feet-pits; animals of very small size and with the hairs smooth. Limbs are exceedingly slender, and their hind quarters are high, causing their action to be very inelegant; frequent only in the thickest forests [mouse deer].——*Mus* (मूषिकजाति - múshikajáti, San.). From (múshika, san. rat). Murinæ, muridæ, rodentia, 17. The Rat [ely] or Bandicoot [q.v.]. Ears more or less rounded, somewhat naked; tail long, scaly, usually thinly haired. The genus comprises the house rats [ely] and mice [shoondely], and some field rats [varappely] of more or less allied form. The various species may be grouped together according to their size and habit:—"*a*" Rats more or less allied to the common brown rat;—"*b*" rats with the tail usually fully as long, or longer than, the head and body; some have quite arboreal habits, building nests among the branches of trees, among the rafters of houses, &c., and not burrowing in the ground;—"*c*" small, arboreal, long-tailed mice, diminutives of the last, ears hairy, hind feet very long, slender, claws small, tail long, with scattered hairs more crowded at the tip, the fur soft with long bristles interspersed;—"*d*" field mice, tail shorter than head and body, fur not spinous [bandicoot, ely, moosham, shoondely].——*Nesokia* (गर्ताश्रयजाति - gartáshrayajáti, San.). From (gartáshraya, san. mole rat). Murinæ, muridæ, rodentia, 17. The Mole rat [kok]. Claws small, compressed; ears moderate, nude; tail short, naked; this genus, easily known from mus by the large size of the cutting teeth and the comparative shortening of the tail, appears to be intermediate to the rats and rhizomys [kok].——*Nycticejus* (पीताजिनपत्रजाति - pítájinapatrajáti, San.). From (píta, san. yellow + ajinapatra, san. bat). Scotophilinæ, vespertilionidæ, cheiroptera, 6. The Yellow bat or Hoary bat [vavvaul]. Ears short and broad, distant, and stand out from the head; muzzle broad, brightly colored, being yellow beneath, of different shades; peculiar physiognomy caused by short muzzle and ears standing out laterally [vavvaul].——*Nyctinomus* (वलितोष्ठाजिनपत्रजाति - valitósht'hájinapatrajáti, San.). From (valita, san. wrinkled + ósht'ha, san. lip + ajinapatra, san. bat). Noctilioninæ, noctilionidæ, cheiroptera, 5. The Wrinkled-lipped bat [chamgadal]. Ears broad, short, approximate or connate, outer margin terminating in an erect lobe beyond the conch; wings narrow, folded as in Taphozous; tail free at the tip; feet short, thick, with strong toes; muzzle thick; lips tumid, lax; upper lip with coarse wrinkles [chamgadal].——*Ovis* (अविजाति - avijáti, San.). From (avi, san. sheep). Caprinæ, bovidæ, ruminantia, 23. The Sheep [shemmariyaud]. Horns in both sexes, large, angular, heavily wrinkled, turned downwards almost into a circle, with their flat points directed forwards and outwards; no muffle; no beard; chaffron convex; large but immobile eye-pits in some, wanting in others; small feet-pits in all feet; inguinal glands distinct. All wild races of sheep differ conspicuously from most of the domestic races by their short deer-like tail [aud].——*Paradoxurus* (ताडीमार्जारजाति - tádímárjárajáti, San.). From (tádímárjára, san. toddy cat). Viverrinæ, viverridæ, digitigrada, carnivora, 11. The Toddy-cat [q.v.]. All feet with five toes connected by a web, the thumb not raised; sole of the feet bald; claws semi-retractile; tail very long, cylindrical. Tree-cats are stouter in form than the genets, more uniform in their coloration; their gait is plantigrade; quite nocturnal in their habits; dentition very similar to that of dogs [nye]; cerebral cavity proportionally smaller; bony orbit not closed; glandular fold in some secreting a peculiar matter, without the odour of civet [poonoogoo] or musk [custoory]; but not a distinct pouch. They climb trees well; roost during the day either on trees or on the roofs of houses among the rafters. Diet is of a mixed character. The character of the tail from which the generic name was derived is the result of some deformity. It can be rolled up, but is not prehensile [toddy-cat].——*Platacanthomys* (मरीचमूषिकजाति - maríchamúshikajáti, San.). From (marícha, san. pepper, piper nigrum, linn. + múshaka, san. rat). Murinæ, muridæ, rodentia, 17. The Pepper rat [q.v.]. Muzzle acute; ears moderate, nude; tail hairy, the hairs arranged distichously; whiskers very long; upper parts densely covered with sharp flat spines, mixed with an exceedingly delicate, thin undercoat; few spines on the lower part but smaller and finer; rodential tusks are quite those of myoxus and its whole habit is myoxine. Resemblance of this genus to the dormouse is very striking, principally on account of the long-haired tail; in other respects, in its smaller eyes, very thin ears, and the well-developed, although very short, thumb of the forefoot, it more approaches several murine genera of Tropical India [pepper rat].——*Portax* (ऋश्यजाति - rishyajáti, San.). From (rishya, san. white-footed antelope). Antilopinæ, bovidæ, ruminantia, 23. The Nilghye [q.v.]. Horns only in males, short, recurved, distant, smooth; eye-pit rather small; upper lip broad, ample; nostrils approximate; tail long, tufted; a short erect mane, and a tuft of hairs on the throat of the male; of large size. Slight pit in front of the orbit; anterior to this a small longitudinal fold, in the middle of which there is a pore, through which exudes a yellow secretion from the gland beneath. The back is rather short, and slopes downwards from the high withers; neck is deep and compressed like that of a horse [ghorah, nilghye].——*Pteromys* (सपक्षवृक्षशायीजाति - sapakshavrikshasháyijáti, San.). From (sapaksha, san. winged + vrikshasháyí, san. tree-sleeper, squirrel). Sciuridæ, rodentia, 16. The Flying quirrel [paravay anil]. Feet as in sciurus [malabar squirrel]; skin of the flanks extended between the fore and hind feet, forming when expanded a wide parachute; tail rounded, hairy all round, as long as the body, or longer; long osseous or cartilaginous appendages to the feet, which serve to support the lateral membrane [anil].——*Pteropus* (वातुलिजाति - vátulijáti, San.). From (vátuli, san. large bat). Pteropodidæ, cheiroptera, 3. The Flying fox [q.v.]. Index finger unguiculate; snout lengthened; no tail in some; short one in others; tongue covered with large papillæ, pointing backwards, each terminating in a brush [flying fox].——*Rhinolophus* (पर्णनासाजाति - parnanásájáti, San.). From (parna, san. leaf + násá, san. nose). Rhinolophinæ, vampyridæ, cheiroptera, 4. The Leaf bat [kaffaush]. Nose furnished with a complicated apparatus, consisting of a cordate or semi-orbicular leaf, bilobed in front of the nostrils; longitudinal, crest along the nose; ears, large, not joined at the base, often with a lobe at the base of the outer margin; tail long, connate with the membrane; wings, long, ample; said to hang with their body rolled up in their wings as in a mantle [kaffaush].——*Rhinopoma* (दीर्घलांगूलपर्णनासाजाति - dírghalángúlaparnanásájáti, San.). From (dírgha, san. long + lángúla, san. tail + parnanásá, san. leaf bat). Rhinolophinæ, vampyridæ, cheiroptera, 4. The long-tailed Leaf bat [kaffaush]. Ears, moderate, connate; auricle, erect; forehead, excavated; nostrils, operculate by a small lamina; tail, connate by its base with the intercrural membrane, but produced beyond it. By its connate ears approaches Megaderma, near which it is classed by some [kaffaush].——*Rusa* (सम्बरजाति - sambarajáti, San.). From (sambara, san. samber). Rusinæ, cervidæ, ruminantia, 24. The Samber [q.v.]. Horns with one basal and one upper tine, thick, dark and rugose; muffle large; eye-pits large and reversile; no feet-pits; of large size; canines in the upper jaw in both sexes; the males heavily maned [samber].——*Sciuropterus* (सपक्षवृक्षशायिकाजाति - sapakshavrikshasháyikájáti, San.). Means winged small squirrel. Sciuridæ, rodentia, 16. The Small Travancore Flying squirrel [paravay anil]. Tail shorter than the body, flat, and the hairs more or less distichous; molar teeth tuberculated; usually of smaller size, otherwise as in Pteromys [anil].——*Sciurus* (चमरपुच्छजाति - chamarapuchhajáti, San.). From (chamarapuchha, san. squirrel). Sciuridæ, rodentia, 16. The Squirrel [anil, malabar squirrel]. Forefeet with only four toes, and a tubercle on the site of the thumb; tail very long, bushy, the hairs directed more or less laterally; large head; prominent eyes; large body; moderately long limbs; mostly quite arboreal in their habits, exceedingly active and lively, feeding on buds, fruit, nuts, and other vegetable substances; and building a large rude nest of leaves, grass, &c. Hold up their food to their mouth between the two thumb-tubercles. Three well-marked groups in India, distinguished by size, coloration, and habits. The first consists of squirrels of very large size, rich coloration, and more or less pencilled ears; second group consists of squirrels of medium size, with grizzled fur; they are confined to the south-east Himalayas and the provinces north-east of Bengal; third group, striped squirrels, named by some the Palmists, of small size affecting the ground more than any other squirrels, in this, as in general appearance, nearly approaching the group of ground squirrels called Tamias; fourth group flying-squirrels divided into two smaller groups, one of large size, with tail round and hairy throughout, Pteromys, other of smaller size with tail flat and the hairs distichous, Sciuropterus [anil, chamarapootcham, malabar squirrel].——*Scotophilus* (चोल-मण्डलीयजाति - chólamandalíyajáti, San.). From (chólamandala, san. coromandel). Scotophilinæ, vespertilionidæ, cheiroptera, 6. The Coromandel bat [vavvaul]. Membranes attached to the foot close to the base of the toes; ears small, ovoid, rounded at the tip [vavvaul].——*Semnopithecus* (लांगूलीजाति - lángúlíjáti, San.). From (lángúlí, san. ape). Cercopithecidæ, quadrumana, 1. The Ape, Lungoor, Hanooman [lungoor]. Cheek pouches rudimentary or wanting; head, round; the face but little produced, having a high facial angle; the last molar tooth of the lower jaw, with a fifth or accessory tubercle behind; canines much longer than the incisors; extremities and feet long; forefeet with the thumb short; and the third and fourth fingers long and subequal; tail very long, slender and straight; callosities present; peculiar to the Indian region. The body of these monkeys is comparatively slender, and the Germans call them slim-apes. Their long and slender limbs, long tail, and the black face with an eye-brow of long stiff black hairs, pointing forwards, distinguish the lungoors from all

other monkeys [bandar]. The tail of these monkeys is not prehensile [lungoor].——*Sus* (शूकरजाति - shúkarajáti, San.). From (shúkara, san. boar). Suidæ, artiodactyla, ungulata, 22. The Boar [jungly soor]. All the feet with four toes, which are enclosed in separate hoofs [soor].——*Taphozous* (जतुकाजाति - jatukájáti, San.). From (jatuká, san. bat). Taphozoinæ, noctilionidæ, cheiroptera, 5. The Noctule bat [chamgadal]. Snout, conical, with the nostrils approximate; forehead, with a rounded cavity; ears, moderate, apart; tail, short; face flat; nostrils can be closed at pleasure; large gular sac in males, which is glandular; a longitudinal fold on each side leads to this sac; fur is close, soft, and velvety; wing long and narrow, collapses with a double flexure outwards [chamgadal].——*Tetraceros* (रोहिषजाति - róhishajáti, San.). From (róhisha, san. a species of deer). Antilopinæ, bovidæ, ruminantia, 23. The Chowsingha [q.v.]. Horns in the males only, erect, slightly bent forwards at the tip, round, subulate, slightly ringed at the base, situated far back on the frontal bone; additional pair of small horns situated between the orbits, short, conical, sometimes replaced by a mere bony knob; eye-pit moderate, linear; muffle large; feet-pits in the hind feet only; no inguinal pits; canines in the males. Form of these animals is not so elegant as that of the true antelope and their hair is harsher; frequent jungles and thin forest, do not associate in herds, but are monogamous, and often found in pairs. Genus is strictly Indian [chowsingha].——*Tupaia* (तरुमूषिकजाति - tarumúshikajáti, San.). From (taru, san. tree + múshika, san. rat). Tupaiadæ, insectivora, 15. The Tree shrew [musk-rat].——*Viverra* (गन्धमार्जारजाति - gandhamárjárajáti, San.). From (gandha, san. fragrance + márjára, san. cat). Viverrinæ, viverridæ, digitigrada, carnivora, 11. The Civet-cat [poonoogoo poonay]. Claws small; fur usually spotted; anal pouch large, divided into two sacs; secretes a strongly odorous sebaceous substance called civet; more or less erectile mane along the back; moderate-sized animals; most of them larger than a cat [poonay]. Diet partly carnivorous, but they will also feed on vegetable substances; divisible into two sections, which have been made types of genera. Size large, does not climb, thumb not remote. Size small, vermiform; nails more raptorial; thumb remote; of scansorial habits [poonay].——*Vulpes* (किंखिजाति - kikhijáti, San.). From (kikhi, san. fox). Canidæ, digitigrada, carnivora, 12. The Fox [lomree]. Muzzle lengthened and very acute; head round; ears large, erect; body long; limbs short; tail thick, long and bushy, otherwise as in canis [shwaunam]. Foxes have a gland at the base of the tail above, which secretes a strongly odorous substance. Two types of foxes in India—the first the foxes of the desert or plains, not typical in their characters, having longer ears, longer and more slender limbs; inhabit bare open plains, in which they burrow; are less carnivorous in their habits than true foxes, feeding much on fruit, insects [poochy], crabs [nundoo], &c. [lomree].——**(6)** Title-heads in this glossary cover each species distinguished by the natives.——**(7)** For insects see Poochy; for fishes see Matsyam; for batrachians see Bhaicam; for reptiles see Sarpy; for birds see Pacshy. A general conspectus of the fauna [jantoo] of s. india was given in vol. II, appendix IV.

SAT (सत् - sat, *San.*). From (as, san. to be); being. Existence; truth. Good, proper, excellent.——*Sanmaurgam* (सन्मार्ग - sanmárga, San.). From (above + márga, san. way). Moral way [aram].——*Satchidaunandam* (सच्चिदानन्द - saççidánanda, San.). From (above + chit, san. thought + ánanda, san. joy). The Supreme spirit [parabramh].——*Satwam* (सत्त्व - sattva, San.). Purity. Satwagoonam is the quality of purity [goonam, samsauram].——*Saty* (सती - satí, San.; சதி - shathi, Tam.); truthful. The faithful [patny, patyvratay, suttee]. Parvaty [q.v.].——*Satyam* (सत्य - satya, San.). From (sat, san. truth). Truth, verity, an oath. The first Yoog [q.v.]. The first age of the world. The tamul Cooral has the following:—*அன்புநாணொப்புரவு கண்ணோட்டம் வாய்மையோ டைந்துசால் பூன்றிய தூண்*—"affection, fear of sin, benevolence, favor "and truthfulness; these are the five pillars on which perfect "goodness rests."—*வாய்மை யெனப்படுவ தியாதெனின் யாதொன்றுந் தீமை யிலாத சொலல்*—"truth is the "speaking of such words as are free from the least degree of "evil to others."—*தன்னெஞ் சறிவது பொய்யற்க பொய்த்தபின் றன்னெஞ்சே தன்னைச் சுடும்*—"let not a man "knowingly tell a lie; for after he has told the lie, his mind will "burn him."—*மனத்தொடு வாய்மை மொழியிற் றவத்தொடு தானஞ்செய் வாரிற் றலை*—"he, who speaks truth "with all his heart, is superior to those who make gifts and "practise austerities."—*பொய்யாமை யன்ன புகழில்லை யெய்யாமை யெல்லா வறமுந் தரும்*—"there is no praise "like the praise of never uttering a falsehood; without causing "any suffering, it will lead to every virtue."—*புறந்தூய்மை நீரா னமையு மகந்தூய்மை வாய்மையாற் காணப் படும்*—"purity of body is produced by water and purity of "mind by truthfulness." Satyanautan, from (nát'ha, san. lord), proper name [peyar]. Satyaushrayan, meaning truth dependent; also called poolikeshy; name of a rajah who founded the western chalookya [q.v.] kingdom; conquered canouj; subdued the rashtracootas [q.v.] and pullavas [q.v.]; and acquired sovereignty of maharashtram [q.v.]; interchanged letters and presents with chosroes II of persia [charitram]; see vol. I (139); II, 250. Satyaushrayacoolam, from (áshraya, shelter + kula, san. family); name of a line of rulers in carvetnugger zemindarry [salwa]. Satya vaucya roya, from (vákya, san. word + rájá, san. king); name of a chera [q.v.] king in malabar; a.d. 875; see vol. II, 250. Satyavaudy, from (vádí, san. speaker); a common hindoo 2nd or pers. name [peyar]. Satyavratan, from (vrata, san. vow), otherwise known as veivaswatan [q.v.], is the hindoo noah [matsyam, pralayam]. Satya vurman, from (varman, san. coat, title), was a title of cadamba [q.v.] of banavausy and haungal.——*Satyavijayanagaram* (சத்தியவிஜய நகரம் - shattiyavijayanagaram, Tam.). From (satyavijaya, san. proper name + nagara, san. city), called after the madhwa priest of that name. Jagheer village; North arcot dist., Arnee jagheer; pop. 3,767; lat. 12° 41′; long. 79° 22′; from Arnee E. 3 miles; from Chittore S.S.E. 40 miles. On the left bank of the cheyaur opposite to Arnee. Residence of the Jagheerdars of Arnee since 1762, when the fort, which till then had been their residence, was taken possession of by the Nawaub of Arcot. The Jagheerdar's palace is in Italian style. There is a mutt [q.v.] raised over the burial place of a Madhwa [q.v.] priest Satyavijayasawmy. Visited by votaries of the Madhwa sect from all parts of the country.——*Sautwatan* (सात्वत - sátvata, San.). From (sattva, san. truth); as being full of Satwagoonam [goonam]. Vishnoo [q.v.].——*Sautwicam* (सात्त्विक - sáttvika, San.). Proceeding from the Satwa goonam. One of the three Goonams, the quality of excellence or goodness; that which enlightens, constitutes knowledge [nyaunam], and is the cause of truth; and the predominance of which renders the person, in whom it resides, virtuous, devout, &c. See Goonam. For its influence in transmigrations see Samsauram. See vol. I (91).——*Suttee* (सती - satí, San.). From (sat, san. true). A virtuous woman [patny, paty vratay, saty], a widow who burns herself on the funeral pile of her husband. Not an Aryan institution. See vol. I (71).——*Suttegaul* (சத்தேகாலம் - shattégálam, Tam.). From (satya, san. brahma, the god + hálu, can. waste land). Sanscrit name (brahmapurí), meaning bramha, the god + town; place where bramha [q.v.] is said to have performed penance. Jagheer village; Coimbatore dist., Collegaul tal.; pop. 2,404; acres 20,079; lat. 12° 15′; long. 77° 11′; from Coimbatore N. 86 miles; from Collegaul N.N.E. 6 miles. Granted to Triplicane ramasawmy moodelliar in recognition of his having repaired two bridges across the two branches of the Cauvery on the road from Collegaul to Mysore [shivasamoodram]. Old and well-sculptured Shiva temple, containing inscriptions, situated on Cauvery. Ruined fort. Peopled by a large number of Bramins [q.v.] at the time of Hyder [q.v.].——*Suttenapully* (సత్తెనపల్లి - sattenapalli, Tel.). See sep. title.——*Suttimungalam* (சத்தியமங்கலம் - shattiyamangalam, Tam.). See sep. title.——*Suttivaid* (சத்தியவேடு - shattiyavédu, Tam.). From (satya, san. truth + védu, tam. village)—"*a*" Deputy tahsildarry. Chingleput district. Pay Rs. 70. Also Village; Chingleput dist., Trivellore tal.; pop. 2,170; acres 3,835; lat. 13° 26′; long. 80° 01′; from Chingleput W. 51 miles; from Conjeeveram N.E. 44 miles; from Madras N.W. 33 miles; from St. Thomas' mount N.W. 34 miles; from Sydapett N.W. 34 miles; from Trivellore N. 20 miles. Old Shiva temple built by Matanga maharishy. Old rectangular fort, with bastions surrounded by a dry ditch. Rude stone implements.—"*b*" Also the name of an old district near Madras. Transferred in 1804-5 to the district of North arcot. At that time it consisted of eight talooks:—Chingleput, Tirporore, Carangooly, Ootramallore, Conjeeveram, Manimungalam, Peddapolliem and Nayar.

SATIN WOOD (बेहडा - béhadá, *Mahr.*; دھورا - dhaurá, *Hind.* and *Dec.*; ಹುರುಗಲುಮರ - hurugalumara, *Can.*; బిల్లుడు - billudu, *Tel.*; ଭେରୁ - bhéru, *Oor.*; බුරුත - buruta, *Singh.*; வம்மரம் - vammaram, *Tam.*). Title from color and appearance of wood; satin is from (zaitún) a port in china. Mahr. means terminalia belerica [belleric myrobalan]. Can. from (hurugu, can. itching sensation + mara, can. tree). Tam. from (val, tam. strong + maram, tam. tree). Hind. also (bhirra); (giryá). Can. also (vasemara). Tel. also (billu). Oor. also (bilugu). Singh. also (malburuta), meaning flower satin, from soft yellow wood. Tam. also (kodaváborasu), meaning crookedness + the tree; (mududa); (porasu); (vayimaram), meaning strong wood. Title otherwise Wood oil tree, Yellow wood, Zante wood. Botanically Chloroxylon swietenia, d.c., meliaceæ [vricsham, 36]. Alias Swietenia chloroxylon. Tree; leaves abruptly pinnate; leaflets pale-colored, small, numerous, alternate or nearly opposite, unequal-sided; calyx short, five-partite; petals five, shortly unguiculate; panicles terminal, branched; capsule oblong, three-celled, three-valved, dehiscing from the apex, septifragal; seeds about four in each cell, extending upwards into a wing; flowers small, greenish white; flowers in hot season; common at foot of hills, rarely ascends above a thousand feet; a native of n. circars. The suber of bark is dark brown, and very rough from the presence of numerous elliptic corky

lenticels, it is very loosely attached, and when removed leaves a nearly smooth pale red surface; the tree also affords a soluble exudation allied to gum arabic [q.v.], which occurs in amber-colored tears, more or less cracked, it swells in water to a whitish and transparent jelly; the tree yields a wood oil [yennay]; flower satin, meaning a soft yellow wood, is obtained from the root in ceylon. Natives apply leaves to wounds. Wood close-grained yellow, very hard and durable, substitute for box, excellent for turning, much used for furniture and picture frames, takes good polish but loses beauty by age, unless well varnished; very liable to warp and split if not well seasoned in the shade; stands well under water; highly prized by natives for ploughs, axle trees, oil presses, &c., but especially the former; the richly-colored and feathery logs are used for cabinet-work, the more ordinary for building purposes; much used in england as a veneer for fancy work and is familiar on the back of brushes; for picture frames, it is nearly equal to american maple; occasionally planks of 10 to 15 inches in breadth may be procured. No other common species here.——*Andaman satin wood* (مورش کا دھورا - moraskádhaurá, Hind.). Same as Foreign conjy.——*Black satin wood* (నల్లఊటి - nallaúti, Tel.). Same as Ceylon ebony.——*Neilgherry satin wood* (ارمبلی کا جھاڑ - irambalíkájhár, Dec.; పిసినిక - pisinika, Tel.; ଗୁଆକୋଳି - guakoli, Oor.; കളുഹബരലിയ - kaluhabaraliya, Singh.; இரும்பிலி - irumbili, Tam.). Title from habitat. Dec. from tamul. Tel. from (pisini, tel. gum) [sangcooppy]. Singh. from (kalu, san. black + habaraliya, singh. the tree, so called). Tam. from (irumbu, tam. iron + ali, tam. tree, cordia); from dark wood; also from supposition that it was used by alchemists to turn iron into gold. Tel. also (úti), meaning strong wood [sangcooppy]; (pishanna); (alli); (nallamaddi), meaning black + the tree, terminalia arjuna, bedd. [black murdah]. Tam. also (kuraviñji), compare coorvitchy; (visaram). Title otherwise Cochin-china ebony, Coromandel ebony, Iroombily, Satin ebony. Botanically Maba buxifolia, pers., ebenaceæ [vricsham, 83]. Alias Ferriola buxifolia; Maba abenus, angustifolia, neilgherrense, nigrescens. Evergreen shrub or small tree; leaves alternate, oval, entire, smooth; male flowers axillary in the lower leaves, three-fold, sessile, white; calyx three-cleft; corolla three-cleft, hairy; stamens six, short, inserted round a semi-globose receptacle; female flowers axillary, sessile, white or yellowish, very small; style one; berry round, smooth, pulpy, size of a pea [calauyam]; seed two, flat on one side; berries universally eaten when ripe; wood small, very hard, dark-colored, heavy and durable, adapted for the lathe. Other species are micrantha and nigrescens, this last being called in bombay Rakta roda, meaning red + growing [soymida]. Compare also, where transl. is of first term:—Clerodendron inerme (étipisinika), river; Ehretia buxifolia (pittapisinika), bird; Salix tetrasperma (étipisinika), river; Woodfordia floribunda (gaddapisinika), root. See gloss. paragraphs.

SATRANJEE (आस्तर - ástara, *San.*; شطرنجی - shatranjí, *Hind.*; ತಿವಾಸಿ - tivási, *Can.*; తివాశి - tiváshi, *Tel.*; പരവതാനി - paravatáni, *Mal.*; கம்பளம் - kambalam, Tam.). Title from hind. from (chatr, hind. four + rang, pers. color). San. from (ástri, san. to spread). Tel. from (divya, san. excellent + ásana, san. seat). Mal. from (para, san. superior + vitána, san. canopy). Tam. from (kambalá, san. woollen cloth). Carpet. Larger used to cover the floor of a room or tent [derah]; smaller to sleep or pray upon, or as door mat. Distinguish from Shatranj [q.v.].

SATTAUR (ستار - sattár, *Hind.*). From (satara, ar. to hide). Attribute of God. Concealer or thrower of a veil of mercy over men's sins [allah]. Common alam; as Sattaur khan, alam + pataun alaumat [ism].

SAUBIT (ثابت - sábit, *Hind.*). From (sabata, ar. to endure). Firm. Part of lacab; as Saubit jung, firm in war [ism].

SAUBOON (सर्वक्षार - sarvakshára, *San.*; صابون - sábún, *Ar.*, *Pers.* and *Hind.*; సబ్బు - sabbu, *Tel.*; சவுக்காரம் - shavukkáram, *Tam.*). San. and Tam. from (sarva, san. all + kshára, san. alkali); universal alkali. Soap. Product of the action of caustic alkali upon neutral fats. Potash [jharkanamak] forms soft soap, and soda [munncauram] hard soap; the latter most employed. Pure alkali [cauram] would injure hands or fabric; by combination with the fatty acids [tezaub] its action is rendered milder without destroying its property of combining with impurities. The articles employed in making country soap are oovar munn [q.v.], an impure carbonate of soda; pooneer [q.v.], a light-colored earth, containing a great proportion of carbonate of soda; puttleooppoo or saltpetre [shorah]; and choonam [q.v.] or quicklime. All these are bruised together, and fresh water is added. The mixture is then well agitated for several hours and allowed to stand for three days. The feculent matter having fallen to the bottom, the clear part is strained off and boiled to form the soap, a sufficient quantity of gingelly [q.v.] oil having been previously added when it began first to boil. Veidyans [q.v.] use this medicinally. Country soap on drying loses 50 per cent. in weight. The natives extensively employ as a substitute for soap for washing silk [puttoo], woollen [pushm] cloths, hair, wooden articles, &c., the fruits of Sapindus species [soapnut]; and the bark of Acacia intsia, willd. [corindah]. These considered better than soap. A popular household article for promoting growth of hair is a decoction of pods of Acacia concinna, dec. [soap-pod].

SAUCALA (చాకల - tsákala, *Tel.*). Teloogoo washermen's caste. The corresponding terms are:—Can. agasa, Tam. vunnaun, Mal. veloottaidan [janty]. See vol. II, 232.

SAUDAT (سعادت - saádat, *Ar.*). From (saada, ar. to be happy). Blessing. Prefixed to an alam forms a lacab; as Saudat ally, blessing of ally [ism].——*Saudat oollah khan* (سعادت الله خان - saádatulláhkhán, Hind.). From (above + alam + title of honor). A nawaub of arab extraction who first took the title of Nawaub [q.v.] of the Carnatic [q.v.]. A.D. 1710–1732 [charitram]. See vol. I (176) and 44; II, 252.

SAUDH (साध् - sádh, *San.*). To accomplish.——*Bramha siddhauntam* (ब्रह्मसिद्धान्त - brahmasiddhánta, San.). From (brahma, san. the person, so called + siddhánta, san. established truth). Astronomical [jyotisham] work by Bramha gooptan, 628 A.D. He set himself the task of correcting the earlier system which had ceased to agree with the phenomena, and of reconciling computation [maunam] with observation. This work, in twenty-one chapters, contains calculations of the mean motions and true places of the planets [graham], of lunar and solar eclipses [grahanam], of the rising and setting of planets, of the position of the moon's cusps, and of observations of altitudes [avanataumsham] by the gnomon [shunk]. The principles of Brahma gooptan's astronomical system are given in a compendious treatise on spherics. He frequently quotes from Aryabhatta [q.v.].——*Saudhanam* (साधन - sádhana, San.). Document [caranam, dastavaiz, nauma, patram].——*Saudhoo* (साधु - sádhu, San.). Religious mendicant. But more generally applied to one of subdued passions and contemplative habits; a sage [moony, sanyausy, yaty, yogy].——*Siddh* (सिध् - sidh, San.). To be established.——*Siddham* (सिद्धि - siddha, San.). Established. Common name among Linga balijes [q.v.] and Jangams [q.v.], in combination with Appa, Ayya and Amma [peyar].——*Siddhan* (सिद्ध - siddha, San.). Sage [corakkan]. The Siddhar were a Tamul sect, the adherents of which retained Shiva as the name of God, but rejected everything in the Sheiva system which was inconsistent with pure theism. They cultivated alchemy [rasauyanam] as sedulously as the Arabians. The poems of the Siddhar school are modern in style. The Siddhar took the names of rishies [q.v.]. The eighteen most celebrated were:—Agastyan, a bramin; Poolastyan, a bramin; Nundy, a bramin; Yidaicauttaun, a shepherd; Caroor siddhan, a barber; Conganan, a palinga, low tribe on west coast; Shattamoony, a weaver; Bhogan, a potter; Soondaraunandan, a reddy; Matsyan, a shemmaun, fisherman or shoemaker; Tirmoolan, a vulloovan; Pinnaukkeeran, a meravan; Calaunjy, a fisherman; Goracshacan, a cavaray yidaiyan or teloogoo shepherd; Roma rishy, a coravan; Bramha moony, a bramin; Alooganny siddhan, a veydan; Chandikeshan, a vindan or shepherd [matam]. See vol. I (57).——*Siddharasam* (सिद्धरस - siddharasa, San.). From (siddha, san. sage + rasa, san. juice, mercury). From use by adepts. In its general acceptation mercury [rasam], but also refers to a liquid which converts into gold [pon] metals [loham] dipped into it.——*Siddhaunta augamam* (सिद्धान्तागम - siddhántágama, San.). From (siddhánta, san. established truth + ágama, san. a system of philosophy). Sheiva religious work [sheiva siddhauntam]. Treats, first, of several species of charities, such as the building of a caravan-sary, and digging of tanks and wells for the accommodation of travellers; secondly, of religious duties diurnal and periodical, of the various kinds of sacraments, and of ceremonies propitious or expiative, in which are included the holy incantations [muntram] wherewith temples are sanctified and images of deities deified and adorned; and lastly, of the nature of the godhead and his attributes, of souls [autmam], elements [bhootam], and other principles [tatwam], and of contemplation, &c.——*Siddhaunta cowmoody* (सिद्धान्तकौमुदी - siddhántakaumudí, San.). From (siddhánta, san. theorem + kaumudí, san. moonlight). Grammar, by Bhattojy deecshitan; being a practical arrangement of Paniny's [q.v.] sootrams [q.v.] with a commentary.——*Siddhauntam* (सिद्धान्त - siddhánta, San.). From (siddha, san. established + anta, san. end). Established truth. Theorem. In astronomy a treatise on that science. There is a numerous train of astronomical siddhauntams, of which four are reputed to be of divine origin, viz., Soorya, Bramha, Powlastya, Soma. By some authorities nine are named, viz., Bramha, Soorya, Soma, Brihaspaty, Garga, Naurada, Paraushara, Poolastya, Vasishta. The Soorya siddhauntam is the best known of all hindoo astronomical works. A comparatively modern one is Arya siddhauntam by Arya bhatta [q.v.]. This is preferred by Tamuls to Soorya siddhauntam. The Travancoreans again have a Siddhauntam of their own. Certain elementary differences can be seen as follows:—According to the Arya siddhauntam of Arya bhatta [q.v.] there are 1577917500 Bhoomy sauvana [q.v.] days called Yoog dinam [q.v.] in a Mahayoog [q.v.] or 4320000 years. Hence one year = 365d 15g 31v 15p indian time, 365d 6h 12m 30s european time. The same solar year according to the copies of the Arya siddhauntam preserved in Bengal, is $\frac{1577917542...}{4320000...}$ =

365d 15g 31v 17p 6s. This year is unknown in the Peninsula. According to the Soorya siddhauntam there are 1577917828, yoog dinams, hence the year is = 365d 15g 31v 31p 24s indian time, and 365d 6h 12m 36s 34f european time. According to the Travancore siddhaunties, there are 1577917320 yoog dinams, and the year is 365d 15g 31v 30p indian time, and 365d 6h 12m 36s european time [aharganam, jyotisham, mausam].——*Siddhaunta shikhaumany* (सिद्धान्तशिखामणि - siddhántashikhámani, San.). From (siddhánta, san. established truth + shikhámani, san. crest-jewel). A treatise on philosophical Hindooism by Shiva pracausa deshican, a poet of Conjeeveram, seventeenth century. ——*Siddhaunta shiromany* (सिद्धान्तशिरोमणि - siddhántashirómani, San.). From (siddhánta, san. established truth + shirómani, san. crest-jewel). Work on astronomy by Bhascaracharry [jyotisham].——*Siddhaunty* (சித்தாந்தி - shittándi, Tam.). From (siddha, san. accomplished + anta, san. end). An astronomer [jyotisham, nacshatram]; as Joshy is astrologer [peyar].——*Siddhaurtan* (सिद्धार्थ - siddhárt'ha, San.). From (siddha, san. accomplished + art'ha, san. object). One who has attained perfection; epithet of Booddha [q.v.].——*Siddhee* (سدهی - siddhí, Hind.); from use among siddhar or adepts. Same as Bhang [q.v.] drink.——*Siddheshwaram coil* (சித்தேசுவரன்கோவில் - shittésuvarangóvil, Tam.). From (siddhéshvara, san. shiva, the lord of the siddhas + kóvil, tam. temple). Mountain, Place of pilgrimage, much resorted to on new moon [amavausyay] days; Salem dist., Salem tal.; lat 11° 38'; long. 78° 04'; from Salem W. 8 miles. At the western end of the Cunjoomullay hills, contains pure mineral water springs.——*Siddhy* (सिद्धि - siddhi, San.; சித்தி - shitti, Tam.). An object to be attained. Supernatural power of which eight are enumerated:—animay, power of becoming an atom; mahimay, large; laghimay, light; garimay, heavy; prauply, attainment; praucaumyam, freedom of will not transferable; eeshitwam, lordliness; vashitwam, dominion. Title also means perfection, heavenly bliss, gift.——*Sidhout* (సిద్ధవట్టము - siddhavattamu, Tel.). See sep. title.——*Soorya siddhauntam* (सूर्यसिद्धान्त - súryasiddhánta, San.). A celebrated astronomical work said to have been revealed by the sun [sooryan] himself [jyotisham].——*Sowcar* (ساهوکار - sáhúkár, Hind.). From (sádhu, san. right + kár, pers. doer). A banker or money-lender. Nearly the same as Chetty [q.v.].

SAUF (صاف - sáf, *Hind.*). From (saffa, ar. to be even or clear). Fair copy in office business.

SAUL (शाल - shála, *San.*). From (shal, san. to praise); valuable timber tree. Botanically the Shorea genus, dipterocarpeæ [vricsham, 24]. Large, glabrous, mealy, or pubescent resinous trees, natives of tropical asia; leaves entire or wavy-edged; flowers yellow, sweet-smelling, and in axillary or terminal panicles; fruit one-seeded; wood generally close-grained; heart-wood brown, hard or very hard; hopea [caung] is an allied genus. The species of shorea best known to the natives are shown below.——*Common saul* (शाल - shála, San. and Mahr.; سال - sál, Hind. and Dec.; ಅಶ್ವಕರ್ಣ - ashvakarna, Can.; గుగ్గిలపుచెట్టు - guggilapuchettu, Tel.; ଶାଳୁଆ - salvá, Oor.; മുലപ്പൂമരുതു - mulappúmarutu, Mal.; ඩුම්මල - dummala, Singh.; குங்கிலியமரம் - kungiliyamaram, Tam.). San. as above. Hind. from sanscrit. Can. from (ashva, san. horse + karna, san. ear). Tel. from (guggilamu, tel. dammer + chettu, tel. tree). Mal. from (mula, mal. sprout + pú, mal. flower + marutu, mal. the tree, terminalia); perhaps in allusion to the seeds sprouting before falling from the tree. Singh. means resin of the tree. Tam. from (kungiliyam, tam. resinous gum + maram, tam. tree), dammer tree. San. also (ashvakarna), meaning horse's ear, from leaves; (sarjjaka), meaning pouring forth; (kaushikáhva), meaning named cowshicam; (kárshya), meaning lessening; (sasyasamvara), meaning covered with fruits. Hind. also (sákhar); (dohnah), meaning the resin; (damar), meaning the resin; (sálwa); (sákhu) [teak]; (sakoh). Dec. also (rál), meaning the resin. Can. also (áshina); (ásu); (guggulamara). Tel. also (véginachettu); (inumaddi), meaning iron + terminalia arjuna, bedd. [black murdah]; (nallamaddi), meaning black + terminalia arjuna, bedd. Oor. also (soringhi). Mal. also (marámaram), meaning tree of trees; (kunkilyamaram), meaning dammer tree. Singh also (hal), from sanscrit. Title otherwise Black dammer, Black muddy, Horse-ear [spogel], Indian dammer. Botanically Shorea [saul] robusta, gærtn., dipterocarpeæ [vricsham, 24]. Alias Vatica robusta. Tree, 100-150 feet; calyx five-sepalled, afterwards enlarging into long wings; petals five twisted in the bud, rather silky outside; leaves cordate-oblong, entire, on short petioles; calyx pubescent as well as the branches of the panicles; panicles terminal and axilary; ovary three-celled; cells two-seeded; seeds single; flowers yellow; fragrant. Tall, sparsely-branched, deciduous; one of the largest and most useful trees in india; seed ripens at commencement of rains. Whitish aromatic resin [raul] exudes; devoid of taste or smell, sparingly soluble in alcohol, entirely so in ether, and perfectly in turpentine [carpoora teilam] and the fixed oils [yennay]; occurs in small rough pieces, from a pale creamy color to a dark brown, nearly opaque, and very brittle; known as raul [q.v.] or dhoonah [q.v.]. Oil is expressed from the ripe seed. The saul seed falls actually sprouting from the tree; the plants form patches of forest, quite impenetrable. The resin unites with the fixed oils and forms medicinal plasters; superior kind is substitute for pine [cheer] resins of european pharmacopœias; applied to ulcers and chilblains, acting as a stimulant; thrown over fire gives out thick volumes of fragrant smoke, and is used for fumigating sick rooms; quoted in pharm. non-officinal. The wood is burnt for incense in temples; also the resin; aromatic oil [attar] procured from resin by dry distillation; resin used as substitute for dammer [q.v.] by boat-builders; for tanning [chamrah] purposes the bark is generally used along with terminalia [murdah], mimusops [caheericay] and phyllanthus [aumlacam], or with the bark of peepul [q.v.], babool [q.v.], and mango [q.v.]; ashes used as mordant [cauram]; plant gives fibre [naur]. Yields timber as much as 60 feet in length and with a girth of 4½ feet; lasts a very long time under ground or under water, almost unequalled for sleepers, proof against white-ants [q.v.]; strong, tough, coarse-grained and fibrous, not easily worked, and when dressed has a hard horny surface, and fibres appear to be interlaced with each other; superior to teak [q.v.] in transverse strength and direct cohesive power, but subject to shrinkage; very heavy, so that it cannot be floated without more buoyant aids, and is, on that and some other accounts, inferior to teak; valuable for engineering purposes, largely used in gun carriages and for house-building and ship-building, but warps in plank.——*River saul* (नदीसर्ज - nadísarja, San.). From habitat. Same at White murdah.——*Taloora saul* (ಬಿಳೆಬೊವು - bilebóvu, Can.; ಕರ್ಮರ - karmara, Too.; జాలారి - dzálári, Tel.; കരിമരുതു - karimarutu, Mal.; தளூரா - talúra, Tam.). Title from tamul. Can. from (bili, can. white + bóvu, can. the tree). Too. from (kari, too. black + mara, too. tree). Tel. from (jála, tel. net + áre, tel. bauhinia racemosa, lam.) [yellow mountain ebony]. Mal. from (kari, mal. black + marutu, mal. the tree, terminalia) [black murdah]. Tam. corrupted from teloogoo. Can. also (bilebhógi), meaning white + the tree; (jálárimara); (jelaranda). Tel. also (himsra). Title otherwise Bastard saul, Jarallea, Lac tree [ceylon oak], Peach saul. Botanically Shorea [saul] talura, roxb., dipterocarpeæ [vricsham, 24]. Specific from tamul. Alias Saul jarallea; Shorea laccifera, robusta, roxburghii; Vatica chinensis, laccifera. Saul, from (shála, san. shorea robusta, gærtn.); Jarallea probably from teloogoo. Large tree; leaves coriaceous, oblong, obtuse or emarginate, and often emarginate at the base; panicles numerous from the axils of the fallen leaves; branches and pedicels glabrous; stamens fifteen; anther bristle very long; flowers yellow; flowering in march-april. Gives a lac [q.v.]. Wood grey, extremely hard, smooth, with small dark-colored irregularly-shaped heart-wood; much used for house-building.——*Tambaga saul* (کالا ڈامر کا پیڑ - káládámarkáper, Hind.; کالا ڈامر کا جھاڑ - káládámarkájhár, Dec.; నల్లగుగ్గిలపుచెట్టు - nallaguggilapuchettu, Tel.; തമ്പകം - tampakam, Mal.; தம்புகைமரம் - tambugaimaram, Tam.). Title from malayalam. Hind. from (kálá, hind. black + dámar, hind. dammer + per, hind. tree). Dec. from hindostany. Tel. from (nalla, tel. black + guggilamu, tel. dammer + -chettu, tel. tree). Mal. from (chempu, mal. redness + akam, mal. inside). Tam. from malayalam. Tel. also (nalladammarumánu), meaning black + dammer + tree; (thambá). Tam. also (tambam); (karuppudámarmaram), meaning black dammer tree; (kangu), meaning dark tree. Title otherwise Dammer tree, Tambam. Giving Black dammer, Dammer. Botanically Shorea [saul] tumbuggaia, roxb., dipterocarpeæ [vricsham, 24]. Specific name from malayalam. Alias Vatica tumbuggaia. Large tree; leaves long-petioled, ovate-cordate; panicles terminal; stamens about hundred with bearded anthers; sepals enlarging into wings; flowers yellow; flowering in march-april. A dammer [q.v.] exudes from trunk. Wood smooth, harder than that of common saul, but similar in structure; used for house-building, particularly for door-frames and posts, and for rafters.

SAULEY (సాలె - sále, *Tel.*). From (sálu, tel. cloth). Weavers of tel. origin [salem]. The corresponding terms are:—Tam. keikkala, Can. jeydar, Mal. chaulyan. They are divided into Shacoona sauley who are Sheivas, and Pudmasauley who are Veishnavas [jauty]. Numbers about 200,000.——*Chittisauley* (చిత్తిసాలె - chittisále, Tel.). From (chiru, tel. small + sále, tel. weaver). An inferior class of weavers.——*Puttsauley* (పట్టుసాలె - pattusále, Tel.). From (pattu, tel. silk). Silk [puttoo] weavers. See vol. II, 230.——*Salampore* (శాలంబరిగుడ్డ - shalambarigudda, Tel.). From (sále, tel. weaver + pura, san. town), weaver's town. A kind of cotton [q.v.] cloth formerly manufactured at Nellore; half the length of ordinary Poonjam [palampore, poonjam].——*Saulore* (సాలూరు - sáluru, Tel.). See sep. title.

SAULORE (సాలూరు - sálúru, *Tel.* sálúru *). From (sále, tel. weaver caste + úru, tel. village) [sauley].——**(1)** Division; Vizagapatam district; area 380 square miles; population Non-agency, 83,699; Agency, 7,002; language Teloogoo. Boundaries:—east, Bobbily and Parvatipore divisions; south, Gajapatinugger division; west, Pottinghy division; north, Parvatipore division. A plain intersected by numerous small ranges of hills

and dotted with granite [caroom cull] bosses of great height; soil fertile, black clay [calimunn], black and red sand [manal]. Very large Brinjarry [q.v.] trade with jeypore and central provinces in salt [ooppoo], grain [dhaunyam], lace [calaubat], gallnuts [maachicoy], turmeric [country saffron], &c. Irrigation by tanks, rivers being on too low level. Camping ground at Ramabhadrapooram. Places of archæological interest:—Pauchipenta, Saulore. The leading places, &c., in the division are the following.——*Chemoodoo* (చెముడు - chemudu, Tel.). See sep. title.——*Langoolya* (లాంగూలియా - lánguliyá, Tel.). See sep. title.——*Macwa* (మకువ - makuva, Tel.). Means desire. Village; pop. 2,722; lat. 18° 40′; long. 83° 19′; from Saulore N.N.E. 12 miles; from Vizagapatam N. 65 miles. Ruined mud fort. Many weavers formerly lived here. Now a decaying village.——*Pauchipenta* (పాచిపెంట - páchipenta, Tel.). See sep. title. ——*Ramabhadrapooram* (రామభద్రపురము - rámabhadrapuramu, Tel.). From (rámabhadrudu, tel. proper name + pura, san. city). Village; pop. 2,777; lat. 18° 29′; long. 83° 19′; from Saulore E.S.E. 5 miles; from Vizagapatam N. 54 miles. Ruined fort. Important halting place for carts going from Saulore and Parvatipore to Vizianagram, &c.——*Saulore* (సాలూరు - sálúru, Tel.). See below.——**(2)** Deputy tahsildarry; Vizagapatam district. Pay Rs. 100.——**(3)** Zemindarry; Vizagapatam dist., Saulore division; pop. 64,148. Came under the Poosapauties [q.v.], when Jeypore ceded all the old hill zemindarries to Seetaram raj. At period of first establishment of English, Sanyausy rauz of Saulore headed a rebellion against Vizianagram, in the course of which he lost one of his hoondahs, Macwa, but was allowed to retain country about Saulore. On his death in 1774, the whole zemindarry was confiscated by Poosapauties, who imprisoned his three sons, Bhogy rauz, Bootchy rauz and Ramchendra rauz in the fort at Devapully. In 1793 they were released and a small allowance settled on them. On death of Vijiaram rauz in 1794, Saulore was granted on cowle [q.v.] to Ramchendra rauz, eldest son of the last Zemindar. He died in 1801, and the permanent settlement was made with Sanyausy rauz, his son. The zemindars of Saulore are Ooriyas, but read and write Teloogoo. Peshcush Rs. 35,954.——**(4)** Town, Head-quarters of Zemindar and Deputy tahsildar, Sub-registrar's office, a German mission chapel; Vizagapatam dist., Saulore division; pop. 12,917; lat. 18° 30′; long. 83° 15′; from Coraputt S.E. 36 miles; from Madras N.E. 420 miles; from Narsapatam N.E. 68 miles; from Parvatipore S.W. 23 miles; from Vizagapatam N. 55 miles; from Vizianagram N.N.W. 30 miles. Old mud fort. Granted by Vishwambhara deo of Jeypore to a chieftain of the Conda rauz caste, whom he honored with the title of Boliyaurosimha. Does great trade with Jeypore and Central provinces.

SAUMAUN (سامان - sámán, *Hind.*). From persian. Articles, furniture, baggage [saranjaum].

SAUNY (ثانى - sání, *Hind.*). From arabic, second. A companion. Sauny puttahdar is a co-puttahdar [sa].

SAURA (చార - tsára, *Tel.*). Stripe.——*Saurapotoo* (చారపోతు - tsárapótu, Tel.). From (above + pótu, tel. a male mate). Leptorhytaon jara, lycodontidæ [vazhalay], ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 15], of naturalists [jantoo]. Distinguish from Rat snake [q.v.], though that has the same native name.

SAURAH (سارا - sárá, *Hind.*). Means princess. Abraham's wife. Female alam, as Saurah bee, alam + alaumat [ism].

SAURASAM (सारस - sárasa, *San.*). From (saras, san. lake) [sar]. Gruidæ family, pressirostres, grallatores, aves [pacshy, 40], of naturalists [jantoo]. Cranes. Fly with outstretched necks; very loud, trumpet-like call. Highly gregarious; nidificate on the ground. There is a Tamul proverb:—படித்தவனுக்கும் படியாதவனுக்கும், கொக்குக்கும் அன்னத்துக்கும் வித்தியாசம்போல—"the difference between the learned "and the unlearned is as great as that between a crane and a "swan [hamsam]." Friar Jordanus, the Quilon Bishop of the fourteenth century, has the following:—"there is also another "big bird, not like a kite [chillam], which flies only at night, "and utters a voice in the night season like the voice of a man "wailing from the deep." The species best known to the natives are shown below.——*Common crane* (बक - baka, San.; कंक - kallam, Mahr.; كركى - kurkí, Ar.; كلنك - kulang, Pers., Hind. and Dec.; جنجڠ - jinjang, Malay; కొంగ - konga, Tel.; നാര - nára, Mal.; கொக்கு - kokku, Tam.). San. from (vak, san. to go crookedly). Pers. from (khulanj, pers. crooked). Mal. from (nara, mal. to grow white). Tam. from the cry. Ar. also (ghurník). Tel. also (kólangi); (gúdakonga), meaning mean + crane. Tam. also (nárai), meaning whiteness. Grus cinerea, gruidæ [saurasam], pressirostres, grallatores [pacshy, 40], of naturalists. Alias Ardea grus; Grus antigone. Forehead and cheeks nude, with black bristly hairs; crown nude, dull orange red; occiput, throat and forepart of neck, of deep blackish grey; between eyes, sides of head and upper part of neck white, as is greater part of back of the neck, color impure and with reddish tinge; all upper part of body and lower plumage dark ashy blue; quills and greater coverts dull black; secondaries and tertiaries grey, black tipped, latter narrowing to point with barbs of uppermost feathers disunited, all arching down and forming elegant tuft of floating plumes which it is able to erect at pleasure. Bill glaucous green at the base, blackish green in the middle, the tip dark horny; irides yellowish red, reddish brown in some; legs and feet dull black. Length 3 to 3½ feet; extent 6 feet; wing 21 inches; bill at front 4; weight about 12 lb. Young birds want naked patch on head, neck is dingy grey without white, and colors generally are more dull. Visits India in numerous flocks during the cold weather. Feeds chiefly on grain, committing great havoc in the wheat [geung] fields, also eats shoots of plants and flowers and occasionally insects [poochy] and reptiles [sarpy]. Feeds chiefly in the morning; leaves this country early, generally before end of March; eggs two, greenish color, with brownish spots; tolerably good eating. ——*Cyrus crane* (सारस - sárasa, San.; سارهنس - sárhans, Hind.; سارس - sáras, Dec.). Title corruption from deccany. San. from (saras, san. lake). Hind. from sanscrit. Dec. from sanscrit. Title otherwise Sarus crane. Grus antigone, gruidæ [saurasam] pressirostres, grallatores [pacshy, 40], of naturalists. Alias Ardea antigone; Grus orientalis, torquata. Head and neck naked and covered with numerous crimson papillæ, clad with few scant black hairs, which accumulate into broad ring on neck and form a sort of mane down nape of neck; ear-coverts white; below this neck whitish grey, gradually passes into pale blue or french grey, which is color of whole plumage, quills and inner webs of the tail-feathers being dusky slaty. At breeding season, in April, they assume pure white collar, immediately below crimson papillose skin of neck, which also becomes brighter in color; and in old birds the tertiaries and some of the scapulars become white and are lengthened, hanging over gracefully, and exceeding the tail. Bill pale sea green, brownish at tip; irides orange red; legs and feet pale rosy red. Length about 52 inches; extent nearly 8 feet; wing 26 inches; tail 9½; bill at front 6¼; weight 17 or 18 lb. Found throughout the greater part of India; rare south of the Godavery; chiefly found in pairs, occasionally several together; feeds less exclusively perhaps on grain than the other cranes met with in India, and is very generally found not far from water; breeds on some island or spot nearly surrounded by water, laying two eggs only, very pale bluish green with reddish spots. Nest sometimes commenced below water, and raised above surface; young have head and neck dull ferruginous. Old birds when sitting, or with their young, very bold. Its fine trumpet-like call, uttered when alarmed or on the wing, can be heard a couple of miles. Young not bad eating, but old birds are worthless for the table.——*Demoiselle crane* (करकची - karakuchí, Mahr.; كركرا - karkará, Hind.; ಕಾರ್ಕೊಂಚೆ - kárkonche, Can.; వడకొరక - vadakoraka, Tel.). Title from plumage, and tuft of long black feathers hanging from back of head. Can. from (káru, can. black + krauñcha, san. curlew). Hind. also (karronch), from (krauñcha, san. the bird). Can. also (konga). Anthropoides virgo, gruidæ [saurasam], pressirostres, grallatores [pacshy, 40], of naturalists. Alias Ardea virgo. Forehead, face, sides of head, neck and lengthened breasts, plumes, black; tuft of white decomposed feathers extending backwards and outwards from eye; general plumage fine purplish grey; quills black; greatly elongated tertiaries and scapular dusky slaty, drooping. Bill greenish at base, yellowish in middle, inclining to pink at tip; irides fine ruby red; legs black. Length about 30 inches; extent 5 feet, wing 19 inches; tail 6¼ to 7; bill at front $2\frac{3}{16}$; weight about 6 lb. Young birds have no black, and want the white ear-tuft; found throughout greater part of India, more rare in extreme south; never seen in Malabar. Cold weather visitor generally, only coming in late in October; associates in numerous flocks, from fifty to five hundred; chiefly frequents vicinity of rivers; very destructive to grain fields; fly with great regularity, either in long continuous line, or in double wedge-shaped and then utter their fine clanging note frequently. Breeds on ground in Northern Asia, laying two olive grey eggs speckled with rufous. Male bird watches whilst female is incubating, and fights boldly if attacked. Dance among themselves, and will often seize hold of any small article toss it up in the air, and catch it as it descends; also occasionally eat mice [shoondely], snakes [paumb], &c., lifting them up and dashing them down on the ground till quite dead.

SAUTAUNY (சாத்தானி - sháttáni, *Tam.*). From (chaitanya, san. the vaishnava reformer). A class of Veishnavites. Musicians and mendicants. They are followers of Cheitanyan, a religious teacher of the fifteenth century, and of his disciple Sanautanan. They have views similar to those of the Beisnab reformers of Bengal. Do not wear the sacred thread [poonool] or tuft of hair [coodoomy]. Many of them in Southern India worship Permaul [q.v.], an incarnation of Vishnoo [q.v.], perambulate the street morning and evening, and accept alms from all but the lowest castes, often exacting the same by threats of burning themselves with a lamp. The temple servants are generally taken from the Sautauny class. They are skilled in weaving flowers into garlands. They are generally attached to Vishnoo temples; while the Pundaurams [q.v.] are attached to Sheiva temples. One of the Sautauny sects burn their dead; the others bury their dead in the sitting posture

up to the head, then burst the head by throwing cocoanuts [q.v.] on it, and heap it over with earth [shavacaud, shoodcaud]. Their philosophic principle is Vishishtaudweitam. See vol. I (77), (86), (90); II, 231. There is a Teloogoo proverb:—సాతాని వివాదం—"a sautauny dispute;" they admit as members of their body all classes amongst the worshippers of vishnoo, who consequently dispute each others rank in assemblies; so a dispute which cannot be easily settled.——*Sautautha* (சாத்தாத - sháttátha, obl., Tam.). From (sháttu, tam. to wear); as not wearing sacred thread [poonool] or tuft of hair [coodoomy]. Same as Sautauny; but the words are not really connected.

SAUVARAM (సావరము - sávaramu, *Tel.*). From (chávar, hind. a measure of land). The home lands [havelly]. That portion of a zemindarry [q.v.] which proprietor retains in his own hands, Shery [q.v.] being lands which are let out to tenants.

SAWAUL (سوال - sawál, *Hind.*). From (saala, ar. to ask). A question.

SAWAUR (سوار - sawár, *Hind.*). From (asp, pers. horse + wár, pers. suffix of affinity). A horseman, trooper.——*Sawaury* (سواری - sawárí, Hind.). From persian. Riding. Any mode of conveyance, especially a palankeen [q.v.]. A mounted retinue. A sawaury horse is a riding horse.

SAYER (سایر - sáir, *Hind.*). From (sair, ar. current). Current or customary. Sources of revenue in addition to the land-tax, as customs, transit duties, licenses, fees, house-tax, market-tax, &c. Sayer chowky is a custom-house station. See vol. I, 112.

SCAMMONY (سقمونیا - sakmúniyá, *Ar.*, *Pers.* and *Hind.*; సకుమునియా - sakumuniyá, *Tel.*; சகமுனியா - shagamuniyá, *Tam.*). Title from syriac through arabic. Ar. also (mahmúdah), meaning excellent. Tel. also (mámúdá). Tam. also (mámúthá), from arabic. Greek σκαμμώνιον; erroneously derived from σκάμμα, a trench, as if from excavation made around the root. Title otherwise Gum scammony, Syrian bind-weed. Botanically Convolvulus [tauly] scammonia, linn., convolvulaceæ [vricsham, 93]. Perennial, deciduous, ligneous or herbaceous twiner; leaves sagittate, truncate behind; peduncles rounded, three-flowered, flowers whitish-purple, flowering in july and august; hedges of greece and the levant. Gum resin [googal], obtained by incision from root is glossy, of the color of raw silk [puttoo], and easily friable, with a peculiar heavy odour, and a bitterish, slightly acrid taste; this is scammony. Medicinally cathartic and anthelmintic; substituted for british jalap [q.v.] and rhubarb [indian rhubarb]; gives to pharm. the dried root, scammoniæ radix; also the gum-resin [googal], scammonium; officinal.

SCAND (स्कन्द् - skand, *San.*). To leap.——*Scandan* (स्कन्द - skanda, San.). From (skand, san. to leap); as fond of exercise. Younger son of Shiva [soobramanyan]. The name Scandan is in little use except that the Scaundapooraunam [q.v.] thence takes its title. Caurtikeyan [q.v.] in Northern india and Soobramanyan [q.v.] in Southern india are more frequent. See also Cundasawmy.——*Scanda shashty* (స్కందషష్ఠి - skanda-shasht'hi, Tel.). Means the god scandan + sixth lunar day. Lunar [chaundramaunam] festival [pundigay, 3a], subject to intercalation [adhicam]. Begins on first day of waxing moon [shooclapacsham] in eighth lunar month Caurteecam [mausam] and lasts for seven days. Principal day is sixth, between 22nd October and 21st November, in commemoration of defeat of Shoorapudman, a giant whom Scandan vanquished after combat of six days. The seventh day, the image is carried in procession [maryauday, sambauran].

SCAR LEAF (வட்டிலை - vattilai, *Tam.*). From spots on leaf. Same as Face plant.

SCIMITAR POD (गरंबी - garambí, *Mahr.*; ಹಲ್ಲೆಕಾಯಿಬಳ್ಳಿ - hallekáyiballi, *Can.*; పల్లెబూరు - pallebúru, *Too.*; తీకతీగ - tíkátivva, *Tel.*; പെരുംകാക്കവള്ളി - perumkákkavalli, *Mal.*; පුස්වැල - pusvela, *Singh.*; இரிக்கி - irikki, *Tam.*). Title from appearance of legumes. Can. from (halle, can. vegetable + káyi, can. fruit + balli, can. creeper). Too. from (palle, too. large bean + búru, too. creeper). Tel. from (tíká, hind. the ornament + tivva, tel. creeper). Mal. from (peru, mal. large + kákkavalli, mal. crow-creeper). Singh. from (pus, singh. empty + vela, singh. creeper); hollow creeper. Tam. from (iri, tam. to destroy); medicinal. Tel. also (gilatíga); (tandramánu). Tam. also (tellu), meaning clearing, medicinal; (shillu). Title otherwise Creeping babool, Creeping mimosa, Faba marina, Lady nut tree, Match box bean, Shillo, West indian cocoon, West indian filbert tree. Botanically Entada scandens, benth., leguminosæ [vricsham, 48]. Alias Acacia scandens; Entada monostachya, pursætha, rheedii; Mimosa entada, scandens. A gigantic climbing shrub, remarkable for its legumes which are several feet long, 4–5 inches broad; and surrounded with a thick, very firm, polished entire rim, which is found to remain like a picture-frame when the less durable jointed body of the legume has disappeared; the joints are 10–30, one-seeded, ligneous, swelled in the centre, transversely furrowed, greenish ash-color when ripe; the seeds are more or less heart-shaped, flattened, about 2 inches in diameter, with a shining brown testa, which is $\frac{1}{10}$th of an inch thick, and very tough and horny; it encloses two large, equal cotyledons which adhere to it; the radicle is patelliform, and lodged at the umbilicus of the seed; the substance of the cotyledons is white and insipid; when a thin section is cut and a drop of water placed upon it, the water immediately becomes milky, and the opacity of the section is much diminished. The seeds are emetic, and a paste prepared from them is applied medicinally to glandular swellings.

SCORPION (بچھو - biççhú, *Hind.*). Prefix.——*Scorpion fish* (سینگی - síngí, Hind.; بچھو مچھی - biççhúmaççhí, Dec.; ಚೇಳುಮೀನು - chéluminu, Can.; తేలుచేప - téluchépa, Tel.; ସିଙ୍ଗି - singhí, Oor.; കാരിമീൻ - kárimín, Mal.; தேளி - téli, Tam.). A short flat-headed eel having something like a scorpion's nippers, hence the name. Hind. from (sing, hind. horn); from its pectoral spine. Dec. from (biççhú, hind. scorpion + maççhí, hind. fish). Can. from (chélu, can. scorpion + mínu, can. fish). Tel. means scorpion fish. Oor. from hindostany. Mal. from (kári, mal. doer + mín, mal. fish). Tam. from (tél, tam. scorpion). Tel. also (márupu). Saccobranchus fossilis, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Alias Saccobranchus singio; Silurus biserratus, fossilis, laticeps, microcephalus, singio. Singio from hindostany. Freshwater; colors leaden, sometimes with two longitudinal yellowish bands; the young occasionally reddish; wounds from the pectoral spine of this fish are dreaded as they are reputed very poisonous, occasioning tetanus; as soon as captured, the offensive spine is broken off by blows with a stake; fishermen dread it so much that they would prefer cutting the meshes of their nets and allowing it to escape than endeavour to remove it uninjured; as food the flesh is esteemed for its invigorating qualities, and tanks are frequently stocked with them during the rainy season; when food is plentiful they fatten well, if the reverse they become lanky, thus altering the comparative height of the body to that of its length; attaining a foot or more in length. No other common species here.——*Scorpion sting* (തേൾക്കട - télkata, Mal.; தேட்கொடுக்கி - tédgodukki, Tam.) from fruits like scorpion's sting. Same as Indian heliotrope.

SCREW (پیچ - pech, *Hind.*). Prefix.——*Screw bean* (مسقیط پیچدار - miskítipechdár, Hind.). From shape of pods. Same as Screw mesquit.——*Screw-pine* (केतकी - kétakí, San.; केवडा - kévadá, Mahr.; बोंडयि - bóndayi, Concany; کازی - kází, Ar.; کدر - kadar, Pers.; کیوڑہ - keurah, Hind. and Dec.; پندن - pandan, Malay; ಕೇದಗೆ - kédige, Can.; ಕೇದಯಿ - kédayi, Too.; మొగలి - mogali, Tel.; കൈത - kaita, Mal.; වැටකෙයියා - vatakeyiyá, Singh.; தாழை - tázhai, Tam.). Title from screw-like arrangement of the long, spine-edged, sedge-like leaves on summit of the stems and pine-apple [ananas] like fruit. San. from (chit, san. to shine) [kait], from fragrant flowers. Mahr. from sanscrit. Can. from sanscrit. Too. from sanscrit. Tel. from (mogga, tel. bud), from flower not expanding like all other flowers [dyeing mulberry]. Mal. from sanscrit. Singh. from (vata, singh. hedge + keyiyá, singh. screw-pine, pandanus). Tam. from (tazhai, tam. to flourish with foliage). Conc. also (kédagi). Ar. also (kadar). Hind. also (ketgí), from sanscrit; (gaganphúl), meaning sky flower. Can. also (tále); (kyádige); (gédige); (mundige). Too. also (mundeyi). Tel. also (gádzangi); (gédangimogali); (goddzangi). Mal. also (tázha), meaning wide-spreading; (palliyambu), meaning royal arrow. Singh. also (múdukeyiyá), meaning sea + screw-pine, pandanus; (vataké). Tam. also (mundagam), meaning branchless plant; (musali), meaning pestle like, from branchless stem. Title otherwise Caldera bush, Fragrant screw pine, Green spined screw spine, Keora oil plant, Ketaky, Mogaly, Moreton bay bread fruit, Nicobar breadfruit, Pandang oil plant, Tauzhay. Botanically Pandanus odoratissimus, linn. fil., pandanaceæ [vricsham, 150]. Pandanus from malay. Alias Arthrodactylis spinosa; Keura odorifera. Keura from hindostany. Large spreading shrub, 10 feet or more, bushy, ramous; roots issuing from lower parts of the stem or larger branches; leaves confluent, stem clasping, closely imbricated in three spiral rows round the extremities of the branches, tapering to a fine triangular point, smooth, shining, margin and back armed with sharp spines—those on the margin point towards the apex, those below in various ways; flowers male and female in terminal racemes on different plants; in female flowers no other corolla or calyx than the termination of the three rows of leaves forming three imbricated fascicles of white floral leaves, standing at equal distance round the base of the young fruit; fruit something in appearance like a pine-apple [ananas], orange-colored, composed of numerous drupes, detached when ripe, and covered with a deeper orange-colored skin, interior filled with rich-looking yellow pulp, intermixed with strong fibres; seed one, oblong, smooth; flowers small, pale yellow, very fragrant; flowers seldom visible, but the large red fruit, much like a pine-apple, is conspicuous. Extends over a large space by sending down aerial roots from branches; blossoms during rainy season with panicles of large, white, sheath-like leaves, enclosing spongy-looking bundles of closely packed

minute flowers, with sandal [q.v.] perfume; thrives in low swampy ground; fringes the coast in many places, and is often planted in belts, but takes up much room, forms dense thickets, and harbours venomous reptiles [mogily cobra]; the lands in which chayroot [q.v.] is cultivated are often protected from drifts by means of this shrub, it is a very strong sand-binder [manal]. Flower offered to mauriyamman [q.v.], also to vishnoo [q.v.]; but is not acceptable to shiva [q.v.]. Floral leaves eaten either raw or boiled; lower pulpy part of drupes sometimes eaten; flowers with catechu [q.v.] and spices, form substance used in paun [q.v.]; pulp of fruit is used as famine food. From flowers is made keora oil [attar]; mats [boriyah], baskets [tokrah] and hats [topee] are made from the fusiform roots, as also a coarse brush for white-washing houses; farina of the male flowers is used as a perfume; natives bestrew their heads with it, as europeans do with perfumed powder; leaves composed of tough, longitudinal fibres, white and glossy, employed for covering huts, making matting, as well as for cordage; fibre [naur] very short in the staple, not being above an inch long; thick roots so soft and spongy as to be employed as corks [solah]. There is a Tamul proverb:—கடற் கரைத் தாழங்காய் கீழ் தொங்கி என்ன மேல் தொங்கி என்ன—"what matters it whether the wild pine fruit on the seashore "hangs high or low?" being useless. There is another:—வேளைக்கு உதவாத பிள்ளை தாழங்காய்க்குச் சரி—"a "child who does not help in an emergency is like the fruit of "the screw-pine." Other common species are:—fascicularis, furcatus, lævis. For creeping screw-pine see Tirootauly. For foreign screw-pine see Ananas. For large screw-pine see Foreign aloe.——*Screw-tree* (आवर्तनी - ávartaní, San.; धामनी - dhámaní, Mahr.; توا بر توا - tawábartawá, Ar.; كشت بر كشت - kishtbarkisht, Pers.; مروڑى - marorí, Hind. and Dec.; ಎಡಮುರಿಗಿಡ - edamurigida, Can.; వలంబిరి - valambiri, Tel.; ମୁରିମୁରି - murimuri, Oor.; വലമ്പിരി - valampiri, Mal.; ලීනියා - líniyá, Singh.; வலம்புரி - valamburi, Tam.). Title from twisted capsules. San. from (ávrit, san. to twist); from twisted capsules. Ar. from (tawá, ar. fold + bar, pers. over + tawá, ar. fold). Pers. from (kisht, pers. chain + bar, pers. over + kisht, pers. chain). Hind. from (marorí, hind. anything twisted), from use of its fruit in gripes, or from its screw-like capsules. Can. from (eda, can. left + muri, can. turn). Mal. from tamul. Tam. means turned to the right [roodrauck tree, valamboory]. San. also (mrigashringa), meaning deer's horn. Mahr. also (kévana); (varkáti). Pers. also (pechak), meaning little twists. Hind. also (maroríphallí), meaning gripes + pod; (jonkphallí), meaning leech + pod. Can. also (bhútakaralu), meaning goblin + entrail; (kádukalnárugida), meaning wild stone + hemp plant, cannabis sativa, linn.; (chachalu); (kywalla). Tel. also (shyámali), meaning black; (ádashyámali), meaning female + the tree; (kávanchi); (nuliti), meaning small; (gubbadára); (nulitada), meaning small + grewia tiliæfolia, vahl. [round-leaved tadda]. Mal. also (íshvaramúli), meaning divine root; (íshvaramulla), meaning divine jasminum sambac, ait. [isharmool]. Title otherwise Deer's horn, Devil's entrails, Eeshwaramooly, Isora, Twisted horn, Twisted stick, Valamboory. Botanically Helicteres isora, linn., sterculiaceæ [vricsham, 25]. Specific from (íshvaramúli, mal. the plant). Alias Helicteres jamaicensis roxburghii; Isora corylifolia. Shrub, 12 feet; leaves broad, slightly cordate roundish, obovate, suddenly and shortly acuminated, serrate, toothed, upper side scabrous, under tomentose, like english hazel; pedicles two to four together, forming an almost sessile, axillary corymb; petals reflexed; capsule cylindrical, spirally twisted, pubescent; flowers brick-colored. The fruit consists of five slender angular carpels, twisted like a corkscrew, and together forming a cone about $1\frac{1}{2}$ to 2 inches long; the carpels are pubescent, and of a greenish brown color; they contain a single row of dark brown angular seeds; the internal surface is of a light greenish hue and highly polished; taste mucilaginous; the root bark is of a dark-brown color, and is very thickly studded with small round warts so as to present almost the appearance of shagreen. A liniment from powder of the capsule, mixed with castor-oil [aumanac] applied in medicine to sore-ears; seed vessels used internally in bilious affections with other medicines, the screw of plant being taken to indicate applicability to colic. Fibre [naur] from bark is strong, white, and very useful for cordage, rough sacking, and canvas; curtain blinds of verandahs [q.v.] of native houses are made from this. Wood white, soft; branches used for fuel, fencing and thatching; used for producing fire by friction. No other common species here.

SEA BREEZE (دریا کی هوا - daryákíhawá, *Hind.*; ಸಮುದ್ರದಘಾಳಿ - samudradaghálí, *Can.*; ಕಡಲ್ ಘಾಳಿ - kadalghálí, *Too.*; సముద్రపుగాలి - samudrapugáli, *Tel.*; കടൽകാററു - katalkáttu, *Mal.*; கடற்காற்று - kadargáttu, *Tam.*). Title as blowing from the sea. Hind. from (daryá, hind. sea + hawá, hind. breeze). Can. from (samudra, san. sea + ghálí, can. breeze). Too. from (kadal, too. sea + ghálí, too. breeze). Tel. from (samudra, san. sea + gáli, tel. breeze). Tam. from (kadal, tam. sea + káttu, tam. wind). A local wind. Occurs along the east coast, and for a few miles inland. Sets in about noon and continues for sometime after sunset. At the distance of ten or twenty miles from the sea it arrives late in the afternoon, and is already heated by the tract of country over which it has passed. Called in old Anglo-indian, the Doctor. There is something of the same sort on the W. coast. See vol. II, 3 [land-wind, monsoon, vayoo].

SEB (सेव - séva, *San.*; شجر تفاح - shajarituffáh, *Ar.*; درخت سيب - darakhtiseb, *Pers.*; سیو کا پیڑ - seukáper, *Hind.*; سیب کا جهاڑ - sebkájhár, *Dec.*; ಸೇವುಗಿಡ - sévugida, *Can.*). Title from persian. San. from persian. Ar. from (shajar, ar. tree + tuffáh, ar. apple). Pers. from (darakht, ar. tree + seb, pers. apple). Hind. from (séva, san. apple + per, hind. tree). Dec. from hindostany. Hind. also (sahjnákábínj), referring to seeds. Greek μηλέα. Title otherwise Apple. Botanically Pyrus malus, linn., rosaceæ [vricsham, 49]. Alias Malus communis. Deciduous fruit tree, 20 feet high; leaves ovate, oblong, acuminate, serrated, smooth; umbel sessile; claws shorter than the calyx; styles smooth; flowers reddish white, flowering in april and may; fruit usually globose, always umblicate at the base, and not narrowed into the peduncle; flesh firm, brittle and acidulous, never stony, containing, besides sugar [q.v.] and malic acid, gum, pectine and albumine; malic acid is contained in considerable quantity; at bangalore bears well, but inferior to the english and american apple. For species communis or pear, see Amrood. Compare the following apples:—Ægle marmelos, golden apple and wood-apple; Anacardium occidentale, cashew apple; Ananas sativus, pine-apple; Anona palustris, alligator apple; Anona squamosa, custard-apple and sugar-apple; Chrysophyllum roxburghii, star-apple; Citrullus colocynthis, bitter apple; Citrus medica, var. limetta, adam's apple; Cydonia vulgaris, cretan apple and golden apple; Datura fastuosa, thorn apple; Eugenia jambos, east indian rose-apple; Eugenia malaccensis, malay apple and malay rose-apple; Feronia elephantum, elephant-apple; Lycopersicum esculentum, love-apple; Momordica dioica, balsam-apple; Punica granatum, carthagenian apple; Solanum melongena, jew's apple and mad-apple; Spondias dulcis, otaheite apple; Tabernæmontana coronaria, adam's apple; Tabernæmontana dichotoma, eve's apple. See gloss. paragraphs.

SEBESTEN (शेलु - shélu, *San.*; سپستان - sapistán, *Pers.*; బోటుకు - botuku, *Tel.*; വിരി - viri, *Mal.*; நருவிலி - naruvili, *Tam.*). Title from persian [sag]. San. from (shél, san. to shake); from curing diseases. Pers. from (sag, pers. dog + pistán, pers. nipple). Tam. from (naruvu, tam. odour + ul, tam. having), from pleasant-tasted fruit. Title otherwise Lobesten. Botanically the Cordia genus, boragineæ [vricsham, 92]. Trees or shrubs; leaves alternate, stalked; flowers in dichotomous corymbs or clusters; drupe ovoid or ellipsoid, with one to four cells each with a seed. The species best known to the natives are shown below. Other s. indian species indigenous or naturalized are:—Cordia macleodii, h. f. and t.; found in godavery forests; heart-wood light-brown, mottled with darker veins, even-grained, vey hard, strong, tough and elastic; seasons well and works easily; used for furniture, picture-frames, and other ornamental work; fishing-rods; something like maple; much used in central india. Cordia monoica, roxb.; small tree; flowers white; drupe oval, as large as a black-currant [angoor], smooth yellow filled with mucilaginous pulp; yields a strong close-grained wood, but small and crooked. Cordia subcordata, lamk., tahiti tow tree; tree; flowers white, suffused with red; introduced from the moluccas. Cordia tectonifolia, wall.; small tree with handsome scarlet flowers in gardens in the plains, introduced from the west indies [golden sebesten].——*Cuba sebesten* (విరిగె - virige, Tel.). Tel. from (virugu, tel. to break), from its brittleness. Title otherwise Rough-leaved sebesten. Botanically Cordia [sebesten] sebestana, l., boragineæ [vricsham, 92]. Small tree, 15 feet, native of cuba; ovate, acute or elliptic, entire, rough coarse leaves; large cymes of bright scarlet flowers produced at ends of branches, followed by pure white fruits. Wood aromatic when burnt.——*Golden sebesten* (பொன்னருவிலி - ponnaruvili, Tam.). Title from scarlet flowers. Tam. from (pon, tam. gold + naruvili, tam. cordia sp.). Botanically Cordia [sebesten] speciosa, willd., boragineæ [vricsham, 92]. Small tree with handsome scarlet flowers in gardens in the plains, introduced from the west indies. Compare species tectonifolia, above.——*Large sebesten* (शेलु - shélu, San.; مخيطة كبير - makhítahikabír, Ar.; سپستان کلان - sapistánikalán, Pers.; بڑالسوڑا - barálasorá, Hind.; بڑی گوندنی کا جهاڑ - barígondníkájhár, Dec.; నక్కెరు - nakkéru, Tel.; വലിയവനിച്ചി - valiyavaniççi, Mal.; பெரியநருவிலி - periyanaruvili, Tam.). Title from size of tree and berry. San. from (shél, san. to shake), from curing diseases. Ar. from (makhítah, ar. cordia myxa, linn. + kabír, ar. large). Pers. from (sag, pers. bitch + pistán, pers. breasts + kalán, pers. large). Hind. from (bará, hind. large + lasorá, hind. cordia myxa, linn.). Dec. from (barí, hind. large + gondní, hind. fruit of cordia myxa, linn. + jhár, hind. tree). Tel. from (nakka, tel. fox + éru, tel. to pick up) [false sandal, narrow leaved sebesten]. Mal. from (valiya, mal. large + vaniççi, mal. diospyros embryopteris, pers.). Tam. from (periya, tam. big + naruvili, tam. cordia sp.). San. also (bahuváraka), meaning preventing much, medicinal; (gandhapushpa), meaning fragrant blossomed; (bhútavriksha), meaning (bhútadruma), meaning devils' tree;

devil's tree; (shítap'hala), meaning having cold fruit; (shíta), meaning cold; (shléshmántaka), meaning phlegm destroying; (pichhila), meaning slippery, from clammy pulp; (uddála), meaning bursting out; (dvijakutsita), meaning despised by bramins or birds; (shátaka), meaning thinning, weakening diseases. Hind. also (barálaslasá); (barálasorá); (lasorá); (gondní). Tel. also (bankanakkera), meaning gum + the tree; (iriki), meaning narrow, from small wood; (peddanakkéru), meaning large + the tree; (úrunakkera), meaning village + the tree; (peddabotuku), meaning large + the tree cordia. Mal. also (periyamari), meaning large + indigofera tinctoria, linn.; (naruvari), meaning fragrant cordia. Tam. also (vidimaram), corruption from malayalam; (verasu). Title otherwise Broad leaved sebesten. Botanically Cordia [sebesten] obliqua, willd., boragineæ [vricsham, 92]. Alias Cordia latifolia. Tree, 12-25 feet; leaves roundish, cordate, entire, repand, three-nerved, smooth above, scabrous beneath; calyx villous, campanulate, with an unequally-toothed mouth; corolla short, campanulate; segments five; panicles terminal and lateral; flowers numerous; small, white; drupe pale-straw color, covered with whitish bloom; nut surrounded with soft clammy pulp. Has numerous spreading branches, and the young shoots are angular and smooth; small, round, reddish-colored, pleasant-tasted glutinous fruit, called sebesten plum. Fruit is medicinally expectorant and astringent; medical use same as cordia myxa, linn. [small sebesten]. The fruit is eaten. Matches made from the bark; plant gives fibre [naur]. Wood here very inferior, and of small size. There is a variety obliqua, willd., var. wallichii; tree tolerably common throughout western forests and in mysore; technically hardly distinct from the common cordia myxa, linn. [small sebesten], but the densely woolly leaves will distinguish it; timber is serviceable and in use with the natives.——*Narrow-leaved sebesten* (भोकर - bhókara, Mahr.; گوندنی کا جہاڑ - gondníkájhár, Dec.; చిన్నబొటుకు - chinnabotuku, Tel.; நறுவிலி - naruvili, Tam.). Dec. from (gondní, hind. cordia + jhár, hind. tree). Tel. from (chinna, tel. small + botuku, tel. cordia). Tam. from (naruvu, tam. odour + ul, tam. having). Tel. also (nakkéru), meaning fox + picking up [false sandal, large sebesten]. Botanically Cordia [sebesten] rothii, rœm. and sch., boragineæ [vricsham, 92]. Alias Cordia angustifolia, cuneata, reticulata. Tree, 12-15 feet; leaves nearly opposite, lanceolate, obtuse or emarginate, scabrous; calyx campanulate, obscurely four-toothed; corolla-tube longer than the calyx; limb four-partite, with revolute edges; panicles terminal, corymbose; stamens four; flowers small, white; drupe round, smooth, yellow; nut surrounded with mucilaginous pulp. Decoction [kwautam] of the bark astringent and used as gargle; in pharm. non-officinal. Pulp of fruit eaten. Liber or inner bark made into rope; gives a gum [gond]. Wood grey, compact, hard; elastic, making good poles for carriages, &c.——*Small sebesten* (शेलु - shélu, San.; भोंकर - bhómkara, Mahr.; शर्पेल - sharpala, Conc.; مخيط - makhítah, Ar.; سپستان - sapistán, Pers.; چھوٹالسوڑا - chhotálasorá, Hind.; چھوٹی گوندنی کا جہاڑ - chhotígondníkájhár, Dec.; ಮಣ್ಣಡಿಕೆ - mannadike, Can.; కిచవిరిగి - kítsavirigi, Tel.; ଗୋଣ୍ଡି - gondi, Oor.; ചെറുവിരി - cheruviri, Mal.; ලොලු - lólu, Singh.; சிறுநறுவிலி - shirunaruvili, Tam.). Title from tree and berry being smaller. San. from (shél, san. to shake), meaning subduer of diseases. Pers. from (sag, pers. bitch + pistán, pers. breasts); from fruit's resemblance. Hind. from (chhotá, hind. small + lasorá, hind. the fruit). Dec. from (chhotí, hind. small + gondní, hind. fruit of cordia + jhár, hind. tree). Can. from (mannu, can. earth + adike, can. areca catechu, linn.). Mal. from (cheru, mal. small + viri, mal. cordia). Tam. from (shiru, tam. small + naruvili, tam. cordia sp.). San. also (bhúkampadáruka), meaning earthquake + tree; (bahuváraka), meaning many + cover, from therapeutic value; (shléshmántaka), meaning phlegm destroyer; (bhúshélu), meaning earth + the plant; (kshudrashléshmántaka), meaning small + phlegm destroyer; (bhútadruma), meaning devil's tree; (súkshmap'hala), meaning having minute fruits; (laghupichhila), meaning small cordia; (laghushíta), meaning small + cold, cordia obliqua, willd. Ar. also (dabak). Pers. also (pistánisag), meaning teats of a bitch, from fruit. Hind. also (chhotálaslasá), meaning small cordia; (lasorá); (gondí). Can. also (challemara); (chotte). Tel. also (chinnanakkéru), meaning small + the tree, cordia obliqua, willd.; (chinnabotuku), meaning small + the tree, cordia; (naravanji). Mal. also (cheruvaniççi), meaning small + the tree, diospyros embryopteris, pers.; (kotta); (vidimaram), corruption of (virimaram) cordia tree. Singh. also (lóla). Tam. also (naruvili), meaning odour + having. Title otherwise Assyrian plum, Devil's tree, Dog teat, Earthquake tree, Phlegm killer, Sebesten plum, Sepistan plum, Smooth leaved cordia, Smooth leaved myxa. Botanically Cordia [sebesten] myxa, linn., boragineæ [vricsham, 92]. Alias Cordia africana, brownii, dichotoma, domestica, ixiocarpa, latifolia, officinalis, sebestena; Sebestena officinalis. Tree, 8-10 feet; leaves oval, ovate, or obovate, repand, smooth above, rather scabrous beneath; calyx tubular, widening towards the mouth, torn as it were in three to five divisons; divisons of corolla revolute; drupes globular, smooth, yellow; panicles terminal and lateral; nut four-celled, tetragonal, cordate at both ends, surrounded with transparent viscid pulp; flowers small, white. Common, much in cultivation about native villages; trunk generally crooked, bark grey and cracked, branches forming a dense shady head; fruit grows in clusters and consists of a drupe, the pulp of which is soft and clammy. Dried fruit yields on maceration plentiful mucilage, of emollient nature, useful in diseases of breast and urethra; fruit is gently aperient; bark is a mild tonic; the seeds are a good remedy in ringworm, being powdered and mixed with oil and so applied; substituted for british glycirrhiza [atimathooram]; gives to pharm. fruit and bark, non-officinal. When ripe, fruit eaten by the natives and also pickled; smell of the nuts when cut is heavy and disagreeable; kernel taste like filberts [findak]. Bark made into ropes, fibre [naur] used for caulking boats, ropes, and fuses; gives a fixed fat oil [yennay]. Wood one of the best for producing fire by friction, ploughs made out of it; generally set down by natives as only fit for firewood, it however furnished the timber from which the egyptian mummy cases were made.

SECUNDER (سکندر - sikandar, *Hind.*). Persian for Alexander the Great, called also (sikandarirúmí), meaning alexander the grecian; also (sikandaribinfilikús), meaning son of philip.——*Secunderabad* (سکندرآباد - sikandarábád, Hind.). From (above + ábád, hind. city). A cantonment in the Nizam's territories, the head-quarters of the Hyderabad subsidiary force, situated in lat. 17° 26′ N. and long. 78° 32′ E.; 397 miles from Madras. The city of Hyderabad lies six miles to the southward, separated from the Residency usually called the Chudderghaut by the river Moosy.——*Secunder shah* (سکندر شاه - sikandarsháh, Hind.). From (above + royal title). Nizam of Hyderabad, 1803 to 1829, with Chundoo laul as minister. Received large accession of territory for service in Mahratta [q.v.] and Pindarry [q.v.] wars. See vol. I, 10; II, 252.

SEEGORE (ಸಿಗೂರು - sígúru, *Can.* sígúr *). From (siguri, can. a kind of fan + úru, can. village).—"*a*" Village deserted about twenty years ago, Hill; Neilgherry dist., Todanaud div.; lat. 11° 32′; long. 76° 45′; height 6,778 feet; from Ootacamund N. 9 miles. Chuttram [q.v.]. The Seegore forest lies to the east, and the Mysore road, comprising the tract of country between base of Neilgherries and Moyaur river. Its area is about 40 square miles. The timber trees are inferior, the tract being almost beyond influence of S.W. monsoon [q.v.]. Good sandalwood [sandal]. The tract is unhealthy.—"*b*" River; Neilgherry dist., Todanaud division. About 2,900 feet above level of sea; formed by the Ootacamund stream, one branch from Marlemund and another from between Marlemund and Bilicull. Joins the Bhawauny at Barra, about 7 miles from Seegore to the right of Teppacadav.—"*c*" Pass; Neilgherry dist., Todanaud division; lat. 11° 31′; long. 76° 44′; from Ootacamund N. 8 miles. Runs down north side of hills from Mootnaud to near the village of Seegore. The head of the pass is 4¾ miles from Ootacamund, the road being fairly level. The descent is about 7 miles in length. About half way down is Cullhutty, with picturesque waterfall. From foot of ghaut [q.v.] to Teppacadav on Mysore frontier the distance is 10½ miles. The Moyaur is crossed by a wooden bridge constructed in 1841. Near this point the road into Wynaud branches off. The town of Mysore by this route is 69 miles from Ootacamund. The road for 25 miles passes through much dense jungle, in which large game abounds. The gradient of this ghaut never exceeds 1 foot in 10, the average being 1 in 12. It is bridged with timber structures throughout. It is partly metalled. It was constructed in 1838, and took the place of the old path by Bilicull further to the east. At one time it was the favorite approach to the Hills by the visitors from the northern parts of the Presidency and Madras. It is still much used for the carriage of teak [q.v.] and other timber to the hills. Near the foot is an important group of cromlechs [paundoo cull], and at the head is a fortification consisting of a wall joining two circles.—"*d*" Coffee [q.v.] estate, Seegore, Neilgherries. 8 miles from Ootacamund at the foot of the ghaut. 150 acres.

SEEMA (सीमा - símá, *San.*; ಶೀಮೆ - shíme, *Can.*; సీమ - síma, *Tel.*; சீமை - shímai, *Tam.*). Means boundary. Tract of country. Cona seema is the corner country. Byle seema is the outside country. Often a foreign country, especially Europe or England [europe, faranghee, firangy, paranghy, rata, vilauyaty].——*Shivaur* (शिवार - shivára, Mahr.; శివారు - shiváru, Tel.). From (shimva, mahr. border). Hamlet.

SEER (شیر ماهی - shermáhí, *Hind.*; చందామచేప - tsandá-muchépa, *Tel.*; ମଞ୍ଜିରମୋ - manjiramo, *Oor.*; ചമ്പാൻ - champán, *Mal.*; மாப்பிளாச்சை - máppiláççai, *Tam.*). Title from portuguese serra, because of the serrated appearance of the rows of finlets behind the second dorsal and anal fins. Oor. corruption from tamul below. Mal. from (sanpan, chinese. three planks); fishing boat, hence fish. Tam. from (má, tam. black + piláççai, tam. ostracion genus). Tel. also (vandzu). Mal. also (arakkiya). Tam. also (ahkulah); (kónam); (vañjiram), meaning strong head; (vellará), meaning white snake; (vellirál), meaning white shrimp. Title otherwise Indian salmon, Vanjiram, Vellarah. The genus Cybium, scombridæ, acanthopterygii, teleostei, pisces [matsyam, 19], of naturalists [jantoo]. Cybium commersonii, alias Scomber commersonii, konam, maculosus; konam from tamul is the coromandel fish. Lateral line at first bends down, then passes direct to centre of caudal where it ends in soft

raised keel between bases of either lobe; colors bluish above, silvery below; first dorsal black to end of seventh spine, behind which it is pure white, having narrow black upper edge; basal half of pectoral black; after death numerous vertical undulating lines and spots appear on sides; during life they are rather indistinct; sea, not estuaries; mouth full of teeth; most delicate eating of all marine fishes, under a foot in length they are dry, from $1\frac{1}{2}$ to $2\frac{1}{2}$ feet excellent, above this coarse. Oil might be used like cod or shark [soorah] liver oil. Cybium guttatum is the ceylon species.

SEER (سیر - ser, *Hind.*; ശേർ - shér, *Mal.*; சேரு - shéru, *Tam.*). From persian.—"*a*" Measure of weight. 40 seers = 1 maund [niray, 2e]. There are two seers, cutcha and pucka, 40 of the former making a Madras maund, and 40 of the latter an Indian maund. The former is 8 pollums and the latter $26\frac{2}{3}$ pollums. The cutcha seer weighs $9\frac{3}{5}$ oz. avoir. and the pucka 2 lbs. avoir. The cutcha seer weighs 24 tolahs, while a pucka seer weighs 80 tolahs.—"*b*" Measure of capacity. 4 pows = 1 seer [alavay, 3e]. Approximate actual value, 1 seer = 70 cubic inches. By seer is generally meant the pucka seer, which is $\frac{2}{3}$ of the Madras puddy. In Cuddapah the seer is 118 cubic inches. In Bellary and Mysore $73\frac{1}{4}$ cubic inches, and in Tinnevelly $71\frac{3}{4}$ cubic inches. In Bellary there is another seer which is $94\frac{1}{2}$ cubic inches. The Adony seer is 92 cubic inches. In Vizagapatam the seer is equal to $78\frac{3}{4}$ cubic inches and is the same as tavva. See vol. I, 609; II, 506.

SEETAY (सीता - sítá, *San.*; సీత - síta, *Tel.*; சீதை - shíthai, *Tam.*). Means furrow; as born of the furrow of the field. Compare Aundaul, one of the Alwars [q.v.]. Wife of Rama [q.v.] and the daughter of Janacan [q.v.], king of Mitilay [ramayanam]. There is a Tamul proverb:—சீதை பிறக்கவும் இலங்கை அழியவும்—"the birth of Seetay was the ruin of "Lunka [q.v.]." Hindoo female proper name [peyar]. Familiarly Sheela. In composition also male proper names, as Seetayya, Seetappa. Plant first term. Ex., where transl. is of second term:—Anona squamosa (sitáp'hala), fruit; Cassytha filiformis (sítammapógunúlu), mother + line of thread; Ipomæa angustifolia (sítammavárisavaramu), mother + false hair, (sítasavaramu), false hair; Pergularia minor (sítámanóharamu), pleasing; Spondias mangifera (sítavrikshamu), tree. See gloss. paragraphs. ——*Seetammah* (సీతమ్మ - shítamma, Tel.; சீதம்மா - shíthammá, Tam.). From (above + ammá, tam. mother, titular affix). Hindoo female proper name [peyar].——*Seetampett* (సీతంపేట - shítampéta, Tel.). From (shítamma, tel. proper name + péta, tel. suburb). Ghaut [q.v.]; Vizagapatam dist., Palcondah tal. One of the principal roads from Vizagapatam into Ganjam. Practicable for wheeled traffic.——*Seetanuddy* (ಸೀತಾನದಿ - sítánadi, * Can.). From (above + nadí, san. river). River; South canara dist., Oodipy tal. Rises in the ghauts beyond Someshwaram to the north-east of Oodipy talook. Joins the Swarnanuddy at Maubcal, and the two rivers form a backwater. Navigable as far as Cokkarney, about 11 miles inland from the coast. Barcore on its bank.——*Seetuppa gownivaur* (సీతప్పగవనివారు - sítappagavaniváru, Tel.). Name + title. First of the present Poonganore zemindars. Originally settled at Varigapully in Chittore talook and founded Soogatore and built a fort there.——*Seetaraman* (சீதாராமன் - shítháráman, Tam.). From (above + ráma, san. rama). Hindoo 2nd or pers. name [peyar].——*Seetaramasawmy* (சீதாராமசாமி - shíthárámasámi, Tam.). From (above + ráma, san. the hero + svámí, san. master). Hindoo 2nd or pers. name [peyar].——*Seetaram raj* (సీతారామరాజు - sítárámarádzu, Tel.). Name + third name. The brother and diwaun [q.v.] of Vijiaram rauz. See vol. I, 54; II, 132.——*Seeta's caudle* (سیتا کا پنجیری - sítákápanjerí, Hind.). Same as Country lavender.——*Seeta's heart joy* (సీతామనోహరము - sítámanóharamu, Tel.). Same as Creeper champak.——*Seeta's knot* (సీతసవరము - sítasavaramu, Tel.; തലനീളി - talaníli, Mal.). Title from filiform habit. Tel. from (sítá, san. rámá's wife + savaramu, tel. false hair); cf. cottaun, hedge cotton. Mal. from (tala, mal. head + nílu, mal. to grow long); from supposed property of accelerating growth of hair. Tel. also (sítámmavárisavaramu), meaning seetay + mother + title of respect + false hair; (lanjasavaramu), meaning concubine + false hair; (kondasítasavaramu), meaning hill + the plant; (kondasítammasavaramu), meaning hill + the plant; (gontemagomaruchettu), meaning gontema, the village deity + beauty + plant; (alumukáda), meaning weed + stem. Mal. also (vérilláttáli), meaning rootless creeper. Botanically Ipomæa [calamby] angustifolia, jacq., convolvulaceæ [vricsham, 93]. Alias Convolvulus denticulatus, filicaulis, filiformis, hastatus, medium, prostratus, simplex; Ipomæa bidentata, denticulata, filicaulis, filiformis. Stem elongated, rarely twining, filiform, angular; leaves linear or linear-lanceolate, shortly petioled, hastate and denticulate at the base, quite smooth; peduncles longer than the leaf, one to two-flowered; pedicels clavate; sepals ovate-acuminate; corolla small, pale-yellow, with a crimson eye; flowering nearly all the year.——*Seeta's thread* (आकाशभव - ákáshabhava, San.; निर्मुली - nirmúlí, Mahr.; کشوث - kashús, Ar. and Pers.; آکاس بیل - ákásbel, Hind.; آکاس پون - ákáspawan, Dec.; సీతమ్మపోగునూలు - sítammapógunúlu, Tel.). Title from airy roots. San. from (ákásha, san. sky + bhú, san. to be). Mahr. means rootless. Ar. from greek κάσσυθα. Hind. from (ákás, hind. heaven + bel, hind. creeper). Dec. from (ákás, hind. heaven + pawan, hind. flying). Tel. from (sítá, san. the goddess + amma, tel. mother + pógu, tel. line + núlu, tel. thread). San. also (ákáshapávana), meaning sky purifier. Ar. also (aftímún). Hind. also (nílátár), meaning blue thread. Dec. also (amarwal), meaning sky creeper. Title otherwise Air plant [cottaun], Dodder, Sky creeper. Botanically Cuscuta reflexa, roxb., convolvulaceæ [vricsham, 93]. Alias Cuscuta verrucosa. Generic from arabic. Parasitic herb; stem funicular; flowers loosely racemose, each flower pedicelled; sepals acutish, ovate-oblong; corolla tubular, lobes minute, acute, externally reflexed; anthers sub-sessile at the throat of the corolla; scales inserted at the base, fimbriated; styles short; capsule baccate; flowers small, white. Seeds carminative, and an anodyne; a cold infusion is given as a depurative. The dried plant used as a dye [shauyam]. The natives have a proverb that he who finds the roots of this plant will become possessed with boundless wealth and the power of invisibility. Other common species are:—chinensis, hyalina.——*Seeta's yarn* (సీతమ్మపోగునూలు - sítammapógunúlu, Tel.). From thread-like habit of growth. Same as Cottaun.——*Seetaupaty* (சீதாப்பதி - shíthappathi, Tam.). From (above + pati, san. husband). Rama, husband of Seetay. Hindoo 2nd or pers. name [peyar].——*Seetavullabhan* (సీతావల్లభుడు - sítávallabhudu, Tel.). From (above + vallabha, san. husband). Rama, husband of Seetay. Hindoo 2nd or pers. name [peyar].——*Seetayyah* (సీతయ్య - sítayya, Tel.). From (above + ayya, tel. master), rama the lord of seetay. Hindoo 2nd or pers. name [peyar].

SEIF (سيف - saíf, *Ar.*). From (sáfa, ar. to strike). Sword. In lacabs; as Seif ool moolk, sword of the kingdom [ism].

SEM (سیم کا گوند - semkágond, *Hind.*). From (semal, hind. red-cotton tree + gond, hind. gum). Otherwise Semla gum. Gum from species of bauhinia [mountain ebony], resembling gum arabic [q.v.].

SENNA (سناء - saná, *Ar.*, *Pers.*, *Hind.* and *Dec.*; నేలతంగేడు - nélatangédu, *Tel.*; സുന്നാ - sunná, *Mal.*; நிலாவாரை - nilávárai, *Tam.*). Title from mount sinai, through arabic. Tel. from (néla, tel. ground + tangédu, tel. cassia auriculata, linn.). Mal. from arabic. Tam. from (nilam, tam. ground + ávárai, tam. cassia auriculata, linn.). Botanically certain Cassia species [soovarnacam], leguminosæ [vricsham, 48]. Leaves, when carefully dried, have faint, rather sickly odour and a slightly bitter, sweetish, and nauseous taste; are characterized by peculiar extractive matter, which on being boiled passes into a resinous substance resisting action of water; are the sennæ alexandrinæ folia of chemists; as met with in the bazaars are often of very inferior quality, consisting of broken pieces of old leaves, pieces of stem, and other rubbish; also adulterated with a very similar-looking leaf of the solenostemma argel, hayne, asclepiadeæ [vricsham, 88], this leaf being thicker and stiffer than senna. Senna was first used by arabian physicians and through them introduced into europe. Infusion of dried leaves or leaflets is in medicine a safe and efficient purgative; usual form is in infusion in boiling hot water; natives quicken its operation, with addition of castor-oil [aumanac]; infusion of senna with epsom salts [bhaidy ooppoo] constitutes black draught; alexandrian and tinnevelly senna alone officinal in pharmacopœia of india. In commerce three kinds are distinguished:—first Alexandrian senna; secondly Bombay or mocha or east indian senna; thirdly Tinnevelly senna. See the various heads below. The first class or Alexandrian is the most used in europe, and the third or Tinnevelly is the most used in india; the second class, which is botanically a branch of the third, is out of use here in spite of its names.——*Aleppo senna* (भूतलपोत - bhútalapóta, San.; भूईतरवड - bhuítaravada, Mahr.; سناء حلبی - sanáihalabí, Ar. and Pers.; سنا - saná, Hind.; సనాముఖి - sunámukhi, Tel.; സുന്നാമക്കി - sunnámakki, Mal.; നിലാവരി - nilávari, Singh.; நிலாவாரை - nilávárai, Tam.). Title from original port of export to europe. San. from (bhú, san. earth + talapóta, san. cassia sophera). Mahr. from (bhuí, mahr. earth + taravada, mahr. cassia auriculata, linn.). Ar. from (saná, ar. senna + halab, ar. aleppo). Tel. means senna of mecca. Mal. means senna of mecca. Singh. from tamul. Tam. from (nilam, tam. ground + ávárai, tam. cassia auriculata, linn.). Hind. also (sunnámakki), meaning mecca senna. Tel. also (nélatangédu), means ground + cassia auriculata, linn. Singh. also (sanakola). Title otherwise Ground tungaid, Italian senna, Obovate senna. Botanically Cassia [soovarnacam] obovata, collad., leguminosæ [vricsham, 48]. Alias Cassia burmanni, obtusa, senna; Senna obtusa. Semi-shrubby or herbaceous perennial; sometimes an annual; stem 2–3 feet high, erect, smooth, pale green, somewhat zigzag, with long spreading branches; leaves alternate, spreading; leaflets opposite, in three to six pairs, pale glaucous green, about 1 inch long, the upper one often rather large than the lower; flowers rather large, bright yellow; grows in dry sandy ground. The first kind of senna known, having been introduced by the moors [q.v.] into europe. This together with nubian constitutes Alexandrian senna.——*Alexandrian senna* (سناء اسکندری - sanái-

iskandarí, Hind.). Title from original place of export to europe. Title otherwise Officinal senna. General term for product of Cassia acutifolia, delile [nubian senna], and Cassia obovata, collad. [aleppo senna]. Constitutes the bulk of the senna consumed in Europe. Angustifolia [tinnevelly senna] gives all sennas not included under Alexandrian.——*Bombay senna* (بمبئی کی سنا - bombaíkísaná, Hind.). Title from place of import. Product of the original variety of angustifolia [tinnevelly senna].——*Country senna* (ناٹ کی سنا - nátkísaná, Hind.). Same as Tinnevelly senna.——*East indian senna* (هندی‌سنا - hindísaná, Hind.). The original variety of angustifolia; but in spite of name, has been superseded by the Tinnevelly variety.——*Foreign senna* (ولایتی سنا - viláitísaná, Hind.). Same as Nubian senna, acutifolia, part of Alexandrian.——*Indian senna* (هندی‌سنا - hindísaná, Hind.). Same as Tinnevelly senna, angustifolia.——*Italian senna* (سناء بلدی - sanáibaladí, Hind.). Hind. means city senna. Same as Aleppo senna, obovata, part of Alexandrian.——*Lotus senna* (भूपद्म - bhúpadma, San.). From resemblance of flowers. Same as Tinnevelly senna, angustifolia.——*Mocha senna* (سناء مکی - sanáimakkí, Hind.). From place of export. Product of the original variety of angustifolia [tinnevelly senna].——*Nubian senna* (سنا مکی - sanámakkí, Ar., Pers. and Hind.; سنا مکی - sunnámakkí, Dec.; ನೆಲಾವರಿಕೆ - nelávarike, Can.; సీమతంగేడు - símatangédu, Tel.; சூரத்துநிலாவிரை - shúrattunilávirai, Tam.). Title from habitat. Ar. from (saná, ar. senna, cassia + makkí, ar. of mecca). Can. from (nela, can. ground + ávarike, can. cassia auriculata, linn.). Tel. from (síma, tel. foreign + tangédu, tel. the plant, cassia auriculata, linn.). Tam. from (shúrattu, tam. surat, the city + nilávirai, tam. tinnevelly senna, cassia angustifolia, vahl.). Ar. also (saná), (sanáihijází), meaning hijauz senna. Tel. also (nélaponna), meaning ground + calophyllum inophyllum, linn., probably from leaf; (nélatangédu), meaning ground + cassia auriculata, linn.; (súrattutangédu), meaning surat, the city + cassia auriculata, linn. Tam. also (shímainilávirai), meaning foreign + senna, cassia angustifolia, vahl. Title otherwise Acute-leaved senna, African senna, Foreign senna, Ground tungaid, Kordofan senna, Sennaar senna, Surat senna. Botanically Cassia [soovarnacam] acutifolia, delile, leguminosæ [vricsham, 48]. Small shrub, about 2 feet high; stem much as in obovata [aleppo senna]; leaves alternate, spreading; leaflets opposite, in four or five pairs, $\frac{3}{4}$–$1\frac{1}{4}$ inch long, rather thick, pale green; flowers bright yellow, a little smaller than obovata; native of tropical africa, principally nubia and especially sennaar and kordofan, probably extends westwards, reported from timbuctoo; does not occur in arabia or india. Leaves are the principal component part of alexandrian senna.——*Surat senna* (صورت‌کی‌سنا - súratkísaná, Hind.). From place of import. Same as Nubian senna, acutifolia.——*Tinnevelly senna* (भूपद्म - bhúpadma, San.; सोनामुखी - sónámukhí, Mahr.; सोनामक्कि - sónámakki, Conc.; سناء هند - sanáihind, Ar.; سناء هندی - sanáihindí, Pers.; هندی سنا - hindísaná, Hind.; ناٹ کی سنا - nátkísaná, Dec.; ನೆಲಾವರಿಕೆ - nelávarike, Can.; నేలతంగేడు - nélatangédu, Tel.; നിലവാക - nilaváka, Mal.; සොනකොල - sanakola, Singh.; நிலாவிரை - nilávirai, Tam.). Title from habitat of chief present variety. San. from (bhú, san. earth + padma, san. lotus, nelumbium speciosum, willd.); perhaps from resemblance of flowers. Mahr. and Conc. means mocha senna. Ar. from (saná, ar. senna + hind, ar. indian). Pers. from arabic. Hind. from (hindí, ar. indian + saná, hind. senna). Dec. from (nát, hind. country + saná, hind. senna). Can. from (nela, can. ground + ávarike, can. cassia auriculata, linn.). Tel. from (néla, tel. ground + tangédu, tel. cassia auriculata, linn.). Mal. from (nila, mal. ground + váka, mal. albizzia lebbek, benth.). Tam. from (nilam, tam. ground + ávirai, tam. cassia auriculata, linn.). San. also (bhúmihárí), meaning earth + taking, small shrub; (st'halótpala), meaning ground lily. Ar. also (sanáihijází), meaning hijauz senna; (sanáijabalí), meaning mountain senna. Hind. also (sunnámakkí), meaning mocha senna; (hindísanákápát), meaning indian senna leaf. Can. also (neláváre), meaning earth + cassia auriculata, linn. Tel. also (nélaponna), meaning ground + calophyllum inophyllum, linn., probably from leaf. Tam. also (nilavágai), meaning ground + albizzia lebbek, benth., from resemblance of leaf; (náttunilávirai), meaning country + the plant. Title otherwise Arabian senna, Bombay senna, Country senna, East indian senna, Ground tungaid, Indian senna, Lotus senna, Mocha senna, Narrow-leaved senna, Officinal senna. Botanically Cassia [soovarnacam] angustifolia, vahl., leguminosæ [vricsham, 48]. Alias Cassia elongata, lanceolata; Senna angustifolia, officinalis. Annual small shrub; stem erect, smooth; leaves narrow, equally pinnated; leaflets four to eight pairs, lanceolate, nearly sessile, slightly mucronate, smooth bright-green above, rather downy beneath; petioles without glands; racemes axillary and terminal, erect, stalks longer than the leaves; petals bright yellow; legumes pendulous, oblong, membranous, about $1\frac{1}{2}$ inch long, straight, tapering abruptly to the base, rounded at the apex, deep brown, many-seeded; agreeing with cassia acutifolia, delile [nubian senna], in general characters of its stem and leaves; flowers a little smaller than cassia obovata, collad. [aleppo senna]. Of senna yielded by this plant there are two varieties:—"*a*" Arabian, mocha, bombay, or east indian senna; collected in south arabia and exported from mocha, aden, and other ports in red sea to bombay; regarded as inferior kind of senna; consists of leaflets of present plant, often brown and decayed from having been dried without care, mixed with a variable proportion of legumes, stalks, and flowers of same plant; leaflets readily known by length and narrowness.—"*b*" Tinnevelly senna proper; originally from arabian seeds; from cultivation in south india the plant grows more luxuriantly than in its wild state and forms the officinal tinnevelly senna; fine variety; free from legumes, stalks and adulteration; consists of large, thin, entire leaflets, from one to two or more inches long, and sometimes half an inch broad at widest part; yellowish green color on upper surface, and similar but somewhat duller tint on under surface; odour and taste closely resemble Alexandrian senna; commonly exported from tuticorin; the finest senna of commerce. The plant is cultivated in red or black loam; dry ground prepared in april by ploughing and manuring [yeroo]; seed sown next month broadcast and ploughed in; weeds cleared; much water not required; leaves plucked after three months and dried in the shade; produce brought to market two weeks after.

SESAMUM (سمسم - simsim, *Ar.*). From egyptian. Same as Gingelly.

SESBAN (जयन्ती - jayantí, *San.*; سيسبان - saisbán, *Ar.*). Title from arabic. San. from (jí, san. to conquer); medicinal. Pea-tree. Botanically the Sesbania genus, leguminosæ [vricsham, 48]. Soft-wooded tropical shrubs or herbs; leaves pinnate, long, very narrow, with numerous leaflets; flowers in axillary racemes, usually yellow; pods long, narrow, cylindrical or flattened, containing many seeds. The species best known to the natives are shown below. Title comprises also species from genera bauhinia and parkinsonia.——*Common sesban* (राज - rája, San.; शेवरी - shévarí, Mahr.; راسن - rásin, Hind.; رواسن - ravásin, Dec.; ಕರಿಜೀನಂಗಿ - karijínangi, Can.; సోమింత - sóminta, Tel.; ചെമ്പ - chempa, Mal.; செம்பை - shembai, Tam.). San. from (ráj, san. to shine). Mahr. from hindostany. Can. from (kari, can. black + jínangi, can. the plant, æschynomene aspera, linn.). Tam. from (shem, tam. red), from flowers [parangyvail]. San. also (jayanti), meaning conquering; (vaijayanta), meaning indra's banner; (nádéyí), meaning river-born. Hind. also (jet); (jaintí) from sanscrit. Dec. also (ravásing) from (shewú). Can. also (arasinajínangi), meaning saffron + pith plant. Tel. also (sómanti); (dzalugu). Mal. also (kitannu), meaning a ditch; (nellittáli), meaning phyllanthus + creeper. Tam. also (karuñjembai), meaning blackness + the plant. Title otherwise Bastard sensitive plant, Chempay, Danchy, Jayanty, Sesban, Sominta. Botanically Sesbania [sesban] ægyptiaca, pers., leguminosæ [vricsham, 48]. Alias Æschynomene indica, sesban; Coronilla sesban; Dolichos æschynomene, sesban. Small tree, unarmed; leaves abruptly pinnate, about three times longer than broad; leaflets ten to eighteen pairs, oblong-linear, obtuse, slightly mucronate; racemes axillary, lax, pendulous, about the length of the leaves, three to twelve-flowered; legumes linear, slender, much contracted between the seeds, twisting when ripe; calyx five-cleft; corolla papilionaceous; keel obtuse; petals distinct at the base; flowers yellow, flowering nearly all year; rapid growing; common near cultivation. Seeds applied in ointment to eruptions, also stimulant emmenagogues; leaves as a cataplasam to promote suppuration. Leaves and branches lopped for cattle [maud] fodder. Suitable for hedges [vaily]; fibre [naur] from bark; makes the best charcoal [adoopp kary] for gunpowder. Wood white, extremely soft; not durable; used to boil jaggery [q.v.]; furnishes poles as a substitute for bamboo [q.v.]. There are two varieties, one which has leaflets fifteen to eighteen pairs, flowers orange, and vexillum purple on the outside; and the other, leaflet ten to twelve pairs, vexillum yellow speckled, with black dots and lines.——*Foreign sesban* (சீமைச்செம்பை - shímaiççembai, Tam.). Same as Parangy vail.——*Prickly sesban* (जयन्ती - jayantí, San.; कानशेवरी - kánashévarí, Mahr.; ಮುಳ್ಳುಜೀನಂಗಿ - mullujínangi, Can.; ఎర్రజీలుగ - errajíluga, Tel.; കിടന്നു - kitannu, Mal.; முட்செம்பை - mudchembai, Tam.). Title from prickles. San. from (jí, san. to conquer). Mahr. means wild sesban. Can. from (mullu, can. thorn + jínangi, can. pith plant). Tel. from (erra, tel. red + jíluga, tel. pith plant, æschynomene aspera, linn.). Tam. from (mul, tam. thorn + shembai, tam. sesbania ægyptiaca, pers.). Tam. also (nírççembai), meaning water + sesbania ægyptiaca, pers. Title otherwise Red solah. Botanically Sesbania [sesban] aculeata, pers., leguminosæ [vricsham, 48]. Alias Æschynomene bispinosa, cannabina, sesban, spinulosa; Coronilla aculeata. Herbaceous, erect; stem and petioles sprinkled with small cartilaginous points; leaflets twenty to forty pair, linear, obtuse, mucronate; racemes peduncled, erect, lax, about half the length of the leaves; legumes erect, nearly terete, sharp-pointed; flowers rather large, on slender pedicels, yellow, purple-dotted; flowering in august and september. A hardy plant, grows from 6–10 feet high. Cultivated on account of fibres [naur] of the bark; they are from 6–7 feet long, but unless cut at a very early period they are coarser and more harsh than hemp [kinnab]; made into ropes and fishing nets [valay]. There are varieties, cannabina and paludosa.——

West indian sesban (अगस्ति - agasti, San. and Mahr, ; اگتی - agtí, Hind. ; اگتی کا جھاڑ - agtíkájhár, Dec. ; ಅಗಸೆ - agase, Can. and Too. ; అవిశ - avisi, Tel. ; അകത്തി - akatti, Mal. ; කතුරුමුරුංගා - katurumurungá, Singh. ; அகத்தி - agatti, Tam.). Title from habitat. San. from (agastya, san. the sage so called). Hind. from sanscrit. Dec. from sanscrit. Tel. from sanscrit. Singh. from (katuru, singh. venom curer + murungá, singh. moringa pterygosperma, gærtn.). Tam. from sanscrit [alsee]. San. also (vaka), meaning growing crookedly, from flowers; (vranári), meaning enemy of sores; (st'húlapushpa), meaning large-flowered. Hind. also (basna), referring to red variety. Can. also (agache). Tel. also (agisi); (aviso); (uma); (tella-avisi), meaning white + the tree; (erraavisi), meaning red + the tree. Tam. also (açças), meaning timidity, constantly shaking. Title otherwise Agastya's plant, Agatty, Buko, Great-flowered agatty, Tree bean, West indian pea tree. Botanically Sesbania [sesban] grandiflora, pers., leguminosæ [vricsham, 48]. Alias Æschynomene coccinea, grandiflora; Agati grandiflora; Coronilla grandiflora; Dolichos arboreus. Agati from tamul. Tree, 30-35 feet; long bare stems; leaves abruptly pinnated, leaflets numerous; calyx campanulate, slightly two-lipped; corolla papilionaceous, vexillum oval, oblong, keel large, falcate, with petals free at the base and apex; racemes axillary, two to four-flowered; flowers large, pendulous, scarlet or white; legumes pendulous, very long, many-seeded, contracted between the seeds; short-lived, soft-wooded tree, cultivated near villages; flowers march to april. The bark is much fissured longitudinally, of a greyish-brown externally, the dry suber nearly equal to the living portion in thickness; in the fissures may be seen numerous small tears of a garnet-red when fresh, but soon becoming almost black by exposure to the air; the outer portion of the living bark is of a red color, and is loaded with the same kind of gum [gond] in a soft state. The bark is bitter and is used in medicine as a tonic; an infusion of the leaves is a useful cathartic; the natives put the juice of the leaves in the nostrils in bad fevers on the day of the paroxysm; the juice of the flowers is also squeezed into the eyes for expelling dimness of vision. Leaves and tender pods are eaten in curries [q.v.]; cattle [maud] are partial to them. Plant much employed on account of rapid growth for training the betel [q.v.] plant; inner bark gives a fibre [naur]; gum [gond] dark-colored, yielded scantily, resembling kino [q.v.]; used as avenue [shaulay] tree. Wood white, soft, not durable; grown as a substitute for bamboo [q.v.]; useless except for fuel. The red variety is coccinea.——*Wild sesban* (అడవిఅవిశ - adaviavishi, Tel.). Same as Purple mountain ebony and Small-flowered mountain ebony.

SEVEN PAGODAS (सप्तक्षेत्र - saptakshétra, *San.*; மாவலிப் புரம் - mávalippuram, *Tam.*). Title from the ruined pagodas there found. Sanscrit also (mahábalipura), meaning mahabaly's town. Indigenous name is Mullayore, meaning mulla's town; see below. Appears also as Mahbalipooram, Mauvellipore, Maumalaipooram, and Mullapoory cshetram. Village; Chingleput dist., Chingleput tal.; pop. 1,076; acres 2,245; lat. 12° 37′; long. 80° 14′; from Chingleput E.S.E. 15 miles; from Madras S. 33 miles; from Sydapett S. 28 miles; from the sea W. ½ mile. Midway between Sadras and Covelong and between the East coast canal [q.v.] and the sea. Reached by the Canal. Light on a rock; lat. 12° 36′ 52·36″; long. 80° 14′ 01·69″; red; fixed; 17 miles range; visible from all directions seaward; small grey turret; to warn vessels off the Tirporore reef. According to Bramins, in the Tretayoog [q.v.] it was the city of a great king, which was submerged by the sea, six temples being overwhelmed. Mahbaly [q.v.] the king by penance and austerity had obtained possession of the whole universe. Becoming elated by his greatness he omitted to perform the customary religious ceremonies to the gods [deva]. Vishnoo [q.v.] becoming incarnate [avatar] in the person of a dwarf [vaumanan], and in this form appearing before Mahbaly, asked as a boon as much of his possessions as he could pace in three steps [trivicraman]. This the king granted, upon which the dwarf grew larger, and continued to expand till he filled the whole universe, thus depriving the monarch of all his possessions except hell [pautaulam], which he was allowed to keep. This legend probably represents the victory of Hindoos of the Veishnava [q.v.] sect over some powerful indigenous ruler. Another Sanscrit legend connected with the place is as follows. There were two raucshasans [q.v.] named Chatoorangan and Balarangan, who lived in Chatoorangaputnam or Sadras [q.v.]. These cleared the forest from Mylapore to Cuddalore. Mahbaly chuckravurty is said to have been their descendant. According to Stalapooraunam [q.v.] one Mullaishan ruled in early times. He mocked a Bramin, and was metamorphosed into an alligator [mugger]. Mulla is a titular name of an aboriginal Teloogoo people. In the Kaliyoog [q.v.] Singama naidoo, zemindar [q.v.] of the Velgotwaur [velgoty] family, ruled here. In that time, during a famine, many artificers resorted hither and wrought on the mountain a variety of works during two or three years. Singama naidoo built a palace on the hill, of which a few fragments only now remain. The Jeinas [q.v.] had an ascendancy in this neighbourhood. Seventy-two headmen among them rode in palankeens [q.v.]. A mud-shower descended and destroyed their towns, and the sea overflowed them. From Mylapore to Cuddalore not one stone upon another now remains of their habitations. It is evident on the whole that this was an old settlement of the Pullavas [q.v.]. Then the Bramins settled in it and made a great town, moving later to Mylapore. The remains here are probably the earliest known examples of the Dravidian style of architecture [maunasauram, staupatyam] of Southern india. The sculptures were the work of artists from the Northern provinces. The granite [caroom cull] remains consist of the following:—the nine raths [q.v.] or isolated temples cut out of a single boulder; the thirteen caves excavated out of the rocks at Mauvellipore and two more at Saulvancooppam; the great bas-relief of Arjoonan's [q.v.] penance; several structural temples, the most important of which is the shore temple, which has long served as a landmark for shipping.—"*a*" Of the nine raths the most southern is called that of Dharma rajan [q.v.], the next that of Bheeman [q.v.], the third that of Arjoonan, and the fourth that of Drowpady [q.v.]. These four are situated in one line, extending about 160 feet north and south. The fifth is called after the twins Sahadevan and Nacoolan. The sixth, the Ganesh [q.v.] rath, is some little distance from the others and near it are the remaining three, in an incomplete condition. The most nearly finished of all the nine is the Ganesh rath. It measures 19 feet by 11 feet 3 inches, and its height is 28 feet. It is in three stories and the details are elegant. The most northerly of the large group of raths is that of Drowpady. It is square in plan measuring only 11 feet each way, and with a curvilinear roof rising to about 18 feet in height. The Bheema rath measures 48 feet in length by 25 in breadth, and is about 26 feet in height. The roof of this rath is cracked right through, owing to the insufficient strength of the pillars that support it. The Arjoonan and Dharma rajan raths are identical in general appearance, the only difference being that the first is much smaller than the other. Arjoonan's rath is a square, measuring 11 feet 6 inches each way, and its height is about 20 feet. Dharma rajan's rath measures 26 feet 9 inches by 28 feet 8 inches, and its height is rather more than 35 feet. In general appearance it is a building of four stories arranged in a pyramidal form. The rath named after Sahadevan and Nacoolan measures 18 feet by 11 feet, the height being 16 feet. The remaining three raths are in an extremely unfinished condition.—"*b*" The rock-caves are thirteen in number. One of the most striking peculiarities of these caves is the extreme tenuity of their pillars and generally of their architectural details, when compared with those of other groups of caves. This probably arises from the excavators having literally copied the forms they found employed in wooden structures. As these caves are scattered promiscuously on both sides of a low ridge of hills, it is difficult to classify them clearly. The following are the most important in the order in which they occur, beginning at the southern end of the ridge, nearly opposite the great group of raths. Dharma rajan's mantapam [q.v.] is a cave measuring 17 feet by 12½ with four pillars; Yamapoory of Mahishamardiny [q.v.] mantapam is a fine cave 33½ feet by 15 feet; on the south wall is a large bas-relief of Vishnoo [q.v.] as Narayanau [q.v.], lying on the huge serpent Anantan [q.v.], rolled up so as to form a couch, and bending her many heads, like an umbrella over the divinity; in the same hall is also an image of Shiva [q.v.] together with Parvaty [q.v.], and an infant between them and an elaborate group representing Cauly [q.v.] with many arms riding on a lion [simham] and surrounded by many attendants, as pursuing a giant with the head of an ox; at the other end of the hall is a finely sculptured tablet representing the combat between Mahishausooran [q.v.] and Doorga [q.v.]; near this is a small Shiva temple with bas-reliefs of Shiva [q.v.] and his son Soobramanyan [q.v.]. The temple dedicated to the boar [varauham] avatar [q.v.] of Vishnoo is still used for worship. Krishna's mantapam measures 48 feet by 23; here he is found in the form of Krishnan [q.v.], holding with one of his arms the mountain Govardhanam over a number of Gopies [q.v.], Gopaular [q.v.] and cows [go], to protect them from a great thunderstorm, caused by Indran [q.v.], because the shepherds and shepherdesses had, agreeably to the instruction of Krishnan, ceased to worship him. The mantapam [q.v.] of the Puncha pandavas [q.v.] is a large but unfinished cave. A Veishnava cave contains, amongst othersubjects, a representation of Vishnoo's varauha avatar, viz., a large human figure with the head of a boar [varauham] and with Lutchmy [q.v.] as a natural woman on his lap; there is also here one of Shree lutchmy seated on a lotus [nelumbo] flower with elephants [q.v.] pouring water over her. Three miles north of the last of these thirteen caves are the two caves of Saulvancooppam. One is called the Atichundeshwaran mantapam. The other is a small cell cut out of a rock, with nine simham [q.v.] or yauly [q.v.] heads round the front of it.—"*c*" The great bas-relief of Arjoonan's penance is a most remarkable object. It represents him doing penance, standing on one leg and having his hands folded over his head, together with that of Shiva, who with many attendants appears to the ascetic [kirautarjooneeyam]. It is carved on two masses of granite [caroomcull] rock, measuring about 90 feet long by 30 feet average height. Between the two rocks was formerly the serpent statue of the Nauga rajah [q.v.], the head of which overshadowed by a seven-hooded serpent has fallen to the ground. The surface of the rock is covered with figures of gods, men, and animals, in basso-relievo, representing scenes taken from the Mahabhaurat [q.v.]. The name by which the whole is now called is taken from one of the

most spirited groups of figures, supposed to represent Arjoonan praying to Krishnan, after a long fast.—"*d*" The Aulyam or Shore temple is a singular monument, and, if not the most early, is one of the best examples of structural primitive Dravidian architecture [maunasauram, staupatyam]. Standing on the edge of the sea it has suffered much from the action of the wind and salt-water. Part of the building lies ruined in the surf, and a solitary pillar is left erect in the midst of fallen blocks of stone. This temple was dedicated to both Shiva and Vishnoo. This and the usual stone pillar in front of such temples lying in the sea, as well as fragments of images, large quantities of stone and broken bricks lying about, some partially buried in the sea, plainly show that at one time buildings existed to the eastward, but have been overwhelmed by the sea. By tradition, the whole coast from Mylapore to Mauvellipore was overflowed by the sea, and many towns were destroyed. The monolith temples consist of chambers cut out of the solid rock, and with figures and inscriptions in ancient character; only one of them is now on the land. Rocks partly covered at high water are carved with the figures of tigers [pooly]. See vol. I (20).

SEWIYAUN (سيويان - sewiyán, *Hind.*). Vermicelli, which Mahomedans prepare between hands instead of a press.

SHAB (شب - shab, *Hind.*). Night [leil, rautry].——*Shab-charaugh* (माणिक्य - mánikya, San.; عقيق احمر - akíkiahmar, Ar.; شبچراغ - shabcharágh, Pers. and Hind.; మాణిక్యము - mánikyamu, Tel.; മാണിക്കം - mánikkam, Mal.; மாணிக்கம் - mánikkam, Tam.). San. from (manika, san. name of a town). Ar. from (akík, ar. gem + ahmar, ar. red). Pers. from (shab, pers. night + charágh, pers. lamp). Hind. from persian. Tel., Mal. and Tam. from sanscrit. Carbuncle. Precious stone of the ruby [laul] kind [ratnam]. The *λιθία διαφανέα* found according to the Periplus in Ceylon and exported in every variety from Mouziris [cranganore] and Nelkunda [cullada] were probably carbuncles.——*Shab e baraut* (شب برات - shabibarát, Hind.). From (above + barát, record); from belief that actions and fortunes of men for coming year are then registered. Compare hindoo Chittray powrnamy. Night of fourteenth Shabaun [maheena]. Called also Leilat ool moobaurak, or blessed night. Sufficiently described at vol. I (97).——*Shabgasht* (شب گشت - shabgasht, Hind.). From (above + gasht, pers. perambulation). Nocturnal perambulation. On the tenth khun [q.v.] of the Moharram [q.v.] all the alams [q.v.] and taboots [q.v.] are carried on men's shoulders, attended by fakeers [q.v.]; and a perambulation is made very slowly in great pomp and state. The lower orders do this in the evening, and the higher at midnight. The streets are illuminated and every kind of sport takes place.

SHABDAM (शब्द - shabda, *San.*; சத்தம் - shattam, *Tam.*). Sound; said in hindoo philosophy to be eternal and universal. Declinable word. Oral evidence or verbal authority; one of the four processes according to nyauyam [q.v.], by which the mind arrives at true and accurate knowledge; the other three being pratyacsham or perception by the senses, anoomaunam or inference, and oopamaunam or comparison [pramaunam].——*Shabdaurta calpataroo* (शब्दार्थकल्पतरु - shabdárt'hakalpataru, San.). From (above + art'ha, san. meaning + kalpataru, san. all-giving tree of paradise). A dictionary of Sanscrit with explanations in Teloogoo by Maumidy veucayya, author of Andhra deepacam. The words are arranged first under finals. Next according to syllables; words of two syllables apart, those of three syllables apart. Finally each of these sub-divisions is alphabetically arranged according to initials. Thus in looking for Sa-ma-yah, reader first turns to Y, then to the triliteral class under Y, and then to the initial S in that class [acaraudy, nigantoo].

SHAC (शक् - shak, *San.*). To be able, to know.——*Saca* (शक - shaka, San.). See sep. title.——*Shacoonam* (शकुन - shakuna, San.; சகுனம் - shagunam, Tam.). From (shak, san. to know). Omen. The following coming or being carried in front of a person starting on a journey, or as soon as he has left his house or place of business with some object in view, are propitious omens:—a married woman, a virgin, a dancing girl, two bramins, music, flower, fruit, fish, flag, umbrella, sugar-cane, boiled-rice, milk, flesh, fire, toddy, an elephant, a horse, cows, cloth, a king, pearl, consecrated rice, parched rice-corn, a dead body, a regiment or troop, an indian bangle seller, and two pitchers full of water. The following passing by or coming in front of a person as he is going out on business or otherwise, or happening suddenly, are unlucky omens:—a widow, a bramin, three comaties, two shoodras, a tiger, a snake, a bundle of firewood on one's head, a sickle, a pick-axe, a crowbar, a pot of oil, a new pot, a man in disguise, butter-milk, curdled milk, one sneezing stumbling and falling down, dust caused by a fierce blast of wind, one with dishevelled hair, unseasonable rain, thunderbolt, a person with a newly-shaven head and mourning. If a person asks another, while he is going out or starting on a journey or on business, not to go, to eat, or to wait saying 'I shall also go with you,' 'where are you going?' and so forth; also if one loses on the way what he had in his waist, and if the person still continues his journey; he will meet with some calamity and will not gain his desired object. Under such circumstances the native often retraces his steps to the place whence he started, waits for some time, and then resumes his journey. There are many omens regarding beasts, birds and other animals. A deer [mrigam], a musk-rat [q.v.] or a blind mouse [shoondely], a guana [oodoomoo], a skylark [vaunambaudy], a quail [batair], a kite [chillam], a falcon [pattry], a large owl [ooloocam], a mongoose [q.v.], a squirrel [anil], and a dog [nye], passing by the side of one's left hand, forbode something propitious; a crow [caurvam], a narayanan bird [blue heron], a jack-daw, a fox [lomree], a parrot [totah], a bloodsucker [q.v.], a paddy bird [q.v.], a peacock or pea-hen [mayil], a cow [pashoo], a buffalo [khoolgah], and a civet-cat [poonoogoo poonay], passing by the side of one's right hand, are good omens; but a snake [paumb], a cat [poonay], and a horse [ghorah] should not pass cross-wise. The natives consider the sitting of an owl [ooloocam] on their house-top, or its perching on the bough of a tree either in or close to their house, as inauspicious; one screeching of an owl forebodes certain death, two success in undertakings, three that a girl will be added to the family by marriage, four that there will be a disturbance in a short time, five that the person hearing it will have to travel, six the advent of guests, seven mental distress, eight sudden death, and nine a highly favorable result. The chirping of a lizard [chipkalee] is a great point. If a lizard chirps once when a native is meditating on any undertaking, it denotes thorough failure; if twice consecutively, it signifies success; if thrice, or five or seven times, it signifies, sedition; if six, nine, ten or eighteen times, it indicates gain of wealth; if eight or twelve times, it predicts death; if eleven or fourteen times, it foretells success; if thirteen times, it shows that the person who heard it will leave his country to go elsewhere. The Pandoos, in the Mahabhaurat [q.v.] heard a lizard chirp thirteen times consecutively and had to leave Hastinapooram. The chirping of a lizard fifteen times consecutively denotes that the person who heard it will be kept in confinement. Seetay [q.v.], the wife of Rama [q.v.], having heard a lizard chirp fifteen times was carried away by Ravanan [q.v.]. The chirping of a lizard sixteen times denotes success. Hanooman [q.v.] after having heard a lizard chirp sixteen times, crossed the sea and liberated Seetay. If a lizard chirps seventeen or nineteen times, it signifies success. Rama after having heard a lizard chirp seventeen times, built Rama's bridge [adam's bridge], and attacked Ravanan. On his having heard a lizard chirp nineteen times he succeeded in completely vanquishing Ravanan. If a lizard chirps twenty times, it foretells a certain success. Shiva [q.v.], having heard the same, attacked and overpowdered the asoorans of Tripooram [q.v.]. The fall of a lizard is another point. A lizard falling on one's head purports sedition and dispute; its falling on the face forebodes the visit of relatives; its falling on the upper lip implies wasting of wealth; its falling on the lower lip signifies gain of wealth; its falling on the right ear denotes longevity; its falling on the left ear indicates profit in trade; its falling on the eyes signifies entry into a newly-built house; its falling on the chin foretells punishment from the king; its falling on the mouth indicates fear; its falling on the neck forebodes the vanquishing of an enemy; its falling on the right arm signifies comfort and peace of mind; its falling on the left arm signifies enjoyment with the other sex; its falling on the right wrist forebodes grief and sorrow; its falling on the left wrist foreshows renown; its falling on the breast denotes gain of wealth; its falling on both the sides indicates considerable gain; its falling on the thighs forebodes the death or the killing of a father; its falling on the knees or the ankle signifies prosperity; its falling on the heels denotes travelling; its falling on the bosom foreshows that something serious will happen; its falling on the knot of hair on the head foreshows fear of an enemy. There is a Tamul proverb:—விறகு கட்டுக்காரனுக்கு நாரை வலம் ஆனால் ஒரு பணம் விற்கிறது ஒன்றேகாற்பணம் விற்கும்—"if a "crane [paddy bird] cross a firewood man from left to right "what he sells ordinarily for a fanam will fetch a fanam [q.v.] "and a quarter." The following is a Hindostany proverb:— كيا مكهى نے چهينك ديا—"did a fly sneeze?" If one gives over anything, for natives will not begin anything if one sneeze, but will wait a while. For omens of trees and flowers see Phool. For omens of twilight see Sundhyay. For omens of the seasons see Caur, Caurtey, Mausam and Mazhay.——*Shacoontalay* (शकुन्तला - shakuntalá, San.). From (shakunta, san. bird + lá, san. to take); as fostered by birds. From the story that she was protected by birds till found by Canwan who brought her up. Wife of Dooshyantan and mother of Bharatan [q.v.]. Drama by Calidass [q.v.].——*Shacran* (शक्र - shakra, San.). From (shak, san. to be powerful). Indran; also Shiva [q.v.].——*Shactibhactan* (शक्तिभक्त - shaktibhakta, San.). From (shakti, san. feminine energy personified + bhakta, san. adorer). Worshipper of the Shacty [q.v.].——*Shacty* (शक्ति - shakti, San.; சத்தி - shatti, Tam.). From (shak, san. to be able).—"*a*" Power, energy, of which three and five are enumerated. The three powers are:—Itchah shacty, the power of affection which is friendly to life; Nyauna shacty, the power of the knowledge of good and evil; Kriyah shacty, the power of creating worlds. The five powers are:—Chit shacty, knowledge; Parah shacty, vital operation; Itchah shacty, the combination of the

five elements; Nyauna shacty, the power of perception; Kriyah shacty, skill or power to perform a thing [matam].—"*b*" So the power or energy of a deity, personified as a female and considered as his wife. Parvaty [q.v.] is the shacty of Shiva [q.v.], Lutchmy [q.v.] of Vishnoo [q.v.], Saraswaty [q.v.] of Bramha [q.v.]. The two former are universally recognized, while Saraswaty enjoys much more homage than her husband Bramha. The female forms of Roodran [q.v.], white and black, are termed in the Vishnoo pooraunam [q.v.], shacties. A vast variety of inferior female beings of malevolent character and formidable aspect receive the worship of the multitude. It is needless to say that the Shacty or feminine energy system has pervaded all atheistic forms. The Grecian mysteries were the secret rites of this system, and connected with human sacrifices. Names of the feminine energy, corresponding with shacties of the Hindoos, were Juno, Venus, Ceres, Hecate, Proserpine, Artemis. The worship in the great temple at Ephesus was of this character. Among the Latins the system had but a limited range. The rites however of the Bona dea and the worship of Vesta were of this description. Here among the Hindoos, the worship of the female principle has some reflection in the later Vedams [q.v.], in which the will or purpose to create the universe is represented as originating from the creator, and co-existent with him as his bride and part of himself. The Sauma vedam [q.v.], speaking of the divine cause of creation, says, "he felt "not delight, being alone; he wished another, and instantly "became such; he caused his own self to fall in twain, and thus "became husband and wife; he approached her, and thus were "human beings produced." This first manifestation of divine power is termed Itchah roopam, personified desire; and the creator is designated as Swetchah mayan, un ited with his own will. In the Saunkhyam [q.v.] philosophy, Pracrity [q.v.] or Moolapracrity is defined to be a female entity of eternal existence and independent origin, distinct from the supreme spirit [autmam, poorsham], productive though no production, and the plastic origin of all things, including even the gods; hence she has come to be regarded as the mother of gods and men. In the Vedauntam [q.v.] philosophy, in which all created things are held to be illusory, the Shacty or active will of the deity is designated as Mauyay [q.v.] or illusion. In all the Pooraunams [q.v.] this pracrity or mauyay bears a prominent part. In the Bramha veivartam pooraunam, one section, the Pracrity khandam, is devoted to the subject, and the legends relating to the principal modifications of the female principle are there narrated. The adoration took its most material form in consequence of the publication of the Tantrams [q.v.], a class of works in which the female energy is worshipped through what is there styled the maternal organ, regarded as a symbol of self-existent and productive nature. The adherents of the Tantram ritual are termed Shauctas or worshippers of the energy. They do not, at least in Southern india, form themselves into a separate class or sect, nor do they generally wear any characteristic mark. Their whole doctrinal theory may be defined thus briefly; the extinction of desire is the great aim of hindooism; the other sects seek it by the mortification of the passions, the shauctas by their gratification. There are two modern divisions of the Shauctas; first, the Dacshinacharries [q.v.], right-hand worshippers, or Bhactas, devoted ones, who worship the goddess Parvaty [q.v.] or Doorga [q.v.] openly, and without impure practices; secondly, the Vaumacharries [q.v.], left-hand worshippers, or Caulas, ancestral ones, who perform their rites in secret. The sacred books appealed to by the first are the Nigamam [q.v.]; by the second the Augamam [q.v.]. See vol. I (76), (79), (86), (108). For the male energy in nature see Paty.——*Shauctan* (शाक्त - shákta, San.). Worshipper of the Shacty.——*Shaukiny* (शाकिनी - shákiní, San.). From (shak, san. to have power). Female demons attendant on Cauly [q.v.].——*Shunk* (शंकु - shanku, San.). From (shak, san. to know). Distinguish from chunk [q.v.]. A gnomon. For astronomy this is a straight rod, pole or pillar of stone, as seen in front of every pagoda [q.v.], placed perpendicularly on a horizontal plane. The astronomers trace a meridional line [raikhay] by describing concentric circles from the point on which the centre of the pillar rests on the ground. Whatever be its height, the Shunk is divided into 12 ungoolams or digits, and each ungoolam [q.v.] is sub-divided into 60 vyangoolams [q.v.]. It thus serves as a scale for measuring the Chauyay [q.v.], the length of the meridional shadow; and a rod is accordingly made of the same dimensions and divisions for that purpose. In marking alternately the points where the top of the shadow cuts any of the concentric circles, native astronomers choose the time of 5, 6 and 7 dandams [caulam, 6], or Indian hours of the Moortam [q.v.] account 60 to a day, before and after noon [madhyaunam, ooroomam]. This being done the arcs [chaupam] are bisected, the meridian line [raikhay] is traced, and the four Dics [q.v.] or cardinal points, with the Ashtadics [q.v.] or the four intermediate divisions [tisay], are easily determined. By help of problems if the altitude [avanataumsham] of the pole [dhroovam] be given, the Ravy sauyanam [q.v.], or sun's longitude reckoned from the equinoctial point [craunty pautam, maishauyanam, vishoo] may be found from day to day, by means of the Madhyama chauyay [q.v.] or meridian shadow. The length of the shadow being known the sun's zenith distance [nataumsham] may be found. The meridian zenith distance [oordhwanataumsham], and the latitude [acsham] of the place being known, the sun's declination [craunty] may be found. The obliquity [paramaupamacramam] of the ecliptic [crauntymundalam] being always taken by native astronomers as 24°, and the sun's declination being given, the hypothenuse [carnam] or arc of the ecliptic between the sun [sooryan] and equinoctial points [craunty pautam, vishoo], called the Ravy sauyanam, is easily found [jyotisham, sauyanam].

SHACOOR (شکور - shakúr, *Hind.*). From (shakara, ar. to thank). Grateful. An epithet of God [allah]. Mahomedan alam; as Abd oosh shacoor, slave of god.

SHADAY (சடை - shadai, *Tam.*). Matted hair [jatay].——*Shadaimoody* (சடைமுடி - shadaimudi, Tam.). From (jatá, san. matted hair + mudi, tam. head). Shiva [q.v.].——*Shadaiyakkan* (சடையக்கன் - sadaiyakkan, Tam.). From (shadaiyan, tam. a man with a matted hair). The same as Dalavoy saitoopaty [q.v.].

SHAFEE (شفیع - shafí, *Ar.*). From (shafia, ar. to intercede). Intercessor. Title of Mahomet. Common alam, as Mahomed shafee, double alam. Feminine form, Shafia, as Shafia begum, alam + alaumat [ism].

SHAH (شاہ - sháh, *Pers.*). A king. Title assumed by saints [walee] and peers [q.v.] who founded the system of making mooreeds [q.v.], as Shah madaur. Syed alaumat out of respect, especially of masheikh [q.v.] classes, as Shah hoossain, alaumat + alam. Also part of lacab, as Shahsawaur, a brave cavalier [ism]. Suffix in compound as Padshah, throne + master.——*Shah badee ood deen* (شاہ بدیع الدین - sháhbadíuddín, Hind.). A celebrated walee [q.v.] commonly known as Zinda shah madaur or Madaur, the living prince, supposed to be still living [chiranjeevy]. Died on 17th of Jamaudy ool owval [maheena] which is day of his Oors [q.v.].——*Shah boolbool* (بلبل - bulbul, Ar.; هزارداستان - hazárdástán, Pers.; شاہ بلبل - sháhbulbul, Hind. and Dec.; తోకపికిలిపిట్ట - tókapikilipitta, Tel.; இராப்பாடிக்குருவி - iráppádikkuruvi, Tam.). Pers. from (hazár, pers. thousand + dástán, pers. notes) [madras boolbool]. Hind. means royal boolbool. Tel. means tailed boolbool. Tam. from (irá, tam. night + pádu, tam. to sing + kuruvi, tam. small bird). Ar. also (andalíb). Dec. also (husaíníbulbul), meaning beautiful bird; (sultáníbulbul), meaning royal bird. Tam. also (válgondalátti), meaning tail + crest; from long tail. The Paradise flycatcher. Tchitrea paradisi, myiagrinæ, muscicapidæ [macsha grauhy], dentirostres, insessores [pacshy, 20], of naturalists [jantoo]. Alias Muscipeta indica, paradisi. For Leucocerca albofrontata of this sub-family, see Mynautty.——*Shahbunder* (شاہ بندر - sháhbandar, Hind.). From (above + bandar, ar. seaport). Harbourmaster, custom-house agent [bunder].——*Shah in shah* (شاهنشاه - sháhinsháh, Hind.). King of kings. Imperial title.——*Shahnaye* (شہنائی - sháhnáí, Pers.). From (above + náí, pers. tube). Means chief instrument. Mahomedan clarionet [naugaswaram], with leaf mouth-piece [sangeetam].——*Shahrokh* (شاہرخ - sháhrokh, Hind.). From (above + rokh, pers. face). Having a royal countenance. Mahomedan servant's name [ism].——*Shahtra* (شاهتره - sháhtra, Pers.). From (above + tara, pers. garden herb). Same as Pitpapra.——*Shahy* (شاهی - sháhí, Hind.). Royal. Shahy peisa are irregular shaped pieces of thick copper, weighing about 150 grains, still numerous in the Hyderabad country. For Mahomedan dynasties so called see sep. title.——*Shahzauda* (شاہ زادہ - sháhzádah, Hind.). From (above + zádah, pers. born). Prince [rajcoomar].

SHAHAD (मधु - madhu, *San.*; मध - madha, *Mahr.*; عسل - asal, *Ar.*; انگبین - angabín, *Pers.*; شہد - shahad, *Hind.*; مدو - madu, *Malay*; ಜೇನು - jénu, *Can.*; తేనె - téne, *Tel.*; തേൻ - tén, *Mal.*; මීපැනි - mípani, *Singh.*; தேன் - tén, *Tam.*). San. means sweetness. Singh. from (mí, singh. honey + pani, singh. juice). Tam. from (tém, tam. sweetness). Honey. Mel of chemists. Vegetable product, and occurs chiefly in the nectaries of various flowers. The bee collects it and brings it to the hive to store it up for the food of the community. Honey is here nearly always the produce of wild bees, brought from the jungles. Its quality depends on the nature of plants from which the bees extract it. It differs much in color and flavor in different tracts of country, also in flavor. That colored darkish green is unwholesome. In Cuddapah there is a kind of honey, which in place of being liquid in the comb, is hard and candied, and of the form of cells, and drops out like sugar plums. Its peculiar character is ascribed to the bees, which are small, feeding on flowers and sweetish bitter fruit of the Mimusops hexandra, roxb. [monkey-face paulay]. Honey gathered from Strobilanthes species and Mesua ferrea [naugachampak] is specially good. Honey from the flower of the prickly-pear [q.v.] is hot. Medicinally honey is emollient and slightly laxative; used in gargles; native use, detergent and nutritive. Pharm. preparations are clarified honey, mel depuratum; simple ointment, unguentum simplex; and ceromel. For the honey-bee see Tainee; for wax see Mom.

SHAHAR (شہر - shahar, *Hind.*). From persian. A large town [cusbah, pooram]. Shahargasht is going in procession round a

town, a very favorite ceremony with natives on great occasions [oorvalam, pradacshinam].

SHAHAUB (شهاب - shaháb, *Ar.*). Meteor [nacshatram, 10]. Part of lacab; as Shahaub ood deen, meteor of the faith [ism].

SHAHAUDAT (شهادة - shahádat, *Hind.*). From (shahida, ar. to witness). Martyrdom.——*Shahaudat kah roz* (شهادت کا روز - shahádatkároz, Hind.). From (above + roz, pers. day). Day of martyrdom. The tenth day of Moharram [q.v.]. This is the day in which the alams [q.v.] are to be taken out to some place near water, representing the plain of Carbalah near the Euphrates, and to be there thrown into the water to represent loss of the military array in the river. Practically the people generally bring back and keep till next year.——*Shahidy* (شاهدی - sháhidí, Hind.). From (shahida, ar. to testify). Evidence, witness [pramaunam, sautchy].

SHAH BAUSH (شاد باش - shádbásh, *Hind.*). From (shád, pers. glad + bash, pers. to be); to be victorious. Bravo, well done!

SHAHY (شاهی - sháhí, *Hind.*). Royal [shah]. So title of dynasty [raj], specially the five offshoots of the Bahmany [q.v.].——*Adil shahy* (عادل شاهی - ádilsháhí, Hind.). After adil shah, the founder. Mussalman dynasty, first offshoot of Bahmany, at Beejapore from 1489 till 1672. See vol. I (148), foot-note (4); II, 251.——*Ahmed shahy* (احمد شاهی - ahmadsháhí, Hind.). After ahmed shah, the founder. Same as Imaud shahy. Branch of Bahmany dynasty in Berar. See vol. I (148), foot-note (3); II, 252.——*Bareed shahy* (برید شاهی - barídsháhí, Hind.). After bareed shah, the founder. Branch of Bahmany dynasty, at Beedar. See vol. I (148); foot-note (7); II, 252.——*Cootb shahy* (قطب شاهی - kutbsháhí, Hind.). After cootb shah, the founder. Branch of Bahmany dynasty, at Golcondah. See vol. I (148), foot-note (6); II, 252.——*Imaud shahy* (عماد شاهی - imádsháhí, Hind.). After imaud shah or ahmed shah, the founder. Same as Ahmed shahy. Branch of Bahmany dynasty in Berar.——*Nizam shahy* (نظام شاهی - nizámsháhí, Hind.). After nizam shah, the founder. Branch of Bahmany dynasty at Ahmednugger. See vol. I (148), foot-note (5); II, 252.

SHALANGAY (சலங்கை - shalangai, *Tam.*). From tinkling sound. Bells worn by dancers on ankles [goongra, nagay].

SHALGHAM (شلجم - shaljam, *Ar.*; شلغم - shalgham, *Pers.*, *Hind.* and *Dec.*; సర్సావాలు - sarasáválu, *Tel.*). Title from deccany. Tel. from (sarshapa, san. mustard + áválu, tel. mustard brassica juncea, h. f. and t.). Greek γογγύλη ἥμερος and ῥάπυς. Title otherwise Turnip. Botanically Brassica [sarshapam] campestris [sarsoon], linn., sub.-sp. rapa, linn., cruciferæ [vricsham, 10]. Alias Brassica rapa. Root tuberous; lower leaves hispid, not glaucous, upper glabrous and glaucous; petals deciduous. Acclimatised. Medicinally cooling, and gently aperient. The root and tops eaten as vegetables [keeray]; bramins however dislike it from a suspicion of its relation to animal matter. Oil of no value. Several varieties even of this sub-species.

SHALOOCAH (شلوکا - shalúká, *Hind.*). From (shil, pers. little). Two pinafores, one worn on the breast, the other on the back, and fastened above and below the shoulders. For children.

SHAM (शम् - sham, *San.*). To appease; to sacrifice. Happiness.——*Sankhvel* (शङ्खपुष्पी - shankhapushpí, San.; शङ्खवेल - shankhavéla, Mahr.; കഞ്ചാങ്കോര - kañchánkóra, Mal.). Title from mahratta [chunk]. San. from (shankha, san. conch shell + pushpa, san. flower) [crow creeper]; from flower. Mahr. from (shankha, san. conch shell + véla, mahr. creeper). Mal. from (kañjá, tam. cannabis sativa, linn. + kórai, tam. cyperus) [fragrant toolsy]. San. also (kambupushpí), meaning conch shell + flower; (kambumáliní), meaning conch shell + garland; (dantótpala), meaning tooth + flower, from white color. Title otherwise Conch flower [crow creeper], Shell creeper. Botanically Canscora decussata, roem. et sch., gentianaceæ [vricsham, 90]. Generic name from malayalam. Alias Pladera decussata. Stem about a foot high, perfectly erect four-sided, angles very sharp or rather membrane-winged, smooth, ramous, branches always opposite, cross-armed, in other respects like the stem; leaves opposite, spreading, sessile, lanceolate, sharp-pointed, entire, smooth, three-nerved, size various; flowers terminal and axillary, peduncled, the terminal ones three-fold, the axillary single, white; peduncles four-sided; calyx large, four-toothed, four-sided, four-winged; corol funnel-shaped, border irregular, three-parted, the two upper segments equal and orbicular, the lower one two-parted, with a deep groove, in the groove is lodged the fourth or large stamen; filaments four, inserted into the mouth of the tube, the lowermost longer than the other three; style single; stigma two-cleft, segments recurved; capsule one-celled, many-seeded. The different species of canscora are bitterish annual plants which grow in moist situations during, or immediately after the rainy season; they have pink, yellow or white flowers. The present species is medicinally laxative, alterative, and nervine tonic.——*Shaman* (சமன் - shaman, Tam.). From (shamana, san. destroyer). Yaman [q.v.], regent of south [ashtadic], god of justice and of death.——*Shambaran* (शम्बर - shambara, San.). From (sham, san. happiness + vri, san. to screen). Demon of drought.——*Shambaraury* (शम्बरारि - shambarári, San.). From (shambara, san. the demon + ari, san. enemy). Manmatan [q.v.].——*Shambhoo* (சம்பு - shambu, Tam.). Shiva, the happiness maker. Applied to males and females. Hindoo 2nd or pers. name [peyar].——*Shamee* (शमी - shamí, San.; شمی - shamí, Hind.; జమ్మి - dzammi, Tel.; வன்னி - vanni, Tam.). San. from (sham, san. to sacrifice); used in sacrifice as fuel from its power of retaining heat. Hind. from sanscrit. Tel. from sanscrit [manna jhow]. Tam. from (vahni, san. fire). San. also (priyadarshaní), meaning good-looking. Tam. also (parambai); (shambu). Title otherwise Edible prosopis, Parambay, Vanny. Botanically Prosopis [shivah] spicigera, linn., leguminosæ [vricsham, 48]. Alias Adenanthera aculeata; Prosopis spicata. Somewhat arboreous, armed with scattered prickles, occasionally wanting; leaves rarely simply pinnated, usually bipinnate with one to two pair of pinnæ; leaflets seven to ten pair, oblong, linear, obtuse, glabrous; spikes axillary, several together, elongated, filiform; legumes cylindric, filled with mealy pulp; calyx five-toothed; petals five, distinct; flowers small, yellow. A large thorny bush, thriving in black-cotton soil [regar]; mysore, coromandel; foliage and wood closely resemble acacia sundra [sundra]; very slow growth; flowers in hot weather; pod is about an inch in circumference, and from six to twelve long. Pod medicinally astringent and stimulant. Pod contains a large quantity of a brown, mealy, sweetish substance, which is eaten; flavor of carob [q.v.] tree; eaten in different ways, green or dry, raw and alone; boiled with salt [ooppoo], onions [piyauz] and ghee [q.v.] and eaten with bread, or mixed with tyre [q.v.]; pod also sometimes used as fodder for camels [ottagam], cattle [maud], and goats [velland]. Bark used in tanning [chamrah]; a gum [gond] exudes resembling gum arabic [q.v.]. Timber is dark red in color, straight and close-grained, hard and durable, and superior to teak [q.v.] in strength, much used for building purposes and cart wheels, occasionally for furniture, and makes excellent fuel.——*Shankham* (शङ्ख - shankha, San.). From (sham, san. to soothe) [chunk]. Conch [q.v.].——*Shaumbhavy* (शाम्भवी - shámbhaví, San.). Feminine of shambhoo. Parvaty [q.v.].——*Shauntam* (शान्त - shánta, San.). From (sham, san. to be calm). Peace.——*Shaunty* (शान्ति - shánti, San.; ಶಾಂತಿ - shánti, Too.; ശാന്തി - shánti, Mal.). From (sham, san. to be appeased). Means tranquillity. The office of priest [acharry, poojarry, poorohit] in a temple [coil, pagoda]. In astrology [jyotisham, nacshatram] a sign meaning that the deity must be appeased. Also a religious song chanted by lamp light and in procession. In Tooloo same as Belleric myrobalan.——*Shengoo* (कुण्डली - kundalí, San.; سگ پات - sagpát, Hind.; سگ کا پتا - sagkápattá, Dec.; తెల్లుప్పి - tellauppi, Tel.; சங்கு - shangu, Tam.). San. from (kundala, san. ring), rolling creeper. Hind. from (sag, hind. dog + pát, hind. leaf). Dec. from hindostany. Tel. from (tella, tel. white + uppi, tel. capparis sepiaria, linn.). Tam. from (shankha, san. conch shell), from white color of ripe fruit. San. also (trikantajáta), meaning born with three spines. Tam. also (mulluççangu), meaning thorn + the plant; (kanniram). Title otherwise Four spined monetia, Shangilay. Botanically Azima tetracantha, lam., salvadoraceæ [vricsham, 86]. Alias Fagonia montana; Monetia barlerioides, tetracantha. Stem scarcely any, but branches innumerable, opposite, spreading in all directions, forming a close impenetrable bush, something like furze; young branches four-sided; thorns axillary, four-fold, spreading, very sharp, from 1-2 inches long; leaves opposite, short-petioled, reflexed, oval, acute; male flowers axillary, numerous, female axillary, solitary, sessile, between the two thorns; berry globular, of the size of a pea [calauyam], when ripe white, succulent, edible; seeds two; the plant is in flower and fruit the greater part of the year. Leaves medicinally stimulant, and given to puerperal women immediately after confinement. They are administered in the following manner by the villagers:—the leaves with an equal quantity of neem [q.v.] leaves, and a little powdered brick [shengal], are finely ground and given twice a day for the first two days, no food being allowed; for the next six days the woman gets a little boiled rice [q.v.] and pepper water [mullagatawny] once a day, and is allowed to drink warm water after the meal; she is not allowed to sleep after her food during the day, and if thirsty must quench her thirst by eating betel [q.v.] leaves and areca nut [q.v.]; from the seventh day she gets her ordinary food; it is also the practice among the rural classes to give 2 to 4 ounces of neem [q.v.] oil soon after delivery, with roasted asafœtida [q.v.], and the woman is made to take daily for a month from the morning of the third or fourth day a bolus of a stimulating confection, called nadaycauyam in tamul, which is supposed to keep off cold from the system. The leaves are also administered with food as a remedy for rheumatism, and their juice to relieve cough. The root is considered to have the same properties as the leaves, and to be also diuretic; it is given in dropsy along with other drugs. The following formula is used by veidyans [q.v.]:—take of the root bark ℥x, tribulus terrestris, linn. [nerinjy] fruit, root of trianthema monogyna, linn. [shauranay] and cephalandra indica, naud. [indian caper] *a* ℨi, belleric and chebulic myrobalans [q.v.] *a* ℨss, iron [auhan] dross ℥x, goat's

urine ℥viii, water four seers; make a decoction and keep it for several days in the oven; dose 2 to 3 ounces twice a day in as much water. A decoction of the root, leaves and bark with an equal quantity of Acorus calamus, linn. [vashamboo], ginger [q.v.], ajwaun seeds [ajwaun], and salt [ooppoo], is recommended as a remedy for chronic diarrhœa; and 1 to 1½ ounces of the juice obtained from the root bark, with three ounces of goat's [velland] milk [paul], twice a day as a diuretic in dropsy.——*Shumbha* (शम्भ - shambha, San.). From (sham, san. happiness + bhú, san. to become). Otherwise Vajram or vajrayoodham. Indran's thunderbolt [indran, vajram]. Said to have been made of the back-bone of a rishy. Distinguish from Shumbah, rice, and Shamba, saturday.——*Shumbhavaty* (ಶಂಭವತಿ - shambhavati, Can.). From (shambha, san. indra's thunderbolt + vat, san. suffix of possession). River; South canara dist., Mangalore tal. River on which Moolky is situated. Takes its rise at the foot of the Western ghauts [q.v.] and is navigable about 10 miles from Moolky in rainy weather. Is dammed for irrigation. ——*Shun* (शम् - sham, San.). Happiness [sham].——*Shuncara bhaushyam* (शङ्करभाष्य - shankarabháshya, San.). From (shankara, san. proper name + bháshya, san. commentary). A work by Shuncaracharry [shuncaran], a comment on the Vedantism of Vyausan [q.v.].——*Shuncaracharry* (शङ्कराचार्य - shankaráchárya, San.). Same as Shuncaran.——*Shuncaran* (शङ्कर - shankara, San.; சங்கரன் - shangaran, Tam.). From (above + kara, san. doer). Epithet of Shiva, the happiness maker. Hindoo 2nd or pers. name [peyar].—"*a*" The name of the celebrated South indian teacher of Vedaunta sheivism, successor to the northern philosopher Comaurila bhatt; generally called Shuncaracharry. He was a native of Caulady a village on Periyaur about 20 miles S.E. of Cranganore in Travancore, a posthumous child of a Bramin mother. He led a wandering life, and engaged in successful controversy with various sects, whether of the Sheiva, Veishnava, or less orthodox persuasions. In the course of his wanderings he established a mutt [q.v.] at Shringairy, on the Western ghauts [q.v.], near the sources of the Toongabudra. Towards the close of his life he went to Cashmere. Shuncaran is said to have had four principal disciples, in the popular traditions called Pudmapaudan, Hastamalacan, Sooreshwaran or mandanan, and Trotacan. For the philosophy see Adweitam, for the sect see Smarta.—"*b*" The Chola puttayam states that Shuncaran came to Conjeeveram, and there placed an earthen lingam [q.v.]; most probably the humble origin of the since large temple of Yecaumbareshwaran [q.v.] and Caumautchy [q.v.], local names of Shiva and Parvaty. Among his works is the Caumautchy ashtacam or octave in praise of the wanton-eyed goddess; but whether he was more than a passing pilgrim at Conjeeveram is doubtful. He is next traced at Tripatty, fixing there a lingam [q.v.] of crystal [palingoo, spaticam]. The symbol here was designated Chundramowleeshwaran or deity with the moon on his head, and the Nacshtra maulay, or lunar mansion [nacshatram] garland, is said to have been written by him in honor of the deity. The Shuncara vijayam gives a list of the sects he opposed and conquered; being Booddhists, Jeinas, Chaurvaucans, Caupaulas and others. He wrote a work expressly intended to show that all the thousand names [sahasranaumam] of Vishnoo mean Shiva.—"*c*" Shuncaran wrote his own bhaushyam [q.v.] or commentary on the Vedams [q.v.], and on the sootrams [q.v.] of Vyausan [q.v.], and on the metaphysical part of the Bhagavat geeta [q.v.]. He insisted also that not merely are the Vedams alone an authoritative rule, but that the divinely revealed Smrities [q.v.] or codes of law should be regarded as Shabdam [q.v.] or authoritative testimony [pramaunam]. It is from following the Smrities that the disciples of Shuncaracharry are termed Smartas [q.v.] in distinction from the Shrowtas [q.v.], who admit the Vedams only as a rule.—"*d*" When dying, Shuncaracharry caused himself to be covered with dried cow-dung cakes [bratty] which by his orders were lighted and so reduced his body to ashes. This ceremony called Carishaugny is the most effective purifier of all remaining defects in life, stopping all transmigrations [samsauram]. See vol. I (76).—"*e*" Shuncara charitam, Shuncara katah, and Shunkara vijayam are well-known biographies of Shuncaracharry relating his controversies with heretical sects and his refutation of their doctrines [matam].——*Shuncaranarayanan* (சங்கரநாராயணன் - shangaranáráyanan, Tam.). Fram (shankara, san. shiva + náráyana, san. epithet of vishnu). Shiva and vishnoo combined in one [hariharan]. Hindoo 2nd or pers. name [peyar]. *Shuncaraneinarcoil* (சங்கரநாயினார்க்கோயில் - shankaranáyinárkkóyil, Tam.). See sep title.——*Shungoonny* (ശങ്കുണ്ണി - shankunni, Mal.). From (shanku, mal. shankaran + unni, mal. infant). Shuncaran, the darling. Hindoo 2nd or pers. name [peyar].——*Shunkerry droog* (சங்ககிரித்துருக்கம் - shangagiritturukkam, Tam. sankaridrug *). From (shankha, san. conch + giri, san. mountain + durga, san. fort), white like conch shell [chunk]. Ancient name (kunnattúr), meaning hill + village.—"*a*" Deputy tahsildarry, Salem district. Pay Rs. 70.—"*b*" Village, Head-quarters of Deputy tahsildar, Railway station, Hill; Salem dist., Trichengode tal.; pop. 1,302; acres 6,727; lat. 11° 29′; long. 77° 54′; height 879 feet; from Madras S.W. 195 miles; from Namcull N.W. 25 miles; from Oossoor S. 87 miles; from Salem W.S.W. 24 miles; from Trichengode N.N.W. 5 miles; from Tripatore S.S.W. 85 miles; from Yercaud S.W. 32 miles. Some distance to the north-west of, and about 1½ miles away from the railway station. The droog, which rises to 2,345 feet above the sea, as viewed from the Railway is a great square white mass, whence its name. It is completely terraced with fortifications, attributed to Tippoo sultan, of which some must have been built by the English. Along the ascent creepers, trees, and prickly-pear [q.v.] grow in abundance; half way up to the left, on the side of a steep scarp is a musjid [q.v.]. The summit consists of a small plateau with a good supply of water stored in the rocks. Remarkably fine specimens of granite [caroom cull] veins pierce the gneiss on the exposed portion of the hill side; marble [shalavay cull] is found in the vicinity and several beds of lime stone [choonam cull] cross the railway close by. Ancient Shiva temple on the hill. Fort. Cave close to the musjid [q.v.]. Roman catholic chapel and unused cemetery. London mission school.

SHAMBA (شنبہ - shambah, *Hind.*). From persian. Singly implies Saturday. The other days of a week [vauram] are designated by numerals prefixed, meaning so many days after Saturday. For Arabic names, also common, see Yowm.—"*a*" *Yekshamba* (ایکشنبہ - ekshambah, Pers.). From (ek, pers. one + above). Sunday [yowm ool ahad].—"*b*" *Doshamba* (دوشنبہ - doshambah, Pers.). From (do, pers. two + above). Monday [yowm ool isnein].—"*c*" *Seh shamba* (سہ شنبہ - sehshambah, Pers.). From (seh, pers. three + above). Tuesday [yowm ool salausah].—"*d*" *Charshamba* (چہار شنبہ - chahárshambah, Pers.). From (chahár, pers. four + above). Wednesday [yowm ool arbah].—"*e*" *Punjshamba* (پنج شنبہ - panjshambah, Pers.). From (panj, pers. five + above). Thursday. Otherwise Joomeraut [yowm ool khamees].—"*f*" *Sesh shamba* (شش شنبہ - seshshambah, Pers.). From (sesh, pers. six + above). Friday. Otherwise Jooma [yowm ool jooma].—"*g*" *Shamba* (شنبہ - shambah, Pers.). Saturday [yowm ool sabt].

SHAN (شن - shan, *Pers.*). Suffix showing place; as Goolshan, flower + place.

SHANAGA (శనగ - shanaga, *Tel.*). From (chanaka, san. bengal gram). Same as Bengal gram.

SHANBOGUE (ಶಾನಭೋಗ - shánabhóga, *Can.*). From (shanáya, can. allowance of grain paid to the village accountant + bhóga, san. enjoyment). Village accountant [coolacurny], curnum [q.v.] of Carnatic [q.v.]. Corresponding terms are:—Tel. curnum, Mal. menon, Tam. kanakan. Hindoo third name [peyar].

SHANGARF (हिंगुल - hingula, *San.*; شنجرف - shanjarf, *Ar.*; شنگرف - shangarf, *Pers.*; हिंगोल / هنگول - hingol, *Hind.*; شنگرف - shangraf, *Dec.*; گلوگا - galuga, *Malay*; ಇಂಗಲಿಕ - ingalika, *Can.* and *Too.*; ఇంగిలీకము - ingilíkamu, *Tel.*; ചായില്യം - cháyilyam, *Mal.*; ජාතිලිංගම - játilingam, *Singh.*; சாதிலிங்கம் - sháthilingam, *Tam.*). Title from persian. San. from (hingu, san. asafœtida + lá, san. to take), from resembling asafœtida [q.v.] in color. Hind. from sanscrit. Can. from sanscrit. Mal. from tamul. Tam. from (játi, san. caste + ilingam, tam. vermilion). Tam. also (ilingam), shining substance. Otherwise Impure bisulphate of mecury, Vermilion, Red sulphuret of mercury. Hydrargyri bisulphuretum of chemists. Mostly imported from China. A mineral substance, red, heavy, brilliant: found native in quicksilver [rasam] mines. Most common artificial, when thus made according to the Poorna sootram:—Twelve pagodas [q.v.] weight of sulphur [gandhac] is to be put into an earthen pot [chatty], and fused over a slow fire; when in a state of fusion, eighty pagodas weight of mercury [rasam] must be added to it, and the whole kept gently stirred until it is reduced to a black powder. Twelve pagodas weight more of sulphur and four pagodas weight of pewter [velly eeyam], cut into small pieces are to be added to the black powder, and the whole to be mixed with the same quantity of saltpetre [shorah]. All of these are to be put into a phial [cooppy], which must be sufficiently large to contain the medicines in the half of it. This vessel is then to be coated over with clay [calimunn] in the most complete manner. An oven is then to be made in the ground, over the mouth of which is to be put a broad hollow earthen pot, and in this pot is to be placed the cooppy [q.v.] containing the drugs; which is to be next covered over with sand [manal] up to its neck. The fire is then to be put into the oven and kept burning for twelve hours, after which the phial is to be taken off and kept till it is cool, when it may be broken, and in the neck will be found the shangarf in a lump. The mode of fumigating with shangarf is as follows:—Eight pagodas weight of bark of the root of the Calotropis gigantea [yercum], four pagodas weight of the charcoal [adoopp kary] of the wood of the same, four pagodas weight of shangarf, and one pagoda weight of common black pepper [q.v.], are all to be ground together, with the juice of the leaves of the Gossypium herbaceum [indian cotton] and, when well rubbed, to be formed into cakes and dried. The fumes of one of these cakes, while burning, to be inhaled daily, through a smoking pipe, either all at once or at two different periods in the twenty-four hours. Fumigation of this sort may be continued for five or six days, according to circumstances, and is efficacious

in cancerous affections, in venereal ulcers of the throat and nose, and in a disease attended with a singular pricking pain in the skull. A pink, sometimes used as a dye [shauyam], but more frequently as a pigment vermillion, which may be prepared by reducing the one to a powder, or by chemical action. The article is used as a pigment [rangh].

SHANY (शनि - shani, *San.*). From (shanais, san. slowly), slow going planet. Otherwise Shaneischaran. The planet [graham] Saturn, ♄. Sidereal period of revolution [bhaganam] is 10,759d 5h 16m, or nearly 29½ terrestrial years. Inclination [natam] of orbit [cacsham] is 2° 28′ 29″. He is represented in the arts as a black man, clothed in black garments, riding on a vulture [gidh], with four arms. The astrologers say:—if a person be born when the planet shany is in the same constellation [nacshatram] as the moon [chundran], he will be slandered, his riches dissipated, his son, wife, and friends destroyed; he will live at variance with others and endure many sufferings. Many stories are told of the adverse influence of this planet. There is a proverb:—அகப்பட்டவனுக்குஅஷ்டமத்துச்சனி ஓடிப்போனவனுக்கு ஒன்பதாம் இடத்து ராஜா—"he "who was caught was under the influence of saturn in the eighth "sign [raushy], and he who escaped did so under the influence of "saturn in the ninth." Saturn situated in the eighth sign from that of one's birth is specially malignant; one is born in a sign if that sign is rising at hour of one's birth [lagnam, raushy].——*Saneechar* (سنیچر - saníchar, Hind.). From (shanaishchara, san. saturn, the slow-mover). Saturday [shany, vauram].——*Shanivauram* (சனிவாரம் - shanivāram, Tam.). Saturday [vauram]. There is a Tamul proverb:—சனி நீராடு—"bathe "on saturdays;" in some parts of the country, men bathe on Saturday, while women bathe on Friday or Monday; to bathe frequently on Tuesday is regarded as fatal. There is another:—சனிப் பிணம் தனிப்போகாது—"a Saturday corpse goes "not alone;" to avert evil tamulians bury a fowl [moorghy] when a death happens on Saturday.

SHAR (شعر - shar, *Hind.*). Hair.——*Shar ool jin* (شعر الجن - sharuljinn, Ar.). Means fairy hair. Same as Indian maiden hair.

SHARA (شرح - sharah, *Hind.*). From (sharaha, ar. to lay open). Remarks.

SHARA (شرع - shara, *Hind.*). Literally an open road, i.e. of means to an eternal life. Religious law of God.——*Sharayee* (شرعی - sharaí, Hind.). From (shara, ar. law). Long drawers [pyjauma] reaching down to the ankles, worn by the strictly pious. The same as Izaur [q.v.].——*Shareeyat* (شریعت - shariát, Hind.). From (shara, ar. road). The law of islam [q.v.], including both the teaching of the Koran [q.v.] and the traditions of the prophet; consisting of such ordinances as those of fasting [roza], prayer [namauz], pilgrimage [haj], giving the poor rate [zakaut], and other acts of piety [deen].

SHARAM (शर - shara, *San.*). From (shrí, san. to injure) [shooran, shringam].—"*a*" Injury, arrow. Reed.—"*b*" From sharp edges of leaves, botanically the Saccharum genus, graminaceæ [vricsham, 156]. Grown mostly in warm countries; inflorescence in loose panicles, often very ornamental, spikelets more or less lanceolate; glumes, two-valved, two-flowered, enveloped in long wool. The species best known to the natives are:—munja [moonj], officinarum [sugar-cane], procerum [wild sugar-cane], sara [moonshee grass], spontaneum [naunal]. Other s. indian species indigenous or naturalized are:—exaltatum, fuscum, propinquum.——*Sara* (शर - shara, San.). From (shrí, san. to split in pieces). Same as Moonshee grass.——*Sharad* (शरद् - sharad, San.). From (shrí, san. to destroy); from destroying leaves of trees. Autumn [ritoo].——*Sharauvaty* (ಶರಾವತಿ - sharávati, Can.; sharavati, Mys. gov.). From (shara, san. arrow + vat, san. suffix of possession); from its rise in amboo teertam, the arrow fountain, generated by a stroke of rama's [q.v.] arrow. River; rises at Amboo teertam near Nonabaur in the Teertahully talook, Shimoga district, Mysore, precipitating itself down the celebrated falls of Gersoppah [q.v.]; discharges into the sea at Honore in N. canara.——*Sharbhalingam* (சரபலிங்கம் - sharabalingam, Tam.). From (sharabha, san. fabulous animal + linga, san. phallic emblem of shiva); lingam as worshipped by a sharbham [q.v.]. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Sharbham* (शरभ - sharabha, San.). From (shrí, san. to hurt). A fabulous animal supposed to be a bird with eight legs, regarded as foe of the lion [simham]. Also deer [mrigam] with eight legs.——*Sharcaray* (शर्करा - sharkará, San.). From (shrí, san. to cut); a piece. Candied sugar [q.v.]. One of the seven oceans [samoodram] of mythology [bhoogolashastram].——*Shareeram* (शरीर - sharíra, San.). From (shrí, san. to decay). Body [cshetram]. According to the Vedauntam [q.v.] philosophy, there are three shareerams or corporeal forms:—Caurana shareeram, corpus causans, Soocshma shareeram, the fine material form, and Stoola shareeram, the gross body, made up of the limbs which are perceivable. The latter two are the corpora causata. The Stoola shareeram perishes at death, but Soocshma shareeram, the immediate organ of the soul, accompanies it through all its transmigrations [samsauram], and is capable of sensations of enjoyment and suffering. The corpus causans is the original type or embryo of the body as existing with the soul in its original state. Compare Puncha cosham.——*Sharvanamoottoo* (சரவணமுத்து - sharavanamuttu, Tam.). From (shara, san. reed + vana, san. forest + muttu, tam. pearl). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Sharvanan* (சரவணன் - sharavanan, Tam.). From (shara, san. reed + vana, san. forest). Scandan who was born out of a reed lake. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Shaurada nuddy* (శారదానది - shâradánadi, Tel.). From (shâradá, san. goddess sarasvatí + nadí, san. river). Otherwise Ankapully river. River; Vizagapatam dist., Veeravilly and Ankapully divisions, Sarwasiddhy tal. Rises in the Madgole hills, and flowing west past Ankapully and Cassimcote, reaches the sea at Wattauda. Much used for irrigation, being crossed by six large anicuts [q.v.]. Total length about 45 miles.——*Shauraday* (शारदा - shâradá, San.). From (sharad, san. autumn); autumn deity. Saraswaty [q.v.].

SHARAT (شرط - shart, *Hind.*). Condition, contract. Begheir sharat is unconditionally.

SHARB (شرب - sharb, *Hind.*). General term for any non-alcoholic beverage [abshola, sherbet]. The following is a key list of the principal of such beverages in general use in southern india arranged under the botanical names of the plants which give them:—Ægle marmelos, bael, fruit sherbet; Andropogon schœnanthus, lemon grass, grass tea; Camellia theifera, tea from leaf; Coffea arabica, coffee, decoction from seed, tea from leaf; Coriandrum sativum, coriander, tea from seed; Erythroxylon coca, coca, tea from leaf; Hemidesmus indicus, indian sarsaparilla, decoction from root-bark; Ocimum canum, hoary basil, tea from leaf; Tectona grandis, teak, tea from leaf; Woodfordia floribunda, godaury, tea from leaf.——*Sharaub* (सुरा - surá, San.; شراب - sharáb, Ar.; دارو - dárú, Hind.; ಸಾರಾಯಿ - sáráya, Can.; సారాయి - sáráyi, Tel.; ചാരായം - chárâyam, Mal.; சாராயம் - shárâyam, Tam.). San. from (su, san. to distil). Ar. from (sharb, ar. to drink); whence sherbet. Drav. from (sára, san. essence). General term for volatile substances collected by distillation; the intoxicating principle of which is alcohol. The alcohol of commerce is the product of the alcoholic or vinous fermentation of sugar [q.v.]. Cane-sugar [sugar-cane] or sucrose, not directly fermentable, is first converted into grape [angoor] sugar, and this into ethyl alcohol and carbonic acid, with some other secondary products, as glycerine. When the alcohol amounts to about 25 per cent. of the fermenting solution of sugar, the process is spontaneously arrested, and distillation is necessary in order to obtain a dilution containing a higher percentage. The various products of such fermentation and distillation are called spirits [arrack]. They differ in strength, but still more in flavor; which depends either upon certain ethers developed during the manufacture or upon substances purposely added to them. Of such spirits there is a very great variety. The six principal in use in Southern india are arrack [q.v.], mohwah [q.v.], spirit brandy, gin, rum and whisky. Of these arrack and mohwah spirit are the only two indigenous. The following alcoholic articles are in the Indian pharm.:—"*a*" Alcohol; volatile liquid, obtained by distillation of rectified spirit with lime [choonam]; colorless and free from empyreumatic odour; entirely volatile by heat, is not rendered turbid when mixed with water, does not cause anhydrous sulphate of copper [mayil toottam] to assume blue color when left in contact with it; used in chemical analysis.—"*b*" Spiritus ætheris nitrosi; alcoholic solution of nitrous ether; transparent nearly colorless, with slight tinge of yellow, mobile, inflammable, peculiar penetrating apple like [seb] odour, sweetish cooling sharp taste.—"*c*" Spiritus rectificatus; alcohol, with sixteen per cent. of water; obtained by distillation of fermented saccharine fluids; colorless, transparent, mobile, inflammable, of peculiar pleasant odour, and strong spirituous burning taste; burns with blue flame without smoke.—"*d*" Spiritus tenuior; Proof spirit; composed of rectified spirit, five pints, and distilled water, three pints; powerful diffusible stimulant; in overdoses poisonous; proof spirit may be prepared from fermented juice or arrack [q.v.] obtained from palmyra [q.v.] or cocoanut [q.v.] palms.—"*e*" Spiritus vini gallici; spirit of French wine; brandy; obtained by distillation of French wine; pale, or of very slight brownish-yellow tint; peculiar vinous aromatic odour.——*Sherbet* (شربت - sharbat, Hind.). From (sharaba, ar. to drink). Lemonade [sharb]. Beverage made of the juice of limes [q.v.], pomegranates [anaur], pineapples [ananas], or other fruit [pazham] mixed with water and sugar [q.v.], rose water [goolaub] being added. It is either sweet or sweetish sour; when sour it is called Abshola [q.v.].

SHARF (شرف - sharf, *Ar.*). Upholder. Part of lacab; as Sharfood dowla, upholder of the empire. Feminine form is Sharfoo; as Sharfoo bee, female alam + alaumat [ism].——*Sharaufat* (شرافت - sharáfat, Ar.). From (sharafa, ar. high). Nobility. Prefixed to an alam forms a lacab; as Sharaufat ally nobility of ally [ism].——*Shareef* (شریف - sharíf, Hind.). From (sharafa, ar. high). Noble, exalted, highness. Title of that

descendant of the prophet who is the Governor of Mecca; now applied as a title of honor to any descendant of the prophet, and also affixed or prefixed to the children whose father is a Sheikh and mother a Syed. Feminine form is Shareefa; as Shareefa begum, alam + alaumat [ism].

SHARMAN (शर्मा - sharmá, *San.*). Means happy. A not common Bramin title. Connected originally with ceremonies.

SHASTRAM (शास्त्र - shástra, *San.*). From (shás, san. to instruct) [shaus]. Works of literature and science in general [ilm]. Shastry is a learned man [acharry, pundit].——(1) The following are the principal abstract terms for the arts and sciences, shown for convenience with the English first.——*Algebra* (बीजगणित - bíjaganita, San.).——*Archery* (धनुर्विद्या - dhanurvidyá, San.).——*Architecture* (स्थापत्य - st'hápatya, San.).——*Arithmetic* (अङ्कगणित - ankaganita, San.).——*Astrology* (ज्योतिश्शास्त्र - jyótishshástra, San.).——*Astronomy* (खगोलशास्त्र - khagólashástra, San.).——*Biography* (चरित्र - charitra, San.).——*Chemistry* (रसायनशास्त्र - rasáyanashástra, San.).——*Chronology* (कालगणित - kálaganita, San.).——*Dancing* (भरतशास्त्र - bharatashástra, San.).——*Fencing* (शस्त्रविद्या - shastravidyá, San.).——*Geography* (भूगोलशास्त्र - bhúgólashástra, San.).——*Geometry* (क्षेत्रगणित - kshétraganita, San.).——*Grammar* (व्याकरणशास्त्र - vyákaranashástra, San.).——*History* (चरित्र - charitra, San.).——*Hydraulics* (जङ्गमजलशास्त्र - jangamajalashástra, San.).——*Hydrostatics* (स्थावरजलशास्त्र - st'hávarajalashástra, San.).——*Law* (धर्मशास्त्र - dharmashástra, San.).——*Logic* (तर्कशास्त्र - tarkashástra, San.).——*Mechanics* (यन्त्रशिल्प - yantrashilpa, San.).——*Moral philosophy* (नीतिशास्त्र - nítishástra, San.).——*Music* (सङ्गीतशास्त्र - sangítashástra, San.).——*Natural science* (प्रकृतितत्त्वशास्त्र - prakrititattvashástra, San.).——*Optics* (चाक्षुषशास्त्र - chákshushashástra, San.).——*Painting* (चित्रलेखनविद्या - chitralékhanavidyá, San.).——*Perspective* (यथादर्शनचित्रलेखनविद्या - yat'hádarshanachitralékhanavidyá, San.).——*Philosophy* (तत्त्वशास्त्र - tattvashástra, San.).——*Physic* (वैद्यशास्त्र - vaidyashástra, San.).——*Physiology* (शारीरकशास्त्र - shárírakashástra, San.).——*Pneumatics* (वायुशास्त्र - váyushástra, San.). *Poetry* (काव्य - kávya, San.).——*Rhetoric* (अलङ्कारशास्त्र - alankárashástra, San.).——*Sculpture* (तक्षणशिल्प - takshanashilpa, San.).——*Theology* (वेदान्तशास्त्र - védántashástra, San.).——*Trigonometry* (त्रिकोणगणित - trikónaganita, San.).——(2) *Cuppal shastram* (கப்பற்சாத்திரம் - kapparcháttiram, Tam.). From (kappal, tam. ship + above). A treatise on navigation. Contains directions concerning mode of building ships [dhony]. The suitable times for sailing are stated. The observation of the stars and lunar mansions [nacshatram] is enforced with reference to everything; even to the dropping of an anchor, which must be only as the stars ordain.——*Dharma shastram* (धर्मशास्त्र - dharmashástra, San.). From (dharma, san. duty, justice + above). Law.——*Shilpa shastram* (शिल्पशास्त्र - shilpashástra, San.). From (shilpa, san. mechanics + above). Treatises on shilpam [q.v.]. Directions for laying the foundations of houses [veed] and other buildings and raising the superstructure. Astrology [jyotisham] is brought in. These are numerous in Sanscrit. Remains of those entitled Caushyapam, Maunasauram, Pauncharautram, Sacalaudhicauram, Sanatcomauram, Sauraswatyam, Veikhaunasam, Vishwacarmeeyam are met with here. The Maunasauram [q.v.] is the most perfect.

SHAT (शड् - shat, *San.*). Six.——*Salsette* (سالست - sálsat, Hind.). Corruption of (shatshashti, san. sixty-six); from the number of villages it contained. An island immediately north of Bombay. Also the maritime provinces of Goa.——*Salsette hemp* (سالست كا نار - sálsatkánár, Hind.). Same as Sunn.——*Shadacsharam* (षडक्षर - shadakshara, San.). From (above + akshara, san. letter). Muntram [q.v.] consisting of six characters. Sacred to Soobramanyan [q.v.], as the Punchaucsharam [q.v.] is sacred to Shiva [q.v.].——*Shadanga* (ಷಡಂಗ - shadanga, Can.). From (above + anga, san. limb); epithet of the vedam. Title of Canarese bramins. Hindoo third name [peyar].——*Shadangam* (ഷഡംഗം - shadangam, Mal.). From (above + anga, san. part). The six cooling drugs:—Andropogon muricatus [cuscus], Cyperus rotundus [common sedge], Mollugo cerviana [hazaur danah], Pavonia odorata [peramootty], Santalum album [sandal], Zingiber officinale [ginger].——*Shadauranyam* (षडारण्य - shadáranya, San.). Six forests [arcot]; the wilderness of paradise, probably imagined in Cashmere.——*Shad darshanam* (षड्दर्शन - shaddarshana, San.). From (above + darshana, san. teaching). See Darshanam.——*Shadjam* (षड्ज - shadja, San.). From (above + já, san. to produce); produced by the six organs, tongue, teeth, palate, nose, throat and chest; or producing six other notes of scale. First of the seven primary notes in music [swaram].——*Shadrasam* (षड्रस - shadrasa, San.). Six flavors or tastes:—sweet, sour, salt, bitter, pungent and astringent.——*Shadritoo* (षड्ऋतु - shadritu, San.). Six seasons; see Ritoo.——*Shadtily* (षड्तिली - shadtilí, San.). From (above + tila, san. sesamum indicum, dec.). One who performs six acts with gingelly [q.v.] seeds to obtain delivery from sin and poverty and secure a place in heaven [swargam]. These are Tilodvartanam, bathing in water containing the seed; Teilasnaunam, anointing body with pounded seeds; Tilahomam, burnt offering of seeds; Tilapradam, offering the seeds to the dead; Tilabhojanam, eating the seeds; Tilavaupanam, throwing out the seeds.——*Shadvargam* (षड्वर्ग - shadvarga, San.). From (above + varga, san. grouping). Six modes of division of the ecliptic [craunty mundalam] for horoscopic [jautacam, jenmaputtricay] purposes. These are:—Raushy [q.v.] or sign, in which the ecliptic is divided into twelve equal parts of 30° each; Horah [q.v.] in which each sign is divided into two equal parts of 15° each; Dricaunam [q.v.] in which a sign is divided into three equal parts of 10° each; Navaumsham in which a sign is divided into nine equal parts of 3° 20′ each; Dwaudashaumsham, in which a sign is divided into twelve equal parts of 2° 30′ each; and Trimshaumsham, in which a sign is divided into thirty equal parts of a degree each. See Dashavargam [vargam] where the modes are extended to ten, and further particulars are given.——*Shashty* (षष्ठि - shasht'hi, San.). From (shat, san. six). The sixth. Lunar [chaundramaunam] festival [pundigay, 3e]. The sixth tity [q.v.] of either the waxing [shooclapacsham] or waning [krishnapacsham] moon [chundran] in any month. The sixth or twenty-first day of the lunar month [scanda shashty, soobbaroya shahsty].——*Shatank* (சடங்கு - shadangu, Tam.). From (above + anga, san. limb), ceremonial done according to the mode prescribed in the six Vedaungams [q.v.]. Now in use only among non-bramins. Any ceremony.——*Shatsamayam* (षट्समय - shatsamaya, San.). Six systems of religion; see Samayam.——*Shatstalattaun* (சட்தலத்தான் - shaddalattán, Tam.). From (above + st'hala, san. place). Six-place people; epithet of Sheivas as they mark six places of the body where Shiva dwells. Mooloudhauram or pubic parts, Swaudhishtaunam or umbilical region, Manipooram or pit of the stomach, Anauhatam or root of the nose, Vishooddham or the hollow between the frontal sinuses, Aunyaukhyam or fontanel.——*Shodasham* (षोडश - shódasha, San.). From (above + dasha, san. ten); sixteen. Ceremony performed on the twelfth day after death, when sixteen bramins are fed. Also applied to a gift [daunam] of sixteen kinds made at a shrauddham [q.v.]; compare Dashadaunam.——*Shunmookham* (சண்முகம் - shanmugam, Tam). From (above + mukha, san. face). Soobramanyan [q.v.], the six-faced god. Hindoo 2nd or pers. name. Common among non-bramins. Compare Armoogam [peyar].——*Shunmookhasoondram* (சண்முகசுந்தரம் - shunmugasundaram, Tam.). From (above + mukha, san. face + sundara, san. beautiful); beautiful soobramanyan. Hindoo 2nd or pers. name. Common among non-bramins [peyar].

SHATAM (शत - shata, *San.*). Hundred.——*Shakaukool* (शतमूली - shatamúlí, San.; शतावली - shatávalí, Mahr.; शितेचवारि - shítéchavári, Conc.; شقاقل - shakákul, Ar., Pers., Hind. and Dec.; ಹಲುಮಕ್ಕಳತಾಯಿಬಳ್ಳಿ - halumakkalatáyiballi, Can.; ഉഡുരിബൂരു - uduribúru, Too.; చల్లగడ్డ - tsallagadda, Tel.; ശതാവരി - shatávari, Mal.; හාතාවාරිය - hátáváriya, Singh.; தண்ணீர்முட்டான் - tannírmuttán, Tam.). Title from arabic, San. from (shata, san. hundred + múla, san. root); from shaggy root. Mahr. from (shata, san. hundred + ávalí, san. row). Arabic corrupted from sanscrit. Can. from (hala, can. many + makkalu, can. children + táyi, can. mother + balli, can. creeper). Too. from (uduru, too. hanging down + búru, too. creeper). Tel. from (tsalla, tel. buttermilk + gadda, tel. root). Mal. from (shata, san. hundred + ávri, san. to cover). Tam. from (tannír, tam. water + vidu, tam. to issue); holds cool water; also diuretic. San. also (áshádhí), meaning produced in the malayam mountain; (késhí), meaning hairy; (shatávarí); (vari), meaning covering. Hind. also (sadábori); (satáwar), meaning asparagopsis ascendens, kunth. Can. also (majjigegadde), meaning buttermilk + lump; (áshádiyaballi), meaning malayam mountain + creeper. Tel. also (pillitíga), meaning cat + creeper, small; (erraváludutíga), meaning red + hanging + creeper; (pillipesara), by corruption; (pillipítsara), meaning cat + the plant. Mal. also (shatávali), meaning hundred rows. Singh. also (barí), meaning best plant. Tam. also (paniyinákku), meaning snake + tongue; (shathávéri), meaning hundred-rooted. Title otherwise Buttermilk root, Cat creeper, Racemose asparagus, Shatauvary, Water root, Wild carrot. Botanically Asparagopsis [shatamooly] floribunda, kth., liliaceæ [vricsham, 136]. Alias Asparagus racemosus. A straggling climbing shrub; branches striated; foliage like juniper [abhal]; leaves fascicled, linear, falcate; thorns solitary, reflexed; racemes many-flowered, axillary; flowers profuse small, white, fragrant. Bark is poisonous; leaves boiled and mixed with ghee [q.v.] applied externally to promote suppuration in boils and tumours; tuberous root demulcent, refrigerant, diuretic, aphrodisiac, alterative, anti-diarrhœatic, and anti-dysenteric; demulcent in veterinary medicine; prevents confluence of small-pox; in impotence is used as morabba [q.v.] or preserve.——*Shatacam*

(शतक - shataka, San.). Means a collection of hundred. A collection of epigrams, which have one uniform refrain. There are many such as Vemana shatacam, Soomaty shatacam, &c. There is a Tamul proverb:—வைராக்கிய சதகம் சதகங்களில் வித்தகம்—" the most distinguished of shatacams is "that on self-control."——*Shatagooppy* (சதகுப்பி - shathaguppi, Tam.). From (above + pushpa, san. flower). Same as Sowa.——*Shatamooly* (शतमूली - shatamúlí, San.). From (above + múla, san. root). Botanically the Asparagopsis genus, liliaceæ [vricsham, 136]. Herbs or undershrubs, branched. The species best known to the natives are:—ascendens [indian salep], floribunda [shakaukool], officinalis [naug down], sarmentosa [soofaid moosly].——*Shata roopay* (शतरूपा - shatarúpá, San.). From (above + rúpa, san. shape). The female portion of Bramha [q.v.], type of many forms, same as Mauyay.——*Shatranj* (شطرنج - shatranj, Hind.). From (sad, ar. hundred + rang, ar. stratagem). Chess [chatrangam, chowsar]. The pieces are:—Shah, king; farzeen, queen; feel, bishop; asp or sawaur, knight; rookh, castle; piyauda, pawn.

SHATAN (शठ - shat'ha, *San.*). Deceiver, rogue.——*Shadagopan* (சடகோபன் - shadagóppan, Tam.). From (above + kópa, san. anger). Otherwise (shat'hári), meaning rogue + foe, enemy of the wicked. Vishnoo who is angry against rogues. Also specially a Veishnava devotee so called [nummalwar]. Hindoo 2nd or pers. name; common among Veishnavas [peyar].

SHATROO (शत्रु - shatru, *San.*). From (shad, san. to perish). Enemy.——*Shatroognan* (शत्रुघ्न - shatrughna, San.). From (above + han, san. to kill). Brother of Rama [q.v.].

SHAUDY (شادی - shádí, *Hind.*). Means joy. Mahomedan marriage with all its ceremonies and festive rejoicings. It is contracted after the female attains her age and when the bridegroom is between twenty and twenty-five. The cost on the bride's side averages Rs. 2,000, and on that of the bridegroom Rs. 1,000. The following is a brief description of the ceremonies:—"*a*" Betrothal. In case the contracting parties are strangers, the information required by the bridegroom's party of a family in which it is proposed to marry, is conveyed by professional female go-betweens. After such preliminaries a relation of the bridegroom goes to the bride's house to get the consent of the bride's family. This obtained privately, a day is appointed for announcing it publicly. The friends and relations of the bridegroom then proceed to the bride's house with betel-nut [q.v.], sugar [q.v.], flowers [phool], and jewels [zewar] as presents to the bride, and return, after obtaining the consent of her guardian. The object of this is to bind the parties.—"*b*" Ceremonies before Nicka [q.v.]. The wedding commences on an appointed day and lasts five or six days. The two first days are devoted to minor ceremonials. On the third day the wedding dress, jewels for the bride provided by the bridegroom, with painted earthen pots containing sugar-candy [candy], almonds [baudam], dates [kharjooram], raisin [angoor], &c., are carried from the house of the bridegroom to that of the bride. The friends and relations who accompany the processions are entertained at the bride's house, and return after ceremonies. The bride's jewels, articles of toilet, furniture, &c., and the bridegroom's wedding dress are similarly carried to the bridegroom's house from that of the bride on the fourth day. About 4 o'clock in the morning of the fifth the bridegroom proceeds to the bride's house in procession and arrives there at dawn. His admission into the bride's house is opposed till some present is given to a relation of the bride's and then he is taken to the Diwaun khana.—"*c*" The nicka [q.v.] ceremony, the only ceremony enjoined according to law, is then solemnised at a propitious hour. The cauzy [q.v.] appoints two individuals as witnesses on the part of bridegroom and desires them to obtain orders of the bride's guardian regarding the nicka. They return accompanied by a vakeel [q.v.] appointed on the bride's side. The dowry [mahar] to be paid by the bridegroom is then settled. The consent of the bridegroom is then taken, and nicka is read. Supplications are then offered by the cauzy [q.v.]. Towards the evening, the bridegroom goes into the zenana [q.v.], and carries the bride to his own house in procession. Five successive Fridays are kept as honey-moon, and entertainments are given; on the first four at the bride's and on the fifth at the bridegroom's [janauza, mootah, nicka].

SHAUFEE (شافعی - sháfaí, *Hind.*). From (shafa, ar. to intercede). Intercessor. Founder of one of the four principal Mahomedan sects [cowm], comprising chiefly the Nivayats [q.v.] and Lubbays [q.v.]. He reduced Muslim [q.v.] jurisprudence to order and made it a science [soonnee].

SHAUL (शाल् - shál, *San.*). To shine.——*Salustry* (سالوتری - sálútarí, Hind.). From (shálihótra, san. name of bramin who wrote a treatise on veterinary art). Horse-doctor.——*Saul* (शाल - shála, San.). See sep. title.——*Saula* (శాల - shála, Tel.). From (shal, san. to shine); large hall or house. A house; suffix in compounds, as Dhurramsaula, meaning charity + house.——*Saulo* (سالو - sálú, Hind.). Fine turkey-red calico.——*Semal* (سیمل - semal, Hind.). From (shálmalí, san. the tree, bombax malabaricum, dec.). Same as Red-cotton tree. White semal is same as Silk-cotton tree. For semal gum see Sem gum.——*Shaulam* (शाल - shála, San.). From (shál, san. to praise). The saul [q.v.] tree.——*Shaulancauyanan* (शालङ्कायन - shálankáyana, San.). From (shála, san. the saul tree + anka, san. mark + ayana, san. abode); one born in a place noted for saul trees. Nundy [q.v.], the sacred bull. Name of the dynasty [raj] of kings at Vengy [q.v.]. See vol. I (139); II, 80.——*Shaulay* (शाला - shála, San.; شالا - shálá, Hind.; శాల - shála, Tel.; ശാല - shála, Mal.; சாலை - shálai, Tam.). Place, hall, school. So avenue. The planting of large trees along the highways and of groves or topes [q.v.] for halting places has from the most ancient times been a popular custom. The bramins say that he who plants a tree lives long. The trees may be of almost any description. A great number are banyans [q.v.]; but these by sending their roots in different directions down along the trunk and from the branches into the road spoil it for wheel carriages; when the props are cut away, as is customary by the road side, the tree itself is liable to be uprooted. Tamarinds [q.v.] and mangoes [q.v.] supply the place of banyans [q.v.] near villages. In storms the Portia [q.v.] suffers most of all the avenue trees, and trees grown from cuttings are more extensively damaged than seedlings. The casuarinas [chowkmaram] with their acicular foliage yield to the gale and suffer the least. Trees with soft or brittle wood as Carica papaya, linn. [papaw]; Melochia velutina, bedd.; Millingtonia hortensis, lin. f. [indian cork]; Moringa pterygosperma, gærtn. [moringa]; Sesbania grandiflora, pers. [west-indian sesban], &c.; are either entirely prostrated or have their branches strewed about. Plan pursued in making avenues is usually to have circular pits dug 6 feet deep and 6 feet in diameter, which are filled with fresh soil; round these, mud walls are raised 3 feet high to protect the young plants from cattle. The plants must be watered and looked after for about five years. The following is a tolerably complete list of trees used for avenue-planting in southern india:—Adenanthera pavonia, false red sanders; Albizzia lebbek, common sirissa; Anthocephalus cadamba, cadamba; Artocarpus integrifolia, common jack; Bombax malabaricum, red-cotton tree; Carica papaya, papaw; Casuarina equisetifolia, whip tree; Cedrela toona, toon; Dalbergia sissoo, sissoo; Eugenia jambolana, common jaumoon; Ficus bengalensis, banyan; Ficus religiosa, peepul; Ficus retusa, chinese banyan; Ficus tsiela, tsiela; Guazuma tomentosa, roodrauck tree; Mangifera indica, mango; Melia azadirachta, margosa; Mesua ferrea, nauga champak; Millingtonia hortensis, indian cork; Moringa pterygosperma, indian horse-radish; Parkia biglandulosa, nitta; Pithecolobium dulce, corcapilly; Poinciana elata, indian poinciana; Poinciana regia, flamboyant; Polyalthia longifolia, asoca; Pongamia glabra, indian beech; Protium caudatum, hill kiloovay; Sesbania grandiflora, west-indian sesban; Sterculia fœtida, bastard poon; Tamarindus indica, tamarind; Terminalia arjuna, arjoon tree; Terminalia catappa, country almond; Thespesia populnea, portia.——*Shaulicay* (शालिका - sháliká, San.). From (shála, san. shorea robusta, gærtn.); from leaves like saul. Title otherwise French honeysuckle, Tick trefoil, West indian honeysuckle. Botanically the Desmodium genus, leguminosæ [vricsham, 48]. Herbs, shrubs or small trees; chiefly tropical; pods much like the blade of a penknife in form, size and thickness; flowers greenish white, pink or purple. The species best known to the natives is Indian medicago [q.v.]. Other species are:—biarticulatum, capitatum, cephalotes, diffusum, gangeticum, heterophyllum, latifolium, laxiflorum, parvifolium, polycarpum, pulchellum, reniforme, rottleri, rufescens, scalpe, triquetrum, umbellatum, wightii.——*Shauliyan* (சாலியன் - sháliyan, Tam.), From (shálika, san. weaver). Weavers, chiefly of coarse colored cloths for women's wear [chaulyan, jauty].——*Shaulmaly* (शाल्मली - shálmalí, San.). The silk-cotton tree. An island lying east of Lunka [q.v.]. Also one of the Sapta dweepams [q.v.]; supposed to extend from the Euxine to the shores of the Baltic and Adriatic seas.——*Shauly* (சாலி - sháli, Tam.). Domestic hindoo 2nd or pers. name [peyar]. As suffix means possessing; as booddhishauly, possessing wisdom.

SHAUM (شام - shám, *Hind.*). From persian. Evening [sundhyay].

SHAUMAY (अणु - anu, *San.*; ساواں - sáván, *Hind.*; ساںوا - sánwá, *Dec.*; ಸಾಮೆ - sáme, *Can.*; చామలు - tsámalu, *Tel.*; ଶୁଆଁ - suniva, *Oor.*; ചാമ - cháma, *Mal.*; சாமை - shámai, *Tam.*). Title from tamul [shyaumam]. San. means small. Mal. from (shyámá, san. dark-brown millet) [shyaumay]. Hind. also (kutkí) [black cootkee, cootkee]. Tel. also (nallatsámalu), meaning black + the plant. Tam. also (tinai) [tinay]. Title otherwise Deccan grass, Little millet, Sanwah. Botanically Panicum [priyangoo] miliare, lam., graminaceæ [vricsham, 156]. Alias Milium effusum; Panicum attenuatum. Leaves smooth, panicle oblong, bowing with the weight of the grain; branches alternate ramous capillary; angular, hispid; flowers oval, paired upon a common pedicel, with unequal partial pedicels; calyces, glumes smooth, striated lengthways with nerves; corol accompanied with a neutral valve; seed oval, striated, smooth, shining, brown. Annual grass, 2-3 feet high, producing many erect branching culms from a single seed; found only cultivated. Grown on account of the grain as a field crop; cultivated in

red soil; dry ground prepared in south in chittray [mausam] or april, on coromandel in shrauvanam or august and bhaudrapadam or september, on w. coast as soon as monsoon [q.v.] sets in, or from the first maidom or april till fifteenth yedavam or may; the ground is ploughed three or four times and levelled; seed sown in south in auvany or august, on coromandel in shrauvanam or august and bhaudrapadam or september; on w. coast between the first maidom or april and fifteenth yedavam or may according as the monsoon [q.v.] sets in; sown broadcast; depends solely upon rainfall; full-grown crop much resembles grass with ears; when the seeds are full ripe, the leaves and the stems become yellow; the plants attain a height of about 2 feet; cut after three months; brought to threshing ground after cutting and trodden by cattle; average price, 30 imperial seers for 1 rupee. Seed is diet in the higher lands; cattle [maud] fond of straw.——**(1)** *Shaumay grass* (ಸಣ್ಣಪುರುಳೆಹುಲ್ಲು - sannapurulehullu, Can.; ചാമപ്പുൽ - chámappul, Mal.; பூப்புல் - púppul, Tam.). Title from resemblance. Can. from (sanna, can. small + puruli, can. parrot + hullu, can. grass), the large being poæoides. Mal. from (cháma, mal. panicum frumentaceum, roxb. + pul, mal. grass). Tam. from (pú, tam. flower + pul, tam. grass); from leaves having fringes of long delicate white hairs. Hind. also (puluka). Botanically Eragrostis [coosham] plumosa, retz., graminaceæ [vricsham, 156]. Alias Poa plumosa, decipiens. Culms filiform, branched, spreading at the base, erect above, 1–2 feet; leaves, linear long hairy at the throat of the sheath; rays of the ovate-oblong diffuse, panicle scattered, horizontal, hairy at the insertions; spikelets depending, pedicelled, four to six-flowered; inner valves ciliated; in tufts on pasture ground; cattle [maud] eat it. Wild shaumay grass, called in hindostany chinkah, is verticillata.——**(2)** *Large shaumay* (श्यामाक - shyámáka, San.; ساوان - sáwán, Hind.; سانوا - sánwá, Dec.; ಸಾಮೆ - sáme, Can.; ಸಾಮೆದರಿ - sámedari, Too.; చామలు - tsámalu, Tel.; ചാമ - cháma, Mal.; சாமை - shámai, Tam.). San. from (shyáma, san. dark-brown). Hind., &c., from sanscrit meaning panicum miliare, lam. San. also (kódrava), meaning growing with little water [khoda]. Hind. also (kodro), meaning paspalum scrobiculatum, linn. Can. also (háraka). Tel. also (bontatsámalu), meaning large + the plant; (barigelu); (peddańdagaddi), meaning large + panicum flavidum, retz. Tam. also (nelluppil), meaning paddy grass; (varagu) [varagoo]. Title otherwise Deccan grass, Semolina. Botanically Panicum [priyangoo] frumentaceum, roxb., graminaceæ [vricsham, 156]. Alias Oplismenus frumentaceus. Culms erect, ramous, a little compressed, smooth, from 2–4 feet high; leaves large, margins hispid; panicle erect, oblong, rigid, composed of numerous, secund, condensed, incurved spikes; they entirely surround the common rachis, and sometimes tend to be verticelled; rachis, common five or six-sided, a little hairy; partial three-sided, waved; flowers almost always three from the same point, one sessile, the second short-pedicelled, and the third a little longer pedicelled; calyx, with all the glumes three-nerved; the two large daggered; corol with a third neutral valve; seed ovate, pointed, smooth. The quickest growing of all millets [q.v.]; invariably sown alone, reaped about the third month; yields a wholesome and nourishing grain, which is of special utility to the poorer classes in affording, by its early ripening a supply of cheap grain before the main autumn food crop is harvested; stalks are used as fodder for cattle [maud].——*Red shaumay* (ಕೋಣನತಲೆಹುಲ್ಲು - kónanatalehullu, Can.; కారుఓడ - kárućda, Tel.; കവരപ്പുല്ല് - kavarappullu, Mal.; சிவப்புச்சாமை - shivappuççámai, Tam.). Title from color of seed. Can. from (kóna, can. buffalo + tale, can. head + hullu, can. grass). Tel. from (káru, tel. forest + óda, tel. panicum brizoides, jacq.). Mal. from (kavara, san. braid of hair + pullu, mal. grass), from growing in tufts; cf. coratty pausy. Tam. from (shivappu, tam. red + shámai, tam. panicum frumentaceum, roxb.). Tam. also (mattangáyppul), meaning pleasure + fruit + grass. Botanically Panicum [priyangoo] egyptiacum, retz., graminaceæ [vricsham, 156]. Alias Dactyloctenium ægyptiacum; Eleusine ægyptiaca. Creeping at the base; spikes four to eight, corymbose, smooth; florets twin, unequally pedicelled; accessory valve of the glume minute or wanting, the rest unequal, nerved and ciliated on the margin. Scarce, growing in tufts; west coast; used as food in famine and somewhat like raggy [q.v.]; cattle [maud] are fond of it.——*Wild small shaumay* (ಕಾಡುಸಣ್ಣಸಾಮೆ - kádusannasáme, Can.). Can. from (kádu, can. wild + sanna, can. small + sáme, can. panicum miliare, lam.). Botanically Panicum [priyangoo] antipodum, sp., graminaceæ [vricsham, 156]. Alias Isachne australis.——*Wild white shaumay* (ಕಾಡುಬಿಳಿಸಾಮೆ - kádubilisáme, Can.). Title from color of leaves. Can. from (kádu, can. wild + bili, can. white + sáme, can. panicum miliare, lam.). Botanically Panicum [priyangoo] prostratum, lam., graminaceæ [vricsham, 156]. Alias Panicum setigerum. Culm creeping, branched, 1–2 feet, nodes pubescent; sheaths glabrous or ciliated; leaves lanceolate from a cordate base, ciliated at the base, 1–2 inches long; racemes four to fifteen, crowded, alternate, much longer than the interstices; spikelets twin and solitary, oval, acute, smooth; lower glume a quarter the length of the flowers; hermaphrodite floret cuspidate-mucronate, slightly wrinkled. Grows amongst bushes and under shade of trees; when exposed to weather the leaves are smooth shining green, and when under trees of a pale color; cattle [maud] are fond of it.

SHAUMBOO (சாம்பு - shámbu, *Tam.*). Means striking. Drum [paray].——*Shaumbaun* (சாம்பான் - shámbán, Tam.). Meaning drum-beater. Cf. Maula. A tribal title of the Tamul pariahs [q.v.]. Pettaun shaumbaun or blessed pariah was one of the sixty-three devotees of shiva [aroopatt moover]; also appellation of nundan [q.v.].

SHAUMIL (شامل - shámil, *Hind.*). From (shamala, ar. to include). Additions to Shist [q.v.], especially that made in Canara by the Bednore and Mysore governments. Shaumilaut are lands which have never been divided, but are held in common [samoodauyam].

SHAUNDOO (ചാന്ത് - chántu, *Mal.*; சாந்து - shándu, *Tam.*). From (sháttu, tam. to smear). Mortar. Aray shaundoo, from (arai, tam. to grind) is ground mortar, or stucco. Caroom shaundoo, from (karum, tam. black) is clay used as plaster. Munn shaundoo is mud mortar. Ven shaundoo is white mortar [cauray].

SHAUNY (गोमय - gómaya, *San.*; گوبر - gobar, *Hind.*; ಸಗಣಿ - sagani, *Can.*; ಅಂಬಿ - ambi, *Too.*; పేడ - péda, *Tel.*; ചാണകം - chánakam, *Mal.*; ගොම - góma, *Singh.*; சாணி - sháni, *Tam.*). Title from tamul from (chhagana, san. dried cowdung). San. from (gó, san. cow + maya, san. belonging to). Cowdung. Held in high estimation by all natives. With it they besmear the mud floors and walls of houses, with a view to cleanliness and to its pleasant odour. They also make it into balls, which being burnt the ashes form a whitish powder [tirneer, vibhooty], and sheiveites rub this over their foreheads horizontally [tripoondram]. Where cowdung is plentiful it is used as manure [yeroo]. Also fuel [bratty]. Shauny paul, from (pál, tam. juice) is juice or essence extracted from cowdung used for sealing a heap of corn in the threshing floor [calam].

SHAUR (சாறு - sháru, *Tam.*). Juice, toddy.——*Shaunaun* (ചാന്നാൻ - chánán, Mal.; சாணான் - shánán, Tam.). From (sháru, tam. toddy). The corresponding terms are:—Can. billawa, Tel. yeediga, Mal. ilavan. A low caste very numerous in Tinnevelly, whose hereditary occupation is that of cultivating and climbing the palmyra [q.v.] palm, the juice of which they boil into a coarse sugar [jaggery]. They are also styled Naudaun [q.v.], and they append to their names the term Graumany [q.v.] as a tribal title. The Shaunaur have a tradition that they came from the north of Ceylon. The Haleypeik of the upper canarese country and the Billawar below the ghauts [q.v.] are nearly allied to them. The majority of the Shaunaur confine themselves to the labor appointed to their race, but a considerable number have become cultivators of the soil, as landowners or farmers, or are engaged in trade. In Madras a settlement of Tinnevelly shaunaur have adopted rice boiling as an occupation. They are everywhere a hard-working, industrious people, eating freely of fish and flesh, and drinking the toddy [q.v.] or palm wine; in the sandy seacoast wastes of the south of the peninsula, they have widely extended the cultivation of the palmyra [q.v.] tree; they claim a seigniorage over these tracts, and they are largely occupied in extracting the palm wine. In appearance they are a dark-skinned race, with low foreheads, sunken eyes, and prominent cheek-bones. The dravidian demonolatry, or devil-worship, is retained by the shaunaur more than by any other caste; see vol. I (80); of all indian tribes however they number most converts to christianity. On the east coast they are divided into three minor divisions, Tennan shaunaur, Panan shaunaur, and Eetchan shaunaur, the prefix in each case denoting the kind of trees from which they draw toddy; cocoanut [q.v.], palmyra [q.v.] and wild date [q.v.]. The division refers merely to occupation and indicates no social distinction. Around Madras the Shaunaur are divided into two classes, the higher and the lower; the latter are called Pully shaunaur. There is nothing very peculiar about the habit, custom, or dress of the Shaunaur to separate them from other Hindoo castes, apart from their occupation. The Shaunaun, when accoutred, has first in importance among his appointments, the Arivaul petty or knife-box, made from the sheath of the spathe and bound round tight with two binders of rattan [q.v.]. A strongly plaited rope is permanently fastened to one side of the Arivaul petty; the short arm of it has a much smaller loop; when fastened round the waist, the longer arm is passed inside the small loop of the short arm. Through the loop of the long arm, the toddy-drawer passes the end of his waist-cloth and ties it into a knot. Next in importance is the Yairpetty, into which the toddy-drawer empties the toddy collected in the pot or chatty [q.v.] up the tree. It is made of palmyra fibre closely plaited, and, when moistened, is water-tight. Two wooden collar shavings, about two inches broad, encircle the mouth of the Yairpetty, one inside and one outside; between them the plaited wicker-work is run up and made fast. To keep the Yairpetty in its bulged, bottle-like form, a piece of rattan about half-way down is woven in, and encircles the vessel like the hoop of a barrrel. The Yairpetty hangs suspended at the waist. It takes nearly a year's practice to make a man master of the curious mode of climbing, after which the loftiest trees are ascended in a minute with surprising ease. After a hard morning's work,

the left arm always aches more than the other limb, showing that there is more strain on it than anywhere else. When an accident befalls a toddy-drawer, it is usually occasioned by his left hand missing its hold on the tree and slipping aside, which brings him to the ground instantly, often with fracture or injury of that limb. When the spathe is a month or a month and-a-half old the toddy-drawer begins his labors by binding the sheath to prevent its expansion, after which he cuts about an inch off the end, and then gently hammers the flowers which are thereby exposed. Finally, he binds up the end with a broad strip of fibre and descends. This process he continues morning and evening and for fifteen days, a thin slice being cut away on each occasion. During this time also, by shaving away a portion of the under part of the sheath, he trains it to bend over. The exact term of days during which the spathe undergoes this initiatory preparation varies in different places, and depends upon surrounding circumstances; but the time when a spathe is ready to yield toddy will be easily known by the chattering of birds, the crowding of insects, the dropping of the juice, and other unmistakeable signs. When ready, the end of the spathe is fixed into a Coodoovay or small pot, and a small slip of leaf is pricked into the flowers to catch the oozing liquor, and to convey the drops, without wasting, clear into the vessel. When the spathe begins to yield toddy, the shaunaun ceases to hammer it. It will give toddy for about a month, during which time, every morning and evening, he mounts the tree, empties the toddy into his Yairpetty, binds the spathe an inch lower down, smears the end of it with his Paulay muttay, and shaves a little away, then pricks in the slip of leaf, and ties the Coodoovay on again. The man who ascends the tree is generally a paid servant, receiving about rupees seven a month. He will attend to thirty or forty trees. Forty trees yield about twelve madras measures of juice, seven in the morning and five in the evening. During the heat of the day the spathe does not yield so freely as in the night. Twelve measures for forty trees is at the rate of a little more than one-fourth of a measure to each tree. A first rate tree in a good soil, and carefully tended, will produce one measure during the night, and three-fourths or one-half of that quantity during the day; but, taking one tree with another, a quarter of a measure is a fair average. Some trees, under favorable circumstances, continue yielding at this rate throughout the year, others only for six months. It is not prudent however to draw all that is possible from them, as they thus soon become barren. Every morning and evening, when the shaunaun goes to draw the toddy, a servant or some one connected with the owner or contractor for the trees, accompanies him with a chatty [q.v.], into which is emptied the toddy from the Yairpetty. When all the trees have been visited, and the toddy measured into the chatty or Cull paunay, it is carried away to the bazaar rented by the contractor from Government at a fixed price. There are some 500,000 shaunaur in the presidency, mostly in Tinnevelly. See vol. I (35), (54), (68), (128); II, 131, 231.——*Shaunautty* (சாணாத்தி - shánátti, Tam.). Female of Shaunaur caste [jauty].

SHAURICAY (शारिका - shàriká, *San.*). From (sri, san. to go) [sar]; from active habit. Merulidæ family dentirostres, insessores, aves [pacshy, 21], of naturalists [jantoo]. Thrushes. Divided into:—Myiotherinæ, ground thrushes, small, with short wings and tails, nidificate in bushes on the ground, or on rocks near water. Merulinæ, true-thrushes, and black-birds, sombre colors, many black; frequenting woods and gardens; flight is somewhat undulating, but strong and vigorous. Timalinæ, babblers; divided into finch-thrushes, jay-thrushes and shrike-babblers; quaker and wren-babblers; creeper-thrushes; laughing-thrushes; true-babblers and reed-thrushes. The species best known to the natives are shown below, but others are very numerous.——*Blue-rock thrush* (पांडु - pándu, Mahr.; شاما - shámá, Hind.; పొడకచ్చిపిట్ట - podakaççipitta, Tel.). Tel. from (poda, tel. spot + kaççe, tel. quarrel + pitta, tel. bird). Petrocossyphus cyaneus, merulinæ, merulidæ. Alias Petrocincla affinis, longirostris, maal, pandoo. Pandoo from mahratta. Male throughout dull indigo [q.v.] or antwerp blue, more or less marked dusky; familiar bird, perching on a house-top; agreeable song; the 'sparrow that sits alone on the house-top' of the bible.——*Dausary bird* (దాసరిపిట్ట - dásaripitta, Tel.). From (dásari, tel. veishnavite mendicant + pitta, tel. bird), from stripe on face resembling caste mark of the mendicant. Tel. also (námálapitta), meaning striped + bird. Title otherwise Southern scimitar bird. Pomatorhinus horsfieldii, timalinæ, merulidæ. Above deep olive-brown; white superciliary stripe; neck in front, breast and middle of abdomen white; flanks, vent and under tail-coverts olive-brown; bill yellow, dusky, above green; legs dusky green; shy and wary; usually in pairs, the male calling out hoot, hoot, hoot, while the females answer hooee.——*Dung bird* (کہیرا - khairá, Hind.; చింద - chinda, Tel.; கள்ளிக்குருவி - kallikkuruvi, Tam.). Title from picking up grain from dung. Tam. from (kalli, tam. euphorbia tirucalli, l. + kuruvi, tam. small bird); from resort. Tel. also (sida). Tam. also (panrikkuruvi), meaning pig + bird; (píkkuruvi), meaning dung-bird. Title otherwise White-headed babbler. Malacocircus griseus, timalinæ, merulidæ. Alias Malacocircus affinis. Head, lores and nape fulvescent or dirty whitish; found in every hedge, avenue, and garden; occasionally seen seeking insects or grain from heaps of dung; cry a whispering sort of chatter, no song; flight slow and laborious; breeding at all times from january to july, and even later; the female of black and white crested cuckoo [koel], coccystes melanoleucos, selects this bird to act as foster parent to her own egg.——*Golden-thrush* (نورنگا - naurangá, Hind. and Dec.; పొన్నంగి - ponnangi, Tel.). Hind. from (nau, hind. nine + rang, hind. color). Tel. from (ponnu, tel. gold + anga, san. body); from color of body. Title otherwise Yellow-breasted ground thrush. Pitta bengalensis, myiotherinæ, merulidæ. Alias Pitta brachyura, triostegus. Common; in the carnatic [q.v.] chiefly occurs in beginning of hot weather, when land-winds first begin to blow; progresses by hopping; in general silent.——*Grass bird* (గడ్డిపిట్ట - gaddipitta, Tel.). Title from resort. Tel. from (gaddi, tel. grass + pitta, tel. bird). Chætornis striatus, timalinæ, merulidæ. Alias Dasyornis locustelloides. Above olive or yellowish brown; beneath white, tinged earthy brown on breast, and with a few dark specks; in long grass and rice fields.——*Neilgherry black bird* (பீக்காக்கை - píkkákkai, Tam.). Tam. from (pí, tam. the cry + kákkai, tam. crow); in imitation of cry. Merula simillima, merulinæ, merulidæ. Male entirely black, conspicuously darker on head and back of neck; somewhat lighter beneath, tinged with dusky-brownish; female dusky olive-brown above; same, but lighter, beneath; bill, eyelids and gape, deep orange; legs dusky-yellow; claws yellow; irides dark brown; young bird resembles the female, but is spotted; very similar to the european bird, differs in being rather smaller in size, not quite so deep a black, and in having yellow instead of brown legs; neilgherry and pulney hills; feeds much on indian winter cherry [q.v.] agreeable song.——*Red-headed thrush* (تین رنگ کا کستوری - tínrangkákastúrí, Hind. and Dec.; ఎర్రపొన్నంగి - erraponnangi, Tel.). Hind. from (tín, hind. three + rang, hind. color + kastúrí, hind. thrush); red head, upper plumage leaden, lower plumage dusky white. Tel. from (erra, tel. red + ponnangi, tel. thrush); from color of head. Title otherwise White winged ground-thrush. Geocichla cyanotus, merulinæ, merulidæ. Peculiar to southern india, extending as far as goomsoor on the east coast, and to bombay on the west side; most abundant in forests of malabar and wynaud; is not rare in the jungles of the eastern ghauts; prefers bamboo-jungles, feeds on the ground, and generally perches low; food is chiefly insects [poochy], ants [choomtee], cockroaches [jhingoor] and beetles [zeerangy]; not unfrequently, also stony fruit. Agreeable song.

SHAUS (शास् - shás, *San.*). To protect, rule, enact, teach. ——*Shastram* (शास्त्र - shástra, San.). See sep. title.—— *Shausanam* (शासन - shásana, San.). From (shás, san. to enact). An inscription on stone or copper [aursham]. The following is specimen of an ordinary Tamul inscription on stone, being taken from the inner gopooram [q.v.] of the temple [coil, pagoda] of Soobramanyan [q.v.] at Tirparacoondram, four miles south of Madura:—*சாலியவாகன சகார்த்தம் ஆளாயசஞுறு மேல் செல்லாநின்ற பரிதாபிவரு பங்குனிமீ சஉ புதன் கிழமையும் சுக்கிலபட்சத்தில் திதிகைரோவதி நட்சத்திரமுஞ் சூலநாம யோகமும் பாலவாகரண (முங்) கூடிய சுபதினத்தில் அசாதகேபிலே நபாபுசாயபு அவர்கள் ராட்சியம் ஆளுகிறநாளையில் மாடல்கூடின மதுரைச்சீமை அமீ காதர்சாயபு அவர்கள் மாமுலத்தச்செய்கிற போதும் துரைபாண்டி பதிஞலுதலத்தில் திருப்பரங்குன்றம் தலத்தில் நடந்தவயனம் அசாது கிர்சுரபுரம் நபாபுசாயபு அவர்கள் திவானிசுருயஸ்ரீகோபாலராயரவர்கள் ஞாளையில் தலத்தில் ரிசுமிட்டு வெள்ளைக்காரர் பாளையம்வந்து இரங்கி சொக்கநாதர் கோவிலும் இடித்து பழனியாண்டவன் கோவிலையும் இடித்து ஊரையும் ஒப்புக்கொண்டு ஆஸ்தானமண்டபம் கைக்கொண்டு அட்சகோபுரவாசல் கதவையும்வெட்டி கலியாணமண்டபத்துக்கு வருகிறபக்குவத்தில் திருவிழாவம் நின்று தலமும் ஊரும் எடுபட்டுப்போரதா யிருக்கிறதென்று தலத்தாரில் சுந்தரபட்டர் தெய்வேந்திரபட்டா குட்டிபட்டிபட்டர் சிதம்பரம்பிள்ளை விழுப்பாதராயர் ஆறு திறுபாகக்காரர் உள்ளிட்டாரும் நாட்டாண்மை முத்து கருப்பபிள்ளை உள்ளிட்டாரும் காவல் ஆறு கரைப்பேர் உளளிட்டாரும்கூடி உயிராவி முத்துக்கருப்பன்மகன் குட்டியைக் கோபுரத்திலேரி விழச்சொல்லி அவன் விழுந்து பாளையம் வாங்கிப்போனபடியினாலே அவனுக்கு ரத்தகாணிக்கை பட்டயம் எழுதிக் கொடுத்தோம் ரத்தகாணிக்கை நிலம் தெங்கால் புரவில் அம்மாபாகத்துக்குத்தெற்கு மதுரை பாதைக்கும் குளத்துக்கரைக்கும் கிளக்கு வீரப்பபிள்ளை தெப்பகுளத்துக்கு மேற்கு தெப்பக்குளம் வாய்க்காலுக்கு வடக்கு இன்னைன்கெல்லைக்குள்ப்பட்ட திருத்தலநிலம் ஒருமாவும் கிர்ஷ்ணபுரம் குடியிருப்புக்குமேற்கு சுந்தரபட்டர் ஆண்டிச்செய்க்கிழக்கு சரவணப் பெருமாள்பட்டர் திருத்தலுக்கும் வாய்க்காலுக்கும் தெற்கு மதுரைப்பாதைக்கும் வடக்கு*

இன்றுங் கெல்லைக்குள்ப்பட்ட ஊரடிநிலம் ஒருமாவும் ஆக ரெண்டுசெய்யும் உளவடை மேல்வாரம் கட்டுச் சுவந்திரம் சர்வசுத்தமானியம்பண்ணி கோவிலில் நித்தியப்படி அரைப்படி அரிசி சாதமும் கொடுத்து கிராமத்துவரி நலொட்டுவரி ஆயும் உள்பட சுத்தமானியமாய் கல்லுங்காவேரி புல்லும்பூமியும் சந்திராதித்தியருள்ளவரைக்கும் புத்திரபவுத்திர பாரம்பரியாய் ஆண்டுகொள்வாராகவும் இதுக்கு விகாதம் பண்ணினவன் கெங்கைக்கரையில் காராம்பசுவைக் கொன்றதோஷத்தில் போவாராகவும் குமரன் துணை.—"On the fortu-"nate day Wednesday, the fourth tity [q.v.] of the month of "Pungoony [mausam] or March in the year Paritaupy [brihas-"paty chuckram, paridhauvy], which was current after the "1714th elapsed year of the Shalivahanasaca [q.v.], and on the "second day of the light fortnight [shooclapacsham] in which "the asterism [nacshatram] of Raivaty [q.v.], the yogam [q.v.], "named shoolam [q.v.], and the caranam [q.v.] baulavam were "in conjunction, while Asauta kepilay nawaub sahib avergal was "ruling over the kingdom, and while Ameer cawder sahib "avergal was ruling over the dominion of the Madura country "which has many palaces, the following event occurred in holy "place of Tirparacoondram, which is one of the fourteen holy "places of Toray paundy [q.v.], &c. In the time of the "diwaunship of Raja shree gopaula royer avergal, under Asad "nawaub sahib of Trichinopoly, a regiment of Europeans came "and destroyed the Chokkanautan [q.v.] temple, and even the "temple of Pulney aundy [q.v.], seized the town, took into their "hands the Astauna mantapam [q.v.], broke the gates of the "Atcha gopooram [q.v.], and were approaching the Calyauna "mantapam [q.v.]. Of the residents of that holy place, Soondra "bhattar, Devendra bhattar, Coottiputty bhattar, Chidambaram "pillay, Viloopauta royer, the six managers with their followers, "the chief Mootcarooppa pillay with his followers, the six "watchmen with their followers, all these seeing that the town "and its holiness would be destroyed and that the festivals "[ootsavam, pundigay] would be discontinued, asked one Cootty, "the son of Veirauvy mootcarooppan, to ascend the tower and "jump down; and as the regiment went away as soon as he fell, "they gave him this written document as a favor for the blood. "The lands given in favor of the blood shed are:—in the village "of Tengaulpooravoo, the land situated to the south of Amma-"paukam, to the east of the way to Madura and the tank bank, "to the west of Veerappa pillay teppacoolam tank, and to the "north of the teppacoolam channel; thus: one mah [q.v.] of the "temple land within these four limits, and one mah of land in "the borders of this town, which land is situated to the west of "the inhabited portion of Krishnapooram, to the east of the "Aunditchey land belonging to Soondra bhattar, to the south of "the channel and the mended land of Sharvana permaul bhattar, "and to the north of the way to Madura, thus one mah [q.v.] of "land within these four limits. We, in total, give you two cheys "[q.v.] of land with the right of ploughing and collecting the "crops yourself without giving any portion of it to your superiors, "and we have also ordered that that quantity of cooked rice, "which half a measure of raw rice [q.v.] can give to be given to "you daily from the temple. The village shall pay your tax "with its tax. Thus in free gift may you, so long as last the "stone and Cauvery, the grass and earth, and the sun and moon, "enjoy these privileges, and transmit them to your sons and "grandsons. He who obstructs this charity shall go in the sin "of one who has killed a black cow on the banks of the Ganges. "May Coomaran [q.v.] help us!" For a shausanam of west coast see Jonaca.——*Shaustauv* (ശാസ്താവു - shástávu, Mal.). Means protector. A deity worshipped in Malabar born of Shiva [q.v.] and Vishnoo [q.v.]. Chief place of worship, Aryancauv [ayen].——*Shauttan* (சாத்தன் - sháttan, Tam.). From (shás, san. to protect); protector. Death demon [bhootam]. Form of shaustauv.——*Shauttore* (சாத்தூர் - sháttúr, Tam.). See sep. title.

SHAUTTORE (சாத்தூர் - sháttúr, *Tam.* sátúr*). From (sháttan, tam. aiyyanár, the village deity + úr, tam. village) [shaus].——**(1)** Talook, Tinnevelly district. Tahsildar's pay Rs. 150. Area 570 square miles. Population 184,329. Language Tamul. N.E. of district. Bounded north by Tirmungalam talook and Ramnaud zemindarry of Madura district, west by Shreevillipoottore talook, east and south-east by Ottapidauram talook, and south-west by Shuncaraneinarcoil talook. The northern portion, which is flat or slightly undulating, includes a large part of the wide valley of the Shauttore. This part of the country is bare for miles together, the only trees being the babool [q.v.] thorn and a few tope [q.v.] trees. To the south and west there is more variety and the country rises. The drainage flows partly south-east towards Ottapidauram and Tuticorin. Coilputty, a station of the South indian railway, stands on the water-shed [nadee] between. The northern and eastern villages are parts of the black cotton [regar] plain. To the south and west the country is broken up by ridges of gneiss or quartz [vencull] supporting large areas of red loam and sand. The red soil covers a considerably larger area than the black soil. Of the black soil about half is fair, one-tenth is good, and the rest poor, gravelly and salt. Of the red, half is fair and the rest sandy. Cotton [q.v.] is the staple produce of the northern and eastern parts; cumboo [bajrah], gram [q.v.], tobacco [pogauk], chillies [q.v.], and vegetables are also grown. The villages in the south and south-west are better provided with trees. The soil is mostly poor, the staple cultivation in dry lands being cumboo [bajrah] and gram [q.v.] under wells; raggy [q.v.], chillies [q.v.], vegetables [keeray], and rice [q.v.] under tanks. Much business done in cleaning and pressing cotton. Tobacco prepared for chewing and sent to Travancore. As in Ottapidauram, the water in the wells is brackish and apt to fail in the hot weather. Most of the villages have small tanks or Oornies [q.v.] for storage of water. There are five river-fed tanks and fifty-nine rain-fed tanks in the Government villages, the irrigated area being only 3,320 acres. There are 999 old wells and many new ones. The Shauttore river collects the water of many streams rising in Shreevillipoottore talook and in South madura. It is crossed by the high road and South indian railway by bridges 150 to 200 yards long close to Shauttore. It is full only in floods during the north-east monsoon [q.v.], at which time it occasionally carries a heavy flood, but is too sudden and occasional to be of much use for irrigation. Zemindarries:—Gollaputty, Munnarcottah, Nullamoottanputty, Ovayanaickanputty, Pauvauly, Sevvalputty, Shennelgoody, Vaudy mittah, Yelayirampunnay. Places of archæological interest:—Colavarputty, Coondalacoott, Nemmainy, Panaiyadiputty, Shauttore, Tirtancaul, Veippalputty, Vembacottah, Viroothooputty, Wondipoolinaickanore, Yercangoody. Principal trig. station:—Coilputty. The leading places, &c., in the talook are the following.——*Coilputty* (கோவிற்பட்டி - kóvirbatti, Tam.). See sep. title.——*Gollaputty* (கொல்லபட்டி - kollappatti, Tam.). From (golla, can. cowherd + patti, tam. village). Zemindarry, Village; pop. 2,093; acres 10,722; lat. of village 9° 20′; long. 77° 59′; from Shauttore E.S.E. 2 miles; from Tinnevelly N. 45 miles. Weekly fair on Sundays. An anicut across the Veippaur. Peshcush Rs. 3,223.——*Mailpoothore* (மேலப்புதூர் - mélapputhúr, Tam.). From (mél, tam. west + puthu, tam. new + úr, tam. village). Village; pop. 885. Baptist mission station.——*Munnarcottah* (மன்னார்க்கோட்டை - mannárkkóttai, Tam. mannárkóta *). From (mannan, tam. king + kóttai, tam. fort). Zemindarry, Village; pop. 749; square miles 48; lat. of village 9° 27′; long. 78° 02′; from Shauttore N.N.E. 7 miles; from Tinnevelly N.N.E. 52 miles. Peshcush Rs. 5,093.——*Sevvalputty* (செவ்வல்பட்டி - shevvalbatti, Tam. sevalpati *). From (shevval, tam. red + patti, tam. Village). Zemindarry, Village; pop. 1,771; acres 20,354; lat. of village 9° 18′; long. 77° 46′; from Shauttore W.S.W. 13 miles; from Tinnevelly N. 40 miles. Peshcush Rs. 6,122.——*Shauttore* (சாத்தூர் - sháttúr, Tam.). See below.——*Shivacaushy* (சிவகாசி - shivagási, Tam. sivakási*). From (shiva, san. the god + káshi, san. benares). Town; pop. 12,184; acres 679; lat. 9° 27′; long. 77° 50′; from Shauttore N.W. 11 miles; from Tinnevelly N. 50 miles. Chiefly inhabited by Shaunaur [q.v.] who carry on active trade with Travancore, chiefly tobacco [pogauk] and cotton [q.v.]. Fine reservoir with pavilion in centre. Festival in May. Weekly fair on Tuesday.——*Vaudy mittah* (வாடிமிட்டா - vádimittá, Tam. vádimitta *). From (vádi, tam. enclosure + mitta, tel. estate). Zemindarry, Village; pop. 320; square miles 21; lat. of village 9° 28′; long. 77° 56′; from Shauttore N.N.W. 8 miles; from Tinnevelly N.N.E. 52 miles. Peshcush Rs. 5,440.——*Vembacottah* (வெம்பக்கோட்டை - vembakkóttai, Tam.). From (vembu, tam. to be scorched + kóttai, tam. fort). Village; pop. 987; acres 3,647; lat. 9° 26′; long. 77° 48′; from Shauttore W. 10 miles; from Tinnevelly N. 42 miles. Cattle [maud] and sheep [aud] thrive. Common cloths manufactured.——*Viroothooputty* (விருதுப்பட்டி - viruthuppatti, Tam.). See sep. title.——*Yelayirampunnay* (ஏழாயிரம்பண்ணை - ézháyirambannai, Tam.). From (ézhu, tam. seven + áyiram, tam. thousand + pannai, tam. farm establishment). Town, Zemindarry; pop. 4,298; acres 5,650; lat. 9° 16′; long. 77° 52′; from Shauttore S.W. 8 miles; from Tinnevelly N.N.E. 38 miles. Weekly fair on Wednesday. Peshcush Rs. 5,022.——**(2)** Village, Railway station, Head-quarters of Tahsildar; Tinnevelly dist., Shauttore tal.; pop. 2,887; acres 1,980; lat. 9° 21′; long. 77° 58′; height 208 feet; from Madras S.S.W. 295 miles; from Palamcottah N.N.E. 44 miles; from Shermadevy N.N.E. 51 miles; from Tinnevelly N. 45 miles; from Shreevillipoottore E.S.E. 23 miles; from Tuticorin N.N.W. 41 miles. On north bank of Veippaur. Former centre of zemindarry [q.v.] of great antiquity. On a mantapam [q.v.] 4½ miles east are sculptured figures. Five miles north-east is an old temple on a rock, built over a statue found at Coondalacoott. Near this is a temple of Chokkalinga sawmy. Near this is a high ground, the site of an ancient city, where sepulchral urns [mady moottaur tauzhy] and pottery, broken ornaments, &c., are found.

SHAUVAGAM (சாவகம் - shávagam, *Tam.*). Javanese.

SHAUVY (సావి - sávi, *Tel.*; சாவி - shávi, *Tam.*). From (shá, tam. to die). Crops withered for want of moisture [sookty]. Poollary shauvy is remission when grazing lands themselves are shauvy [poollary]. Neer shauvy is blight from floods [vellam].

SHAUYAM (राग - rága, *San.*; لون - laun, *Ar.*; رنگ - rang, *Pers.* and *Hind.*; ಛಾಯೆ - chháye, *Can.*; చాయ - tsáya, *Tel.*;

ചായം - chháyam, *Mal.*; சாயம் - sháyam, *Tam.*). San. from (rañj, san. to color); Drav. from (chháya, san. color). Dye. The methods of dyeing practised by the Tamulians are generally tedious and complicated, yet they have long possessed the art of giving beautiful and permanent colors to cotton [q.v.] goods. The country supplies all the raw materials for producing a variety of colors, and the workmen have long been acquainted with various mordants [cauram]. They are able to impart durable colors in reds, blacks and blues, and their various modifications; but the deep greens, yellows and other colors are more fugitive. From the diversity of subtsances used as dyes including metals, woods, flowers, roots, barks, leaves, fruits, lichens, insects, &c., there is considerable variation in the methods. This variety is increased by the different nature of the materials to be dyed, viz., animal substances, as wool [pushm], silk [puttoo] and leather [chamrah]; or vegetable materials, as cotton [q.v.], flax [alsee] and wood.——(1) The following are cotton yarn-dyeing processes under heads of principal colors.—"*a*" For red. Dissolve a small quantity of ashes, procured by burning the milk-hedge tree [round milk-hedge] in water, filter and add an equal quantity of sheep's droppings and gingelly [q.v.] oil to the solution. Soak the yarn in the mixture twice a day for twenty days, drying the yarn in the sun during the intervals. Wash the yarn white in pure water and dry. Steep it in a mixture of chayroot [q.v.] powder, and cassa [q.v.] leaf, coarsely powdered, for three successive days both morning and evening, drying the yarn during the day, steep the yarn again for five days, morning and evening, in a mixture of chayroot powder and drying it for five successive days and on the sixth night, boil the yarn in a closely covered vessel for twelve hours, and wash it in pure water on the following morning, when a fast red color will be found. If the yarns dyed by the above process be steeped for some time in a solution of indigo [q.v.], a deep purple color will be produced. If white yarn prepared as above detailed be soaked for five successive days, both morning and evening, in a solution of Shoorool puttay [pappily], and the yarn dried in the sun and boiled as prescribed for red, a shade of light purple color will be produced.—"*b*" For blue. If a mixture made of powdered choonam [q.v.] and extract of Cassia tora, linn. [chakondah], be put into an earthen vessel, partly buried in the earth and the yarn be steeped in it for eight days, different shades of black will arise. The mixture must be constantly stirred while dyeing. When a light preparation of the mixture is made and the yarn soaked in it three times a day, sky blue color arises.—"*c*" Black. If white yarn be soaked in a paste made of Cadookye powder, Terminalia chebula, retz. [chebulic myrobalan], and green vitriol [annabhaidy] and again steeped in a bath of tank mud, it will take various shades of black color, according to intensity of dye.—"*d*" Pink. If powdered Coosumbah flower, Carthamus tinctorius, linn. [bastard saffron], be well washed with water and mixed with Appalacauram [q.v.] then trodden with the feet, strained, and fixed by adding lime-juice [lime], bleached yarn soaked in this mixture gains a good rose color.—"*e*" For orange. Mix turmeric [country saffron] powder in water, soak the bleached yarn in this mixture and dry, soak the yarn again in the Coosumbah [bastard saffron] mixture mentioned under pink.—"*f*" For yellow. Mix a quantity of turmeric powder in water, soak the yarn for twenty-four hours, squeeze and let it dry, repeat the operation for four successive days, then soak the yarn again in a solution of turmeric [country saffron] powder with alum [padicauram], morning and evening, squeeze the yarn and let it dry.—"*g*" For straw color. Soak the yarn in a solution of turmeric powder and water four or five times, squeeze and steep the yarn again in a solution of lime-juice [lime] and fresh water for about an hour, squeeze it well, and dry.—"*h*" For green. Soak the bleached yarn in a solution of indigo [q.v.], dry and then steep it in a solution of turmeric [country saffron] powder and water for forty-eight hours, wash the yarn in a mixture of lime-juice [lime] and water and dry it in the shade.—"*i*" For orange, again. Tie a quantity of Arnatto seeds [monkey country saffron] in a piece of cloth, soak it in water for twelve hours, squeeze the coloring matter out in a basin of fresh water, add cocoanut [q.v.] water, lime-juice [lime] and alum [padicauram] powder, steep the yarn in the mixture for four hours and then boil it for an hour, squeeze and let it dry.——(2) The following are methods of dyeing silk [puttoo] yarn.—"*a*" To bleach it. Steep the silk in a solution of choonam [q.v.] and dhobys' earth [q.v.] for twenty-four hours, wash the yarn in fine water and then soak it in alum [padicauram] for an hour and again for two hours in a mixture of soap [sauboon] and indigo [q.v.] when the yarn will be bleached to a white color, wash and let it dry.—"*b*" For a red color. Tie a quantity of stick lac [q.v.] coarsely powdered in a strong cloth, and macerate it in warm water, bruising it occasionally with a wooden hammer, till it ceases to yield any coloring matter; add to the liquor a small quantity of tamarind [q.v.] pulp and alum [padicauram] powder, boil the silk in this mixture for two hours, and wash, when a deep red color will be produced.—"*c*" For a crimson color. Make a mixture of small dyeing mulberry [q.v.] seeds, add alum [padicauram] and boil the silk, which has been previously bleached and dyed deep red, for an hour, squeeze and dry.—"*d*" For an orange color. Make a mixture of Fuller's earth [dhoby's earth] and kamela [q.v.] powder, add a small quantity of alum [padicauram] and boil the silk, which has been previously bleached and dyed red, for two hours, when cold squeeze and dry.——(3) The following are the mineral ingredients used in dyeing by the tamulians; but it is difficult to say where each is a mordant [cauram], and where it is a dye-stuff:—Abruck; mica or talc [abruck, talc]; well known for its metallic lustre and its peculiar cleavage, splitting into thin plates; in a roughly powdered form used by dyers and washermen to sprinkle on cloth so as to give it a sparkling appearance. Anna bhaidy [q.v.]; sulphate of iron; a dye or rather a mordant used with organic products to give a black or dark brown dye; this salt, associated with organic matter, produces the following colors, black, blue-black, dark-green, dark-brown, brown and slate grey; used in dyeing, tanning [chamrah] and painting [rangh] and in the manufacture of ink [mashy, shye] and prussian blue. Cauvy [q.v.]; ochre; dyes a brownish red. Choonam [q.v.]; lime; used in calico-printing with gums [gond] as a resist paste; this is an auxiliary of dye different from a mordant. Gandhac ooppoo [q.v.]; sulphate of soda; this is an auxiliary of dye different from a mordant, used like soap [sauboon] to wash fabrics before dyeing them. Ghil arminy [q.v.]; armenian bole; dyes a nankeen color. Hartaul [q.v.]; orpiment or golden pigment; used in dyeing yellow. Iroomboo pody [q.v.]; iron filings; used with vinegar [candy] and the bark of terminalia [antyaparny, murdah] alata for dyeing black. Jautilingam [shangarf]; cinnabar; a good pink, sometimes used as a dye, but more frequently as a pigment vermilion prepared by reducing the ore to a powder or by chemical action. Mara ooppoo [jhar ka namak]; carbonate of potash; used in dyeing and bleaching. Mayil toottam [q.v.]; blue vitriol; employed in making ink [mashy, shye] and in the process of cotton [q.v.] and linen [alsee] printing; used as a mordant and an auxiliary and in leather [chamrah] dyeing along with lime [choonam] to produce a light blue. Navachauram [nowshaudar]; sal ammoniac; this, with salts of copper [taumram] and catechu [q.v.], yield a permanent bronze color. Ooppoo [q.v.]; common salt; used with other articles. Padicauram [q.v.]; alum; most common indian mordant; used especially with madder [munjeet] and turmeric [country saffron]. Pooraun cauvy [q.v.] cull; yellow ochre; occasionally used as a dye under the name of ramraj; also called zard or pillimitty. Pottle ooppoo [shorah]; saltpetre; in solution is used in wool-dyeing. Shivappoo cauvy [q.v.]; red ochre; extensively used by hindoo devotees in dyeing cloths of a dull orange color; largely used by dyers for other colors; earth is simply powdered and mixed with water into which cotton cloth is steeped. Sujjee khaur [q.v.]; carbonate of soda; used in extracting the crimson dye from safflower [bastard saffron]; also in bleaching. Tooroo [iroomboo tooroo]; rust of iron [auhan]; used in dyeing black. Vellay toottam [q.v.]; white vitriol, sulphate of zinc. Zangaur [q.v.]; verdigris; used in dyeing black orange shade, green, and with sal ammoniac [nowshaudar], blue.——(4) The only animal substance used by the tamulians as a dye is lac [q.v.]; used chiefly in coloring leathers [chamrah].——(5) The following are two key-lists in the briefest possible terms of the principal vegetable dye substances of s. india for which vernacular names are known; further information must be traced in the glossary paragraphs through the small-type cross references at end of this volume; see also vricsham, 7 for the method of expressing the products, &c., of plants in the dravidian languages.—"*a*" Acacia arabica, babool, bark; Acacia catechu, catechu, cutch; Acacia farnesiana, cassie-oil plant, bark; Acacia leucophlœa, white babool, leaf; Adenanthera pavonina, false red sanders, wood; Adhatoda vasica, malabar nut, leaf; Ægle marmelos, bael, rind; Ailanthus excelsa, coromandel ailanto, gum; Albizzia stipulata, stone sirissa, bark; Aloe vulgaris, barbadoes aloe, aloes; Alpinia galanga, greater galangal, root; Althæa officinalis, hollyhock, leaf; Anogeissus latifolia, vekkauly, gum; Anona reticulata, bullock's heart, fruit, leaf; Areca catechu, areca, nut; Artocarpus hirsuta, anjely, bark; Artocarpus integrifolia, bread fruit, wood; Artocarpus lakoocha, lakoocha, root; Basella cordifolia, heart-leaved malabar night-shade; Basella rubra, red malabar night-shade; Berberis aristata, berberry root, wood; Bixa orellana, monkey turmeric, seed; Bombax malabaricum, red-cotton tree, gum; Bruguiera gymnorhiza, tree mangrove, bark; Butea frondosa, bengal kino, flowers; Cæsalpinia sappan, sappan, wood; Calotropis gigantea, mudar, sap; Carthamus tinctorius, safflower, flower; Cassia auriculata, tungaid, bark; Cassia tora, chakondah, seed; Casuarina equisetifolia, whip tree, bark; Cedrela toona, toon, flower; Chickrassia tabularis, chickrassy, flower; Clitoria ternatea, crow creeper, flower; Coscinium fenestratum, false calumba, wood; Crozophora plicata, round pepper, fruit; Curcuma longa, turmeric, root; Cuscuta reflexa, seeta's thread, dried plant; Cynometra ramiflora, iripa, wood; Diospyros embryopteris, gaub, fruit, bark; Erythrina indica, common coral tree, flower; Eugenia jambolana, common jaumoon, bark; Excæcaria sebifera, china tallow, leaf; Ficus religiosa, peepul, leaf; Garcinia cambogia, malabar gamboge, gum; Garcinia mangostana, mongosteen, flower; Garcinia morella, ceylon gamboge, gum; Glycirrhiza glabra, liquorice, root; Hibiscus rosa-sinensis, china rose bendy, flower; Hibiscus syriacus, syrian bendy, flower; Indigofera argentea, var. cœrulea, wild indigo, leaf; Indigofera tinctoria, common indigo, leaf; Jatropha glandulifera, adul oil, leaf; Kandelia rheedii, cand e

mangrove, bark; Lagenaria vulgaris, bottle gourd, tendril; Lagerstrœmia parviflora, loose strife, bark; Lawsonia alba, henna plant, leaf; Mallotus philippensis, kamela, fruit; Mangifera indica, mango, bark, leaf; Manihot utilissima, tapioca, leaf; Melia azadirachta, margosa, leaf; Melia azedarach, large neem, leaf; Mesua ferrea, nauga champak, flower; Michelia champaca, champak, flower; Mimusops elengi, ilanjy, bark; Morinda citrifolia, ach root, root-bark; Morinda umbellata, small ach root, root-bark; Moringa pterygosperma, indian horse-radish, wood; Myrica sapida, box myrtle, bark; Nipa fruticans, java thatch, fruit; Nyctanthes arbortristis, coral jasmine, flower; Ochrocarpus longifolius, soora poon, flower; Oldenlandia umbellata, chayroot, root; Phyllanthus emblica, emblic myrobalan, fruit; Phyllanthus multiflorus, poolah, root; Plecospermum spinosum, cority, wood; Portulaca oleracea, indian purslane, leaf; Pterocarpus marsupium, malabar kino, gum; Pterocarpus santalinus, red sanders, wood; Punica granatum, pomegranate, flower; Rubia cordifolia, munjeet, root; Semecarpus anacardium, marking nut, bark; Soymida febrifuga, rohan tree, bark; Symplocos racemosa, lodh, bark; Tamarindus indica, tamarind, leaf; Terminalia arjuna, arjoon, bark; Terminalia belerica, belleric myrobalan, fruit; Terminalia catappa, country almond, bark; Terminalia chebula, chebulic myrobalan, fruit; Terminalia paniculata, flowering murdah, fruit; Terminalia tomentosa, var. typica, black murdah, bark; Thespesia populnea, portia, fruit, sepals, calyx; Toddalia aculeata, lopez root, root bark; Trapa bispinosa, water caltrops, flower; Trigonella fœnum-græcum, fenugreek, seed; Ventilago madraspatana, pappily, root-bark; Woodfordia floribunda, godaury, flower; Wrightia tinctoria, paula indigo, leaf; Wrightia tomentosa, ground paulay, sap; Zizyphus xylopyrus, nutty bair, bark.—"*b*" Ach root, morinda; Adul oil, jatropha; Ailanto, ailanthus; Almond, terminalia; Anjely, artocarpus; Arjoon, terminalia; Babool, acacia; Bael, ægle; Bair, zizyphus; Bendy, hibiscus; Berberry, berberis; Box myrtle, myrica; Bread fruit, artocarpus; Bullock's heart, anona; Caltrops, trapa; Calumba, coscinium; Cassie oil, acacia; Catechu, acacia; Chakondah, cassia; Champak, mesua, michelia; Chayroot, oldenlandia; Chickrassy, chickrassia; China tallow, excæcaria; Coral tree, erythrina; Cority, plecospermum; Crow creeper, clitoria; Fenugreek, trigonella; Galangal, alpinia; Gamboge, garcinia; Gaub, diospyros; Godaury, woodfordia; Gourd, lagenaria; Henna, lawsonia; Hollyhock, althæa; Horse-radish, moringa; Ilanjy, mimusops; Indigo, indigofera, wrightia; Iripa, cynometra; Jasmine, nyctanthes; Jaumoon, eugenia; Java thatch, nipa; Kamela, mallotus; Kino, butea, pterocarpus; Lakoocha, artocarpus; Liquorice, glycirrhiza; Lodh, symplocos; Loose strife, lagerstrœmia; Lopez root, toddalia; Malabar nut, adhatoda; Mango, mangifera; Mangosteen, garcinia; Mangrove, bruguiera, kandelia; Margosa, melia; Marking nut, semecarpus; Mudar, calotropis; Munjeet, rubia; Murdah, terminalia; Myrobalan, phyllanthus, terminalia; Neem, melia; Night-shade, basella; Pappily, ventilago; Paulay, wrightia; Peepul, ficus; Pepper, crozophora; Pomegranate, punica; Poolah, phyllanthus; Poon, ochrocarpus; Portia, thespesia; Purslane, portulaca; Red cotton, bombax; Rohan, soymida; Safflower, carthamus; Sanders, adenanthera, pterocarpus; Sappan, cæsalpinia; Seeta's thread, cuscuta; Sirissa, albizzia; Tamarind, tamarindus; Tapioca, manihot; Toon, cedrela; Tungaid, cassia; Turmeric, bixa, curcuma; Vekkauly, anogeissus; Whip tree, casuarina.

SHAV (शव् - shav, *San.*). To alter; go.——*Savarinautan* (சவரிநாதன் - shavarináthan, Tam.). From (shabara, san. mountaineer + nát'ha, san. lord); shiva who assumed the form of a mountaineer. Commonly shortened into Showry. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Severy* (శబరి - shabari, Tel.). Means a female mountaineer. Sanscrit name (shabarinadí), meaning shabary, an attendant of seetay + river. River; Vizagapatam dist., Mulkangherry tal. Tributary of Godavery. Rises in Eastern ghauts [q.v.] in Jeypore and passes through a rocky channel, joins the Godavery at Coonavaram in lat. 17° 34′ N., and long. 81° 18′ E. It has two perpetual tributaries, Sillair and Socoolair. Navigable for about 25 miles from the junction.——*Shabalam* (शबल - shabala, San.). From (shav, san. to alter); mottled, pied. The Indian cerberus.——*Shabara* (शबर - shabara, San.). From (shav, san. to go), wandering tribe. Any mountaineer [sowrah].——*Shabara chintaumany* (शबरचिन्तामणि - shabarachintámani, San.). From (shabara, san. mountaineer + chintá, san. thought + mani, san. gem). Code of destructive magic. The following are literal extract translations:—"*a*" "Owm! Hreem! Hrom! "hail, O goddess of Malayalam, who possessest us in a moment! "come, come! On a Sunday let the conjurer obtain the corpse "of a girl, and at night let him place it at the foot of a tree. "Let him place it on the altar. Then let him use the abovesaid "spells one hundred times on a Sunday, and it will be inspired "by a devil whom he must appease with flesh and wine to the "full. Offer him everything he demands, and he will grant all "you desire. This spell is all powerful. It came from Malaya-"lam."—"*b*" "Carnautacam process of causing death, infallible "if recited in a cemetery [shoodcaud]. Om! Hoom! Glowm! "ghost, who delightest in human flesh and blood, and eatest the "honeyed cake; destroyer of thousands! devourer of number-"less living creatures, devour each a man; devour him, drink his "blood! eat, eat his flesh! Ha! How! Hoom! Phat! This "supreme spell is to be recited in a cemetery; the sacrificer "must be naked; he must stand on a shroud, and facing the "south. In the wane of the moon [krishna pacsham] he must "commence it, and continue through the fortnight reciting the "spell in the order called the dark path. Then will the queen "of demons obey his call and come surrounded by her ghosts. "She will ask him what he requires, and he must say, the death "of my foe. She will graciously reply that she will bring it "about. She will immediately undertake it. Then let the "sorcerer frame the name of his enemy into a spell, and thus "bring about his death by reciting it one hundred times. Of "this there can be no doubt." For Chintaumany, the tamul classic see that head.——*Shawl* (شال - shál, Hind.; ಶಾಲು - shálu, Can.; శాలువ - sháluva, Tel.; സാല്വ - sálva, Mal.; சால்வை - shálvai, Tam.). From (savala, san. variegated). The Thibetan goats [velland] which bear the fine substance, of which shawls are made, are called Changra. Their colors are various; a faint black, a bluish tinge, and often a shade something lighter than that of a fawn. The shawls are manufactured in Cashmere, whither the material is carried from Thibet [pushmeenah].——*Shawl fruit tree* (شال کے پنڈو کا جھاڑ - shálkepandúkájhár, Hind.). From soft spines of capsules. Same as Monkey country saffron.——*Showrimala* (ശൌരിമല - shaurimala, Mal.). From (shabarí, san. female devotee so called + mala, mal. mountain). Sanscrit name (shabaryáshrama), meaning shabary's hermitage. Peak; Travancore state, Quilon division, Chenganore tal. Shrine dedicated to Shaustauv [q.v.], largely resorted to for religious vows. Country round consists of dense forest abounding in wild animals.——*Shwaunam* (श्वान - shvána, San.). From (shvi, san. to go). Dog. The genus Canis, canidæ [cookooram], digitigrada, carnivora, mammalia [sastanam, 12], of naturalists [jantoo]. The feral species known to the natives are aureus [jackal], dukhunensis [dhole], pallipes [konye]. For domestic dog see Nye.——*Sowrah* (సవర - savara, Tel.). From (shav, san. to go); wandering tribe [shabara]. Kolarian hill-tribe in Vizagapatam and Ganjam, especially latter. Language spoken by about 180,000. See vol. I (5), (30), (48), (57), (59), (69), (109); II, 78. Distinguish from Sowrah, the Bramin tribe.

SHEELAY (वस्त्र - vastra, *San.*; لباس - libás, *Hind.*; ಗುಡ್ಡೆ - gudde, *Can.*; గుడ్డ - gudda, *Tel.*; ശീല - shíla, *Mal.*; சீலை - shílai, *Tam.*). Title from (chíra, san. strip of cloth). San. from (vas, san. to wear). Tel. from (gudi, tel. round); as worn round body. Clothes. For usage see vol. I (98). The greater portion whether Hindoo or Mahomedan, are articles untouched by needle or scissors. These articles leave the loom [tarry] in a state ready to be worn, and have their analogues in European shawls [q.v.], plaids, and scarfs. The principal of these are the loonghees [q.v.], dhoties [q.v.] and turbans [puggry] worn by men, and the sauries [q.v.] worn by women. Nearly always of cotton [q.v.]. When dyed the colors are fast and admit of constant and rough washing. The portions which are concealed when the garment is on the wearer are rarely decorated. Mahomedans wear clothes made out of piece-goods by the aid of scissors and needles. Jackets, coats, and trousers for men; and bodices, trousers, and skirts or petticoats, for women. There also occur loom-made brocades and hand-embroideries. For Hindoo clothes, see:—Caul shetty, Chintz, Chokkye, Dhoty, Doopty, Dungry, Gingham, Goodda, Lungooty, Moory, Pootcooly, Ravy, Shaurang, Sullah, Tarp. For Mahomedan clothes, see:—Bafta, Bandana, Boorca, Cabah, Camees, Casheeda, Chapkan, Charkhauny, Choga, Cholee, Chudder, Coortah, Coortee, Cufnee, Cummerbund, Daglah, Dastauna, Dhanak, Dhoopchown, Dohar, Doputta, Doriyah, Doshaula, Duster, Goolbadan, Goorgy, Izaur, Jauma, Jhauran, Jhoobba, Jodah, Joree, Khaudee, Khes, Kincob, Lahngah, Loonghee, Makmull, Mandeel, Meetaun, Meyjodoo, Mirzayee, Mushroo, Muslin, Neemah, Neinsook, Palampore, Phoolcaury, Pishwauz, Puggry, Pushmeenah, Putty, Pyjauma, Pyrahan, Rizye, Roomaul, Sadry, Salampore, Saulo, Saury, Shaloocah, Sharayee, Soojnee, Soosy, Tafetta, Tahband, Toombaun, Yek putta.

SHEER (شیر - shír, *Hind.*). From persian. Milk [csheeram, paul]. Sheerbiranj, from (biranj, pers. rice), is a mess of rice [q.v.] and milk [paul]. Sheerdeh, from (deh, pers. giver), is a wet nurse. Sheer i boordah, from (burídah, pers. separated), is coagulated milk. Sheer i maudiyaun, from (mádiyán, pers. mare), is mare's milk. Sheer khoormah, from (khurma, pers. date), is dates [kharjooram] and milk, used in breaking the last fast [roza] of the Ramzaun [q.v.]. Sheer khowr, from (khuár, pers. eater), is a suckling babe. Sheerkist is manna [q.v.]. Sheer maul, from (mál, pers. kneaded), is bread kneaded with milk. Sheer mayeh, from (máyah, pers. substance), is rennet [paneer mayeh].

SHEETAM (शीत - shíta *San.*). San. from (shí, san. to rest). Cold, cool. Phlegm. One of the three humours. For other two see Pittam and Vautam. From Sheetam are derived twenty human diseases. Such as the following:—paleness of the lips, swelling of the tongue in a manner that prevents speaking, a sensation of the limbs as if they were bruised, obstruction of the nose, paleness of the blood, itch, frequent sneezing, coughing, &c. [veidyan].——*Sheetal cheeny* (سیتل چینی - sítalchíní, Hind.)

From (sítal, hind. cool + chíní, hind. chinese pepper). Same as pimento in Bengal [china pepper], cubebs in Madras [cubeb pepper].——*Sheetalpaty* (शीतलपत्रिका - shítalapatriká, San.; سيتل پتی - sítalpatí, Hind.). Title from hindostany. San. from (shítala, san. cold + patrika, san. leaf); from stems, cool mats made. Hind. from sanscrit. San. also (bhadrá), meaning auspicious; (bhadrabalá), meaning auspicious + the shrub, sida cordifolia, linn.; (bhadródaní), meaning auspicious + the plant, sida cordifolia, linn.; (balá), meaning strong [balah]; (baláhvá), meaning called balah; (kalyáníní), meaning auspicious. Title otherwise Forked phrynium. Botanically Maranta dichotoma, wall., marantaceæ [vricsham, 143]. Alias Phrynium dichotomum. Stems straight, 3–6 feet, very smooth polished; branches numerous, dichotomous, spreading, jointed at every division; leaves alternate, petioled, ovate-cordate, smooth, entire, acute, with fine parallel veins; petioles sheathing; racemes terminal, usually solitary, jointed, a little flexuose; flowers in pairs on a common pedicel, from the alternate joints of the rachis; calyx three-leaved; border of corolla double, exterior of three equal, recurved segments, interior of five unequal ones far extending above the rest; flowers large, white. Split stems are tough, and from them are made mats [boriyah]; stems give also a fibre [naur]. Maranta arundinacea is west indian or true arrowroot; cultivated here; the article is white, odourless, and tasteless, in the form either of a light opaque white powder or of small pulverulent masses; inferior arrowroot may be distinguished from genuine, by its yellow tinge and by its not thickening in boiling water; for the production of arrowroot, the rhizomes are dug up, they are then ground and the pulp washed to remove the starch, this is drained and finally dried with a gentle heat. For native arrowroots see Tikhar or Malabar arrowroot.

SHEEVAL (சீவல் - shíval, *Tam.*). From (shívu, tam. to slice). Literally paring. Areca-nut [q.v.] parings, in use along with betel-leaf [betel-pepper] and choonam [q.v.].

SHEIKH (شيخ - shaikh, *Hind.*). From (shákha, ar. to grow old). A chief, a venerable old man, a superior of an order of dervishes [q.v.]. The designation of those Mussalmans [q.v.] who profess to be descended from the first [aboo bakr] or second [oomr] caliphs or from the prophet's uncle Abbaus [q.v.]. They class themselves according to their Arab origin as Ansaury, Faurooky, Koreshee, Moohaujir, and Siddeeky. The principal of these are:—Sheikh koresh, of which class are the prophet and all his companions and descendants; Sheikh siddeeky, descendants of aboo bakr; and Sheikh faurooky, descendants of oomr. Sheikh is the title generally applied to the principal teachers among the Soofee [q.v.]. In Arabia and Syria, the hereditary or elected chief of a tribe is also called Sheikh. In India this title is given to all who are not Syeds [q.v.], Moghuls [q.v.], or Patauns [q.v.], and to all descendants of Mahomedan converts; as Sheikh ally, alaumat + alam. The Sheikhs therefore are of the most varied origin, and are engaged in all avocations, military and civil. About 55,000 in Presidency; of which North arcot, Bellary, Cuddapah, and Kurnool have the most [mahomedan]. See vol. II, 233.

SHEITAUN (شيطان - shaitán, *Hind.*). From (shatan, ar. to rebel). Greek *σαταvâs*. Egyptian Set, god of discord. Devil [pey]. Term of abuse. Plant first term. Ex.:—Abroma augusta, devil's cotton; Alstonia scholaris, devil's tree; Argemone mexicana, devil's fig; Datura stramonium, devil's trumpet; Ferula narthex, devil's dung; Ficus dæmonum, devil fig; Ficus oppositifolia, devil fig; Laminaria saccharina, devil's apron; Martynia diandra, devil's claw; Nigella hispanica, devil in a bush; Urtica crenulata, devil's nettle. See gloss. paragraphs.

SHEKHADAH (سيكڑا - saíkará, *Hind.*). Percentage. Especially a grant of pasture in proportion to holdings or cultivation.

SHEKK (செக்கு - shekku, *Tam.*). From (chakra, san. wheel) [chuckram]. Oil-press [gaunam].——*Shekk moottay* (செக்கு முட்டை - shekkumuttai, Tam.). From (above + muttai, tam. egg). An egg-shell like spoon filled with oil; contribution levied by proprietors from each oil-press.

SHEL (செல் - 'shel, *Tam.*). To go.——*Selvadoray* (செல்வதுரை - shelvathurai, Tam.). From (shelvam, tam. prosperity + turai, tam. prince). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Selvam* (செல்வம் - shelvam, Tam.). From (shel, tam. to go); increase, prosperity. Wealth [shellam].——*Selvanayagam* (செல்வநாயகம் - shelvanáyagam, Tam.). From (shelvam, tam. wealth + náyaka, san. master). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Selvarauz* (సెల్వరాజు - selvarádzu, Tel.). From (shelvam, tam. wealth + rádzu, tel. king). Hindoo 2nd or pers. name [peyar].——*Shelavoo* (செலவு - shelavu, Tam.). Leave, permission to depart; expense [curts].——*Shellacootty* (செல்லக்குட்டி - shellakkutti, Tam.). From (shellam, tam. favorite + kutti, tam. child). Favorite child. Applied to males and females. Proper name [peyar].——*Shellam* (செல்லம் - shellam, Tam.). Fortune. Favorite. Name applied to males and females [payer, selvam].——*Shellammah* (செல்லம்மா - shellammá, Tam.). From (shellam, tam. favorite + ammá, tam. mother, titular affix). Favorite child.——*Shellaye* (செல்லாயி - shelláyi, Tam.). Proper name. Term of endearment to children among the higher classes. Female proper name among the lower classes [peyar].——*Shelly* (செல்லி - shelli, Tam.). Feminine form of shellan; non-bramin female proper name [peyar].——*Shelvy* (செல்வி - shelvi, Tam.). From (shelvam, tam. prosperity). Lutchmy [q.v.].

SHEM (لال - lál, *Hind.*; ಕೆಂಪು - kempu, *Can.*; ఎఱ్ఱ - erra, *Tel.*; செம் - shem, *Tam.*). Red, good [chem]. Plant first term, often joining two genera, in the former sense. Ex., where transl. is of second term:—Albizzia odoratissima (yerrachinta), tamarindus indica; Amarantus spinosus (erramulugóranta), barleria prionitis; Anacardium occidentale (kempugéru), semecarpus anacardium; Aristolochia indica (errakalabanda), aloe indica; Baliospermum montanum (erradundiga), jatropha glandulifera; Barringtonia acutangula (kempukanaginamara), nerium odorum; Breynia rhamnoides, var. genuina (errapurugudu), phyllanthus multiflorus; Capsicum annuum (kempumenasu), piper nigrum; Carthamus tinctorius (shendurukkam), crocus sativus; Cinnamomum iners (shembilá), artocarpus integrifolia; Crossandra undulæfolia (erravádámbramu), dædalacanthus nervosus; Daucus carota (kempumullangi), raphanus sativus; Erythroxylon monogynum (shembuliççai), hibiscus cannabinus; Indigofera enneaphylla (kenneggilu), tribulus terrestris; Ipomæa quamoclit (kempumallige), jasminum sambac; Nymphæa lotus (kendávare), nelumbium speciosum; Ochna squarrosa (erradzuvvi), ficus tsiela; Orygia decumbens (shivappuççáranai), trianthema monogyna; Pterocarpus santalinus (kempugandha), santalum album; Pupalia atropurpurea (errauttaréni), achyranthes aspera; Rhynchosia viscosa (errachikkudu), dolichos lablab; Sesbania aculeata (errajíluga), æschynomene aspera; Sterculia urens (errapuniki), gyrocarpus jacquini; Trichosanthes palmata (lálindráyan), citrullus colocynthis. See gloss. paragraphs.——*Sendoorkum* (செந்துருக்கம் - shendurukkam, Tam.). From (above + turukkam, tam. crocus sativus, linn.). Same as Bastard saffron. ——*Seyaur* (செய்யாறு - sheyyáru, Tam.). From (sheyya, tam. red + áru, tam. river). Sanscrit name (kamandalanadí), meaning water jar + river. Rises in the Jawaudies and passes through Polore talook, after which it is sometimes called, and running by the town of Arnee, drains the jagheer and joins the Cheyaur, the tributary of Palaur outside the jagheer [q.v.].——*Shaumanty* (सेवन्तिका - sévantiká, San.; शेवती - shévatí, Mahr.; शेवन्ते - shévanté, Conc.; داودی - dáúdí, Ar.; درخت گل چینی - darakhtigulichíní, Pers.; گل چینی کا پیڑ - gulchíníkáper, Hind.; گل چینی کا جہاڑ - gulchíníkájhár, Dec.; ಶಾವಂತಿಗೆ - shávantige, Can.; ಶೇಮಂತ್ತಿಗೆ - shémattige, Too.; చేమంతి - chémanti, Tel.; ജെവന്തി - jevanti, Mal.; ලාවුලුගස් - lávulugas, Singh.; சாமந்தி - shámandi, Tam.). Title from tamul. San. from (sév, san to serve), useful. Mahr. from sanscrit. Pers. from (darakht, pers. tree + gul, pers. flower + chíní, pers. chinese). Hind. from (gul, pers. flower + chíní, pers. chinese + per, hind. tree). Dec. from (gul, pers. flower + chíní, pers. chinese + jhár, hind. tree). Tel. from (cheyyi, tel. hand + banti, tel. bouquet); from form of flower; by corruption from sanscrit. Mal. from tamul. Singh. from (lávulu, singh. chrysophyllum roxburghii, g. don. + gas, singh. plant). Tam. from (shem, tam. red + andi, tam. evening) [country baboona]; by corruption from sanscrit. San. also (sugandhiká), meaning good + scented; (shatapatratarani), meaning hundred-petalled rose; (atimuktá), meaning surpassing pearl, is white variety [madablota, nemmy]; (chandrikámalliká), meaning moonlight + jasmine; (sévatí), meaning useful, also applied to indian white rose [q.v.]. Pers. also (darakhtigulidáúdí), meaning david's flower tree. Hind. also (dáúdí), meaning david's tree. Tel. also (errachémanti), meaning red + the plant; (pattsachémanti), meaning yellow + the plant; (chámanti). Tam. also (akkirágáram), from similarity of flowers to akalkarah [q.v.] plant; (shevvandi), meaning red + evening. Title otherwise Chinese flower, Christmas flower, Crown daisy, David's flower, Garden chrysanthemum, Indian chamomile, Sicilian chrysanthemum. Botanically Chrysanthemum coronarium, linn., compositæ [vricsham, 74]. Alias Chrysanthemum roxburghii; Pyrethrum indicum. Common in gardens. Flowers, when dried, form substitute for chamomile [baboona]; root, when chewed, communicates tingling sensation to tongue like pellitory [akalkarah]; plant administered in conjunction with black pepper [q.v.] in gonorrhœa. Indian shaumanty is chrysanthemum indicum, fruticose; flowers smallish, yellow; fragrant; flowers made into garlands and offered to vishnoo [q.v.] and shiva [q.v.]. White shaumanty is chrysanthemum carinatum, two or three varieties, showy annual, daisy like flowers as large as watch, white or yellow rays and dark-brown eye.——*Shekkilaun* (சேக்கிழான் - shékkizhán, Tam.). From (shé, tam. good + kizhán, tam. owner, title of headman in certain villages). Called also Aran mozhy tevan; born a Vellaula at Coonnatore in the Tonday [q.v.] country, Pooliyore cottam; poet and politician; king Anapauya cholan made him prime minister; wrote lives and action of the sixty-three Tirtondar, or special votaries of Shiva [aroopatt moover], an epic poem, Tirttondar pooraunam in seventy-two cantos; when the king heard of it he sent both author and work on an elephant [q.v.] in royal procession [oorvalam, shahargasht]

through Chidambaram.——*Shembadavan* (செம்படவன் - shembadavan, Tam.). From (above + padavan, tam. boat man). Fisherman. In Canara and Malabar, Moocwa. In Teloogoo districts Boy, Besta, Chaupacoolam. In Tinnevelly, Patnava, Parava, and Valaiya. They fish along the seashore and in the marine lagoons [cauyal]. See vol. II, 231 [jauty].——*Shembiyan* (செம்பியன் - shembiyan, Tam.). From (shem, tam. good); good king. A name for Chola [q.v.] rulers.——*Shemmanatty* (செம்மணத்தி - shemmanatti, Tam.). From (shem, tam. red + manam, tam. fragrance); from red fragrant wood. Same as Deccany deodar.——*Shempunjy* (செம்பஞ்சி - shembañji, Tam.). Red-cotton wool [q.v.].——*Shen* (ചെം - shem, Mal.; செம் - shem, Tam.). Red, good, pure. Prefix in place names, as Shencottah, meaning red fort [chem].——*Shencottah* (ചെങ്കോട്ട - chenkótta, Mal.). From (chem, mal. red + kótta, mal. fort).—"*a*" Talook, Travancore state, Quilon division; population 30,477. Extreme length, N. to S., is 16 miles; its breadth, E. to W., is unequal running into Tinnevelly in a narrow strip of country 19 miles in length. Sub-divided into eight maniyams [q.v.] and consisting of seventy caras [q.v.] or villages. Bounded N., E. and S. by the British district of Tinnevelly, and W. by Putnapooram and Nedoovengaud talooks. The talook is a plateau. Soil is red and productive of good grain. Timber is brought from Travancore forest and sold in Tinnevelly side. Every paddy-field is watered by small artificial canals and reservoirs. The only portion of Travancore territory lying on the eastern side of the ghauts [q.v.]. Inhabited entirely by Tamul people.—"*b*" Town, Talook head-quarters; Travancore state, Quilon division; Shencottah tal.; pop. 9,294; lat. 8° 59′; long. 77° 18′; from Alleppey E.S.E. 70 miles; from Cottayam S.E. 64 miles; from Madras S.S.W. 350 miles; from Nagarcoil N.N.W. 55 miles; from Paravore S.E. 105 miles; from Quilon E. 45 miles; from Trivandrum N.N.E. 40 miles; from the sea E. 47 miles. On main road from Quilon to Tencaushy, east of Periyacoil pass. Separated from other inhabited parts of Travancore by a wide extent of forest. Extensive Bramin population. Centre of coffee [q.v.] trade. Mission station.——*Shendan* (சேந்தன் - shéndan, Tam.). From (shéndu, tam. redness). Soobramanyan [sheyyaun, soobramanya]. Author of Divaucaram [q.v.]. Member of the Madura college [q.v.].——*Shengal* (इष्टका - ishtaká, San.; ईंट - íta, Mahr.; خشت - khisht, Pers.; اینٹ - ínt, Hind.; ایٹ - ít, Dec.; بات - bata, Malay; ಇಟ್ಟಿಗೆ - ittíge, Can.; ಇಟ್ಟಿಗೆ - ittige, Too.; ఇటిక - itike, Tel. ഇഷ്ടക - ishtaka, Mal.; செங்கல் - shengal, Tam.). Title from tamul. San. from (yaj, san. to sacrifice), from use of bricks to make altars in yanyams [q.v.] or sacrifices. Mahr., &c., from sanscrit. Tam. from (shem, tam. red + kal, tam. stone). Brick. To make this, reddish earth is mixed with water, thrown into a wooden mould placed on ground, and smoothed over, then taken out of the mould, dried and burnt in a kiln [shoolay]. Sun-dried unburnt bricks of a very large size were formerly employed by the natives in building; these were often 2½ feet in length by 15 inches in breadth and 7 or 8 inches in thickness; the basement and a great deal of the interior of mantapams [q.v.] of temples [coil] have been so built, the masonry being placed over this foundation; in some old forts the lower part of the walls is built of unburnt bricks and the upper part of hewn stones.——*Shengan maul* (செங்கண்மால் - shénganmál, Tam.). From (above + kan, tam. eye + mál, tam. greatness). The red-eyed Vishnoo.——*Shengan maul maidan* (செங்கண்மால் மைந்தன் - shenganmálmaindan, Tam.). From (above + kan, tam. eye + mál, tam. great + maindan, tam. son). Manmatan [q.v.] in the form of pradyoomnan or mighty one, son of krishnan [q.v.] and roocminy [q.v.].——*Shengode* (செங்கோடு - shengódu, Tam.). Means red mountain. Ancient town. Shencottah in Travancore.——*Shengol cadavool* (செங்கோற்கடவுள் - shengórkkadavul, Tam.). From (shem, tam. just + kól, tam. rod + kadavul, Tam. god). Yaman [q.v.], the god of death and of justice.——*Shenjadaiyeeshar* (செஞ்சடையீசர் - sheñjadaiyísar, Tam.). From (above + jatá, san. matted hair + ísha, san. lord). Shiva [q.v.].——*Shen tamul* (செந்தமிழ் - shendamizh, Tam.). Pure, correct tamul. The ancient or classical dialect of Tamul [q.v.] in which nearly all the higher literature has been written. Contains scarcely any Sanscrit [q.v.]. Once spoken in and about Madura. A grammar [lacshanam] of this dialect was compiled by Beschi [veera maumoony] in Latin, which is translated into English [bhaushay]. See vol. I (52).——*Sheppaun* (சேப்பான் - sheppán, Tam.). Means red man. Feminine sheppy. Pariah proper name [peyar].——*Shevvapett* (செவ்வாய்ப்பேட்டை - shevváyppéttai, Tam.). From (shevváy, tam. tuesday + péttai, tam. suburb); from the fair on tuesdays. Village; Salem dist., Salem tal.; lat. 11° 40′; long. 78° 11′; from Salem W. 1½ miles. Western part of the town of Salem.——*Shevvazhy* (செவ்வழி - shevvazhi, Tam.). From (shemmai, tam. beauty + vazhi, tam. place). Ground near the sea.——*Shevvye* (செவ்வாய் - shevváy, Tam.). From (above + váy, tam. mouth). Red one. The day of the planet [graham] Mars [coojan, mungalan]; Tuesday [vauram].——*Shey* (சே - shé, Tam.). Redness [chem, shem].——*Sheyyaul* (செய்யாள் - sheyyál, Tam.). From (sheyya, tam. red). Lutchmy [q.v.].——*Sheyyaun* (சேயான் - shéyán, Tam.). From (shem, tam. red). Soobramanyan [shendan, soobramanyan].

SHEMBAH (سمبھہ - sembhá, *Hind.*). From (shémba, mahr. mucus). Glanders. The horse [ghorah], and mule [katcher] are liable to this and it is communicable not only to them but the human subject. When the specific poison affects principally the air passages, the disease is termed glanders; when the skin, areolar tissue, and lymphatics are attacked, it is called farcy [bail]. The former is rapid and violent in its course, which invariably terminates in death. Its characteristic symptoms are the abundant discharge, sometimes bloody or purulent, from the nostrils; and the eruption of small painful lenticular tumors, chiefly on the nostrils; neck, and shoulders. In farcy the same eruption occurs; the limbs are swollen and the symptoms generally are less severe. Damp ill-ventilated stables, improper food, excessive fatigue, and other depressants of health predispose to the reception of the specific poison; the principal vehicle for which is the discharge from the nostrils. This forcibly ejected in fine spray may infect stables, food, litter, vessels, &c., and so communicate the disease to healthy animals. A beast suffering from glanders is generally at once killed and everything possible done to destroy the specific poison which it has generated as in the case of rinderpest [vishajooram].

SHENDHY (शिंदी - shindí, *Mahr.*). Means toddy. Same as Wild date.——*Sondy* (సొంది - sondi, Tel.). From (sendhí, hind. toddy). A caste of distillers and toddy-drawers in Ganjam. The following are sub-divisions:—Gowndla, Shegidy, Siolo, Sondy, Yauta. Number about 35,000 [janty]. See vol. I, 74.

SHENIYAN (சேணியன் - shéniyan, *Tam.*). From (shén, tam. sky); from weaving colored cloths. Weaver caste. The corresponding terms are:—Tel. sauley, Can. jeyda, Mal. chaulyan. Numbers about 18,000.

SHER (ചേർ - cher, *Mal.*). Junction [chair].——*Sherogar* (சேர்வைக்காரன் - shérvaikkáran, Tam.). From (shérvai, tam. company of soldiers + kára, san. doer). Petty ruler. Retainer under a poligar [q.v.]. See vol. I, 57 [maroothoo].——*Sherp* (சேர்பு - shérppu, Tam.). From (shéru, tam. to unite). Coast [caray].——*Sherpan* (சேர்ப்பன் - shérppan, Tam.). Ruler of a maritime tract [coomary sherpan, neydal].——*Shertala* (ചേർത്തല - chérttala, Mal.). From (chér, mal. junction + tala, mal. place). Otherwise Sharretala.—"*a*" Talook, Travancore state, Cottayam division. Population 113,704. Extreme length, N. to S., 25 miles. Extreme breadth, E. to W., 7 miles. Sub-divided into seven praverties [q.v.] and containing thirty-eight caras [q.v.] or villages. Bounded N. by Cochin state, E. by Vembanaud lake, S. by Ambalapoya talook, W. by the Indian ocean. Sandy and low. Soil fertile. Coir industry. Irrigation by means of canals.—"*b*" Town, Head-quarters of talook; Travancore state; Cottayam division, Shertala tal.; pop. 21,152; lat. 9° 41′; long. 76° 54′; from Alleppey N. 13 miles; from Cottayam W. 13 miles; from Madras S.W. 355 miles; from Nagarcoil N.W. 126 miles; from Paravore S.S.E. 33 miles; from Quilon N.N.W. 56 miles; from Trivandrum N.N.W. 91 miles; from the sea E. 3 miles. At Southern extremity of an inland branch of the backwater, by means of which communication is maintained with Alleppey, Cochin, and the interior. Population consists of Bramins [q.v.], Nayars [q.v.], Concanies [q.v.], Syrians [q.v.] and Shaunaurs [q.v.]. About the centre on the west side is a large old Syro-Roman church. A colony of black Jews [jonaca] once settled here, but their synagogue is now in ruins. Annual festival in April, for eight days. Remarkable temple to Bhagavaty [q.v.].——*Shervaicauran* (சேர்வைக்காரன் - shérvaikkáran, Tam.). Means Captain. Title of Maravar [sherogar].——*Shervay* (சேர்வை - shérvai, Tam.). An army [dandam, dandoo].

SHER (சேறு - shéru, *Tam.*). Mud [cher].——*Shett caul* (சேற்றுக்கால் - shéttukkál, Tam.). From (above + kál, tam. field). Land trampled, ploughed, and puddled for sowing rice after irrigation. Wet ploughing system [coodapa] of cultivation [vellaumay] as opposed to dry ploughing system [pooldy caul, veligada].——*Shoranore* (ചെറുവണ്ണൂർ - cheruvannúr, Mal. shoranur*). From (cheruman, mal. slave + úr, mal. village). Village, Railway station; Cochin state, Talapully tal.; pop. 1,116; lat. 10° 46′; long. 76° 19′; height 98 feet; from Beypore S.E. 41 miles; from Ernacolum N. 53 miles; from Trichore N.N.E. 16 miles; from Madras S.W. 312 miles; from Vadacancherry N.N.E. 6 miles; from the sea E. 22 miles. The south-west line of the Madras railway touches Cochin state here. A line is projected hence to Cochin.

SHERAM (சேரம் - shéram, *Tam.*). Same as Cheram.——*Shermadevy Salem* (சேலம் - shélam, Tam.). See sep. title.——*Shermadevy* (சேர்மாதேவி - shérmáthévi, Tam. shermádevi*). From (chéra, san. ruler of that country + mahádévi, san. the great queen); after a princess of madura, whom he married. Town, Head-quarters of Head assistant collector; Tinnevelly dist., Ambasamoodram tal.; pop. 9,333; acres 2,040; lat. 8° 41′; long. 77° 36′; from Ambasamoodram E. 8 miles; from Madras

S.S.W. 352 miles; from Palamcottah W. 12 miles; from Shreevillipoottore S. 56 miles; from Tinnevelly W. 9 miles; from Tuticorin S.W. 41 miles. On south bank of Tamrapurny. Includes Coilputty. Former head-quarters of talook of same name. Very fertile. Old Shiva temple. A cenotaph in memory of Paundyan [q.v.] rulers is worshipped by the Maravar [q.v.].——*Shevaroy hills** (சேர்வராயன்மலை - shérvaráyanmalai, Tam.). From (shéran, tam. chera race + iráyan, tam. king + malai, tam. mountain).—"*a*" Deputy tahsildarry, Salem district. Pay Rs. 150.—"*b*" Hill, Sanitarium; Salem dist., Salem tal.; pop. 1,136; area 147 square miles; lat. 11° 49′; long. 78° 16′; average elevation 4,500 feet. Highest point in the green hills 5,410 feet; from Madras S.W. 166 miles; from Namcull N. 41 miles; from Oossoor S.E. 68 miles; from Salem N.N.E. 11 miles; from Tripatore S. 52 miles; from Yercaud N. 3 miles. For description, see vol. II, 124.

SHERE (شیر - sher, *Pers.*). Lion. Prefixed to an alam forms a lacab; as Shere ally, the lion of god [hyder, ism].——*Shere mahomed khan* (شیر محمد خان - shermuhammadkhán, Hind.). From (above + alam + khitaub alaumat). The first fowjdar [q.v.] of Chicacole circar [q.v.], which included the modern Ganjam, sent by the Cootb shahy [q.v.] dynasty. Built the large mosque [musjid] at Chicacole. See vol. II, 77.——*Shergadah* (శేరుగడ - shérugadá, Tel. sérgadá *). From (sher, hind. mah. proper name + gadá, tel. fort). Ancient zemindarry, Village; Ganjam dist., Zemindarry tracts; pop. 11,562; square miles 30; lat. of village 19° 31′; long. 84° 39′; from Chetterpore W.N.W. 27 miles; from Russellcondah S. 29 miles. Small zemindarry, south-west of Dhauracote, and north-east of Chinna kimedy. Peshcush [q.v.] Rs. 5,555. Yearly revenue Rs. 18,314. Number of villages thirty-eight. Fertile. High road between Aska and Ichapore skirts the town. Rooshcoolya canal enters estate at 12th mile of its course.

SHERY (శేరి - shéri, *Tel.*). From (sherah, ar. rate). Land let out by proprietor or zemindar to ryots or tenants, while Sauvaram [q.v.] is land held by the proprietor [havelly]. Distinguish from the dravidian Cherry.

SHESHAN (शेष - shésha, *San.*; சேடன் - shédan, *Tam.*). From (shish, san. to remain). A serpent [naugam, sarpam]. Especially the thousand-headed serpent resting on which Vishnoo [q.v.] reclined on the primeval waters [anantan, audisheshan, pralayam]. Familiarly Sheshoo, Chaitchoo. Hindoo 2nd or pers. name. Feminine form is Sheshy [peyar].——*Shaisham* (शेष - shésha, San.). From (shish, san. to leave). Remainder [bauky]; in mathematics.——*Sheshachellam* (శేషాచలము - shéshá-chalamu, Tel.). From (shésha, san. the serpent god + achala, san. mountain). Range of hills; Cuddapah dist., Poollampett, Voilpaud and Royachoty tals.; lat. 14° 13′ to 14° 31′ N.; long. 78° 01′ to 79° 02′; from Cuddapah S.; from Poollampett W. This range strikes off from the Palcondahs 15 miles south of the Pennair in a westerly direction and skirts the east and north-east of Cuddapah district, effectually shutting in the sub-division. No isolated peaks; but when seen from a distance, the whole range presents the appearance of one long horizontal line skirting the horizon. In the centre of the country thus enclosed there are a number of isolated hills very rocky and entirely bare of vegetation. About Goorramcondah, these hills present an especially picturesque appearance, and the old palace of Goorramcondah forms a favorite halting-place. Near Madanapully, about 2,900 feet above the sea, the hills present the appearance of a continuous range, and are covered with vegetation, though with but few forest trees. Thirteen miles from Madanapully in a northerly direction, near Caunaulamadoogoo, is the highest peak in the sub-division known as Horsleycondah. These hills are separated from the Veligondas by the Bullipully pass. Seshachellam also indicates specially the Tripatty hill. Is also a Hindoo 2nd or pers. name [peyar].——*Sheshagiry* (சேசகிரி - shésagiri, Tam.). From (above + giri, san. mountain). The Tripatty hill. Hindoo 2nd or pers. name [peyar].——*Sheshammah* (శేషమ్మ - shéshamma, Tel.). From (above + amma, tel. mother, titular affix). Familiarly sheshy, chaitchy, chaitcham, chaitchoo. Hindoo female proper name [peyar].——*Shesha naugam* (शेषनाग - shéshanága, San.). From (above + nága, san. serpent). The Sheshan serpent [audisheshan].——*Sheshashayanan* (శేషశయనుడు - shéshashayanudu, Tel.). From (above + shayana, san. bed). Vishnoo [q.v.], lying on Sheshan [anantashayanan, sheshaudharan]. Hindoo 2nd or pers. name [peyar].——*Sheshaudharan* (சேசாதரன் - shésátharan, Tam.). From (above + dhara, san. support). Vishnoo [q.v.], supported by sheshan [sheshashayanan]. Hindoo 2nd or pers. name [peyar].——*Sheshaudry* (சேசாத்திரி - shésáttiri, Tam.). From (above + adri, san. mountain). The Tripatty hill. Hindoo 2nd or pers. name [peyar].——*Sheshavarna tevan* (சேடவருணத்தேவன் - shédavarunattévan, Tam.). From (above + varna, san. color + tévan, tam. title). Otherwise Moottoo vijaya raghoonauta periya wodeya tevar. The first zemindar of Shivagunga. See vol. I, 56 [charitram].——*Sheshayyah* (శేషయ్య - shéshayya, Tel.). From (above + ayya, tel. master, titular affix), vishnoo, the lord of Sheshan [q.v.]. Familiarly Sheshoo. Hindoo 2nd or pers. name [peyar].——*Shist* (شست - shist, Hind.). From (shishta, san. remainder). Sum due. The assessment [teervay] on land. Distinguish from Kist. Shist bauky are outstanding balances.

SHEY (செய் - shey, *Tam.*). As verb, to make. As noun, cultivated or cultivable land, especially rice field [chey].——*Sheygaul* (செய்கால் - sheygál, Tam.). From (above + kál, tam. place). Land capable of cultivation.——*Sheygaul carambay* (செய்கால்கரம்பு - sheygálgarambu, Tam.). From (above + kál, tam. place + karambai, tam. sterile ground). Land lying waste, though capable of cultivation.——*Sheygay* (செய்கை - sheygai, Tam.). From (above + kai, tam. suffix of condition). Practical orthography.——*Sheyyool* (செய்யுள் - sheyyul, Tam.). From (above + ul, tam. suffix of action). Verse [pah].

SHI (शि - shi, *San.*). To attenuate, sharpen, weaken.——*Shimbicam* (शिम्बिक - shimbika, San.). San. from (shi, san. to sharpen, to attenuate), from weakening or expelling wind, bile, &c. Bean. Those most commonly cultivated for the european table are phaseolus vulgaris, linn. [lobyah], and phaseolus lunatus, linn. [country lobyah]; of these here are several varieties, named variously as kidney or french beans, haricot, duffin, vellore or butter beans, &c.; the natives have no particular names for them both being exotics. Another is the hussar or sword bean, Canavalia ensiformis, dec. [tambattam], of which also there are several varieties, differing in the color of their flowers and seeds; the white-seeded variety is considered the most wholesome, and is cultivated both by europeans and natives. The Goa bean, psophocarpus tetragonolobus, dc., is occasionally used. Cf. also Dolichos biflorus [madras horse-gram] and Vigna catiang [cow gram].——*Shimby* (शिम्बी - shimbí, San.). From (shi, san. to sharpen), from being a hot food-stuff. Botanically the Dolichos genus leguminosæ [vricsham, 48]. Herbaceous or shrubby plants, with twining stems and trifoliate leaves, and flowers in racemes; pods flat, neither winged, nor nerved; throughout tropical and temperate regions of asia, africa; originally natives of india. The species best known to the natives are:—biflorus [madras horse-gram], falcatus [wild horse-gram], lablab [country bean].——*Sissoo* (शिंशपा - shimshapá, San.; ساسم - sásam, Ar.; سیسو - sísú, Hind.; شیشم - shísham, Dec.; ಬಿರಿದಿಮರ - biridimara, Can.; సిస్సు - sissu, Tel.; సిస్సువ - sissova, Oor.; ഇരുവിൾ - iruvil, Mal.; நூக்கம் - núkkam, Tam.). Title from hindostany. San. from (shi, san. to attenuate); from medicinal wood as weakening diseases. Hind. and Dec. from arabic. Tel. from hindostany. Oor. from sanscrit. Mal. from (iru, mal. dark + ul, mal. inside) [dark vail]. Tam. from (nugai, tam. to slacken); from elastic wood; also from weakening diseases. Hind. also (talí); (sísam). Can. also (shishmabágo); (agurumara); (irugundimávu), meaning dark wood mango. Tel. also (yerrasissu), meaning red variety, from brown heart-wood. Tam. also (shisumaram), meaning sissoo tree; (piççai), from (pichhá, san. gum, the tree as yielding gum). Title otherwise Sheham, Sissum. Botanically Dalbergia [yooga pattricay] sissoo, roxb., leguminosæ [vricsham, 48]. Specific name from hindostany. Tree, 50 feet; leaves pinnate; leaflets three to five, alternate orbicular or obcordate, with a short sudden acumination, slightly waved on the margin, when young pubescent; panicles axillary, composed of several short secund spikes; flowers almost quite sessile; stamens nine, united into a sheath open on the upper side; style very short; legumes stalked, linear lanceolate, three-seeded; flowers small, yellowish white; flowers at beginning of hot season; flowers perfume the air in evening; introduced from bengal; grows rapidly; never wild. Raspings of the wood are alterative in medicine; gives an empyreumatic medicinal oil [yennay]. Young trees are browsed by cattle [maud] and goats [vellaud]; planted extensively as an avenue [shaulay] tree. Sap-wood small, white; heart-wood brown with darker longitudinal veins, close and even-grained, very hard; annual rings not distinctly marked, alternating dark and light-colored bands, which run into each other; wood seasons well, does not warp or slip; highly esteemed for all purposes where strength and elasticity are required; white-ants [q.v.] seldom attack it; it was the favorite wood for gun carriages as long as the supply of large timber lasted.——*Sissum* (شیشم - shísham, Dec.). From (sásam, arabic). Same as Sissoo.

SHIAH (شیعہ - shiah, *Hind.*). From (shai, ar. follower). Means follower of ally, son-in-law of the prophet. Also called Teen yaury meaning the disclaimer of the three companions; Imaumiyah from belief that God does not leave mankind at any time without a man who acts as imaum; Asnah ashariyah or duodecimians from accepting the leadership of the twelve imaums [q.v.]. The second [soonnee] great division of Mahomedans, who believe Ally to have been the first legitimate successor of Mahomet. The soonnees call shiahs Rafzee [q.v.] or heretics; on the other hand the shiahs call the soonnees Khaurjee [q.v.] or schismatics. Shiahs are opposed to the Soonnees like the Protestants of europe to Roman catholics. They reject the traditions of the soonnees, having separated from them about 363 years after Mahomet's hijra [q.v.], A.D. 985, under one of the Abbausiya caliphs [q.v.], or descendants of Abbaus, Mahomet's uncle who ruled as Caliphs over Baghdad and Persia from A.D. 749 to 1258. They deny the caliphate of the first three

successors of Mahomet, Aboo bakr, Omar, and Osman, the first two being Mahomet's fathers-in-law and the third his son-in-law, who ruled at Medina. They regard these three as usurpers of the successorship to the caliphate, which they declare belonged only to another son-in-law, the fourth caliph, Ally, husband of the prophet's daughter Fatimah and father of Hassan and Hoossain. Beginning with Ally, shiahs recognize a succession of twelve imaums, whereas the soonnees begin with Aboo bakr. As regards imaumat [q.v.] itself the Shiahs maintain that it was a legacy bequeathed to Ally and his descendants by Mahomet and that it consequently descends by express appointment in the apostolic line and that election does not apply. This the soonnees do not believe. The shiahs also hold that the imaum must be masoom or sinless. The twelfth Imaum, Mahdee [q.v.] is believed by one sect to be still alive and expected to reappear; these are known as the Mahdivy [q.v.]. Another sect believe that Mahdee has appeared and gone and are styled the Gheir mahdee. On the death of the sixth imaum the majority of the shiahs acknowledged his second son as imaum, but a minority following the eldest son's son Ismail seceded and formed the Ismail sect of shiahs. These again, on a dispute as to succession between two brothers, at the close of the eleventh century, divided into two branches; the Nazarene, represented in india by the Khojas [q.v.], and the Mustalian, represented in india by the Bohras [q.v.]. The doctrine of the shiahs, as it developed itself in Persia, was influenced in some measure by the ancient religion of Zoroaster which preceded it in that country. There the shiah tenets ultimately gave birth to a kind of spiritual philosophy called soofeeism [soofee]; so similar to the indian vedauntam [q.v.] that it is based upon two ideas, viz., nothing really exists but God, while all besides is illusion [mauyay], and union with God is the highest object of human effort. The shiahs keep with great solemnity the anniversary of the death in battle of Hoossain, son of Ally, on a particular day in the moharram [q.v.] or first month [maheena] of the mahomedan lunar year. Hassan is supposed to have been poisoned by a woman at the instigation of yazeed; but Hoossain was killed at Carbalah by Yazeed, son of the first Oommiya caliph, commonly called Mooauviya, who, supported by Mahomet's favorite wife Ayeesha, daughter of Aboo bakr, opposed the succession of Ally, assumed the government, and transferred the caliphate to Damascus. Hence the shiahs perform pilgrimages to Carbalah rather than to Mecca. The bigoted amongst the shiahs on the eighteenth Zihauj make three images of dough filled with honey to represent Aboo bakr, Omar, and Osman, and thrust knives into them. Shiahs admit the principle of religious compromise called Takiyah [q.v.] or pious fraud, whereby a Shiah may deny the peculiarities of his religion to save himself. There are minor differences between soonnees and shiahs in liturgical ceremonies and civil law. Shiahs often marry by the Mootah [q.v.] ceremony for a brief period, which the soonnees consider haraum [q.v.]. The Turks, Egyptians, and Indian mahomedans are mostly soonnees, while the Persians are shiahs. The shiah sect in india are considerable in Oudh and Hyderabad of Scind. There are two particular sub-sects amongst shiahs, viz., followers of principles and followers of traditions, the difference between the two being as to the weight to be attached to the exposition of Moojtahids [q.v.] the former repudiating their authority and the latter obeying them. Total number about 45,000 in presidency [mahomedan, soonnee].

SHICSHAY (शिक्षा - shikshá, *San.*). From (shiksh, san. to teach). The science which teaches proper pronunciation and especially the laws of euphony peculiar to the Vedams [q.v.]. The second Vedaungam [q.v.]. Since the chief virtue of the Vedic texts was in their oral repetition, these phonetic manuals were of great value to priests or devotees. The title is used in dravidian languages for Punishment.

SHIGRAM (शीघ्र - shíghra, *San.*). Means quick. In astronomy [jyotisham], parallax. A small hack palankeen-carriage, used mainly in Madras [jutkah].

SHIKA (*சீயக்காய்* - shíyakkáy, *Tam.*). Means cleaning pod, from use as soap in washing hair. Same as Soap-pod.

SHIKAR (شکار - shikár, *Hind.*). Hunting, so the thing hunted. A shikarry is a sportsman. Shikar khanah is a preserve.

SHIKAST (شکست - shikast, *Hind.*). From (shikastan, pers. to break). Broken; decayed; a running handwriting.

SHIKHAY (शिखा - shikhá, *San.*). Crest. Top-knot [conday, coodoomy].——*Shekharan* (சேகரன் - shégaran, Tam.). From (shikhara, san. head). Suffix in proper names, as Chundrashekharan. Hindoo 2nd or pers. name [peyar].——*Shikharam* (शिखर - shikhara, San.). From (shikha, san. head). Pinnacle, tower [calasham, coil].——*Shikhaumany* (சிகாமணி - shigámani, Tam.). From (above + mani, san. jewel). Crest-jewel. Hindoo 2nd or pers. name [peyar].

SHIL (शिल् - shil, *San.*). To practice.——*Shilpam* (शिल्प - shilpa, San.). Mechanical science, especially sculpture and architecture [maunasauram, shastram].——*Shilpy* (शिल्पी - shilpí, San.). A mechanic.

SHIL (சில் - shil, *Tam.*). Small.——*Shilamban* (சிலம்பன் - shilamban, Tam.). Hill-god. Soobramanyan [q.v.]. Also chief of hilly tracts [coorinjy, desham, poorooppan].——*Shilamboo* (சிலம்பு - shilambu, Tam.). From (shil, tam. small). Hill.

SHILANDY (कनकचंप - kanakachampa, *San.*; ಮುಡಮರ - múdamara, *Can.*; సునూరు - sunúru, *Tel.*; କୋନିୟର - koniara, *Oor.*; சிலந்தி - shilandi, *Tam.*). Title from tamul. San. from (kanaka, san. gold + champa, san. bauhinia variegata, linn.). Tam. means knobbed; from leaves. Can. also (narole). Tel. also (tammichettu); (erradzuvvi), meaning red + ficus tsiela, roxb.; (kakamochettu). Tam. also (sherundi); (shengódu), meaning red branched. Title otherwise Golden champak, Red jovy, Tummy tree, Yellow flowered ochna. Botanically Ochna squarrosa, linn., ochnaceæ [vricsham, 34]. Alias Ochna lucida, obtusata. Small tree; leaves from narrow-oblong to oblong-ovate, obtuse or acute, serrated; racemes springing from the apex of a short, lateral, almost leafless shoot; pedicels elongated; sepals oval; petals and ovaries seven to twelve; stigma capitate; anthers linear, elongated; flowers yellow fragrant; flowering in february and march. Wood reddish-brown, moderately hard, close-grained; warps and splits. Another species is wightiana.

SHILAY (शिला - shilá, *San.*; சிலை - shilai, *Tam.*). From (shi, san. to sharpen). Stone. The fixed idol [vigraham] of a temple [coil, pagoda] usually of black granite [caroom cull], not removed for processions [pradacshinam]; Moola vigraham [q.v.] or the principal idol as opposed to Ootsava vigraham or the festival idol carried about in processions. In tamul the latter is known as Yezhoondarool nauyagar or the move-about lord [maunasauram].——*Shilahaura* (शिलाहार - shiláhára, San.). Dynasty, probably Dravidian, that ruled in the Northern concan [q.v.] from about 810 to 1260 A.D.——*Shilah vamsham* (शिलावंश - shilávamsha, San.). Dynasty of the ancient rulers of Nundapore. See vol. I, 61.——*Shilajit* (शिलाजित् - shilájit, San.; سلاجیت - salájít, Hind.; ಶಿಲಾಜತ್ತು - shilájittu, Can.; శిలాజిత్తు - shilájittu, Tel.; சிலாசத்து - shilásattu, Tam.). San. from (shilá, san. stone + jí, san. to conquer); fossil exudation [blue-flowered chiretta, himalayan chiretta]. San. also (shilájatu), meaning stone lac; supposed to issue from stones of mountains in hot weather. Title otherwise Mineral caoutchouc, Mineral tallow, Mineral tar, Mineral wax. Bitumen; substance exuding from rocks in hot weather, produced in mountains where iron [auhan] abounds; a dark sticky unctuous substance, in appearance like the vegetable bdellium [q.v.], taste bitter, smell like stale cow's urine; medicinally alterative tonic, specially useful in urinary diseases, diabetes, gravel, anæmia, consumption, cough and skin diseases. Asphalt is solid bitumen; black or brownish black, insoluble in alcohol but soluble in naphtha [nift]; otherwise jew's pitch, mineral pitch. Petroleum is fluid bitumen, otherwise mineral naphtha, persian naphtha or rock naphtha [munn teilam]. Carpoor shilajit, from (karpúra, san. camphor + above) is a foliated granular gypsum of a reddish grey color; soft, translucent, and easily broken; an impure variety of alabaster; imported; when pounded, sprinkled over excoriations and ichorous ulcers. See vol. II, 39.——*Shilastaupanam* (शिलास्थापन - shilást'hápana, San.). From (above + st'hápana, san. erecting). A ceremony. Setting a stone or stones at a funeral ceremony to personify a deceased ancestor [pitry], whose spirit is supposed to enter and remain in it while the ceremonies are performed. Done on the second day after death [shoodcaud]. See vol. II, 237.——*Shilaubhishaicam* (शिलाभिषेक - shilábhishéka, San.). From (above + abhishéka, san. ablution). Part of funeral ceremony [shoodcaud]. See vol. II, 237.——*Shilodvausanam* (शिलोद्वासन - shilódvásana, San.). From (above + udvásana, san. abandoning). Setting free of the stones [shilastaupanam]. Thrown into water on the tenth day, after which all the relatives bathe. See vol. II, 237.——*Silauras* (शिलारस - shilárasa, San.; میعه سائله - míahisáilah, Ar.; سلارس - siláras, Hind. and Dec.; رسمالا - rasamála, Malay; நெரியாசிப்பால் - neriyásippál, Tam.). Title from hindostany. San. from (shilá, san. stone + rasa, san. juice). Ar. from (míah, ar. storax + sáilah, ar. liquid). Tam. from (niryása, san. resin + pál, tam. milk). General term for the gum-resin of either Altingia excelsa, noronha [java storax], Liquidambar orientale [indian storax], or Styrax officinale [true storax].——*Sillair* (సిల్లేరు - silléru, Tel.). From (shilá, san. stone + éru, tel. river); from its course through mountainous country. River; Vizagapatam dist., Jeypore zemindarry, Mulkangherry magisterial division. Rises in Jeypore hills. Flows east then north to Oomanda where it turns west and finally south-west and joins the Severy at Motoo, about 20 miles north-east of the junction of the latter with the Godavery. Total length, about 150 miles. The course is tortuous and through mountainous country. Forms the boundary between Rekapully talook and Mulkangherry talook of the district of Vizagapatam.

SHIMBEAM (شین بئن - shínbaín, *Hind.*). A corruption from burmese (shín, to join side by side + byín, plank). A thick plank used in constructing the side of a ship. It is not sawn, but split from green trees.

SHINGLE TREE (ಹಾಲಿಗೆ - haulige, *Can.*; மலைக்கோன் - malaikkón, *Tam.*). Title from use for roofing. Can. from (hauru, can. lightness), light timber. Tam. from (malai, tam. mountain + kóṇ, tam. king). Can. also (kalinji). Title otherwise King of the mountains, Pink cedar, Red cedar. Botanically Acrocarpus fraxinifolius, wight, leguminosæ [vricsham, 48]. Large tree, deciduous, often having large buttresses, bark light grey, young parts golden pubescent; leaves glabrous, bipinnate; pinnæ three pairs with a terminal one; leaflets equally pinnate, four to six, opposite pair ovate, acuminate; racemes many-flowered; flowers dull greenish-red; calyx and corolla minutely golden-pubescent outside. Timber flesh-colored, shrinks in seasoning; light and much resembles Cedrela toona, roxb. [toon], has a cedelaceous smell; much used by planters for roofing as shingles, building purposes, furniture, &c.

SHIR (சிறு - shiru, *Tam.*). Small [cher, chinna, chit, chota, coor]. Prefix in place names; as in Shirvayal, meaning small field.——*Seetaur* (சிற்றாறு - shittáru, Tam. sítár *). From (shiru, tam. small + áru, tam. river). River; Tanjore dist., Nunnilam and Negapatam tals. Branches from the Vettaur at Cangalancherry. A small river irrigating a portion of Nunnilam talook.——*Shiroocoody* (சிறுகுடி - shirugudi, Tam.). From (above + kudi, tam. village). Village of hilly tracts [coorchy].——*Shiroomullay* (சிறுமலை - shirumalai, Tam. sirumalai *). From (shiru, tam. small + malai, tam. hill). Mountain; Madura dist., Dindigul tal.; lat. 10° 07′ to 10° 18′; long. 77° 58′ to 78° 07′; height 4,522; from Dindigul S.S.W. 5 miles; from Madura N.N.W. 23 miles. A few miles east of the Pulneys. Extreme length about 20 miles. The undulating plateau at its top is cool and agreeable. Rather feverish. Noted for plantains [q.v.].——*Shitt* (சிற்று - shittu, Tam.). From (shiru, tam. small). Small. Prefix in place names; as Shittarasore, meaning the small royal village.——*Shree choornam* (శ్రీచూర్ణము - shríchúrnamu, Tel.). From (above + chihna, san. clarion). Form is a corruption. Trumpets blown with one mouth in pairs before a priest [acharry, mahant] or in the temple [coil, pagoda].——*Siroogooppa* (సిరుగుప్ప - shiruguppa, Tel. siruguppa *). From (shiru, tel. small + kuppa, tel. mound).—"*a*" Deputy tahsildarry, Bellary district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station; Bellary dist., Bellary tal.; pop. 5,478; acres 7,417; lat. 15° 32′; long. 76° 56′; from Adony W. 28 miles; from Bellary N. 34 miles; from Hospett N.E. 42 miles; from Hurpanhully N.E. 82 miles; from Madras N.W. 288 miles; from Tadpatry W.N.W. 90 miles. On S. bank of Toongabudra. Site of anicut [q.v.] by which large channels [q.v.] are taken off Toongabudra. Weekly market.——*Sirwail* (చిరువెల్ల - chiruvella, Tel.). See sep. title.

SHIRAH (شیره - shírah, *Hind.*). Means juice. Indian ink [mashy, shye] made with lamp-black [caujal]; the blackness of this never diminishes unless injured by wet.

SHIRRY (ಸಿಡಿ - sidi, *Can.*; సిడి - sidi, *Tel.*; செடில் - shedil, *Tam.*). From (sidi, tel. hook). A beam of wood traversing an upright post upon a pivot, to the ends of which persons are fastened to be whirled round at the hook-swinging festivals [shedil]. Churruck of Bengal. The volunteer for this is first brought to the river or tank, in which he is plunged, he then proceeds accompanied by the poojarry [q.v.] and bajantry [q.v.] to the temple, where he prostrates himself before the god, is perfumed with sandal [q.v.], is decorated with flowers, receives a benediction from the priest, goes three times round the temple with the same attendants, and afterwards performs a similar circuit round the Shirry itself. He is then suspended in the air by passing a hook through the sinews of his back. The hook is at the end of a chain which hangs from horizontal beam. The operation is said to be to a great extent painless [maryauday].——*Shedil* (செடில் - shedil, Tam.). From (sidi, tel. hook). Same as Shirry.

SHIVA (शिव - shiva, *San.*; சிவன் - shivan, *Tam.*). From (shvi, san. to thrive). ζεύς of Greeks; Jupiter of Romans; Osiris of Egyptians. Osiris and Isis correspond with Shiva and Parvaty.——**(1)** The history of Sheivism in relation to Southern india has been given in the foot-note on the history of Hindoo religion at vol. I (73) to (76). At the present day the followers of Shiva consider him to be the highest god and merely call him Eeshwaran or supreme being. Though Shiva is the term generally used in these pages, yet Eeshwaran [q.v.] is the name that would be heard among sheiveites. The office of Roodran [q.v.] or destruction is given to Shiva but this character is much attenuated by legend. In the creed of the people it is the village goddesses who represent the furies and destruction, and Shiva has never been assimilated in that character. The followers of Shiva form, in the southern part of the peninsula, the great majority, and are distinguished from the others by the mark of burnt cowdung [tirneer, vibhooty] on their foreheads. Their principal and often repeated form of prayer [muntram] is Namashivauya which is called Punchaucsharam [q.v.], 5 characters, and means, salutation to Shiva. Among the Sheivas there are many different sects. Sixteen divisions are specially recognised:—abhaidam, addhwam, anaudy, anoo, antaram, audy, bhaidam, goonam, kriyah, maha, naulpaudam, nirgoonam, nyaunam, oordhwam, shooddham and yogam. See also Samayam.——**(2)** Shiva is represented in the temple by the lingam [q.v.] alone. In the arts he is represented by manifold images. Most frequently this is by a human figure in a standing posture, with four arms and hands, two of which he lifts up, holding in one a deer [mrigam] and in the other a mazhoo [q.v.] or battle-axe, and two he keeps empty. He is of gigantic stature, his color is white or ashy; he has a perpendicular eye [trinetran] on his forehead, which when opened emits destructive fire; the crescent moon [chundran] is on his forehead, and the goddess gungay [q.v.] in his hair; he wears the hide of an elephant [q.v.] and the skin of a tiger [pooly]; he bears a necklace of human skulls [cuncaulan], and deadly serpents [vausooky] are entwined about his arms; in his hands he holds various emblems, the most redoubtable of which is a shoolam [q.v.] or trident, and next a strangulative cord [pausham], whence the epithet pashoopaty [q.v.], lord of life; there are certain peculiarly destructive times when he dances for joy [taundavam]. He has two human prototypes. The first appears in Shiva, as the husband of Saty [q.v.] who was, daughter of Dacshan [q.v.]. The second type occurs when Shiva reappears at the churning the milk-sea, swallows the poison [neelacuntan] of the serpent Vausooky [q.v.], and remains for a night in the apparent stupor of death but recovers [coormam, pradosham]. The fact of chundran [q.v.] or the moon being placed on the forehead of shiva, shows some connection; as of bramha [q.v.] with the earth, and of vishnoo [q.v.] with the sun; somavauram [q.v.] or monday is a special day with sheivas; the more so if any religious duty or observance fall thereon; the chief sheiva processions [ootsavam] take place in the night of the full moon [powrnimay]. Shiva is sometimes represented with five faces. His wife is Parvaty [q.v.]. His sons are Vigneshwaram [q.v.], Soobramanyan [q.v.] and Veerabhadran [q.v.]. His heaven is Keilausam [q.v.] in the Himalayas. He is also represented as sitting on a bull [nundy], together with his consort Parvaty. The bull on which he rides is called Rishabham [q.v.], and Nundikeshwaran [nundy], which may be seen in all pagodas that are built in honor of Shiva. In front of the larger ones, the bull is under a portico in a lying posture with his face towards the temple [coil, pagoda].——**(3)** Shiva's principal names are the following:—Ambica bhaugan or the ambicay or parvaty-sided; Anandan or the blissful; Ananta nautan or the infinite lord; Andivurnan or the twilight-colored; Annaumalay nautan or the lord of arnauchellam or the red hill lord [trinomalee]; Aulamar cadavool or the banyan [q.v.] god; Bhoota nautan or the lord of the demons; Bhoovaneshanautan or the lord of the world; Bramha or the supreme one; Cadavool or the supreme being; Cadookeiyan or he who wears a garland of the cassia fistula [common condray]; Calinga royan or calinga king; Capauly or the skull-wearer; Caulacaulan or the conqueror of caulan or yaman [q.v.], the king of death; Caulatty appan or the calastry father; Cauliyodaudy or the dancer with cauly; Cauyauronan or his name at negapatam; Chundra shekharan or the moon-crested; Chidambara moorty or the supernal sky form; Coondravilly or the hill archer, as having made mount meroo his bow; Cuncaulan or the bone-wearer; Cunnisoody or the garland-wearer; Devamany or the divine gem; Eeshaunan or the universal ruler; Gungavenyan or he whose hair is adorned with the river ganges; Haran or the supremely powerful; Ireiyone or king; Jyoty or the light; Keilaiyauly or the lord of keilausam; Mahashivan or the great shiva; Maheswaran or the great lord; Maraimoothal or the author of the vedams [q.v.]; Masilauthavar or the spotless; Maudevan or the great god; Maunidamendy or he who holds a deer in his hand; Maunyaula moorty or the great lord of the world; Mooccunnan or the three-eyed; Moonnone or the ancient one; Mungay bhaugan or the virgin-sided; Nakkan or the naked; Namban or the supremely desirable; Nundikeshwaran or the bull-lord; Nanjooraicuntan or he who had poison in his throat; Nateshan or the dancing lord; Nauribhaugan or the female-sided; Nautan or the lord; Neelacuntan or the blue-throated; Nirmalan or the spotless; Nityan or the eternal one; Oooma sahitan or he who is united with oomay [q.v.] or parvaty; Punchamookhan or the five-faced; Paraman or the highest; Paramashivan or the celestial shiva; Parameshwaran or the sublime lord; Parashoopauny or the battle-axe wearer; Pariyairy or the horse-rider; Parvaty cozhnan or the husband of parvaty; Pashoopaty or the lord of souls; Paundarungan or the white-colored dancer; Peyodaudy or the dancer with a demon; Pillaityaugar or the child-giver; Pinauca pauny or the trident bearer; Pingacan or he who wears matted hair; Piraisoody or the crescent-moon crested; Pongaravanindon or he who is adorned with a raging serpent; Poorauntacan or the city destroyer; Roodran or the furious or the disperser of tears; Sadaushivan or the eternal shiva; Shadaimoody or he who is crowned with entangled locks; Shambhoo or the happiness maker; Shaurndauray cauttavar or the protector of them who take refuge with him; Shenjadaiyeeshar or the red-locked lord; Shokkanautan or the handsome lord; Shoodalaiyaudy or the dancer on the place where dead bodies are burnt; Shoolapaunyan or the trident wearer; Shuncaran or the author of good; Swarganaickan or the lord of heaven; Tatparan or the self-existent; Taundava moorty or the dancing god; Varan or the giver of gifts; Vishwanautan or the lord of the world; Vriddhauchella moorty or the

ancient hill god; Yecaumbaran or lord of the undivided garment; Yendolan or the eight-shouldered; Yogy or the ascetic, &c.—— **(4)** The images to be found in Shiva pagodas [q.v.] are the following.—"*a*" Aroopatt moover [q.v.], or the sixty-three persons who were taken visibly into bliss [mocsham] by Shiva, wherefore they are now adored with him in his pagodas [q.v.]. These are to be found only in very large pagodas.—"*b*" Ashtadic paulacans [q.v.], or the regents of the eight cardinal points, who enjoy some adoration.—"*c*" Ayyar, the lord, an image having the form of a man.—"*d*" Bheiravan [q.v.], who is represented by a human form quite naked, and said to be an incarnation of Shiva himself. Bheiravan is also often represented with the head of a dog, and the dog though otherwise regarded as unclean, is his vehicle [vauhan].—"*e*" Chidambareshwaran, or Shiva himself, represented as dancing, with his wife standing beside him.—"*f*" Chundra shekharan, or Shiva; the form in which he is carried about at festivals, riding with his wife on an ox.—"*g*" Chundra sooryan, or the sun and moon, represented in some pagodas by certain figures and images, and in others by two burning lamps. For, to a certain extent, the Tamulians worship also the sun and the moon, and make even offerings to them. On Sunday some fast in honor of the sun, which fast is called Nyayitkizhamay-vratam [q.v.], Sunday fast, or simply Nyayir [q.v.] sun. On Sunday fast especially women who wish to get male children, and to be preserved from widowhood. Fasting on Sunday is also recommended for sore-eyes; and the Sunday is the best day for taking purgatives. And so natives have also fasts at certain phases of the moon. But the other planets [graham] they adore only with a few observances.—"*h*" Dwaurapaulacas or door-keepers, and Coondodaran, the bearer of Shiva's umbrella. —"*i*" Lingam standing in the innermost part of the pagoda and adored daily three times with offerings, meant in honor of Shiva and Shacty.—"*j*" Maha lutchmy, Vishnoo's wife, a figure of stone, standing in a separate small temple and enjoying some adoration. The conjunction indicates a very early stage when there was no rivalry.—"*k*" Nundikeshwaran, the bull. He is one of the nearest to Shiva and receives therefore some adoration.—"*l*" Parvaty's image, called Ammay, or mother and adored in the same manner as Shiva.—"*m*" Soobramanyan with his two wives, Vulliyammay and Devayaunay.—"*n*" Soondramoorty, also one of those who, on account of their holy life, have a place near Shiva.—"*o*" Dandeshwara neinaur, a man who, by his holy life on earth, obtained a place near Shiva and is therefore adored with him.—"*p*" Vigneshwaran. Some of the images are made of stone, others of metal; those made of stone remain always in the same place, whereas those made of metal are carried about in the streets at festivals on wooden vehicles [vauhan], representing birds and animals [poonyaprauny]. The large pagodas [coil, pagoda] have large cars [rath], on which the images of the gods are carried about once every year. These cars have six wheels and the form of a tower, and on all sides there are carvings, representing the stories concerning Shiva. At festivals when they are dragged they are adorned with shells, &c.; and on each there are, besides the idol, Bramins, dancing-girls, and musicians. They differ as to size; some are very large, so large that for each one from 500 to 1,000 men are required to drag it. In connection with every large pagoda there are five cars; the first for Shiva, the second for Ammay or Parvaty, the third for Vigneshwaran, the fourth for Soobramanyan, and the fifth for Dandeshwaraneinaur; and at processions they follow each other in this order, Vigneshwaran, Soobramanyan, Shiva, Ammay, Dandeshwaran.—— **(5)** The festivals celebrated in honor of Shiva are very numerous, for at every one of the 1,008 places where he is believed to have appeared, an anniversary of the event is celebrated, at which the respective story is acted. But two annual festivals, named Tircalyaunam [pundigay, 6d] sacred wedding, and Maurgaly tirmanjanam [pundigay, 6d] or the anointing of idols in the month Maurgaly [mausam] or December-January, when it is done with more than usual solemnity, are celebrated all over the land. The latter is best known at Chidambaram, where it is celebrated in honor of Nateshan, the dancing lord; that is to say Shiva dancing in emulation with Bhadra caunly [q.v.]. In honor of Shiva there are also various fast days observed, viz.:—"*a*" every Monday, and particularly Mondays in the month Caurteecam or November-December; Monday is the moon's day, and the moon is associated with Shiva and worn by him as a head ornament;— "*b*" the thirteenth day from every new and full moon, called Pradosha vratam;—"*c*" the Varsha pirapp [pundigay, 6d], i.e., the New-year's day;—"*d*" a fast in the month Maushy or February-March, named Shivarautry [pundigay, 6a], i.e., shiva's night; when natives watch the whole night and observe a very strict fast, supposed to be exceedingly meritorious;—"*e*" a fast in the month Auvany or August-September, called Auvany moolam [pundigay, 5b];—"*f*" a fast for women in the month Arpisy or October-November, called Kedaura vratam [pundigay, 6b]. From the observance of these fasts great benefit is expected; but as a rule they are not strict fasts; one regular meal besides milk and sweetmeats being allowed; and most of them are not observed by all the followers of Shiva, but only by the Bramins and those who are specially orthodox.—— **(6)** The books written in honor of Shiva are very numerous. There is, in the first place, a set of sacred Sheiva works, named Augamams [q.v.], twenty-eight in number, containing copious directions for the various rites of worship and much other abstruse matter not deemed proper to be read by the vulgar. There are further many local Pooraunams [stala pooraunam], which contain the stories said to have happened at the 1,008 places sacred to Shiva; and there are moreover the great Pooraunams [q.v.], secondary sacred writings, which treat for the greater part of Shiva. Of the local and the great Pooraunams, and other Sheiva books, those best known are the following:— "*a*" Annaumalay nautan vannam, i.e., annaumalay nautan's ode.—"*b*" Arnagiry antaudy, containing 100 hymns about Shiva, in which the end of every line forms the beginning of the following one.—"*c*" Caushy caundam, a part of the Scaunda-pooraunam in which are related the wonders performed by Shiva at Caushy, or Benares.—"*d*" Cauyauronar oolah, relating his deeds as Cauyauronan at Negapatam.—"*e*" Chidambara maulay, a collection of hymns about his deeds at Chidambaram.—"*f*" Marcandeya pooraunam, in which is related the story of a Bramin's son, who was destined by Shiva to become only 16 years old, that is to say to remain always 16 years old without dying. But Yaman, the king of death, not knowing in what sense he should become only 16 years old, came to fetch him when he was of that age; upon which Shiva came forth out of a lingam, and killed him, restoring him however afterwards again to life, in consequence of the intercession of the gods.—"*g*" Mathooray pooraunam, which is also called Aroopatt naul vileiyaudal pooraunam, because it contains an account of the sixty-four plays of Shiva as Swarganaickan at Madura.—"*h*" Nenjvidoo tooth, setting forth Shiva's praise.—"*i*" Ottara bodhacam, setting forth his praise and mighty deeds as Mylapore poorshan at St. Thomé or Mylapore.—"*j*" Paramarahasya maulay, containing 100 hymns in honor of Shiva, by Namashivauyam.—"*k*" Periya pooraunam, i.e., the large pooraunam, containing many stories about Shiva's sixty-three special devotees [aroopatt moover]. —"*l*" Sawmiperil vunnam, i.e., ode on the lord.—"*m*" Scaunda-pooraunam, which contains, among other stories, one about Shiva's marriage with Parvaty; and one about Shoorapudman, who, by severe penance, obtained great power from Shiva, but became afterwards tyrannical in consequence of which the gods had a great war with him, and in this he was finally slain.—"*n*" Shivarautry pooraunam, containing the story that gave occasion for the annual fast of this name.—"*o*" Tairoornda vauchacam, in which is related how Shiva revived a certain king's son at Warriore, over whose body a carriage had gone, because his own carriage had gone over a calf.—"*p*" Tirvarore oolah, relating his deeds as Tyaugaroyar in Tirvarore.—"*q*" Tirvencata pooraunam, containing diffuse stories about Shiva at Tirvengadam. The temple at Tirvengadam or Tripatty was taken possession of by Ramaunoojan [q.v.] for Vishnoo [q.v.] in the twelfth century.— "*r*" Vauthavore pooraunam which contains many stories about Shiva at Vauthavore, where he appeared as teacher of Tennavan bramharoyan, the writer of the Maunikya vauchacam, who spent an immense sum of money in building pagodas and tanks, and did many miracles by the help of Shiva.—"*s*" Vazhippatt, a poetical composition which is chanted when one dies, containing prayers to Shiva, that he may soothe the pains of death and receive the soul into bliss.—"*t*" Vriddhauchella pooraunam, containing the stories that are said to have happened at Vriddhauchellam.—"*u*" Yecaumbaranautar oolah, procession-hymns about the wonders which Shiva did as Yecaumbara nautan. All these books are written in poetry. For the followers of Shiva see Sheiva siddhauntam below.—— **(7)** The rivalry between Veishnavism and Sheivism is incessant. The Veishnavite acknowledges but one God; he speaks of Vishnoo as if there were no other God. So with the devotee of Shiva even in a greater degree; he transposes the name into the neuter Shivam, and expresses thus his belief that his deity is the one great essence, without sex or corporeal shape [autmam]. The Bhaugavatam thus denounces the worshippers of Shiva:—"Those who profess "the worship of Bhavan, and those who follow their doctrines, "are heretics and enemies of the sacred Shastrams." On the side of shiva, the Pudma pooraunam says:—"From even looking at "Vishnoo, the wrath of Shiva is kindled, and from his wrath, we "fall assuredly into a horrible hell; let not therefore the name of "Vishnoo ever be pronounced." There is however a Tamul proverb:—அரியும்சிவனும் ஒன்று அல்ல என்கிறவன் வாயில் மண்—"Vishnoo and Shiva are one; let sand be put "into the mouth of him who denies it [matam]." The strange conjunction of rival gods under the same roof, or at least within the same temple wall, is exemplified at the well-known pagoda [q.v.] at Trivettore close to the town of Madras, where Shiva is adored under the name Audipooreeshwaran, known as Tyaugaraja sawmy. One corner of his pagoda has been taken possession of by a Shacty [q.v.] or plebeian goddess called Tripoora soondary, but vulgarly Vuttapauray nauchiyaur. The god has a Shiva bramin as his priest and has his spouse Parvaty with him. But the Shacty or pariah goddess has for priest an Otchan [q.v.]. This goddess's feast lasts ten days, during which Shiva and his spouse receive no worship. All Hindoos, even those the most respectable classes in the town of Madras, flock to this pagoda. This god's name, Tyaugarajan, has become a common proper name. The universal sacrifice of Sarwa medham [yaugam] is offered to shiva. He is the only god to whom animal sacrifices are offered. The Vilvam [bael] tree is sacred to him, and chaplets of the leaves and flowers are worn by him. Two or more horizontal lines [vibhooty] made of ashes of cowdung

[shanny] or sandal [q.v.] wood, either with or without a single dot or Pottoo [q.v.], on the forehead, typical of Shiva's third eye, are marks of a Sheiva. The Sheiva sect was confirmed by Shuncaracharry [shuncaran]. A Veera sheiva is a lingayet [q.v.].——**(8)** Shiva is also a common plant first term, in the sense of the plant being sacred to him or useful in destroying diseases or white in color or tri-partite in leaf or seeds like his phallus emblem. Ex., where transl. is of second term :—Datura fastuosa, var. alba (shivapriyá), dear; Indigofera aspalathoides (shivanárvémbu), (shivanimba), melia azadirachta; Methonica superba (shivaraktiballi), red + creeper, (shivashakti), power; Parkia biglandulosa (shivalingamara), emblem + tree; Rauwolfia serpentina (shivanábhiballi), poison + creeper; Sphæranthus amaranthoides (shivakkarandai), ocimum basilicum; Terminalia chebula (shivá) auspicious. See gloss. paragraphs.——**(9)** As regards trees sacred to Shiva, Ægle marmelos, corr. [bael] is, as above indicated, the principal. To him are also dedicated the Saraca indica, linn. [bengal ashocam], Cæsalpinia pulcherrima, swartz. [gold mohur tree], Jasminum sambac, ait. [arabian jasmine], Guettarda speciosa, linn. [indian zebra wood], Calophyllum inophyllum, linn. [common poon], Origanum marjorana, linn. [marwali], Ixora coccinea, linn. [jungle geranium], Nerium odorum, soland. [gannair], Chrysanthemum indicum, dec. [shaumanty]. For other sacred plants see Poonyoshadhy.——**(10)** *Sheivam* (शैव - shaiva, San.). From (shiva, san. the god). Any one of the sixteen orthodox systems of the Sheiva religion, mentioned above.——*Sheiva siddhauntam* (शैवसिद्धान्त - shaivasiddhánta, San.). From (above + siddhánta, san. doctrine). The orthodox philosophy of the tamul Sheivas. Its standards are the twenty-eight Augamams [q.v.]. The Sheivas claim ten of the eighteen great Pooraunams [q.v.]; but only an abridgment of one of them, the Scaunda pooraunam, has yet been printed in Tamul.—"*a*" In the Sheiva philosophy, as in Ramaunoojan's veishnavite system, there are three eternal entities, Paty [q.v.], Pashoo [q.v.], Pausham [q.v.]; deity soul, matter. God and the soul are declared to be distinct. Matter cannot proceed from spirit; therefore the world was not developed from the deity. The great object set before men is to seek deliverance from the bondage of matter by Nyaunam [q.v.], divine knowledge. The soul will then be united to God, and freed from future births [mocsham, samsauram].—"*b*" The Sheivas suppose that there are four stages in religious life before union with God can be obtained. These are called Charitay, Kriyay, Yogam, and Nyaunam; resulting in Maha* nyaunam. There are definite rules to guide the disciples through these successive steps. Their due observance will bring the soul to one of the heavens of the gods. Charitay results in the heaven called Saulokyam [q.v.], i.e., the state of being with god; Kriyay ends in Sauroopyam [q.v.], i.e., the state of being in the image of god; Yogam conducts to Saumeepyam [q.v.], i.e., nearness to god; Nyaunam leads to Sauyoojyam [q.v.], i.e., union with god. Charitay signifies history, and is nearly synonymous with pooraunam [q.v.]; hence this stage may be denominated the pooraunic or historic; the eighteen great pooraunams are the books of direction in this stage; it is the popular idolatry of india; the soul is under the influence of the external body, called stoola shareeram [q.v.], or body of sense [indriyam]. Kriyay [q.v.] means action; the lingam [q.v.] is supposed to be the symbol of god's mode of operating; it is the chief external object of worship in this stage; the soul is under the influence of its second body, called lingashareeram [q.v.]. Yogam [q.v.] signifies meditation; this is the ascetic stage; it is characterised by a peculiar course of dreamy meditations: the soul is chiefly under the influence of its third body, called autma shareeram [q.v.], soul-like body; it is in this state that the soul has dreams and visions in sleep, which readily indicates the dreamy mode of meditation, and the spiritual visions obtained in this stage; the aids of the yogam course are necessary to help the soul on into the light of wisdom; in this stage the soul is in darkness; and yet it has attained to some idea of the light desired, and struggles for it; hence the yogy's neglect of his body. Nyaunam [q.v.] means wisdom; the soul is now under the influence of the fourth body, having escaped from the entanglements of the three exterior bodies; this body is denominated paramautma shareeram, the heavenly soul-like body; the breath communicates with this fourth body; the great object is to get a vision of god; this is sought to be attained in the following way; the nyauny seats himself on a tiger-skin or some other sacred article; having closed all the orifices of the body except the right nostril, he throws, by the power of thought, the awful name of the deity, om [q.v.], or namashivauya, upon the breath a few inches before the nose; he then draws in a full breath and closes the nostril as long as possible; while this form of god is thus floating around in the region of the soul, the soul is engaged in intense meditation, looking for a vision of deity; when the breath can be no longer retained, it is exhaled by the opposite nostril, when that is again closed, and the soul is left to meditate on the deities enthroned in his body; after a long course the light breaks in, the vision is obtained; the deity is seen in the form of a circular light, with an intensely bright spot, or luminous ring, in the centre; the man has now passed into light, and sees things as they are; he hears a divine sound, sees the five mystic letters [punchaucsharam] and receives a consciousness of the essential union between his soul and god, that they are one in essence, now separated only as the air in an earthen vessel is from that without; break the vessel, and they are one; he has now become a nyauny, or wise man; he has escaped entirely from the influence of his senses, appetites, and passions, and even from the influence of his intellectual powers; let his body do what it will, yet his soul sins not; he still inhabits the body and controls it at pleasure, but his soul receives no influence in return.—"*c*" A man may die in this stage, or pass into the condition of maha nyaunam, or great wisdom; if he dies in this stage he will be born but once more, and then a nyauny in the higher stage; in maha nyaunam the visions of the soul are all bright, undefined, formless splendour; the man is now a god; he waits only for the look of deity to annihilate his body, when the souls will pass away pure, and again become one with the eternal essence.——*Shivabhacticauran* (சிவபத்திக்காரன் - shivabattikkáran, Tam.). From (above + bhakti, san faith + kára, san. doer). A Sheiva devotee.——*Shivacaumy* (शिवकामी - shivakámí, San.). From (above + káma, san. desire). Parvaty [q.v.].——*Shivachidambaram* (சிவச்சிதம்பரம் - shivaççithambaram, Tam.). Shiva at chidambaram. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Shivacode* (శివకోడు - shivakódu, Tel.). From (above + kódu, tel. pool).—"*a*" Deputy tahsildarry, Godavary district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station; Godavery dist., Narsapore tal.; acres 2,987; lat. 16° 28′; long. 81° 52′; from Cocanada S.W. 43 miles; from Coonavaram S.S.E. 83 miles; from Ellore E.S.E. 50 miles; from Madras N.N.E. 250 miles; from Narsapore E.N.E. 9 miles; from Rajahmundry S. 37 miles; from the sea N. 7 miles.——*Shivacomauran* (சிவக்குமாரன் - shivakkumáran, Tam.). From (above + kumára, san. child). Scandan [q.v.], child of Shiva [q.v.]. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Shivadootan* (சிவதூதன் - shivathúthan, Tam.). From (above + dúta, san. servant). Shiva's messengers.——*Shivaganam* (शिवगण - shivagana, San.). From (above + gana, san. crowd) Deities attendant on Shiva [ganam].——*Shivaghetry* (சிவகிரி - shivagiri, Tam. sivagiri*). From (above + giri, san. mountain). Zemindarry, Town; Tinnevelly dist., Shuncaraneinarcoil tal.; pop. of zemindarry 8,987; of village 7,888; acres of zemindarry 87,632; village 47,717; lat. of town 9° 21′; long. 77° 28′; from Shuncaraneinarcoil N.W. 14 miles; from Tinnevelly N.N.W. 46 miles. The zemindarry [q.v.] is to the north-west of the talook [q.v.]. Peshcush Rs. 54,580. Number of villages, twenty-six.——*Shivagooroo* (சிவகுரு - shivaguru, Tam.). From (above + guru, san. preceptor). Scandan, preceptor of Shiva [gooroonautan]. Hindoo 2nd or pers. name. Common among non bramins [peyar]. Otherwise Shivagooroonautan.——*Shivagunge* (சிவகங்கை - shivagangai, Tam.). See sep. title.——*Shivagungay* (ಶಿವಗಂಗೆ - shivagange, Can.; shivagangabetta, Mys. Gov.). From (above + gangá, san. ganges); from sacred fountains on the hill. Sanscrit name (kakudgiri), meaning hump + hill; also (dakshinakáshí), meaning southern benares. Sacred hill in north-west of Nelamungala talook, Bangalore district, Mysore, 4,559 feet. On the east its outline resembles a bull, on the west Ganesh [q.v.], on the north a serpent, and on the south a lingam [q.v.].——*Shivah* (शिवा - shivá, San.). Means auspicious. Botanically the Prosopis genus, leguminosæ [vricsham, 48]. Allied to acacia [cantalam]. Erect trees or shrubs with scattered prickles; leaves twice pinnate, with small narrow leaflets; flowers small, green or yellowish; pod more or less thickened, straight or variously twisted, indehiscent. The species best known to the natives are:—dulcis [manilla tamarind], glandulosa [mesquit], pubescens [screw mesquit], spicigera [shamee].——*Shivajee* (ಶಿವಾಜಿ - shivájí, Can.). From (above + jí, hind. sir), Hindoo 2nd or pers. name. Common among Madhwas and Mahrattas [peyar]. Name of the founder of the Mahratta [q.v.] kingdom. Born 1627. Seized the hill fort of Tornea while 19. Murdered the Bejapore general. Plundered Surat and English and Dutch factories there. Assumed the title of Rajah, coined money, collected a fleet of ships, and sacked Barcelore. Defeated Aurungzeeb's general and declared independence. Invaded Carnatic [q.v.]; took Bellary, Kurnool, Jingee, Vellore. In the conduct of government he was assisted by eight ministers called Asht purdhans [pradhaun], of which Peshwah [q.v.] was the chief. Died 1680 [charitram]. See vol. I (117), (144), (149), (166); II, 253.——*Shiva locam* (शिवलोक - shivalóka, San.). From (above + lóka, san. world). Another name of Satyalocam.——*Shivam* (சிவம் - shivam, Tam.). Supreme essence [bramh] without sex or corporeal shape.——*Shiva matam* (शिवमत - shivamata, San.). From (above + mata, san. creed). The creed of Sheivites.——*Shiva maulay* (शिवमाला - shivamálá, San.). From (above + málá, san. garland). Rosary of Saraswaty [q.v.].——*Shivanadiyaun* (சிவனடியான் - shivanadiyán, Tam.). Sixty-three special votaries of Shiva [aroopatt moover].——*Shivanandam* (சிவாநந்தம் - shivánandam, Tam.). From (above + ánanda, san. happiness); one who is happy in shiva. Hindoo 2nd or pers. name [peyar].——*Shivanautan* (சிவநாதன் - shivanáthan, Tam.). From (above + nát'ha, san. lord), shiva, the lord. Hindoo 2nd or pers. name [peyar].——*Shivapadam* (சிவப்பதம் - shivappatham, Tam.). From (above + pada, san. foot). Same as shiva locam. Hindoo 2nd or pers.

name [peyar].——*Shivappan* (சிவப்பன் - shivappan, Tam.). From (above + appan, tam. father). Shiva, the father. Hindoo 2nd or pers. name [peyar].——*Shivappa naick* (ಶಿವಪ್ಪ ನಾಯಕ - shivappanáyaka, Can.). Name + third name. Name of Dalavoy [q.v.] and afterwards greatest prince of Ikkairy [q.v.] family. Defeated the Jeina [q.v.] rajahs of Tooloovam and acquired Canara; captured the Portuguese settlements at Mangalore, Barcelore, and Honore.——*Shivaramakrishnan* (சிவராமக்கிருட்டிணன் - shivarámakkiruttinan, Tam.). From (above + ráma, san. the hero + krishna, san. the god). Common among smartas [q.v.] who consider shiva and vishnoo the same. Compound Hindoo 2nd or pers. name [peyar].——*Shivaraman* (சிவராமன் - shivaráman, Tam.). From (above + ráma, san. the god). Rama who worshipped shiva, as at rameshwaram. Compound Hindoo 2nd or pers. name [peyar].——*Shivarautry* (சிவராத்திரி - shivaráttiri, Tam.). From (above + rátri, san. night). The fourteenth lunar day [tity] in the dark half [krishnapacsham] of every month, sacred to Shiva. But Maha shivarautry [q.v.] is generally meant.——*Shivasamoodram* (ಶಿವಸಮುದ್ರ - shivanasamudra, Can.). From (above + samudra, san. ocean). Properly called Heggoorra. Ancient town, Island, Water-falls; Coimbatore dist., Collegaul tal.; lat. 12° 16'; long. 77° 13'; from Coimbatore N. 89 miles; from Collegaul N.N.E. 9 miles. On the south-east border of the Tirmacoodloonarsapore talook, Mysore district, Mysore. The Cauvery here branches into two streams, each of which makes a descent of about 200 feet in a succession of picturesque rapids and waterfalls. The principal island embraced within these torrents, called Shivasamoodram is about 3 miles long by ¾ of a mile broad. On the western branch of the river, which forms the boundary between Mysore and Coimbatore, are the Gaganachookky falls; these waters divide round another small island called Yetticooroo. The falls on the eastern branch of the river are called the Burra chookky and display a great volume of water. The founder of the temples of Someshwarasawmy and Rungasawmy and the city was Tiroo chola roya, King of Keralam [q.v.]. After the death of his grandson the place was deserted till Gunga roya, a petty chief of Mysore, restored it. Gunga roya committed suicide in the falls, after a reign of sixty years. In 1791, at the time of the advance of the British army upon Seringapatam, Tippoo sultan laid waste the surrounding country, and drove all the inhabitants and the cattle into this island. Subsequently the whole area became overgrown with jungle, and the old stone bridges connecting it with the main land were impassable. About 1824, their repair was undertaken by a confidential servant of the Residency of Mysore, named Ramasawmy moodelliar. He expended several thousand pounds on the work, and was rewarded by the British government with the title of Janopacaura caum curta, or public benefactor. He also received a jagheer [q.v.] from the British government, and seven villages from the Mysore state. The new bridges are built on pillars of hewn stone founded in the rocky bed of the stream, and connected by stone girders. Both the temples are elaborately sculptured and contain inscriptions. The stones of an old Jeina [q.v.] temple were used for building the bridge over the Cauvery. There is a large mosque [musjid]. A bungalow [q.v.] where European visitors are entertained by jagheerdar. During the winter months island is malarious [aroovy].——*Shiva's blood* (भवरक्त - bhavarakta, San.). From red dye of flowers. Same as Saffron.——*Shivashuncaran* (சிவசங்கரன் - shivasangaran, Tam.). From (above + shankara, san. shiva); meaning shiva the happiness-maker. Hindoo 2nd or pers. name [peyar].——*Shiva vaucyam* (शिववाक्य - shivavákya, San.). From (above + vákya, san. word). A Tamul poem on theism. The author belonged to the sect of the Siddhar [q.v.], and taught a pure theism, retaining the name of Shiva. According to the legend, Shiva vaucyan, so called after his book, became a Veishnava [q.v.] and even a christian at the time of the apostle Thomas [q.v.]; but not being satisfied, he returned to Sheivism. Sheiva pundaurams [q.v.] destroy all copies they can lay hold of. The Dharma sabhay in Madras printed an interpolated edition, in which the meaning of the original is changed into the contrary. Genuine copies are very rare. The following is a specimen passage:—பண்டுநான்பறித்தெறிந்த பன்மலர்களெத்தனை பாழிலேசெபித்துவிட்ட மந்திரங்களெத்தனை மிண்டனாய்த் திரிந்தபோதிறைத்த நீர்களெத்தனை மீளவுஞ்சிவாலயங்கள் சூழ்வந்ததெத்தனை அண்டர்கோனிருப்பிடமறிந்துணர்ந்தஞானிகள் கண்டகோயிற்றெய்வமென்று கையெடுப்பதில்லையே. நீனாயள்ளி நீர்விட்டு நீர்நினைந்தகாரிய மானா யுன்னி நீரொல்லாமவத்திலேயிறைக்கிறீர் வேணாயுன்னிவித்தை யுன்னி வித்திலேமுளைத்தெழுந்த சீனாயுன்னவல்லிராய் சிவபதங்கள்சேரலாம். அரியுமல்லவரனுமல்லவயனு மல்லவப்புறங் கருமைவெண்மைசெம்மையுங் கடந்து நின்மகாரணம் பெரியதல்லசிறியதல்லபெண்ணுமாணு மல்லவே துரியமுங் கடந்துநின்ற தூரதூரதூரமே. சாதியாவதேதடா சலந்திரண்டநீரல்லோ பூதமைந்து மொன்றல்லோ புலன்களைந்து மொன்றல்லோ காது வாழிகாறைகம்பி சூடகம்பொன்னொன்றல்லோ சாதி பேதமோதுகின்ற தன்மையென்னதன்மையே. கறந்த பால்முலைபுகா கடைந்தவெண்ணெய்மோர்புகா, வுடைந்த சங்கினோசையு முயிர்களுமுடல்புகா வடிந்தவோரலை யினியுதிர்ந்தபூ மரம்புகா விறந்துபோனமானிடரினிப் பிறப்ப தில்லையே—"Formerly how many flowers have I "gathered and scattered? How many prayers have I repeated "in vain worship? While yet in the prime of my life, how much "water have I poured out? And moreover, how often have I "encompassed the holy places of Shiva? This I have left off, for "the wise who know the true God, the Lord of heavenly beings, "believe not the idol [shilay, vigraham] of the temples apparent "to the eyes to be God, nor lift up to it their hands [poojah]. "While taking up the water and throwing it again into the "water what is the object on which you think? On whatsoever "you think you have thrown all the water vainly. Think on the "root, think on the seed and on the benefit arising from that "seed; when you are thus able to think, you may approach the "feet of God [sundhyauvandanam]. It is not Hary [q.v.], it "is not Haran [q.v.], it is not Ayan [bramha]; far beyond the "black of Vishnoo [q.v.], the white of Shiva [q.v.] or the red "of Bramha [q.v.] soars the everlasting cause; it is not great, "it is not small, neither is it male nor female; beyond every "state of corporeal being it is farther, farther, and farther still "[autmam]. What, O wretch, is caste [jauty]? Is not water an "accumulation of fluid particles? Are not the five elements "[bhootam] and the five senses [indriyam] one? Are not the "several ornaments for the neck, the breast, and the feet "equally gold? What then is the peculiar quality supposed to "result from difference in caste? As milk once drawn cannot "again enter the udder, nor butter churned be recombined "with milk; as sound cannot be produced from a broken conch "[chunk], nor the life be restored to its body; as a decayed leaf "and a fallen flower cannot be reunited to the parent tree; so "a man once dead is subject to no future birth [samsauram]." ——*Shivayyan* (சிவய்யன் - shivayyan, Tam.). From above + aiyyan, tam. master). Hindoo 2nd or pers. name [peyar].

SHIVAGUNGA (சிவகங்கை - shivagangai, *Tam.* sivaganga*). From (shiva, san. the god + gangá, san. ganges) [shiva]. Sanscrit name (dakshinakálípura), meaning south + cauly, the deity + town.——(1) Zemindarry, Madura district. Peshcush Rs. 2,57,430. For description see vol. I, 56. Places of archæological interest:—Carshaucoolam, Cauleiyaur coil, Cholapooram, Coonnacoody, Coottaunda, Kizhangattore, Manalore, Maudapooram, Ooracoody, Oorvatticottay, Oreiyore, Pashalay, Piraumullay, Shaittore, Shargany, Shivagunga, Tircoolacoody, Tircoottore, Tirpauchatty, Tirpoovanam, Tripatore, Vadoogaanautapooram, Vembangoody, Yamaneshwaram, Yilayangoody. Principal trig. station:—Shembaulavayal. The leading places, &c., in the talook are the following.——*Cauleiyaur coil* (காளையார்க்கோவில் - kálaiyárkkóvil, Tam.). From (kálaiyár, tam. shiva, the bull man + kóvil, tam. temple); temple of shiva as caulay eeshwaran or bull-lord. Sanscrit name (sómanát'hamangala), meaning moon + lord + prosperity. Village; lat. 9° 51'; long. 78° 41'; from Madura E.S.E. 36 miles; from Shivagunga E. 10 miles. Large ancient Shiva temple with inscriptions. Hamlet of Ooroovaudy.——*Cauraicóody* (காரைக்குடி - káraikudi, Tam. káraikudi*). From (kárai, tam. thorny webera, canthium parviflorum, lamk. + kudi, tam. village). Village; pop. 5,541; lat. 9° 52'; long. 78° 50'; from Madura E.S.E. 44 miles; from Shivagunga E. 21 miles. Next in importance to Devacottah as the abode of Nautcottay chetties [q.v.].——*Coonnacoody* (குன்னக்குடி - kunnakkudi,* Tam.). From (kunram, tam. hill + kudi, tam. village). Village, Place of pilgrimage; pop. 2,021; lat. 10° 07'; long. 78° 45'; from Madura E. 42 miles; from Shivagunga N.E. 23 miles. Two miles from the border of Poodoocottah state. Old Shiva temple with inscriptions of the Paundy [q.v.] dynasty [raj].——*Manalore* (மணலூர் - manalur,* Tam.). From (manal, tam. sand + úr, tam. village). Sanscrit name (manipura), meaning gem + town. Village; pop. 1,017; lat. 9° 52'; long. 78° 16'; from Madura E.S.E. 8 miles; from Shivagunga W. 19 miles. The Bramins have transferred here the Manipooram of the Mahabhaurat [q.v.] the Paundyan [q.v.] capital.——*Mauna madura* (மானாமதுரை - mánámathurai, Tam. mánamadura*). From (mán, tam. greatness + á, tam. negative particle + mathurai, tam. town so called); little Madura. But supposed to be a corruption from (vánaramathurai), meaning monkey madura, from tradition that hanooman [q.v.] halted here with his monkey allies on his way to lunka [q.v.]. Village, Additional district moonsif's station; pop. 3,997; lat. 9° 41'; long. 78° 29'; from Madura S.E. 28 miles; from Shivagunga S. 11 miles. Pots [chatty] and bell-metal [cunts] manufactured.——*Piraumullay* (பிரமலை - pirámalai, Tam.). From (pirán, tam. lord, shiva + malai, tam. mountain). Village; pop. 2,175; lat. 10° 15'; long. 78° 29'; from Madura N.E. 30 miles; from Shivagunga N. 27 miles. Old Shiva temple richly sculptured with inscriptions of Paundy [q.v.] and Vijianugger [q.v.] dynasties [raj].——*Shembaulavayal* (செம்பாளைவயல் - shembálaivayal, Tam.). From (shembálai, tam. red paddy so called + vayal, tam. field). Trig. station; lat. 10° 02' 31·69"; long. 78° 57' 49·01"; height 109 feet; from Shivagunga E.N.E. 32 miles; from Tripatore E.S.E. 23 miles.——*Shivagunga*

(சிவகங்கை - shivagangai, Tam.). See below.——*Tircoottore* (திருக்கோட்டூர் - tirukkóttúr, Tam.). From (tiru, tam. holy + kódu, tam. hill-top + úr, tam. village). Village; pop. 2,045; lat. 10° 0′; long. 78° 36′; from Madura E.N.E. 31 miles; from Shivagunga N. 16 miles. Shiva temple with inscription dated A.D. 1679, regarding the Saitoopaties [q.v.] of Ramnaud.——*Tirpoovanam* (திருப்பூவணம் - tiruppúvanam, Tam. tirupuvanam*). From (tiru, tam. sacred + pú, tam. flower + vana, san. grove). Sanscrit name (pushpavana), meaning flower garden. Village; pop. 5,455; lat. 9° 50′; long. 78° 18′; from Madura S.E. 12 miles; from Shivagunga W. 16 miles. Ancient Shiva temple elaborately sculptured with numerous inscriptions and copper-plate grant [shausanam].——*Tripatore* (திருப்பத்தூர் - tiruppattúr, Tam.). See sep. title.——*Veigay* (வைகை - vaigai, Tam.). See sep. title.——*Yamaneshwaram* (இயமனேசுவரம் - iyamanésuvaram, Tam.). From (yamana, san. the god yama + íshvara, san. lord). Village; pop. 4,420; lat. 9° 32′; long. 78° 39′; from Madura S.E. 42 miles; from Shivagunga S.S.E. 21 miles. Ancient Cauly [q.v.] temple with inscription.——*Yilayangoody* (இளையாங்குடி - ilaiyángudi, Tam. ilayángudi*). From (ilaiyán, tam. younger brother + kudi, tam. village). Village; pop. 5,239; lat. 9° 37′; long. 78° 40′; from Madura S.E. 40 miles; from Shivagunga S.S.E. 18 miles. On the bund of the tank stands a Jeina [q.v.] stone figure. Old Shiva temple by Rajendra choleshwaran, with inscriptions of the Chola [q.v.] dynasty [raj].——**(2)** Deputy tahsildarry, Madura district. Pay Rs. 100.——**(3)** Town, Head-quarters of Deputy tahsildar and sub-registrar, District moonsif's station; Madura dist., Shivagunga zemindarry; pop. 8,809; lat. 9° 51′; long. 78° 32′; from Dindigul S.E. 50 miles; from Kodaykarnal E.S.E. 71 miles; from Madras S.S.W. 255 miles; from Madura E. 25 miles; from Rameshwaram W.N.W. 68 miles; from Ramnaud N.N.W. 40 miles. Residence of the zemindar. Ancient Shiva temple with inscriptions and copper-plate shausanam [q.v.].

SHIYALLY (சிய்யாழி - shiyyázhi, *Tam.* shiyáli*). From (shír, tam. beauty + kázhi, tam. town, so called). Tam. also (kázhi), meaning cauly, the deity; also (pugalúr), meaning asylum + town; also (pugali), meaning same; also (tiruppugali), meaning holy + asylum + place; also (shanbai), meaning champah, proper name + place. Sanscrit name (shríkálipura), meaning holy + cauly, the deity + town.——**(1)** Talook, Tanjore district. Tahsildar's pay Rs. 150. Area 171 square miles; pop. 119,804; language Tamul. N. coast of district. Boundaries; N. Coleroon, E. sea, W. Mayavaram talook and Coleroon, S. Mayavaram talook. Open level country. Soil sandy loam. Cloth-weaving, rattan [q.v.] works, and mat [boriyah] making; export of paddy [q.v.] and rice [q.v.]. Irrigation by Ayyavayyanaur, Caloomalaiyaur, Cauveriyaur, Moodavanaur, Poodoomunniyaur, Poravycaul, Rajah vycaul, Tirnagary vycaul. Places of archæological interest:—Atchaulpooram, Cauveryputnam, Condattore, Devicottah, Keelnangoor, Marvattore, Sayauvanam, Shiyally, Tirmeilaudy, Tirnagary, Tozhoothore, Trivengaud, Vailoor, Veitheeshwarancoil. Principal trig. stations:—Cauveryputnam beacon, Taundacoolam beacon, Tirnagary, Trimalvausal. The leading places, &c., in the talook are the following.——*Aneicaura chuttram* (ஆனைக்காரச்சத்திரம் - ánikkáraççattiram, Tam. ánaikárachattram*). From (ánaikkáran, tam. proper name + satra, san. choultry). Sanscrit name (gópálasamudram), meaning cowherd god + ocean; also (hanumantapura), meaning the monkey god + town. Village, Railway station; pop. 2,431; lat. 11° 20′; long. 79° 46′; from Shiyally N.N.W. 7 miles; from Tanjore N.E. 54 miles; from the sea W. 8 miles. Comprises the villages of Gopaulsamoodram and Hanoomantapooram. Bridge over the Coleroon. Noted for rattan [q.v.] works and mats [boriyah]. Small chuttram [q.v.] on northern bank of Coleroon.——*Atchaulpooram* (ஆச்சாள்புரம் - áççálburam, Tam.). From (áççál, tam. párvati, the mother of the world + pura, san. town). Sanscrit name (shivalókatyágapura), meaning shiva's world + abandoning + town. Village; pop. 1,941; acres 1,370; lat. 11° 20′; long. 79° 48′; from Shiyally N.N.W. 6 miles; from Tanjore N.E. 53 miles; from the sea W. 5 miles. Noticeable for its defence in 1749 against the Tanjore army. Old Shiva temple with inscriptions in Tamul [q.v.] and Grantam [q.v.]. During the war between the English and French, implements, ammunition, &c., were preserved in the temple.——*Cauveryputnam* (காவேரிப்பட்டணம் - kávérippattanam, Tam.). See sep. title.——*Codiyampolliem* (கொடியம்பாளையம் - kodiyampálaiyam, Tam.). From (kodiyan, tam. cruel man + pálaiyam, tam. camp). Village, Port; pop. 880; lat. 11° 23′ N.; long. 79° 51′; from Madras S.S.W. 120 miles; from Porto novo S.S.E. 9 miles; from Shiyally N.N.E. 11 miles; from Tanjore N.E. 61 miles. Near the mouth of the Coleroon; the northern most part of Tanjore district. Devicottah is close to it.——*Coleroon* (கொள்ளடம் - kolladam, Tam.). See sep. title.——*Devicottah* (தேவிக்கோட்டை - tivukóttai, Tam.). See sep. title.——*Manigraumam* (மணிக்கிராமம் - manikkirámam, Tam.). From (mani, san. gem + gráma, san. village). Village; pop. 1,412; acres 989; lat. 11° 10′; long. 79° 52′; from Shiyally E.S.E. 8 miles; from Tanjore E.N.E. 52 miles; from the sea W. 3 miles.——*Neydavausal* (நெய்தவாசல் - neydavásal, Tam.). From (neydal, tam. maritime tract + vásal, tam. entrance). Village; pop. 1,113; lat. 10° 10′; long. 79° 53′; from Shiyally E.S.E. 8 miles; from Tanjore E.N.E. 55 miles; from the sea W. 1¼ miles. Salt station.——*Shiyally* (சிய்யாழி - shiyyázhi, Tam.). See below.——*Taundacoolam beacon* (தாண்டக்குளம் - tándakkulam, Tam.). Trig. station; lat. 11° 19′ 9·13″; long. 79° 52′ 34·82″; from Shiyally N.E. 9 miles; from Pazhayapolliem E. 3 miles; from Poothooputnam E. 2 miles; from Vaittangoody N.N.E. 4 miles; from the sea W. ½ mile.——*Tirnagary* (திருநகரி - tirunagari, Tam.). From (tiru, tam. holy + nagarí, san. town). Sanscrit name (bilváranya), meaning bael [q.v.] tree, ægle marmelos, corr. + forest. Village; pop. 1,641; acres 2,150; lat. 11° 14′; long. 79° 51′; from Shiyally E. 4 miles; from Tanjore N.E. 53 miles; from the sea W. 3 miles. Old Vishnoo temple. Trig. station in lat. 11° 13′ 29·95″; long. 79° 50′ 30·26″; from Neppattore N.W. ½ mile; from Shiyally E.S.E. 4 miles; from the sea W. 4 miles.——*Trimalvausal* (திருமுல்லைவாசல் - tirumullaivásal, Tam.). From (tiru, tam. sacred + mullai, tam. wood land + vásal, tam. entrance). Village, Port; pop. 3,643; lat. 11° 14′; long. 79° 53′; from Codiyampolliem S.S.E. 10 miles; from Madras S.S.W. 129 miles; from Shiyally E. 7 miles; from Tanjore N.E. 56 miles; from Tranquebar N. 14 miles. At the mouth of an estuary. Old Shiva temple. Trig. station in lat. 11° 14′ 16·45″; long. 79° 53′ 23·51″; from Shiyally E. 7 miles.——*Trivengaud* (திருவெண்காடு - tiruvengádu, Tam.). From (tiru, tam. sacred + ven, tam. white + kádu, tam. jungle). Sanscrit name (shvétáranya), meaning white forest. Village, Place of pilgrimage; pop. 2,639; acres 3,128; lat. 11° 11′; long. 79° 51′; from Shiyally S.E. 7 miles; from Tanjore E.N.E. 52 miles; from the sea W. 3 miles. Important place of Shiva worship. Festival in February.——*Vadaputty melaputty* (வடபாதிமேற்பாதி - vadabáthimérbáthi, Tam.). From (vada, tam. north + páthi, tam. half + mél, tam. west + páthi, tam. half). Sanscrit name (shríkálipura), meaning holy + cauly, the goddess + town. Village; pop. 4,989; lat. 11° 14′; long. 79° 44′; from Shiyally W. 4 miles; from Tanjore N.E. 48 miles; from the sea W. 11 miles.——*Veitheeshwarancoil* (வைத்தீசுவரன்கோவில் - vaittísuvarangóvil, Tam. vaithísvarankoil*). From (vaidya, san. a physician + íshvara, san. lord + kóvil, tam. temple). Sanscrit name (vaidyanát'hapura), meaning shiva, the lord of physicians + town. Village, Railway station, Place of pilgrimage; pop. 4,155; lat. 11° 12′; long. 79° 45′; height 22 feet; from Shiyally S.W. 4 miles; from Tanjore N.E. 47 miles; from the sea W. 10 miles. Old and large Shiva temple with inscriptions and two copper-plate grants.——**(2)** Town, Head-quarters of talook and District moonsif, Railway station; Tanjore dist., Shiyally tal.; pop. 6,715; acres 1,532; lat. 11° 14′; long. 79° 47′; height 21 feet; from Combaconam N.E. 32 miles; from Madras S.S.W. 131 miles; from Mayavaram N.E. 11 miles; from Munnargoody N.N.E. 43 miles; from Negapatam N.N.W. 32 miles; from Tanjore N.E. 51 miles; from the sea W. 7 miles. Large Shiva temple on a low hill with inscriptions. Mats [boriyah] made here by Lubbays [q.v.] similar to those of Palghaut but much cheaper. German lutheran mission station.

SHLAISHAY (श्लेष - shlésha, *San.*). From (shlish, san. to adhere); double meaning from context. Paronomasia.——*Shlaisha cauvyam* (శ్లేషకావ్యము - shléshakávyamu, Tel.). From (above + kávya, san. poem). A kind of poetry, each stanza of which conveys a double meaning.

SHLOCAM (श्लोक - shlóka, *San.*). From (shlók, san. to compose). A couplet. Also a Sanscrit epic metre, consisting of four verses of eight syllables each or two lines of sixteen syllables each.

SHOE FLOWER (සපත්තුමල - sappattumala, *Singh.*). From use of flowers in blacking shoes. Same as China rose bendy.

SHOL (சொல் - shol, *Tam.*). Word [mozhy]. A saying or proverb. Declaration, promise. The following are from Cooral:—நிறைமொழி மாந்தர் பெருமை நிலத்து மறைமொழி காட்டி விடும்—"the hidden words of the men whose "words are full of effect, will show their greatness to the world."—சொல்லுக சொல்லிற் பயனுடைய சொல்லற்க சொல்லிற் பயனிலாச் சொல்—"speak what is useful, and speak "not useless words."—நாநலம் என்னும் நலனுடைமை அந்நலம் யாநலத் துள்ளதூஉ மன்று—"the possession of that "goodness which is called the goodness of speech is even to "others better than any other goodness."—திறனறிந்து சொல்லுக சொல்லை அறனும் பொருளும் அதனினூஉங் கில்—"understand the qualities of your hearers and then make your "speech; for superior to this there is neither virtue nor wealth."—சொலல்வல்லன் சோர்விலன் அஞ்சா னவனை இகல்வெல்லல் யார்க்கு மரிது—"it is impossible for any one to conquer "him by intrigue who possesses power of speech, and is neither "faulty nor timid."—பலசொல்லக் காமுறுவர் மன்றமா சற்ற சிலசொல்லல் தேற்றா தவர்—"they will desire to utter "many words, who do not know how to speak a few faultless "ones."—உணர்வ துடையார்முற் சொல்லல் வளர்வதன் பாத்தியுள் நீர்சொரிந் தற்று—"lecturing to those who have

"the ability to understand for themselves is like watering a bed "of plants that are growing of themselves."—உளரொளினு மில்லாரோ டொப்பர் களனஞ்சிக் கற்ற செலச்சொல்லா தார்—"those who through fear of the assembly are unable "to set forth their learning in an interesting manner, though "alive, are yet like the dead."—நிலத்திற் கிடந்தமை கால் காட்டுங் காட்டுங் குலத்திற் பிறந்தார்வாய்ச் சொல்—"as the sprout indicates the nature of the soil, so the speech "of the noble indicates that of their birth."

SHOLAH (ಶೋಲೆ - shóle, *Can.*; சோலை - shólai, *Tam.*). A shruberry; as opposed to tope [q.v.] which is a plantation of tall trees. Not to be confounded with solah [q.v.], the soft root of Æschynomene aspera, linn. To plant a sholah is one of the thirty-two kinds of charity [santaunam, shaulay]. In Anglo-indian usage, a wooded ravine; especially on the Neilgherries or in the Wynaud.——**(1)** The sholahs on the Neilgherries are innumerable, and hold up the water supplying that tract. The best known of these to the English are the following, to which the native names are given and the distance from Ootacamund.——*Aramby plantation* (ಅಗ್ಗಾಲುಶೋಲೆ - aggálushóle, Can.; குரங்குச்சோலை - kuranguççólai, Tam.). Can. from (aggala, can. great). Tam. from (kurangu, tam. monkey). 1¾ miles N.W. Same as Monkey sholah.——*Aundy plantation* (ಪೀಚಲುಶೋಲೆ - píchalushóle, Can.; ஆண்டிச்சோலை - ándiççólai, Tam.). Can. from (pichula, can. tamarind tree). Tam. from (ándi, tam. the caste). Four miles W. by S.——*Baikie wood* (ಬೈಕಿಶೋಲೆ - baikishóle, Can.; பெயிக்கிசோலை - peyikkisólai, Tam.). Three miles W. by S.——*Briar sholah* (ಆನೆಕುಂದುಗೋಡುಮಂದುಶೋಲೆ - ánekundugódumandushóle, Can.; செம்மண்ணுக்குழிச்சோலை - shemmannukkuliççólai, Tam). Can. from (áne, can. elephant + kundru, tam. rock + kódu, can. hill + mandu, can. todah village). Tam. from (shem, tam. red + man, tam. earth + kuzhi, tam. pit). Eight miles W. by N.——*Brooklands* (ಪಿಳ್ಳೆತಾಚಿಮಂದುಶೋಲೆ - pillétáchimandushóle, Can.; பிள்ளைத்தாச்சிமந்து - pillaittáççimandu, Tam.). Can. from tamul. Tam. from (pillaittáyççi, tam. woman with child). 3¾ miles N. by W.——*Cully plantation* (ಮಾವಿದಿಮಂದುಶೋಲೆ - mávidimandushóle, Can.; கள்ளிச்சோலை - kalliççólai, Tam.). Can. from (mávi, can. mango + mandu, can. todah village). Tam. from (kalli, tam. milk-hedge). Also Aganaud. 3½ miles W. by N. Same as Katerfelto sholah.——*Druid sholah* (ಕವ್ವೆಗಾಡುಮಂದುಶೋಲೆ - kavvegádumándushóle, Can.; கவ்வெக்காடுமந்துசோலை - kavvekkádumandusólai, Tam.). Can. from (kave, can. two + kádu, can. forest + mandu, can. todah village). Tam. same. 3½ miles W. by S.——*Fair lawns* (ಕವ್ವೆಶೋಲೆತಿರುಯೇರಿಶೋಲೆ - kavveshóletireyérishóle, Can.; கவ்வெசோலை - kavvesólai, Tam.). Can. from (kave, can. two + tiru, tam. holy + yér, can. buffalo). Tam. from (kave, can. two). S.W. 3¼ miles by cart road; but by bridle-path, W.S.W. 2½ miles.——*Governor's sholah* (ಕುಂದಗೋಡುಶೋಲೆ - kundagódushóle, Can.; கவர்னர்சோலை - kavarnarsólai, Tam.). Can. from (kundru, tam. rock + kódu, can. hillock). W. by S. 5 miles.——*Hanging sholah* (ನೇರಗೋಡುಮಂದುಶೋಲೆ - néragódumandushóle, Can.; நேர்க்கோடுமந்து - nérkkódumandu, Tam.) Can. and Tam. from (nér, tam. straight + kódu, can. hillock + mandu, can. todah village). Eight miles N.W.; 3 miles as crow flies.——*Jackal sholah* (ನರಿಶೋಲೆ - narishóle, Can.; நரிசோலை - narisólai, Tam.). Can. and Tam. from (nari, tam. jackal). Can. also (mallishóle), meaning jasmine. 2½ miles W. by S.——*Katerfelto sholah* (ಮಲೆವಿದಿಮಂದುಕೋಡುಶೋಲೆ - malevidimandukódushóle, Can.). Can. from (male, can. hill + vithai, tam. great + mandu, can. todah village + kódu, can. peak). 3½ miles W. by N. Same as Cully plantation.——*Monkey sholah* (ಕೊರಂಗುಶೋಲೆ - korangushóle, Can.; கொரங்குச்சோலை - koranguççólai, Tam.). Vernacular mean the same. 1¾ miles N.W. Same as Aramby plantation.——*Porcupine sholah* (ಮೇಲ್ಕವ್ವೆಶೋಲೆ - mélkavveshóle, Can.; மேல்கவ்வெசோலை - mélgavvesólai, Tam.). Can. and Tam. from (mél, tam. above + kavai, tam. cross-road). Four miles W.S.W.——*Porlock sholah* (ಆನೆಕಾಲುಮಂದುಶೋಲೆ - ánekálumandushóle, Can.; ஆனைக்காலுமந்துசோலை - ánaikkálumandusólai, Tam.). Can. and Tam. from (áne, can. elephant + kálu, can. leg + mandu, can. todah village). 5¼ miles W. by S.——*Rally wood sholah* (ಅಗನಾಡುಮಂದುಶೋಲೆ - aganádumandushóle, Can.; அகநாடுமந்துசோலை - aganádumandusólai, Tam.). Can. and Tam. from (agam, tam. interior + nádu, tam. country + mandu, can. todah village). W. 5¼ miles.——*Rockwood spinney* (ಬೆಟ್ಟುಮಂದುಶೋಲೆ - bettumandushóle, Can.; பெட்டுமந்துசோலை - pettumandusólai, Tam.). Can. and Tam. from (betta, can. hill + mandu, can. todah village). E. 13 miles.——*Rocky cover* (ಕೊಂಬುತೂಕುಮಂದುಶೋಲೆ - kombutúkumandushóle, Can.; கொம்புதூக்கிமந்து - kombuthúkkimandu, Tam.). Can. and Tam. from (kombu, can. branch of tree + túgu, can. to hang up + mandu, can. todah village). E. 10 miles.——*Sheffield plantation* (ಉಳ್ಳನಾಡುಶೋಲೆ - ullanádushóle, Can.; காளப்பன் சோலை - kálappansólai, Tam.). Can. from (ul, tam. interior + nádu, tam. country). Tam. from (kálappa, can. proper name). W. by S. 3½ miles.——*Staircase sholah* (ಗದ್ದೆಗಾಡುಮಂದುಶೋಲೆ - gaddegádumandushóle, Can.; காடிமந்துசோலை - kádimandusólai, Tam.). Can. from (gadde, can. wet land + kádu, can. forest + mandu, can. todah village). Tam. from (kádu, tam. forest + mandu, can. todah village). W. 6 miles.——**(2)** *Sholah pigeon* (ചോലപ്രാവ് - chólaprávu, Mal.). See Capotam.

SHONACAM (சோனகம் - shónagam, *Tam.*). From (yavana, san. ionian). The country of Yavanas [q.v.] or Greeks, but sometimes applied to Bactria and Arabia [jonaca]. One of the fifty-six countries [bhoogolashastram]. As one of the eighteen languages it refers to Hindostany [bhaushay]. See vol. 1 (1).

SHONAY (சோணை - shónai, *Tam.*). From (shóna, san. red). Trinomallee hill.

SHOOBH (शुभ् - shubh, *San.*). To shine.——*Shajnah* (سہجنا - shajná, Hind.). Corruption of (shóbhañjana, san. moringa). Same as Moringa.——*Shobhanam* (शोभन - shóbhana, San.). From (shubh, san. to shine). Auspicious.——*Shobhanaudry* (சோபனாத்திரி - shóbanáttiri, Tam.). From (shóbhana, san. auspicious + adri, san. mountain). Epithet of Veicoontam or Keilausam. Hindoo 2nd or pers. name [peyar].——*Shoobhaungy* (शुभाङ्गी - shubhángí, San.). From (shubha, san. handsome + anga, san. limb). Raty, wife of Manmatan [q.v.].

SHOOCH (शुच - shuch, *San.*). To be grieved or afflicted; to shine.——*Shocam* (शोक - shóka, San.). From (shuch, san. to afflict). Feverishness; one of the effects of Manmatan's arrows [cauma baunam].——*Shooclam* (शुक्ल - shukla, San.). From (shuch, san. to shine). Bright, white.——*Shoocla pacsham* (शुक्लपक्ष - shuklapaksha, San.). Means bright fortnight. The half of a lunar month from new to full [pacsham].——*Shooclaudy* (शुक्लादि - shukládi, San.). From (shukla, san. bright + ádi, san. beginning). Otherwise mookhyam [q.v.]. The S. indian mode of reckoning [maunam] a month by beginning with the day following the conjunction of the sun and moon [arcaindoosangamam]; so that the full moon [powrnimay] falls on the fifteenth day [tity] of the month, and the Amavausyay [q.v.] on the thirtieth [jyotisham, krishnaudy, mausam, tity].——*Shoocran* (शुक्र - shukra, San.). From (shuch, san. to shine). The planet [graham] Venus, ♀. Male, the gooroo [q.v.] of the giants [asooran]. Always seen near sun [sooryan]. Is called a Morning star when visible in east just before sunrise, and Evening star when visible in west just after sunset. Former case is where planet is moving from inferior to superior conjunction [sangamam]. Sidereal period of revolution [bhaganam] is 224d 16h 50m. Inclination [natam] of orbit [cacsham] to ecliptic [craunty mundalam] is 3⅓°. In Sanscrit the word means the regent and the planet also, but the tamuls retaining Shoocran as the gooroo [q.v.] call the planet Velly. Shoocravauram and Velly kizhamay both mean Friday. The astrologers say:—if a person be born under the planet shoocran, he will have the faculty of knowing things past, present, and future; he will have many wives, and a kingly umbrella, the emblem of royalty [chattram], and other kings will worship him. The following are Varauha mihiran's astrological remarks on the movements of shoocran:—"If shoocran should disappear "or reappear in the several veeties [q.v.] beginning from the "northernmost one the condition of the world will respectively "be first very excellent, second excellent, third good, fourth fair, "fifth moderate, sixth tolerable, seventh poor, eighth very poor, "ninth miserable. Shoocran disappears when within 10 "degrees from the sun and reappears beyond that limit; if "shoocran should be visible before sunset there will be fear in "the land; if visible throughout the day, mankind will suffer "from hunger and from disease; if visible at midday in "conjunction with the moon [chundran], the king's army and the "capital city will suffer. If shoocran should pass through the "constellation of kritticay [q.v.], the earth will be so much "inundated with water as to make its surface even; if shoocran "should pass through the constellation of rohiny [q.v.], earth "will assume the same appearance of death and devastation as "if she was going through the ceremony of caupaulicam for the "expiation of the sin of murder; if shoocran should enter the "constellation of mrigashiras [q.v.], juice and crops will suffer; "if he should enter the constellation of ardray [q.v.], the people "of cosalam [q.v.] and of calingam [q.v.] will suffer and there "will be abundance of rain [mazhay]; if shoocran should enter "the constellation of poonarvas [q.v.], the people of ashmacam "and of vidarbham will become lawless; if shoocran should "enter the constellation of pooshyam [q.v.], there will be good "rain, singing and dancing parties will suffer; if shoocran "should enter the constellation of aushlaisham [q.v.], there "will be much suffering from serpents [sarpam]; if shoocran "should pass through the constellation of magham [q.v.], "elephant [q.v.] keepers or ministers will suffer and there will "be abundance of rain; if shoocran should pass through the "consteliation of poorvaphalgoony [poobbam], hillmen and the "people of poolindam will perish and there will be abundance "of rain; if he should pass through the constellation of oottara-

"phalgoony [oottaram], the people of cooroo, of jaungalam "and of paunchaulam will perish, and there will also be rain; "if he should pass through the constellation of hastam [q.v.], "the cowravas and painters will suffer, there will be no rain, "well-diggers [wodda] and birds [pacshy] will suffer; if he "should enter the constellation of chitta [q.v.], there will be "good rain; if he should enter the constellation of swauty "[q.v.], there will be much rain, servants, merchants and "boatmen will become wicked and lawless; if he should enter "the constellation of vishaukham [q.v.], there will be good rain "and tradesmen will suffer; if he should enter the constellation "of anoosham [anooraudhay], rulers will be at strife; if he "should enter the constellation of jyeshtay [q.v.], the chief "rulers will suffer; if he should enter the constellation of "moolam [q.v.], physicians that deal in medicinal plants will "suffer; in each of these three last cases there will be drought "in the land; if shoocran should enter the constellation of "poorvashaudham [q.v.], the creatures of water will suffer; "if he should enter the constellation of oottarashaudham [q.v.], "diseases will increase; if he should enter the constellation of "shravanam [q.v.], diseases of the ear will afflict mankind; if "he should enter the constellation of dhanishtay [q.v.], heretics "will suffer; if shoocran should enter the constellation of shata-"bhishay [q.v.], drunkards and dealers in liquor will suffer; "if he should enter the constellation of poorvabhaudram [q.v.], "gamblers will suffer as well as the cowravas and the paunchaulas, "and there will be rain [mazhay] in the land; if shoocran "should enter the constellation of oottarabhaudram [q.v.], "fruits [pazham] and roots will be injured; if he should enter "the constellation of raivaty [q.v.], travellers will suffer; if he "should enter ashwiny [q.v.], horsekeepers will suffer; if he "should enter bharany [q.v.], hill men [kirautan] and the yavanas "[q.v.] will suffer." Shoocran is said in Hindoo mythology to have possessed the power of raising the dead. He is represented in the arts as a white man seated on a water-lily [indian water-lily].——*Shoodra* (शूद्र - shúdra, San.). From (shuch, san. to be afflicted). The fourth theoretical caste of the Hindoos. Shoodras are said in the Vishnoo pooraunam [q.v.] to have been produced from the feet of Bramha [q.v.]. Their duties are to wait on the three upper castes. They may also engage in trade and mechanical labor. In Southern india it is only Bramins [q.v.] who use the term. See vol. I (32), (37), (61), foot-note. They are here practically all Hindoos who are not bramins [jaunty].——*Sooshindram* (शुचीन्द्र - shuchíndra, San.; ശുചീന്ദ്രം - shuchíndram, Mal.). From (shuchi, san. purified + indra, san. the god); indran who was cursed by Gowtaman [q.v.] for his intimacy with Gowtaman's wife was relieved of his curse at this place. Town, Place of pilgrimage; Travancore state, Pudmanaubhapooram division, Agasteeshwaram tal; pop. 6,535; lat. 8° 9'; long. 77° 31' E.; from Alleppey S.E. 119 miles; from Cottayam S.S.E. 116 miles; from Madras S.S.W. 336 miles; from Nagarcoil S.E. 3 miles; from Paravore S.S.E. 160 miles; from Quilon S.E. 77 miles; from Trivandrum E.S.E. 41 miles; from the sea E. 12 miles. About 8 miles north-west of Cape comorin, and on the main road to Trivandrum. Large Bramin population. Large temple to Bramha [q.v.], Vishnoo [q.v.], and Maheshwaran [q.v.]; built in Carnatic [q.v.] style and profusely decorated with figures of Hindoo pantheon [maunasauram]. Many rocks in the temple with very ancient inscriptions. Inside the temple there is the image of a large bull [nundy] of white color built purely of chunk [q.v.] powder. Next to Pudmanaubhasawmy's temple at Trivandrum, that at Sooshindram is the most largely endowed pagoda [q.v.] in the state. From the top of pagoda [q.v.], the sea is visible.

SHOODDH (शुध् - shudh, *San.*). To cleanse.——*Shodhanam* (शोधन - shódhana, San.). From (shuddh, san. to clear). Literally purity. Reduction, in mathematics [ganitam].——*Shooddha dinam* (शुद्धदिन - shuddhadina, San.). From (shuddha, san. bright + dina, san. day). Birthday. Initial feria of the year [aharganam, samvatsaram].——*Shooddham* (शुद्ध - shuddha, San.). Bright. Same as Shooclam. Shoocla pacsham was originally called Poorva pacsham, former half, or Apooryamauna pacsham, waxing half. The bright lunar fortnight [pacsham]. At this time in the seventh lunar month of Aushwinam [mausam] between 15th September and 16th October, the Dusserah [q.v.] begins [aushwina shooddham].——*Sotha* (سوتها - sothá, Hind.). Among Thugs, the inveigler.

SHOODOO (சுடு - shudu, *Tam.*). To burn.——*Shoodalaiyaudy* (சுடலையாடி - shudalaiyádi, Tam.). From (above + talai, tam. place + ádu, tam. to play). Shiva [q.v.] the dancer on the burning ground [shoodcaud].——*Shoodalay* (சுடலை - shudalai, Tam.). From (above + talai, tam. place). A burning ground [shoodcaud].——*Shoodalay maudan* (சுடலைமாடன் - shudalaimádan, Tam.). From (above + talai, tam. place + mádan, tam. a devil). A goblin. See vol. I (81).——*Shoodcaud* (சுடுகாடு - shudugádu, Tam.). Burning ground. See Caud.——*Shoodcaud siddhan* (சுடுகாட்டுசித்தன் - shudugáttusittan, Tam.). From (shudugádu, tam. burning ground + siddha, san. accomplished); from practising their arts in the burning ground. A tribe of jugglers and fortune-tellers, who carry about human bones to work charms and incantations with. The descendants of a Maha poorsha named Mulla siddhayya, a Jangam [q.v.] of Parvaty mullicarjoonam on the Kistna, are still looked upon as their gooroos [q.v.].——*Shoolay* (சூளை - shúlai, Tam.). From (shudu, tam. to burn). Furnace, kiln [collvye].

SHOOJAH (شجاع - shujá, *Ar.*). From (shaja, ar. to be bold). Intrepid. Part of lacab; as Shoojah ood deen, intrepid in religion [ism].——*Shoojaut* (شجاعت - shujáat, Ar.). Valour. Prefixed to an alam forms a lacab; as Shoojaut ally, valour of ally [ism].

SHOOL (शूल् - shúl, *San.*). To pierce.——*Shoolam* (शूल - shúla, San.). Trident. Also in astrology the supposed position of the trident at any given time, varying with the days of the week [vauram], hence called vaura shoolam; it is considered unlucky to set out on a journey in those days in the direction in which it lies and the reverse. For the direction of the trident in the days of the week see Tisay.——*Shoolapaunyan* (சூலபாணியன் - shúlappániyan, Tam.). From (shúla, san. trident + páni, san. hand). Shiva [q.v.].——*Shooly* (சூலி - shúli, Tam.); having trident. Bhadra cauly [q.v.].

SHOOLLY (சுள்ளி - shulli, *Tam.*). Ebony [q.v.] tree.——*Shoolliteev* (சுள்ளித்தீவு - shullittívu, Tam.). From (above + tívu, tam. island). Islets; Tinnevelly dist., Ottapidauram tal.; lat. 8° 56' to 8° 57'; long. 78° 18' to 78° 19'; from Ottapidauram E. 17 miles; from Tinnevelly E.N.E. 42 miles. A group of islets to the S.S.E. of the entrance of Veippaur river.

SHOOLY (சுழி - shuzhi, *Tam.*). Circle. A curl or circular mark indicating one's fortune. The natives say as follows. One will be brave and enterprising who has a shooly in the right ear turning to the right, but a shooly in the left ear sloping towards the left implies want of intellect and the state of being poor; he will be a man of fortune who has a shooly in the right side of the head; if a person has a shooly in the middle of the head, he will have ordinary wealth [samoodricam, shacoonam]. The circlets of hair on horses [ghorah] and cattle [maud] also are observed carefully.

SHOOMAUR (شمار - shumár, *Hind.*). From (shumurdan, pers. to calculate). More or less. Shoomaury is a census [khana shoomaury].

SHOONDAY (विदारी - vidárí, *San.*; कल्लांट - kallánta, *Conc.*; کالا میوه - kálámewah, *Hind.*; ಕಲ್ಲತ್ತಿ - kallatti, *Can.*; రసగడిమాను - rasagadimánu, *Tel.*; ചുണ്ട - chunta, *Mal.*; சுண்டை - shundai, *Tam.*). Title from tamul. San. from (vidrí, san. to split open); from breaking swellings [cashmere tree, giant potato]. Hind. from (kálá, hind. black + mewá, hind. fruit). Can. from (kallu, can. stone + atti, can. ficus glomerata, miq.). Tel. from (rása, tel. juice + gada, tel. stem + mánu, tel. tree). Mal. from tamul. Tam. from (shundu, tam. small) [shoondely]. San. also (pat'hi), meaning road plant. Can. also (sondegida). Mal. also (malañchunta), meaning wild solanum. Tam. also (malaiççundai), meaning mountain + the plant. Title otherwise Choondakye, Double colored solanum, Pubescent solanum. Botanically Solanum [cooly] verbascifolium, linn., solanaceæ [vricsham, 94]. Alias Solanum adulterinum, bicolor, erianthum, pubescens. Shrubby; leaves ovate-oblong, acuminate, entire, tomentose, surfaces discolored; axils leafless; corymbs subterminal, dichotomous, peduncled; calyx half five-cleft; flowers pale yellow or dirty white; flowering nearly all the year. Small tree with a thick shady head; every part covered with a powdery white tomentum. Fruit, small, round, yellow; used in curries [q.v.]. There is a Tamul proverb:—சுண்டைக்காய் அளவிலே சாப்பிடுகிறது பாதியா வைக்கிறது பாதியா?—"of food about the size of a choondakye, "am I to eat half and leave half?"——*Elephant shoonday* (चान्द्री - chándrí, San.; गुल्ला - gullá, Conc.; ಬಿಳೆಗುಳ್ಳ - bilegulla, Can.; ಗುಳ್ಳಬದನೆ - gullabadane, Too.; ములక - mulaka, Tel.; വെള്ളോട്ടുവഴുതിന - vellóttuvazhutina, Mal.; ஆனைச்சுண்டை - ánniççundai, Tam.). Title from size of fruit. San. from (chandra, san. moon), from fruits and flowers. Can. from (bili, can. white + gulla, can. solanum). Too. means solanum + brinjaul. Tel. from (mullu, tel. thorn + káya, tel. fruit), from thorns on fruit sheath. Mal. from (vella, mal. white + ótu, mal. rind + vazhutina, mal. brinjaul, solanum melongena, linn.). Tam. from (ánai, tam. elephant + shundai, tam. solanum verbascifolium, linn.). San. also (chandrika), meaning moonlight, from white flowers [haleem, snake root]; (chandra), meaning moon [snake root]; (garbhadá), meaning impregnating; (gardabhí), meaning roaring; (priyamkarí), meaning doing good; (ráma), meaning delightful; (kshétradúti), meaning land spy; (shvétakantakári), meaning white + the plant, solanum xanthocarpum, schrad.; (lakshmaná), meaning marked; (mahaushadhí), meaning effective medicine [lussoon]; (nákulí), meaning pertaining to mongoose [galangal]; (nisnéhapushpá), meaning not oily + flower; (shvétakanta), meaning white thorn. Can. also (gulla). Mal. also (ánaççunta), meaning large + solanum. Title otherwise Hairy nightshade, Wild brinjaul. Botanically Solanum [cooly] ferox, linn., solanaceæ [vricsham, 94]. Alias Solanum hirsutum, lasiocarpum, mammosum, quadriloculare. Perennial, herbaceous, woody at the base; leaves paired, cordate, sinuately angled,

woolly tomentose and prickly on both sides; peduncles intrafoliaceous and like the short pedicels calyx and berries, hairy; flowering in august and september. Used medicinally in fever and rheumatism. Gives a species of wild brinjaul eaten on malabar coast. For indicum see Indian nightshade.——*Hill shoonday* (కొండఉస్తె - kondauste, Tel.; மலைச்சுண்டை - malaiççundai, Tam.). Tel. from (konda, tel. hill + uste, tel. solanum pubescens, willd.). Tam. from (malai, tam. mountain + shundai, tam. solanum verbascifolium, linn.). Botanically Solanum [cooly] torvum, swz., solanaceæ [vricsham, 94]. Shrub 8–12 feet high, or flowering as a herb; leaves 6 by 4 inches, lobes shallow rarely deep, softly hairy above, never prickly; petiole 1 inch, peduncles usually extra-axillary, short; racemes many-flowered, often dichotomous; pedicels often ¼–½ inch; calyx-lobes in flower ⅛ inch, lanceolate, sparingly hairy; corolla 1–1¼ inches diameter; lobes ⅓ inch, triangular, pubescent without; ovary and style glabrous; berry yellow; calyx lobes patent, not half as long as the berry; seeds scarcely $\frac{1}{16}$ inch diameter, smooth. Used as vegetable.——*Prickly shoonday* (अलर्क - alarka, San.; वेलवांगी - vélavángí, Mahr.; ಕಾಕಮುಂಚಿ - kákamunchi, Can.; ముండ్లముస్తె - mundlamuste, Tel.; തൂതവലം - tútavalam, Mal.; වැල්තිබ්බටු - valtibbatu, Singh.; தூதுவளை - túthuvalai, Tam.). Title from state of stem. San. from (al, san. to adorn + arka, san. calotropis gigantea, r. br.) [yercum]. Mahr. from (véla, mahr. creeper + vángí, mahr. solanum melongena, linn.). Can. corruption of (kákamáchi, san. solanum nigrum); from resemblance of fruit to the red variety. Tel. from (mullu, tel. thorn + uste, tel. solanum pubescens, willd.). Mal. from tamul. Singh. from (val, singh. creeper + tibbatu, singh. solanum indicum, linn.). Tam. from (túthu, tam. small stone + ul, tam. having), from stone-like berry within the lobe. San. also (achúdá), meaning not crested. Can. also (ambasonde), meaning arrow + solanum verbascifolium, linn.; (mullumusta). Tel. also (uste); (tellauste), meaning white + solanum pubescens, willd.; (uççinta). Tam. also (kúthalam), meaning prickly leaf; (túdulai), meaning stone + having; from stone-like berry within the lobe of fruit. Title otherwise Three-lobed nightshade. Botanically Solanum [cooly] trilobatum, linn., solanaceæ [vricsham, 94]. Alias Solanum acetosæfolium. Climbing shrub; stem armed with numerous very sharp recurved prickles; leaves remote, panduriformly three to five lobed, smooth on both sides; petioles and veins armed; peduncles prickly, leaf-opposed, solitary, few-flowered, terminal, and axillary; corolla deeply five-cleft, bluish purple; berries small, globose, red, drooping. Root, leaves are bitter, prescribed in consumptive cases in electuary, decoction, or powder; berries and flowers are given internally in decoction for coughs. Leaves [keeray] eaten, having been previously sprinkled with salt and water.——*Rameshwaram shoonday* (गण्डीर - gandíra, San.; రామేశ్వరఉస్తె - rámeshvarauste, Tel.; சுண்டை - shundai, Tam.). San. from (ganda, san. boil + ír, san. to go); useful in boils. Tam. from (shundu, tam. small). San. also (shvétamahatí), (shvétasimhí), (shvétavártákí), (shvétabrihatí), all meaning white + solanum melongena, linn.; (shvétap'halá), meaning white fruit. Tel. also (kásiuste), meaning benares + the plant; (uste). Title otherwise Oostey. Botanically Solanum [cooly] pubescens, willd., solanaceæ [vricsham, 94]. Shrubby, unarmed, clothed all over with short, somewhat viscid tomentose pubescence; leaves ovate, acute, entire or sub-repand; racemes corymbose, lateral; the lower anther larger; flowers blue, berries red. Stimulant in medicine.

SHOONDELY (बालमूषिक - bálamúshika, *San.*; تکس - tikus, *Malay*; ಸನ್ನಿಲಿ - sannili, *Can.*; చిట్టెలుక - chitteluka, *Tel.*; ചുണ്ടെലി - chundeli, *Mal.*; ගිරිකා - giriká, *Singh.*; சுண்டெலி - shundeli, *Tam.*). San. from (bála, san. small + múshika, san. rat). Can. from (sanna, can. small + ili, can. rat). Tel. from (chiru, tel. small + eluka, tel. rat). Singh. from (giriká, san. swallower). Tam. from (shundu, tam. smallness + eli, tam. rat) [shoonday]. Title otherwise Mouse. Mus [moosham] urbanus, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. Under the head of ordinary mice, as distinguished from Field mice with short tails [varappoo shoondely], Tree mice with long tails [mara shoondely], and Spiny mice whose fur is mixed with spines [moolloo shoondely], this is the chief representative. Called the Common indian mouse. It differs conspicuously from the Common english mouse in its smaller ears and much longer tail. It has also larger eyes, and smaller feet. The fur too is of very different texture. Above dusky reddish brown, below paler and more or less rufescent; feet paler. Another house-mouse is the Large-footed mouse, Mus crassipes of naturalists. The feet particularly large, and like the tail well furnished with coarse short setæ. Indian species not here found are:—bactrianus, darjeelingensis, erythronotus, homourus, pachycercus, sublimis, tytleri.——*Mara shoondely* (तरुबालमूषिक - tarubálamúshika, San.; شجر موش - shajarmúsh, Pers.; جھاڑ کا چوہا - jhárkáchúhá, Hind.; ಮರದಯಿಲಿ - maradaili, Can.; మానెలుక - máneluka, Tel.; മരച്ചുണ്ടെലി - maraççundeli, Mal.; மரச்சுண்டெலி - maraççundeli, Tam.). San. from (taru, san. tree + bálamúshika, san. small rat). Pers. from (shajar, pers. tree + músh, pers. mouse). Hind. from (jhár, hind. tree + chúhá, hind. rat). Can. from (mara, can. tree + ili, can. rat). Tel. from (mánu, tel. tree + eluka, tel. rat). Tam. from (maram, tam. tree + shundeli, tam. mouse). Title otherwise Tree mouse, Mus [moosham] oleraceus, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. This belongs to a group of some small arboreal, long tailed mice, diminutives of the Tree rat [maravely]. Above light rufous or pale chestnut; lips, feet, and lower parts, pure white; tail almost nude, very long; muzzle slightly rounded; head of moderate length; ears ovate. Particularly prevalent in the south of India, where it frequents trees, and very commonly palm [taur] trees. It occasionally places its nest in the thatch of houses, on beams, &c. Akin is the Neilgherry tree mouse; Mus nilagiricus of naturalists; above deep but bright chestnut brown, beneath bright fawn yellow, with a distinct line of demarcation between the two colors; head rather elongated; ears long, oval; tail somewhat hairy. Indian species not here found are:—Mus badius or bay tree mouse, Mus gliroides or cherrapoonjee tree mouse, Mus peguensis or pegu tree mouse.——*Moolloo shoondely* (शल्यबालमूषिक - shalyabálamúshika, San.; خار موش - khármúsh, Pers.; ಕಲ್ಲಿಲಿ - kallili, Can.; గిజిలిగాడు - gijeligádu, Tel.; കല്ലെലി - kalleli, Mal.; முள்ளுச்சுண்டெலி - mulluççundeli, Tam.). San. from (shalya, san. thorn + bálamúshika, san. small rat). Pers. from (khár, pers. thorn + músh, hind. mouse). Can. from (kallu, can. stone + ili, can. rat). Mal. from (kal, mal. stone + eli, mal. rat). Tam. from (mullu, tam. spine + shundeli, tam. mouse). Tel. also (leggade); (kalleluka), meaning stone + rat. Title otherwise Spiny mouse.—"*a*," Leggada platythrix, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. Generic from teloogoo. This is the chief representative of a class of field-mice which have fine fur mixed with numerous spines. Somewhat flattened. It is only found in S. India. Above light sandy brown or light brown mixed with fawn; beneath pure white, the white separated from the brown by a well-defined pale fawn line. The flattened spines are transparent on the back, beneath smaller, and form with the fur a thick close covering. The head is long, the muzzle pointed, the ears rather large oblong, rounded. Lives entirely in the red gravelly soil in a burrow of moderate depth, generally on the side of a bank. When the animal is inside the entrance is closed with small pebbles. Inside is a bed of small pebbles on which it sits. The Yanaudies [q.v.] state that one variety uses small sticks to sit on instead of stones, and give it a distinct appellation.—"*b*" Nearly affined is the Dusky spiny mouse, Leggada spinulosa of naturalists. Of a dark dusky color above, with fulvous tips to the softer fur; below, and all the feet dull whitish, upper rodential tusks orange, the lower white. Whiskers long and fine, the posterior and longer of these black for the basal half or more, the rest white.—"*c*" Also the Small spiny mouse, Leggada lepida of naturalists. Above pale sandy brown, pure white below, separated from the upper color by an exact line. The spines are small, fine, transparent, and of a dusky tinge tipt with fawn. The head very long, and muzzle pointed. Ear large ovate, naked. Tail naked. Limbs rather long, fine. This mouse is preyed on by the common Indian roller or Indian jay [q.v.], and is used as a bait to catch that bird with bird-lime.—"*d*" Indian species not here found are:—Hapalomys longicaudatus, Leggada jerdoni or himalayan spiny mouse, Mus chevrieri, Mus confucianus, Mus flavipectus or yellow-breasted rat, Mus griseipectus or grey-breasted rat, Mus onang-thomæ or kiangsi rat, Mus pygmæus or pigmy mouse.——*Varappoo shoondely* (केदारबालमूषिक - kédárabálamúshika, San.; موش دشتی - múshidashtí, Pers.; വരമ്പുച്ചുണ്ടെലി - varampuççundeli, Mal.; வரப்புச்சுண்டெலி - varappuççundeli, Tam.). San. from (kédára, san. field + bálamúshika, san. mouse). Pers. from (músh, pers. mouse + dasht, pers. forest). Tam. from (varappu, tam. field-ridge + shundeli, tam. mouse). Pers. also (múshisahrí), meaning desert mouse. Title otherwise Field mouse. Mus [moosham] cervicolor, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. Ordinary field-mice have the tail shorter than head and body; fur not spinous. The above is the chief representative. Above dull fawn or yellowish gray; below sordid white; lining of ears and extremities pale; tail short; ears large, hairy. Another is the Earthy field mouse, Mus terricolor of naturalists. Above variable according to the soil, light fawn brown, more or less rufescent; under parts white, abruptly separately from the hue of the upper parts. Indian species not here found are:—Beaveni or beaven's mouse, Cunicularis or little rabbit mouse, Erythrotis or cherrapoonjee red-eared mouse, Fulvidiventris, Kakhyenensis or kakhyen mouse, Nitidulus or shiny little house mouse of Pegu, Peguensis or pegu field mouse, Viculorum or kakhyen house mouse.

SHOONDY (लज्जालु - lajjálu, *San.*; लाजरी - lájarí, *Mahr.*; لجالو - lajálu, *Hind.*; شرمندی - sharmindí, *Dec.*; ಮುದುಗುದಾವರೆ - mudugudávare, *Can.*; నాచికేడై - náchikedai, *Too.*; అత్తపత్తి - attapatti, *Tel.*; തീണ്ടാർമണി - tíntármani, *Mal.*; මහනිදිකුඹා - mahanidikumba, *Singh.*; சுண்டி - shundi, *Tam.*). San. from sanskrit. Dec. (lajja, san. shyness). Mahr. and Hind. from (sharm, pers. shame + possessive particle); from sensitiveness of leaf. Can. from (mudugu, can. to sink + dávare, can. the plant, lotus). Too. from (náchike, too. shame + dai, too. tree). Tel. from (atta, tel. mother-in-law + patti, tel. cotton).

Mal. from (tíndu, mal. to touch + mázhku, mal. to languish); fading at the touch. Singh. from (maha, singh. large + nidikumba, singh. the plant, mimosa pudica, linn.). Tam. means that which shrinks. San. also (añjalikáriká), meaning joining the hands in prayer, in allusion to the folding leaves when fading; (varáhakrántá), meaning attracting hogs; (sharabha), meaning injuring [sharbham]; (namaskári), meaning prostrating; (lajjávatí), meaning shy plant; (samangá), meaning having contracted limbs [munjeet]; (khadirá), meaning having small leaves like acacia catechu, willd. [biswool, catechu, sundra]. Mahr. also (lájálú), meaning bashful. Hind. also (lajwantí), meaning shameful; (siyálkántá), meaning sensitive thorn. Can. also (náchike), meaning shame; (mutlamurike), meaning touch + shrinking; (muttidaremuniva), meaning if touched + be angry. Tel. also (nidrakanti), meaning sleep + eye [water shoondy]; (peddanidrakanti), meaning large + the plant; (munugutámara), meaning sinking + the plant, nelumbium speciosum, willd.; (muttavapulagamu), meaning great grandmother + pudding [common balah, lance-leaved balah, peramootty, shrubby balah]; (bódatsandra), meaning bald + acacia sundra, dec.; (undra); (ventra) Mal. also (tottáváti), meaning fading at the touch; (tíndármázhi), meaning languishing at the touch. Singh. also (nidikumba). Tam. also (tottáççurungi), meaning to touch + to shrink; (karuppuyindiriyakkodi), meaning black + sense + creeper; (tottálvádi), meaning fading when touched; (indiriyakkodi), meaning sensitive creeper; (indu). Title otherwise Sensitive plant. Botanically the Mimosa genus, leguminosæ [vricsham, 48]. Chiefly tropical; mostly herbs, undershrubs or climbers; scarcely any grow into trees; many are prickly; leaves are twice pinnate, usually with a large number of very small leaflets, but in a few species the leaflets are much larger and reduced to eight in the whole leaf; in many species the leaves are sensitive, that is to say closing downwards when touched and only recovering their position after a time greater or less according to climate, season, weather or vigour of individual; some of the species ripen seed, others may be increased by cuttings from points of young shoots. The species best known to the natives are:—hamata, pudica, rubicaulis. Pudica is a native of brazil long naturalized here; decoction of root is useful in gravellish complaints; leaves and root in piles and fistula; the tapering thin roots contain ten per cent. of tannin of such a nature as to form a good black-ink [mashy] with salts of iron [auhan].——*Water shoondy* (पाणीलाजरी - pánílájarí, Mahr.; నిద్రకంటి - nidrakanti, Tel.; *நீர்ச்சுண்டி* - nírççundi, Tam.). Title from habitat. Mahr. from (pání, mahr. water + lájarí, mahr. shy plant, mimosa genus). Tel. from (nidra, tel. sleep + kannu, tel. eye). Tam. from (nír, tam. water + shundi, tam. mimosa genus); water mimosa. Tel. also (nírutalavapu), meaning water touching; (chinnanidrakanti), small + the plant. Tam. also (shundakkírai), meaning mimosa + vegetable. Title otherwise Floating desmanthus, Floating sensitive plant, Shoonda keeray. Botanically the Neptunia genus, leguminosæ [vricsham, 48]. Herbs without prickles floating in water; leaves bipinnate; flowers in globular heads; pods broad, flat, short, edible. The species best known to the natives are:—oleracea, triquetra.

SHOONYAM (शून्य - shúnya, *San.*). From (shvi, san. to swell), swollen, hollow. Empty. Also cypher in arithmetic.——*Shoonyaurgham* (शून्यार्घ - shúnyárgha, San.). From (above + argha, san. price). Scarcity; or a time unfavorable for agricultural [vellaumay] undertakings, predicted in the calendar [punchaungam, vriddhyaurgham].

SHOORAN (शूर - shúra, *San.*). From (shúr, san. to hurt) [sharam]. Hero; demon so called.——*Shooramungalam* (சூரமங்கலம் - shúramangalam, Tam.). From (shúran, tam. proper name + mangala, san. prosperity). Village; Salem dist., Salem tal.; pop. 1,716; acres 391; lat. 11° 40′; long. 78° 09′; height 923 feet; from Salem W.N.W. 4 miles. Suburb of Salem. Railway station.——*Shoorsamhaura moorty* (शूरसंहारमूर्ति - shúrasamháramúrti, San.). From (above + samhára, san. killing + múrti, san. embodiment). Soobramanyan [q.v.], the destroyer of shoora pudmausooran [samhauran].——*Shoory* (சூரி - shúri, Tam.). Heroine; Mauriyamman [q.v.].——*Showrya lutchmy* (शौर्यलक्ष्मी - shauryalakshmí, San.). From (above + lakshmí, the goddess). The goddess of heroism [ashta lutchmy].——*Showryam* (शौर्य - shaurya, San.). From (shúra, san. hero). Valour.——*Sooran* (سورن - súran, Hind.). Hurting, from caustic root. Plant name common to:—Amorphophallus campanulatus; Colocasia esculenta; Tacca pinnatifida. See gloss. paragraphs.

SHOOROOL (சுருள் - shurul, *Tam.*). Curl.——*Shooroolíyaur* (சுருளியாறு - shuruliyáru, Tam. suruliyár *). From (shurulai, tam. curl + áru, tam. river). River; Madura dist., Periyacoolam tal. Rises partly in the high mountains near Varshanaud and partly in the Travancore hills. After a meandering course of about 30 miles down the valley it meets the Veigay, 6 miles north of Guntamanaickanore, just after receiving the Teniyaur.

SHOORPAM (शूर्प - shúrpa, *San*). From (shúrp, san. to measure); a kind of wicker work receptacle which when agitated serves as a fan for winnowing corn. Winnowing basket. Also a winnowing fan.——*Shoorpanakhay* (शूर्पणखा - shúrpanakhá, San.). From (above + nakha, san. nail); having nails like winnowing fans. Sister of Ravanan [q.v.]. Now applied to any monstrous or hideous female.

SHORAH (شعرا - shorá, *Pers.*). Pl. of (sháir, pers. poet). Part of lacab; as Malik oosh shorah, king of poets, laureate.

SHORAH (यवक्षार - yavakshára, *San.*; षोरमीठ - shóramít'ha, *Mahr.*; ابقر - abkar, *Ar.*; شورا - shorá, *Pers.*, *Hind.* and *Dec.*; ساندوا - sándawa, *Malay*; ಪೆಟ್ಲುಪ್ಪು - petluppu, *Can.*; సూరాకారము - surákáramu, *Tel.*; വെടിയുപ്പ് - vetiyuppu, *Mal.*; වෙඩිලුණු - vedilunu, *Singh.*; பொட்டிலுப்பு - pottiluppu, *Tam.*). Title from persian. San. from (yava, san. barley + kshára, san. alkali). Mahr. from hindostany. Pers. from (shor, pers. saline substance). Can. from (pettalu, can. to burst + uppu, can. salt). Tel. from (shorá, hind. nitre + kshára, san. alkali). Mal. from (veti, mal. explosion + uppu, mal. salt). Singh. means explosive salt. Tam. from (pottil, tam. pistol + uppu, tam. salt). San. also (suvarchilavana), meaning good + lustre + salt, from use in fireworks. Can. also (sóruppu), meaning nitre + salt. Tel. also (petluppu), meaning to explode + salt. Tam. also (vediyuppu), meaning to explode + salt; (púmikkúrmai), meaning earth + sharpness. Saltpetre. Also called Nitrate of potash. Potassæ nitras of chemists. A salt composed of nitric acid [shorey ka tezaub] and potash [jharka namak]. Procured impure in great quantities from the earth containing it [sooracaurapoo sowdoo]. Production greatest during period when hot winds blow. Obtained artificially, in some parts, from earth of old walls, scrapings of roads, cow-pens, and other places where cattle [maud] have urinated. Crude salt-petre is made in factories on high mounds of earth. A factory includes several steeping pits on a high level, a catchment pit below, a masonry conduit from the former falling into the latter at a sharp angle, one or more evaporating pans, and the necessary implements. The steeping pits are round pits, 1 or 2 feet deep. The catchment pit is a deep pit built of masonry. The evaporating pans are rectangular shallow pans paved ½ or 1 inch thick with choonam [q.v.]. Nitrous earth is collected and taken on carts to the factory. This is done only in the hot and rainless months. The earth stored at the factory is eventually thrown into the steeping pits and there stamped down. Each pit holds some half a cart load. Then water is poured over. Between the steeping pits and the conduit, palmyra [q.v.] web or other fibrous substance is placed, and sand or husk is plastered over it. The fluid in the pits must then percolate to enter the conduit. If steeping begins one morning the percolation is finished the next. The liquid is then baled out, and poured into the evaporating pans to the depth of two or three inches. Evaporation is complete in three days, and the pan is then incrusted with saltpetre, in some parts in masses [paunay], and in some parts in crystals [palingoo]. The incrusted nitre is scraped with an iron instrument, removed in pots and stored in heaps. It is then sold to merchants. Crude nitre sells at about 8 rupees per pootty [q.v.] weighing 20 maunds [q.v.]. Crude nitre is subsequently purified by dissolving it in boiling water, removing the scum after the liquid has been allowed to settle, straining the solution through calico [q.v.] and setting aside to crystallise. Pure specimens should be in white crystalline masses or fragments, colorless, and of a peculiar, cool, saline taste. Medicinally refrigerant, diuretic and diaphoretic when administered in solution freely diluted; irritant if given in the solid form or in concentrated solution; and poisonous in very large doses. Externally applied in solution it produces great cold and acts like ice. Employed by natives in the preparation of gunpowder from ancient times. Also for cooling water and wine in hot season. Also in conjunction with alum [padicauram] and salt [ooppoo], used by goldsmiths in the process of brightening gold ornaments. Used in dyeing [shauyam].

SHOZHAM (சோழம் - shózham, *Tam.*). Same as Cholam.——*Sholinghur* * (சோளங்கிபுரம் - shólangippuram, Tam.). From (chóla, san. chola king + linga, san. idol + pura, san. town). Tam. also (tirukkadigai), meaning holy + vedam; also (kadigai), meaning vedam. Sanscrit name (chólalingapura), means the same; also (ghatikáchala), meaning soapstone + mountain. Village, Mountain, Place of pilgrimage; North arcot dist., Wallajahpett tal.; pop. 6,416; acres 2,411; lat. 13° 07′; long. 79° 28′; from Chittore E.S.E. 24 miles; from Wallajahpett N.N.E. 14 miles. An extensive town. A Chola rajah here found a natural lingam [q.v.] and built a temple over it called Choleshwaram temple. It was here that Athonday [q.v.] was encouraged by a vision to resume his contest with the Coorumbar [q.v.], by whom he had been at first defeated. In the neighbourhood, in 1781, was fought the battle between Coote and Hyder in which the latter was defeated. Besides that of Choleshwaran there is another temple, to Bhactavatsalan, built by a Vijianugger king. A fine mantapam [q.v.], resembling those of Vellore and Virinjipooram, has been begun; the pillars lie half buried in the soil. Outside the town is temple of Narsimhasawmy upon summit of loftiest hill. A flight of stone steps, built by Royajee leads to the summit. Pilgrims visiting Tripatty and Conjeeveram generally visit this temple, remaining in Sholinghur three or four days. There are fourteen holy peaks in vicinity, but this

is the holiest. At foot of Royajee's ascent is a charitable institution, founded by him and called Anna daunam. Only Bramins are fed; the worshippers in the temple, who stay sometimes for years, receive a daily dole. On Sundays in Caurtigay [mausam] or november, 200 Bramins resident in town are fed. Close to the choultry [q.v.] is a well dug at Royajee's expense as deep as the temple is high. Many teertams [q.v.]. Chief is Bramha teertam, in which people bathe on Thursdays. Festival about May.——*Shozhagam* (சோழகம் - shózhagam, Tam.); means south. South wind. Chola country. Sect of Bramins. Cf. Choliya for Mahomedans.

SHRADDHAY (श्रद्धा - shraddhá, *San.*; சிரத்தை - shirattai, *Tam.*). From (shrat, san. faith). Faith, belief, piety [bhacty]; implicit belief in the words of a gooroo [q.v.] or priest, much inculcated in modern Vedauntam [q.v.] books.——*Sharadan* (சரதன் - sharathan, Tam.). From (sharatham, tam. faithfulness from shraddha, san. faith). Pariah proper name [peyar].——*Shattaimoony* (சட்டைமுனி - shattaimuni, Tam.). From (shattai, tam. esteem + muni, san. sage). Very ancient Sheiva ascetic, one of Agastyan's converts [agastyan]. Author of Nyaunanoor a work on theology, Calpa noor a medical work and Vauta nigantoo a treatise on alchemy [rasauyanam].——*Shrauddham* (श्राद्ध - shráddha, San.). Obsequies paid to the manes [pitry] of deceased ancestors. Hindoos are enjoined to offer a ball of rice or cake, pindam [q.v.], to the ghosts of their ancestors, as far back as the third generation. This ceremony is performed on the day of the new moon [amavausyay]. The first shrauddham is performed the day after the ten days of mourning are over. It is usual to repeat it once a month for the first year and after that once a year. The offering of water, tarpanam [q.v.], is in like manner to be performed daily to appease the dead. These ceremonies were known to the Greeks and Romans. Grihya sootram [q.v.] mentions four kinds of shrauddham :—Paurvana or monthly, to ancestors for three generations on the day of conjunction [arcaindoo sangamam] or new moon [amavausyay]; Caumya or voluntary, performed for object of desire; Aubhyoodayica, performed as thank-offerings on occasion of family rejoicing as at samscaurams [q.v.]; Yecoddishtam or special, having reference to one person recently deceased and not to ancestors generally. These are sometimes classified as :—Nitya or perpetual, daily offerings to ancestors in general; Naimittica or occasional; Caumya or voluntary; Vriddhy, performed on occasions of rejoicing; Sapindadauna, offerings to all individual and general ancestors; Paurvana, offerings to manes on new moon [amavausyay] and full moon [powrnimay]; Goshty, for the advantage of a number of learned persons; Shooddhy, for the purification of one from defilement; Carmaunga, forming part of initiatory ceremonies [samscauram]; Daivica, for gods; Yautray, held by a person going on a journey; Pooshty, to promote health and wealth. Auma shrauddham or raw shrauddham is performed by shoodras where instead of cooked meals raw articles are given. Shrauddha devan is yaman [q.v.], the lord of pitry locam [q.v.] or spirit world.

SHRAM (श्रम् - shram, *San.*). To be wearied, mortify.——*Shamanan* (சமணன் - shamanan, Tam.). From (shramana, san. jaina devotee). Same as Shramanan [carnautaca rajakkal].——*Shramam* (श्रम - shrama, San.). Labor, austerity.——*Shramanan* (श्रमण - shramana, San.; சமணன் - shamanan, pers. sing.; சமணர் - shamanar, pers. pl., Tam.). From (shram, san. to mortify). The Jeina [q.v.] sect. Since the word Σαρμᾶναι the form used by Clemens of Alexandria, corresponds exactly with the Sanscrit, it is to be surmised that the forms Γαρμᾶναι and Γερμᾶναι, which are found in all the MSS. of Strabo, are incorrect, Γ having been wrongly written for Σ. See vol. I (63).——*Shravanabelgola* (ಶ್ರವಣಬೆಳ್ಗೊಳ - shravanabelagola, Can.; shravanbelgolabetta, Mys. Gov.). From (shramana, san. jaina + belgola, can. white tank); from a splendid tank built by Jeinas. Village, Hill, Place of pilgrimage, Hassan district, Mysore, between two rocky hills in Chenroyputna talook, 8 miles south-east of the cusbah [q.v.]. Chief seat of the Jeina [q.v.] sect.

SHRAVANAM (श्रवण - shravana, *San.*). From (shru, san. to hear). Hearing; that which is heard; Vedam [q.v.]. Twenty-second hindoo lunar mansion [nacshatram].——*Shrauvacan* (श्रावक - shrávaka, San.). From (shru, san. to hear); disciple. Jeinas [q.v.] who engage in secular occupations, as opposed to Yaties [q.v.] or monks.——*Shrauvanam* (श्रावण - shrávana, San.). Belonging to shravanam, the twenty-second asterism. Fifth lunar month. Lunar [chaundramaunam] festival [pundigay, 3c], subject to intercalation [adhicam]. See Oopaucarmam.——*Shrauvana powrnimay* (శ్రావణపౌర్ణమి - shrávanapaurnami, Tel.). Means fifth lunar month + full moon day. Same as Auvany avittam.——*Shrooty* (श्रुति - shruti, San.). From (shru, san. to hear). Revelation, as opposed to Smrity [q.v.] or tradition. The three divisions of the Vedams [q.v.], or Muntram [q.v.], Bramhanam [q.v.], and Oopanishad [q.v.], all come under the head of shrooty. It consists more generally of knowledge heard by Rishies [q.v.], and by them orally transmitted; or if committed to writing, then written down exactly as heard without any intervention of human authorship.——*Shrotriem* (श्रोत्रिय - shrótriya, San.). For learning and teaching shrooty. Lands, or a village, held at a favorable rate. Properly an assignment of land or revenue to a Bramin learned in the vedams [q.v.], but latterly applied generally to similar assignments to native servants of Government as a reward for past services [inam]. See vol. I, 112.——*Shrowtam* (श्रौत - shrauta, San.). Pertaining to Shrooty. Sacrificial rules.——*Soonauvany* (سناونی - sunáuní, Hind.). From (sunáná, hind. to cause to hear). Reading out of petitions [arzee], &c.

SHREE (श्री - shrí, *San.*). From (shrí, san. to mature). Sometimes wrongly written Stree [q.v.]; cf. shrotriem appearing as stotriem. Holiness, prosperity. Also personification of such in Lutchmy [q.v.], wife of Vishnoo [q.v.], born like the grecian Aphrodite from the sea [samoodram]. Every city has its own tutelar Shree or prosperity, which in former times was represented by an image with a temple of its own. The word is used also as an abstract prefix of reverence to the names of deities, holy places, sacred books, spiritual teachers, &c. Cf. Tir, which is probably only a dravidian corruption of Shree. See vol. I (74). Shree is also a common plant first term in the sense of holy, beautiful, or excellent. Ex., where transl. is of second term :—Ægle marmelos (shríp'hala), fruit; Corypha umbraculifera (shrítála), borassus flabelliformis; Ficus religiosa (shrívriksha), tree; Heliotropium indicum (shríhastiní), elephant; Pinus longifolia (shrívása), abode; Premna integrifolia (shríparna), leaf; Santalum album (shrígandha), fragrance. See gloss. paragraphs.——*Seringapatam* (سرنگ پٹن - sirangpatan, *Hind.*; ಶ್ರೀರಂಗಪಟ್ಟ - shrírangapatna, *Can.*; seringapatam, Mys. Gov.). From (shrí, san. holy + ranga, san. vishnu + pattana, san. city). Town in 12° 26′ N. lat., 76° 44′ E. long., at the western or upper end of an island in the Cauvery, about 3 miles in length from west to east and 1 in breadth. The head-quarters of the Seringapatam talook, Mysore district, Mysore; stands on the Bangalore-Mysore high road, 75 miles south-west from the former and 10 north-east from the latter.——*Shiroor* (ಶಿರೂರು - shirúru, Can.). From (shiri, can. lakshmí, the goddess + úru, can. village). Village, Sub-port; South canara dist., Coondapore tal.; pop. 3,258; lat. 13° 54′; long. 74° 38′; from Beidoor N.N.W. 3 miles; from Bhatcull S.E. 6 miles; from Bombay S.S.E. 360 miles; from Coondapore N.N.W. 20 miles; from Mangalore N.N.W. 72 miles; from Oodipy N.N.W. 40 miles; from the sea E. 1 mile. A small port on a creek which forms the north limit of the Presidency. The ruins of ancient Shiroor are extensive.——*Shiry* (శిరి - shiri, Tel.). Corruption of Shree. Suffix in place names, as Yellashiry, meaning wealthy village on the boundary.——*Shreecaucoolam* (శ్రీకాకుళము - shríkákulamu, Tel.). From (shrí, san. holy + kákóla, san. boar). Zemindarry, Village, Place of pilgrimage; Kistna dist., Sullapully zemindarry; pop. 2,822; lat. of village 16° 12′; long. 80° 53′; from Masulipatam W. 18 miles; from the sea W. 22 miles; from Sullapully N.W. 8 miles. On left bank of Kistna. Bramins here first settled in this district at the invitation of the three-eyed Pullava [q.v.] monarch. Festival held in Veishaukham [mausam] or May [chicacole].——*Shreecauntan* (శ్రీకాంతుడు - shríkántudu, Tel.). From (above + kánta, san. husband). Epithet of Vishnoo [q.v.], the husband of Lutchmy [q.v.]. Hindoo 2nd or pers. name [peyar].——*Shree cauryam* (ശ്രീകാര്യം - shríkáryam, Mal.). From (above + kárya, san. action). Office of a pagoda [q.v.] manager.——*Shree choornam* (ஸ்ரீச்சூரணம் - shiriççúranam, Tam.). From (above + chúrna, san. powder). Sacred powder of the veishnavas [naumam]. Cf. the corruption Shree choornam under Shir.——*Shreecoormam* (శ్రీకూర్మము - shríkúrmamu, Tel.). From (shrí, san. holy + kúrma, san. tortoise, incarnation of vishnu).—"*a*" Zemindarry; Ganjam dist., Chicacole tal.; pop. 18,283; acres 8,934.—"*b*" Village, Place of pilgrimage; Ganjam dist., Chicacole tal.; pop. 2,444; lat. 18° 16′; long. 84° 05′; from Chetterpore S.W. 97 miles; from Chicacole E.S.E. 7 miles; from the sea W. 3 miles. Belongs to Vizianagram zemindarry in Vizagapatam district. At extreme south of district on the coast. Temple to Coormam [q.v.] avatar [q.v.] of Vishnoo [q.v.]. Image in shape of tortoise. Temple formerly Sheiva, changed into Veishnava by Ramaunoojacharry [ramaunoojan]. Only place of pilgrimage for Teloogoos in Ganjam district.——*Shree cuntan* (श्रीकण्ठ - shríkant'ha, San.). From (above + kant'ha, san. throat). Epithet of the blue-throated shiva [q.v.]. Hindoo 2nd or pers. name [peyar].——*Shreedharan* (श्रीधर - shrídhara, San.). From (above + dhri, san. to hold); husband of lutchmy. Vishnoo.——*Shreeharicote* (శ్రీహరికోట - shríharikóta, Tel. sriharikót*). Sanscritized from (chíkiréni, tel. tree, albizzia amara, boivn. + kóta, tel. fort); from trees being abundant. Sanscrit name (shríharikóta), meaning holy + vishnoo + fort. Tract of country; Nellore dist., Goodoor tal.; pop. 11,149; lat. 13° 34′ to 14° 00′; long. 80° 12′ to 80° 18′; from Goodoor E. 23 miles; from Nellore S.S.E. 34 miles. Southernmost portion of Goodoor talook. A long low island or bank of alluvial and marine deposits rising only some few feet above the water level. Washed on the east by the sea and on the west by Poolicat lake. Stretches from Coromandel [q.v.] on the south to Doogarauzpatam on the north, where it is separated from the mainland by a narrow channel. Transferred from the Madras district in 1865. It is about 35 miles long and 6 miles broad in its widest part. Covered with dense jungle and forms one of the chief sources of supply of firewood for the Madras market.

• The soil is almost pure sand. Climate unhealthy, with much elephantiasis owing to scanty and stagnant water-supply. Along the Poolicat lake a narrow strip of land is under rice [q.v.] cultivation. Round the huts scanty crops of raggy [q.v.] and chayroot [q.v.] are raised by sinking earthenware wells. The trees are pollarded, and to a great measure recover themselves in seven years. Chiefly interesting as being one of the homes of the Yanaudies [q.v.], a wild tribe, of whom there are several thousands in the district. No village of this name. Tradition states that an old city, which was founded here by Trishunkoo [q.v.] of the Solar race, has been submerged.——*Shree jayanty* (శ్రీజయంతి - shríjayanti, Tel.). Means holy + day of rejoicing. Veishnava name. Compare Gocoolaushtamy, the Smarta designation. Same as Krishna jayanty.——*Shreemat* (श्रीमत् - shrímat, San.). From (above + mat, san. possessing). Or Shreeman. Title not of southern usage. Also used as an expletive in opening of letters; in Mahratta and Canarese inscriptions, this is of uniform occurrence. In Tamul, inscriptions [jonaca, shausanam] are commenced with Swastishree [peyar].——*Shreemooshnam* (ஸ்ரீமுட்டணம் - shirímuttanam, Tam.). From (shrí, san. beauty + mush, san. to excel); surpassing in beauty. Sanscrit name (jhillikávana), meaning cricket, gryllus genus + forest. South arcot dist., Chidambaram tal.; pop. 2,810; acres 1,973; lat. 11° 23′ 54″; long. 79° 27′; from Chidambaram W. 20 miles; from Cuddalore S.W. 32 miles; from the sea W. 28 miles. South of the Vellaur. The Vishnoo [q.v.] temple is one of the eight great Veishnava shrines and considered next to Shreerungam for sanctity. The main part of the building was built by a Naick [q.v.] of Tanjore. The temple has some very fine carvings in black trap [padicutt cull]. Annual festivals are Maushimagham [pundigay, 5b] in Maushy [mausam] or February and Cheitrotsavam [pundigay, 2d] in Chittray [mausam] or April. During the former the idol [shilay, vigraham] is carried to Killay, where great numbers of people follow it and bathe in the sea. At convenient stages during the journey the idol stops for a few hours and its followers are fed by charitable people. The Cheitrotsavam is the ordinary ten days' annual festival which is held at all large pagodas [q.v.].——*Shreenivausan* (ஸ்ரீநிவாசன் - shirínivásan, Tam.). From (above + nivása, san. abode). Vishnoo [q.v.] who dwells with Lutchmy [q.v.]. Familiarly sheenan, sheenoo, sheemautchoo. Hindoo 2nd or pers. name [peyar].——*Shree padam* (श्रीपद - shrípada, San.). From (above + pada, san. foot). Sacred foot-steps on rocks, worshipped [dharmarajacull, kadam, paudam]. See vol. I (87).——*Shreepermatore* (ஸ்ரீபெரும்புதூர் - shirípperumbúthúr, Tam. sríperumbudur *). From (shrí, san. holy + perum, tam. large + bhúta, san. devil + úr, tam. village). Familiarly Peroondore. Sanscrit name (bhútapurí), meaning demon + town.—"*a*" Deputy tahsildarry, Chingleput district. Pay Rs. 70.—"*b*" Town, Place of pilgrimage, Deputy tahsildar's station; Chingleput dist., Conjeeveram tal.; pop. 5,956; acres 4,792; lat. 12° 58′; long. 80° 01′; from Chingleput N. 19 miles; from Conjeeveram E.N.E. 19 miles; from Madras W. 24 miles; from St. Thomas' mount W. 17 miles; from Sydapett W. 19 miles. On high western trunk road. Belonged to old talook of Manimungalam, and was for some years after 1860 cusbah [q.v.] of Conjeeveram talook. Birth place of Ramaunoojacharry [ramaunoojan]. Vishnoo [q.v.] temple. Shiva [q.v.] temple older.——*Shreeraman* (శ్రీరాముడు - shrírámudu, Tel.). From (above + ráma, san. the hero). Holy rama. Hindoo 2nd or pers. name [peyar].——*Shree rama navamy* (శ్రీరామనవమి - shrírámanavami, Tel.). From (above + ráma, san. the hero + navamí, san. the ninth lunar day). Lunar [chaundramaunam] festival [pundigay, 3a], subject to intercalation [adhicam]. The ninth day of the waxing moon [shooclapacsham] of the first lunar month Cheitram [mausam] between 23rd March and 21st April. Festival lasts nine days, celebrated in temples of Vishnoo [q.v.]. Each evening god goes in procession through streets on different vehicles [vauhan], and on return of procession he is exposed in a mantapam [q.v.], to receive offerings of people. It is not a Dravidian festival, and was introduced into the country by the Mahrattas. On this day Rama was born as a Cshatriya at Ayodhyay under star [nacshatram] Poonarvas [maryauday, poonarvas]. See vol. I (92).——*Shreerungam* (ஸ்ரீரங்கம் - shirírangam, Tam. srírangam *). From (shrí, san. holy + ranga, san. pleasure place). Sanscrit name (ádiranga), meaning first + pleasure-place [rungasawmy]. Veishnava name (namberumálsannithi), meaning our great god + presence; also (kóvil), meaning temple; also (tiruvarangam), meaning same as title. Town, Island, Place of pilgrimage; Trichinopoly dist., Trichinopoly tal.; pop. 21,632; acres 975; lat. 10° 52′; long. 78° 45′; from Ariyalore S.W. 32 miles; from Madras S.W. 185 miles; from Moosiry E.S.E. 18 miles; from Trichinopoly N.N.W. 4 miles. Between the Cauvery and Coleroon. The town is famous for its Vishnoo [q.v.] temple with which it is almost conterminous. The temple is certainly the largest in the south of India. The entire mass of building consists of seven enclosures, the outermost wall of which measures 3,072 feet by 2,521 feet. In the centre of whole is the shrine of Runganauta sawmy. This shrine is surrounded by a wall measuring 240 feet by 181 feet; the second enclosure is 426 feet by 295 feet; and the third 767 feet by 503 feet. Europeans are not allowed to enter these enclosures. The fourth, in which is the thousand-pillar mantapam [q.v.], to which the great idol [shilay, vigraham] is brought every year during the Veicoonta yecaudashy [pundigay, 3a], festival, measures 1,235 feet by 849 feet. The hall of thousand columns measures 450 feet by 130 feet. The number of columns is sixteen in front by 60 in depth, consequently they are not more than 10 feet apart. Over the gates of the fourth enclosure are three gopoorams [q.v.], of which the eastern is the finest in the whole temple. It is known as the vellay or white gopooram [q.v.] and is 146 feet 6 inches in height. There is an unfinished outer gopooram of immense size, which, if completed, would have risen to the height of 300 feet. There are altogether fifteen gopoorams. Of these there are four in each of the three outer walls and three in the one next in order. There is at present no gate or gopooram on the western side of this enclosure; but tradition states that the gate formerly existing was blocked up because a number of the inhabitants of the portion of the town had entered through it and plundered the pagoda [q.v.]. The gate, over which is the vellay gopooram, leads into a yard to the south of the thousand-pillar mantapam, in which the only good specimens of stone carving in the temple are to be found. During the annual festival, this yard is covered by a pandaul [q.v.] erected at a cost of about Rs. 3,000. Running round the fourth enclosure is a street in which are ordinary dwelling-houses and shops. The fifth wall measures 1,653 feet by 1,270 feet. Outside is a second street, and then a wall of 2,108 feet in length by 1,846 feet in breadth. This wall is surrounded by a third street, and then comes the seventh and last wall. This wall is built of fine cut-stone, and is 20 feet 8 inches in height and 6 feet broad at the top. Another object of interest is a gopooram with a painted ceiling depicting the boar incarnation of Vishnoo and other subjects. In another Mantapam the temple jewels are shown to visitors. Some of them are very fine specimens of goldsmith's work. Several of the oldest of these were presented to the temple by Vijaya runga chokkanauta naick of Madura. The accumulated wealth in gold, silver, and precious stones is valued at between 12 and 15 lakhs [q.v.] of rupees. In his retirement here, Ramaunoojan worked out the system of the Veishnavite religion. He died here about the middle of the eleventh century. About 1¼ miles from the great Vishnoo temple is a Shiva pagoda [q.v.]; which, although much smaller, surpasses the larger building in beauty and architectural dignity. There are many inscriptions on the walls of this temple, one dated A.D. 1481-82. Annual festival in December attracts natives from all parts of India [jambookeshwaram]. There is a Tamul proverb:—ஸ்ரீரங்கத்துக் காகமானாலும் கோவிந்தம் பாடுமா?—"though hatched at Shreerungam, will a crow sing "the praises of Govindan?" the qualities of the evil will not change. From 1751 to 1755 the island and its pagodas were the frequent objects of the contests between the French and the British. In those contests several rocks, the Golden, Pine, French, and Sugar loaf were the points of battles.——*Shreerungan* (ஸ்ரீரங்கன் - shiríranngan, Tam.). From (above + ranga, san. vishnu of the island or pleasure place), holy vishnoo. Hindoo 2nd or pers name. In the neuter form applied to a female; it is then familiarly contracted into sheerungoo or sheerangy [peyar].——*Shreerunga nautan* (श्रीरङ्गनाथ - shrírangganát'ha, San.). From (shríranga, san. the place + nát'ha, san. lord). Vishnoo at Shreerungam.——*Shreerungaroyer* (శ్రీరంగరాయలు - shrírangaráyalu, Tel.). From (above + ranga, san. island + ráya, tel. king). Representative of the then waning Vijianugger line and Rajah of Chundragherry. Granted to the English in 1640 the settlement of Madrasputnam [madras]. On his defeat by Golcondah army, sought refuge with the Rajah of Bednore, who made him governor of Sakroyputna [charitram]. See vol. I (161), 532; II, 66, 91.——*Shreevatsam* (श्रीवत्स - shrívatsa, San.). From (above + vasta, san. favorite); the favorite of lutchmy [q.v.]. A mark or curl of hair on the breast of Vishnoo [q.v.]. It is white and is represented in pictures by a symbol resembling a cruciform flower. For omens from curl marks see Shooly.——*Shreeveicoontam* (ஸ்ரீவைகுண்டம் - shirívaikkundam, Tam. srívaikuntham *). From (above + vaikunt'ha, san. the heaven of vishnu).—"*a*" Sub-magistracy, Tinnevelly district. Pay Rs. 100.—"*b*" Town, Talook head-quarters; Tinnevelly dist., Tencaray tal.; pop. 7,209; acres 1,701; lat. 8° 38′; long. 77° 58′; height 141 feet; from Madras S.S.W. 340 miles; from Palamcottah E.S.E. 14 miles; from Shermadevy E. 24 miles; from Shreevillipoottore S.S.E. 63 miles; from Tinnevelly E.S.E. 17 miles; from Tuticorin W.S.W. 21 miles; from the sea W. 16. On left bank of Tamrapurny. Veishnava holy place. Ten principal temples. Vishnoo [q.v.] temple and Keilausa nauta temple, are large and important. Underneath the Vishnoo temple, tradition says, is a hidden building. Jeina [q.v.] statue. A peculiar class of people resident here called the Cottay vellaular whose females never on any pretext leave the limits of the fort in which they live. Two car festivals in March and July. Festivals at the Vishnoo pagoda [q.v.] in January, February, and April. Roman catholic chapel. Gives its name to an anicut [q.v.].——*Shreeveishnava* (श्रीवैष्णव - shrívaishnava, San.). From (above + vaishnava, worshipper of vishnu). The followers of Ramaunoojan [q.v.]; otherwise called Ramaunoojeeyans, or Shree sampradayees [q.v.]. They form the bulk of Vishnoo worshippers in the east and south, as the Madhwacharries [madhwa] do on the central tableland and the west coast. The

Braminical heads of the sect are called Jiyyar or Jiyyangar [q.v.]. Their worship is addressed to Vishnoo [q.v.] and to Lutchmy [q.v.], and their respective incarnations [avatar], either singly or conjointly; and the sect consists of corresponding subdivisions, as Narayanan, Lutchmy, Lutchminarrain, Rama, Seetay, Seetaraman, Krishnan, Roocminy, or other modifications of the name of Vishnoo and his consort. The muntram [q.v.] of the Ramaunoojan sect is the six syllable muntram [q.v.], Om ramauya nama, or Om salutation to Rama. To the Acharries [q.v.], or supreme teachers of this sect, the rest perform the Ashtaunga dandawat pranaumam [ashtaungam, pranaumam] or prostration of the body with the application to the ground of eight parts, the forehead, breast, hands, knee, and insteps of the feet. The principal authorities of this sect are the comments of the founder on the Sootrams of Vyausan [q.v.] and other Vedic works. They are written in Sanscrit, and are the Shree bhashyam, Geeta bhashyam, Vedaurta sangraham, Vedaunta pradeepam, and Vedaunta sauram. Besides these, the works of Vencatacharry are of great repute, as the Sootra bhashyam and Shatadooshiny and others. The Chunda mauroota veidicam and Trimshata dhyaunam are also works of authority, as is the Pauncharautram [q.v.] of Nauradan. Of the Pooraunams [q.v.] they acknowledge only six as authorities; the Vishnoo, Nauradeeyam, Gauroodam, Pudmam, Varauham and the Bhaugavatam. The other twelve are regarded as Taumasam [q.v.] or originating in the principles of darkness and passion. Besides these, the Ramaunoojeeyans have a variety of popular works in the dialects of the south, one of which the Gooroo pauramparay contains an account of the life of Ramaunoojan. For the founder see Ramaunoojan, for the philosophy see Vishishtaudweitam. See also vol. I (85), (89) [matam].——*Shree vencateshan* (श्रीवेङ्कटेश - shrívénkatésha, San.). From (above + vénkata, san. the mountain + ísha, san. lord). Vishnoo.——*Shreevillipoottore* (சிரீவில்லிப்புத்தூர் - shirívillipputtúr, Tam.). See sep. title. ——*Shreevullabhan* (சிரீவல்லபன் - shirívallaban, Tam.). From (above + vallabha, san. husband). Lutchmy's husband. Hindoo 2nd or pers. name [peyar].——*Srisheilam* (శ్రీశైలం - shríshailam, Tel.). From (above + shaila, san. mountain). Colloquially Parvatam [q.v.] or the special hill among the local people. Village, Place of pilgrimage; Kurnool dist., Nundicotcore tal.; lat. 16° 05′; long. 78° 55′; height 1,439 feet; from Kurnool E.N.E. 56 miles; from Nundicotcore N.E. 42 miles. In Nullamullay forests close to gorge of Kistna. The great temple here is, in spite of inaccessibility, ohe of the most renowned in S. india and pilgrims visit it from Central india. The image was formerly a small oblong roundish white stone with dark rings fixed in a silver case. The Rohillas stole it, and the present stone was obtained from Benares. The temple is situated high above the rocky banks of the Kistna, and surrounded on all sides by temples [coil, pagoda], mantapams [q.v.], long flights of stone steps on hill-sides, and other monuments. The earliest actual record of the temple relates to a visit by the Chalookya [q.v.] ruler Treilocyan, in A.D. 1058. It was richly endowed by Hindoo nobles and was in a prosperous condition till the arrival of the Mahomedans in seventeenth century, who resumed inams [q.v.] and levied a tax on pilgrims. Up to 1794, unknown to Europeans. The image is, owing to the darkness of the inner part of the temple, exhibited to the visitor by means of a mirror called Darpanam or cunnaudy [q.v.] for which a large fee is charged. It is the water lingam [q.v.]. The earth lingam is at Conjeeveram, and the air lingam at Chidambaram or Rameshwaram [punchalingam]. The poojarries [q.v.] are Jangams [q.v.]. The principal places connected with Srisheilam are the temples on both banks of the river, 5 miles north; a temple 1½ miles south; the temple of Alakeshwara coobairan, 2 miles south-east; the temple at Shikharam, 4 miles south-east; the temple at Collamnullah, 4 miles south; the temple of Nakkamulla, 6 miles south by west; and the temple of Naugalooty, 15 miles south-west. Seven miles north, on the Nizam's side of the river, is the site of the deserted city and fort of Chundragoortyputnam, a place formerly of great importance, said to measure 10 square miles in circumference. At Shivarautry [pundigay, 6a] in February or March a great festival takes place, which is attended by pilgrims from all parts of the country, who muster about twenty to thirty thousand. A fee is collected by the renters, and another fee by the Chentsoos [q.v.]. This festival is followed by another in honor of Ambah devy, and the whole lasts nearly two months. The Srisheilam plateau has long been the grazing ground of the cattle [maud] of the coast districts of Nellore and Kistna in hot weather and in seasons of drought.——*Sylhet* (سلہٹ - silhat, Hind.). From (shrí, san. auspicious + hatta, san. market). A district in Assam, N.E. of Bengal.——*Sylhet varnish* (भल्लातक - bhallátaka, San.). Product of Marking-nut [q.v.] tree.

SHREEVILLIPOOTTORE (சிரீவில்லிப்புத்தூர் - shirívillipputtúr, *Tam.* srívilliputúr *). From (shrí, san. holy + villi, tam. bowman + puthu, tam. new + úr, tam. village) [shree]; named after a hunter, who discovered the shrine amidst the jungle. Tam. also (villipputtúr); also (náççiyárkkóvil), meaning maiden + temple, referring to aundaul [q.v.]. Sanscrit name (gódápurí), meaning the earth-born + town, referring to aundaul; also (shrídhanushpura), meaning holy + bow + town. ——(1) Talook, Tinnevelly district. Tahsildar's pay Rs. 200. Area 585 square miles. Population 190,517. Language Tamul. N.W. of district. Bounded north by Tirmungalam and Periyacoolam talooks of Madura district, west by the ghauts, south by Shuncaraneinarcoil talook, and east by Shauttore. The country to the west undulates considerably owing to the numerous streams which descend from the mountains. It contains many palmyras [q.v.] and a considerable number of mango [q.v.] and tamarind [q.v.] topes [q.v.]. The principal feature of this portion is a deep bay in the mountains 6 miles north of Shreevillipoottore, containing the village of Watrap. From this village a mountain pass [ghaut] leads over into the Cumbum valley of Madura district, whence there is a road viâ Peermaid into Travancore. Another pass leads from the Shauttore zemindarry in the south-west angle of the talook over mountains densely forested and over 4,000 feet in height into a wide plateau, many square miles of which are grass and through which flows the Periyaur on its way to the sea in Travancore. A few miles north of this path is the site of the dam by which it is proposed to turn the waters of the Periyaur over a low ridge in the range into the Cumbum valley of Madura district. The forests of the sources of this river are yearly searched for cardamoms [q.v.] by the Travancore government. Peermaid and the low country of Travancore may be reached by this road also. The eastern half of the talook has few trees. Occasionally poor topes of tamarind [q.v.] are met with and thickets of babool [q.v.] thorn are found in most tanks and river beds. The lofty tower of Shreevillipoottore pagoda [q.v.] is a landmark from almost every part of the talook. Rather more than half of the talook, including the villages lying to the west, belongs to the red clay loam and sand series. The easterly villages form a portion of the cotton plain, and half a black cotton soil [regur] or one of black soil mixed with gravel and salt earth [sowdoo]. The mountains above Shauttore as well as above Shreevillipoottore and Watrap, contain valuable timbers of several kinds. Cumboo [bajrah], gram [q.v.] and dholl [q.v.] are the products of the dry lands [poonjah], and rice [q.v.], plantains [q.v.], and cocoanuts [q.v.] of the wet [nunjah], in the western portion of the talook. Cotton [q.v.], cumboo [bajrah] and gram [q.v.] are grown on the dry lands in the eastern portion. The irrigated lands, which are few, grow rice, and with the aid of wells tobacco [pogauk] and chillies [q.v.]. Irrigation has been carefully attended to in early times in the western villages of this talook, and the streams which descend from the ghauts [q.v.] at Rajahpolliem, Shauttore, Shreevillipoottore, and Watrap have been utilised by anicuts [q.v.] and channels [q.v.] and tanks [q.v.] to store the water in. There are 38 anicuts [q.v.], 25 principal river channels [q.v.], and 253 tanks [q.v.], of which about one-half are partially supplied by river channels. Zemindarries:—Collancondaun, Shettore. Places of archæological interest:—Cholapooram, Collancondaun, Cottangoolam, Cummaulancoolam, Devastaunam, Keel rajacoola ramangraumam, Madavaurvilaugam, Mauranairy, Nadicoody, Poothoopolliem, Rajahpolliem, Sammandapooram, Shettore, Shreevillipoottore, Venganullore, Yethircottay. Principal trig. stations:—Peymullay, Vauzhaicoolam. The leading places, &c., in the talook are the following.— ——*Atchandavilattaun* (அச்சந்தவிளத்தான் - aççandavilattán, Tam.). From (aççam, tam. fear + tavizhttán, tam. deliverer), place of refuge. Village; pop. 3,199; acres 4,697; lat. 9° 26′; long. 77° 42′; from Shreevillipoottore S.S.E. 6 miles; from Tinnevelly N. 48 miles. On left bank of Cayalgoody river. Temple.——*Cholapooram* (சோழவரம் - shózhavaram, Tam.). From (chóla, san. the dynasty so called + pura, san. city). Village; pop. 2,887; acres 5,504; lat. 9° 23′; long. 77° 36′; from Shreevillipoottore S.S.W. 10 miles; from Tinnevelly N. 45 miles. On road to Shuncaraneinarcoil. Two old Shiva and Vishnoo temples, with inscriptions. Weekly fair on Thursdays.——*Collancondaun* (கொல்லங்கொண்டான் - kollangondán, Tam.). From (kollam, tam. high ground + kondán, tam. he who possesses). Village, Head-quarters of zemindar; pop. 2,335; acres 7,383; lat. 9° 25′; long. 77° 34′; from Shreevillipoottore S.W. 10 miles; from Tinnevelly N.N.W. 47 miles. Two large ancient Shiva and Vishnoo temples, with inscriptions. Peshcush Rs. 24.——*Devastaunam* (தேவத்தானம் - tévattánam, Tam.). From (déva, san. god + st'hána, san. place). Village; pop. 1,954; lat. 9° 24′; long. 77° 30′; from Shreevillipoottore S.W. 14 miles; from Tinnevelly N.N.W. 48 miles. Fine Shiva temple with inscriptions.——*Madavaurvilaugam* (மடவார்விளாகம் - madavárvilágam, Tam.). From (madavál, tam. woman + világam, tam. battle-field). Village; pop. 2,483; lat. 9° 30′; long. 77° 40′; from Shreevillipoottore S. ¾ mile; from Tinnevelly N. 53 miles. Suburb of Shreevillipoottore. Fine pagoda [q.v.] and tower dedicated to Shiva [q.v.]. Annual car festival [ratotsavam] in May. Inscriptions in temple.——*Peymullay* (பேய்மலை - péymalai, Tam.). From (péy, tam. devil + malai, tam. hill). Sanscrit name (dharmádri), meaning justice + mountain. Hill; lat. 9° 33′; long. 77° 34′; from Shreevillipoottore W.N.W. 8 miles; from Tinnevelly N. 57 miles. Trig. station in lat. 9° 33′ 12″; long. 77° 33′ 36″; height 5,575 feet; from Shreevillipoottore W.N.W. 8 miles; from Vauzhaicoolam N. 52 miles.——*Rajacoolaraman* (இராசக்குலராமன் - irásakularáman, Tam.). From (rájakula, san. royal family + ráma, san. proper name); after a paundyan of that name. Village; pop. 3,408; acres 220; lat. 9° 24′; long. 77° 41′; from Shreevillipoottore S. 8 miles; from Tinnevelly N. 46 miles. On Tinnevelly

road.——*Rajahpolliem* (இராசாப்பாளையம் - irásáppálaiyam, Tam.). From (rájá, san. king + pálaiyam, tam. fortified village). Town; pop. 13,301; acres 1,184; lat. 9° 27′; long. 77° 36′; from Shreevillipoottore S.W. 7 miles; from Tinnevelly N. 50 miles. On the Shreevillipoottore-Tinnevelly road. Inhabited chiefly by people who came from the old Vijianugger state. Old Shiva [q.v.] temple. Fine tamarind [q.v.] tope [q.v.] to the north. Large tank with ancient temple on its bank. Iron [auhan], agricultural and other implements made.——*Shettore* (சேத்தூர் - shéttúr, Tam. sétur *). Mean's saitoopaty's village. Zemindarry, Town; pop. 7,665; acres 22,492; lat. 9° 25′; long. 77° 31′; from Shreevillipoottore S.W. 12 miles; from Tinnevelly N.N.W. 48 miles. The estate is at S.W. corner of talook. Well irrigated from mountains. Zemindar [q.v.] is of Marava caste. Peshcush Rs. 12,536, rental, Rs. 36,240. Old Shiva [q.v.] temple in the village with inscriptions.——*Shreevillipoottore* (ஸ்ரீவில்லிப்புத்தூர் - shirívillipputtúr, Tam.). See below.——*Vauzhaicoolam* (வாழைக்குளம் - vázhaikkulam, Tam.). From (vázhai, tam. plantain + kulam, tam. tank). Trig. station in lat. 8° 48′ 17·94″; long. 77° 39′ 56·02″; from Pauraputty S.W. 62 miles; from Shreevillipoottore S. 48 miles.——*Watrap* (வத்திராயிருப்பு - vattiráyiruppu, Tam.). See sep. title.——*Yethircottay* (எதிர்க்கோட்டை - ethirkkóttai, Tam.). From (ethir, tam. opposite + kóttai, tam. fort); pop. 1,830; acres 4,707; lat. 9° 23′; long. 77° 47′; from Shreevillipoottore S.E. 11 miles; from Tinnevelly N. 44 miles. Inscription on a rock.——**(2)** Town, Head-quarters of General deputy collector, Tahsildar, District moonsif; Tinnevelly dist., Shreevillipoottore tal.; pop. 21,448; acres 1,622; lat. 9° 31′; long. 77° 40′; height 651 feet; from Madras S.W. 302 miles; from Palamcottah N. 54 miles; from Shermadevy N. 56 miles; from Tinnevelly N. 53 miles; from Tuticorin N.W. 60 miles. On an open plain on road leading viâ Shencottah and Courtallam through Aryancauv pass. Aurautchiputty, with a population of 3,807, forms part of Shreevillipoottore. Old Vishnoo [q.v.] temple, handsomely sculptured, and an old Shiva [q.v.] temple. Both temples have fine gopoorams [q.v.] and a number of inscriptions. Small temple to Krishnasawmy, with inscriptions. The old palace of the Naicks [q.v.] has been converted into a cutcherry [q.v.]. Car procession [ratotsavam] in August. Another for bathing in January. Coarse cotton cloths woven. Vishnoo temple on a rock in the west. Much frequented on Saturdays [poorataushy shany kizhamay] in September.

SHRINGAM (शृङ्ग - shringa, *San.*). From (shrí, san. to injure) [sharam, shooran]. Horn; peak.——*Shaurngam* (शार्ङ्ग - shárnga, San.). From (shringa, san. horn); as made of horn. The bow of Vishnoo [codandam].——*Shaurngapauny* (शार्ङ्गपाणि - shárngapáni, San.). From (shárnga, san. bow + páni, san. hand). Vishnoo, the Shaurngam-bearer. Hindoo 2nd or pers. name [peyar].——*Shingy* (శింగి - shingi, Tel.). From (shringa, san. peak). Mountain.——*Shringairy* (ಶೃಂಗೇರಿ - shringéri, Can.; shringeri, Mys. Gov.). From (shringa, san. peak + giri, san. mountain). Sanscrit name (rishyashringagiri), meaning rishyashringan, the sage + mountain. Town, Place of pilgrimage, Cuddore district, Mysore, on the left bank of the Toonga, in 13° 25′ N. lat., 75° 18′ E. long., in the Coppa talook. 8 miles south-west of Hariharpore, the cusbah [q.v.]. Most important of mutts [q.v.] founded by Shuncaran [q.v.].——*Shringy* (शृङ्गी - shringí, San.). Horned. Plant second term. Ex., where transl. is of first term:—Gymnema sylvestre (méshashringí), sheep; Helicteres isora (mrigashringa), deer; Odina wodier (ajashringí), sheep; Pistacia integerrima (karkatashringi), crab; Rhus succedania (karkatashringí), crab; Terminalia chebula (karkatashringí), crab. See gloss. paragraphs.——*Sing* (سینگ - síng, Hind.; கொம்பு - kombu, Tam.). Hind. from (shringa, san. horn). Horn. Horns are obtained from the following:—Antelope bezoartica [jinka]; Axis maculatus or Spotted deer [cheetal]; Bos indicus, or Domestic cattle [maud]; Bubalus arni, or Buffalo [khoolgah]; Capra hircus, or Domestic goat [aud]; Cervulus muntjac, or Jungle sheep [q.v.]; Gavæus gaurus, or Bison [gowr]; Gazella bennettii, or Ravine deer [q.v.]; Hemitragus hylocrius, or Ibex [saddle back]; Rusa aristotelis, or Samber [q.v.]. The horns of deer [mrigam], called antlers, are solid processes from the frontal bone and possess the properties of true bone; periodically shed by absorption of the bony base, after which a new pair grows with great rapidity. The horns of the ox, buffalo, &c., are hollow and are never shed; deposited in layers or bony cores composed principally of albumen. Horns of wild animals are more prominent than in domesticated races. They are generally larger in males. For Ivory see Dant.——*Singauram* (శింగారము - singáramu, Tel.). From (shringára, san. beauty). Beauty. Also as a name short for Singauravailoo.——*Singauravailoo* (శింగారవేలు - singáravélu, Tel.). From (shringára, san. beauty + vélu, tam. familiar form of vélan, tam. skanda, the lance-bearer). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Singhaura* (शृङ्गाटक - shringátaka, San.; शिंगाडा - shingádá, Mahr.; سنگھاڑہ - singhárah, Hind.; سنگاڑا - singárá, Dec.; పందిగడ్డ - pandigadda, Tel.; കരിമ്പോള - karimpóla, Mal.; ඉකිලිය - ikiliya, Singh.; பன்றிமோந்தான்கிழங்கு - panrimóndángizhangu, Tam.). Title from deccany. San. from (shringa, san. horn + at, san. to go), from horned fruit. Mahr. from sanscrit. Hind. from (sing, hind. horn). Dec. from hindostany. Tel. from (pandi, tel. pig + gadda, tel. root). Mal. from (kari, mal. black + póla, mal. the water plant, geodorum dilatatum, r. br.). Tam. from (panri, tam. pig + mó, tam. to smell + kizhangu, tam. esculent root). San. also (kubjaka), meaning crooked; (jalakantaka), meaning water thorn. Hind. also (pániphal), meaning water fruit. Tel. also (parikegadda). Tam. also (panrimottai), meaning pig + lump. Title otherwise Paneephal, Pig root, Water caltrops, Water chestnut, Water thorn. Botanically Trapa bispinosa, roxb., onagraceæ [vricsham, 59]. Alias Trapa bicornis. Herbaceous, floating; upper leaves and petioles tomentose beneath, lower leaves opposite, others alternate, floating leaves rather quadrate, serrulately toothed; calyx villous, limb four-partite; petals four; crown of the ovary eight-furrowed, the margins curled; fruit two-horned; horns opposite, conical, very sharp, barbed backwards; petioles furnished with a large bladder in the middle; ovary two-celled, surrounded by a cap-shaped crown; flowers smallish, white; found on tanks. The nut grows under the water after the flowers decay, and is of a triangular shape, and covered with a tough brown integument, adhering strongly to the kernel, which is white and esculent. Nuts used in bilious affections and diarrhœa; also in form of poultices. Kernel of nut white, sweetish and farinaceous, eaten, raw and cooked. Flower gives a dye [shauyam]. No other common species here. For land caltrops see Nerinjy.——*Srungavarapoocote* (శృంగవరపుకోట - shringavarapukóta, Tel.). See sep. title.

SHUBBEER (شبیر - shabbír, *Ar.*). Another name of Hassan, the grandson of the prophet. Alam taken by Shiahs, as Shubbeer hoossain, double alam [ism].

SHUBBER (شبر - shabbar, *Ar.*). Another name of Hoossain, the grandson of the prophet. Alam taken by Shiahs, as Shubber ally, double alam [ism].

SHUM (شم - sham, *Hind.*). Tail.——*Shumsheer* (شمشیر - shamshír, Pers.). From (above + sher, pers. lion). Scimitar. Prefixed to an alam makes a lacab; as Shumsheer ally, the sword of ally [ism].

SHUMS (شمس - shams, *Pers.*). Sun [sooryan]; known amongst the Mahomedans as the celestial cook, with its orbit in the fourth heaven [najm]. One born at the hour of the week assigned to its influence [zyecha] will be wealthy, passionate, generous, annually indisposed, and little famed for pious works. Part of lacab; as Shums ood deen, the sun of religion [ism].

SHUNCARANEINARCOIL (சங்கரநயினார்க்கோயில் - shangaranayinárkkóyil, *Tam.* sankaranainárkoil *). From (shankara, san. shiva, the pleasure-giver + nayinár, tam. lord + kóvil, tam. temple) [sham]. Sanscrit name (shankaranáráyanapura), meaning town of shiva and vishnoo in one [hariharan].——**(1)** Talook, Tinnevelly district. Tahsildar's pay Rs. 200. Area 718 square miles. About one-half is Government and the rest zemindarry and inam. Population 213,779. Language Tamul. N.W. of district. At the foot of the ghauts [q.v.]. Bounded south by Tencaushy and Tinnevelly talooks; east by Ottapidauram talook; west by the Southern ghauts; and north by Shreevillipoottore talook. Soil is red and black. In general the talook is bare of trees. The red country is broken into valleys and ridges by numerous small torrents and streams descending from the mountains, and is well supplied with channels leading from these streams and with tanks supplied by the channels [q.v.]. Its principal wealth is its irrigated lands, as the dry cultivation is poor excepting under wells, where good crops of cholum [q.v.] and raggy [q.v.] are occasionally seen. The black cotton [regar] country is almost one-fourth of the talook in extent and is a portion of the great cotton plain which occupies the north and north-east portion of the district. The plains are broken only by a few scattered topes [q.v.] of poor tamarinds [q.v.] and of the babool [q.v.] found in almost all the tank-beds throughout the cotton plains [regar]. The greater portion of the cotton soil is poor. Trade is trifling. Raw cotton [q.v.] is the only export; and rice [q.v.] and articles of European manufacture, chiefly cloth, the principal imports. There are no manufactures of importance. In the higher lands, much of which are of fair quality, cholum [q.v.] cumboo [bajrah] and gram [q.v.] are sown in the north-east monsoon [q.v.] months, and large areas are generally left fallow. Rice [q.v.], plantain [q.v.] gardens and betel [q.v.] vines are the products grown under irrigation. The supply of water in the south-west monsoon [q.v.] is trifling and uncertain and confined to a few villages quite at the foot of the range. The main supply is from the north-east monsoon [q.v.], which breaks usually with considerable force on the range and fills all the streams, channels, and tanks generally two or three times, in which case a good crop is secured. Zemindarries:—Alagapoory, Auvoodaiyaupooram, Coolashekharamungalam, Eechandah, Nadoovacoorchy, Notchicolam, Panayore, Poygaycoottaulapairy, Shivagherry, Soobramanyapooram, Talavancottah, Tirvettaynullore, Trimalnaick poothoocoody, Vadamullaypooram, Vailayoodhapooram, Veeriroop, Vellaulacoolam. These except Talavancottah are portions of the ancient zemindarry of Chokkamputty sold up in 1867. Places of archæological interest:—Carivalamvandanullore, Daurcapooram, Shuncara-

neinarcoil, Tenmullay, Veerashikhaumany. Principal trig. stations :—Caurishauttan, Periyore mullay. The leading places, &c., in the talook are the following.——*Alagapoory* (அழகாப்புரி - azhagáppuri, Tam.). From (azhagu, tam. beauty + purí, san. town). Zemindarry, Village ; pop. 1,347 ; square miles 1¼ ; lat. of village 9° 13′ ; long. 77° 40′ ; from Shuncaraneinarcoil E.N.E. 6 miles ; from Tinnevelly N. 33 miles. Peshcush Rs. 669.——*Auvoodaiyaupooram* (ஆவுடையாப்புரம் - ávudaiyáppuram, Tam.). From (ávudaiyár, tam. lingam and yóni, emblem of shiva + pura, san. town). Zemindarry, Village ; pop. of zemindarry 6,960 ; lat. of village 9° 20′ ; long. 77° 35′ ; from Shuncaraneinarcoil N. 11 miles ; from Tinnevelly N.N.W. 43 miles. Zemindarry consists of three villages. Peshcush Rs. 2,941.——*Carivalamvandanullore* (கரிவலம்வந்தநல்லூர் - karivalamvandanallúr, Tam.). From (kari, san. elephant + valamvá, tam. to circumambulate + nal, tam. good + úr, tam. village). Village ; pop. 3,975 ; acres 4,554 ; lat. 9° 16′ ; long. 77° 35′ ; from Shuncaraneinarcoil N. 7 miles ; from Tinnevelly N.N.W. 38 miles. On road to Shreevillipoottore. Temple to Paulvunnanauta sawmy, with inscriptions of Paundy [q.v.] dynasty in Grantam [q.v.] and Tamul [q.v.]. The lingam [q.v.] was once of crystal [palingoo cull], hence name of the deity, milk-colored lord. Three car festivals annually.——*Caurishauttan* (காரிசாத்தான் - kárisáttán, Tam.). From (kári, tam. blackness + sháttan, tam. the god aiyyanár). Village ; pop. 1,619 ; acres 3,779 ; lat. 9° 17′ ; long. 77° 36′ ; from Shuncaraneinarcoil N.N.E. 8 miles ; from Tinnevelly N. 39 miles. Trig station in lat. 9° 16′ 59·56″ ; long. 77° 37′ 29·94″ ; height 915 feet ; from Mahomed sahibpooram S. 7 miles ; from Shuncaraneinarcoil N.N.E. 8 miles.——*Coolashekhara mungalam* (குலசேகரமங்கலம் - kulaségaramangalam, Tam.). From (kulashékhara, san. proper name + mangala, san. prosperity). Village, Head-quarters of Mittahdar ; pop. 5,733 ; lat. 9° 05′ ; long. 77° 30′ ; from Shuncaraneinarcoil S.S.W. 8 miles ; from Tinnevelly N.N.W. 28 miles. Peshcush Rs. 2,029.——*Cooroovicolam* (குருவிக்குளம் - kuruvikkulam, Tam.). From (kuruvi, tam. smal bird + kulam, tam. tank). Village ; pop. 5,679 ; acres 10,203 ; lat. 9° 10′ ; long. 77° 43′ ; from Shuncaraneinarcoil E. 9 miles ; from Tinnevelly N. 31 miles. Shiva temple. Coarse cloths manufactured.——*Eechandah* (ஈச்சந்தா - íççandá, Tam.). From (íñju, tam. the date tree, phœnix farinifera, roxb. + távu, tam. place). Zemindarry, Village ; pop. 1,859 ; lat. of village 9° 04′ ; long. 77° 34′ ; from Shuncaraneinarcoil S.S.W. 8 miles ; from Tinnevelly N.N.W. 26 miles.——Peshcush Rs. 557.——*Nadooracoorchy* (நடுவக்குறிச்சி - naduvakkuriççi, Tam.). From (naduvu, tam. middle + kuriççi, tam. village). Zemindarry, Village ; pop. of zemindarry 1,125 ; square miles 16¼ ; lat. of village 9° 06′ ; long. 77° 33′ ; from Shuncaraneinarcoil S.S.W. 6 miles ; from Tinnevelly N.N.W. 29 miles. Zemindarry ; consists of ten villages. Peshcush Rs. 1,527.——*Panayore* (பனையூர் - panaiyúr, Tam.). From (panai, tam. palmyra tree, borassus flabelliformis, linn. + úr, tam. village). Zemindarry, Village ; pop 2,520 ; lat. of village 9° 16′ ; long. 77° 33′ ; from Shuncaraneinarcoil N.N.W. 7 miles ; from Tinnevelly N.N.W. 39 miles. Peshcush Rs. 1,399.——*Periyore* (பெரியூர் - periyúr, Tam.). From (periya, tam. great + úr, tam. village). Village ; pop. 1,585 ; acres 2,481 ; lat. 9° 15′ ; long. 77° 33′ ; from Shuncaraneinarcoil N.N.W. 6 miles ; from Tinnevelly N.N.W. 38 miles. Almost in ruins. Trig. station in lat. 9° 12′ 15·61″ ; long. 77° 32′ 13·57″ ; height 1,378 feet ; from Malaiyadiputty W. 18 miles ; from Shuncaraneinarcoil N.W. 4 miles.——*Pooliyangoody* (புளியங்குடி - puliyangudi, Tam.). From (puli, tam. tamarind tree, tamarindus indica, linn. + kudi, tam. village). Town ; pop. 7,233 ; acres 1,525 ; lat. 9° 10′ ; long. 77° 26′ ; from Shuncaraneinarcoil W. 10 miles ; from Tinnevelly N.N.W. 37 miles. On old Madura road. Two temples of Vishnoo [q.v.] and Soobramanyan [q.v.]. Two annual car festivals [ratotsavam]. Cloths, reed [coray] mats [boriyah], iron [auhan], and jaggery [q.v.] manufactured.——*Shivagherry* (சிவகிரி - shivagiri, Tam.). See sep. title.——*Shuncaraneinarcoil* (சங்கரநயினார்க்கோயில் - shangaranayinárkkóyil, Tam.). See below.——*Soobramanyapooram* (சுப்பிரமணியப்புரம் - shuppiramaniyappuram, Tam.). From (subrahmanya, san. the pious god skanda + pura, san. town). Zemindarry, Village ; pop. 390 ; acres 309 ; lat. of village 9° 21′ ; long. 77° 31′ ; from Shuncaraneinarcoil N.N.W. 13 miles ; from Tinnevelly N.N.W. 44 miles. Irrigated by Palavóre channel. Peshcush Rs. 880.——*Talavancottah* (தலைவன்கோட்டை - talaivangóttai, Tam.). From (talaivan, tam. chieftain + kóttai, tam. fort). Zemindarry, Village ; pop. 1,696 ; acres 5,710 ; lat. of village 9° 11′ ; long. 77° 30′ ; from Shuncaraneinarcoil W. 6 miles ; from Tinnevelly N.N.W. 36 miles. Peshcush Rs. 2,732.——*Tirvettaynullore* (திருவேட்டைநல்லூர் - tiruvéttainallúr, Tam.). From (tiru, tam. sacred + véttai, tam. hunt + nal, tam. good + úr, tam. town). Village, Head-quarters of Mittahdar ; pop. 4,751 ; lat. 9° 08′ ; long. 77° 27′ ; from Shuncaraneinarcoil W.S.W. 9 miles ; from Tinnevelly N.W. 34 miles. Peshcush Rs. 1,645.——*Trimalnaickpoothoocoody* (திருமலைநாயக்கன்புதுக்குடி - tirumalainâyakkanbuthukkudi, Tam.). From (tirumalainâyakkan, tam. proper name + puthu, tam. new + kudi, tam. village). Zemindarry, Village ; pop. 2,333 ; acres 394 ; lat. of village 9° 10′ ; long. 77° 26′ ; from Shuncaraneinarcoil W. 10 miles ; from Tinnevelly N.N.W. 37 miles. Peshcush Rs. 2,069.——*Vasoodevanullore* (வாசுதேவநல்லூர் - vásuthévanallúr, Tam. vásudévanallúr *). From (vásudéva, san. epithet of krishna + nal, tam. good + úr, tam. village). Town ; pop. 5,926 ; acres 3,523 ; lat. 9° 15′ ; long. 77° 27′ ; from Shuncaraneinarcoil W.N.W. 10 miles ; from Tinnevelly N.N.W. 40 miles. On Madura-Travancore road. Ancient temple. Festival in June. Weekly fair on Wednesday.——*Veerashikhaumany* (வீரசிகாமணி - vírasigámani, Tam.). After a person of that name. Village ; pop. 2,118 ; acres 3,211 ; lat. 9° 06′ ; long. 77° 31′ ; from Shuncaraneinarcoil S.W. 8 miles ; from Tinnevelly N.N.W. 30 miles. Rock-cut caves and sculpture.——*Vellaulacoolam* (வெள்ளாளன்குளம் - vellálangulam, Tam.). From (vellálan, tam. man of that caste + kulam, tam. tank). Zemindarry, Village ; pop. 1,257 ; lat. of village 9° 03′ ; long. 77° 32′ ; from Shuncaraneinarcoil S.S.W. 10 miles ; from Tinnevelly N.W. 26 miles. On road to Tencaushy. Peshcush Rs. 429.——*Yilaiyarasanendal* (இளவரசனேந்தல் - ilavarasanéndal, Tam.). From (ila, tam. young + arasan, tam. king + éndal, tam. high ground). Town ; pop. 4,015 ; acres 4,245 ; lat. 9° 13′ ; long. 77° 50′ ; from Shuncaraneinarcoil E.N.E. 17 miles ; from Tinnevelly N.N.E. 34 miles. Group of agricultural hamlets. Granted in the time of Gentoo [q.v.] kings to certain Cummavaur [q.v.].
——**(2)** Town, Head quarters of Tahsildar and Sub-registrar, Place of pilgrimage ; Tinnevelly dist., Shuncaraneinarcoil tal. ; pop. 8,566 ; acres 6,019 ; lat. 9° 10′ ; long. 77° 35′ ; height 602 feet ; from Madras S.W. 325 miles ; from Palamcottah N.N.W. 33 miles ; from Shermadevy N. 33 miles ; from Shreevillipoottore S.S.W. 24 miles ; from Tinnevelly N.N.W. 32 miles ; from Tuticorin W.N.W. 49 miles. On a plain 10 miles east of the road from Madura to Travancore. Ancient Shiva temple with good stone-carving and inscriptions, and known as the Shuncara lingam. Shiva is worshipped under the combined form of Vishnoo and Shiva [shuncaranarayanan] and Veishnavas worship as well as Sheivas. Fine tank with temple in the middle. Large bell in the gopooram [q.v.], the latter having numerous inscriptions. Car festivals [ratotsavam] in February and July. Weekly fair on Thursday.

SHWETAM (श्वेत - shvéta, *San.*). From (shvit, san. to be white). White.——*Shwetanuddy* (சுவேதநதி - shuvéthanathi, Tam.). From (above + nadí, san. river) ; on account of the limestone [choonam cull] it contains. River ; Salem dist., Ahtoor tal. Rises in the Collimullays and, fed by many torrents converging above Tammamputty, carries off the rainfall of the northern slopes of the Putchamullays. It runs in an easterly direction and then enters Perambalore tolook, Trichinopoly district.——*Shwetaumbaran* (श्वेताम्बर - shvétámbara, San.). From (above + ambara, san. apparel) ; white-robed ; epithet of Jeina [q.v.] mendicants as distinguished from digambaran or sky-clad mendicants. The Shwetaumbarans assert that females can attain nirvaunam [q.v.] or liberation. The Digambarans [q.v.] are more common in Southern india. See vol. I (95) [matam].——*Shyainacam* (श्येनक - shyénaka, San.). See sep. title.——*Shyainam* (श्येन - shyéna, San.). See sep. title.

SHYAINACAM (श्येनक - shyénaka, *San.*). Means small hawk [shwetam]. Buzzards. Buteoninæ, falconidæ [bheroondam], raptores, aves [pacshy, 2], of naturalists [jantoo]. Bill short, broad at base, much curved, cere occupying more than half its length ; wings long ; tarsi long, with broad transverse scales in front and behind ; toes rather short. The species best known to the natives are shown below. For hawks see Shyainam.
——*Dastmal* (دستمل - dastmal, Hind. ; పిల్లిగద్ద - pilligadda, Tel. ; பூனைப்பருந்து - púnaipparundu, Tel.). Title from hindostany. Tel. from (pilli, tel. cat + gadda, tel. kite). Tam. from (púnai, tam. cat + parundu, tam. kite) ; from noiseless flight. Hind. also (pattái), meaning striped ; (girgitmár), meaning bloodsucker + killer. Tel. also (tellachépagadda), meaning white + fsh + kite ; (golpuli), of yerkalas. Title otherwise Pale harrier. Circus swainsonii, buteoninæ. Alias Circus albescens, dalmaticus, pallidus ; Falco herbœcola. Differs from the common harrier, chiefly in the paler plumage, the white throat and breast, and in the banded rump ; comes in at the beginning of the cold season, september to october, and disappears in march or april for the purpose of breeding ; frequents open, stony plains and cultivated ground ; flight usually slow, a few beats alternating with a sailing motion. The same native names are given to Montague's harrier, Circus cineraceus, buteoninæ.——*Tisah* (تیسا - tísá, Hind. ; బుడమగద్ద - budamagadda, Tel.). Tel. from (budama, tel. plant, solanum verbascifolium, linn. + gadda, tel. kite) ; small kite. Title otherwise White eyed buzzard. Poliornis teesa, buteoninæ. Specific name from hindostany. Alias Astur hyder ; Buteo teesa. Brown above, paler and rufescent on the head, with a white eyebrow, beneath white ; flight like that of the kestril [narzee] ; flies low ; not unfrequently runs along the ground ; has a peculiar plaintive cry ; easily domesticated.

SHYAINAM (श्येन - shyéna, *San.*). Means white [shwetam]. Hawks. Accipitrinæ, falconidæ [bheroondam], raptores, aves [pacshy, 2], of naturalists [jantoo]. Bill short, much arched and deeply waved ; wings mostly long ; tail large ; tarsi long,

large scales in front. The species best known to the natives are shown below. For buzzards see Shyainacam.——*Baushah* (باشه - báshak, Ar.; باشه - báshah, Pers.; باشا - báshá, Hind.; ಬಣ್ಣದಡೆಗೆ - bannádadége, Can.; వర్ణపుడేగ - varnapudéga, Tel.; പരുന്തു - parantu, Mal.). Ar. from (bashaka, ar. to seize). Pers. and Hind. from arabic. Can. from (banna, can. color + dége, can. hawk). Tel. from (varna, san. color + déga, tel. hawk). Mal. from (para, mal. to fly). Male bird is:—Hind. (báshin). Title otherwise European sparrow hawk. Accipiter nisus, accipitrinæ. Alias Accipiter dussumierii, fringillarius, nisosimilis, subtypicus. Young yellowish brown above, beneath ochrey white; adult blackish or brownish grey above, white on the eyebrow and nape; adult female differs from the male in being paler and browner above, and in the lower parts being whiter; cold weather visitant coming in regularly about beginning of october, leaving again about february or march; common; trained to falconry.——*Bauz* (باز - báz, Ar., Pers., Hind. and Dec.; డేగ - déga, Tel.; പെരുമ്പുള്ളു - perumpullu, Mal.). Ar. from (bazâ, ar. to stretch out neck for prey). Tel. from (digu, tel. to descend), from swooping on its prey. Mal. from (peru, mal. great + pul, mal. bird). Male bird is:—(jurrah). Title otherwise Goshawk. Astur palumbarius, accipitrinæ. Alias Falco gallinarius. Young bird brown above, feathers edged with paler hue on head, often rusty with dark central spot; nape whitish; wings and tail light brown, latter with an ashy tinge banded with darker brown; beneath rusty white long dark-brown streaks throughout; streak over the eye and cheeks, also white with brown streaks; adult uniform light brown above with greyish tinge; beneath white, cross bands of rich hair or yellowish brown; tail has three conspicuous broad brown bands and a fourth indistinct one near the base; not common; trained to falconry.——*Besrah* (بسرا - besrá, Hind.; ಉರ್ಚಿತ್ಲು - urchitlu, Can.; వశిష్ఠపుడేగ - vashisht'hapudéga, Tel.). Hind. from (be, pers. without + sar, pers. head). Can. from (ûru, can. country + chitlu, can. hawk). Tel. from (vashisht'ha, san. the sage + déga, tel. hawk); superior hawk. Male bird is:—Hind. (dhotí). Title otherwise Sparrow hawk. Accipiter virgatus, accipitrinæ. Alias Accipiter affinis, besra, dussumierii, fringillarius. Young bird dark brown above, tinged with dusky on the cheeks and ears; beneath white; adult bird has above deep and glossy olive brown with blackish or slaty tint; with increasing age the brown of the upper parts become dark slaty, blackish on the head; in the female, after the first moult, the breast is marked with oval light yellow brown drops; adult male differs from female in being more grey on the upper parts; somewhat difficult to train. Another species of sparrow-hawk, Khan besrah or king hawk, is found in jungly country in south arcot and chingleput, bordering on tanjore and trichinopoly; known to the teloogoo shikarries [q.v.] as cansarpoo daiga or bronze-colored hawk.——*Gor besrah* (گور بسرا - gorbesrá, Hind.; ಕೋಗಿಲೆಡೆಗೆ - kógiledége, Can.; కోకిలడేగ - kókiladéga, Tel.). Hind. from (gaurá, hind. male sparrow + besrá, hind. falcon). Can. from (kógile, can. cuckoo + dége, can. hawk), from resemblance to cuckoo [koel] in lower plumage. Hind. also (mánakbesrá); (koteswar), meaning mountain lord. Title otherwise Crested goshawk. Astur trivirgatus, accipitrinæ. Alias Astur cristatus, indicus, palumbarius. Young bird brown above, pale edgings to feathers, eyebrows white, white or rufous about the nape; below white, spotted on the breast, abdomen; flanks with dark brown spots, least numerous in the male; tail pale ashy brown, with dark broad bands; narrow dark line down centre of the chin and throat; adult, upper plumage glossy dark brown, in some with olivaceous tinge, in older birds with dark slaty hue; found in hilly regions; hunts in pairs.——*Shikrah* (شکره - shikrah, Pers.; شکرا - shikrá, Hind. and Dec.; ಜಾಲಿಡೆಗೆ - jálidége, Can.; జాలెడేగ - dzáledéga, Tel.; சின்ன வல்லூறு - shinnavallûru, Tam.). Pers. from (shikár, pers. game). Tel. from (dzálemu, tel. swift motion in a straight line + déga, tel. hawk). Tam. from (shinna, tam. small + vallûru, tam. falcon). Male bird is:—Hind. (chipak). Micronisus badius, accipitrinæ. Alias Accipiter dukhunensis, fringillaroides, scutarius; Astur bifasciatus; Falco brownii, dussumierii. Young bird dark reddish or dusky brown above, feathers edged with rufous, most broadly so in the male; tail light ashy brown with dark bands, beneath white; male has usually fewer spots than the female; adult bird pale ashy grey above, darkest on the head, dusky reddish nape, conspicuous when the head is bent forwards; tail with the two centre feathers and the two outer ones not barred; beneath white, plumage not assumed before fourth or fifth year; very common; general food lizards [chipkalee]; commonly trained to falconry.

SHYAUMAM (श्याम - shyáma, *San.*). From (shyai, san. to go). Dark-blue.——*Shaumay* (சாமை - shámai, Tam.). Little millet. See sep. title.——*Shyaumalatay* (श्यामलता - shyámalatá, San.; دودھی - dúdhí, Hind.; నల్లతీగ - nallatíga, Tel.; പാല്വള്ളി - pálvalli, Mal.). San. from (shyáma, san. dark-blue + latá, san. creeper). Tel. from (nalla, tel. black + tíga, tel. creeper). Mal. from (pál, mal. milk + valli, mal. creeper). San. also (shárivá), meaning of various colors [indian sarsaparilla]; (shyámá), meaning dark-blue [shaumay, tottila]. Tel. also (illukatte), meaning house + twig; (muntagajjanamu); (sahadévichettu), meaning with + sporting + plant; climbing plant [lance-leaved balah, wild jeerah]. Botanically Ichnocarpus frutescens, br., apocynaceæ [vricsham, 87]. Alias Apocynum frutescens; Echites frutescens. Extensive climber; leaves very variable, 2–3 by ½–1½ inches, petiole ¼ inch, cymes 1–3 inches, axillary and in terminal panicles, rusty-pubescent, branches short, trichotomously divided or three-flowered, pedicels longer or shorter than the corolla, calyx-lobes ovate, obtuse or sub-acute, eglandular; corolla about ¼ inch in diameter, purplish, twice as long as the calyx, lobes twice as long as the tube, falcate, acuminate, mouth and margins sparingly bearded; disc-glands, five, erect, slender, capitate, much longer than the hairy ovary; style very short; follicles 3–6 by ⅛ inch, very slender, cylindric, curved, acute; seeds ½ inch, very slender, not peaked; coma scanty, white. The roots are somewhat similar in appearance to those of hemidesmus [indian sarsaparilla], but have not the same coumarin odour; the bark is of a dark brown color, and adheres closely to the wood, which is much harder, and differs in structure from that of hemidesmus in having a large central pith; the roots are seldom branched, but here and there a few fine fibres are given off; they are almost tasteless. For the properties and uses of this plant, see Hemidesmus [indian sarsaparilla].——*Shyaumay* (श्यामा - shyámá, San.). Means dark-blue, from color. A form of Doorga [q.v.] worshipped by shauctas [cauly, yaumaulamma]. For birds of this name see sep. title.

SHYAUMAY (श्यामा - shyámá, *San.*). From (shyáma, san. dark-blue) [shyaumam]. Robins. Saxicolinæ, sylviadæ [calacuntam], dentirostres, insessores, aves [pacshy, 23], of naturalists [jantoo]. The species best known to the natives are shown below.——*Dayar* (دئیر - daiyar, Hind. and Dec.; త్సారలగాడు - tsáralagádu, Tel.; ഭൂമികുലുക്കി - bhúmikulukki, Mal.). Tel. from (tsára, tel. stripe + gádu, tel. personal suffix). Mal. from (bhúmi, mal. earth + kulukku, mal. to shake); from sound. Tel. also (peddanallanchi), meaning large + robin. Title otherwise Magpie Robin. Copsychus saularis, saxicolinæ. Alias Dahila docilis; Gryllivora intermedia. Caged for its song, as also for its pugnacious qualities.——*Malabar robin* (شاما - shámá, Hind. and Dec.; పొడనల్లంచి - podanallanchi, Tel.). Tel. from (poda, tel. variegated color + nallanchi, tel. robin). Tel. also (tókanallanchi), meaning tail + robin; from long tail. Kittacincla macroura, saxicolinæ. Alias Gryllivora longicauda. Almost always solitary; song, chiefly heard just before and after sunset, of great power, surpassed by no indian bird. In confinement imitates notes of other birds, and of various animals with ease and accuracy; caught in great number and caged for its song; usually fed on paste made of parched chenna [varagoo] mixed with the yolk of hard-boiled eggs, few maggots or insects are given occasionally; will also eat pieces of raw meat in lieu of insects [poochy].——*Washer-woman robin* (کلچوری - kalchurí, Hind. and Dec.; నల్లంచి - nallanchi, Tel.; வண்ணாத்திக்குருவி - yannáttikkuruvi, Tam.). Title from habit of jerking up its tail like a washer-woman in washing. Hind. from (kálí, hind. black + churí, hind. sparrow). Tel. from (nalla, tel. black + latsanamu, tel. beauty). Tam. from (vannátti, tam. washer-woman + kuruvi, tam. small bird). Title otherwise Indian black robin. Thamnobia fulicata, saxicolinæ. Alias Thamnobia leucoptera. Mostly found about villages, pagodas [q.v.], old buildings, and mud walls, also common on rocky and stony hills, and in groves of palmyra [q.v.] or date palms [kharjooram]. Male has sweet but small song; occasionally caged.

SI (सि - si, *San.*). To bind.—*Saitoo* (सेतु - sétu, San.; திருவணை - tiruvanai, Tam.). San. means bund. Tam. means holy bund. The ridge of rocks between Ceylon and the southern extremity of the Coromandel coast [rameshwaram]; hence chief of Ramnaud or Maravar [q.v.] derived their title of Saitoopaty or lord of the bridge. Asaitookhandam or Imasaitooparyantam are common phrases to express india from Himalayas to Rameshwaram. See vol. I (2).——*Saitoopaty* (சேதுபதி - shéthuppathi, Tam.). From (sétu, san. bund + pati, san. lord). Title of the principal chief of Marava [q.v.] tribe, means guardian of the approaches at Adam's bridge to Rameshwaram. First said to have been conferred by Rama on the ancient Marava race, who became lords paramount of southern india till they were overborne by coorumbas [q.v.]. At first independent, then brought under subjugation by naicks [q.v.], regained independence on subversion of naick dynasty, and now zemindars [q.v.]. Had a coinage [naunyam] of their own; and their device was monkey [bandar] and garoodan [charitram, garoodan]. Vol. I (124), 56. Also Hindoo 2nd or pers. name [peyar].——*Senaupaty* (सेनापति - sénápati, San.). From (sená, san. army + pati, san. lord). A general; name of Soobramanyan [q.v.].——*Senay* (सेना - séná, San.). From (si, san. to bind). Army [dandam, dandoo, paday, shervay].——*Synigoonta* (సైనిగుంట - shyánigunta, Tel.). From (sainya, san. army + gunta, tel. tank). Village, Ghaut; North arcot dist., Goodiyattam and Pulmanair tals.; lat. 13° 05'; long. 78° 52'; from Chittore W.S.W. 21 miles; from Goodiyattam N.N.W. 9 miles. The pass [ghaut] leads from Goodiyattam talook to Pulmanair, where it unites with the road from Mogily.

SIALLY (سيالى - siyálí, *Hind.*; దారిగుమ్మడి - dárigummadi, *Tel.*). Tel. from (dári, tel. way + gummadi, tel. pumpkin). Hind. also (biláikand); (bidaríkand); (badarbillí); (sural). Title otherwise Daury goommady, Tuberous french honeysuckle. Botanically Pueraria tuberosa, dc., leguminosæ [vriesham, 48]. Alias Hedysarum tuberosum. Stems shrubby, the branches finely grey downy; stipules minute, deciduous, cordate-ovate; leaflets membranous, roundish, ½-1 foot long, green, glabrescent above, densely clothed with whitish adpressed hair beneath; flowers in dense, virgate, leafless, often panicled racemes, reaching 6-9 inches long; pedicels very densely fascicled; calyx ⅛-¼ inch long, densely silky; corolla short, blue, not quite twice the calyx; limb of standard orbicular, distinctly spurred; pod 2-3 inches long, membranous, flat, three to six-seeded, clothed with long grey silky bristly hairs. The tubers vary in size and shape; pyriform or spindle-shaped, ranging in size from a small pear [amrood] to a large turnip [shalgham]; developed upon the roots of the plant, and are composed of the woody layers of the root spread out and separated by a large addition of soft cellular tissue; the external surface of the tuber is brown and scurfy from exfoliation of the tuberous coat; the cut surface is white and spongy, and shows several concentric rings of woody fibres, and numerous well-marked medullary rays; the taste is somewhat acrid, slightly bitter, and very mucilaginous; the color is not affected by ferric chloride or solution of iodine. Root has acrid properties, and is used medicinally as a cataplasm to reduce swellings of the joints.

SICCA (سكه - sikkah, *Hind.*). From persian. Stamp, impression. Applied as an adjective to the silver currency of the moghuls, whose Sicca rupee [q.v.] was the general standard of value until superseded by the Company's rupee [q.v.]. The Sicca rupee as last coined weighed 192 grains, of which 176 were pure silver; its exchange value was about 2*s.* 2*d.* The Company's rupee, which introduced uniformity of coinage over British india in 1835, contained only 165 grains silver. Hence the Sicca bore to the Company's rupee the proportion of 16 : 15 nearly. See vol. I, 615. Sicca sunnud is a stamped grant [sunnud].

SIDDY (సిద్ది - siddi, *Can.*). Liquid measure. 1½ coodtays = 1 siddy [alavay, 4c]. Approximate actual value, 1 siddy = 15¾ cubic inches. S. Canara. Compare Teloogoo chitty, Tamul ollack. See vol. I, 609; II, 508.

SIDHOUT (సిద్ధవట్టము - siddhavattamu, *Tel.* siddhavattam *). From (siddha, san. hermit + vata, san. banyan tree, ficus bengalensis, linn.) [saudh]. San. name (dakshinakáshí), meaning southern benares [tencaushy].—(1) Talook, Cuddapah district. Tahsildar's pay Rs. 150. Area 606 square miles. Length from north to south from 19 to 27 miles, and breadth from east to west from 18 to 30 miles. Population 66,810. Language Teloogoo. E. of district. Bounded north by Budwail talook, east by Atmacore and Raupore talooks of Nellore district, south by Poollampett talook, south-west by Royachoty talook, and west by Cuddapah talook. The hills are the Lunkamalas, and the Mullayacondah and Palcondah ranges. The cultivable ground is found only in two valleys running parallel from the north. Madras railway traverses southern portion. Half the cultivated land is good, and a quarter middling. The best land is in Pennair valley, where water is obtainable by sinking wells. Except in valleys but little land is cultivated, owing to the vast masses of hills. Soil is divided into red, sandy, black, salt and stony. In addition to ordinary grains produced, the principal products are indigo [q.v.] and cotton [q.v.] and turmeric [country saffron]. Indigo goes to Madras and turmeric to Bombay. In the eastern portion the Cheyair forms a junction with the Pennair. The Saglair flows through the northern portion, previous to its junction with the Pennair. The Toommalair flows through the eastern portion down the Wobalam valley, and joins the Pennair below the junction of the Saglair. There are no river channels [q.v.], and the only benefit derived from the four rivers is the moisture of the sub-soil in the valleys. Camping grounds, Sidhout and Vontimittah. Places of archæological interest :—Goondlamoola, Gungaperore, Joty, Pennaperore, Punchalingaulacona, Sidhout, Vengopaulsawmy temple, Vontimittah, Wobalam, Wogore. The leading places, &c., in the talook are the following.——*Aurapoya canama* (ఆరేపాయకనము - árepáyakanama, Tel.). From (áre, tel. bauhinia racemosa, lam. + páya, tel. portion + kanama, tel. pass). Ghaut; from Cuddapah E. 12 miles; from Sidhout N. 3 miles. In the Lunkamalas.——*Bagarapett* (బాకరాపేట - bákarápéta, Tel.). From (bhákara, tel. proper name + péta, tel. suburb). Village, Hamlet of Peddapully; pop. 2,724 including Peddapully; acres 6,022 including Peddapully; lat. 14° 25′; long. 79° 00′; from Cuddapah E. 10 miles; from Sidhout S. 4 miles.——*Bandicanama* (బండికనమ - bandikanama, Tel.). From (bandi, tel. cart + kanama, tel. pass). Ghaut [q.v.]. Between Sidhout and Cuddapah talooks.——*Capardeshlacona* (కపర్దేశ్వరకోన - kapardéshvarlakóna, Tel.). From (kaparda, san. the long locks of shiva + íshvara, san. lord + kóna, tel. ravine). Valley. In Lunkamalas. Shiva temple ruined and a waterfall.——*Cheyair* (చెయ్యేరు - cheyyéru, Tel.). See sep. title.——*Cooroogoontapully* (కురుగుంటపల్లి - kuruguntapalli, Tel.). From (kuru, tel. small + gunta, tel. tank + palli, tel. village). Village; pop. 3,498; acres 17,078; lat. 14° 24′; long. 79° 12′; from Cuddapah E.S.E. 23 miles; from Sidhout E.S.E. 13 miles.——*Cottore* (కొత్తూరు - kottúru, Tel.). From (kotta, tel. new + úru, tel. village). Village; pop. 1,732; acres 21,010; lat. 14° 28′; long. 79° 20′; from Cuddapah E.S.E. 31 miles; from Sidhout E.S.E. 21 miles.——*Joty* (జ్యోతి - jyóti, Tel.). Means light. Village; pop. 476; acres 11,276; lat. 14° 29′; long. 78° 58′; from Cuddapah E. 6 miles; from Sidhout W.N.W. 4 miles. On the Pennair. A subterranean passage said to run from a temple to the Nityapoojacona temple in the Lunkamalas. Temple now neglected, and half buried in sand. A mile west are two ruined pagodas [q.v.] of Narsimhasawmy.——*Lunkamala* (లంకమల - lankamala, Tel.). See sep. title.——*Nityapoojacona* (నిత్యపూజకోన - nityapújakóna, Tel.). From (nitya, san. daily + pújá, san. worship + kóna, tel. ravine). Valley. In the Lunkamalas. Remarkable for a huge overhanging rock able to afford shelter to 10,000 people, and a small pagoda [q.v.]. Festival in Caurtigay [mausam] or November and on Shivarautry [pundigay, 6a]. A water-fall in valley [aroovy].——*Pennair* (పెన్నేరు - pennéru, Tel.). See sep. title.——*Punchalingaulacona* (పంచలింగాలకోన - panchalingálakóna, Tel.). From (pañcha, san. five + linga, san. lingam + kóna, tel. ravine); from five lingams, discovered in a cave here. Sanscrit name (pañchalingáchala), meaning five + lingam + mountain. Valley. In the Mullayacondahs. Resorted to by pilgrims, especially on Mondays in Caurtigay [mausam] or november. In the roof of the cave are stalactites.——*Ramaupooram* (రామాపురము - rámápuramu, Tel.). From (ráma, san. the god + pura, san. town). Village; pop. 2,559; acres 14,389; lat. 14° 37′; long. 79° 12′; from Cuddapah E.N.E. 24 miles; from Sidhout N.E. 17 miles.——*Saglair* (సగిలేరు - sagiléru, Tel.). See sep. title.——*Sidhout* (సిద్ధవట్టము - siddhavattamu, Tel.). See below.——*Someshwaram* (సోమేశ్వరము - sóméshvaramu, Tel.). See Somashila.——*Soonkesala* (సుంకేసుల - sunkésula, Tel.). See sep. title.——*Toommalair* (తుమ్మలేరు - tummaléru, Tel.). See sep. title.——*Veligonda* (వెలిగొండ - veligonda, Tel.). See sep. title.——*Vengopaulsawmicondah* (వేణుగోపాలస్వామికొండ - vénugópálasvámikonda, Tel.). From (vénugópála, san. the cowherd krishna playing upon a flute + svámí, san. lord + konda, tel. hill). Hill; lat. 14° 34′; long. 79° 01′; from Cuddapah E.N.E. 12 miles; from Sidhout N. 7 miles. Vengopaulsawmy pagoda.——*Vontimittah* (ఒంటిమిట్ట - vontimitta, Tel.). See sep. title.——*Yellacondah* (ఎల్లకొండ - yellakonda, Tel.). From (yella, tel. boundary + konda, tel. hill). Hill.——*Yellampett* (ఎల్లంపేట - yellampéta, Tel.). From (yallamma, tel. proper name + péta, tel. suburb). Village; lat. 14° 24′; long. 79° 15′; from Cuddapah E.S.E. 27 miles; from Sidhout E.S.E. 17 miles. At confluence of Cheyair and Pennair. Inhabited by rich Cumma [q.v.] and Balije [q.v.] merchants. Temple and festival. Trade in indigo [q.v.] and thread [nool] dyed blue [shauyam].—(2) Town, Divisional and Talook head-quarters, Hills; Cuddapah dist., Sidhout tal.; pop. 3,446; acres 6,720; lat. 14° 28′; long. 79° 01′; from Cuddapah E. 10 miles; from Madanapully N.E. 70 miles; from Madras N.W. 131 miles. Of some importance and considerable sanctity. Owing to resemblance in its position on left bank of Pennair, and to relative position of some neighbouring villages and rivers, is called Dacshina caushy as above noted. Originally dependency of Chitwail rajah, and held by a member of the Matly family. Subsequently, under the Nizam's dynasty, residence of the Pataun nawaub, and joined to the province of Cuddapah. This dynasty was put an end to by Hyder ally and the fort was pulled down. After Colonel Munro's departure in 1807, Sidhout was for some time the residence of the Collector; but the head-quarters were subsequently moved to Cuddapah. The fort shows traces of Hindoo and Mahomedan architecture. It was originally founded by Ananda rauz, a relative of the reigning Chitwail rajah, in 1225 of Shalivahanan [q.v.]. Famed for the excellence of its melons [common melon], the cultivation of which is carried on during January, February and March in the dry sandy bed of the Pennair. There are seven different kinds of melons.—(3) Hills. These are a continuation of the great clayslate and sandstone [manal cull] range of the Nullamullays that commences in the Nizam's dominions, north of the Kistna, and appears to terminate to the S.E. at Nagary. The Pennair flows through them by a gap similar to that by which the Kistna finds its way through them farther north. Sidhout is situated in this pass on the left bank of the river, along which the road from Cuddapah lies, after crossing the rocky belt of the Nullamullay range. This valley is irrigated by the Pennair, and full of cultivation; shady topes [q.v.] and mahomedan makauns are interspersed throughout its extent. In the hills there is a variegated kind of sandstone with both waving and acutely bent lines of alternate red and white, resembling on a large scale those in agate [akeek]. Many of the pillars in the fort gates are constructed of it, and have the appearance at a distance of a curiously veined wood. It is stated that during the Moghul government diamonds [vajram] were dug at a place in the hills, and also near the village of Darjepully. At the south-eastern base of the Nundicanama ghaut [q.v.] between Cuddapah and Sidhout, flints [teetatty cull] used by the Cuddapah nawaubs [q.v.] were

formerly dug; they lie near the surface in flattish rugged masses imbedded in red soil and angular gravel [kankar]. The subjacent rock is sandstone.

SIFARSH (سفارش - sifárish, *Hind.*). From (sipurdan, pers. to recommend). Recommendation.

SIKH (शीख - shíkha, *Mahr.*). From (shishya, san. disciple); so called as following their gooroos [q.v.]. The name of a religious sect founded in Punjab at the end of fifteenth century by Naunak shah, a hindoo reformer.

SILENT VALLEY (വള്ളഘട്ടം - vállaghattam, *Mal.*). So named by Europeans who first used it as a shooting ground. Malabar dist., Valavanaud tal. Large tract of mountain forest and grass land jenm [q.v.], property of government, situated on western slopes of Coondahs, most inaccessible. Over 70 square miles. At northern extremity of valley lay the Wallaghaut coffee [q.v.] estates now abandoned. The old Sisparra ghaut [q.v.] crosses north end of valley.

SILK (سلک - silk, *Hind.*). Balance [bauky]. Silk bundy is adjustment of balances due to Government.

SILLAH (سلاح - siláh, *Hind.*). Arms [khitaub].——*Sillahdar* (سلاحدار - siláhdár, Hind.). One who wears arms; but particularly a soldier of irregular cavalry, who provides his own arms and horse.

SIMBOLEE (سمبولی - simbolí, *Hind.*). Oil of Murraya kœnigii, spr., Curry-leaf tree.

SIMHAM (सिंह - simha, *San.*; شیر - sher, *Hind.*). San. from (hims, san. to hurt). Lion. The lion was once prevalent in S. india; now confined to Cuttywar. Personal name Sing [q.v.] derived from this. Shere [q.v.] and Hyder [q.v.] also mean lion, Shere being applied both to the tiger [pooly] and the lion. There is a Tamul proverb:—மிருகங்களில் ஆனை பெரிது, அதிலும் சிங்கம் வலிது—"among beasts an elephant [q.v.] "is the biggest and a lion the strongest." A lion was the signet of the Cadamba [q.v.] kings [raj]. For sign of the zodiac see Raushy. Simham is a suffix in proper names; as Narsimhan, Ramasimham [peyar].——*Seilan* (سیلان - sailán, Hind.). Arabic form of malay or dravidian Ceylon.——*Serendib* (سراندیب - sarandíb, Hind.). Arabic corruption of the sanskrit Simhala [q.v.] dweepam or Ceylon in the earlier middle ages. Appears also as Selandib and Sarandeep.——*Shingan* (சிங்கன் - shingan, Tam.). From (simha, san. lion). Hindoo 2nd or pers. name. Feminine form is Shingy. Common among lower orders [peyar].——*Shingapermaul* (சிங்கப்பெருமாள் - shingapperumál, Tam.). From (above + perumál, tam. vishnu, the great god), vishnoo in his narsimhan [q.v.] or man-lion avatar [q.v.]. Hindoo 2nd or pers. name [peyar].——*Shingaroyacondah* (సింగరాయకొండ - shingaráyakonda, Tel.). From (singaráyadu, tel. proper name + konda, tel. hill). Sanscrit name (simháchala), meaning lion + hill. Shrotriem village; Nellore dist., Cundoocore tal.; pop. 933; acres 3,115; lat. 15° 14′; long. 80° 04′; from Cundoocore E. 9 miles; from Nellore N. 54 miles; from the sea W. 4 miles. Between the Munnair and Palair. Ancient Vishnoo temple to Narsimhasawmy. Through a cave temple on the hill said to be a passage to the adjacent pagoda [q.v.], but the entrance is blocked by a large stone image. Festival of Varauhasawmy held in April. Private choultry [q.v.]; traveller's bungalow [q.v.]. Two temples to Narsimhasawmy and Varauhasawmy. Worship is chiefly to the latter. The stones found in the neighbouring hill, partly red and partly white, are said to have been so made by Seetay [q.v.], to answer the purpose of Cooncoomam and Pasoopoo [country saffron].——*Simhalam* (सिंहल - simhala, San.). From (simha, san. lion). Sanscrit version of malay or dravidian Ceylon.——*Simhastam* (सिंहस्थ - simhast'ha, San.). From (above + st'ha, san. to stand). The time during which Jupiter [brihaspaty] is in sign [raushy] Leo; inauspicious, and in it marriages are prohibited.——*Simhauchellam* (సింహాచలము - simháchalamu, Tel.). From (above + achala, san. hill); resembling a lion couchant. Sanscrit name (simhádri), meaning same. Village, Hill, Place of pilgrimage; Vizagapatam dist., Vizagapatam division; pop. 2,254; lat. 17° 46′; long. 83° 18′; from Vizagapatam N.N.W. 6 miles; from the sea W. 7 miles. Remarkable temple. The shrine, picturesquely situated in a wooded glen containing springs and cascades, is to the varauha [q.v.] incarnation [avatar] of Vishnoo [q.v.]. Improved by the Gajapaty [q.v.] kings of Orissa 600 years ago. About 200 years ago endowed by the Poosapauties [q.v.]. Now in charge of Maharajah of Vizianagram, who has a house and rose [gool] garden with fountains. Maharajah has built a choultry [q.v.]. In the temple is the Cuppa stambham or Frog's pillar. It is hollow at the upper end, caused by a frog issuing therefrom. Revered by barren women, who embrace it and pour gifts before it. Half way up hill is gateway called Hanoomadwauram. Much carving defaced by Mahomedans. Alasauny peddanna records a visit to Simhauchellam made by Krishnaroya. Picnics to this spot by the English of Waltair [aroovy].——*Simhausanam* (सिंहासन - simhásana, San.). From (above + ásana, san. seat). Throne with figures of lions carved on supports. But there is also lotus [nelumbo] or pudma simhausanam, elephant [q.v.] or gaja simhausanam, conch shell [chunk] or shunkha simhausanam, goose [hamsam] or hamsa simhausanam, antelope [mrigam] or mriga simhausanam, horse [ghorah] or haya simhausanam, &c.——*Sing* (سنگھ - singh, Hind.; సింగు - singu, Tel.). A lion; name borne by military castes. Title of the Rajpoots [q.v.] and Sikhs [q.v.]. Hindoo third name [peyar].——*Singapore* (سنگاپور - singapúr, Hind.). Means lion + town. Island and town at the southern extremity of the Malayan peninsula [straits]. Compare:—Æschynomene aspera, singapore bat plant; Arenga saccharifera, singapore sago; Cedrela toona, singapore cedar.——*Singhala dweepam* (सिंहलद्वीप - simhaladvípa, San.). From (simhala, san. ceylon + dvípa, san. island). Ceylon [q.v.].

SINJID (عناب - unnáb; *Ar.*; سنجد - sinjid, *Pers.*). Title from persian. Ar. from (anuba, ar. sprightly), from appearance of fruit. Ar. also (arák). Pers. also (sinjidijíláni), meaning the tree growing in jeelaun in persia. Greek παλίουρος. Title otherwise Common zizyphus, Jujube, Long-plum, Round plum. Botanically Zizyphus [badary] vulgaris, lamk., rhamneæ [vricsham, 41]. Alias Zizyphus flexuosa. Shrub or small tree, with rigid spreading boughs and stiff branches, which are often unarmed, the whole plant quite glabrous; prickles usually geminate, the straight one often over 1 inch long, stout; flowers few, fascicled in the axils of the leaves; petals cucullate; disk thin, obscurely five-lobed; ovary two-celled, styles two, united to the middle; fruit globose or oblong, succulent, red or black, shining. Fruit has thin rind like that of an apple [seb], and bears a stone in the centre; between stone and rind is a crisp, refreshing substance like that of a juicy apple, but with no very marked flavor. The dried fruit which comes from china is from 1–1½ inch long and ¾ inch broad; skin red, much shrivelled; pulp adherent to the stone, spongy, sweet and yellow; stone $\frac{7}{10}$th inch long, very hard and rugose, apex sharp-pointed; shell very thick; seed oblong, flat, of a chestnut color, 4–10 inch long and $\frac{2}{10}$th inch broad. The fruit which comes from the persian gulf is somewhat smaller. This shrub is said to be the thorn from which Christ's crown of thorn was made. The bark of the tree is used medicinally to clean wounds and sores, the gum in certain affections of the eyes, and the leaves when chewed destroy the power of the tongue to appreciate the taste of disagreeable medicines. From pulp is made the confection sold by chemists under the name of jujubes. Two varieties; tree that bears the oval fruit has oval leaves, one that bears the round fruit has round leaves.

SIPAH (سپاہ - sipáh, *Hind.*). From (asp, pers. horse). An army [dandam, dandoo, paday, shervay].——*Sepoy* (سپاهی - sipáhí, Hind.). From (sipáh, pers. an army). Through portuguese. A foot soldier, especially a native Indian, disciplined and dressed in the European style, as distinguished from a British soldier.——*Sibbundy* (سیبندی - sibandí, Hind.). From (above + bandí, pers. recruitment). Militia for garrisons of forts, guard in towns and villages, and collection of revenue. So an establishment of clerks, peons, &c.

SIRAUJ (سراج - siráj, *Hind.*). From (saraja, ar. to adorn). Lamp [chiraugh]. Title of the prophet. Part of lacab; as Sirauj ood deen, lamp of the faith [ism].

SIRAUT (صراط - sirát, *Hind.*). From arabic. Road; a bridge extended over the midst of hell [dozak], which according to Mahomedan belief is sharper than a sword and thinner than a hair, and across which the Moslems [q.v.] pass into paradise [bheest].

SIRISSA (शिरीष - shirísha, *San.*; سرس - siris, *Hind.*; வாகை - vágai, *Tam.*). Title from sanscrit through hindostany. San. from (shrí, san. to break); from brittle branches, also medicinal. Tam. from (vágu, tam. beauty). Botanically the Albizzia genus, leguminosæ [vricsham, 48]. Large trees spread through the tropics of the old world; leaves bipinnate; flowers in globose heads; pods large, thin, flat, strap-shaped, straight. The species best known to the natives are shown below.——*Common sirissa* (शिरीष - shirísha, San.; मोठाशिरस - mót'háshirasa, Mahr.; سلطان الاشجار - sultánulashjár, Ar.; درخت زکریا - darakhtizakariyáh, Pers.; سرس کا پر - sirisképer, Hind.; سرش کا جھاڑ - sirishkájhár, Dec.; ಬಾಗೆ - bâge, Can. and Too.; దిరిసెన - dirisena, Tel.; ଶିରିଷ - tiniya, Oor.; വെൾവാക - velváka, Mal.; මාරා - márá, Singh.; காட்டுவாகை - káttuvágai, Tam.). San. from (shrí, san. to break), from brittle branches or dispersing swellings, &c. Mahr. from (mót'há, mahr. large + shirasa, mahr. albizzia). Ar. from (sultán, ar. king + shajr, ar. tree). Pers. from (darakht, pers. tree + zakariyá, ar. zacharia). Hind. from sanscrit. Dec. from hindostany. Tel. from sanscrit. Mal. from (vel, mal. white + váka, mal. albizzia odoratissima, benth.); from small white flowers. Tam. from (kádu, tam. forest + vágai, tam. albizzia). San. also (munipriya), meaning dear to sages; (prit'hushringí), meaning large-branched; (mridupushpa), meaning soft flowered; (kapítana), meaning monkey gladdening [wild mango]; (shukapushpa), meaning parrot flower; (shukapriya), meaning dear to parrots; (shukadruma),

meaning parrot tree. Hind. also (sirijkájhár); from corruption. Can. also (kadache), meaning escape from danger; (kalbághi), meaning stone + the tree; (bénga), properly pterocarpus marsupium, roxb. [vengay]; (bághi). Tel. also (telladirisena), meaning white + the tree; (chinduva), meaning beautiful; (girisemu), by corruption from sanscrit. Oor. also (sirisha). Mal. also (nenméni), meaning rice-body. Tam. also (velvéngai), meaning white + tree, pterocarpus marsupium, roxb.; (vágai), meaning beautiful; (shirídam), from sanscrit; (adukkuvágai), meaning pile + the tree, dense spread of branches; (periyavágai), meaning large + the tree. Title otherwise Egyptian acacia, Forest vaugay, Large vaugay, Parrot tree, Sirios, Siris acacia, Sirissa neem, Sultan's tree, White-flowered sirissa. Botanically Albizzia [sirissa] lebbek, benth., leguminosæ [vricsham, 48]. Alias Acacia lebbek, serissa, sirissa, speciosa; Albizzia latifolia; Mimosa scrissa, sirissa, speciosa. Serissa from sanscrit through hindostany. Tree, 30–40 feet, unarmed; with dense wide spreading head; young branches flexuose; leaves bipinnated; pinnæ one to four pair; leaflets four to nine pair, obtuse, oval, glabrous, unequal; peduncles axillary, each with a globular head of flowers on short pedicels, one to four together; calyx long, tubular; petals five, united to beyond the calyx; stamens very long, monadelphous; legumes flat and thin, remotely eight to ten-seeded; flowers small, white, fragrant especially at night; of rapid growth; puts leaves just before hot season, flowers soon after. Gives gum [gond] not soluble in water, but merely forming a jelly; resembles gum-arabic [q.v.]. Seeds form part of an anjanam [caujal] for ophthalmic diseases; oil [yennay] from seeds is useful in leprosy [cooshtam]; bark applied to injuries to the eye; gum in pharm. non-officinal. Leaves and twigs are good fodder. Good for avenues [shaulay], but branches are brittle and suffer in wind; bark used in tanning [chamrah]. Timber hard and durable, light reddish-brown color, darker veins, not liable to warp or crack; used for naves of wheels, pestles and mortars, picture frames, furniture, parts of boats, &c., and the heart-wood makes good charcoal [adooppkary].——*Dark sirissa* (कृष्णशिरीष - kríshnashirísha, San.; ಸುಜ್ಜಲುಮರ - sujjalumara, Can.; చికిరేణి - chíkiréni, Tel.; உஞ்சமரம் - úñjamaram, Tam.). Title from color of wood. San. from (krishna, san. black + shirísha, san. albizzia lebbek, benth.). Can. from (ujjala, can. shining + mara, can. tree). Tel. from (chíki, tel. black + rénu, tel. zizyphus jujuba, lamk.). Tam. from (uriñju, tam. to absorb + maram, tam. tree); from absorbing oil from hair as a sponge. Can. also (belkambi), meaning growing + branch, with the side branches on. Tel. also (nallarégu), meaning black + zizyphus jujuba, lamk. Tam. also (arappumaram), meaning mohwah seed oil-cake tree, from leaves applied to similar use of washing oil from hair; (usilai), meaning sharpness [biswool]; (turiñjil), meaning to be close; (shurañji), meaning rancid oil + to extirpate, from clearing rancidity; (shíkkirán), meaning washing tree. Title otherwise Black bair, Black jujube, Black sirissa, Chickrainy, Oil-cake tree, Oonjal, Oosilay, Washing tree, Woonja. Botanically Albizzia [sirissa] amara, boivin., leguminosæ [vricsham, 48]. Alias Acacia amara, wightii; Albizzia wightii; Mimosa amara, pulchella. Tree, 30 feet, unarmed; branches terete; young shoots, petioles, and peduncles, and under side of the leaflets clothed with yellowish tomentum; leaves bipinnate; pinnæ eight to ten pair, with a gland on the petiole and between the last pair; leaflets twenty to thirty pair; stipules lanceolate; peduncles solitary or aggregated, long and filiform in the axils of the upper leaves, and racemose from the abortion of the leaves; flowers small yellow in globular heads; corolla five-cleft; stamens long, numerous, monadelphous; legumes flat, thin, broadly linear, three to six-seeded. Grows most rapidly as coppice. Seeds medicinally astringent; oil [yennay] from seeds given for leprosy [cooshtam]; flowers externally applied to eruptions and swellings; leaves useful in ophthalmia; gives to pharm. woonja bark, non-officinal. Leaves are fodder for cattle [maud]. Natives use leaves for washing hair; gives a true gum [gond] of medium quality. Wood dark-brown, mottled, very handsome, strong, fibrous, stiff, close-grained, hard and durable, superior to saul [q.v.] and teak [q.v.] in transverse strength and direct cohesive power. ——*Fragrant sirissa* (शिरीष - shirísha, San.; रानशिरस - ránashirasa, Mahr.; سلطان الاشجار - sultánulashjár, Ar.; درخت زکریا - darakhtizakariyá, Pers.; سرس - siris, Hind.; سرشکاجھار - sirishkájhár, Dec.; ಬಚಾರಿ - bachári, Can.; చిందుగ - chinduga, Tel.; ଟିନିୟା - tiniya, Oor.; വാക - váka, Mal.; සූරියමාර - súriyamárá, Singh.; கருவாகை - karuvágai, Tam.). Title from scent of flowers. San. from (shrí, san. to break); from brittle branches or clearing ulcers and swellings. Mahr. from (rána, mahr. forest + shirísha, san. albizzia). Ar. from (sultán, ar. king + shajr, ar. tree). Pers. from (darakht, pers. tree + zakariyá, ar. zacharia). Hind. from sanscrit. Dec. from hindostany. Tel. from (chennu, tel. beauty) [stone sirissa]. Mal. means beauty. Tam. from (karumai, tam. blackness + vágai, tam. albizzia). Mahr. also (shirasa), by corruption from sanscrit. Can. also (pullibáge), meaning spot + the tree, albizzia lebbek, benth. Tel. also (telasu); (yerrachinta), meaning red + tamarindus indica, linn., from brown wood. Mal. also (karintakara), meaning black + cassia tora, linn. Tam. also (katturiñjil), meaning stone + albizzia amara, boiv. [stone sirissa]; (shilaiyúñjamaram), meaning stone + albizzia amara, boiv.; (vágai), meaning beautiful. Title otherwise Fragrant acacia, Red tamarind, Vaugay. Botanically Albizzia [sirissa] odoratissima, benth., leguminosæ [vricsham, 48]. Alias Acacia lomatocarpa, marginata, odoratissima; Albizzia micrantha; Mimosa marginata, odoratissima. Deciduous tree, 30–40 feet, unarmed; leaves bipinnated; pinnæ three to four pair; leaflets ten to forty pair, narrow, oval, oblique, glabrous, pale on the under side; panicles terminal and axillary, the ultimate divisions cymose, or somewhat umbellate; heads of flowers small, globose; stamens monadelphous; legume flat, thin, thick-margined, about ten-seeded; flowers pale yellow, very fragrant; flowers in hot season; grows rapidly; common. Gives dark brown gum [gond] in rounded tears, tasteless, and soluble in water; resembles babool [q.v.] gum. Juice of bark applied externally in leprosy [cooshtam] and ulcers. Leaves used for fodder. Wood is hard, coarse-gained, equal to teak [q.v.] in strength, of a dark reddish-brown or brown color, and takes a good polish; much used for building and cabinet purposes, naves and felloes of wheels, &c.——*Hill sirissa* (سفید سرس - sufedsiris, Hind.; ಚಿಕುಲ್ಮರ - chikulmara, Can.; తెల్లశాపర - tellasápara, Tel.; கொண்டவாகை - kondavágai, Tam.). Title from habitat. Tel. from (tella, tel. white + sápara, the tree so called). Tam. from (konda, tel. mountain + vágai, tam. albizzia). Tel. also (pedpaççeru), meaning large + tree, dalbergia paniculata, roxb.; (tellachinduga), meaning white + albizzia odoratissima, benth. Title otherwise Doon sirios tree. Botanically Albizzia [sirissa] procera, var. elata, baker, leguminosæ [vricsham, 48]. Alias Acacia elata; Mimosa elata. Large tree; pinnæ three to six pair; leaflets six to ten pair, sub-sessile, opposite, oblong, emarginate, smooth on both sides; petioles with a ridge on the upper side and one large oblong concave gland near the base, and generally one between the last one to three pair of leaflets; panicles axillary, generally compound, composed of several pedicelled globular heads of white flowers; legume linear, pointed, smooth, leafy; six to eight-seeded; flowering in may and june; the timber is of good quality. Bark used in tanning [chamrah]. Timber straight, lengthy, and of large girth; when seasoned, it floats in water; wood red, hard and durable.——*Stone sirissa* (سرس - siran, Hind.; ಬಾಗೆ - báge, Can.; చిందుగ - chinduga, Tel.; කබල්මාරා - kabalmárá, Singh.; கற்றுரிஞ்சில் - katturiñjil, Tam.). Title from quality of wood. Tel. from (chennu, tel. beauty) [fragrant sirissa]. Tam. from (kal, tam. stone + turiñjil, tam. albizzia amara, boiv.) [fragrant sirissa]. Tel. also (kondacheragu). Singh. also (hulanmárá). Title otherwise Boomayza, Chindooga, Cubalmara, Stipulated acacia. Botanically Albizzia [sirissa] stipulata, boivin., leguminosæ [vricsham, 48]. Alias Acacia stipulata; Mimosa stipulacea, stipulata. Tree, 40–50 feet, unarmed; leaves bipinnated; young shoots irregularly angled; pinnæ six to twenty pair; petioles tomentose; leaflets numerous, semi-hastate, sides very unequal; peduncles aggregated; panicles terminal and in the upper axils; heads of flowers globose; corolla tubular, five-cleft; stamens very long, monadelphous at the base; legumes thin, flat, glabrous; seeds six to twelve; flowers white and rose-colored. One of the largest of the genus; common, particularly in s. canara; very rapid grower. Gives a gum [gond]. Branches lopped for fodder. Bark gives a dye [shauyam]. Timber strong, compact, stiff, coarse-grained and fibrous, light reddish-brown color, used for building purposes, naves of wheels, &c.

SIRWAIL (చిరువెల్ల - chiruvella, *Tel.* sirvel*). From (chiru, tel. small + velli, tel. stream) [shir].——(1) Talook, Kurnool district. Tahsildar's pay Rs. 150. Area 613 square miles. Population 65,168. Language Teloogoo and Hindostany. S. of district. Bounded N. by Nundiaul talok; E. by Nullamullays; W. by Coilcoontla talook; S. by Proddootore talook, Cuddapah district. Forms the lower portion of the Coondair valley. The E. portion of talook runs parallel to Nullamullays along foot of hills, and is irrigated by small rain-fed tanks [q.v.]. The whole talook is a flat open country. Water found at small depth. The W. half is black-cotton [regar] soil and is within influence of Cuddapah-Kurnool canal, which is here carried over a low ridge throwing water on either side. The E. half, adjoining sandstone [manal cull] hills of Nullamullays, is red ferruginous soil [sevval munn]. It is cut up by stream valleys, filled with fine jungle. The principal tanks in the talook are in Alamore, Boyalcoontla, Chennore, Chinna cambalore, Condamauyapulley, Mittapulley, Moottiaul paud, Peddacambalore, Peroor, Roodravaram, Shreerungapooram, Sirwail, Yaudavanda, Yerragoddinney. Camping grounds:—Chaugulmurry, Deebagoontla, Nullagoontla, Yerragoontla. Products are paddy [q.v.], areca [q.v.], great millet [cholum], italian millet [tinay], raggy [q.v.], horse-gram [q.v.], chillies [q.v.], indigo [q.v.] and cotton [q.v.]. The produce of villages near Nundiaul is carried to Nundiaul market while that of villages near Chaugulmurry is taken to Proddootore and Cuddapah. Indigo manufactories; and indigo is exported to Cuddapah and Madras. Piece-goods, European goods and Chinaware are imported from Cuddapah and Proddootore. Timber is exported to Coilcoontla talook and portion of Cuddapah district. In the villages at the foot of Nullamullays smelting of native iron [anhan]. A good variety of iron ore is obtained from the thin intercalated bands or seams among ferruginous quartz [vencull] of the Nullamullays. The ore worked here is generally a massive shaly iron sandstone

[manal cull]. Weekly markets at Mahadevapooram, Roodravaram and Sirwail. Places of archæological interest :—Ahobalam, Caloogotlapully, Chaugulmurry, Chinna bojanam, Chintacoonta, Digoova ahobalam, Lingamdinney, Mahadevapooram, Pasarapaud, Roodravaram, Zoolapulley. Principal trig. station :—Ahobalam. The leading places, &c., in the talook are the following.——*Ahobalam* (అహోబలం - ahóbalam, Tel.). See sep. title.——*Bauchepully* (బాచేపల్లి - báchepalli, Tel.). From (báchi, can. adze + palli, tel. village). Village; pop. 1,344; acres 3,783; lat. 15° 05′; long. 78° 40′; from Chaugulmurry N.N.E. 9 miles; from Kurnool S.S.E. 63 miles. Timber depôt. Formerly native iron [auhan] manufactory.——*Chaugulmurry* (చాగలమర్రి - chágalamarri, Tel.). See sep. title.——*Chintacoonta* (చింతకుంట - chintakunta, Tel.). From (chinta, tel. tamarind tree, tamarindus indica, linn. + kunta, tel. pond). Tel. also (peddachintakunta), meaning large village, so called. Village; pop. 1,480; acres 7,031; lat. 15° 09′; long. 78° 32′; from Chaugulmurry N.N.W. 15 miles; from Kurnool S.S.E. 54 miles. Temple of Paundarunga sawmy. Irrigated by Cuddapah-Kurnool canal and a tank. Canal bungalow [q.v.].——*Mahadevapooram* (మహాదేవపురం - mahádévapuram, Tel.). From (mahá, san. great + déva, san. god + pura, san. city). Village; pop. 1,200; acres 2,927; lat. 15° 23′; long. 78° 40′; from Chaugulmurry N. 29 miles; from Kurnool S.E. 48 miles. At entrance of W. Nundicanama pass [ghaut]. Weekly fair on Tuesday.——*Moottiaulpaud* (ముత్యాలపాడు - mutyálapádu, Tel.). From (mutyálu, tel. proper name + pádu, tel. village). Village; pop. 1,593; acres 6,422; lat. 15° 03′; long. 78° 39′; from Chaugulmurry N. 5 miles; from Kurnool S.S.E. 65 miles. Former residence of a poligar [q.v.]. Runga naidoo, Cauvalgar [q.v.] of Moottiaulpaud, served under the Vijianugger rajahs with 700 peons [q.v.]. Family now extinct. Mission house.——*Nullamullay* (నల్లమల - nallamala, Tel.). See sep. title.——*Oblapully* (ఓబలపల్లి - óbalapalli, Tel.). From (óbulu, tel. proper name + palli, tel. village). Village; pop. 1,209; acres 2,549; lat. 15° 09′; long. 78° 36′; from Chaugulmurry N.N.W. 12 miles; from Kurnool S.S.E. 57 miles. Country cloths.——*Roodravaram* (రుద్రవరం - rudravaram, Tel.). From (rudra, san. contraction for pratáparudra + pura, san. town). Sanscrit name (rudrapura), meaning shiva + town. Village; pop 2,600; acres 3,740; lat. 15° 15′; long. 78° 39′; from Chaugulmurry N. 19 miles; from Kurnool S.E. 54 miles. Iron-smelting. Ruined Shiva temple built by Prataupa roodran [prataupam] of Warangal, thirteenth century. Comaties [q.v.] largely reside. Weekly fair on Monday.——*Sirwail* (చిరువెళ్ల - chiruvella, Tel.). See below.——*Vakkalair* (వక్కలేరు - vakkaléru, Tel.). From (vakka, tel. branch + éru, tel. river). River. Tributary of Coondair. Rises in Nullamullay about Pacherla, flows through jungles to Mahadevapooram whence it runs S. and receives Bhavanausy near Chaugulmurry and then falls into Coondair. Runs six months in a year.——*Vaumicondah* (వామికొండ - vámikonda, Tel.). From (vámi, tel. hay rick + konda, tel. hill). Hill; lat. 15° 01′; long. 78° 43′; from Chaugulmurry N.E. 7 miles; from Kurnool S.S.E. 69 miles. Near Chintalcheroo.——**(2)** Village; Kurnool dist., Sirwail tal.; pop. 2,729; acres 11,608; lat. 15° 19′; long. 78° 35′; from Chaugulmurry N. 25 miles; from Cumbum W.S.W. 42 miles; from Kurnool S.E. 47 miles; from Madras N.W. 192 miles; from Nundiaul S.S.E. 12 miles; from Pyaupaly E. 53 miles. Former head-quarters of talook. Garden, the favorite resort of late Nawaub of Kurnool. Irrigated by a tank and Kurnool-Cuddapah canal. Weekly fair on Sunday.

SISPARRA (ചിച്ചിപ്പാറ - chiççippára, *Mal.*). From (chíççi, mal. smooth + pára, mal. a rock). Village, Peak, Ghaut; height 6,742 feet; Neilgherry dist., Coondah div.; lat. 11° 12′; long. 76° 29′; from Ootacamund S.W. 22 miles. The peak is the most interesting feature in the western region of the Neilgherries. It stands at the head of the pass [ghaut]. The pass at the south-west angle of the plateau was begun in 1832 and completed in 1838, the Pioneers being employed for the work. Once used as the tappaul [q.v.] line between Ootacamund and the West coast, but abandoned owing to the severity of the climate of the Coondahs. It starts at Sholacull in Nelambore at the base of the hills, and ascends through a wooded ravine for a distance of 11½ miles to the crest of the Coondahs at Sisparra. From this point to Ootacamund the distance is 31½ miles; from Sholacull to Woontore 10 miles, and from thence to Arriyacode, on the Beypore river, 14½ miles. The gradient in parts is very steep. The view from the head of the pass, with the tower-like Sisparra rock on the right, is perhaps the grandest on the hills. There was formerly a bungalow [q.v.] at the place, but it was burnt down some years ago and has not been rebuilt.——*Sisparra creeper* (कालदल - káladala, San.; കാക്കപ്പൂ - kákkappú, Mal.; වල්කොතල - valkotalá, Singh.; காக்காய்ப்பூச்செடி - kákkáyppúççedi, Tam.). San. from (kála, san. dark + dala, san. petals), from dark flowers. Mal. from (kákka, mal. crow + pú, mal. flower). Tam. from (kákkáy, tam. crow + pú, tam. flower + shedi, tam. plant); from dark purple flowers. Title otherwise Crow flower, Smooth torenia. Botanically Torenia asiatica, l., scrophularineæ [vricsham, 95]. Alias Torenia hians, vagans. Diffuse, glabrous or slightly hairy; leaves petioled, ovate or ovate-lanceolate, serrate-crenated; calyx elongated, acute at the base, ribs five, nearly equal or three narrow-winged; corolla more than twice as long as the calyx; appendage of the anterior filaments subulate; flowering in the rainy season. Herbaceous pot-plant; bears small, bell-formed, pale, purple flowers, with a large blotch of dark clear, purple on the lower lobe, sparkling like enamel. Juice of leaves a cure for gonorrhœa. There is a variety hirsuta. Other common species are :—cordifolia, parviflora.

SITAUR (ستار - sitár, *Hind.*). From (seh, pers. three + tár, pers. string). A guitar with movable frets; properly with three strings, sometimes has more [sangeetam].

SIVOY (سوائی - siváí, *Hind.*). Without, extra. Sivoy jumma is extra demand on lands brought to account after the regular Jummahbundy [q.v.] has closed; also stands for temporary or irregular items of revenue [teervay]. See vol. I, 112.

SIYAH (سیاه - siyáh, *Pers.*). Black.—"*a*" Plant first term often joining two genera. Ex., where transl. is of second term:—Carum nigrum (siyáhzírah), cuminum cyminum; Curculigo orchioides (siyáhmúslí), asparagopsis sarmentosa; Nigella sativa (siyáhdánah), seed, (siyáhbiranj), rice. See gloss. paragraphs.—"*b*" Plant second term. Ex., where transl. is of first term:—Carum carui (zírahisiyáh), cuminum cyminum; Justicia gendarussa (panjangushtisiyáh), vitex negundo; Solanum nigrum (angúrrúbáhisiyáh), vitis vinifera + fox. See gloss. paragraphs.—"*c*" Mammal first term. Ex., where transl. is of second term:—Felis caracal (siyáhgosh), ear; Macacus silenus (siyáhbandar), monkey of macacus genus. See gloss. paragraphs.——*Shye* (मसि - masi, San.; نقس - niks, Ar.; سیاهی - siyáhí, Pers. and Hind.; منگسی - mangsí, Malay; ಶಾಯಿ - sháyi, Can.; ಶಾಯಿ - sháyi, Too.; సిరా - shirá, Tel.; മഷി - mashi, Mal.; மை - mai, Tam.). San. from (matsya, san. fish); as originally obtained from cuttle-fish. Pers. from (siyáh, pers. black). Mal. from sanscrit. Ink. Composed of gall-nuts [mauchicoy], copperas [mayil toottam], gum [gond], and logwood, according to purposes. Varieties are printing ink, writing ink, marking ink, indian ink, &c. [mashy, shirah].——*Siyahgosh* (سیاه گوش - siyáhgosh, Hind.). Means black-eared. Same as Caracal.

SMASHAUNAM (श्मशान - shmashána, *San.*). From (shman, san. body + shána, san. resting place). The place where bodies are burned [shoodcaud].

SMRITY (स्मृति - smriti, *San.*; மிருதி - miruthi, *Tam.*). From (smri, san. to recollect). Portion of sanscrit Vedic literature. Recollection, or that which is remembered and handed down by tradition, as distinguished from audition. This is founded on shrooty [q.v.] or direct revelation as its primary basis, and only possesses authority in so far as it is in harmony with such revealed truth. The essence of smrity however is considered to be that it was delivered memoriter by human authors and put into the form of human composition. In its widest acceptation, smrity may be said to include six principal subjects or departments, as follows.—"*a*" Six Vedaungams [q.v.] or limbs for supporting the Vedam [q.v.], or in other words helps to aid the student in reading, understanding, and applying it to sacrificial rites. They are :—Calpam [q.v.], ceremonial directory, comprising rules relating to the vedic ritual and the whole complicated process of sacrifices [yanyam], which rules are called shrowta sootram [q.v.], because they are vedic and relate directly to the application of the muntram [q.v.] and bramhanam [q.v.] portion of shrooty, being especially guides to the bramhanams; Shicshay [q.v.], the science of pronunciation; Chandas [q.v.], metre; Nirooctam [q.v.], exposition of difficult vedic words; Vyaucaranam [q.v.], grammar; Jyotisham [q.v.], astronomy, including arithmetic [ganitam] and mathematics, especially in connection with astrology.—"*b*" The Smarta sootram [q.v.], a comprehensive term for such rules as do not relate to Shrowtam or Vedic ceremonies, which were usually on a grand scale and public in their character; but rather to religious acts of a private and personal kind, falling naturally under two divisions, viz., family or domestic rites, Kriyay, performed at stated periods, and conventional usages and everyday practices, Samayauchauram; on which account these Smarta sootrams must be separated into two classes, Kriyah sootram and Samayauchaurica sootram.—"*c*" The Dharma shastrams [q.v.] or law books, and especially the Laws of Menoo [q.v.], and other inspired law-givers, supposed to have grown out of the Smarta sootrams. The Mitaucsharam [q.v.], a work on inheritance, by Vinyauneshwaran, on the institutes of Yaunyavalcyan [q.v.], is the chief of these in Southern india. There are also several digests, as the Dauyabhaugam or a treatise on inheritance by Jeemoota vauhanan, that by Juggernath, &c.—"*d*" The Itihausams [q.v.] or legendary poems, under which head can be placed as portions of Smrity the two great epic poems called Ramayanam [q.v.] and Mahabhaurat [q.v.], and then for convenience, as following and depending on these, but not as properly smrity, the artificial poems, Cauvyam [q.v.], and erotic poems and the dramas, almost all of which in their subject-matter are closely connected with the two great epics.—"*e*" The eighteen Pooraunams [q.v.] or ancient legendary

histories and traditions, with their train of eighteen inferior Pooraunams or Oopapooraunams [q.v.] and subsequent Tantrams [q.v.].—"*f*" The Neetishastrams [q.v.] or ethical and didactic writings of all kinds, including collections of fables and moral precepts. See vol. I (56).——*Smarta* (स्मार्त - smárta, San.). From (smriti, san. recollection). Traditional. A bramin following the traditional law based on Smrity. Usually applied to the followers of Shuncaracharry [shuncaran]. The great majority of sheiva bramins are smartas. They are divided into two classes according to their profession; Veidicas and Lowkicas or niyogies. The Veidicas are generally employed in performing the vedic ceremonies, and officiate as village and domestic priests [acharry, poorohit]. The Lowkicas are often village curnums [jauty]. See vol. I (76); II, 225.——*Smartacaul* (स्मार्तकाल - smártakála, San.). From (above + kála, san. time). The extreme time to which the memory of man may extend. ——*Smarta sootram* (स्मार्तसूत्र - smártasútra, San.). From (smárta, san. belonging to smriti + sútra, san. aphorism). A portion of smrity [q.v.]. A comprehensive term for such rules as do not relate to Shrowtam [q.v.] or Vedic ceremonies, but rather to religious acts of a private and personal kind falling naturally under two divisions, viz., Kriyay or family or domestic rites performed at stated periods, and Sámayauchauram or conventional usages and every-day practices.

SMUGGLER'S PASS (ഗൂഢച്ചുരം - gúdhachuram, *Mal.*). From (gúdha, san. secret + churam, mal. pass.). Mal. also (kottiyúrchuram), meaning the place so called + pass. Pass [ghaut]; Malabar district, Cottayam talook. From Dindimala to Manattana.

SNAKE (सर्प - sarpa, *San.*). Prefix.——*Snake gourd* (पटोल - patóla, San.). See sep. title.——*Snake root* (सर्पगन्धा - sarpagandhá, San.; چهوٹا چاند - chhotáchánd, Hind.; ಸೂತ್ರನಾಭಿ - sútranábhi, Can.; పాతాళగంధి - pátalagandhi, Tel.; ചുവന്നവില്പൊരി - chuvannávilpuri, Mal.; ඒකාවේරිය - ekávériya, Singh.; சோவன்னமில்பொரி - shóvannamilbori, Tam.). Title from cure against snake bites. San. from (sarpa, san. serpent + gandha, san. smell). Hind. from (chhotá, hind. small + chánd, hind. moon); from its white flowers. Can. from (sútra, san. thread + nábhi, san. poison). Tel. from (pátala, san. pale-red + gandha, san. smell). Mal. from (chuvanna, mal. red + avilpuri, mál. the plant, rauwolfia). Tam. from malayalam. San. also (chandriká), meaning moonlight [elephant shoonday, haleem]; (chandrashúra), meaning moon + the plant, amorphophallus campanulatus, blume; (vasupushpá), meaning having beautiful flower; (charmahantrí), meaning skin destroying; (nandaní), meaning delighting; (pashumédhanakárika), meaning causing flow of urine in cows; (vásara); (káravi), meaning stimulant [black jeerah, oolinja]. Hind. also (chandra), meaning moon [elephant shoonday]. Can. also (chandrika), meaning moonlight; (shivanábhi), meaning shiva + poison; cf. bachnaug. Tel. also (pátalagaruda), meaning pale-red + braminy kite. Mal. also (vanduvázha), meaning beetle residing; (tálúnni), meaning stem + fixed; (amilpori). Title otherwise Indian serpent wood, Pautala gundhy, Red-flowered snake wood, Small moon plant, Snake wood plant, Three-leaved ophioxylon. Botanically Rauwolfia serpentina, benth., apocynaceæ [vricsham, 87]. Alias Ophioxylon serpentinum, trifoliatum. Twining; calyx five-cleft; corolla funnel-shaped, with long tube, thick in the middle, five-cleft, limb oblique; anthers almost sessile inserted in the middle of the tube; leaves three-four-five in a whorl, cuneate-oblong, acute, sometimes drooping; pedicels and calyxes red; drupe black, size of a pea [calauyam], twin or solitary by abortion; nut wrinkled, one-seeded; flowers white, with the tube pale rose-lilac. Common small shrub, two feet high; leaves narrow, lanceolate, smooth, shining green; corymbs of numerous small pure-white flowers on fine coral-red footstalks; fruit shining black; root crooked, tapering, from ½ an inch in diameter downwards; bark soft, corky, marked by longitudinal fissures, light brown; wood brittle, showing rings and medullary rays visible to the naked eye; taste very bitter; odour of the fresh root acrid; the suber upon transverse section presents when magnified the appearance of a piece of honeycomb, viz., alternate rows of long tubular cells and compressed cells; the inner portion of the bark consists of a delicate parenchyma, loaded with starch, and traversed by indistinct medullary rays; the wood is remarkably starchy. Bitter root prescribed medicinally for snake bites and scorpion stings; ordered in decoction, and powder applied externally to the injured part; used also as a febrifuge; also to promote delivery, like ergot of rye; root quoted in pharm., non-officinal. Other common species are:—beddomei, densiflora.——*Snake-stone* (सर्पमणि - sarpamani, San.; مارمهر - mármuhr, Hind.; ಹಾವುಕಲ್ಲು - hávukallu, Can.; పాముఱాయి - pámuráyi, Tel.; വിഷക്കൽ - vishakkal, Mal.; பாம்புக்கல் - pámbukkal, Tam.). Hind. from (már, pers. snake + muhrah, ar. shell). Tam. also (vidakkal), meaning poison + stone. A substance, the application of which to the part where a snake-bite has taken effect is supposed to draw out the poison. Various substances have this reputation. They are usually of a porous kind, and when they have been chemically examined have proved to be made of charred bone or some similar product.——*Snake-wood tree* (کچلا لتا - kuchlálatá, Hind.; నాగముసడి - nágamusadi, Tel.; മൊതിരക്കാഞ്ഞിരം - mótirakkáññiram, Mal.). Title from cure in snake bites. Hind. from (kuchlá, hind. strychnos nux-vomica, linn. + latá, hind, creeper). Tel. from (nága, san. snake + musadi, tel. strychnos nux-vomica, linn.). Mal. from (mótiram, mal. ring + káññiram, mal. strychnos nux-vomica, linn.); from moustache-like tentacles. Tel. also (kausukandíra); (tiga-mushti), meaning creeper + strychnos nux-vomica, linn. Mal. also (cherukáttuvallikkáññiram), meaning small + wild + creeper + nux-vomica. Title otherwise Climbing koochlah, Climbing nux-vomica, Lignum colubrinum, Pao da cobra. Botanically Strychnos [mooshty] colubrina, linn., loganiaceæ [vricsham, 89]. Alias Strychnos bicirrhosa. Climbing shrub; calyx five parted; corolla tubular, with a five parted spreading limb; leaves opposite, from oval to oblong, bluntly acuminate, three-nerved; berries globose, pulpy, many-seeded; tendrils lateral, simple; corymbs terminal, composed of two to three pairs of villous branches; flowers small, greenish yellow; berry as large as an orange [q.v.]; rind yellowish. Stem of great size, often from 8 to 12 inches in diameter; bark ash-colored; few flowered; root is woody and covered with iron-colored bark; yields one sort at least of lignum colubrinum; wood and root contain strychnia; fruit also poisonous. The general structure of the bark resembles that of strychnos nux-vomica [poison nut], but it is of a rusty color, and the small lenticels upon it, instead of being pale, are of a bright rusty brown; the pieces of wood vary much in size, and are more knotty and crooked than those of strychnos nux-vomica [poison nut]; they are often as thick as a man's arm; the texture of the wood is closer, harder and of a deeper color; when touched with nitric acid [shorey ka tezaub] it turns of a reddish orange; under the microscope the zone of stone-cells in the bark is seen to be wider and more irregular than in strychnos nux-vomica, and the cells themselves are bright yellow, and larger. Wood given medicinally in substance for intermittent fevers; root has purgative qualities; wood and root remedy for bite of cobra [q.v.] brayed in rice-water; given in small doses internally and also applied externally; wood also anthelmintic.

SNAKE GOURD (पटोल - patóla, *San.*). Title from length of fruit in common kinds, sometimes tortuous. San. from (pat, san. to encircle). Botanically the Trichosanthes genus, cucurbitaceæ [vricsham, 62]. Scandent herbs; leaves three to nine-lobed; flowers white, large, beautifully fringed; fruit long or roundish, fleshy; seeds flat, irregular shaped, packed in pulp. The species best known to the natives are shown below.—*Bitter snake gourd** (महाकाल - mahákála, San.; कंवडळ - kamvadala, Mahr.; حنظل احمر - hanzaliahmar, Ar.; حنظل سرخ - hanzalisurkh, Pers.; لال اندراين - lálindráyan, Hind.; لال اندراون - lálindrávan, Dec.; ಅವಗೂಡೆ - avagúde, Can.; అవ్వగూడ - avvagúda, Tel.; കാക്കത്തൊണ്ടി - kákkattonti, Mal.; තිත්තහොඬල - tittahondala, Singh.; குறட்டை - kurattai, Tam.). Title from taste. San. from (mahá, san. great + kála, san. black, poison), from dark pulp of fruit supposed poisonous; see below. Ar. from (hanzal, ar. colocynth, citrullus colocynthis, schrad. + ahmar, ar. red), from extreme bitterness of fruit. Pers. from (hanzal, ar. colocynth + surkh, pers. red). Hind. from (lál, hind. red + indráyan, hind. colocynth). Dec. from hindostany. Tel. from (avva, tel. grandmother + gúda, tel. prolapsus uteri); from the fruit. Mal. from (kákka, mal. crow + tonti, mal. cephalandra indica, naud.). Singh. from (titta, singh. bitter + hondala, singh. the tree, modecca palmata, lam.). Tam. from (kurandu, tam. to be crumpled); from lobed leaves. Ar. also (anbaghol). Hind. also (makal), from sanscrit. Dec. also (godápandú), meaning kernel + fruit. Can. also (kákemandali), meaning crow + rebuke; (kágemáraballi), meaning crow + beat + creeper. Tel. also (ábuvva); (kákidonda), meaning crow + cephalandra indica, naud. Tam. also (shavari); (ángurattai), meaning male corattay. Title otherwise Bitter gourd, Corattay, Cowndal, Makal, Palmated gourd, Round snake gourd. Botanically Trichosanthes [snake gourd] palmata, roxb., cucurbitaceæ [vricsham, 62]. Alias Modecca bracteata; Trichosanthes anguina, laciniosa. Modecca from (mutakku, mal. the plant, modecca palmata, lam.). Climbing; leaves palmately lobed, toothed; tendrils three cleft; male flowers racemose; female ones solitary in the same axils as the male, or occasionally racemose; calyx five cleft; segments deeply toothed or serrated; corolla fringed, five petalled; flowers large, white. The fruit is round, oval, or pyriform, the size of a small apple [seb], crimson when fresh, of a dull orange [q.v.] color when dry, marked at one end by a deep cicatrix with sharp raised edges, at the other there is a prominence to which a portion of the stalk sometimes remains attached; in the dry fruit, which has a thin brittle very bitter shell, the segments of pulp with their seeds are loose, so that the contents of the gourd rattle; if a dry segment be soaked in water it soon softens, yielding a dark green pulp which smells like savine, and has an acrid and bitter taste; the seeds, ranging in number from sixty to hundred in each fruit, are flat, but very irregular in shape, generally somewhat triangular, and average $\frac{7}{16}$ths of an inch in length; they have a hard blackish shell, and sweet oily kernel; the vine is perennial, often as thick as a man's arm; it has a warty grey bark, marked by seven deep

longitudinal fissures, which correspond to the medullary divisions between seven wedge-shaped woody and vascular bundles into which the stem is divided; the vine is not bitter; the flowers are slightly fetid. The fruit mixed with cocoanut [q.v.] oil is medicinally a specific in earache, but it is not eatable being considered poisonous; the root too is reckoned poisonous; it is used in diseases of cattle [pashoorogam], such as inflammation of the lungs, &c.; gives to pharm. rind of fruit, non-officinal, purgative.——*Common snake gourd* (चिचिण्ड - chichinda, San.; पडोल - padóla, Mahr.; पड्डूळ - paddúla, Conc.; چچنڈا - chichendá, Hind.; چچونڈا - chichondá, Dec.; ಪಡವಲಬಳ್ಳಿ - padavalaballi, Can.; ಪಟ್ಲಕಾಯಿ - patlakáyi, Too.; పొట్ల - potla, Tel.; പടോലം - patólam, Mal.; පොඩිවිලංගු - podivilángu, Singh.; புடல் - pudal, Tam.). Mahr. from (patóla, san. the plant). Hind. from sanscrit. Dravid. from (patóla, san. the plant). San. also (patóla), meaning encircling. Hind. also (parwar), meaning trichosanthes nervifolia, linn. Malay also (petálanlar); (petalrjular). Can. also (patla); (adlaballi). Tel. also (polla); (lingapotla), meaning emblem of shiva + the plant. Title otherwise Chichonda, Club-gourd, Padole, Poodal, Snake cucumber, Snake-plant, Snake vegetable. Botanically Trichosanthes [snake gourd] anguina, linn., cucurbitaceæ [vricsham, 62]. Alias Cucumis anguinus. Plant trained to a frame or trellis; of exceedingly rapid growth; bears a large greenish-white, club-formed gourd, of the length of a man's arm and about four inches thick. Seeds are cooling medicine. Gourd eaten, sliced and dressed like french beans [lobyah]; used in curries [q.v.]; often cut into lengths filled with a preparation of minced meat.——*Palwal snake gourd* (पटोल - patóla, San.; पडोळ - padóla, Mahr.; پرور - parwar, Hind.; پلول - palwal, Dec.; కొమ్ముపొట్ల - kommupotla, Tel.; പടോലം - patólam, Mal.; கொம்புப்புடல் - kombuppudal, Tam.). Title from deccany. San. from (pat, san. to encircle). Mahr., &c. from sanscrit. Tel from (kommu, tel. horn + potla, tel. trichosanthes anguina, linn.); from the fruit. Tam. from (kombu, tam. horn + pudal, tam. trichosanthes anguina, linn.), from short, sharp fruit. Hind. also (banpotal), meaning forest variety. Botanically Trichosanthes [snake gourd] dioica, roxb., cucurbitaceæ [vricsham, 92]. Stems twining, more or less woolly and scabrous; leaves 3 by 2 inches, harsh, sinuate-dentate, not lobed; petiole ¾ inch; tendrils 2-fid; male peduncles in pairs; calyx-tube 1¼ inches narrow; fruit 2-3½ inches, oblong, acute, orange red; seeds ⅜-½ inch, half ellipsoid, compressed, corrugate on margin; plant diœcious. Climbing annual; bears large, white flowers; gourd oblong, smooth, two to four inches long, green when unripe, yellow or orange when ripe. Used medicinally like cucumerina. Unripe fruit and tender tops, eaten in curries [q.v.]; also boiled whole, or in quarters.——*Short snake gourd* (پرور - parwar, Hind.; پلول - palwal, Dec.; కొమ్ముపొట్ల - kommupotla, Tel.; പടോലം - patólam, Mal.; கொம்புப்புடல் - kombuppudal, Tam.). Title from fruit short and thick like horn and also growing in pairs. Hind. and Dec. from (patóla, san. trichosanthes genus). Tel. from (kommu, tel. horn + potla, tel. trichosanthes anguina, linn.); from fruit short and thick like horn. Mal. from (pat, san. to encircle). Tam. from (kombu, tam. horn + pudal, tam. trichosanthes anguina, linn.). Title otherwise Horn poodal. Botanically Trichosanthes [snake gourd] nervifolia, linn., cucurbitaceæ [vricsham, 62]. Alias Trichosanthes dioica. Stem smoothish; leaves cordate-acuminate, minutely, and sharply bristle-toothed, smooth, marked beneath with prominent veins and nerves; tendrils two-cleft; male flowers long-pedicelled; peduncle sometimes branched; female flowers solitary; fruit ovate; malabar. Medicinally like dioica [palwal snake].——*Wild snake gourd* (पटोल - patóla, San.; रानपडोळ - ránapadóla, Mahr.; काडपड्डूळ - kádapaddúla, Conc.; جنگلی چچینڈا - janglíchichendá, Hind.; جنگلی چچونڈا - janglíchichondá, Dec.; ಕಹಿಪಡವಲ - kahipadavala, Can.; ಕಾಟುಪಟ್ಲಕಾಯಿ - kátupatlakáyi, Too.; అడవిపొట్ల - adavipotla, Tel.; പടോലം - patólam, Mal.; තිත්තපටෝල - tittapatóla, Singh.; பேய்ப்புடல் - péyppudal, Tam.). Title from habitat. San. from (pat, san. to encircle). Mahr. from (rána, mahr. wild + padavala, mahr. snakegourd). Hind. from (janglí, hind. wild + chichinda, san. snake gourd, trichosanthes anguina, linn.). Dec. from hindostany. Can. from (kahi, can. bitter + padavala, can. the plant, trichosanthes anguina, linn.). Too. from (kátu, too. wild + patlakáyi, too. the plant, trichosanthes anguina, linn.). Tel. from (adavi, tel. jungle + potla, tel. trichosanthes anguina, linn.). Singh. from (tikta, san. bitter + patóla, san. the plant). Tam. from (péy, tam. devil + pudal, tam. snake plant, trichosanthes anguina, linn.). San. also (tiktap'hala), meaning bitter fruit; (tiktaka), meaning bitter. Can. also (sannapadavala), meaning small + the plant, trichosanthes anguina, linn.; (kádáduballi), meaning jungle + sheep + creeper; (bettapadavala), meaning hill + the plant. Tel. also (chédupotla), meaning bitter + trichosanthes anguina, linn.; (chétipotla), meaning bitter + trichosanthes anguina, linn. Mal. also (kaippappatólam), meaning bitter + snake gourd; (péppatólam), meaning devil's gourd; (káttupatólam), meaning forest + snake-gourd. Singh. also (dummella). Tam. also (káttuppéyppudal), meaning forest + the plant. Title otherwise Cucumber-like snake gourd, Devil's gourd, Doommella, Hair flower, Jagged hair blossom, Torn trichosanthes, Wild poodal. Botanically Trichosanthes [snake gourd] cucumerina, linn., cucurbitaceæ [vricsham, 62]. Alias Trichosanthes laciniosa. Annual, climbing; leaves broadly cordate, three to seven angled, toothed or serrated, pubescent or glabrous; tendrils three-cleft; male flowers disposed in something like umbels; female ones solitary on short peduncles, often from the same axils as the males; fruit ovate, pointed; petals five, ciliated; calyx five-cleft; flowers small, white; found everywhere. Fruit, oblong, one to four inches long; striated with white and green when unripe, and red when ripe. Tender shoots and dried capsules bitter and aperient; in decoction with sugar [q.v.] given to assist digestion; seeds antifebrile and anthelmintic; juice of the leaves expressed is emetic and that of root very purgative. Fruit contains red pulp which is very bitter and eaten unripe in curries [q.v.].

SNAUNAM (स्नान - snána, *San.*). From (sná, san. to bathe). Bathing, ablution, purification. Seven kinds of ceremonial Snaunam are enumerated. Ablution is stringently carried out by Hindoos, less so by Mahomedans. With Hindoos bathing is an indispensable prerequisite to first meal of day, and washing hands and feet before evening meal. For idol bathing see Abhishaicam.

SNOW (చనువు - tsanuvu, *Tel.*). Means authority, currency. Hence a snow-rupee.

SNOWDON (ದೇವಶೋಲೆಬೆಟ್ಟ - dévashólabetta, *Can.*). Vern. from (dévashóla, can. estate so called + betta, can. hill). Can. also (dérbetta), meaning god + hill. Hill; Neilgherry dist., Todanaud div.; lat 11° 26′; long. 76° 46′; height 8,299 feet; from Ootacamund N.E. 3 miles. Formerly known as Devasholahbett; also as Terbetta. Almost a perfect cone; the line of its northern slope, a fall of some 1,500 feet, being remarkably even, though steep [dodabetta].

SOAPNUT (फेनिल - p'hénila, *San.*; रिठा - rit'há, *Mahr.*; रिंट्या - rintyá, *Conc.*; فندق هند - fundukihind, *Ar.*; بندق - bunduk, *Pers.*; ریٹھے کا پیڑ - ríthekáper, *Hind.*; ریٹھے کا جھاڑ - rítheká jhár, *Dec.*; رارك - rarak, *Malay*; ಅಂಟವಾಳ - antavála, *Can.*; ನುರೆಕಾಯಿ - nurekáyi, *Too.*; కుంకుడు - kunkudu, *Tel.*; ମୁକ୍ତମୟ - muktamaya, *Oor.*; ഉറ്വഞ്ചി - urvvañchi, *Mal.*; පෙනෙල - penela, *Singh.*; பூவந்தி - púvandi, *Tam.*). Title from saponaceous pulp round seed. San. from (p'héna, san. foam); from capsules. Mahr. from (rishta, san. the tree). Conc. from mahratta. Ar. from (funduk, ar. filbert, corylus avellana, linn. + hind. ar. india). Pers. from arabic. Hind. and Dec. from (rishta, san the tree). Can. from (antu, can. gum + vala, can. affix implying possession). Too. from (nure, too. foam + káyi, too. seed). Mal. corruption of (púviraññi); from (pú, mal. flower + iraññi, mal. mimusops elengi, linn.). Singh. from sanscrit. Tam. from (pú, tam. flower + andi, tam. evening); from color of nuts. San. also (arishta), meaning not injuring [black datura, neem]; (rishta), by corruption. Mahr. also (ringí). Pers. also (ratah), from sanscrit. Hind. also (rishta), from sanscrit; (arishta), from sanscrit. Can. also (kúgate); (thalemaradu); (púchikotte); (aradála); (antarale). Tel. also (kúkudu). Mal. also (punnakkotta), meaning seeds of poon tree, calophyllum inophyllum, linn.; (chavakkáymaram), meaning soap tree; (púviriññi), meaning flowering ilanjy. Tam. also (ponnángottaimaram), meaning gold + seed + tree; (manippungu), meaning bead + pongamia glabra, vent.; (paççaikkottaimaram), meaning sticky + seed + tree; (neykkottán), meaning ghee + seed, from unctuous nuts. Title otherwise Bead poongam, Downy-leaved soap-berry, Emarginated soap-berry, Monkey's blood, Notch-leaved soapnut, Reetah, Rintah, Soap-berry, Soap-tree. Botanically Sapindus trifoliatus, linn., sapindaceæ [vricsham, 43]. Alias Sapindus emarginatus, laurifolius. Pulp round the seed saponaceous, whence generic name. Tree, middling size; petiole pubescent; leaves abruptly pinnate; leaflets two to three pairs, oblong, retuse or emarginate, entire, upper side glabrous, under very downy; racemes in terminal panicles; calyx segments five, oblong; petals five, oval, outside densely hairy, margin very woolly, with a small woolly appendage on each side about the middle, inside nearly glabrous, or with a few scattered hairs about the middle; ovary densely hairy; fruit one to four, generally three-lobed, lobes very hairy on the inside at the insertion of the seeds; flowers small, white; flowering in october-november; common in dry jungles. The dry fruit or soap-nut as it is called is generally sold in the bazaar, single, spheroidal, about ¾ inch in diameter, wrinkled and reddish brown or brownish yellow in color, with a large, heart-shaped, whitish and woody scar at the base; the scar is divided into two slanting surfaces with a thin and prominent ridge, indicating the attachment of two other nuts originally; the pericarp is about a line and a half thick, with a soft, viscid, and translucent pulp; however long it may be exposed to the sun it does not get sufficiently dry to be pulverised; the inner membrane or shell enclosing the seed is thin, tough, translucent and leathery; the taste of the pulp is sweetish bitter, and the smell bears some resemblance to that of a very ripe and decomposing mango

[q.v.], or the compound extract of colocynth [bitter water melon], butyric acid; the active principle of the soap-nut is saponin, which occurs to the extent of about 10 per cent. in the pulp; the seed of the fruit is roundish, black, smooth, and about the size of a large pea [calauyam]; and the kernel thereof is yellowish or pale-white, oily and sweetish in taste. The pericarp or pulp, and kernel of the fruit is in medicine internally, emetic, nauseant and expectorant; through the nose, a remedy in hemicrania, asthma, hysteria and epilepsy; externally, detergent, and a remedy for the stings and bites of poisonous insects [poochy], as scorpion [tail], centipede [kankhajoor], &c. The pulp or pericarp of soap-nut can only be administered conveniently in the form of draught, which is easily prepared by rubbing and bruising it in one or two ounces of water and passing the same through cloth; a thick solution of the drug for dropping into the nose is prepared in the same way with a very small quantity of water; the juice may be strained and kept in a bottle for use for a day or two, or squeezed into the nostrils then and there through the cloth; in preparing the paste or poultice of this medicine, vinegar [caudy] or lime-juice [lime] should be used instead of water. Doses; from one drachm and a half to two drachms as an emetic; from twenty to forty grains as a nauseant; and from ten to eighteen grains as an expectorant. Substituted; for ipecacuanha, sulphate of zinc [vellay toottam], squill and senega as an emetic, nauseant, and expectorant; for carbonate of ammonia, hypodermic injection of morphia, and liquor ammoniæ, as a remedy through the nose and as a local application. Capsule has a detergent quality when bruised, forming suds if agitated in hot water; used as a soap [sauboon] for washing the hair, silk, &c.; makes the hair lustrous, has however a corrosive action; stem gives a gum [gond]; the hard tough nuts take a fine polish and are employed for necklaces [maulay] and beads [munkah]. Wood used for posts, door frames, and the construction of carts; pale yellowish, close and elegantly grained, hard but not durable, and cracks if exposed. Other common species are:—attenuatus, erectus, mukorossi, obovatus; wood of these inferior.——*Rusty soap-nut* (ریٹھا - ríthá, Hind.; ఇసుకరాశి - isukaráshi, Tel.; ମୁକ୍ତାମୋୟା - muktamoyá, Oor.; மணிப்புங்கம் - manippungam, Tam.). Title from color of wood. Hind. from (árishta, san. soap-nut tree, sapindus trifoliatus, linn.). Tel. from (isuka, tel. sand + ráshi, san. heap). Tam. from (mani, tam. bead + pungu, tam. pongamia glabra, vent.), from small similar berries. Tel. also (undurugu); (tavati); (tasati). Title otherwise Reetah. Botanically Erioglossum edule, bl., sapindaceæ [vricsham, 43]. Alias Erioglossum rubiginosum; Moulinsia rubiginosa; Sapindus fraxinifolius, rubiginosa. Tree; younger parts clothed with rusty pubescence; leaves abruptly pinnate; leaflets four to six pair, oblong-lanceolate, acuminated, entire, slightly hairy beneath; racemes in terminal panicles; calyx unequal; petals four, the fifth deficient, glabrous, with a distinct claw; limb cordate-oblong; scale attached to the petals by the margin, very woolly, with a woolly appendage at its back overtopping the scale; stamens on one side, woolly; ovary deeply three-lobed, hairy; style longish berries one to two, rarely three, nearly unconnected; flowers small, white; flowering in march. Timber straight, strong and durable, chocolate-colored towards the centre, useful for great variety of purposes. No other common species here.

SOAP-POD (सप्तला - saptalá, *San.*; शिककाई - shikakái, *Mahr.*; सिकायि - sikáyi, *Conc.*; سیکاکائی کا پھر - síkákáikáper, *Hind.*; سیکاکائی کا جھاڑ - síkekáikájhár, *Dec.*; ಶೀಗೆ - shíge, *Can.*; ಸೀಗೆ - síge, *Too.*; సీకాయ - síkáya, *Tel.*; ചീനിക്കായ - chínikkáya, *Mal.*; சீயக்காய் - shíyakkáy, *Tam.*). Title from use of pods. San. from (sapta, san. seven + lá, san. to take); from thickest bushy habit. Mahr. and Hind. from tamul. Tel. assumed from (chikku, tel. rancidity of oil + káya, tel. pod); from removing rancid smell of oil in the head; but really see tamul. Mal. assumed from (chíni, mal. chinese foreign + káya, mal. fruit); but really see tamul. Tam. from (shí, tam. to cleanse + káy, tam. fruit); cf. clearing nut tree. San. also (charmakashá), meaning skin injurer, from thorns; (bhúrip'héna), meaning much + froth; (vimalá), meaning cleanser; (sátalá), meaning happy plant. Mahr. also (télashénga), meaning oil + pod, as used in oil bathing. Mal. also (ínna), by corruption. Title otherwise Charmaghas, Oil-pod tree, Shika, Shikauya, Soap acacia, Soap pod wattle, Tamarisk leaf acacia, Washing-pod tree. Botanically Acacia [cantalam] concinna, dc., leguminosæ [vricsham, 48]. Alias Acacia abstergens, rugata, saponaria; Mimosa abstergens, concinna, intsia, rugata, saponaria, tamariscifolia. Intsia from (iñcha, mal. acacia intsia, willd.). Climbing; branches irregularly angled, tomentose, armed with numerous recurved prickles; leaves bipinnated; pinnæ six to eight pair; leaflets numerous, linear, somewhat semi-hastate, mucronate; petioles with hooked prickles below; panicles terminal and axillary, with globular heads of flowers three to five together in the axils of a small bract or leaf, peduncled; stamens distinct; legumes large, succulent, contracted between the seeds; valves wrinkled on the surface when dry; flowers small, white; a hedge plant. The long flat pods or legumes, have taste resembling soap-nut, sapindus trifoliatus, linn. [soap nut]; more acid, less bitter, have singular pungency. Medicinally deobstruent, expectorant; commonly ordered in jaundice and other biliary derangements; small leaves have pleasant acidity, frequently put into pepper-water to keep bowels open or work off bile. Leaves are used in cookery as substitute for tamarinds [q.v.]. Pods are detergent, used for washing the hair to kill vermin; natives use them for marking the forehead [pottoo, tilacam].

SOCOOLAIR (సోకులేరు - sókuléru, *Tel.*). From (sóku, tel. to touch + éru, tel. river). River; Godavery dist., Rekapully talook. A tributary of the Severy. Rises in the eastern ghauts [q.v.], flows through the Rekapully talook and joins the Severy at Moocanore.

SODA GRASS (کلسنار - kalasnár, *Hind.*; సోడ - soda, *Tel.*). Botanically Panicum [priyangoo] paludosum, roxb., graminaceæ [vricsham, 156]. Culm branched, erect, swollen under the water, and there emitting roots from the joints; leaves linear, glaucescent, hispid, sheaths bearded at the mouth; panicle oval, diffuse, thin, composed of scattered, subalternate ramous branches, angles sharp, finely pointed; flowers oblong, twin, partial pedicels unequal; seed oblong, smooth, brown; usually growing in water.

SODY (چھوری - chhorí, *Hind.*). From (chhorná, hind. to relinquish). Relinquishment of puttah [q.v.] holdings, abatement of a charge.

SOLA (సోల - sóla, *Tel.*).—"*a*" Measure of capacity. 4 giddas = 1 sola; 2 solas = 1 tavva [alavay, 3b]. In Ganjam $13\frac{1}{2}$ cubic inches, in Vizagapatam $39\frac{1}{4}$ cubic inches, in Godavery $17\frac{1}{4}$ cubic inches, in Kistna 35 cubic inches.—"*b*" Bazaar weight. 15 tolahs = 1 sola; 4 solas = 1 adda [niray, 2b]. Approximate actual value 1 sola = 6 oz. $2\frac{7}{8}$ drs. avoir. Ganjam. See vol. I, 609; II, 510, 511, 512, 516, 519.

SOLAH (दमन - damana, *San.*; भेंड - bhénda, *Mahr.*; شولا - sholá, *Hind.*; بھینڈ - bhend, *Dec.*; ತನಕಲಿಗಡ - tanakaligda, *Can.*; జీలుగబెండు - jílugabendu, *Tel.*; നെല്ലിത്താലി - nellittáli. *Mal.*; මහදියසියඹලා - mahadiyasiyambalá, *Singh.*; நெட்டிச்செடி - nettiççedi, *Tam.*). Title from hindostany. San. from (dam, san. to pacify) [absinth]. Mahr. means pith. Tel. from (jílugu, tel. fine + bendu, tel. pith plant); from softness. Mal. from (nelli, mal. phyllanthus emblica, linn. + táli, mal. creeper). Singh. from (mahá, san. large + diya, singh. water + siyambalá, singh. tamarindus indica, linn.). Tam. from (netti, tam. pith + shedi, tam. plant). Hind. also (phúlshola), meaning light pith. Can. also (alaginagida), meaning shaking + tree. Tel. also (nírujíluga), meaning water + pith plant; (tigajíluga), meaning creeper + pith plant; (bendu), meaning pith plant. Mal. also (áttukatésham), meaning river + cork, millingtonia hortensis, linn. f. Tam. also (netti), meaning breaking with a crackle or pith; (kokkéri), meaning heron + to ascend; (áttunetti), meaning river + the plant; (takkaiççedi), meaning plug + tree, from use of pith as stoppers for bottles; (shadaiççedi), meaning bushy hair + plant; (shadai), meaning hairy; (kidai); (kidaiççi). Title otherwise Netty shrub, Pith plant, River cork, Rough-stemmed bastard sensitive plant, Singapore hat-plant, Sponge wood, Water tamarind. Botanically Æschynomene aspera, linn., leguminosæ [vricsham, 48]. Alias Æschynomene aquatica, indica, lagenaria; Hedysarum lagenarium. Perennial, floating, erect, sometimes branched; leaves unequally pinnated; leaflets numerous, linear, obtuse; racemes axillary, few-flowered; calyx five-cleft, two-lipped, bibracteolate; peduncles and pedicels rough with hairs; legumes four to seven-jointed, on long stalks, with prickly tubercles on the middle of each joint, margins striated, crenulated; flowers brownish orange; light, white-colored, corky-looking wood; grows on margins of tanks, &c. Plant used in decoction in dropsy. Leaflets used as greens [keeray]; famine food. Chief use is for its pith; largely used by fishermen for floats and cork-jackets; also cut into paper-like sheets and made into temporary decorations around idols during festivities; europeans use it for making cases for tumblers containing ice, being a bad conductor; similarly for making pith hats, which are extremely light and keep the head cool; also to pad the roofs of palankeens [q.v.]. There is a stanza from Nauladiyaur:—திருட்பிறந்த திறம்பசியதாயினும் சாந் கிடையகத்தில் லாகும் - ஒரும் நிறைப்பெருங்கலன் குடை வத்த நின்றக்கடைத்தம் அறைப்பெருங்கலன்குடை த்த—"the world has those whose hearts are hard as rock "though in the midst of abounding wealth; the solah plant "though born in water and green in color has no moisture "within."——*Black solah* (నల్లజీలుగ - nallajíluga, Tel.). Same as Lowly chakondah.——*Foreign solah* (సీమజీలుగ - símajíluga, Tel.). Same as Parangyvail.——*Hill solah* (కొండజీలుగ - kondajíluga, Tel.). Same as Bastard sago palm.——*Red solah* (ఎర్రజీలుగ - errajíluga, Tel.). Same as Prickly sesban.

SOLGA (సోలగ - sólaga, *Tel.*). Measure of capacity. 4 seers = 1 solga; 4 solgas = 1 maunam [alavay, 3c]. Approximate actual value, 1 solga = 280 cubic inches. Bellary. Compare Moonta of nellore, Cooncham of godavery and kistna, Cooncham or Toom of ganjam. See vol. I, 609; II, 508.

SONA (سونا - soná, *Hind.*). From (svapna, san. sleep). Sleep, rest.——*Sonapore* (సొన్నాపురము - sonnápuramu, Tel.). From (soná, hind. rest + pura, san. town). Village, Port, Sea-customs station; Ganjam dist., Berhampore tal.; pop. 1,424; acres 1,899; lat. 19° 07′; long. 84° 50′; from Barwah N.N.E. 22 miles; from Berhampore S. 14 miles; from Chetterpore S.W. 21 miles; from Gopalpore S.S.W. 20 miles; from Madras N.N.E. 506 miles. Two miles from Soorlah salt factory and connected with Berhampore by a branch road leading into the high road between Ichapore and Berhampore. Also connected by road with Sonapore in the Central provinces, distant about 105 miles. Now unimportant, although in 1768 the principal shipping place in Ichapore province. The anchorage is with the flagstaff bearing W.N.W. The Bauhoodah falls into the sea at Sonapore and forms sandy bars which offer great obstruction to shipping. The trade that formerly went to Sonapore is now gradually finding its way to Barwah. The soil around Sonapore was much injured by inundations from the sea in 1825, which have rendered it brackish and unfertile. Good edible oysters [auly] are found. Trig. station in lat. 19° 06′ 44·70″; long. 84° 49′ 28·70″; from Sonapore N. 1½ miles; from Berhampore S. 13 miles; from the sea W. ½ mile.——*Sooptee* (सुपती - supatí, Mahr.; కొండవెంపలి - kondavempali, Tel.). Title from mahratta. Mahr. from (svap, san. to sleep); from intoxicating fish. Tel. from (konda, tel. hill + vempali, tel. the plant, tephrosia purpurea, pers.). Mahr. also (supi), meaning drowsy tree. Title otherwise Cork leaved tephrosia. Botanically Mundulea suberosa, benth., leguminosæ [vricsham, 48]. Alias Cytisus sericeus; Robinia sennoides, suberosa; Tephrosia sericea, suberosa. Arborescent; young shoots tomentose; bark corky and cracked; leaves pinnated; leaflets six to eighteen pair, elliptic-oblong, obtuse, clothed on the under side with silky pubescence; calyx campanulate, shortly five-toothed; keel straightish; vexillum pubescent; legume long, straight, silky-pubescent, contracted between the seeds; racemes terminal; flowers in pairs, long-pedicelled; flowers in june and july. Densely silky on the branches; lilac or rosy flowers succeeded by a long silky pod, containing kidney-shaped seeds; very ornamental when in flower, as it is perfectly covered with blossoms; common about subalpine jungles; the leaves resemble senna [q.v.] leaves. Seeds used to poison fish [common emetic nut, indian berry, indian oak, marotty, round milk-hedge, tejbul, walsoora, zanzibar indigo]; inner bark of green color has same effect.

SONF (मधुरिका - madhuriká, *San.*; बडीशेप - badíshépa, *Mahr.*; راز یانج - ráziyánaj, *Ar.*; بادیان - bádiyán, *Pers.*; سونف - sonf, *Hind.* and *Dec.*; పెద్దజీలకర్ర - peddajílakarra, *Tel.*; දෙවදුරු - dévaduru, *Singh.*; பெருஞ்சீரகம் - peruñjíragam, *Tam.*). Title from deccany. San. from (madhura, san. sweet) [sowa]. Mahr. from (barísonf, hind. the plant). Tel. from (pedda, tel. large + jílakarra, tel. cumin, cuminum cyminum, linn.). Singh. from (déva, singh. king + duru, singh. cumin); large cumin. Tam. from (perum, tam. great + jíraka, san. cumin). Pers. also (wálánibuzurg), meaning large fennel. Hind. also (pánmuhori), meaning betel-leaf fennel; (barísonf), meaning large fennel. Singh. also (rataenduru), meaning foreign cumin. Tam. also (shógikkírai), meaning sowa vegetable [sowa]; (narchíragam), meaning good cumin. Greek μάραθον. Title otherwise Arak baudyaun, Finicho, Indian fennel, Sweet fennel. Botanically Fœniculum vulgare, gærtn., umbelliferæ [vricsham, 67]. Alias Anethum fœniculum, panmorium; Fœniculum officinale, panmori, panmorium; Ozodia fœniculacea; panmori from hindostany. Perennial, glabrous, glaucous; stem striated; leaves many-cleft; lobes linear-setaceous; umbels twelve to twenty-rayed; involucel and involucre wanting; fruit oblong, laterally compressed, without a beak; flowers yellow; common in gardens, raised from seed. Aromatic seeds medicinally stimulant, aromatic, and carminative; root purgative; leaves diuretic; gives to pharm. aqua fœniculi, a vehicle for other drugs; leaves used by natives as seasoning, and by europeans in garnishing; fennel oil [yennay] from roots. The fennel seeds of commerce are:—German or saxon fennel, Indian fennel, Sweet or roman fennel, Wild or bitter fennel. Sonf is hindostany for Anise [q.v.] seed also.

SONT (शुण्ठी - shunt'hí, *San.*; سونٹھ - sont, *Hind.*). San. from (shunt'h, san. to dry). Dry ginger [ginger].

SOO (सु - su, *San.*). Good. Plant first term. Ex., where transl. is of second term:—Allium cepa (sukandaka), root; Alpinia galanga (sugandhá), smell; Aristolochia indica (sunanda), enjoyment; Calophyllum inophyllum (surangí), color; Carissa carandas (sushéna), cluster; Cassia fistula (suvarnaka), color; Costus speciosus (subandhu), friend; Crinum amœnum (sudarshana), sight; Eclipta alba (suparna), leaf; Hemidesmus indicus (sugandhí), smell; Ipomæa turpethum (sushénaká), binding; Jasminum angustifolium (supújá), deserving; Mangifera sylvatica (suraktaka), red; Mesua ferrea (suvarna), color; Musa paradisiaca (sup'halá), fruit; Myrica sapida (sugandhí), smell; Ochrocarpus longifolius (surangí), color; Sida cordifolia (suvarna), color; Thespesia populnea (supárshvaka), side; Tribulus terrestris (sudamshtra), tooth; Vitex trifoliata (surasa), juice; Webera corymbosa (sup'hala), fruit; Zizyphus jujuba (sup'hala), fruit. See gloss. paragraphs.——*Shavveeram* (شوریم - shavíram, Hind.; شویر - shavír, Dec.; సౌవీరము - sauvíramu, Tel.; හොයන්දුන් - hoyandun, Singh.; சவ்வீரம் - shavvíram, Tam.). Vern. from (su, san. good + víra, san. strength) [soorma]. Corrosive sublimate. Otherwise Bisulphate of mercury, Perchloride of mercury [rasam]. Hydrargyri perchloridum of chemists. As sold in bazaars is less crystalline and more dull and opaque than the salt in use in hospitals, and occasionally contains a small quantity of sub-chloride or calomel [rascapoor]. The following process for making it is taken from the Poorna sootram:—First make Rasa paspam [q.v.] of the strength that will be formed by using the proportions of sixteen pagodas [q.v.] weight of sulphur [gandhac], eighty pagodas weight of quicksilver [rasam], and half a measure of common salt [ooppoo]. Then to eighty pagodas weight of this Rasa paspam add the same quantity of roasted salt. To these again are to be added the following substances; forty pagodas weight of roasted sulphate of copper [mayil toottam], twenty pagodas weight of alum [padicauram], twenty pagodas weight of nitre [shorah], twenty pagodas weight of the alkaline effloresced earth pooneer [q.v.], ten pagodas weight of sulphate of iron [annabhaidy], and five pagodas weight of sal ammoniac [nowshaudar]. All these to be well rubbed together till formed into an uniform powder, which is to be put into a phial sufficiently large to hold the whole in one-half of it; after which it is to be well coated round with clay, and set over an oven, where it is to be kept for thirty-six hours, taking care that the fire though slow is strong; the phial is then to be broken, and in the mouth of it will be found the Shavveeram in a lump. Veidyans [q.v] use thus. Internally; in small and continued doses alterative, stimulating the urinary, cutaneous and salivary secretions; in large doses powerful irritant poison. Externally stimulant and mildly caustic; remedy in secondary syphilis, cutaneous eruptions, epilepsy, ophthalmia, cynanche and rheumatism; also in hydrocephalus, dropsical affections, glandular enlargements, hemeralopia and hepatic affections; locally used in gonorrhœa, gleet and leucorrhœa as an injection, in ophthalmia as collyrium, in skin diseases as a lotion or wash. Substituted for british perchloride of mercury. Used generally by natives in too strong doses, which are sometimes, when the preparation is pure and active, attended with dangerous effects; causes severe ulceration of the gums and cheeks resulting finally in permanent cartilaginous-like adhesions between the gums and cheeks. The mode of administering Shavveeram according to the Poorna sootram is as follows:—The weight of a grain of paddy [q.v.] of Shavveeram may be given, for three days together, morning and evening, mixed with a little of the juice of green ginger [q.v.], or about half a pagoda [q.v.] weight of common jaggery [q.v.]. This quantity, taken for the period mentioned, will affect the mouth, and is efficacious in thirteen kinds of convulsion, in disorders attended with much phlegm [sheetam], in venereal affections, in some kinds of asthma, and in scrofulous complaints.——*Shooppoo* (சுப்பு - shuppu, Tam.). Familiar contraction of Soobramanyan [q.v.]. Proper name applied to males and females.——*Shooppoottye* (சுப்புத்தாயி - shupputtáyi, Tam.). From (shuppu, tam. contraction of subrahmanya + táy, tam. mother). Female proper name [peyar].——*Soobba* (సుబ్బ - subba, Tel.; சுப்பா - shuppá, Tam.). Snake. Proper name common to both sexes. Also suffix in proper names [peyar]. Similarly:—Soobbakka, from (akka, tel. sister); Soobbammah, from (amma, tel. mother), familiarly soobby; Soobbannan, from (annan, tam. elder brother), familiarly oobbannan; Soobbaramayyan, from (ráma, san. the hero + aiyyan, tam. master).——*Soobbaroya* (ಸುಬ್ಬರಾಯ - subbaráya, Can.). From (subba, can. snake + ráya, can. king). The sovereign serpent. See vol. I (83).——*Soobbaroya shashty* (సుబ్బరాయషష్ఠి - subbaráyashasht'hi, Tel.). Means serpent king + the sixth lunar day. Otherwise Kookkey shashty. Lunar [chaundramaunam] festival [pundigay, 3a]; subject to intercalation [adhicam], on sixth day of waxing moon [shooclapacsham] of ninth lunar month Margashiram [mausam] between 19th November and 20th December, when women give offerings to serpents [naugam]. Serpent worship consists in making Pradacshinams [q.v.] round the hole of the serpent and pouring milk [paul] into it [maryanday].——*Soobhadray* (सुभद्रा - subhadrá, San.). From (above + bhadra, san. auspicious). Sister of Krishnan [q.v.].——*Soobramanya* (ಸುಬ್ರಹ್ಮಣ್ಯ - subrahmanya, Can.). After the god. Part of Cookkey village, Place of pilgrimage; South canara dist., Ooppinangady tal.; pop. 440; lat. 12° 40′; long. 75° 39′; from Coondapore S.E. 90 miles; from Mangalore E. 55 miles; from Oodipy S.E. 74 miles; from Poottore S.E. 28 miles. Below the ghauts [q.v.]. One of principal seats of serpent [naugam] worship in india. In the temple are two images of a serpent and a six-faced deity, which stand side by side in the garbhaulyam [garbhagriham]. A large cattle [maud] fair during annual festival in November and December. Garnets [tamrah] are found in Comauradhaury river 3 miles from temple. For the hill see Pooshpagherry.——*Soobramanyan* (सुब्रह्मण्य - subrahmanya, San.; சுப்பிரமணியன் - shuppiramaniyan, Tam.). From (above + brahmanya, san. piety); the eminently pious. Ἄρης of Greeks, Mars of Romans, Papremis of Egyptians. Familiarly Many, Shooppaly, Shooppauloo, Shooppauny. Younger son of

Shiva [q.v.], the elder being Vigneshwaran [q.v.]. Soobramanyan is called Caurtikeyan [q.v.] in the north, and Scandan [q.v.] in books; see also below for other names. He is the god of war.—"*a*" Soobramanyan is represented in the arts by an image with six heads and twelve arms. But because such an image is difficult to be made either of stone or of metal, he is usually found in the pagodas [q.v.] with one head and four arms only, of which he lifts two up, holding with them the celebrated vail [q.v.] or lance with which he slew Shooran [q.v.], while the remaining two of his four hands are empty. On his head he wears a crown, and his ears, neck, breast, arms, hands, as well as the lower part of his body, and his legs, are adorned like those of the other gods. His standing-place is a flower, to his right and left stand his two wives, near him a peacock [mayil], his vehicle [vauhan]. In the Shiva pagodas his image stands in a separate small temple and receives daily special offerings, together with the lingam [q.v.] and Shiva. In the places where he performed miracles he has pagodas of his own, and obtains three times the same offerings as Shiva.—"*b*" The Tamulians say that Soobramanyan is one with Shiva, so that whosoever worships him worships Shiva himself. He has therefore like Shiva many names. Among those which are peculiar to him, and which he has obtained because of his deeds and miracles, the principal are:—Armoogam or shunmookhan or the six-faced; Ausaun or priest or teacher; Cadamban or he to whom the flower-tree, barringtonia racemosa, blume [common indian oak], is sacred; Caurtikeyan or as nursed by the kritticay [q.v.] or pleiades; Chetty or the merchant, as which he appeared at madura; Comauran or the youth; Comaurasawmy or the son-god; Goohan or he who dwells in a mountain cavern; Gungamaindan or gungay's son; Haran magan or hara's son; Mayonmaroogan or mayon's son-in-law; Meilairy vailan or the lancer who rides the peacock; Mooroogeshan or the young lord; Mooroogan or mooroogappan or the younger son; Moottoocomauran or moottoocomaura sawmy or the pearl son; Pulneyvailan or the lancer of pulney; Scandan or cundasawmy; Senaupaty or the commander-in-chief; Sharvanan or as having originated in the lake sharvanam or reed forest; Shevaca permaul or the soldier-prince; Sheyaun and shendan or the ruddy one; Shilamban or the mountaineer; Shoora samhaura moorty or the destroyer of shooran; Varaippagaverindone or he who splits mountains by the thrusts of his lance; Veeravailan or the hero lancer; Vailayoodhan or the lancer; Vendan or the king; Vishaukhan or as born under the vishaukham [q.v.] lunar mansion [nacshatram]. Regarding Soobramanyan as Caurtikeyan, it is said that the gods, persecuted by giants, implored the help of Shiva, who then assumed six faces, and caused six sparks of fire to dart out of his six central eyes. The sparks were cast into a pond at Trittany, about 50 miles north-west of Madras, and became six infants, which were nursed by the six mothers, who form the constellation Kritticay [kritticay, nacshatram] or the Pleiades [caurtikeyan]. When Parvaty in turn took them in her arms, they assumed one united body, having six heads. This deity afterwards slew the giants.—"*c*" Soobramanyan being fond of fortresses, mountains, and hills, his principal pagodas [coil, pagoda] are built on mountains, and during his yearly festival bonfires are lit on them throughout the land.—"*d*" Among the books that treat of Soobramanyan the principal one is the Scaunda pooraunam [q.v.], in which there is, besides his war with Shooran, related at great length how he was sent by his father to frustrate the sacrifice of Dacshan [q.v.], who intended to place another god on the throne of Shiva, and how he was then at the instigation of Dacshan delayed on his way by damsels, who entertained him with song and music. The Devadausies [q.v.] are said to be betrothed and married to him. Among the books written in honor of Soobramanyan there are besides the Scaunda pooraunam to be mentioned:—Tirpoogazh, i.e., divine praise, in which more especially soobramanyan's deeds at calastry are extolled; its author is arnagiry nautan, who, being at first only a drum-player in one of soobramanyan's pagodas, became a devotee of the god; in consequence of which soobramanyan is said to have given him great gifts. Scandaunoo bhooty, i.e., superhuman knowledge of scandan, likewise a poem setting forth soobramanyan's glory and praise by the same author. Comauranpillay tirnaumam, a collection of songs in which he is extolled under the name of comauran. Comaurarperil vunnam, a long poem in honor of soobramanyan. All these books are learned by heart and sung by children at school.—"*e*" Several places are considered to be in a special manner sacred to this god. Those which are of importance in this Presidency are the following:—Tricheeralavye or trichendore in Tinnevelly, Tirvauvinangoody the mountain town of pulney, Triveracam near pondicherry, Soobramanya in south canara, Trittany in carvetnugger, Tirporore in chingleput. See vol. I (79).—"*f*" Soobramanyan has two wives, Vulliyammay [vully] daughter of Indran [q.v.] and Devayaunay [q.v.] brought up by hunters. The image of the former is painted brown, and that of the latter yellow; but each is represented in a natural form with two arms and hands, holding in the left hand a lotus [nelumbo] flower, while the right arm hangs down. Each one wears also a crown on her head, and jewels in her nose, as well as the sign of the sacred ashes [vibhooty] on her forehead, and is on the whole adorned like the other goddesses. These two wives of Soobramanyan have no pagodas of their own, but stand in his pagodas, the one to his right hand and the other to his left. They partake of the offerings made to him, and the festivals celebrated in his honor are also meant for them. There are also many people who fast in their honor every Tuesday. They are mentioned in various books; and about Vulliyammay two special books have been written, the Vulliyammay venbah, a collection of 295 songs; and the Vulliyammanaur, a poem containing her history and a description of her glory.—"*g*" Soobramanyan is worshipped in the month Caurtigay [mausam] or november on which occasion numerous images are made, these after the ceremony of worship being cast into the river. Vows and offerings are made to him by Hindoo females to obtain children, especially sons. When the moon [chundran] enters the third star of the constellation [kritticay, nacshatram], a great feast is held and lamps are placed in every door-way [matam].—"*h*" Soobramanyan is common Hindoo 2nd or pers. name.——*Soodarshanan* (சுதரிசனன் - shutharisanan, Tam.). From (above + darshana, san. sight), beautiful. Epithet of the discus [chuckram] of krishnan [q.v.] or vishnoo [q.v.]. Also epithet of shiva [q.v.]. Hindoo 2nd or pers. name [peyar].——*Soogandham* (सुगन्ध - sugandha, San.). Fragrance. Plant first term often joining two genera. Ex., where transl. is of second term:—Alpinia galanga (sugandhavachá), acorus calamus. Kœmpferia galanga (sugandhavachá), acorus calamus; Nardostachys jatamansi (sugandhamuste), cyperus rotundus. See gloss. paragraphs.——*Soogandhy* (सुगन्धी - sugandhí, San.). Fragrant. Plant name common to Hemidesmus indicus and Myrica sapida. See gloss. paragraphs.——*Soogreevan* (सुग्रीव - sugríva, San.). From (above + grívá, san. neck). A monkey king, the king of Kishkindyay, [q.v.] the ally of Rama [q.v.]. Probably a Coorumba [q.v.] chief. See vol. I (115).——*Soomeroo* (सुमेरु - suméru, San.). A region over the north Pole [oottara dhroovam], where Indran [q.v.] presides over the Sooras [q.v.] or Devatays [deva]. South pole is Coomeroo, which see.——*Soomookhan* (சுமுகன் - shumugan, Tam.). From (above + mukha, san. feet), handsome faced; epithet of ganesh [q.v.], garoodan [q.v.] and shiva [q.v.]. Hindoo 2nd or pers. name [peyar].——*Soondary* (सुन्दरी - sundarí, San.). From (sundara, san. beauty). Parvaty [q.v.]. The Sowndarya lahary or sea of beauty is a panegyrical poem by Shuncaracharry [shuncaran] praising Parvaty [q.v.]. The shacty [q.v.] worshippers use the names Baulasoondary and Tripoora soondary, meaning Young parvaty and Parvaty at the time when the tripoorans [q.v.] or three cities were destroyed.——*Soondram* (सुन्दर - sundara, San.; சுந்தரம் - shundaram, Tam.). From (su, san. good + dara, san. body). Beauty. Name applied to males and females. Familiarly Shoondoo, Shoondye. Also suffix in proper names as Somasoondram, Meenautchisoondram [peyar].——*Soondran* (சுந்தரன் - shundaran, Tam.). One of the sixty-three devotees [aroopatt moover] of Shiva [q.v.] who was also one of the three authors of Devauram [q.v.], the Tamul vedam. Contemporary of Appar and Sambandhan. Champion for the Sheiva faith against the Jeinas [q.v.]. Real name Numbiyaurooran. Bramin of Audisheiva sect at Tirnauvalore. Died young at Caroor in the Chera [q.v.] country.——*Soondra paundy tevan* (சுந்தரப்பாண்டியத்தேவன் - shundarappándiyattévan, Tam.). From (sundara, san. beautiful + pándiyan, tam. king, so called + tévan, tam. title). Marco polo's Sender bandi dewar. Originally a Sheiva [q.v.] then became a Jeina [q.v.], and was finally reconverted to Sheivism by the miracles performed by Nyauna sambandhan, a Sheiva teacher belonging to the Chola [q.v.] country, who was invited to Madura by Soondran's wife, herself a Chola princess. On this occasion he impaled eight thousand Jeinas. Before his reconversion to Sheivism he was a hunchback, and hence called Cobja or Coon, but on his reconversion he was straightened, and hence his name was changed to Soondran, the beautiful. He was the last sovereign of the old line of Paundya [q.v.] or Chola-Paundya kings. See vol. I (120); II, 96 [charitram].——*Soondraraman* (சுந்தரராமன் - shundararáman, Tam.). From (sundara, san. beautiful + ráma, san. the hero). Hindoo 2nd or pers. name [peyar].——*Soondraramayyan* (சுந்தரராமய்யன் - shundararámayyan, Tam.). From (sundara, san. beautiful + ráma, san. the hero + aiyyan, tam. master). Hindoo 2nd or pers. name [peyar].——*Soondrashivan* (సుందరశివుడు - sundarashivudu, Tel.). From (sundara, san. beautiful + shiva, san. shiva). Hindoo 2nd or pers. name [peyar].——*Soondravaradan* (சுந்தரவரதன் - shundaravarathan, Tam.). From (sundara, san. beautiful + varada, san. giver of gift); vishnoo, the beautiful. Hindoo 2nd or pers. name [peyar].——*Soondree* (सुन्दरी - sundarí, San. सुंद्री - sundrí, Mahr.; سندری - sundrí, Hind.; ඍඳුරා - etuna, Singh.). Title from hindostany. San. from (sundara, san. beautiful). Hind. from sanscrit. Title otherwise Looking glass plant, from silvery under-surface of leaves. Botanically Heritiera littoralis, dryand, sterculiaceæ [vricsham, 26]. Alias Balanopteris tothila. Tree; leaves oval, rounded at the base; panicles axillary; flowers small, red; sea coast. Wood strong, fibrous and flexible, tolerably close and straight-grained, not durable, light red, turning to reddish brown; not easily worked, used for poles and shafts of carriages, spokes of wheels; makes excellent firewood. Another species is Papilio, a very large tree.——*Soopaury* (سوپاری - súpárí, Hind.). Same as Betel-nut.——*Soorabhy* (सुरभी - surabhí, San.). Means sweet-smelling. The cow of plenty; also called Caumadhain [q.v.].——*Sooshaina*

(సుషేణుడు - sushénudu, Tel.). From (above + séná, san. army). Epithet of Vishnoo [q.v.], who has a good army. Hindoo 2nd or pers. name [peyar].——*Soovarnacam* (सुवर्णक - suvarnaka, San.). From (above + varna, san. color); from flowers. Botanically the Cassia genus, leguminosæ [vricsham, 48]. Erect shrubs or trees, rarely herbs; leaves simple, abruptly pinnate; flowers usually large and showy, in axillary racemes and terminal panicles; pod very variable, flat or cylindrical; of considerable importance from a medical point of view; the genus is much scattered in vernacular terminology. The species best known to the natives are:—absus [black horse-gram], acutifolia [nubian senna], alata [foreign agatty], angustifolia [tinnevelly senna], auriculata [tungaid], fistula [common condray], glauca [tree condray], marginata [red condray], obovata [aleppo senna], occidentalis [casondy], pumila [lowly chakondah], siamea [yellow condray], sophera [stinking casondy], tomentosa [hill tungaid], tora [chakondah]. Other s. indian species indigenous or naturalized are:—Berryana; tree; flowers yellow; flowering towards end of year. Kleinii; suffruticose; flowers small, yellow; travancore. Mimosoides; suffruticose; flowering in rainy season. Montana; large shrub. Timorensis; large shrub common on neilgherries, &c. Wallichiana; suffruticose, branched; flowering in rainy season.——*Soovurma* (സുവർമ്മം - suvarmmam, Mal.). From (above + varmam, mal. mail). Hindoo 2nd or pers. name [peyar].——*Sowbhauyyam* (சௌபாக்கியம் - shaubákkiyam, Tam.). From (above + bhágya, san. good fortune). Hindoo 2nd or pers. name. Applied to males and females. Also taken by native christians [peyar].——*Surat* (سورت - súrat, Hind.). From (above + ráshtra, san. country). Pulipula of Ptolemy. An ancient town on the banks of the Tapty. See vol. I (139), (157).——*Swarna dweepam* (सुवर्णद्वीप - suvarnadvípa, San.). Means gold + island. Perhaps Ireland [britastaun].——*Swarnam* (स्वर्ण - svarna, San.). From (above + varna, san. color). Gold. Proper name common to both sexes among the lower orders. Feminine Swarny, which commonly appears as Shorany [peyar].——*Swarnamookhy* (స్వర్ణముఖి - svarnamukhi, Tel. swarnamukhi *). From (svarna, san. gold + mukha, san. face); named from its rise in the tripatty hills, styled the meroo or the golden mountain. River; North arcot and Nellore districts. Rises near Agastyauchala parvatam in the Chundragherry hills in North arcot district in lat. 13° 28′; long. 79° 09′; just beyond the south-east border of Chundragherry talook; near Paucala, where a gigantic figure of Hanooman [q.v.] is engraved upon a rock. Thence the water rises and flows into a tank, and from the surplus of this it continues. Flowing eastwards nearly parallel to the Northern pennair but veering more to the north-east through Calastry and Vencatagherry zemindarries, it is joined by the Raulla caulwa at Renigoonta. It then flows north-east through Polore division, north-east and east through Goodoor talook and after being joined by the Maumidy caulwa at Goodaly, passes through the villages of Vaucaud, Yargautpulley, Balireddipollem and Poochalapulley, and falls into the Bay of Bengal near Siddhavaram in Goodoor talook at lat. 14° 07′; long. 80° 11′ a little north of Poolicat lake. Has a course of 78 miles through North arcot and 21 miles through Nellore. There is no depth of water at the mouth. Fourteen miles up the river there is a dam, from which channels take off. The East coast canal crosses the river about five or six furlongs from the beach. The chief affluents are the Calyaunanuddy and the Bheemanuddy. The river is held in much reverence. One of the feet of Shiva [q.v.] is supposed to rest upon it, and consequently to celebrate the annual ceremonies [shrauddham] of a deceased parent near its banks is a very meritorious act. The bed is completely dry for the greater part of the year, but during the rainy season in October and November it has a large volume of water. Owing however to its rapid fall this river is seldom in flood for more than a few days at a time.——*Swarnanuddy* (ಸುವರ್ಣನದಿ - suvarnanadi, Can. swarnanadi *). From (svarna, san. gold + nadí, san. river). River; South canara dist., Oodipy tal. Rises in the hills beyond the south-eastern boundary of Oodipy talook; wide but shallow. Navigable as far as Bajey, about 12 miles inland.——*Swarnaudauyam* (स्वर्णादाय - svarnádáya, San.). From (svarna, san. gold + ádá, san. to take). Rent or revenue receivable in money, not in kind [cundauyam].——*Swasticam* (स्वस्तिक - svastika, San.). From (svasti, san. welfare). The front-mark 卐 distinguishing the Tantric sects. Identical with the greek Trigliph. Jeina [q.v.] mark of good luck. A mansion of a particular shape surrounded by a terrace or portico or verandah [q.v.] on north, west and south, with the door on the east.——*Swaustyam* (स्वास्थ्य - svást'hya, San.). From (above + as, san. to be). Lands held by Bramins in their villages or agrahaurams [q.v.] free of rent [inam].

SOO (सु - 'su, *San.*). To distil; generate.——*Sauvanam* (सावन - sávana, San.). From (sava, san. libation). Libatory. A sauvanam day is a natural or civil day from sunrise to sunrise, because libations made each morning or sunrise, besides noon and sunset [dinam, naul, roz, sooryan]. In order to determine its length in sidereal time for every day in the year, there must be established:—What the sun's declination [craunty] is when his longitude or ravy sanyanam [q.v.] is Is; IIs; and IIIs. The lagnam [q.v.], or its right ascension when his longitude is in the said points of the ecliptic [craunty mundalam]. The agram [q.v.] or amplitude of the sun [sooryan] under the same circumstances. The charam [q.v.] or ascensional difference under the same circumstances. The oollagnam [q.v.] or oblique ascension of each sign [raushy] of longitude [sauyanam] counted from the equinoctial points [craunty pautam, vishoo], for the particular latitude [vicshaipam] which is to be computed for [jyotisham].——*Savam* (सव - sava, San.). From (su, san. to extract); extraction of somam [q.v.]. Juice, libation.——*Savitry* (सवितृ - savitri, San.). From (su, san. to generate). A name of Sooryan [q.v.]; also of Saraswaty [q.v.].——*Somachellam* (சோமாச்சலம் - shómáççalam, Tam.). From (sóma, san. moon + achala, san. mountain.). Applies to Chundragherry. Hindoo 2nd or pers. name [peyar].——*Somam* (सोम - sóma, San. and Mahr.; سوملتا - somlatá, Hind.; ಸೋಮಬಳ್ಳಿ - sómaballi, Can.; పుల్లతీగ - pullatíga, Tel.; സോമവല്ലി - sómavalli, Mal.; මුවකිරිය - muvakíriya, Singh.; கொடிக்கள்ளி - kodikkalli, Tam.). Title from sanscrit [hom]. San. from (su, san. to distil); from juice used in sacrifices. Hind. from (sómalatá, san. the plant), meaning moon creeper. Can. from (sóma, can. moon + balli, can. creeper). Tel. from (pulla, tel. sour + tíga, tel. creeper), from acid taste of creeper. Mal. from (sóma, san. moon + valli, mal. creeper). Singh. from (muva, singh. deer + kíriya, singh. milky plant). Tam. from (kodi, tam. creeper + kalli, tam. euphorbia tirucalli, linn.). San. also (sómalatá), meaning moon creeper; (padmakásht'ha), meaning lotus wood. Can. also (hambukalli), meaning creeping + milky-hedge, euphorbia tirucalli, linn. Tel. also (tígajemudu), meaning creeper + euphorbia tirucalli, linn.; (kondapála), meaning hill + milky plant. Title otherwise Creeping milk hedge, Hom of zendavesta, Moon creeper, Poolla teegay, Sour creeper. Botanically Sarcostemma brevistigma, w. and a., asclepiadæ [vricsham, 88]. Alias Asclepias acida; Sarcostemma acidum, viminale. Twining; leafless; umbels terminal or terminating the short lateral branches; calyx and pedicels glabrous; outer stamineous corona ten-plicate, ten-crenate; leaflets of inner corona gibbous on the back, equal to the gynostegium; flowers small, white; flowering in june, august; indigenous to the punjaub and bolaun pass, candeish, the western ghauts and the coromandel coast. The plant yields a quantity of milky juice. Among the ancient aryans a fermented liquor was prepared by mixing its juice, strained through a sieve of goat's hair, with barley [jow] and ghee [q.v.]; this wine was drunk at all their religious ceremonies [yanyam], and was used as an intoxicant by the rishies [q.v.], who in the very early age of hindooism combined it at their meals with beef; for the worship of this beverage the arrangement of the vedam [q.v.] known as the sauma vedam was made; the juice of the plant was regarded as a kind of amritam [q.v.], conferring eternal life and vigour both on gods and men, and is represented as primeval and all-pervading, and finally identified with the supreme being himself; in later times soman was the moon, the ruler of planets [graham], plants, sacrifices [yanyam] and penances [mooskiraut, sharaub]. The raw juice is so mild that travellers suck the tender shoots to allay thirst. Bundles of this put into the trough of the well from which a sugar-cane [q.v.] field is watered, together with bag of common salt [ooppoo], will extirpate white-ants [q.v.] without injuring the sugar-cane. Other common species are:—brunonianum, intermedium.——*Soman* (सोम - sóma, San.; சோமன் - shóman, Tam.). From (su, san. to generate); see soman. The moon [choma, chundran]. Represented in the arts as a white man sitting on a water-lily [indian water-lily], or in a chariot drawn by an antelope [jinka] or by ten horses [ghorah] of the whiteness of jasmine [q.v.]. Hindoo 2nd or pers. name. Familiarly Somoo. Common among non-bramins [peyar].——*Somanautan* (சோமநாதன் - shómanáthan, Tam.). From (sóma, san. moon + nát'ha, san. lord). Shiva, the moon-lord; as wearing crescent moon on head, or as worshipped by the moon. Hindoo 2nd or pers. name [peyar].——*Somarauz* (సోమరాజు - sómarádzu, Tel.). From (sóma, san. moon + rájá, san. king). Hindoo 2nd or pers. name [peyar].——*Somashila* (సోమశిల - sómashila, Tel.). From (sóma, san. the god shiva + shilá, san. stone). Sanscrit name (sóméshvara), meaning shiva, the moon-lord. Village; Nellore dist., Atmacore tal.; pop. 484; acres 1,079; lat. 14° 30′; long. 79° 21′; from Atmacore W.S.W. 23 miles; from Nellore W. 45 miles. Shrotriem [q.v.] village. At foot of Veligondas where Pennair enters Nellore district. Celebrated temple to Someshwaran with festival in May lasting five days. Government spent one lac [q.v.] of rupees for construction of anicut [q.v.], but abandoned it as not profitable.——*Somasoondran* (சோமசுந்தரம் - shómasundaram, Tam.). From (sóma, san. moon + sundara, san. an epithet of shiva); shiva with the moon on his head. Hindoo 2nd or pers. name [peyar].——*Soma vauram* (सोमवार - sómavára, San.). From (sóma, san. moon + vára, san. day). Monday [vauram].——*Someshwaram* (సోమేశ్వరము - sóméshvaramu, Tel.). From (sóma, san. moon + íshvara, san. lord); from shiva, the moon lord. Same as Somashila.——*Someshwaran* (सोमेश्वर - soméshvara, San.). From (sóma, san. moon + ishvara, san. god). Shiva.——*Sompett* (సోంపేట - sómpéta, Tel. sómpet *). From (sóma, san. shiva, the moon-lord + péta, tel. suburb).—"*a*" Deputy tahsildarry, Ganjam district. Pay Rs. 70.—

"*b*" Town, Deputy tahsildar's station; Ganjam dist., Jalantra and Cheekaty zemindarries; pop. Cheekaty talook 1,760; Cheekaty 1,636; acres 422; lat. 18° 56′; long. 84° 38′; from Balligooda S.S.E. 95 miles; from Berhampore S.S.W. 29 miles; from Chetterpore S.W. 40 miles; from Chicacole N.E. 63 miles; from Madras N.N.E. 485 miles; from Russellcondah S. 70 miles; from the sea W. 5 miles. Off high road between Berhampore and Chicacole, but connected with it by a road distant 2 miles from public bungalow [q.v.] at Cunchily. The road to Sompett is continued to the neighbouring port of Barwah, from which Sompett is distant 6 miles. Old temple of Someshwaran. A large swamp near Sompett affords shooting. Contains Paulavalsa, Pudmye, Raty beacon, Yalmel, trig. stations.——*Somraj* (سومراج - somráj, Hind.). Shining white like the moon. Plant name common to:—Pæderia fœtida and Vernonia anthelmintica; see gloss. paragraphs.——*Somyaujee* (సోమయాజి - sómayáji, Tel.). From (sóma, san. the plant + yájí, san. sacrificer). Generally a title among bramins who perform a sacrifice [peyar, yanyam]. So Hindoo 2nd or pers. name.——*Sooradah* (సురదా - suradá,* Tel.). From (surá, san. water + gada, oor. fort), from situation.—"*a*" Deputy tahsildarry; Ganjam district. Pay Rs. 100.—"*b*" Town, Deputy tahsildar's station; Ganjam dist., Goomsoor tal.; pop. 4,022; acres 685; lat. 19° 45′; long. 84° 29′; from Balligooda S.E. 46 miles; from Berhampore N.N.W. 38 miles; from Chetterpore W.N.W. 44 miles; from Chicacole N.N.E. 106 miles; from Madras N.N.E. 530 miles; from Russellcondah S.W. 17 miles. On Rooshcoolya. Formerly a zemindarry [q.v.]. The zemindar having died without issue in 1830, estate was purchased by Dhananjaya bhoonj, Zemindar of Goomsoor, in 1333 for Rs. 8,000 and merged in Goomsoor talook. Ruined fort.——*Soorah devy* (सुरादेवी - surádéví, San.). From (surá, san. wine + déví, san. goddess). The goddess of wine. Sometimes used to signify the year.——*Sooray* (सुरा - surá, San.). From (su, san. to extract juice). Wine [angoor].

SOOBAH (صوبه - súbah, *Hind*). From arabic. A province, especially of the Moghul empire; as the soobah of Deccan, Bengal, &c. Acbar's empire was divided into fifteen soobahs, twelve in Hindostan [q.v.] and three in the Deccan [q.v.]. Compare Zillah. Soobahdar is the governor of a province. Also native military officer corresponding to english Captain. The soobahdar-major used to be the native commissioned officer of the highest rank in an infantry or cavalry regiment, then came in order the soobahdar, the jemadar, the havildar, and the naick. For the corresponding officers of irregular cavalry, see under Rissaldar. Under the new organization each of the eight companies of an infantry regiment has one soobahdar, one jemadar [q.v.], five havildars [q.v.], and five naicks [q.v.].

SOOBHAUN (سبحان - subhán, *Hind*.). From (sabaha, ar. to praise). Praise. As an attribute of God, all perfect [allah]. Common alam, as Abd oos soobhaun, slave of god [ism].

SOOCSHMAM (सूक्ष्म - súkshma, *San*.). From (súch, san. to pierce); sharp. Subtle or atomic.——*Soocshma shareeram* (सूक्ष्मशरीर - súkshmasharíra, San.). From (above + sharíra, san. body). One of the three shareerams or corporeal forms according to the Vedauntam [q.v.] philosophy, the fine material form; the other two being the Caurana shareeram and the Stoola shareeram [q.v.]. Compare Cosham and Punchacosham.

SOOFAID (سفید - sufed, *Pers*.). White. Plant first term often joining two genera. Ex.:—Eriodendron anfractuosum (sufedsembal), white bombax malabaricum.——*Soofaid moosly* (سفید موصلی - sufedmúslí, Hind.). Means white asparagopsis. See sep. title.——*Soofaid soombul* (शङ्खविष - shankhavisha, San.; سم الفار - sammulfár, Ar.; مرگ موش - margmúsh, Pers.; سفید سنبل - sufedsumbul, Hind.; سنکیا سنبل - sankiyásumbul, Dec.; ورنگن پوتهی - waranganputih, Malay; ಪಾಷಾಣ - páshána, Can. and Too.; తెల్లపాషాణము - tellapáshánamu, Tel.; വെള്ളപ്പാഷാണം - vellappáshánam, Mal.; සුදුපාසානම - sudupásánam, Singh.; வெள்ளைப்பாடாணம் - vellaippádánam, Tam.). Title from hindostany. San. from (shankha, san. conch + visha, san. poison); poison white like conch. Ar. from (samm, ar. poison + fár, ar. rat). Pers. from (marg, pers. death + músh, pers. rat). Hind. from (sufed, hind. white + sumbul, ar. arsenic). Dec. from (sankh, hind. conch + sumbul, pers. arsenic). Malay from (warangan, malay, arsenic + putih, malay, white). Tel. from (tella, tel. white + páshánamu, tel. arsenic). Mal. from (vella, mal. white + páshánam, mal. arsenic). Singh. from (sudu, singh. white + páshána, san. arsenic). Tam. from (vellai, tam. white + pádánam, tam. arsenic). San. also (shvétapáshána), meaning white stone. Ar. also (shuk); (turábulhálik), meaning fatal earth. Hind. also (sumbulkhár), meaning arsenic acid. Tel. also (shankhapáshánamu), meaning conch shell + arsenic. White arsenic. Otherwise Arsenious acid, White oxide of arsenic. Arsenicum album, Acidum arseniosum of chemists. An anhydrous acid, obtained by roasting arsenical ores and purified by sublimation; as found in bazaars is not pure, and is an import; some comes from china. Is an irritant poison. Veidyans [q.v.] employ thus; alterative, tonic and antiperiodic in medicinal doses, and powerfully poisonous in larger quantities; useful in ague, ticdouloureux, hemicrania, chorea, epilepsy, hooping cough, asthma, and some chronic skin diseases, including leprosy [cooshtam]; also employed in chronic rheumatism, cancer, uterine congestion, menorrhagia, snake bites, and chronic catarrhal affections; substituted for british quinine [koinah]. Pharm. has acidum arseniosum, alterative, tonic, antiperiodic, in large doses powerfully poisonous; preparations, liquor arsenicalis or fowler's solution, liquor arsenici hydrochloricus. Used in the manufacture of glass [cunnaudy], dyeing [shauyam], &c. [paushaunam].

SOOFEE (صوفی - súfí, *Hind*.). From (súfah, ar. a tribe of arabs). Mystic philosophers amongst Mahomedans named after certain members of the Soofa arab tribe, who engaged themselves exclusively in the service of the Mecca temple. Here nearly equivalent to Masheikhs [q.v.]. Of all systems of philosophy, which after the death of the prophet influenced the conception of the several classes of the Moslem [q.v.] society, Soofeeism stands pre-eminent. It was founded on the teachings of the prophet himself, given to a select few of whom Ally and Aboo bakr were the chief in regard to the esoteric significance to be attached to the words of the koran [q.v.] and as based on the inner conviction of divine pervasion, with strict instructions to them not to divulge it. Cf. Maud. Soofeeism did not develop itself during the lifetime of the prophet; for performance of duty was then considered the most important observance. Till about the tenth century these mysteries passed from soul to soul, when they were divulged, and from their similarity to the new platonic ideas regarding the union of human intellect with universal reason attracted the attention of the numerous Shiite [shiah] gnostics then existing in Persia; and thence as a consequence of intercourse with India Soofeeism began to be diffused in other channels and departed from its original aim. Mysticism as practised by fakeers [q.v.] of the present day is an offshoot of the above. Alghazzauly commonly called algazel in europe, Jelaloodden of masnavee, the lyric Hafiz, the moralist Saady and the romance-writer Nizamy, were all Soofees. The system is akin to the south indian Vedantism [vedauntam]. The following are the doctrinal views:—"*a*" God only exists; He in all things, and all things in him.—"*b*" All visible and invisible beings are an emanation from him, and are not really distinct from him.—"*c*" Religions are matters of indifference; they however serve as leading to realities. Some for this purpose are more advantageous than others, among which is Al islam, and of this Soofeeism is the true philosophy.—"*d*" There does not really exist any difference between good and evil, for all is reduced to unity and God is the real author of the acts of mankind.—"*e*" It is God who fixes the will of man; man therefore is not free in his actions.—"*f*" The soul existed before the body, and is confined within the latter as in a cage. Death therefore should be the object of the wishes of the Soofee, for it is then that he returns to the bosom of divinity.—"*g*" It is by this metempsychosis that souls which have not fulfilled their destination here below are purified and become worthy of reunion with God.—"*h*" Without the grace of God, or Fazl ool lah, no one can attain to spiritual union, but this can be obtained by fervently asking for it.—"*i*" The principal occupation of the devout, whilst in the body, is meditation on the Wadaanyat or unity of God, the remembrance of God's names, and the progressive advancement in the Tareekat or journey of life, so as to attain unification with God.—"*j*" The following are the stages of Tareekat. The first stage is humanity or nasoot, in which the disciple must live according to the law or shareeyat and observe all the rites, customs, and precepts of his religion. The second is the nature of angels or malacoot, for which there is the pathway of purity. The third is the possession of power or jabroot, for which there is knowledge or maurifut. The fourth is extinction or fanah, that is to say absorption into the deity, for which there is truth or hakeekat. Compare the four stages of tamul sheivism under Sheiva siddhauntam.—"*k*" There are three aids necessary to conduct the traveller on his path:—attraction or Injizaub; devotion or Ibaudat; elevation or Oorooj.

SOOGAULY (సుకాలి - sukáli, *Tel*.). Another name of Lumbaudies [q.v.].——*Soocaury* (సుకారి - sukári, Tel.). Same as Soogauly.

SOOHAUG (سہاگ - suhág, *Hind*.). Short for Moosa soohaug, founder of a class of fakeers [q.v.].——*Soohaugiya* (سہاگیہ - suhágiyah, Hind.). An order of fakeers. Followers of Moosa soohaug. They wear a cap and some female ornaments on the wrists, and are generally musicians and songsters, play upon tambore [q.v.], sitaur [q.v.], veenay [q.v.], &c.

SOOJEE (سوجی - sújí, *Hind*.) The fine flour made from the heart of wheat [geung], used to make bread [rotee] for English tables. It is prepared by grinding between two millstones which are not in close contact. Also a kind of porridge made with the above.

SOOJNEE (سوزنی - sozní, *Hind*.). From (sozan, pers. needle). A thick material of dark red cotton, with large diaper pattern in bleached cotton [q.v.], woven in the colored material. Used as a counterpane [palampore].

SOOKHAM (सुख - sukha, *San*.). From (sukh, san to please). Happiness, ease.——*Sooggy* (ಸುಗ್ಗಿ - suggi, Can.). From (sukhi,

san. happy). Harvest [fuel] time.——*Sookhavausy* (सुखवासी - sukhavási, San.). From (above + vásí, san. one who lives). One who lives at his ease by rented lands.

SOOKKAUN (سکان - sukkán, *Hind.*). From (sakana, ar. to rest). A rudder.——*Secunny* (سکانی - sukkání, Hind.). From (sukkán, ar. helm). Steersman or quartermaster.

SOOKTY (سوکھتی - súkhtí, *Hind.*). Means parched. Withered crop [shauvy].

SOOLEY (ಸೂಳೆ - súle, *Can.*). From (shúlá, san. harlot). Dancing girl [dausy].——*Soolekerey* (ಸೂಳೆಕೆರೆ - súlekere, Can.; sulekere, Mys. Gov.). From (above + kere, can. tank). The largest tank in Mysore; in middle of the Chennagherry talook, Shimoga district. Margin 40 miles round.——*Sooloorpett* (సూళూరుపేట - súlúrupéta, Tel.). From (above + úru, tel. village + péta, tel. suburb). Village, Head-quarters of Deputy tahsildar, Nellore dist., Polore division tal.; pop. 1,265; lat. 13° 42′; long. 80° 04′; from Madras N.N.W. 48 miles; from Naidoopett S.S.E. 17 miles; from Nellore S. 52 miles; from Ongole S. 125 miles; from Polore E. 1¾ mile; from Raupore S.E. 47¾ miles. Chief town of one of the two southern divisions of Vencatagherry zemindarry on the great northern road. Manufacture of handkerchiefs [roomaul]. On the left bank of the Caulingy river and on the great trunk road [polore].

SOOLIMAN (سلیمان - sulaimán, *Ar.*). Solomon. Mahomedan alam, as Sooliman khan, alam + alaumat [ism].——*Sooliman moorghy* (गरुड - garuda, San. and Mahr.; سلیمان مرغی - sulaimánmurghí, Hind.; ಗರುಡ - garuda, Can.; മലമുഴക്കി - malamuzhakki, Mal.). San. from (garut, san. wing + dí, san. to fly) [braminy kite, garoodan]. Hind. means solomon's fowl. Can. like sanscrit. Mal. from (mala, mountain + muzhakku, mal. to cause to resound). Hind. also (hemráí), meaning gold + king; (banráí), meaning forest king; (gərarpakh), meaning braminy kite bird. Bucerotidæ family, fissirostres, insessores, aves [pacshy, 11], of naturalists [jantoo]. Hornbills. Bill enormous, arched or curved, often with appendage or casque on upper mandible; usually live in pairs, most associating, at times, in small flocks; live almost entirely on fruit, which they swallow whole, tossing it up in the air after separating it from the tree, and catching it again. Nestle in holes of trees, laying three or four white eggs; and male bird plasters the female up in the hole with mud, only allowing her bill to protrude, by which he feeds. The voice is harsh.—"*a*" The Great hornbill or Rhinoceros hornbill is Homraius bicornis. Alias Buceros cavatus, homrai. A silent bird, making merely a deep but not very loud croak; flies with repeated flappings of its wings; noise of its wings can be heard more than a mile distant; at the root of tail above is a small sac, in which is a bundle or pencil of short bristles, forming a brush, from which exudes a yellow oily secretion, and with this the bird appears to dress the white wing-spot; is sacred to Vishnoo [q.v.]; does not reach its full size under two or three years.—"*b*" The Malabar pied hornbill is Hydrocissa coronata, alias Buceros pica, malabaricus, monoceros. Black; beneath pure white; very fond of the fruit of the koochlah or Strychnos nux-vomica [poison nut]; very noisy.—"*c*" The Common grey hornbill is Meniceros bicornis, alias Buceros gingianus, cineraceus, griseus, oxyurus. Has a loud sharp cry; the flesh is used medicinally to alleviate the pangs of child birth.—"*d*" The jungle grey hornbill is Tockus gingalensis, alias Buceros pyrrhopygus; Malabar.

SOOMMAH (சும்மா - shummá, *Tam.*). Means without putting the burden on one's head. So quietly, in a leisurely way. As an exclamation, keep quiet [choop].

SOONGNAH (سونگنے کا نمک - súngnekánamak, *Hind.*; నవాసారుప్పు - navásárauppu, *Tel.*; நவச்சாரக்கிராணம் - navaççárakkiránam, *Tam.*). Hind. from (súngná, hind. smelling + namak, hind. salt). Tel. from (navásáramu, tel. sal ammoniac + uppu, tel. salt). Tam. from (navaççáram, tam. sal ammoniac + ghrána, san. smell). Volatile salt of sal ammoniac [nowshaudar]. Sal volatile of chemists. Smelling salts. Prepared by natives in the following manner:—sal ammoniac [nowshaudar], one pollum [q.v.]; chalk [sheemay choonam], two pollums; dry ingredients carefully, then mix and sublime with strong heat. Veidyans [q.v.] do not administer internally, but use as local stimulant to nose, in fainting fits, languors, and hysteria.

SOONKAM (సుంకము - sunkamu, *Tel.*). From (shulka, san. duty). Duty on goods [choongam].

SOONKOO (సుంకు - sunku, *Tel.*). Flower.——*Soonkesala* (సుంకేసల - sunkésala, Tel.). Means the tiger bean flower [soonkeshwaram]. As having many of these trees.—"*a*" Village; Kurnool dist., Ramalcottah tal.; pop. 416; acres 1,668; lat. 15° 52′; long. 77° 52′; from Kurnool W.N.W. 16 miles. Anicut constructed across Toongabudra, which supplies the Kurnool-Cuddapah canal. Partially breached in 1864.—"*b*" Gap in Eastern ghauts, through which Cheyair finds its way to Pennair [cheyair].——*Soonkeshwaram* (ಸುಂಕಾಸರಿ - sunkásari, Can.; సుంకేశ్వరము - sunkéshvaramu, Tel.; வாதநாராயணம் - váthanáráyanam, Tam.). Title from teloogoo. Can. from teloogoo. Tel. from (sunku, tel. blossom + íshvara, san. lord), from the great number of beautiful red flowers. Tam. from (váta, san. nervous disease + náráyana, san. the deity); useful in rheumatism, grows near water's edge. Can. also (nírangi); (sunkatti), by corruption. Tel. also (chitikéshvaramu); (sunkésala), by corruption. Title otherwise Indian poinciana, Tiger bean so called from general appearance. Botanically Poinciana [ratnagandhy] elata, linn., leguminosæ [vricsham, 48]. Alias Cæsalpinia elata; Poinciana indica. Arboreous, unarmed; leaflets linear, obtuse; flower-buds obovate-oblong, acute; calyx more or less pubescent or shortly villous, particularly on the inside; sepals coriaceous, equal, lanceolate, acute; æstivation valvular; petals fringed; ovary villous; legume flat-compressed, several-seeded. A large tree; bears in the hot season racemes of the large, gaudy, yellow flowers; abundant in a planted state in avenues [shaulay], topes [q.v.], gardens, native cemeteries [shavacaud], &c. Gum [gond] dark-colored and mucilaginous. Leaves good for rheumatism and flatulence; used by women after confinement. Leaves used for manuring indigo [q.v.]; tree used as a protection for the footings of rivers and channel banks; grows quickly, gives a good shade; gives a gum. Wood yellow; tolerably close and even-grained, easily worked and gives smooth surface, warps slightly, but never cracks.

SOONNAT (سنت - sunnah, *Hind.*). From (sunan, ar. path). Traditions [hadees], especially those which record the sayings or doings of the prophet [mahomed] on questions religious, moral, ceremonial, and doctrinal. By Soonnees considered as supplement to Koran [q.v.]; rejected as apocryphal by Shiahs [q.v.].——*Soonnee* (سنی - sunní, Hind.). From (sunnat, ar. law). One of the two main religious divisions of Mahomedans [q.v.]. Their tenets are, deference to tradition [hadees], and affirmation of lawful succession of the first four Caliphs [q.v.], Aboo bakr, Omar, Osman, and Ally, in opposition to the Shiahs [q.v.], who denounce the three first as usurpers. Soonnees are sometimes termed Yaury, or votaries of the four friends [charyauree]. Most educated Indian mahomedans are Soonnees. The Soonnees maintain with respect to the alleged express appointment by Mahomed of Ally as his immediate successor, that if it had been so Aboo bakr would not have been unanimously recognized imaum and that Ally himself would not have hesitated to assert his right as he did later on when Mooauviyah disputed his succession, while on the contrary the nomination of Aboo bakr to lead the prayers during the prophet's illness and the readiness with which Ally then took the oath of allegiance point to a different conclusion. As to the general question of appointment or election of imaum the Soonnees hold that, as the office is for the benefit of the community, it is dependent on the choice of the people and need not be restricted to the family of Mahomed, the first three Caliphs not having been so restricted; nor must he necessarily be the most excellent just or virtuous of all, distinction in this respect being difficult. They believe that the last imaum [mahdee] is not yet born and will appear with the coming of Jesus at the Resurrection. They believe in saints [walee], ijmah [q.v.], keeyah [q.v.] and traditions which stand the test of certain rules of criticism as supplementary to Koran [q.v.]. Soonnees are sub-divided into four sects, named after four eminent orthodox Imaums or doctors of the law [moojtahid], who decided in conformity with Koranic ordinances and traditions handed down in regular succession questions regarding which Mahomet had given no explicit direction, and whom such sects implicitly obey in regard to the construction and interpretation of law [takleed]. These are as follows:—"*a*" Aboo haneefa, born A.H. 80. Called also Imaum i auzam or the highest Imaum. Founder of the first school. He admitted very few traditions as authoritative in his system, which claims to be a logical development from the Koran and permits the right of private judgment. His doctrines prevail all over India, Egypt, Central asia and Turkey, and are followed largely by syeds [q.v.], sheikhs [q.v.], pataups [q.v.] and moghuls [q.v.].—"*b*" Maulik, born A.H. 93, founded his system on the customs of Medina. He arranged and systematized the traditions current there, and formed a historical and traditional system of jurisprudence embracing the whole sphere of life. His tenets are not known to prevail in India.—"*c*" Shaufee, born A.H. 150. An eclectic system from the works of the two previous Imaums, and requiring a considerable number of traditions in proof of any single point. In offering prayer the followers put the hands on the breast or shoulder, the thumbs touching the lobes of the ear. His doctrines have some currency along the sea-coast; the Nivayats [q.v.] and Lubbays [q.v.] belong to this sect.—"*d*" Ibn e hambal, born A.H. 164, professed excessive veneration for the Koran as uncreated and eternal. There are none of this sect in India.

SOOR (शूकर - shúkara, *San.*; خنزیر - khinzír, *Ar.*; خوک - khok, *Pers.*; سور - súwar, *Hind.*; بابی - babi, *Malay*; ಹಂದಿ - handi, *Can.*; ಪಂಜಿ - panji, *Too.*; పంది - pandi, *Tel.*; പന്നി - panni, *Mal.*; ඌරා - úrá, *Singh.*; பன்றி - panri, *Tam.*). Title from hindostany. San. from (shú, san. grunt + kri, san. to make). Ar. from (khuzara, ar. contracted eyes). Hind. from sanscrit. Singh. from (varáha, san. boar). Tam. from (pari, tam. to dig). Dec. also (burájánwar), meaning bad animal. Title otherwise Pig. Sus indicus, suidæ, artiodactyla, ungulata, mammalia

[sastanam, 22], of naturalists [jantoo]. The domesticated pig. Common breed met with here, not much prized, long legged, not easily fattened; better kind often brought from China, with shorter legs. Very inferior to the tame hog of Europe. It is however used extensively by the lowest castes for food. The melted fat of pigs is used by them as a substitute for ghee [q.v.]. The lard from the flank is used as in Europe for ointments and plasters. From the lard is expressed a clear oil.——*Jungly soor* (वराह - varáha, San.; डुकर - dukara, Mahr.; جنگلی سور - janglísúwar, Hind.; بابیوتن - babiutan, Malay; ಹಂದಿ - handi, Can.; ಕಾಡುಪಂಜಿ - kádupanji, Too.; పంది - pandi, Tel.; ବରିହା - bariha, Oor.; കാട്ടുപന്നി - káttupanni, Mal.; වලුරා - valúrá, Singh.; காட்டுப்பன்றி - káttuppanri, Tam.). San. from (vrih, san. to root up). Mahr. from (súkara, san. hog). Hind. from (janglí, hind. wild + súwar, hind. hog). Malay from (babi, malay, hog + utan, malay, wild). Too. from (kádu, too. wild + panji, too. pig). Mal. from (kátu, mal. forest + panni, mal. hog). Singh. from (val, singh. wild + úrá, singh. hog). Tam. from (kádu, tam. forest + panri, tam. hog). Tam. also (kunrikkannan), meaning goomchy [q.v.] seed + eye; from the redness of its eyes; (eruzhi), meaning burning eyed. The feral type of Sus indicus, or the Indian wild boar. Head longer and more pointed than in the European or German boar; the plane of the forehead straight and not concave; ears small and pointed; tail more tufted; the malar beard well marked. The Indian is altogether a more active looking animal; the German having a stronger and heavier appearance. The same differences are perceptible in the domesticated individuals of the two countries. Length of a tolerably fine boar, 5 feet to root of tail which is one foot. Stands a little over 30 inches high at the shoulder. Color of the adult, brownish black, scantily covered with black hairs. Besides the black recumbent mane of the occiput and back, and the whiskers and the bristles above and below the eyes, there is a bundle of long black bristles on the throat, and the hairs of the throat and chest are reversed. The tail is scantily covered with short hairs, and the apex compressed, with long lateral bristles like those of the elephant [q.v.], arranged like the rings of an arrow. The young is more hairy, of a tawny or fulvous color and striped with dark brown. The hairs of the throat, chest, abdomen and elbows, in the two latter places very long, are black on the basal and white at the apical half. Found wherever there is sufficient shelter either of long grass, low jungle, or forest. Does much damage to crops. Has been detected feeding on the carcass of a dead elephant [q.v.]. Spearing the wild boar is a favorite sport. The speed of the wild hog for a short distance is surprising. In Madras a long spear is used lancewise. The bristles of the boar are removed while the animal is still alive and used by goldsmiths [tattaun] and Boojarry [q.v.] bramins to clean their jewels [nagay] and idols [shilay, vigraham] with. Indian species not here found are:—Porcula salvania or pigmy hog of the saul forests, Sus andamanensis or andaman island pig, Sus moupinensis, Sus scrofa or european wild boar.——*Shookaram* (शूकर - shúkara, San.). San. means hog; hog-attracting. Title otherwise Club-moss. Botanically Selaginella imbricata, spreng., lycopodiaceæ [vricsham, 158].

SOORAH (சுறா - shurá, *Tam*). From (shuruthi, tam. swift). Sea-shark. The genus Carcharias, carchariidæ, selachoidei, plagiostomata, chondropterygii, pisces [matsyam, 46], of naturalists [jantoo]. The species of this genus best known to the natives are:—black, gray, red, white. Cf. also:—dun, fawn colored, great white, hammer-headed, malabar, two-spotted, yellow, zebra, which are of other genera. Sharks are found all along the coast of the presidency; in some years much more numerous than in others. This is due to the presence or absence of shoals of smaller fish, as sardines. Captured to a large extent both for the oil obtained from their livers and on account of the flesh of those of medium size, which is salted and sold to the poor; their fins likewise are exported to china, where due to the gelatine contained in them they are in request for making soups; the skins of some forms are employed as shagreen for scabbards of swords; in most localities they are captured by baits secured to a rough hook, which is attached to a chain; the most frequent accidents occurring are after the fish has been hooked and lifted into the fisherman's boat; corpses are almost immediately attacked by sharks; multitudes of the young are daily caught, and the numbers of the ferocious creatures are kept down in this way; as it is, they are sufficiently dangerous, carrying off those gathering shells for the manufacture of lime [choonam], or diving in the sea outside the rocks for shell-fish, or fishermen who may fall into the water; if a shark once seizes a man it never lets go, but in rare cases agile men may escape with the loss of one or both hands, or a leg. Flesh supposed by hindoo medical writers to have peculiar virtues in several diseases; particularly noticed by agastyan [q.v.], in his work ayiram, as a diet in rheumatic affections. The name Fresh-water shark [q.v.] has been given to several of the siluridæ [kizhautty], as indicative of their voracity.——*Black shark* (जटाजूट - jatájúta, Mahr.; కొర్రముత్తెసొర్ర - korramuttesorra, Tel.; மணிச்சுறா - maniççurá, Tam.). Title from dorsal deep black. Mahr. means hair tuft on head. Tel. from (korra, tel. dart + mutte, tel. snout + sorra, tel. shark, carcharias genus); from long snout. Tam. from (mani, tam. black + shurá, tam. shark, carcharias genus). Tel. also (sigasorra); meaning tuft of hair in the head + shark, carcharias genus. Title otherwise Jutjot. Carcharias [soorah] menisorrah, carchariidæ, selachoidei, plagiostomata, chondropterygii [matsyam, 46], of naturalists. Specific name from tamul. Alias Carcharias malabaricus, tjutjot; Prionodon menisorrah; tjutjot from mahratta. Very small groove at the angle of the mouth extending a short distance on to the upper jaw; gray above, white below; upper half of second dorsal deep black; calicut; twelve feet or more.——*Dun shark* (పాలసొర్ర - pálasorra, Tel.). Tel. from (pála, tel. white + sorra, tel. shark, carcharias genus). Mustelus manazo, carchariidæ, selachoidei, plagiostomata, chondropterygii [matsyam, 46], of naturalists [jantoo]. Alias Mustelus vulgaris. Snout produced and pointed; well-developed labial fold at the angles of the mouth; reddish gray superiorly, becoming dull white beneath; posterior extremity of the caudal of a dark color; sea. No other common species here.——*Fawn-colored shark* (बालवाल - bálavála, Mahr.; బొక్కిసొర్ర - bokkisorrah, Tel.; ഏട്ടി - étti, Mal.; குரங்கன்சுறா - kurangansurá, Tam.). Tel. from (bokki, tel. toothless + sorra, tel. shark, carcharias genus). Mal. from (étta, mal. elder); mischievous. Tam. from (kurangam, tam. deer + shurá, tam. shark, carcharias genus); from fawn color [zebra shark]. Mahr. also (dantáli), meaning prominent toothed. Tel. also (rágisorra), meaning copper + shark. Title otherwise Dentel shark, Dog fish. Chiloscyllium indicum, scylliidæ, plagiostomata, chondropterygii [matsyam, 47], of naturalists [jantoo]. Alias Chiloscyllium plagiosum, tuberculatum; Hemiscyllium malayanum; Scyllium freycineti, griseum, hasseltii, ornatum, phymatodes, plagiosum; Squale dentelé; Squalus caudatus, indicus, gronovianus, tuberculatus; Synchismus tuberculatus; dentelé from mahratta. Head rather depressed, flatter inferiorly than superiorly; lips surround the mouth, the lower labial fold being continuous; colors vary exceedingly; usually gray with dark, even black, cross-bands, which may or may not include white spots; sometimes the cross-bands break up into spots or bands, having dark edges; or the fish is simply of a reddish brown color; sea to the malay archipelago. No other common species here.——*Gray shark* (పాలసొర్ర - pálasorra, Tel.). Tel. from (pála, tel. white + sorra, tel. shark, carcharias genus). Carcharias [soorah] macloti, carchariidæ, selachoidei, plagiostomata; chondropterygii [matsyam, 46], of naturalists. Alias Hypoprion macloti. Short groove at the angle of the mouth, not extending on to the upper jaw; nostrils nearer to the opening of the mouth than to the end of the snout; gray or brown, becoming dull white beneath; the fins gray, the caudal nearly black in its posterior half; outer half of first dorsal dark; pectoral and ventral with a light edge; sea.——*Great white shark* (سفید شورا - sufedshorá, Hind.; வெள்ளைச்சுறா - vellaiççurá, Tam.). Hind. from (sufed, hind. white + shorá, hind. shark, carcharias genus). Tam. from (vellai, tam. white + shurá, tam. shark, carcharias genus). Pristis zysron, pristidæ, batoidei, plagiostomata, chondropterygii [matsyam, 48], of naturalists [jantoo]. Alias Pristis dubius, pectinatus. Sandy-brown, becoming lighter beneath; sea; at least 20 feet. Pristis cuspidatus is the Saw-fish.——*Hammer-headed shark* (తప్పసొర్ర - tsappasorrah, Tel.; കൊമ്പൻസ്രാവ് - kombanshrávu, Mal.; கொம்பன்சுறா - kombansurá, Tam.). Tel. from (tsappa, tel. flat + sorra, tel. shark, carcharias genus). Mal. from (kombu, mal. tusk + shrávu, mal. shark, carcharias genus). Tam. from (kombu, tam. tusk + shurá, tam. shark, carcharias genus); cf. macrones aor. Zygæna blochii, carchariidæ, selachoidei, plagiostomata, chondropterygii [matsyam, 46], of naturalists [jantoo]. Alias Sphyrna blochii; Zygæna laticeps. Nostril much nearer the mouth than the eye; deep gray or brownish-gray, becoming lighter beneath; the fins are usually of a slightly deeper color than the body; commonest form on the malabar coast where it attains very large size; sea. Zygæna malleus is the English hammer-headed shark.——*Malabar shark* (कालगाग्लि - kálagagli, Mahr.; వాలుగ - válugu, Tel.; മങ്കിവാള - mankíválа, Mal.). Mahr. from (kála, san. black + gagli, mahr. callichrous bimaculatus); from fins. Tel. from (válu, tel. long). Mal. from (mannu, mal. to grow pale + vála, mal. wallago attu). Callichrous [butter fish] malabaricus, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Alias Silurus malabaricus; Wallago malabaricus; Wallago from teloogoo. Lower jaw strongly prominent; deep grayish-brown shot with purple, fin membranes densely spotted with black; malabar coast up to 20 inches in length. For another callichrous see Two spotted shark.——*Red shark* (సెంసొర్ర - semsorrah, Tel.; செஞ்சுறா - sheñjurá, Tam.). Tel. means red shark. Tam. from (shem, tam. red + shurá, tam. shark, carcharias genus). Tam. also (paruváyççurá), meaning great + mouth + shark, carcharias genus. Carcharias [soorah] acutus, carchariidæ, selachoidei, plagiostomata, chondropterygii [matsyam, 46], of naturalists. Alias Scoliodon acutus; Squalus russellii. Nostrils nearer to mouth than to the end of the snout; gray or bronze above, white below; fins gray, the posterior edge of pectoral, outer edges of ventral, anal and posterior half of caudal, white; upper edge of caudal dark, as is also its posterior lobe; sea; on malabar coast attain considerable size.——*Two-spotted shark* (गाग्लि - gagli, Mahr.; ಗೊಡ್ಲೆ - godle, Can.; డొకుడుము - dúkudúmu, Tel.; ପୋବ୍ଟା - pobtá, Oor.; சொட்டைவாளை - shottaiválai, Tam.). Title from black spots.

(shottai, tam. depressed spot + válai, tam. wallago [attu]. Tel. also (váluga), meaning long fish. Tam. also (shélaválai). Title otherwise Butter fish. Callichrous [butter fish] bimaculatus, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Alias Callichrous affinis, canio, ceylonensis, chechra, immaculatus, nebulosus; Ompok siluroides; Phalacronotus siluroides; Pseudosilurus bimaculatus; Schilbe pabo; Silurus bimaculatus, canio, chechra, duda, indicus, microcephalus, mysoricus; Wallago microcephalus; wallago from teloogoo. Fresh-water; eyes opposite angle of the mouth, lower jaw very prominent; colors silvery shot with purple, a black spot on the shoulder behind the gill-opening and above the middle of the pectoral fin; in some specimens this black spot is much better defined than in others; occasionally the caudal fin is tipped with black; dark tipped caudal fins are uncommon inland; at least a foot and-a-half in length; excellent food, considerably used by europeans. For another callichrous see Malabar shark.—— *White shark* (పాలసొర - pálasorra, Tel.). Tel. from (pála, tel. white + sorra, tel. shark, carcharias genus), cf. mustelus manazo. Tel. also (nallasorra), meaning black + shark, carcharias genus. Carcharias [soorah] laticaudus, carchariidæ, selachoidei, plagiostomata, chondropterygii [matsyam, 46], of naturalists. Alias Carcharias palasorrah, macrorhynchus; Scoliodon laticaudus; Squalus pala-sorrah. Uniform gray superiorly, white beneath; pectoral of a deep gray, having a white outer edge, as have also the ventral and anal, posterior portion of caudal fin dark gray or nearly black; sea; at least two feet in length.—— *Yellow shark* (కిట్టలసొర - kittalasorra, Tel.; வழுவன்சுறா - vazhuvansurá, Tam.). Tel. from (gitta, tel. claw of a scorpion or crab + sorra, tel. shark, carcharias genus). Tam. from (vazhu, tam. to slip + surá, tam. shark, carcharias genus); from slipperiness of body; cf. silundia. Galeocerdo rayneri, carchariidæ, selachoidei, plagiostomata, chondropterygii [matsyam, 46], of naturalists [jantoo]. Alias Galeocerdo tigrinus. Dark gray superiorly, dull white beneath; cheeks and lower surface of the snout yellowish; body, from a short distance behind the gill-openings, with numerous large black spots and vertical bars; fins gray, the first dorsal with irregular vertical bands; attains considerable size, not numerous; exceedingly fierce; very cunning and swells itself out so as to appear like a floating mass of animal substance, and having thus decoyed its prey it immediately attacks it; eats everything, even sea-snakes; sea; attaining upwards of 12 feet in length. No other common species here.——*Zebra shark* (शिन्वाल - shinvála, Mahr.; పులిమేకము - pulimekamu, Tel.; குரங்கன்சுறா - kurangansurá, Tam.). Title from markings. Tel. from (puli, tel. tiger + mékamu, tel. beast), markings; cf. trygon uarnak. Tam. from (kurangam, tam. deer + shurá, tam. shark, carcharias genus); from fawn color [fawn-colored shark]. Title otherwise Tiger shark. Stegostoma tigrinum, scylliidæ, selachoidei, plagiostomata, chondropterygii [matsyam, 47], of naturalists [jantoo]. Alias Scyllium heptagonum; Squale tigre; Squalus cirrosus, fasciatus, longicaudus, tigrinus; Stegostoma carinatum, fasciatum. Head as broad as long; upper lip very thick, like a quadrangular pad, with a barbel on either side; distinct labial fold round the angle of the mouth, which is slightly nearer the eye than to the end of the snout; color, young, white or buff, in the form of markings, the fish appearing black, with narrow white lines or bands across the head and body, between which are white spots; these take on various forms in different examples; adults tawny, with more or less transverse bands of rounded spots, the color of the fish being brownish; favorite food of this fish is molluscs [chippy] and crustacea [kavachiny]; sea; 10-14 feet; common at madras. No other common species here.

SOORINJAUN (سورنجان - súrinján, *Ar.*, *Pers.*, *Hind.* and *Dec.*; శూరింజాను - shurinján, *Tel.*; சுரிஞ்சான் - shuriñján, *Tam.*). Ar. also (lobatibarbari), meaning barbary doll; (akanah). Title otherwise Barbary doll, Hermodactyl, Mercury's finger. Botanically Colchicum sp., liliaceæ [vricsham, 136]. Flowers, which spring from an under ground bulb, resemble crocus saffron [q.v.]. Of two kinds, sweet and bitter. Medicinally tonic.

SOORKH (سرخ - surkh, *Pers.*). Red. Plant second term often joining two genera. Ex., where transl. is of first term:—Capsicum annuum (pilpilisurkh), piper nigrum; Plumbago rosea (shítrakisurkh), plumbago zeylanica; Pterocarpus santalinus (sandalisurkh), santalum album; Tamarix articulata (gazisurkh), tamarix gallica; Trichosanthes palmata (hanzalisurkh), citrullus colocynthis. See gloss. paragraphs.——*Soorkee* (سرخی - surkhí, Hind.). Means redness. Pounded brick [shengal] used to mix with lime [choonam] so as to form a hydraulic mortar [cauray].

SOORMA (सौवीर - sauvíra, *San.*; الکحل - alkuhl, *Ar.*; کحل - kuhl, *Pers.*; سرمه - surmah, *Hind.*; انجن - anjan, *Dec.*; کنگنگ - kingang, *Malay*; ಅಂಜನ - añjana, *Can.* and *Tod.*; అంజనరాయి - anjanaráyi, *Tel.*; അഞ്ഞനക്കല്ലു - aññanakkallu, *Mal.*; අඤ්ජන - añjana, *Singh.*; அஞ்சனக்கல் - añjanakkal, *Tam.*). Title from hindostany. San. from (suvíra, san. the name of a country along the indus); cf. shavveeram. Can. from (anjana, san. collyrium). Tel. from (anjana, san. collyrium + ráyi, tel. stone). Mal. from (añjana, san. collyrium + kal, mal. stone). Tam. from (añjána, san. collyrium + kal, tam. stone). Ar. also (ismad). Tel. also (nílánjanamu), meaning black + collyrium; (kátukaráyi), meaning lamp black + stone. Singh. also (hoyandun). Antimony. Properly Sulphuret of antimony. Antimonii sulphuretum, Antimonium sulphuratum of chemists. Metal [loham] of a lead gray color; met with compact and in rhombic prisms. A galena, or sulphuret of lead, is often sold for it in the bazaars; this is in a cubic form. For distribution, see vol. II, 33; greater part of native antimony met with is now brought from Siam; was exported from Egypt to Mouziris [cranganore] and Nelkunda [cullada] according to the Periplus. Medicines are prepared from soorma in four different ways;—"*a*" by trituration in metallic state, united with sulphur [gandhac]; hence prepared sulphur of antimony;—"*b*" by action of heat with phosphate of lime; hence antimonial powder;—"*c*" by action of alkalies; hence brown antimoniated sulphur;—"*d*" by action of acids; hence tartar emetic. The sulphate is used as an emetic by veidyans [q.v.]. In veterinary practice one part of antimony, and two each of nitre [shorah] and sulphur [gandhac] are used in cutaneous disease, four drachms of the powder daily in gram [q.v.]. Employed in composition of printing types; used by Mahomedans for dyeing [shauyam] and cooling the eyes and for painting the eye-brows and eye-lashes.

SOOSTY (سستی - sustí, *Hind.*). From persian. Laziness.

SOOSY (سوسی - súsí, *Hind.*). Striped calico [q.v.] woven with colored thread; also mixture of cotton [q.v.] and silk [puttoo]. Used extensively by Lubbays [q.v.] for trouserings and petticoats [sheelay].

SOOTRAM (सूत्र - sútra, *San.*; சூத்திரம் - shúttiram, *Tam*). From (siv, san. to sew). Thread. So a rule or aphorism, as being shown in a string of rules. The whole ritual, grammatical, metrical, and philosophical literature of this country is written in such aphorisms, and their object is extreme brevity. In the grammatical Sootrams not a single letter is allowed which can by any contrivance be dispensed with, and moreover in these Sootrams letters and syllables are often used symbolically, like algebraic signs, to indicate ideas which would otherwise require a whole sentence or more to express them in full. The Sootrams are really mere memorial suggestions of the briefest possible kind, skilfully contrived for aiding the recollection of teachers. Historically speaking, all Sootrams are post-vedic. The most celebrated of all commentators on the Sootrams was Shuncaracharry [shuncaran]. See vol. I (74). According to the tamul Nunnool [q.v.] a sootram is a poetical composition containing much matter in as few words as possible, without injury to the force or minuteness of the sense, and appearing as clear as the reflection of a large object in a small mirror. The course or concatenation in which, according to the same, sootrams proceed from one another is of four kinds:—Fluviatic, or as a straight flowing river; Leonine, or as a lion [simham] which is supposed to see before and behind; Ranatic, or as the jumping of a frog [bhaicam], leaving intermediate space between one subject and another; and Aquiline, or as the darting of an eagle or kite [chillam] to seize upon its prey. Sootrams are generally written in tamul in the verse Ausryappah [q.v.] or Agaval, of which there are four kinds. Most Nunnool sootrams are written in the kind called Nilaimandila ausryappah. A few are in the verse called Nairisay venbah [q.v.].

SOOTRIYAUN (ستریان - sutriyán, *Hind.*). A dish consisting of wheat flour [soojee] made into paste, formed into small cakes and boiled in water with meat, &c.

SOPPA (చొప్ప - tsoppa, *Tel.*). The stalk of cholum [q.v.].

SOUDAN (سودان - saudán, *Hind.*). Means negro-land. The large tract of country from Atlantic ocean to Abyssinia south of Sahara; sometimes restricted to regions bordering Niger.——*Soudan seed* (حب السودان - habbussaudán, Ar.). Same as Black horse-gram.

SOUTH (दक्षिण - dakshina, *San.*; தென் - ten, *Tam.*). Prefix [ten].——*South arcot* (தென்னாற்காடு - tennárgádu, Tam.). Otherwise Cuddalore or Munjacooppam zillah [q.v.]. Revenue district; situated on the Coromandel coast; between 11° 09′ and 12° 35′ N. lat., and between 78° 40′ and 80° 3′ E. long.; bounded N. by North arcot and Chingleput districts, E. by Bay of Bengal, S. by Tanjore and Trichinopoly districts, W. by Salem district; square miles 5,218; pop. 2,162,851; language Tamul. Contains rivers Coleroon, Guddilam, Jinjee, Paravanaur, Ponniaur, Vellaur. Ports Cuddalore, Mercaunum, Pondicherry and Porto novo; mountains Cullroyen range, Jawaudy hills, and Trinomallee hill. The whole area of the district is represented by the following sub-areas:—Chidambaram talook, Cuddalore talook, Cullacoorchy talook, Pondicherry territory, Tindivanam talook, Tricalore talook, Trinomallee talook, Villoopooram talook, Vriddhauchellam talook. For general administrative purposes, the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The extent of the range or jurisdiction is shown where necessary. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Cuddalore; Sub-collector, Tindivanam, in charge of Tindivanam, Trinomallee and Villoopooram talooks; Head assistant collector, Vriddhauchellam, in charge of Vriddhauchellam and Chidambaram

talooks; General deputy collector, Tricalore, in charge of Tricalore and Cullacoorchy talooks. Tahsildars; Chidambaram, Rs. 250; Cuddalore, Rs. 225, this talook includes the mittahs [q.v.] of Alaginuttam, Chennappa naicken polliem and Nadooveraputt; Cullacoorchy, Rs. 175; Tindivanam, Rs. 225; Tricalore, Rs. 200; Trinomallee, Rs. 150, this talook includes the Zemindarry [q.v.] of Vettavalam; Villoopooram, Rs. 250, this talook includes the mittah of Mundacaputt; Vriddhauchellam, Rs. 200. Deputy tahsildars; Bhoovangherry, Rs. 70, range situated north of the Vellaur in Chidambaram talook; Chengam, Rs. 70, range situated in Trinomallee talook; Jinjee, Rs. 70, range situated in Tindivanam talook; Mercaunum, Rs. 70, range situated in Tindivanam talook; Munnargoody, Rs. 70, range situated in Chidambaram talook; Oolandoorpett, Rs. 70, range situated in Tricalore talook; Panrooty, Rs. 70, range situated in Cuddalore talook; Tittagoody, Rs. 70, range situated in Vriddhauchellam talook; Vaunore, Rs. 70, range situated in Villoopooram talook. Similarly judicial officers:—Judge, Cuddalore; District moonsifs, Chidambaram, Cuddalore, Tricalore, Villoopooram, Vriddhauchellam. Contains Registration sub-districts; Chengam, Chidambaram, Coorinjipaudy, Cuddalore, Cullacoorchy, Jinjee, Mercaunum, Munnargoody, Oolandoorpett, Panrooty, Tindivanam, Tricalore, Trinomallee, Vaunore, Villoopooram, Vriddhauchellam. Contains Forest ranges; Chidambaram, Cuddalore, Cullacoorchy, Jinjee, Tindivanam, Tricalore, Trinomallee, Villoopooram and Vriddhauchellam. Contains Municipalities Cuddalore and Chidambaram. Contains District board and Talook boards; Cuddalore embracing Cuddalore talook; Vriddhauchellam embracing Vriddhauchellam and Chidambaram talooks; Tricalore embracing Tricalore and Cullcoorchy talooks; Tindivanam embracing Villoopooram, Tindivanam and Trinomallee talooks. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes, and longitudes II, 47; particulars about towns, II, 48; coast survey, II, 160; light-houses, II, 168; comparative population, II, 172; location of revenue officers, II, 379; revenue settlement of the district, II, 406; registrars' and sub-registrars' station, II, 420; ports, II, 423; salt factories, II, 426; rain-gauge station, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; missionary stations, II, 455; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 507; zemindarries contained, II, 294; special public works, I, 404. A special gazetteer account of the whole district is given at II, 56. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Chidambaram, Cuddalore, Cullacoorchy, Pondicherry, Tindivanam, Tricalore, Trinomalee, Villoopooram, Vriddhauchellam.——*South canara* (ದಕ್ಷಿಣಕನ್ನಡ - dakshinakannada, Can.; തെക്കൻകർണ്ണാടകം - tekkankarnnátakam, Mal.). Colloquially Mangalore zillah [q.v.]. Revenue district; situated on the western coast; between 12° 06′ and 13° 58′ N. lat., and between 74° 37′ and 75° 44′ E. long.; bounded N. by North canara of Bombay, E. by Mysore and Coorg, S. by Malabar district, W. by Indian ocean; square miles 3,902; pop. 1,056,081; languages Tooloo, Canarese and Malayalam. Contains rivers Netrauvaty, Goorporo, Gungavully, Chundragherry; ports south to north, Hosdroog, Baicull, Cassergode, Coombla, Manjeshwar, Mangalore, Moolky, Padbidry, Yermaul, Ootchil, Caup, Oodiyauvar, Malpey, Barcore, Coondapore, Naickancuttey, Beidore, Shiroor; mountains Western ghauts; sanitaria none in district but two bungalows exist just beyond the boundary in Mysore on Coothireymookh. The whole area of the district is represented by the following sub-areas:—Cassergode talook, Coondapore talook, Mangalore talook, Oodipy talook, Ooppinangady talook. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge. Collector, Mangalore. Assistant collector, Mangalore. Head assistant collector, Coondapore, in charge of Coondapore and Oodipy talooks. General deputy collector, Poottore, in charge of Cassergode and Ooppinangady talooks. Tahsildars; Cassergode, Rs. 200; Coondapore, Rs. 150; Mangalore, Rs. 225; Oodipy, Rs. 225; Ooppinangady, Rs. 175. Deputy tahsildars; Amindivy, called the Monigar, Rs. 70, range situated south-west of Mangalore talook in the sea; Beltangady, Rs. 70, range situated in northern part of Ooppinangady talook; Buntwaul, Rs. 70, range situated in south-eastern portion of Mangalore talook; Caurcal, Rs. 70, range situated in south-eastern portion of Oodipy talook; Mangalore, Rs. 100, jurisdiction extending over the town of Mangalore and adjacent villages; Neeleshwar, Rs. 70, range situated in southern part of Cassergode talook. Similarly judicial officers:—Judge, Mangalore. Subordinate judge, Mangalore. District moonsifs; Mangalore, with jurisdiction extending over a greater part of Mangalore talook and a portion of Cassergode; Cassergode with jurisdiction over the Cassergode talook with the exception of the portions assigned to Mangalore and Poottore moonsifs, respectively; Coondapore, with jurisdiction extending over the Coondapore talook and a small portion of Oodipy; Oodipy with jurisdiction extending over the Oodipy talook excepting the portions assigned to the Moonsifs of Coondapore and Caurcal; Caurcal with jurisdiction extending over portions of Oodipy and Mangalore talooks and also a small portion of Ooppinangady talook; Poottore with jurisdiction extending over the whole of Ooppinangady talook, excepting the small portion assigned to the Moonsif of Caurcal, and portions of Cassergode and Mangalore talooks. Contains Registration sub-districts, Beidore, Beltangady, Bramhahwar, Buntwaul, Cassergode, Caurcal, Coondapore, Hosdroog, Mangalore, Manjeshwar, Moodbidry, Moolky, Oodipy, Ooppinangady, Vittal. Contains five Forest ranges, Cassergode, Mangalore, Ooppinangady, Oodipy and Coondapore. Contains Municipality, Mangalore. Contains District board, and five Talook boards. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; coast survey, II, 146; light-houses, II, 168; comparative population, II, 172; location of revenue officers, II, 380; registrars' and sub-registrars' stations, II, 420; ports, II, 424; rain-gauge stations, II 428; police divisions, II, 431; maps published, II, 436; hospitals and dispensaries, II, 447; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 508. A special gazetteer account of the whole district is given at II, 62. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Cassergode, Coondapore, Mangalore, Oodipy, Ooppinangady.——*South coast canal* (உப்புவாய்க் கால் - uppuváykkál, Tam.). Canal; Chingleput district, Sydapett and Chingleput talooks. Runs south from the Adyar to Mercaunam in S. arcot district. During the famine of 1876–78 this and Cochrane's canal [q.v.] were united in Madras [buckingham canal].

SOWA (शतपुष्पा - shatapushpá, *San.*; शोप - shópa, *Mahr.*; شبت - shibit, *Ar.*; شود - shod, *Pers.*; سوا - suvá, *Hind.*; سوئی - soí, *Dec.*; ಸಬ್ಬಸಿಗೆ - sabbasige, *Can.*; సోపు - sópu, *Tel.*; ശതകുപ്പ - shatakuppa, *Mal.*; සතපුෂ්ප - shatapushpa, *Singh.*; சதகுப்பி - shathaguppi, *Tam.*). Title from hindostany. San. from (shata, san. hundred + pushpa, san. flower); from numerous flowers [anise]. Ar. from persian. Hind. from (shályea, san. the plant). Dec. from hindostany. Tel. from hindostany. Mal. from sanscrit. Tam. from malayalam. San. also (mishréya), meaning introduced from misry [q.v.] or egypt; (madhurá), meaning sweet [sonf]; (chámarapushpiká), meaning fan + flower. Ar. also (sibit). Hind. also (soyah). Can. also (salup'hagida). Tel. also (sóyikúra); (peddasadápa), meaning large + the plant, ruta graveolens, linn., var. angustifolia; (sadápa). Singh. also (hinenduru). Tam. also (shóyikkírai), meaning sowa + vegetable [sonf]. Greek ἄνηθον. Title otherwise Anet, Bishop's weed, Common dill, Dill, Hog's fennel, Shatagooppy, Soy, Sulphurwort, Yampa of north american indians. Botanically Peucedanum graveolens, benth., umbelliferæ [vricsham, 67]. Alias Anethum graveolens, sowa; Peucedanum sowa. Annual, 2–4 feet, erect; glabrous; leaves decompound, alternate; leaflets filiform; petioles sheathing below; stem smooth, covered with whitish pubescence; petals roundish, entire; umbels terminal, without involucels; stamens about the length of the petals; fruit oblong, compressed, almost destitute of a membranaceous margin; seeds two; flowers yellow; flowering in february—april; flattened elliptical seed, with brown and slightly convex backs and pale membranous margin; aromatic, sweetish odour, unpleasant, moderately warm and pungent taste; frequently sold in bazaars for caraway [q.v.] seeds; the seeds yield a valuable oil [yennay], prepared by distillation. Bruised and boiled in water and mixed with roots, seeds are applied externally in rheumatism; leaves, applied warm and moistened with oil, hasten suppuration; gives to pharm. dried fruit, anethi fructus, properties similar to those of carum carui, linn. [caraway], but more grateful to the taste; preparations, oleum anethi, aqua anethi; officinal. Seeds are a chief ingredient in curry-powder [curry]; leaves also. No other common species here. For Anise see that head, for Indian dill or omum see Ajwaun, for Caraway see that head.

SOWDOO (చవుడు - tsavudu, *Tel.*; சவடு - shavadu, *Tam.*). From (tsavi, tel, taste). Tam. is borrowed term. Saline material in earth [munn]. The decomposition of rocks through the action of the atmospheric oxygen and carbonic acid [vayoo] gives origin ultimately to soluble sulphates, carbonates, and chlorides. These are carried away by the rivers. In the fresh water alluvial plains such salts have accumulated during the lapse of centuries, to an extent sufficient to give rise, by chemical changes in the soil, to the sowdoo efflorescence, the heat of the sun drawing the salts to the surface. The efflorescences consist of three groups:—"*a*" the neutral, which contain no carbonate of soda; these consist chiefly of sodium

chloride and sulphate, and frequently magnesium sulphate;—"*b*" the alkaline, which contain carbonate of soda, and alkaline chlorides and sulphates, but no lime or magnesium salts;—"*c*" the nitrous efflorescences; these generally contain no alkaline carbonate, but consist chiefly of nitrate of lime and alkaline chlorides, while others contain alkaline nitrate, chloride and sulphate; they are developed where the soil has become loaded with organic nitrogenous matter. Sowdoo is thus a very variable compound. The ingredients and their relative proportions vary in different places, exactly as the well waters at different spots differ in saline contents. Soils containing a large percentage, from 30 to 50 per cent. of carbonate of soda, abound all over the country and are habitually collected by the people for use as dhobies' earth [q.v.], and in dyeing [shauyam], and for the manufacture of soap [sauboon] and of glass bangles [gauzoo]; it is purified by a simple process of lixiviation. The following are the five principal. Distinguish from Sujjee khaur or barilla, and Jharkanamak or potash.——*Gauzoo sowdoo* (గాజుసవుడు - gádzutsavudu, Tel.; வளையல்மண் - valaiyalman, Tam.). Tel. from (gádzu, tel. glass bangle). Tam. from (valaiyal, tam. glass bangle + man, tam. earth). Bangle earth. A soda soil. Color fawn; appearance sandy. Used almost exclusively in the manufacture of the several varieties of glass bangles [gauzoo] so largely worn by the native women of this country; the color of the bangle being dependent on the composite, iron [auhan] for red bangles, copper [taumram] for green, indigo [q.v.] for blue, &c. The crude common salt [ooppoo] educed from bangle earth is supposed to possess medicinal properties; also culinary.——*Ooppoo sowdoo* (ఉప్పుసవుడు - upputsavudu, Tel.; உப்புமண் - uppuman, Tam.). Tel. from (uppu, tel. salt). Tam. from (uppu, tam. salt + man, tam. earth). Earth giving educed or lixiviated or washed common salt [ooppoo]. Spoils masonry if admitted in choonam [q.v.]; witness dilapidated appearance of houses near sea-coast where salt air acts on the mortar [cauray]; its presence makes all soils sterile; used for cattle affected by foot and mouth-disease [caulvye comaury], being rubbed on the tongue; cattle [maud] are also driven into salt swamps to stand there; wild animals have their salt licks; also used as a foundation for stacking cowdung bratties [q.v.] to keep out white-ants [q.v.].——*Paulasowdoo* (పాలసవుడు - pálatsavudu, Tel.). Tel. from (pála, tel. white + above). A soil containing carbonate of soda. Similar in appearance to dhobies' earth [q.v.], with which it is closely allied. Used as manure [yeroo] with leaves of tungaid [q.v.], or with refuse pulp of the neem [q.v.] fruit, after the oil has been expressed; in the Ceded districts [q.v.], where grass is scarce, worked up into a consistency and spread on the roofs of houses as a substitute for thatch [pooneer].——*Soonnapoo sowdoo* (సున్నపుసవుడు - sunnaputsavudu, Tel.; உவர்மண் - uvarman, Tam.). Tel. from (sunnamu, tel. lime + above). Tam. from (uvar, tam. salt + man, tam. earth). Dhobies' earth [q.v.], Fuller's earth. A special kind of soda [munn cauram] soil.——*Sooracaurapoo sowdoo* (సూరేకారపుసవుడు - súrákáraputsavudu, Tel.; வெடியுப்புமண் - vediyuppuman, Tam.). Tel. from (súrákáramu, tel. saltpetre + above). Tam. from (vediyuppu, tam. saltpetre + man, tam. earth). A soil containing saltpetre [shorah] or potash with its nitrate. This produces saltpetre [shorah] and country soap [sauboon]. Color mouse; appearance sandy. Collected in the village streets, off mud walls, &c., where it is the result of frequent staling in the village. Used as a manure [yeroo]. On special occasions acts as a vermicide in tobacco [pogauk] cultivation.

SPATICAM (स्फटिक - sp'hatika, *San.*; بلور - billaur, *Hind.*; స్ఫటికము - sp'hatikamu, *Tel.*; പളുങ്കു - palunku, *Mal.*; பளிங்கு - palingu, *Tam.*). San. from (sp'hat, san. to burst), easily splitting [spootam]. Hind. means crystal. Mal. and Tam. means crystal. Tam. also (velléttukkal), meaning white + leaf + stone. Crystal quartz. They are of various colors; white, brown, yellow, lilac, &c., but the white are the most common. A yellow crystal resembles a real topaz [pookhrauj], and a lilac-colored crystal is occasionally passed off as an amethyst [martees]. Black crystals are not commonly found in Southern india, but are found in Ceylon. A milk-colored crystal is also found in Ceylon [palingoocull, ratnam].——*Csheera spaticam* (क्षीरस्फटिक - kshírasp'hatika, San.; دودهیاپتهر - dúdhyápatthar, Hind.; గోపాలరాయి - gópálaráyi, Tel.). San. from (kshíra, san. milk). Hind. from (dúdhyá, hind. milk-like + patthar, hind. stone). Tel. from (gópála, tel. short for gópálapatnamu, town so called + ráyi, tel. stone). Opal. Greek ὀπάλλιος. An amorphous form of silica, having a resinous lustre. Precious opal has a peculiar play of colors. Generally met with in large masses in the Nizam's dominions. When first dug out of the earth it is soft, but it hardens and diminishes in bulk by exposure to the air; some emitting various colored rays, with a particular effulgency, when placed between the eye and the light. It is of a milky white color, but of an inferior quality to what is called the Noble opal of Hungary. Most of the opals found in Southern india are hydrophanes, becoming opaque after some exposure to the atmosphere [ratnam].

SPEAR GRASS (ಕರಿವುನಗದಹುಲ್ಲು - karivunagadahullu, *Can.*; ఎద్ది - eddi, *Tel.*; பன்றிப்புல் - panrippul, *Tam.*). Title from being long and stiff. Can. from (karuva, can. calf + nagu, can. to laugh + hullu, can. grass); from being greedily eaten by cattle. Tel. means rude. Tam. from (panri, tam. pig + pul, tam. grass). Tam. also (valamburippul), meaning gyration + grass; as the aristæ are very sensitive to moisture, if one of its awns be moistened with saliva or water it immediately begins to turn round in the hand and continues to do so for some time. Title otherwise Hygrometric grass, Twist grass. Botanically Andropogon [beard grass] contortus, linn., graminaceæ [vricsham, 156]. Alias Heteropogon contortus; Stipa spicata. Culm erect, branched, 1–2 feet between, round and two-edged; sheaths and nodes smooth; leaves flat, setaceous, acuminated, rough; spike solitary, terminal, cylindric, drooping; rachis smooth below, where it is occupied by male and neuter flowers, above covered with short brown hairs; awns twisted together; common; grows in tufts on pasture ground. Cattle [maud] eat it when fresh; makes good hay when the seeds fall off. Used as a fibre [naur].

SPOGEL (इसबगोल - isabagóla, *Mahr.*; بزر قطونا - bazrikatúná, *Ar.*; اسبغول - isbaghol, *Pers.* and *Hind.*; اسبغول - isabghol, *Dec.*; ಇಸಬಗೋಲು - isabagólu, *Can.*; ಇಸಬಕುಲ್ - isabakul, *Too.*; ఇసపగోలచెట్టు - isapagálachettu, *Tel.*; இசப்புக்கோல் - isappukkól, *Tam.*). Title from persian. Ar. from (bazr, ar. seed + katúná, ar. fleawort). Pers. from (asp, pers. horse + ghol, pers. ear); from shape of leaf. Dec. from persian. Tel. and Tam. from hindostany. Pers. also (shikamdarídah), meaning belly-cleaving. Can. also (visamugólu). Tam. also (isgól). Greek ψύλλιον, as seeds not unlike fleas. Latin psyllium. Title otherwise Fleawort, Horse ear [common saul], Ispaghul. Botanically Plantago ovata, forsk., plantagineæ [vricsham, 104]. Alias Plantago decumbens, ispaghula. Annual; stem short, if any, branches ascending, 2–3 inches long; leaves alternate, linear-lanceolate, three-nerved, somewhat woolly, channelled towards the base, stem-clasping, 6–8 inches long; peduncles axillary, solitary, erect, slightly villous, the length of the leaves; spikes solitary, terminal; flowers numerous, imbricated, small, dull white; bracts one-flowered, with green keel and membranaceous sides; calyx four-leaved, with membranaceous margins; corolla four-cleft, segments ovate, acute; capsule ovate, two-celled; seeds solitary; flowering in november to january; habitat persia; cultivated during cold season for the seeds. The seeds are boat shaped, about ⅛ of an inch long and rather less than $\frac{1}{16}$ broad, translucent, with a pinkish tinge and a faint brown streak upon the convex side; the concavity is covered with a thin white membrane; soaked in water they become coated with an abundant adherent mucilage which is free from taste and odour; the epidermis of the seeds is composed of polyhedral cells, the walls of which are thickened by secondary deposits, the source of the mucilage; between it and the albumen is a thin brownish layer; the albumen is formed of thick walled cells which contain granular matter; procurable in most bazaars. Gives to pharm. the seeds, ispaghulæ semina; demulcent, mildly astringent; officinal. Another species is major.

SPONGE WOOD (بهیند - bhend, *Hind.*; బెండు - bendu, *Tel.*). Title from soft wood. Same as Solah.

SPOOTAM (स्फुट - sp'huta, *San.*). From (sp'hut, san. burst open); plain. In astronomy visible or apparent; in contradistinction to both madhyamam [q.v.] or mean or calculated, and aspootam or invisible or real. Thus in celestial latitude and longitude, spootam are all the incidents as calculated from the shifting point given by the polar axis of the earth projected, while aspootam are the same as calculated from the more real pole of the heavens given by the pole of the ecliptic. It is because there are no trustworthy records of the latter class of observations that it is so difficult to identify the fixed stars mentioned in the hindoo shastrams [nacshatram, sauyanam, vicshaipam].——*Spaticam* (स्फटिक - sp'hatika, San.). See sep. title.

SQUILL (वनपलाण्डु - vanapalándu, *San.*; रानकांदा - ránakándá, *Mahr.*; कोळकंदो - kólakandó, *Conc.*; اسقیل هندی - iskílihindí, *Ar.*; پیاز دشتی هندی - piyázdashtíihindí, *Pers.*; کاندا - kándá, *Hind.*; جنگلی پیاز - janglípiyáz, *Dec.*; ಕಾಡುಬೆಳ್ಳುಳ್ಳಿ - kádubellulli, *Can.*; ಬೊಗ್ಗುಳ್ಳಿ - boggulli, *Too.*; నక్కఉల్లి - nakkaulli, *Tel.*; കാട്ടുള്ളി - káttulli, *Mal.*; වල්ලූනු - vallúnu, *Singh.*; நரிவெங்காயம் - narivengáyam, *Tam.*). Title from arabic. San. from (vana, san. forest + palándu, san. onion, allium cepa, linn.). Mahr. from (rána, mahr. wild + kándá, mahr. onion). Ar. from (iskíl, ar. squill + hindí, ar. indian). Pers. from (piyáz, pers. onion + dashtí, pers. forest + hindí, pers. indian). Hind. from (kanda, san. bulbous root). Dec. from (janglí, hind. wild + piyáz, hind. onion). Can. from (kádu, can. wild + bellulli, can. garlic, allium sativum, linn.). Tel. from (nakka, tel. fox + ulli, tel. onion). Mal. from (kátu, mal. forest + ulli, mal. onion). Singh. from (val, singh. wild + lúnu, singh. onion). Tam. from (nari, tam. jackal + vengáyam, tam. onion). Ar. also (ansalihindí), meaning indian officinal squill; (baslulfárihindí), meaning indian rat-killing onion; (baslulbarrihindí), meaning indian forest onion. Pers.

also (piyázimúshihindí), meaning indian rat-killing onion. Hind. also (janglípiyáz), meaning wild onion. Dec. also (kandrá), from sanscrit meaning bulbous root. Can. also (kádírulli), meaning wild + onion; (náyulli), meaning dog + garlic; (adaviírulli), meaning jungle + onion. Tel. also (adavitellagadda), meaning jungle + garlic, allium sativum, linn. Mal. also (káutanna), meaning methonica superba, lam. + fruit. Tam. also (káttuvelvengáyam), meaning forest + white + onion. Title otherwise Indian squill, Jackal onion, Jungle onion, Rat onion, Sea onion. Botanically Urginia indica, kunth., liliaceæ [vricsham, 136]. Alias Scilla indica. Scilla from arabic. Bulb perennial, truncated, white, about the size of a large apple [seb]; leaves numerous, radical, ensiform, nearly flat, smooth, 6-18 inches in length; scape erect, round, smooth, and, including the raceme, about 2-3 feet in length; raceme erect, very long; flowers remote, long-pedicelled, drooping; when in blossom the plant is entirely destitute of leaves; grows in sandy plains on coast. The bulbs are white, the size of an orange [q.v.], inodorous, nearly tasteless, resemble in appearance and qualities the root of the true squill, urginia scilla, steinh., being nauseous and bitter; not so large nor so round as the latter, but have similar fleshy scales; sometimes dark in color, owing to not having been properly dried. Substituted medicinally for the officinal squills; possess little action when old and large; expectorant and diuretic; in pharm. non-officinal. Other common species are:—coquesta, coromandeliana.

SRUNGAVARAPOOCOTE (శృంగవరపుకోట - shringavarapukóta, *Tel.*). From (shringa, san. peak + pura, san. town + kóta, san. fort) [shringam].——(1) Division; Vizagapatam district; area, 438 square miles exclusive of agency tracts; population 129,323; language Teloogoo. E. central inland of district. Boundaries:—north, Pottinghy and Gajapatinugger talooks; east, Vizianagram and Bimlipatam division; south, Vizagapatam division; west, Veeravilly division. Flat, gradually rising towards the north-eastern ghauts which skirt the northern boundary. Smaller hills occur all over division at intervals. Chittivalsa river, also called Gostany passes through north-eastern portion. Soil very fertile. Parts are clayey and saltish. The chief industry is agriculture. Srungavarapoocote is reputed for its lacquered wares. At Lakkavarapoocote bell-metal [cunts] vessels are made. The usual industries of weaving and pottery [chatty] exist all over the division. Exports, paddy [q.v.], rice [q.v.], jaggery [q.v.], and skins [chamrah] and horns [sing] to Vizagapatam, myrobalans [q.v.] and niger seed [ramtil] to Bimlipatam. Imports raggy [q.v.], gingelly [q.v.], niger [ramtil], myrobalans [q.v.] and horns [sing] from the hills. Irrigation, seven channels branching from the Chittivalsa river and a hill stream called Chilkalagedda in the north and east. Tanks fed by rainfall elsewhere. The north-west portion is occupied by the agency villages and hills rising to 5,300 feet at Gaulicondah. Camping grounds; Aulmanda, Bheemasingy, and Cottavalsa daubaul. Places of archæological interest:—Bonanghy, Caushipore, Condagoody, Cottaum, Dharmavaram, Goodivauda, Lakkavarapoocote, Reiga, Shreerampooram, Somapooram, Srungavarapoocote. Principal trig. stations:—Coomrye, Goomroo, Mariky, Vizagapatam N.E. base, Vizagapatam S.E. base. The leading places, &c., in the division are the following. ——*Anantagherry* (అనంతగిరి - anantagiri, Tel.). From (ananta, san. vishnu, the eternal + giri, san. mountain). Village; pop. including suburbs 1,823; height 3,111 feet. On crest of Gaulicondah hills, here the boundary between Vizianagram and Pauchipenta zemindaries. Coffee [q.v.] estate belonging to Maharajah of Vizianagram.——*Annam rauzpett* (అన్నంరాజుపేట - annamrádzupéta, Tel.). From (annamrádzu, tel. proper name + péta, tel. suburb). Village; pop. 2,543. Former residence of a branch of Vizianagram family, by whom Shree vengopaulsawmy was established here and a large pagoda [q.v.] built. The latter has an endowment of Rs. 3,630 derived from lands.——*Bonanghy* (బోనంగి - bónangi, Tel.). Village; pop. 2,613; lat. 18° 09′; long. 83° 16′; from Srungavarapoocote N.E. 6 miles; from Vizagapatam N. 30 miles. Copper plate grant dated A.D. 1586.——*Caushipore* (కాశీపురము - kásipuramu, Tel.). From (káshí, san. benares + pura, san. town). Zemindarry, Village; pop. 1,359 including hamlets; lat. of village 18° 13′; long. 83° 10′; from Srungavarapoocote N. 8 miles; from Vizagapatam N.N.W. 36 miles. Old fort and ancient stone statues. Fair every Wednesday. Peshcush Rs. 600. ——*Chittivalsa* (చిట్టివలస - chittivalasa, Tel.). See sep. title. ——*Coomrye* (కుమురాయి - kumuráyi, Tel.). From (kumunu, tel. smouldering ashes + ráyi, tel. stone). Trig. station; lat. 18° 14′ 39·52″; long. 83° 06′ 39·80″; height 3,984 feet; from Condeba E. 1¾ miles; from Srungavarapoocote N.N.W. 10 miles.—— *Cottaum* (కొట్టము - kottámu, Tel.). Means cattle shed. Village; pop. 2,197; lat. 18° 06′; long. 83° 15′; from Srungavarapoocote E.S.E. 6 miles; from Vizagapatam N. 27 miles; from Vizianagram W. 12 miles. Chief station in Bonanghy talook of Vizianagram zemindarry.——*Dharmavaram* (ధర్మవరము - dharmavaramu, Tel.). From (dharma, san. piety + pura, san. city). Town; pop. 3,274; lat. 18° 07′; long. 83° 14′; from Srungavarapoocote E. 3 miles; from Vizagapatam N.N.W. 29 miles. Old temple with copper images [shilay, vigraham]. Another built 300 years ago. Seat of Sanyausayyan, a disciple of Shiva.

Bestowing issue is his particular power.——*Gaulicondah* (గాలికొండ - gálikonda, Tel.). See sep. title.——*Goodivauda* (గుడివాడ - gudiváda, Tel.). From (gudi, tel. temple + váda, tel. village). Village; pop. 2,094; lat. 18° 02′; long. 83° 09′; from Srungavarapoocote S.S.W. 6 miles; from Vizagapatam N.N.W. 24 miles. Also name of a talook of Vizianagram zemindarry. Illegible inscriptions at the temple of Brambalingam.—— *Goomroo* (గుమురు - gumuru, Tel.). Means a cluster. Trig. station; lat. 17° 56′ 08·68″; long. 83° 16′ 35·09″; height 1,452 feet; from Srungavarapoocote S.S.E. 13 miles.——*Jaumy* (జామి - jámi, Tel.). From (jammi, tel. a tree, prosopis spicigera, linn.). Village; pop. 5,066; lat. 18° 03′; long. 83° 18′; from Srungavarapoocote E.S.E. 9 miles; from Vizagapatam N. 24 miles. On the Gostany. Former head-quarters of a talook. Indigo factory.——*Lakka varapoocote* (లక్కవరపుకోట - lakkavarapukóta, Tel.). From (lakka, tel. lac + pura, san. town + kóta, san. fort). Village; pop. 2,132; lat. 18° 02′; long. 83° 13′; from Srungavarapoocote S.S.E. 6 miles; from Vizagapatam N.N.W. 24 miles. Chief station in Vapadah talook of Vizianagram zemindarry. Three ancient temples. In a courtyard of the Veerabhadran [q.v.] temple are some inscribed slabs [shausanam].——*Mariky* (మరికి - mariki, Tel.). Means soapstone basin. Trig. station; lat. 18° 03′ 01·82″; long. 83° 06′ 42·82″; height 2,110 feet; from Srungavarapoocote S.W. 6 miles.——*Poonyagherry* (పుణ్యగిరి - punyagiri, Tel.). See sep. title.——*Reiga* (రేగ - raiga, Tel.). From (régada, tel. black-cotton soil). Village; pop. 852; lat. 18° 00′; long. 83° 02′; from Srungavarapoocote S.W. 13 miles; from Vizagapatam N.W. 28 miles. Rock-cut cave dedicated to Gribaulingeshwaran.——*Royavalsa* (రాయవలస - ráyavalasa, Tel.). See sep. title.——*Vapadah* (వపాడ - vapadá, Tel.). Village; pop. 1,530; lat. 18° 04′; long. 83° 15′; from Srungavarapoocote S.E. 5 miles; from Vizagapatam N.N.W. 25 miles. Also name of a talook of Vizianagram zemindarry.——*Vizagapatam north end base* (విశాఖపట్టణము - vishákhapattanamu, Tel.). Trig. station; lat. 18° 01′ 02·91″; long. 83° 16′ 10·54″.——*Vizagapatam south end base* (విశాఖపట్టణము - vishákhapattanamu, Tel.). Trig. station; lat. 17° 55′ 38·16″; long. 83° 14′ 09·41″.——(2) Deputy tahsildarry; Vizagapatam district. Pay Rs. 70.——(3) Town, Deputy tahsildar's station; Vizagapatam dist., Srungavarapoocote division; pop. 5,715; lat. 18° 06′; long. 83° 11′; from Coraputt S.E. 54 miles; from Madras N.E. 390 miles; from Narsapatam N.E. 46 miles; from Parvatipore S.S.W. 25 miles; from Vizagapatam N.N.W. 30 miles; from Vizianagram W. 18 miles. Ruined fort, belonged formerly to the giant king Simhabala. A mile west is a steep hill with a waterfall, near which is a ruined building of two storeys.

SS (शालिवाहनशक - shálivàhanashaka, *San.*). An abbreviation for Shalivahana [q.v.] saca [q.v.].

STA (स्था - st'há, *San.*). To stand.——*Stala cauval* (தலக்காவல் - talakkával, Tam.). From (st'hala, san. place + kával, tam. guard). System of guarding a tract of country against open marauders [desha cauval, inam].——*Stala curnum* (స్థలకరణము - st'halakaranamu, Tel.). From (st'hala, san. place + karanamu, tel. accountant). The accountant of a district [deshpandya].——*Stala jemadar* (స్థలజమాదారుడు - st'hala-jamádárudu, Tel.). From (st'hala, san. place + jamádárudu, tel. peon). Head peon [q.v.] of village.——*Stalam* (स्थल - st'hala, San.). From (st'ha, san. to stand firm). A place; terra firma. A holy place or place of pilgrimage [teertam]. ——*Stala pooraunam* (स्थलपुराण - st'halapurána, San.). From (st'hala, san. place + purána, san. history). Local pooraunam. See Pooraunam.——*Stalawar* (ಸ್ಥಳವಾರು - st'alaváru, Can.). A record showing the particulars of each field or parcel of land. ——*Stambham* (स्तम्भ - stambha, San.). From (stambh, san. to fix). Post. In architecture [staupatyam] same as Laut [laut, maunasauram].——*Stan* (ستان - sitán, Pers.). From (st'hána, san. place). Suffix denoting place; as Hindostan, hindoo + place.——*Staunam* (स्थान - st'hána, San.). From (st'há, san. to stand). Place, act of abiding; dignity. In Malabar called also Coorvaulcha [q.v.], and denotes the status and attendant property of the senior rajahs [q.v.] in the Malabar covilagams [q.v.] or palaces. The theory is that when a rajah attains to the rank of first, second, third, fourth, &c., in the family, he resigns his place in the common covilagam [q.v.] or palace, in which he was brought up, and lives apart on the special property set apart for his staunam or dignity. Practically while taking their staunam the rajahs retain an influence in the covilagam. Accumulations made by a stauny himself are at his absolute disposal, but if undisposed of in his lifetime pass to the covilagam or family in which he was born. The real Staunam property is inalienable except in cases of the gravest necessity and for the benefit of the staunam. As regards debts contracted by a stauny, his position is essentially different from that of a carnaven [q.v.] of a Malabar tarwaud [q.v.]. The carnaven is the accredited agent of the family, and a creditor dealing with him gives credit not to the individual but to the family in all matters apparently and ordinarily within the scope of a carnaven's authority. On the other hand, a creditor dealing with a stauny gives a personal credit only. The creation of a

staunam, with property appurtenant thereto, indicates a stage when joint ownership was developing into individual ownership. Many Nayar [q.v.] families of respectability have adopted the customs of the rajahs and created staunams to be filled by the senior member of one house or of several houses connected with one another by community of pollution [poola sambandham]. In a wider sense, the word staunam has the same meaning as mirassy [q.v.] on the eastern coast, and is used to denote the position of some religious functionary, hereditary officer of state, &c., who by virtue of his office enjoys land rent-free. ——*Staunican* (स्थानिक - st'hánika, San.). From (st'hána, san. office). Principal Bramin attached to a pagoda [q.v.].——*Stauny* (സ്ഥാനി - st'háni, Mal.). A dignitary.——*Staupatyam* (स्थापत्य - st'hápatya, San.). From (st'ha, san. ground + pati, san. lord). Cf. Greek ἀρχιτέκτων. Architecture. The Staupatya vedam is one of the four Oopavedams [q.v.]. The indigenous styles are Dravidian, called also Carnatic, occupying all south, and the Chalookyan in north of presidency. The Booddhist style is an adaptation of these two. The Jeina style is in the interior mostly Dravidian, but shows on the west coast foreign elements introduced from N.E. India. The Mahomedan or Saracenic style is entirely foreign. Rishy [q.v.] agastyan [q.v.], who probably brought one of the first Bramin colonies into S. india, wrote a treatise on architecture, or one goes by his name. Other ancient Sanscrit treatises were composed collectively called Shilpa shastram, but few traces remain. One treatise called Maunasauram, and seven others less well known, are extant [maunasauram, shilpashastram]. The Tamuls have no such works, but they have many traditional principles [oor, veed].—"*a*" The Dravidian or Carnatic style comprises nine-tenths of the architectural objects in the whole of peninsular India, though it is actually confined for the most part to a small angle of it in the south. The style shows the ancient inhabitants of the south to have been one of the chief building races of the world. The Dravidians are constructive as the Aryans [q.v.] are literary. The typical Dravidian style consists of a square base ornamented with pilasters externally and containing the cell in which the image or emblem of the deity is placed. Above this rises a pyramid, the general outline of which is straightlined, but always divided into storeys; in small temples [coil, pagoda] generally three, but frequently, as in the great pagoda [q.v.] at Tanjore, into as many as fourteen storeys. Upwards the building terminates in a small dome of polygonal or circular shape. The second feature belonging to Dravidian temples consists in the great gateways, or gopoorams [q.v.], which are frequently more important in size than the vimaunams [q.v.] or pyramids themselves. They form the entrance through the large circumvallating wall [praucauram]. Their outline and general design is the same as that of the temples, except that in plan they are generally twice as wide as they are deep, and are always crowned by an oblong roof instead of a circular dome [goombaz]. In the Dravidian style again the temple almost invariably includes, beside the vimaunam [q.v.] or towered shrine and the gopooram or gateway, the mantapam [q.v.] or porch leading to the shrine; the choultry [q.v.] or pillared hall; numerous other buildings; elegant stambhams [q.v.] or pillars bearing the images or flags [dhwajam] of the gods, or numberless lamps all connected with the temple worship and service [poojah]; tanks and gardens and avenues [shaulay] of palms [taur] and sacred trees [poonyoshadhy]; all within the temple enclosure. The Dravidian form of design has apparently arisen from a form of building in receding terraces which prevailed in earlier times, though existing only in wood. In such early forms it is to be concluded that the basement was probably a pillared hall like those of Booddhist [booddha] monasteries [vihauram] found in Burmah at the present day. Above this was apparently a smaller hall, with detached cells in the edge of the platform on which it stood; though whether these were chapels, or sleeping apartments, or cooking rooms, cannot now be determined. In the oldest buildings belonging to the style, the cells are still observable detached from the vimaunam [q.v.] and used as chapels. Later the cells are only semi-detached, and afterwards they become mere ornaments of the pyramid. Another feature by which this style is to be recognized is the double curve of the cornices. In all other Indian styles the cornice is straight-lined and sloping downwards to throw off the wet. In the Dravidian style they are universally formed with a double curvature. In connection with this style, it is necessary to point out that no Dravidian architect uses the arch as part of his art. According to a Tamul proverb, an arch never sleeps. An arch in fact contains in its principle an active force, always tending to thrust outwards. A pillar supporting a beam is on the contrary in stable equilibrium; and the Tamulians prefer it, though its use frequently limits their interiors to an undesirable extent. When they find it necessary to cover larger spaces than can be done by single stones, they bracket out one stone beyond another, as was done in ancient Etruria and Greece, till the stones approach near enough to be covered by one stone. The special exhibition of Dravidian architecture known as the south-east style arose under the Chola [q.v.] or Tanjore king in the eleventh century A.D., when nearly all the great temples to Shiva in Southern india were built, and it continued in use in the twelfth and thirteenth centuries, during which time the great temples to Vishnoo were erected. Up to the beginning of the sixteenth century these temples remained almost unchanged; but at that time all Southern india became subject to the kings of Vijianugger, and Krishnaroya, A.D. 1509–30, rebuilt or added to most of the great buildings of the south. The chief feature of the architecture of this later period is the construction of the enormous gopoorams [q.v.] which are so conspicuous at Conjeeveram, Chidambaram, and Shreerungam. All these were built by Krishnaroya; they do not form part of the original south-east style, but were intended as fortifications to protect the shrines from foreign invaders. The following may be taken as a descriptive catalogue of the chief present South indian specimens of Dravidian architecture.—" i " First the Dravidian rock-cut temples at Mauvellipore [seven pagodas].—" ii " Secondly, Dravidian temples of the ordinary description. Those at Chidambaram, Combaconam, Conjeeveram, Madura, Peroor, Rameshwaram, Shreerungam, Tanjore, Tinnevelly, Trivellore, and Vijianugger may be taken as typical. The temple at Chidambaram is one of the most venerated, and has also the reputation of being one of the most ancient temples in Southern india. This temple has been aggregated at different ages. At Combaconam there is a fine gopooram [q.v.]. The two towns, Great and Small Conjeeveram, possess groups of temples as picturesque and nearly as vast as any to be found elsewhere. The great temple at the first-named place possesses some remarkable gopoorams. At Madura the most important of Trimal naick's original buildings is the celebrated choultry [q.v.] which he built for the reception of the presiding deity of the place. The great temple at Madura is however a larger and far more important building than the choultry, and it also owes all its magnificence to Trimal naick. Although the temple at Peroor, near Coimbatore, can only rank among the second class as regards size, it possesses a portico of extreme interest to architectural history. Of Rameshwaram it may be said that in no other temple has the same amount of patient industry been exhibited. It was begun and finished on a previously settled plan, as regularly and as undeviatingly carried out as that at Tanjore, but on a principle diametrically opposed to it. It is double the dimensions of Tanjore and has ten times its elaboration. The chief ornament of this temple resides in its corridors. Shreerungam is certainly the largest, and, if its principle of design could be reversed, would be one of the finest temples in the south of India. Here the central enclosure is quite as insignificant as that at Trivellore, which see below. Tanjore has a very celebrated temple. In nine cases out of ten, Dravidian temples are a fortuitous aggregation of parts, arranged without plan, as accident dictated at the time of their erection. The principal exception to this rule is to be found at Tanjore. The great pagoda there was commenced on a well-defined plan, which was persevered in till its completion. One of the peculiarities of the Tanjore temple is that all the sculptures of the gopoorams belong to the religion of Vishnoo, while everything in the courtyard is dedicated to the worship of Shiva. Tinnevelly temple also has the advantage of having been built on one plan, and at one time without subsequent alteration or change. The great thousand-pillared portico in the temple is well known. Trivellore is about 30 miles west of Madras. The nucleus was a small village temple drawn to the same scale as the plan of Tanjore. It however at some subsequent period became enriched and a second or outer court was added. Additions were again made at some subsequent date. For Vijianugger see that title-heading and Humpy. The buildings mentioned in the above catalogue are in number rather more than one-third of the great Dravidian temples known to exist in the Presidency. Of the remainder, none have vimaunams [q.v.] like that of Tanjore, nor corridors [praucauram] like those of Rameshwaram; but several have gopoorams [q.v.] quite equal to or exceeding those mentioned above, and many have mantapams [q.v.] of great beauty and extent. Several, such as Auvidayaurcoil, Tauramungalam, Virinjipooram, and others, possess features unsurpassed by any in the south, especially the first-named, which may, perhaps, be considered as one of the most elegant of its class as well as one of the oldest.—" iii " Thirdly forts. Among the most remarkable of these are those of Dindigul, Jinjee, Oodayagherry, Palamcottah, Penoocondah, Seringapatam, Trichinopoly, and Vellore; with the droogs [q.v.] or hill forts in the Baramahaul, Mysore, Canara, &c. Many of these are very ancient. The works of Jinjee are specially interesting [aursham, chauvady, coil, dewal, droog, goody, gopooram, mantapam, pagoda, rath, stambham, vimaunam].—"*b*" Chalookyan architecture is easily distinguished from either the Dravidian or the North indian. In plan the temples are generally star-shaped and of sixteen sides. The typical characteristic is that four of these sides are flat and form the principal faces, and between each of these are three facets arranged angularly. The same principle pervades the design of the spire, which is always rectilinear in outline, and generally made up of miniature repetitions of itself heaped one over the other. The peculiarity however which is more characteristic of the style than the outline of its form, is the great richness and beauty of the details with which the buildings are elaborated. The most celebrated temples are those at Halabeed in Mysore. The Nizam's territory was the original central seat of the Chalookya power [chalookya].—"*c*" Booddhist architecture consists of caves, elaborated by artifice for purposes of religious occupation;

pillars or stambhams [q.v.]; carved rails enclosing spaces, an adaptation of the indigenous cromlechs [paundoocull] or circles of stones [azhauram]; topes [q.v.] or stoopams [q.v.], an adaptation of the indigenous tumulus and erected for commemorative purposes; monasteries or vihaurams [q.v.]; and temples or cheityams [q.v.]. The number of Booddhist remains existing anywhere in India is small, and particular interest attaches to them, as they are assumed to be the earliest specimens of developed Indian architectural art. No pillars or built specimens are now found standing, but the style has been reconstructed in theory from remains. The pillars bore inscriptions on the shafts and emblems or animals on the capitals. The carved rails were the principal vehicle for ornamentation. They enclosed sacred trees, shrines and pillars; and in later periods topes [q.v.]. The topes themselves were at first commemorative of a locality merely; in later periods they had for their central construction a dagoba [q.v.] or shrine containing a relic. This dagoba is an adaptation in masonry with domical surface of the earthen tumulus. The vihaurams [q.v.] or sangharaumams [q.v.] or monasteries were buildings containing cells for monks. It is supposed that they were sometimes built in storeys. The cheityams [q.v.] or assembly halls had an ogee roof, and in internal arrangement closely resembled Christian churches. In Southern india Booddhist remains are found near the Kistna river in the Godavery and Kistna districts. The remains in other parts stated to be Booddhist [booddha] are probably of a later date or Jeina [q.v.]. Rock-cut monasteries are found near the Kistna; for instance, at Goontoopully and Naugoolapully in the Ellore talook of the Godavery district. There are no pillars. There are several stoopams or topes in ruins in the abovenamed locality. Examples are the following:—in the Godavery district Saugipaud in the Bheemavaram talook; in the Kistna district Goodivauda in the talook of that name; Ghuntashaula in the Sullapully zemindarry; and Bhattiprole in the Repully talook. The most important stoopam [tope], however, is the well-known one at Amravatty, 20 miles north-west of Guntoor. No vihaurams [q.v.] or cheityams [q.v.] are yet known. From a technical point of view it is not correct to speak of the Booddhist as a separate architectural style. It is only a special exhibition of the indigenous styles of the country, the Dravidian and Chalookya [baur, cheityam, dagoba, goomta, laut, tope, vihauram].—"*d*" In Southern india there are two classes of temples erected by the Jeinas [q.v.], called Bettas [q.v.] and Basties [q.v.]. In the interior they are almost all of the Dravidian style. A special style however belonging to the Jeina religion is found all along the west coast below the ghauts [q.v.], from Goa to Cochin, and sporadically also in the central plateau of India. This is sometimes called the Canarese style. A celebrated temple of this class is that at Moodbidry in South canara. The architecture resembles the Nepaulese. The sloping stone roof which the pillars support is a novelty in Indian architecture very rarely met with. Another peculiarity is the Thibetan character of the wooden roof, which forms a second storey and protects the lower roof from the effects of the weather. This would be more appropriate in a country where snow falls than where protection has to be given against rain alone. The bells which hang from each angle of the roof are a characteristic form found everywhere in Thibet and the Himalaya. This intrusive style is not yet adequately explained [basty, betta].—"*e*" To the south of the Nerbudda there are three well-marked Saracenic styles. First, that of the Bahmany dynasty. Beginning at Goolburga, A.D. 1347, and afterwards at Beedar, A.D. 1426, they adorned their capitals with edifices of great magnificence and well-marked individuality, before they were absorbed, in A.D. 1525, in the great Moghul empire. Next to these was the still more celebrated Adil shahy dynasty [raj] of Beejapore, A.D. 1489-1672. Their style differed most essentially from all those above enumerated, and was marked by a grandeur of conception and boldness in construction unequalled by any edifices erected in India. The third southern style is that of the Cootb shahy dynasty of Golcondah, A.D. 1512-1672. Their tombs are splendid and form one of the most striking groups in India, but show evident signs of a decadence that was invading art at the age when they were erected [goombaz, meenaur, takiya, &c.].——*Stauvaram* (स्थावर - st'hávara, San.). From (st'há, san. to stand). Immovable. Opposite of Jangamam [jangam]. Stauvara sott in tamul is fixed or real property. Stauvara lingam is an immovable lingam [q.v.], or that fixed in the temples [coil, pagoda].——*Stiram* (स्थिर - st'hira, San.). Fixed. Epithet of the four fixed caranams [q.v.].——*Stity* (स्थिति - st'hiti, San.). From (st'há, san. to stand). Anything to stand on; property [sott]. Suffix in compounds; as Bhoo stity, meaning earth + property.——*Stooladeham* (स्थूलदेह - st'húladéha, San.). From (st'húla, san. gross + déha, san. body). Visible material body [shareeram].——*Stoolam* (स्थूल - st'húla, San.). Gross, as distinguished from soocshmam [q.v.] or subtle.

STAR PAGODA (பூவராகன் - púvarágan, *Tam.*). Means flower + pagoda; from star impression on the reverse. Madras coin [naunyam, pagoda]. See vol. I, 616.

STICKING GRASS (لپٹا - laptá, *Hind.*; ಸಣ್ಣ ಅಂಟುಪುರುಳೆ ಹುಲ್ಲು - sannaantupurulehullu, *Can.*; చికిలింతగడ్డి - chikilintagaddi, *Tel.*; ஒட்டுப்புல் - ottuppul, *Tam.*). Title from sticking to clothes. Hind. from (lapatná, hind. to stick to). Can. from (sanna, can. small + antu, can. gum + purulu, can. parrot + hullu, can. grass). Tel. from (chikili, tel. beautiful + gaddi, tel. grass). Tam. from (ottu, tam. to stick + pul, tam. grass); from sticking to clothes. Tam. also (kuthiraivárchámai), meaning horse + tail + panicum miliare, lam. Title otherwise Horse tail millet, Rough panic grass. Botanically Panicum [priyangoo] verticillatum, linn., graminaceæ [vricsham, 156]. Alias Setaria verticillata. Culms below resting on the ground and rooting, above weak, leaning to one side, smooth; leaves sheathing, linear-lanceolate, a little downy, margins hispid, mouths of the sheaths hairy; spikes cylindric, compound sub-verticelled; bristles of the involucels reversely hispid; hermaphrodite florets rather smooth; common about rubbish heaps. Requires a good soil and shade; cattle eat it before the flower spikes are formed; seeds eaten by small birds.

STORAX (اصطرك - ustarak, *Ar.*). Greek *στύραξ*. Fragrant resin from several trees; see below.——*Indian storax* (सिह्लक - sihlaka, San.; ضرو - darrú, Ar.; سلارس - siláras, Hind. and Dec.; رسمل - rasamala, Malay; ಬೆಲೋರಿ - belóri, Can.; శిలారసముచెట్టు - shilárasamuchettu, Tel.; நேரியாசிப்பாற்செடி - neriyásippárchedi, Tam.). Title from habitat. San. from (sil, san. to gather); from exudation gathered from tree. Ar. from syriac. Hind. from (shilárasa, san. the plant). Tel. from (shilárasa, san. liquid storax + chettu, tel. tree). Tam. from (niryása, san. resin + pál, tam. milk + shedi, tam. tree). San. also (shilárasa), meaning stone-juice; compare silauras. Ar. also (maiahisáilah), meaning the liquid storax; (míahilubani), meaning milky storax. Tam. also (erigásuççedi), meaning burning + inspissated juice + plant; (neriyarisippárchedi), meaning brittle + rice-like drops + milk plant; from brittle dry transparent balsamic drops of plant, chewed by natives as a preservative to their teeth. Title otherwise Indian silauras, Lord wood. The balsam is Bookher oil, Copal balsam, Incense oil, Liquidambar, Liquid storax, Rose malloes, Solid storax, Sweet gum. Botanically Liquidambar orientale, miller, hamamelideæ [vricsham]. Deciduous, 60 feet high; leaves palmate, lobed; recesses at the base of the veins villous; flowers apetalous. Umbrageous tree resembling a plane; the resin or storax from bark is opaque and semi-fluid, styrax liquidus of chemists; the dried and compressed bark is made into fragrant cakes formerly known as cortex thymiamatis. Gives to pharm., the balsam purified by rectified spirit and straining, styrax præparatus; contains volatile oil [yennay], styrol, crystallizable principle, styracine, and cinnamic acid; stimulant, expectorant; officinal; much used also in native medicine; substituted for british balsam of peru and citrine ointment. No other species here.——*Java storax* (शिलारस - shilárasa, Mahr.; لبنى - lubna, Ar. and Pers.; سلارس کا پیڑ - siláraskáper, Hind.; سلارس کا جهاڑ - siláraskájhár, Dec.; శిలారసము - shilárasamu, Tel.; நேரியாசிப்பால் - neriyásippál, Tam.). Title from habitat. Mahr. from (shilá, san. stone + rasa, san. juice). Ar. from (laban, ar. juice). Hind. from (siláras, hind. storax + per, hind. tree) [true storax]. Dec. from hindostany. Tel. from (shilá, san. stone + rasa, san. juice). Tam. from (niryása, san. gum + pál, tam. milk). Mahr. also (shílakusuma), meaning stone + flower. Tel. also (shilávásamu), meaning stone + habitation. Title otherwise Java silauras. Botanically Altingia excelsa, noronha, hamamelideæ [vricsham]. Alias Liquidambar altingia. Gigantic tree; 60-100 feet high; leaves 3-4½ inches, glabrous on both surfaces, or with tufts of hairs in the axils of the nerves beneath. native of java; bark is bitter, hot, and aromatic, and when wounded affords a storax; see indian storax for properties.——*Liquid storax* (میعه سائله - míahisáilah, Hind.). Same as Indian storax.——*True storax* (شجر اصطرك - shajariustarak, Ar.; درخت میعه - darakhtimíah, Pers.; سلارس کا پیڑ - siláraskáper, Hind.; سلارس کا جهاڑ - siláraskájhár, Dec.). Title from product. Ar. from (shajar, ar. tree + ustarak, ar. storax). Pers. from (darakht, pers. tree + míah, ar. storax). Hind. from (siláras, hind. storax + per, hind. tree) [java storax]. Dec. from hindostany. Title otherwise Officinal storax, True silauras. Hebrew libneh. Poplar of the Bible. Botanically Styrax [dhoopam] officinale, linn., styraceæ [vricsham, 84]. Deciduous shrub, 1-2 feet high; leaves ovate, beneath villous; racemes simple, shorter than the leaf; flowers white, flowering in July. Plant of the levant, greece, palestine, syria; yields a solid resin somewhat resembling benzoin [q.v.]; agreeable odour, pleasant, subacidulous, aromatic, slightly pungent taste. This product occurs in three different forms; in grains, in soft masses, in brittle masses. Storax in grains, the rarest and purest of all, in transparent, yellowish-white or reddish-yellow grains, the size of a small bean, the consistence of wax [mom], and capable of consolidating into a thick mass; odour strong, penetrating, and very agreeable; taste aromatic and bitter. Storax in soft mass, or amygdaloid storax softer than the preceding species, easily fusible, with brown fracture, displaying almond-like yellowish tears; odour very sweet, like benzoin, taste sweet and perfumed. Massive hard storax; light brown, yellow, and reddish brown, friable, sometimes slightly tenacioas, softens under the teeth; this variety is more odourless than that of the two preceding; very impure. The better kinds of storax burn with a white

flame; they are soluble, except the impurities, in alcohol and ether. Medicinally stimulant and expectorant; now little used.

STOTRAM (स्तोत्र - stótra, *San.*). From (stu, san. to praise). Strings of names by which different gods are worshipped. Stotra pantacan is a bard attached to native courts.

STRAITS (اسٹریٹس - strets, *Hind.*). Otherwise Malacca straits. The channel that separates Malayan peninsula from Sumatra. The Straits settlements are British colonies to the north, with head-quarters at Singapore [q.v.]. See vol. I, 31.

STREE (स्त्री - strí, *San.*). Woman. A common dravidian error for Shree [q.v.], which has no connection; cf. stotriem for shrotriem. Polygamy is not frequently found s. in india; and usually when a man marries a second wife while his first is still alive, it is because the latter is barren or has an incurable disease. But the first wife remains even then mistress of the house, and the second is regarded as her younger sister who is to serve her. In the Cooral [q.v.] the women of South india are highly spoken of because of their many virtues.——*Stree dhanam* (స్త్రీధనము - strídhanamu, Tel.). From (above + dhana, san. property). Dowry. Property belonging to a woman, which follows a law of succession different from that which regulates other property. For Mahomedan dowry see Mahar.

STYLE PLANT (पाथरी - pát'harí, *Mahr.*; వాడతెడ్డాకు - vádateddáku, *Tel.*; எழுத்தாணிப்பூண்டு - ezhuttánippúndu, *Tam.*). Title from appearance of flowers. Mahr. from (páta, mahr. line + ari, mahr. row); flagelliform leaf. Tel. from (váda, tel. boat + teddu, tel. oar + áku, tel. leaf); flagelliform leaf. Tam. from (ezhuttáni, tam. style + púndu, tam. plant); from flower shooting up in the form of a style. Tam. also (kadargozhuppai), meaning sea + flourisher. Title otherwise Sarment lettuce. Botanically Launea pinnatifida, cass., compositæ [vricsham, 74]. Alias Lactuca sarmentosa; Microrhynchus sarmentosus; Prenanthes sarmentosa. Stems twiggy, filiform, procumbent, here and there bearing roots and leaves; leaves close together, sinuately pinnatifid; lobes, obtuse or subacute; peduncles one-headed, somewhat shorter than the leaf, bearing at the apex subimbricated scaly bracts, scariose at the margin; flowers yellow; in sandy places. Sand-binder [manal]; a widely diffused humble plant, with long flagelliform runners; juice mixed with karanj [q.v.] seed oil largely used as an external application in rheumatism; juice also used as a sodorific for children.

SUDDER (صدر - sadr, *Ar.*). From (sadara, ar. to lead). Chief. Part of lacab; as Sudder ood deen, chief of religion [ism].——*Sudder adawlut* (صدر عدالت - sadradálat, Hind.). From (above + adálat, ar. court). The supreme court, the name of the highest court established under the East india company in each Presidency, and consisting of two sides, known as the Sudder diwauny adawlut or Chief civil court and the Sudder nizaumat or Fowjdarry adawlut, the Chief criminal court. The Sudder adawluts have been replaced by High courts [adawlut].——*Sudder ameen* (صدر امین - sadramín, Hind.). From (above + amín, ar. arbitrator). Formerly a native civil judge. Some of a higher grade were distinguished as Principal sudder ameens.——*Sudder o mofussil* (صدر و مفصل - sadromufassal, Hind.). From (above + mufassal, ar. separate). Town and country.

SUGAR (शर्करा - sharkará *San.*; سکر - sukkar, *Ar.*; شکر - shakar, *Pers.*; شکر - shakkar, *Hind.*; ಸಕ್ಕರೆ - sakkare, *Can.*; చక్కెర - tsakkera, *Tel.*; പഞ്ചസാര - pañchasára, *Mal.*; சருக்கரை - sharukkarai, *Tam.*). Both title and vernaculars from sanscrit. San. means piece; granulated sugar. Saccharum of chemists. Chiefly product of Saccharum officinarum, l., graminaceæ [sugar-cane]. Extracted however if necessary by process from several other plants; as from arenga [gomooty], bassia [mohwah], borassus [palmyra], calotropis [yercum], caryota [bastard sago palm], cocos [cocoanut], corypha [talipot], phœnix [kharjooram], and sorghum [cholum]. Sugar is either crystallized or amorphous. White, brown, and pink candy [q.v.], and white and brown sugar are examples of the first; and barley-sugar of the second. Muscovado or raw-sugar is a mixture of crystalline and amorphous sugar. For the different kinds of sugar see below under Sugar-cane. Crystallized sugar should be nearly white, dry, and entirely soluble in water; the last quality shows freedom from the ordinary adulterations, sand, and flour; the white powdery sugar obtainable in most bazaars generally contains a considerable proportion of insoluble material. Sugar includes on the average about 5 per cent. of water, the uncrystallizable part of the juice constituting either treacle or molasses which is about 23 per cent. Sugar when concentrated is highly antiseptic, it is frequently employed in the preservation of vegetable, animal, and medicinal substances; in cases of poisoning by copper [taumram], arsenic [paushanam], or corrosive sublimate [shavveeram], it acts as antidote, and white sugar finely pulverised is occasionally sprinkled upon ulcers with unhealthy granulations; pure cane sugar is medicinally demulcent, nutritive, and dietetic; root is also demulcent and diuretic; sugar and treacle largely used in native medicines; gives to pharm. saccharum purificatum; also treacle the uncrystallised residue of the refining of sugar, theriaca; also syrupus simplex. Unrefined sugar is offered at the shrines of gods, and presented by inferiors to superiors as mark of respect.——(1) *Sugar apple* (سفرجل شیریں - safarjalishírín, Hind.). Same as Common anona.——*Sugar bean* (شکر لوبیا - shakkarlobiyá, Hind.). Same as Country lobyah.——*Sugar-cane* (इक्षु - ikshu, San.; ऊंस - úmsa, Mahr.; قصب السکر - kasabussukkar, Ar.; نی شکر - naishakar, Pers.; گنا - ganná, Hind. and Dec.; تبو - tabu, Malay; ಕಬ್ಬು - kabbu, Can.; ಕರಿಂಬು - karimbu, Too.; చెరుకు - cheruku, Tel.; ଆଖୁ - áku, Oor.; കരിമ്പ് - karimbu, Mal.; උක් - uk, Singh.; கரும்பு - karumbu, Tam.). Title from product. San. from (ish, san. to desire). Mahr. from sanscrit. Ar. from (kasab, ar. reed + sukkar, ar. sugar). Pers. from (nai, pers. reed + shakar, pers. sugar). Mal. means dark color. Singh. from sanscrit. San. also (rasála), meaning ornamented by juice [hurrially, mango]; (mahárasa), meaning great juice; (shastra), meaning weapon, as of cauman; (pundraka), meaning auspicious, applies to the red variety. (kántaraka), meaning produced in forest, the red variety. Mahr. also (úsa). Hind. also (úkh). Dec. also (gándá). Tel. also (árukanupulakránuga), meaning six + joint + sugar-cane; (kanupulacheruku), meaning joint + sugar-cane; (pottikanupulacheruku), meaning short + joint + sugar-cane; (lávucheruku), meaning thick + sugar-cane; (tellacheruku), meaning white + sugar-cane. Tam. also (ukkiragandi), meaning strong smell. Title otherwise Gannah, Juicy reed, Ookh, Sugar reed. Botanically Saccharum [sharam] officinarum, linn., graminaceæ [vricsham, 156]. Culm 6–12 feet; panicles terminal, spreading, erect, oblong, 1–3 feet long, of a grey color from the large quantity of long soft hairs surrounding the flowers, ramifications alternate, very ramous, expanding; flowers hermaphrodite in pairs, one sessile the other pedicelled; calyx two-leaved, smooth; corolla one-valved, membranaceous, rose-colored. Strong cane-stemmed grass, one of the largest, culms marked in spaces by knots or large and swollen joints, large feathery plume of flowers; wild and cultivated; thrives from the equator to the 32° of latitude; the sucrose is contained in the loose cellular inodorous juicy pith with which the stalk is filled; this gives the best known of commercial sugars. Raw sugar, or goor [q.v.], is variable in purity; sugar-cane jaggery [q.v.] is the crude inspissated juice of the sugar-cane often substituted for treacle; refined sugar, or muscovado, is goor refined so as to afford a sugar of very white color, solid, hard, friable, brilliant in some parts, scarcely diaphanous, sonorous, phosphorescent by friction in the dark; loaf sugar is the product of the evaporation of the syrup of refined sugar; candy [q.v.] is crystallized sugar, the crystals are four-sided, with dihedral or sometimes trihedral summits; molasses is uncrystallizable sugar, liquid, thick, of deep color, strong smell, about $1\frac{1}{2}$ per 100 of the whole produce of the cane; caramel is burnt sugar; rum is the alcoholic liquid obtained by the fermentation of molasses. The sugar-cane was originally a native of india, and has been known here from time immemorial; introduced into general use in europe by the saracens and through the crusades; stated not to have been known to the ancient greeks and latins, but lucan has the line, quique bibunt tenera dulces ab arundine succos; the periplus speaks of μέλι τὸ καλάμινον, τὸ λεγόμενον σάκχαρ; and strabo stated that reeds in india yielded honey [shahad] without bees [tainee]; the theory that σάγκαρον meant tabasheer [q.v.] is not sustainable. The cane grows well on a good loam [pasalay-munn] or light clay [calimunn]; the season of planting is soon after the commencement of the rains [mazhay]; the chief requisites are frequent ploughing of the soil, much manuring [yeroo], and careful removal of weeds; and in those varieties requiring much moisture the land must occasionally be artificially watered; a too wet or too dry season is injurious to the sugar-cane; the crops suffer much from the depredations of wild animals, particularly elephants [q.v.], wild hogs [soor], jackals [q.v.], besides caterpillars [cumbly poochy] and worms [keerah]; white-ants [q.v.] are also destructive. Ground prepared for this cultivation in south in maushy [mausam] or february, on coromandel in cheitram or april, on w. coast in chingom or august and cunny or september; seed sown in south in veiyaushy or may, on coromandel in cheitram or april, on w. coast in chingom or august and cunny or september; no nursery; the top knot of the cane is cut and put in water for three days; afterwards it is covered with straw, when it sprouts within five days and is washed and planted; while under growth is weeded and watered; cane is of blue color when fit to be cut one year after; cut at bottom with a sharp knife. For extraction of juice by the mill see Aulay. The following is the ordinary process for separating the sugar from the cane juice; the juice is first boiled, adding choonam [q.v.] at the rate of three ounces for every twenty-four pucka seers [q.v.]; when the contents of the boiler feel waxy to the touch, they are poured off into chatties [q.v.] with a six inch mouth and having small holes at the bottom; the syrup in the molasses drains through these holes; in this state the mass is kept usually for six or eight months, or for at least six weeks at any rate; any remaining syrup in the mass is then drained off by placing it in bamboo [q.v.] baskets, and squeezing it in a cloth; the sugar is then dissolved in water, and boiled a second time, adding from time to time a little ghee [q.v.] and milk [paul] to clarify the sugar; after it has been sufficiently boiled, the sugar is put again into wide

mouthed pots having holes at the bottom, and left to cool and crystalize; any remaining syrup in the sugar drains away through these holes; the outside of the pots is coated over with cowdung [shauny]; a creeping water plant, hydrilla verticillata, rich., is placed on the top of the sugar to make the sugar white and remove any syrupy or black substance; sometimes these plants are also placed at the bottom of the sugar; the plants are renewed every day for five or six days; the sugar is then thoroughly dried and kept for use. To make sugar-candy, the second of the above boilings is curtailed, and the syrup is poured into pots, in which are placed thin slips of bamboo [q.v.]; cloth is then tied over the mouths of these pots, and they are stood for forty days on paddy husk; the sugar crystallizes round these slips. This is the method generally adopted by natives for the manufacture of sugar in south india; in some places however sugar is manufactured according to the european method, and with the help of steam machines; the process for instance employed at aska is the so-called diffusion-process, and consists in chopping up the sugar-cane into small shavings by rapidly revolving knives, the juice being then extracted by a thorough saturation in water, and the saturated juice being boiled down into sugar after undergoing various process of cleaning and refining. Cattle [maud] and horses [ghorah] eat sugar-cane readily; it is fattening, and makes excellent fodder; stalks are chewed by natives. Several varieties cultivated here; some being grown entirely for the manufacture of sugar, others for eating raw; the latter are as a rule thicker, softer, and more juicy than the former. There is a Tamul proverb:—பெருங் குலத்தில் பிறந்தாலும் புத்தி அற்றவன் கரும்புப் பூப்போல—"though born in a high "family, a fool is like a sugar-cane flower"; sugar-cane should be cut before it flowers; the flower destroys value of the cane and a fool kills reputation of the family. And another:—களர் நிலத்தில் கரும்புவை—"plant sugar-cane in calar [q.v.] or "alkaline soil." And another:—ஆனிஆனை வாலொத்த கரும்பு—"in june sugar-cane is like an elephant's tail;" referring to its stem. The cooral says:—சொல்லப் பயன்படு வர் சான்றோர் கரும்புபோற் கொல்லப் பயன்படுங்கீழ்—"the great bestow their alms as soon as they are informed; "but the mean, like the sugar-cane, only when they are tortured "to death." Compare the following, where transl. is of second term:—Aloe littoralis (ikshuramalliká), meaning sweet juice + giving + jasmine; Hygrophila spinosa (ikshugandhá), smell; Ipomæa digitata (ikshugandhá), smell; Saccharum spontaneum (ikshugandhá), smell; Tribulus terrestris (ikshugandhá), smell; see gloss. paragraphs. Wild sugar-cane, or Devil sugar-cane as in the vernaculars, is botanically Saccharum [sharam] procerum, kœnig., graminaceæ [vricsham, 156]; very lofty grass; leaves are given in cow [pashoo] confinement; culms and leaves are food for elephants [q.v.]; yields but little sugar; makes roofs for houses, rafts for crossing rivers, railings for enclosures, and biers to carry dead bodies. Wild sugar-cane is also a name given to Naunal [q.v.].——*Sugar millet* (शर्कराजूर्ण - sharkarájúrna, San.). Same as Sweet cholum.——*Sugar palm* (شکر تاڑ - shakkartár, Hind.). Same as Gomooty.——**(2)** The following are the varieties of cane sugar in the bazaar.——*Boorah shakkaray* (بوراشکر - búráshakkar, Hind.; బూరాచక్కెర - búrátsakkera, Tel.; തരിപ്പഞ്ചസാര - tarippañchasára, Mal.; பூராச்சருக்கரை - púráççarukkarai, Tam.). Hind. from (búrá, hind. powder-like + shakkar, hind. sugar). Mal. from (tari, mal. grain + pañchasára, mal. sugar). Tam. also (naváttuççarukkarai), meaning candy + sugar, from its appearance like powdered sugar-candy. Finest native sugar in white crystals. From Ashtagram and Aska.——*Cand shakkaray* (قند کی شکر - kandkíshakkar, Hind.; కండచక్కెర - kandatsakkera, Tel.; கன்சருக்கரை - kansarukkarai, Tam.). Hind. from (kand, ar. sugar-candy + shakkar, hind. sugar). Loaf sugar.——*Naut shakkaray* (देशशर्करा - déshasharkará, San.; مختومی شکر - makhtúmíshakkar, Hind.; ಊರುಸಕ್ಕರೆ - úrusakkare, Can.; నాటుచక్కెర - nátutsakkera, Tel.; നാട്ടുപഞ്ചസാര - náttupañchasára, Mal.; நாட்டுச்சருக்கரை - náttuççarukkarai, Tam.). Hind. from (makhtúmí, hind. country + shakkar, hind. sugar). Hind. also (lálshakkar), meaning red sugar. Tel. also (bellaputsakkera), meaning jaggery + sugar. Tam. also (shivappuççarukkarai), meaning red + sugar; also (shélañjarukkarai), meaning salem town + sugar. Country sugar, whitey brown.——*Raub shakkaray* (راب شکر - rábshakkar, Hind.; రాబచక్కెర - ráptsakkera, Tel.; இராப்சருக்கரை - irábsarukkarai, Tam.). Hind. from (ráb, hind. syrup + shakkar, hind. sugar). Unrefined moist sugar.——*Vellay shakkaray* (श्वेतशर्करा - shvétasharkará, San.; چینی شکر - chíníshakkar, Hind.; ಬಿಳಿಸಕ್ಕರೆ - bilisakkare, Can.; తెల్లచక్కెర - tellatsakkera, Tel.; വെൺപഞ്ചസാര - venpañchasára, Mal.; வெள்ளைச் சருக்கரை - vellaiççarukkarai, Tam.). Hind. from (chíní, hind. chinese + shakkar, hind. sugar). Mal. also (chínippañchasára), meaning chinese sugar; also (vensharkkara), meaning white sugar. Tam. also (shíniççarukkarai), meaning china + sugar; also (shíni), same. White sugar.

SUJJEE (سجی - sajjí, *Hind.*). Impure carbonate of soda. Same as Sowdoo.——*Sujjee khaur* (सर्ज्जिक्षार - sarjjikshára, San.; सज्जीखार - sajjíkhára, Mahr.; سجی کہار - sajjíkhár, Hind.; సజ్జకారము - saddzákáramu, Tel.; ഉമരിച്ചാരം - umariççáram, Mal.; சச்சிக்காரம் - shaççikkáram, Tam.). Title from hindostany. San. from (sarjji, san. natron + kshára, san. alkali). Hind. from (sajjí, hind. impure carbonate of soda + khár, hind. alkali). Tel. from sanscrit. Mal. from (úmari, mal. salicornia brachiata, roxb. + cháram, mal. ashes). Tam. from sanscrit. Tel. also (lótásaççi), meaning vessel + natron. Barilla or impure carbonate of soda prepared by burning the following plants, all of which belong to Chenopodiaceæ:—Anthrocnemum indicum, moq.; Salicornia brachiata, roxb. [chook]; Salsola kali, willd.; Suæda indica, moq.; Suæda nudiflora, moq. [indian saltwort]. Distinguish from potash [jharka namak]. Distinguish from the carbonate of soda made from the minerals Oovarmunn cauram [q.v.] and Poongauram [q.v.]. Barilla as medicine is primarily antacid, secondarily alterative. Used in dyeing [shauyam].——*Sujjee mutty* (سجی مٹی - sajjímattí, Hind.). From (above + mattí, hind. earth). Any sowdoo [q.v.] soil.

SULLA (చల్ల - tsalla, *Tel.*). Cool. Also buttermilk.——*Salivendra* ([illegible] - tsalivéndra, Tel.). From (above + pandili, tel. shed). Water pandaul [inam] where water is given gratis to travellers.——*Sullapully* (చల్లపల్లి - tsallapalli, Tel.). From (tsalla, tel. buttermilk + palli, tel. village). Tel. also (dévarakóta), meaning god's fort. Zemindarry; Kistna dist., Bunder tal.; pop. 58,925; square miles 192. Otherwise called Devarcote. The ancestors of the family called Yerlagadda were cultivators of the Cumma caste who settled in the district three centuries ago. Yerlagadda gooroova naidoo procured the zemindarry of Devarcote in A.D. 1576. In 1732 during the incursions of Asaf jah, the estate was taken under the Fowjdar's management for a time. After the French had established themselves at Masulipatam in 1751 they obtained from Salaubut jung a grant of the Acoolamannaud and Goodoor pergunnahs [q.v.] as a jagheer [q.v.] and allowed Yerlagadda codandaraman a pension for maintenance. When the English in 1759 expelled the French from Masulipatam, Codandaraman again assumed the title of zemindar but was forced to fly to Condaveed. He died in 1791 and Government recognised as Zemindar the eldest son Vencatramana naidoo. In 1798 he was deposed and his adopted son Ankanna was proclaimed Zemindar. He built the temple at Shivagunga close to Masulipatam at an enormous cost, and erected a house in the Sullapully fort for Rs. 1,32,000 on the model of one at Benares. Estate since then twice under Court of Wards. The young Rajah in 1851 pulled down the temple his grandfather had built at Shivagunga and began to reconstruct it of Condapully granite [caroom cull]. Places of archæological interest:—Ayyanky, Gauza, Ghuntashaula, Nidmole, Pedda cullepully, Shreecaucoolam, Yanamlacoodroo.

SULLAH (سیلا - selá, *Hind.*). Gauze for turbans [mull, puggry, turban].

SULTAN (سلطان - sultán, *Ar.*; സുല്ത്താൻ - sultán, *Mal.*). From (saluta, ar. to predominate). Strength or might, used in the sense of ruler. This arabian title, first taken by Mahmood of ghuznee, fell quickly into disesteem even among the turks themselves, having been assumed by many of their petty rulers. Many of the native princes of the malay archipelago assumed it after their conversion to mahomedanism, in lieu of the sanscrit name of Rajah [q.v.] or the native ones of Ratoo and Pangheran. It was taken by the princes of Bantam, and the only considerable independent malay prince of Borneo now uses it. The word is taken as alam; as Sultan khan, alam + alaumat [ism]. The Sultauny was a system of coins [fanam, naunyam, pagoda] so called in Mysore under Tippoo sultan.——*Sultan's basil* (سلطان الرياحين - sultánurrayáhín, Ar.). Same as Fragrant toolsy.——*Sultan's battery** (ഗണപതിവട്ടം - ganapativattam, Mal.). Title from the fort of tippoo sultan. Vern. from (ganapati, san. the deity + vattam, mal. circle). Town; Malabar dist., Wynaud tal.; lat. 11° 40′; long. 76° 17′; from Calicut N.E. 43 miles; from Manantoddy S.E. 19 miles. In Ganapativuttam amshom. Tippoo sultan had a fort here. British regiment stationed in early part of present century.——*Sultan's canal* (സുല്ത്താൻതോട് - sultántótu, Mal.). From (sultán, ar. ruler + tótu, mal. channel). Canal; Malabar dist., Chiracal tal.; lat. 12° 01′ to 12° 02′ N.; long. 75° 15′ to 75° 17′ E. Artificial work, about two miles in length, executed in 1766 by Ally rajah [audy rajah], husband of the Beeby of Cannanore, when managing the Colattiry domains for Hyder ally. Connects Mount delly river with the backwater formed at the mouth of the Taliparamba and Belliapatam rivers, and thus gives uninterrupted water communication at all seasons. Formerly boats going to or from the north had to go out to sea at this point.——*Sultan's tree* (سلطان الاشجار - sultánulashjár, Ar.). Title from height. Same as Common sirissa.——*Sultan well* (سلطان باوڑی - sultánbáurí, Hind.). From (above + báurí, hind. well). Well on river-bank, with channel [q.v.] to bring water close for percolation or entry.——*Sultauna* (سلطانہ - sultána, Ar.). Female form of sultan.——*Wild sultan seed* (حب السلاطين صحرائى - habbusalátínisahráí, Ar.). Same as Wild jamalgota.

SUMACH (سماق - sumák, *Hind.*). From arabic meaning high; grown on elevated lands. Botanically the Rhus genus, anacardiaceæ [vricsham, 45]. Shrubs, bushes and trees; leaves usually compound; flowers small; fruits small, nearly dry or slightly juicy, containing a single bony one-seeded stone; wood grey, soft, often streaked, with a yellow or brown heart-wood. The species best known to the natives are shown below.——*American sumach* (سماق امریکه - sumákiamríkah, Ar.). Same as Divy divy.——*Red-lac sumach* (कर्कटशृङ्गी - karkatashringí, San.; काकडशिंगी - kákadashíngí, Mahr.; کاکراسنگی - kákrásingí, Hind. and Dec.; కాకరశింగి - kákarashingi, Tel.; கர்க்கடகச்சிங்கி - karkkádagaççingi, Tam.). Title from varnish. San. from (karkata, san. crab + shringa, san. claw), from galls like scorpion's or crab's claw [kakrasinghy]. Mahr., &c., from sanscrit. San. also (shringí), meaning horn-like. Title otherwise Crab's claw, Japanese tallow sumach, Japanese varnish. Botanically Rhus [sumach] succedanea, linn., anacardiaceæ [vricsham, 45]. Alias Rhus acuminata. Tree about 30 feet high, everywhere glabrous, except the panicle in some varieties; leaves crowded at the ends of the branches, 6–18 inches; petiole terete, slender; leaflets 2–5 by 1½–2½ inches, petiolulate, elliptic-oblong, or oblong, or ovate-lanceolate, tip very slender; base rounded or acute, straight or oblique; nerves numerous, slightly arched, slender; panicles axillary, half the length of the leaves, slender, lax, with a very few scattered hairs, or glabrous; flowers $\frac{1}{12}$ inch diameter, yellow green; pedicel slender; sepals broadly ovate, obtuse; petals much longer, oblong, or obtuse; disk five-lobed; drupes ¼ inch diameter, in drooping panicles, gibbous, compressed epicarp very thin, bursting irregularly; stone compressed, bony, surrounded with wax. The horn-like excrescences caused by insects on the branches are called kakrasinghy [q.v.]; they are large, hollow, thin-walled, generally cylindrical, tapering to either extremity. The excrescences are medicinally tonic, expectorant; quoted in pharm., non-officinal, like oak galls [mauchicoy]. A varnish is yielded; the seed gives on being pressed an oil, which soon congeals to the consistence of tallow, and from which in japan candles are prepared.——*Tanner's sumach* (سماق الدباغين - summákuddabbághín, Ar.; سماق - sumák, Pers.; مچھلی - machhlí, Hind.). Title from use. Ar. means tanner's sumach. Pers. from arabic. Hind. means fish or sinew. Ar. also (timtim). Ar. also (samákíl). Pers. also (sumákishakkí), meaning doubtful sumach; (máhí), meaning fish. Hind. also (tatrak); (tamátír). Greek ῥοῦς ἐρυθρή. Title otherwise Elm leaved sumach, European sumach, Fish sumach, Mutchly, Varnish tree. Botanically Rhus [sumach] coriaria, linn., anacardiaceæ [vricsham, 45]. The leaves are about a foot long, pinnate, with from five to seven pairs of leaflets and an odd one, like the leaves of the common elm; the petioles and midribs of the leaflets are covered with a reddish brown tomentum; the leaflets are hairy and very astringent. Fruit is imported in large quantities from persia; considered of good quality when odour is strong, color of a lively green, well ground, and free from stalks. The dry fruit is so small and flat that it looks like a seed; it is either circular or oblong; generally about a line and-a-half in diameter, and half a line in thickness; it is covered with a very thin and light pericarp, which is reddish-brown or rust-colored, odourless, slightly astringent in taste, and can be easily removed from the seeds by rubbing between the hands; the seeds are about one-half smaller in size, almost always oblong, very hard, slightly inclining to be kidney-shaped and possess no particular taste or smell. The pericarp of the seeds and the leaves are medicinally astringent. Compound powder; take of the pericarp of the seeds of rhus coriaria, butea-gum [palaus] and the gum of odina wodier [wodier], in powder, each ten drachms; the fruit of carum roxburghianum [ajmood ajwaun], in powder, five drachms; cinnamon bark [cinnamon], in powder, four drachms; and opium [aphainam], in powder, one drachm; mix well, pass the powder through a fine sieve, rub it lightly in a mortar and keep it in a closed bottle. Dose; from five to forty grains; forty grains, contain one grain of opium. Substituted for pulv. ipecac. compositus, pulv. kino compositus, and pulv. cretæ aromat. cum opio. Leaves and fruit are boiled down, and a liquid extract obtained; this used as an astringent; leaves made into poultices applied to the abdomen in diarrhœa of children; leaves and fruit used as styptic, astringent, and tonic. Fruit is acid. Dried and pulverized leaves furnish a tan; and ounce contains about 75 grains of tannin; of all astringents it bears the greatest resemblance to galls [mauchicoy].

SUMPAUJEY (ಸಂಪಾಜೆ - sampáje, *Can.*). Part of Bylehully village, ghaut; South canara dist., Ooppinangady tal.; pop. 216; from Mangalore E. 54 miles; from Poottore S.E. 30 miles. The ghaut [q.v.] connects S. canara with Coorg. Wheeled traffic.

SUNDAVOLE (చందవోలు - tsandavólu, *Tel.*). From (tsandu, tel. proper name + prólu, tel. town). Tel. also (velnádu), meaning outside + country. Village; Kistna dist., Repully tal.; pop. 2,819; acres 4,626; lat. 16° 01′; long 80° 39′; from Masulipatam W.S.W. 35 miles; from Repully W. 15 miles; from the sea N. 9 miles. Of great antiquity. Mentioned in Hindoo ballads and poems. Mound outside the village contains Booddhist [booddha] remains. Temple built by Chola [q.v.] kings, with inscriptions, dated A.D. 1154, 1171 and 1176. Gold coins [naunyam] have been found.

SUNDOOR (సొండూరు - sondúru, *Tel.* sandúr*). From (sandu, tel. gap + úru, tel. village) [sa]. Ghaut village near Bheemagundy pass.——(1) Territory, Bellary. An independent state and pays no peshcush. For description, &c., see vol. II, appendix XII. Places of archæological interest:—The temple of Comaurasawmy, Ramanmullay, Sundoor. Principal trig. station:—Ramanmullay. The leading places, &c., in the territory are the following.——*Bheemagundy* (భీమగండి - bhímagandi, Tel.). From (bhíma, san. fearful; one of the five pándavas + gandi, tel. pass). Ghaut; lat. 15° 06′; long. 76° 38′; from Bellary W. 21 miles; from Sundoor N.E. 3 miles. One of the three passes by which the Sundoor state is entered, through which runs the main road from Bellary to Ramandroog. Yettinhutty is at the entrance.——*Comaurasawmy's hill* (ಕುಮಾರಸ್ವಾಮಿಗುಡ್ಡ - kumárasvámigudda, Can.). From (kumára, san. skanda, the son-god + svámí, san. lord + gudda, can. hill). Hill, Place of pilgrimage; lat. 15° 01′; long. 76° 37′; height 2,965 feet; from Bellary W.S.W. 25 miles; from Sundoor S.S.E. 5 miles. South of Ramanmullay overlooking Sundoor valley; used as a sanitarium. Ancient temple of Comaurasawmy on the hill, much visited by pilgrims from all parts of India. The jatrah [pundigay, 6d] is triennial. The temple of Parvaty is of stone to the summit and has a wagon-shaped roof like that of the Bheema rath [q.v.] at Mauvellipore.——*Oblagundy* (ఓబగండి - ublagandi, Tel.). From (ahóbilamu, tel. name of a hill + gandi, tel. pass). Pass; lat. 15° 03′; long. 76° 42′; from Bellary W.S.W. 18 miles; from Sundoor S.W. 4 miles. W. pass from Ramandroog plateau. A stream forms main feeder of Darojee lake.——*Ramandroog* (ರಾಮನದುರ್ಗ - rámanadurga, Can.). See sep. title.——*Ramanmullay* (ರಾಮನಮಲೆ - rámanamale, Can.). From (ráma, san. the god + male, can. hill). Sanscrit name (rámagiri). Trig. station; lat. 15° 07′ 34·57″; long. 76° 30′ 26·65″; height 3,256 feet; from Bellary W. 30 miles; from Sundoor W.N.W. 6 miles.——*Sundoor* (సొండూరు - sondúru, Tel.). See below.——*Yettinhutty* (ಯೆತ್ತಿನಹಟ್ಟಿ - yettinahatti, Can.). From (ettu, can. bullock + hatti, can. cattle-pen). Village; pop. 1,548; lat. 15° 08′; long. 76° 32′; from Bellary W. 21 miles; from Sundoor N.E. 5 miles.——(2) Village, Head-quarters of the Sundoor Rajah; Bellary dist., Sundoor territory; pop. 4,347; lat. 15° 00′; long. 76° 36′; height 1,815; from Adony S.W. 60 miles; from Bellary W. 25 miles; from Hospett S.E. 16 miles; from Hurpanhully E.N.E. 43 miles; from Madras W.N.W. 286 miles; from Tadpatry W. 96 miles. After capture of Gooty in 1779, Hyder ally took Sundoor, and built strong fort called Krishna nugger near entrance of valley by Bheemagundy pass.

SUNDRA (खदिर - khadira, *San.*; लालखैर - lálakhaira, *Mahr.*; لال کھیر - lálkhair, *Hind.*; ಕಗ್ಗಲಿಮರ - kaggalimara, *Can.*; చండ్ర - tsandra, *Tel.*; കരിന്നാലി - karinnáli, *Mal.*; கருங்காலி - karungáli, *Tam.*). Title from teloogoo. San. from (khad, san. to be firm); from hard durable wood [biswool, catechu, shoondy]. Mahr. from hindostany. Hind. from (lál, hind. red + khair, hind. acacia catechu, willd.). Can. from (kaggu, can. firm + mara, can. tree). Mal. from tamul. Tam. from (karumai, tam. blackness + kál, tam. foot). San. also (hómavriksha), meaning sacrifice + tree; (mridupatrika), meaning soft + leaf. Tel. also (nallatsandra), meaning black + the tree. Title otherwise Caroongauly. Botanically Acacia [cantalam] sundra, dec., leguminosæ [vricsham, 48]. Specific name from teloogoo. Alias Acacia chundra; Mimosa chundra. Tree, 20–30 feet; branches armed with recurved stipulary prickles, sometimes unarmed; leaves bipinnated; pinnæ fifteen to twenty pair; leaflets numerous, small, linear; spikes one to three together, axillary, peduncled, shorter than the leaves, many-flowered; corolla five-cleft; stamens distinct; flowers small, yellow; legumes thin, flat, lanceolate; seeds few; flowers July to August. Scarcely more than a variety of Acacia catechu, willd. [catechu], from which it differs in its fewer leaflets, total absence of pubescence, and the dark-brown color of its branchlets. Yields a gum similar to catechu gum [gond]. Wood tolerably close-grained and durable; dark red color, veined with a darker shade of streaks, very heavy, used for beams and posts, ploughs, mortars and pestles, and is good for piles and sleepers; not attacked by insects; apt to split with nails.——*Bald sundra* (బోడచండ్ర - bódatsandra, Tel.). Same as Shoondy.——*Foreign white sundra* (சீமைவெள்வேல் - shímaivelvél, Tam.). Same as Anasandra [q.v.].——*White sundra* (शमी - shamí, San.; धवलखैर - dhavalakhaira, Mahr.; ಮುಗಲಿ - mugali, Can.; తెల్లచండ్ర - tellatsandra, Tel.; கோவில் - kovil, Tam.). Title from flowers. San. from (sham, san. to destroy); cf. prosopis spicigera, linn. [shamee]. Mahr. from (dhavala, san. white + khaira, mahr. acacia catechu, willd.). Tel. from (tella, tel. white + tsandra, tel. acacia sundra, dec.). Can. also (banni), properly prosopis spicigera, linn. Botanically Acacia [cantalam] suma, kurz., leguminosæ [vricsham, 48]. Alias Mimosa suma. Tree, armed with straight stipulary thorns; pinnæ ten to twenty pair, with a large concave gland above the base of the petiole,

and two or three between the last two to three pairs of pinnæ; spikes one to six, axillary; legume linear, thin, six to eight-seeded; flowers white; a very common tree, remarkably conspicuous for its white bark; flowering in the rainy season. Has a very hard wood.

SUNN (शण - shana, *San.*; सण - sana, *Mahr.*; सोणबु - sónabu, *Conc.*; سن - san, *Pers.* and *Hind.*; جنب - janab, *Dec.*; ಸಣಬು - sanabu, *Can.*; జనుము - dzanumu, *Tel.*; ଛୋଣିପୋତ୍ତ - chonipotta, *Oor.*; വക്ക - vakka, *Mal*; හණ - hana, *Singh.*; சணல் - shanal, *Tam.*). Title from hindostany. San. from (shan, san. to give). Pers., &c., from sanscrit. Tel. from sanscrit [jute]. Mal. from (valka, san. bark of tree). Singh. from sanscrit. Tam. from sanscrit. San. also (karnashúla), meaning earache; (dhanahári), meaning carrying away wealth; (satinaka), meaning powerful. Hind. also (patsan), meaning corchorus olitorius fibre; (viláitía-krekánár), meaning foreign calotropis fibre. Can. also (henna). Mal. also (chanam); (káttutantalakkotti), meaning wild crotalaria retusa, linn.; (pulivaññi), meaning sour reed. Tam. also (shanappai); (mañji); (kuttiram); (vakkunár), meaning bark fibre. Title otherwise Bengal hemp plant, Bombay hemp, Brown hemp, Concany hemp, Earache plant, False hemp, Gunny, Indian hemp, Janab hemp, Jubbulpore hemp, Madras hemp, Rusty crotolaria, Salsette hemp, Snanal hemp, Striated stalked crotalaria, Sunn hemp, Taag hemp, Travancore flax, Wucknaur. Botanically Crotalaria [ghantaravam] juncea, linn., leguminosæ [vricsham, 48]. Alias Crotalaria benghalensis, fenestrata, porrecta, sericea, tenuifolia, viminea. Small plant, 4–8 feet, erect, branched, more or less clothed with shining silky pubescence or hairs; branches terete, striated; stipules and bracts setaceous; leaves from narrow linear to ovate-lanceolate, acute; calyx deeply five-cleft, densely covered with rusty tomentum, the three lower segments usually cohering at the apex; racemes elongated, terminating every branch; flowers distant; legumes sessile, oblong, broader upwards, about twice the length of the calyx, tomentose and many-seeded; flowers yellow; flowering nearly all year; flowers resemble spanish broom. Menoo [q.v.] says:—"the sacrificial thread [poonool] of a bramin must be of "cotton [q.v.], so as to be put on over his head in three strings; "that of a cshatriya, must be of sunn thread; that of a veisya, "must be of woollen thread." Cultivated in sandy soil, dry; ground prepared on coromandel in caurteecam [mausam] or november and margashiram or december, on w. coast in cunny or september; ploughed dry; seed sown on coromandel in caurteecam or november and margashiram or december, on w. coast in cunny or september; no nursery; scattered through zaddigam [q.v.] mixed with early zonna [cholum] seeds; plant if necessary propped by poles; full-grown crop as tall as zonna or a man's height; pulled up after three months; the fruit bearing part of the plant is cut off and thrown away; the remaining stem is dried in the sun for two days, after which it is dipped in water for three days and again dried in the sun for about three days; the bark is taken from the stem; average price 10 imperial seers for 1 rupee. The fibre is exported from madras under the name of Madras hemp, and from bombay under that of Brown hemp. Seeds used in medicine to purify the blood; narcotic; used in rheumatism. Fibres make strong hemp for cordage, canvas and paper; take tar [keel] easily; when properly prepared, they are much valued in the home markets; in this country they are used for fishing-nets, cordage, canvas, gunny bags, &c.; they are much stronger if left in salt water; with gunny [q.v.] bags, when old, natives make the greater part of their paper [caugaz].——*Shaunam* (शाण - shána, San.). From (shana, san. hemp). Sacred thread [poonool].

SUNNUD (سند - sanad, *Hind.*). From (sanada, ar. to lean against). A document conveying to an individual emoluments, titles, privileges and offices, or the government rights to revenue from land, &c., under the seal of the ruling authority. A sicca sunnud is a stamped grant.——*Sunnud i milkyat i istimrar* (سندملکیت استمرار - sanadimilkiyatiistimrár, Hind.). From (above + milkiyat, ar. proprietary right + istimrár, ar. perpetual). Document by which the British government recognised the ownership of zemindars [q.v.] at a fixed assessment, current chiefly in the Northern circars [q.v.]. See vol. I, 112.

SUNT (سنٹ کی لکڑی - santkílakrí, *Hind.*). Wood of the Babool [q.v.].

SURPRISE GRASS (چرچرا - chirchirá, *Hind.*; ಅಕ್ಕಬಹುಲ್ಲು - akkabahullu, *Can.*; பிசாசு - pisásu, *Tam.*). Title from crackling sound. Hind. means achyranthes aspera, linn. [indian burr]. Can. from (akkaba, can. surprising + hullu, can. grass). Tam. means devil. Can. also (biliakkabahullu), meaning white + surprising + grass; (gandnakkabahullu), meaning male + surprise grass. Tam. also (melampari). Botanically Panicum [priyangoo] javanicum, poir., graminaceæ [vricsham, 156]. Alias Milium sanguinale; Panicum sanguinale. Culms creeping near the base, the rest erect, smooth, one and-a-half foot high; leaves long, narrow, smooth; racemes sub-digitate, three to eight; spikelets alternate in two series, unequally pedicelled; glumes glabrous; sheaths hairy; western coast. When green yields fair fodder, but is unfit for hay-making as it has no undergrowth.

SUTTENAPULLY (సత్తెనపల్లి - sattenapalli,* *Tel.*). From (satyanna, tel. proper name + palli, tel. village) [sat].—(1) Talook, Kistna district. Tashildar's pay Rs. 175. Area 714 square miles. Population 138,617. Language Teloogoo. E. centre part of district. Bounded north by the Kistna, east by Guntoor talock, west by Pulnaud talook, and south by Narsarowpett talook. On the west the Kistna flows round a range of hills, a continuation of the Pulnaud limestone [choonam cull] formation with remarkable outliers near Achammapett and Beeravullipoya. The road from Guntoor to Pulnaud traverses the talook, passing by Medicondore and Suttenapully; there is a road from Amravatty to Guntoor; and the road from Guntoor to Narsarowpett passes through the south-eastern corner at Firangipooram. In wet weather the black soil [regar] and the water-courses are almost impassable. The most conspicuous object is the hill fortress of Bellamcondah, whose castle-like cliffs stand out prominently to the west of Crossoor. Within sight are the neighbouring fortresses of Condapully and Condaveed; so that the talook must have been a debatable ground in the sixteenth century, when Condapully was the frontier post of Golcondah and Condaveed the frontier post of Vijianugger, while Bellamcondah was taken and retaken, being held at one time by Mussalman at another by Hindoo. Great extent of black soil producing heavy crops of cotton [q.v.], and in this black soil the gneissic rock protrudes here and there, sometimes in picturesque profile, as in the eminence overlooking Crossoor. The most interesting spot is the town of Amravatty with the neighbouring village of Dharanicottah in the north-eastern corner. Industries and Commerce.—Agricultural industry, commerce in cloth and indigo [q.v.]. Irrigation by rain-fed tanks [q.v.]. Places of archæological interest:—Ameenbaudah, Amravatty, Bellamcondah, Caumepully, Chintapully, Colalpoody, Crossoor, Dharanicottah, Firangipooram, Garikipaud, Goodipoody, Kaitvaram, Moongode, Mullayyapollem, Panidem, Pedda makkena, Poonore, Rajpollem, Siripooram, Yeddanapoody, Yinoometla. Trig. stations:—Beeravullipoya, Cauchelbode, Chikry, Dhoolipaulla, Lagadapaud, Mannem, Medarsaul, Poolichinta, Worvacull. The leading places, &c., in the talook are the following.——*Achammapett* (అచ్చమ్మపేట - açcammapéta, Tel.). From (açcamma, tel. proper name + péta, tel. suburb). Village; pop. 2,084; lat. 16° 37′; long. 80° 10′; from Crossoor N. 7 miles; from Masulipatam W.N.W. 70 miles. Scene of the murder in 1764 of Jugganna, father of Vasireddy vencataudry naidoo. His widow Achamma, sacrificed herself upon the funeral pile, and the village was called Achammapett. Formerly considerable trade in cloth, still commercial place.——*Amravatty* (అమరావతి - amarávati, Tel.). See sep. title.——*Beeravullipoya* (బీరవల్లిపాయ - bíravallipáya, Tel.). From (bíra, tel. plant, luffa acutangula, roxb. + vallí, san. creeper + páya, tel. stream). Village; pop. 1,430; lat. 16° 26′; long. 8° 02′. Natural fortress of limestone [choonam cull] to which surrounding villagers retired in 1816 before the Pindarries. An irrigation tank. Trig. station in lat. 16° 27′ 17·92″; long. 80° 02′ 34·04″; height 1,294 feet; from Bellamcondah S. 3 miles; from Suttenapully W.N.W. 11 miles.——*Bellamcondah* (బెల్లంకొండ - bellamkonda, Tel.). See sep. title.——*Cauchelbode* (కాచెలబోడు - káchelabódu, Tel.). From (káchi, tel. solanum nigrum, linn. + bódu, tel. hillock). Trig. station; lat. 16° 30′ 42·59″; long. 80° 01′ 06·9″; from Suttenapully N.N.W. 14 miles.——*Chikry* (చిక్రి - chikri, Tel.). Trig. station; lat. 16° 35′ 40·48″; long. 80° 07′ 01·31″; height 801 feet.——*Chintapully* (చింతపల్లి - chintapalli, Tel.). From (chinta, tel. tamarind tree, tamarindus indica, linn. + palli, tel. village). Village; pop. 1,176; acres 2,697; lat. 16° 42′; long. 80° 11′; from Crossoor N. 10 miles; from Masulipatam W.N.W. 71 miles. On right bank of Kistna. Once capital of Vasireddy zemindars [q.v.]. In 1794 garrisoned by a battalion of sepoys [q.v.]. The zemindar then changed his residence to Amravatty. The fort was 250 yards by 160, and had six bastions with two entrances. It is now in ruins. Inscription south of the village dated A.D. 1239. The grandsons of Vencataudry naidoo's nephew and the great grandsons of Vencataudry naidoo lived here in receipt of pensions. Ferry.——*Collore* (కొల్లూరు - kollúru, Tel.). See sep. title.——*Crossoor* (క్రోసూరు - krósúru, Tel. krósur*). From (krósha, san. distance of call + úru, tel. village). Village, Talook head-quarters; pop. 2,088; acres 6,006; lat. 16° 33′; long. 80° 11′; from Bezwada W. 30 miles; from Guntoor N.W. 27 miles; from Madras N. 210 miles; from Masulipatam W.N.W. 67 miles; from Vinoocondah N.E. 42 miles. Many old temples. Large irrigation tank.——*Dharanicottah* (ధరణికోట - dharanikóta, Tel.). See sep. title.——*Dhoolipaulla* (ధూళిపాళ్ల - dhúlipálla, Tel.). From (dhúli, san. dust + pádu, tel. village). Trig. station; lat. 16° 25′ 59·52″; long. 80° 07′ 57·31″; height 249 feet; from Suttenapully N.W. 5 miles.——*Firangipooram* (ఫిరంగిపురము - p'hirangipuramu, Tel.). From (farangí, hind. europeans + pura, san. town). Village, Hill, Railway station; pop. 3,594; acres 3,303; lat. 16° 17′; long. 80° 18′; from Crossoor S.S.E. 91 miles; from Masulipatam W. 53 miles. Village is at north end of detached hill. Temple of Veerabhadran [q.v.] with three inscriptions, one of which dated A.D. 1409 records the construction of a tank by the wife of Veera narrain vaima vibhoo in the days of the Reddies. Since 1816 head-quarters of the Catholic

missions from Pulnaud to Repully.——*Goodipoody* (గుడిపూడి - gudipúdi, Tel.). From (gudi, tel. temple + púdi, tel. village). Village; pop. 1,815; acres 4,393; lat. 16° 26′; long. 80° 16′; from Crossoor S.S.E. 10 miles; from Masulipatam W.N.W. 62 miles. Temple with five inscriptions, two dated A.D. 1160, others 1163, 1237, and 1243.——*Kistna* (కృష్ణ - krishna, Tel.). See sep. title.——*Lagadapaud* (లగడపాడు - lagadapádu, Tel.). From (lagadu, tel. hawk + pádu, tel. village). Trig. station; lat. 16° 29′ 19·91″; long. 80° 16′ 52·15″; height 225 feet; from Goojjerlapoody E. 2 miles; from Suttenapully N.E. 9 miles.——*Mannem* (మన్నెం - mannem, Tel.). Means hilly land. Trig. station; lat. 16° 22′ 23·62″; long. 79° 55′ 25·42″; height 1,210 feet; from Suttenapully W. 17 miles.——*Maudala* (మాదల - mádala, Tel.). Means a citron, citrus medica, linn. Village; pop. 2,826; acres 7,753; lat. 16° 22′; long. 80° 10′; from Crossoor S. 12 miles; from Masulipatam W.N.W. 68 miles. Old Shiva temple. An irrigation tank.——*Medarsaul* (మేదరసాల - médarasála, Tel.). From (médari, tel. basket weaver + sálu, tel. line). Trig. station; lat. 16° 42′ 02·81″; long. 80° 05′ 59·66″.——*Medicondore* (మేడికొండూరు - médikondúru, Tel.). From (médi, tel. fig tree, ficus glomerata, miq. + konda, tel. hill + úru, tel. village). Village; pop. 1,894; acres 5,056; lat. 16° 20′; long. 80° 20′; from Crossoor S.E. 17 miles; from Masulipatam W.N.W. 56 miles. On Guntoor-Pulnaud road.——*Moongode* (మునుగోడు - munugódu, Tel.). From (munu, tel. front + kódu, tel. rivulet). Village; pop. 1,311; acres 3,491; lat. 16° 34′; long. 80° 17′; from Crossoor E.N.E. 7 miles; from Masulipatam W.N.W. 62 miles. 8 miles west of Amravatty. Now decayed. Inscriptions of reign of Vishnoovardhanan [q.v.], and that of Gonka a Chola [q.v.], regent. Fine tamarind tope [q.v.] and numerous stone circles [azhauram] in the neighbourhood.——*Munney sultan pollem* (మన్నేసుల్తానుపాలెము - mannésultánupálemu, Tel.). From (mannemu, tel. highland + sultán, ar. prince + pálemu, tel. fortified village). Village; pop. 364; acres 941; lat. of village 16° 34′ 55″; long. 80° 00′ 54″; from Crossoor W.N.W. 12 miles; from Masulipatam W.N.W. 81 miles. Title bestowed by the Nizam upon the Chintapully zemindar for subduing certain poligars [q.v.]. An irrigation tank.——*Panidem* (పనిదెము - panidemu, Tel.). From (pannidamu, tel. wager). Village; pop. 1,890; acres 5,035; lat. 16° 28′ 00″; long. 80° 13′ 54″; from Crossoor S.S.E. 6 miles; from Masulipatam W.N.W. 65 miles. Three inscriptions recording private grants, two dated A.D. 1102 and 1282. Another east of the village records a grant by the wife of Kota kaita rajah in A.D. 1231.——*Pautibunda* (పాటిబండ - pátibanda, Tel.). From (pádu, tel. a village + banda, tel. rock). Village; pop. 2,161; acres 3,107; lat. 16° 28′; long. 80° 20′; from Crossoor E.S.E. 12 miles; from Masulipatam W.N.W. 55 miles. The majority of the cultivators are Catholics [siripooram]. Fine Christian church. Festival on January 6th. Adjoining is a mass of black rock crowned by Hindoo temples.——*Peddacoorpaud* (పెద్దకూరపాడు - peddakúrapádu, Tel.). From (pedda, tel. large + kúra, tel. kitchen vegetable + pádu, tel. village). Village; pop. 2,801; acres 8,890; lat. 16° 28′; long. 80° 18′; from Crossoor E.S.E. 9 miles; from Masulipatam W.N.W. 61 miles. Largest village in talook.——*Poolichinta* (పులిచింత - pulichinta, Tel.). From (puli, tel. sour + chinta, tel. tamarind, tamarindus indica, linn.). Trig. station; lat. 16° 45′ 02·92″; long. 80° 06′ 15·04″; height 1,106 feet; from Poolichinta N.N.E. 2 miles; from Suttenapully N.N.W. 25 miles.——*Siripooram* (సిరిపురము - siripuramu, Tel.). From (siri, tel. wealth + pura, san. town). Village; pop. 2,193; acres 4,065; lat. 16° 25′; long. 80° 20′; from Crossoor S.E. 14 miles; from Masulipatam W.N.W. 57 miles. Christians here from a remote period. Festival on January 1st. Ruined temple near tank with inscription of A.D. 1165, relating how the Chalookya [q.v.] kingdom passed into the hands of the Cholas. Inscription in Teloogoo records that Condamaneed, son of Gopa patro, on horseback crossed over the rock from west to east. Indigo plantations.——*Suttenapully* (సత్తెనపల్లి - sattenapalli, Tel.). See below.——*Velpoor* (వెల్పూరు - vélpúru, Tel.). From (vélpu, tel. deity + úru, tel. village). Village; pop. 1,577; acres 5,106; lat. 16° 35′; long. 80° 10′; from Crossoor N. 3 miles; from Masulipatam W.N.W. 68 miles. Ancient pagodas [q.v.].——*Worra cull* (ఒరవకల్లు - óruvakallu, Tel.). Means touch stone. Trig. station; lat. 16° 35′ 33·17″; long. 80° 12′ 24·25″.——**(2)** Village; Kistna dist., Suttenapully tal.; pop. 2,788; acres 3,100; lat. 16° 24′; long. 80° 11′; from Crossoor S. 10 miles; from Masulipatam W.N.W. 66 miles. Residence of zemindar of the Manoor family. Has mud fort, a strong erection with bastions at the angles and a rampart to the eastern face, where was the entrance built by Pedda vencatakrishnamma, zemindar of Chilcaloorpaud during the time of Basaulat jung. Talook [q.v.] cutcherry [q.v.] buildings under construction. Irrigation tank. On the Guntoor-Pulnaud road. A centre of trade. The Manoor zemindars, until lately zemindars of Suttenapully and Chilcaloorpaud, are Bramins. They have an imperial grant dated 1707, the last year of Aurangzeeb's reign, appointing them zemindars and Sheristadars [q.v.] of Moortezahnugger circar [q.v.]. They make use of the title Majmoodar [q.v.] in addition to their family name.

SUTTIMUNGALAM (சத்தியமங்கலம் - shattiyamangalam, Tam. satyamangalam *). From (satya, san. truth epithet of vishnu + mangala, san. prosperity) [sat]. Sanscrit name (satyapuri), meaning vishnoo, the truthful + town.——**(1)** Talook, Coimbatore district. Tahsildar's pay Rs. 200. Area 1,185 square miles. About 40 miles from N. to S. and 60 from E. to W. Nearly 600 square miles is hill and forest, 389 acres surveyed. Population, 151,313. Languages, Tamul, Canarese, Teloogoo and Hindostany. The northernmost talook below ghauts. Bounded N. by Collegaul talook; N.W. by Chaumrajnugger talook of Mysore; S., S.E., and S.W. by Pulladam, Erode and Coimbatore talooks respectively; E. by Bhawauny; W. by Goondloopett talook of Mysore. On the N., N.E., N.W., and W. it is enclosed by mountain ranges; the Neilgherries lying to W., and the ghauts S. of the Mysore plateau to the N.W. and N. Through the ghauts [q.v.] are the Guzzelhutty, Hassanore and Talamullay passes, routes through which Hyder and Tippoo launched their armies into the plains during the Mysore wars. Climate bad. Does not benefit by Palghaut gap. Elephants [q.v.] abundant above ghauts [q.v.]. Bhawauny noted for fish. Forests important. Soils are chiefly red loam and red sand, black soils not occupying above 8 per cent. of the area. Dry crops are cholum [q.v.], cumboo [bajrah], shaumay [q.v.], tinay [q.v.], raggy [q.v.], varagoo [q.v.], castor [aumanac], pulses [dholl] and mustard [rayaun]. Garden crops are the same with the addition of wheat [geung] and exception of shaumy [q.v.], varagoo [q.v.], pulses [dholl] and mustard [rayaun]. Wet crops [q.v.] are devaroyen shumbah, shaday shumbah and caur paddy [q.v.]. The yield of paddy [q.v.] under the two great channels is very heavy. Trade chiefly exportation of grain and importation of cloths, salt, and miscellaneous goods. The sandal-wood of the forests above ghauts are extensive and famous. Large numbers of small cattle [maud] bred in Hassanore hills. Bhawauny flows through talook. Joined by three affluents, Moyaur which unites 10 miles west of Guzzelhutty, the Tattapallam and the Gandypollem. Bhawauny is in highest flood from June to August. Bridge across river at Suttimungalam. Project to dam the flood waters of the Bhawauny a short distance above Suttimungalam, and to form a lake capable of irrigating a very large area in centre of district. The chief cultivation is dependent on the old anicut [q.v.]. The two chief channels [q.v.] are the Tadapully channel and the Arcancottah both regulated by head sluices. Places of archæological interest:—Attiltoray, Caniyampolliem, Cawnitippancottay, Codoovairy, Danaickencottah, Gootyaulattore, Guzzelhutty, Negamam, Peroondalayore, Rungasawmy's peak, Shengalaray, Sirvalore, Suttimungalam, Talamalaicottay, Vellacoil. Principal trig. stations:—Cambatroyen, Comaulicaradoo, Oorgamullay, Tittamullay. The leading places, &c., in the talook are the following.——*Arcancottah* (அரக்கன்கோட்டை - arakkangóttai, Tam.). From (arakkan, tam. a giant + kóttai, tam. fort). Channel. Taken off Bhawauny on N. bank at Codivairy anicut opposite to Tadapully channel. Falls into Bhawauny at Permoogay. Length, 24 miles.——*Bhawauny* (பவானி - paváni, Tam.). See sep. title.——*Cambatroyen* (கம்பத்தராயன் - kambattaráyan, Tam.). From (kambattam, tam. agriculture + iráyan, tam. king). Trig. station; lat. 11° 35′ 27·35″; long. 77° 18′ 46·63″; height 5,571 feet; from Coottaulatore S.W. 8 miles; from Suttimungalam N N.E. 6 miles.——*Comaulicaradoo* (கோமாளிக்கரடு - kómálikkaradu, Tam.). From (kómál, tam. mistress + karadu, tam. rugged ground). Trig. station; lat. 11° 25′ 44·83″; long. 77° 32′ 23·40″; height 757 feet; from Coogalore S. 4 miles; from Suttimungalam E.S.E. 18 miles.——*Congarapolliem* (கொங்கராப்பாளையம் - kongarappálaiyam, Tam.). From (kongan, tam. the kongu king + pálaiyam, tam. fortified village). Village; pop. 1,628; acres 2,691; lat. 11° 31′; long. 77° 24′; from Coimbatore N.N.E. 45 miles; from Suttimungalam E. 8 miles. Near Oorgamullay trig. station. Market on Sunday.——*Coogalore* (கூகலூர் - kúgalúr, Tam.). From (kúgai, tam. owl + úr, tam. village). Village; pop. 4,630; acres 6,588; lat. 11° 29′; long. 77° 32′; from Coimbatore N.E. 49 miles; from Suttimungalam E. 17 miles. Shiva [q.v.] and Vishnoo [q.v.] temple [coil] built by a Chera [q.v.] king.——*Coottaulatore* (குத்தாலத்தூர் - kuttálattúr, Tam.). From (kuttálam, tam. bauhinia racemosa, lam. + úr, tam. village). Village; pop. 4,260. Near Cambatroyen trig. station.——*Coshanam* (கோசனம் - kósanam, Tam.). Probably a corruption from sanscrit. Sanscrit name (kóshalápuri), meaning cosalam, ancient city of oude + town. Village; pop. 2,835; acres 5,122; lat. 11° 22′; long. 77° 24′; from Coimbatore N.E. 37 miles; from Suttimungalam S.E. 12 miles. Near Tittamullay trig. survey station.——*Danaicken cottah* (டணாயக்கன்கோட்டை - tanáyakkangóttai, Tam.). See sep. title.——*Dimmam* (ದಿಮ್ಮಂ - dimmam, Can.). See sep. title.——*Gopichettipolliem* (கோபிசெட்டிப்பாளையம் - kóppisettippálaiyam, Tam.). Means gopichetty's village. Village; pop. 2,104; acres 1,375; lat. 11° 27′; long. 77° 29′; height 859 feet; from Coimbatore N.E. 45 miles; from Suttimungalam E.S.E. 13 miles. Best wet land of talook.——*Guzzelhutty* (ಗೆಜ್ಜಲ್ಹಟ್ಟಿ - gejjalhatti, Can.). See sep. title.——*Hassanore* (ஆசனூர் - ásanúr, Tam.). See sep. title.——*Honnholey* (ಹೊನ್ನುಹೊಳೆ - honnuhole, Can.). See sep. title.——*Moyaur* (மொய்யாறு - moyyáru,

Tam.). See sep. title.——*Numbiyore* (நம்பியூர் - nambiyúr, Tam.). From (nambi, tam. one of that caste + úr, tam. village). Village; pop. 7,145; acres 11,952; lat. 11° 22′; long. 77° 22′; from Coimbatore N.E. 36 miles; from Suttimungalam S.S.E. 11 miles.——*Ourgamullay* (உருகமலை - urugamalai, Tam.). From (uraga, san. snake + malai, tam. mountain). Trig. station; lat. 11° 36′ 57·63″; long. 77° 23′ 26·18″; height 4,879 feet; from Congarapolliem N. 7 miles; from Suttimungalam N.E. 10 miles. ——*Peroondalayore* (பெருந்தலையூர் - perundalaiyúr, Tam.). From (perum, tam. large + talai, tam. head + úr, tam. village). Village; pop. 3,892; acres 4,832; lat. 11° 28′; long. 77° 37′; from Coimbatore N.E. 53 miles; from Suttimungalam E. 22 miles. End of rice-producing tract with tank known as Anantasaugaram filled by Tadapully channel. Old Shiva [q.v.] temple [coil].——*Poonjah pooliyamputty* (புஞ்சைப்புளியம்பட்டி - puñjaippuliyambatti, Tam.). From (puñjai, tam. dry land + puli, tam. tamarind tree, tamarindus indica, linn. + patti, tam. cattle-fold). Village; pop. 1,937; acres 2,869; lat. 11° 21′; long. 77° 13′; from Coimbatore N.N.E. 28 miles; from Suttimungalam S.S.W. 13 miles. Weekly market on Thursday.——*Sirvalore* (சிருவலூர் - shiruvalúr, Tam.). From (shiru, tam. small + val, tam. strength + úr, tam. village). Sanscrit name (vyághrapura), meaning tiger + town. Village; pop. 3,965; acres 6,035; lat. 11° 22′; long. 77° 30′; from Coimbatore N.E. 42 miles; from Suttimungalam E.S.E. 17 miles. On road from Peroondoray railway station to Suttimungalam. Old Vishnoo [q.v.] temple. Shiva [q.v.] temple [coil]. Weekly market on Tuesday.——*Suttimungalam* (சத்தியமங்கலம் - sattiyamangalam, Tam.). See below.——*Tadapully* (தடப்பள்ளி - tadappalli, Tam.). From (tadam, tam. hill slope + palli, tam. village). Village; pop. 1,756; acres 1,671; lat. 11° 28′; long. 77° 22′; from Coimbatore N.N.E. 41 miles; from Suttimungalam E.S.E. 6 miles. The channel of this name is taken off Bhawauny on S. bank at Codivairy anicut [q.v.]. It ends in Anantasaugaram tank in Peroondalayore. Length 48 miles.——*Taulavaudy* (தாளவாடி - tálavádi, Tam.). See sep. title.——*Tittamullay* (திட்டமலை - tittamalai, Tam.). From (tittai, tam. mound + malai, tam. mountain). Trig. station; lat. 11° 20′ 45·48″; long. 77° 23′ 54·27″; height 1,218 feet; from Coshanam S. 1½ miles; from Suttimungalam S.E. 13 miles.——(2) Village, Divisional and talook head-quarters; Coimbatore dist., Suttimungalam tal.; pop. 3,574; acres 2,039; lat. 11° 30′; long. 77° 17′; from Coimbatore N.N.E. 40 miles; from Erode W.N.W. 35 miles; from Madras W.S.W. 230 miles; from Ootacamund E. 36 miles; from Pollachy N.N.E. 61 miles. On the Bhawauny, here more than 100 yards broad. Guzzelhutty and Hassanore ghauts [q.v.] lead to uplands from here. Old mud fort, built by son in-law of Trimal naick of Madura, commanded the fords at the foot of the Guzzelhutty pass, and was of strategic importance in Mysore wars. Taken by the Mysore generals in 1657; captured by Colonel Wood in 1768; recaptured by Hyder in 1769. In 1790 Colonel Floyd occupied Suttimungalam, and between the fort and Danaicken cottah fought a severe battle with Tippoo. Two ancient Shiva [q.v.] and Vishnoo [q.v.], temples.

SWAM (स्व - sva, *San.*). Latin suus. One's own.——*Saeen* (سائیں - sáín, Hind.). From (svámí, san. lord). Title of a religious mendicant.——*Sauny* (సాని - sáni, Tel.). Corruption of Sawminy, meaning a woman of rank; affix to names of dancing girls [dausy], as Rungasauny, Camalasauny [peyar]. Distinguish from Sauny, companion.——*Sawmy* (स्वामी - svámí, San.). From (svam, san. own). Lord; master; title given to idols [shilay, vigraham], especially shiva [q.v.] or soobramanyan [q.v.]; often borne by individuals. Used as a term of address, especially to bramins. Also suffix in Tamul and Madhwa proper names [peyar]. Sawmibhogam, from (bhógam, san. enjoyment), is proprietor's right; share of produce paid to Mirassidar [q.v.] by tenant cultivator [mail vauram, mitchauram, ryot]. Sawmyam is right of property [cawny]; suffix in compounds as Ashtabhoga [q.v.] sawmyam.——*Shaumoo* (சாமு - shámu, Tam.). Familiar form of (svámí, san. lord. Hindoo 2nd or pers. name [peyar]. ——*Sott* (சொத்து - shottu, Tam.). From (sva, san. property). Property [porool, stity]. Chara or jangama sott is movable property, while Stira or stauvara sott is immovable property.——*Soymida* (पत्राङ्ग - patránga, San.; रक्तरोडा - raktaródá, Mahr.; روهن - rohan, Hind.; روهن کاجهار - rohankájhár, Dec.; ಸ್ವಾಮಿಮರ - svámimara, Can.; సోమిద - sómida, Tel.; ସୋହନ - sóhan, Oor.; செம்மரம் - shemmaram, Tam.). Title from teloogoo. San. from (patra, san. leaf + anga, san. body). Hind. from (róhana, san. the plant). Dec. like hindostany. Can. from (svámí, san. superior + mara, can. tree). Tel. corrupted from canarese. Tam. from (shem, tam. red + maram, tam. tree). San. also (róhana), meaning red. Hind. also (rohitaka), meaning red [rohitacam]. Tel. also (chévamánu), meaning red heartwood + tree [malay red wood]; (sómi). Tam. also (shurakkalli), meaning fever + euphorbia; (vandumaram), meaning beetle tree. Title otherwise Bastard cedar, Coromandel redwood, Febrifuge mahogany, Indian mahogany, Indian redwood, Red cedar, Rohan tree. Botanically Soymida febrifuga, adr., juss., meliaceæ [vricsham, 36]. Generic name from teloogoo. Alias Swietenia febrifuga, soymida. Tree, 60 feet; petals five, shortly unguiculate; calyx five-toothed; leaves abruptly pinnate; leaflets opposite, three to six pair, oval-oblong, obtuse; panicles terminal or axillary from the upper leaves; capsules five celled; seeds numerous, winged; flowers small, greenish white; flowering in march-april. Bark is of a dull red color, epidermis rough and gray, fracture fibrous and woody; breaks easily, pleasant, bitter taste, with slight degree of austerity. In bazaars nux-vomica bark or koochlah [poison nut] is sold for the soymida; this is thin, black internally, very brittle, is grey externally, and stained with bright rust-colored spots; the infusion of nux-vomica bark is nearly colorless. Gives to pharm. soymidæ cortex, bitter amorphous principle; astringent, tonic, and antiperiodic; preparation, decoctum soymidæ; officinal, like cinchona [koinah]. Decoction of bark dyes brown of various shades according as the cloth is prepared. Yields valuable dull red colored wood highly prized by natives for building purposes, durable and strong, well adapted for all indoor work, apt to split on exposure to the sun, grain tolerably close not even, and does not work smoothly. No other common species here.——*Swa bhauvam* (स्वभाव - svabháva, San.; சுபாவம் - shubávam, Tam.). From (above + bháva, san. state). Nature, characteristic, or property of perceptible things. ——*Swacarmam* (स्वकर्म - svakarma, San.). From (above + kri, san. to do). One's own business.——*Swadesham* (स्वदेश - svadésha, San.). From (above + désha, san. country). One's country.——*Swadesha madhya paridhy* (स्वदेशमध्यपरिधि - svadéshamadhyaparidhi, San.). From (above + désha, san. country + madhya, san. middle + paridhi, san. circumference). The circumference of the terrestrial equator [niracsham]. This element is used in the resolution of all gnomonic problems [shunk], and for fixing the longitude [deshauntaram] of places. ——*Swadesha paridhy* (स्वदेशपरिधि - svadéshaparidhi, San.). From (désha, san. country + paridhi, san. circumference). The circumference of a circle of longitude [deshauntaram] in any point on the globe [golam] of the earth removed from the equator [niracsham] or which has latitude [acsham]. The degrees [bhaugam] of these small circles of the sphere are taken to be in the direct ratio of the cosines of the latitudes [acsham]; and resolved into assignable quantities from the dimensions of the equatorial circle, held to contain 5,059 yojanams [jyotisham, yojanam].——*Swadhay* (स्वधा - svadhá, San.). From (above + dhá, san. to place). Self-contained Pracrity [q.v.] or nature.——*Swadhyauyam* (स्वाध्याय - svádhyáya, San.). From (above + adhyáya, san. reading). Repeating prayers [japam].——*Swajauty* (स्वजाति - svajáti, San.). From (above + játi, san. class). One's own people.——*Swaroopam* (स्वरूप - svarúpa, San.; சொரூபம் - shorúbam, Tam.). From (above + rúpa, san. form). Natural state or condition, an idol [vigraham] or image [moorty], person. In malabar a dynasty, answering to vamsham [q.v.] on the other coast. The Calicut zamorin [q.v.] rajah's family is called the Nediyiroopp [q.v.] swaroopam, that of the Cadatnaud rajah is the Porlattiry [q.v.] swaroopam, that of the Chiracal rajah is the Colattiry [q.v.] or Colaswaroopam, that of Cottayam or Cotiote is the Pooranautcara or Poorattara [pooranaud] swaroopam, that of the Cooroombranaud is the Cooroombarattiry or Coorumbiyattiry swaroopam. The Valavanaud rajah is the Arnottoor [arangott] swaroopam, the Cochin rajah is the Perimpadapp [q.v.] swaroopam, the Travancore rajah is the Tripah or Tripah swaroopam [q.v.]. In general usage it means only the Colattiry, Zamorin, Cochin and Travancore rajahs.——*Swasampaudanam* (സ്വസമ്പാദനം - svasampádanam, Mal.). From (above + sampádana, san. earning). Self-acquired property. The self-acquisitions of an individual member of a Malabar family are at his absolute disposal during his lifetime, and the last survivor of a joint family has the same power over the family property as if it were his self-acquisition. At the death of the acquirer, all acquisions which he has not disposed of form part of the family property.——*Swatantram* (स्वतन्त्र - svatantra, San.). From (above + tantra, san. dependence). Independent property. Perquisites due to village officers [merah].——*Swayam* (स्वय - svaya, San.). Self.——*Swayambh* (स्वयम्भू - svayambhú, San.; சுயம்பு - shuyambu, Tam.). From (svayam, san. self + bhú, san. to be). Shiva, the self-existent. Hindoo 2nd or pers. name [peyar].——*Swayambhoo lingam* (स्वयम्भलिङ्ग - svayambhulinga, San.). From (svayam, san. self + bhú, san. to be + linga, san. phallus). Lingam [q.v.] made of a rock not placed but forming part of the ground.——*Swayam pracausham* (स्वयम्प्रकाश - svayamprakásha, San.). From (svayam, san. self + prakásha, san. light). Self-inherent light. The deity.——*Swayamvaram* (स्वयंवर - svayamvara, San.). From (svayam, san. self + vri, san. choose). The choice of a husband in a public assembly of suitors and others [calyaunam].

SWAR (स्वर् - svar, *San.*). From (sur, san. to shine). Heaven. ——*Soora* (सुर - sura, San.). Divine. Plant first term often joining two genera. Ex., where transl. is of second term:—Barringtonia speciosa (suraponna), calophyllum inophyllum; Calophyllum inophyllum (surahonnémara), mallotus philippensis; Cedrus deodara (suradru), tree; Grangea maderaspatana (suraparna), leaf; Leea hirta (surapádi), foot; Ochrocarpus longifolius (suraponna), calophyllum inophyllum. See gloss. paragraphs.——*Sooram* (सुर - sura, San.). From (sur, san. to

shine, rule). Measure of sidereal or star time. 60 soorams = 1 param or indian second [caulam, 4, 5]. Approximate actual value, 1 sooram = $\frac{1}{150}$th of a second. Same as alipalam [caulam, 6].——*Sooran* (सुर - sura, San.). From (sur, san. to shine). A divinity. See Asooran.——*Soorinainy* (సూరినేని - súrinéni, Tel.). From (súri, tel. sun + náyadu, tel. caste title). Family name of zemindars [q.v.] of Meilaveram in Kistna district. Originally renters of Condapully killadar [q.v.].——*Sooryacaunty* (सूर्यमुखी - súryamukhí, San.; सूर्यकान्ति - súryakánti, Mahr.; آذریون - ázariyún, Ar.; آفتاب پرست - áftábparast, Pers; سورج مکھی - súrijmukkhí, Hind.; سورج کاجہاڑ - súrijkájhár, Dec.; ಸೂರ್ಯಕಾಂತಿ - súryakánti, Can. and Too.; సూర్యకాంతి - súryakánti, Tel.; സൂര്യകാന്തം - súryakántam, Mal.; சூரியகாந்தி - shúriyagándi, Tam.). Title from tamul. San. from (súrya, san. sun + mukha, san. face), sun-facing. Mahr. from (súrya, san. sun + kánti, san. desire), sun-desiring [one-leaf nelumbo]. Ar. from (ázar, ar. fire + yún, pers. color). Pers. from (áftáb, pers. sun + parast, pers. worshipper). Hind. from (súrij, hind. sun + mukh, hind. face). Dec. from (súrij, hind. sun + jhár, hind. tree). Drav. from (súrya, san. sun + kánti, san. desire). San. also (ádityabhaktá), meaning sun worshipper [dog vailay]. Pers. also (vartáj). Can. also (hottutiruganagida), meaning sun + turning + plant. Tel. also (poddutirugudu), meaning sun + turning; (ádityabhaktichettu), meaning sun + devotion + tree [dog vailay]; (súryávartamu), meaning sun + turning. Title otherwise Golden flower of peru, Sun-flower. Botanically Helianthus annuus, linn., compositæ [vricsham, 74]. Alias Helianthus indicus. Leaves all cordate three-nerved; peduncle thick; heads cernuous. Shrub; ornamental annual; flower very large yellow. Gives a clear, fluid drying oil [yennay], like that of groundnut [q.v.], used in native medicine. The seeds form a good food for poultry; the leaves and stalks furnish a strong fibre, and the refuse or marc from the seeds, after the oil has been extracted, yields a good cake [ponnauk] for cattle. The Jerusalem artichoke, a corruption of gira sole, italian for turn-sun, is Helianthus tuberosus, linn., native of brazil, cultivated as vegetable for roots, similar to small potatoes [q.v.]; not to be confounded with the true garden artichoke, Cynara scolymus, linn.——*Soorya devan* (సూర్యదేవుడు - súryadévudu, Tel.). From (súrya, san. sun. + déva, san. lord). Rajah of Orissa in the twelfth century who, according to the chronicles of Orissa, founded, as a subordinate seat of Government, the present town of Amravatty. See vol. I (10).——*Sooryamoorty* (சூரியமூர்த்தி - shúriyamúrtti, Tam.). From (súrya, san. sun + múrti, san. form); sun deity. Hindoo 2nd or pers. name [peyar]——*Sooryan* (सूर्य - súrya, San.). From (suvar, san. heaven + ya, san. goer). The sun ☉. One of the vedic gods; he is there savitry, the producer; to him is dedicated the gayatry [q.v.]; his place is in the sky, while that of agny [q.v.] is on earth, and that of indran [q.v.] is in the atmosphere. ἀπόλλων of Greeks; Apollo of Romans; Horus of Egyptians. Sooryan is otherwise Vivaswat, Ravy, and Audityan. Of the worship of the elements there is no trace in the history, language, or usages of any portion of the Tamul people. On the other hand it is to be mentioned that Indran [q.v.] is worshipped on the first, and Sooryan the sun on the second day of Pongal [pundigay, 6d] the great Tamul festival commemorating the winter solstice [oottarauyanam]; the observances being imported. The purely solar festivals are when the sun enters a new sign [raushy], especially the days of the equinoxes [crauntypautam, maishauyanam, vishoo] and solstices [dacshinauyanam, oottarauyanam], the day of a solar eclipse [grahanam], and the day of conjunction of sun and moon [amavausyay]. From Ravy comes Ravivauram for Sunday [vauram]. The Jyotish tatwam, a Hindoo work on astrology, says that if a person is born when Ravy is rising, he will possess an anxious mind, be subject to disease and other sufferings, be an exile, a prisoner, and suffer the loss of wife, children, and property [jyotisham, matam, nacshatram]. See vol. I (74). Sooryodayam is sunrise, sooryaustam or sooryaustamanam is sunset. The following abstract table shows the average times of sunrise [sooryodayam] and sunset [sooryaustamanam] throughout the year in latitude 13° [nacshatram]:—

Month and date.		Sunrise.	Sunset.
		A.M.	P.M.
January	1	6 24	5 43
"	15	6 28	5 50

Varauha mihiran has the following regarding sun spots:— "The dark spots on the sun known as kaits [q.v.], the sons of "rahoo [q.v.], are taumasam, keelacam and the like, and are 33 "in number; how they affect the earth depends upon their color, "position and shape; when the spots appear on the solar disc "the waters will get disturbed; the sky will be filled with dust; "high winds capable of breaking down the tops of mountains "and of trees will carry pebbles and sand along their course; "the trees will fail to yield in their appropriate seasons, birds "and animals will appear to be burning; there will be an appear- "ance of false fire all round, and lightning [minnal] and earth- "quake [mahy campam] will afflict mankind; the princes of "the countries in which the spots are visible will be afflicted "with miseries; even rishies [q.v.], reduced to mere skeletons "by starvation, giving up their pious course of life, with fleshless "infants in their arms, deprived of their property by highway "men, with long sighs, closed eyes, emaciated bodies, and with "their sight dimmed with the tears of sorrow will proceed with "difficulty to other lands; men reduced to mere bones and "ashamed to beg will be harassed both by their own princes and "by the princes of other lands; some will begin to speak dispar- "agingly of the character and deeds of their own sovereign; "even though there should be indications of good rain [mazhay], "the clouds will yield little rain; the rivers will fail and "food crops [vellaumay] will be found only here and there." Sooryan is a common plant first term. Ex., where transl. is of second term:—Crozophora plicata (súryávartá), turning; Gynandropsis pentaphylla (súryávartá), turning; Helianthus annuus (súryakántam), dsire, (súryamukhi), face; Hibiscus hirtus (súryamani), jewel; Hibiscus mutabilis (súryakánti), desire; Hygrophila spinosa (súryabhíra), fearing; Ionidium suffruticosum (súryakánti), desire; Ipomæa quamoclit (súryaratnamu), precious stone. See gloss. paragraphs.——*Sooryanarrain* (சூரியநாராயணன் - shúriyanáráyanan, Tam.). From (súrya, san. sun + náráyana, san. vishnu); sun who is vishnoo [q.v.] in another form. Hindoo 2nd or pers. name [peyar].——*Soorya vamsham* (सूर्यवंश - súryavamsha, San.). From (súrya, san. sun + vamsha, san. race). The race of the sun, the name of the Aryan dynasty of which Rama [q v.], the hero of the Ramayanam [q.v.], was a member. They ruled in Oudh and Tirhoot, and are supposed to have preceded the Lunar race or Chundravamsham [q.v.]. See vol. I (114). The three rajpoot [q.v.] tribes of the solar race are:—"*a*" Grahilote or Gahlot, with twenty-four shaukhays or branches, of which the Sisodiya is the most distinguished. The Rana of Oodayapore or Mewaur is a Grahilote.—"*b*" Rahtore, said to be descended from Rama by Cooshan, his second son. It has twenty-four branches, and the rajah of Jodhpore belongs to this tribe.—"*c*" Kachwaha also sprung from Cooshan. The rajah of Jeypore is of this tribe. It has twelve gotrams [q.v.] or houses.——*Sowrah* (सौर - saura, San.). From (súrya, san. sun). Sect of the Dravida [q.v.] or Southern bramins; followers of Sooryan, only occasionally found in this presidency. Distinguish from Sowrah the tribe [shabara].——*Swarga dwauram* (స్వర్గద్వారం - svargadváram, Tel.). Means heaven + gate. Same as Veicoonta yecaudashy.——*Swargam* (स्वर्ग - svarga, San.). Heaven, the residence of Indran [q.v.], the space between the sun [sooryan] and the polar star [dhroovam].—"*a*" When the soul has attained its full purity, it is then according to the doctrine of the Bramins, susceptible of five degrees of eternal joy and happiness:—Saulokyam, being in the same world as god, Saunnidhyam, the presence of god, Saumeepyam, approximation to god, Sauroopyam, participation in the divine essence, Sauyoojyam, union with god [mocsham, saulokyam].—"*b*" The damned on the other hand are exposed in Naracam [q v.] or hell to dreadful torments. The Pretam, or souls of the damned, have to expect there:—Tapanam, pain; Aveechy, internal anguish; Samhauram, sufferings and punishment for their sins; Caulasootram, an extraordinary length of time, which does not end till full atonement has been made for their sins; Teevra vedanay, torments effected by fire; Peeday, a malignity and exasperation of their minds. The inspection of the damned belongs to Yaman [q.v.], the god who restrains; or Shrauddha devan, the god of obsequial offerings.—"*c*" The five principal places where good works are rewarded are:—Mocsham, the true abode of the blessed in the highest heaven, where parabramh [q.v.], the god of gods, has his residence. Bramha locam, the heaven of the god bramha [q.v.], to which those ascend who have particularly devoted themselves to the service of this god. Keilausam [q.v.], the heaven of shiva [q v.]

or mahadevan [q.v.], to which his adherents attain. Veicoontam [q.v.], the heaven of vishnoo [q.v.], which is peculiarly destined for the worshippers of that deity. Indraloeam, or swargam, the heaven of devendran [q.v.]; this is situated in the air; it is consequently the lowest of all, and is appointed for the reception of those who on earth devoted themselves to the service of any deity. The Mocsham is the only one of these heavens from which souls [autmam] have no need of again descending to the earth, for in it they are already cleansed, and have attained to the highest degree of perfection. From all the rest they are occasionally sent down; but they again ascend to them, according as their past conduct in life has been meritorious or deserving punishment. Souls [autmam] transmigrate also sometimes into animal bodies, and hence the prohibition to kill animals [samsauram].——*Swarganaicken* (स्वर्गनायक - svarganáyaka, San.). From (svarga, san. heaven + náyaka, san. leader). Shiva.——*Swar locam* (स्वर्लोक - svarlóka, San.). Same as Swargam.

SWARAM (स्वर - svara, *San.*). From (svri, san. to sound). A note in the musical scale.——*Soorbut* (சுரபத்து - shurabattu, Tam.). From (svara, san. music + vat, san. possessive suffix). Stringed instrument played with plectrum of ivory [dant] or wood [sangeetam].——*Swara graumam* (स्वरग्राम - svaragráma, San.). From (above + gráma, san. gamut). The musical gamut, comprising the seven notes shadjam, rishabham, gaundhauram, madhyamam, punchamam, dheivatam, and nishaudam, which are all respectively denoted by their initial letters or syllables, viz., sa, ri, ga, ma, pa, dha and ni [raugam].

SWAUDOO (स्वादु - svádu, *San.*). From (svad, san. to relish). Sweet.——*Swaudoocantacam* (स्वादुकण्टक - svádukantaka, San.). From (svádu, san. sweet + kantaka, san. thorn); sweet thorn. Botanically Flacourtia genus, bixineæ [vricsham, 14]. Small trees or shrubs, met with in tropical asia, africa, and america; nearly all armed with thorns; fruits succulent. The species best known to the natives are:—cataphracta [indian plum], inermis [tomitomi], montana [attack], ramontchi [mauritius plum], ramoutchi, var. sapida [ceylon plum], sepiaria [forest bair].

SWAUGA (سہاگا - sohágá, *Hind.*). Borax [vengauram]. Cutcha swauga is crude, Pucka swauga is prepared, borax.

SYAND (स्यन्द् - syand, *San.*). To trickle, flow, shed.——*Sendoor* (सिन्दूर - sindúra, San.; اسرنج - isrinj, Ar.; سرنج - surinj, Pers.; سندور - sindúr, Hind.; سیندور - sendúr, Dec.; سد لا نگم - sadalánggam, Malay; ಸಿಂಧೂರ - sindhúra, Can. and Too.; సిందూరము - sindúramu, Tel.; സിന്ദൂരം - sindúram, Mal.; සින්දූර - sindúra, Singh.; செந்தூரம் - shendúram, Tam.). San. from (syand, san. to trickle). San. also (nágasambhava), meaning produced from lead. Tel. also (errasindúramu), meaning red + the powder. Tam. also (shivappuççendúram), meaning red + the powder. Abbreviation for Eeya sindooram, Red lead. Otherwise Minium, Red oxide of lead [eeyam]. Plumbi oxidum rubrum of chemists. A mineral drug; sometimes made into plasters. A red paint [rangh]. Abruck sendoor, from (abhraka, san. talc), is prepared talc consisting of a powder of brick-dust color and a saline earthy taste chemically silicate of magnesia with iron [auhan] in excess. Aya sendoor, from (ayas, san. iron), is red oxide of iron [auhan]. Eeya sendoor, from (íyam, tam. lead), is red oxide of lead; otherwise vanga sindooram, the present article. Gandhac sendoor, from (gandhaka, san. sulphur), is calcined brimstone [gandhac]. Rasa sendoor, from (rasa, san. mercury), is red precipitate of mercury [rasam]. Taumra sendoor, from (támra, san. copper), is a red chemical preparation of copper [taumram]. Tunga sendoor, from (tangam, tam. gold), is a red chemical preparation from gold [pon].——*Sind* (سندھ - sindh, Hind.). From (syand, san. to flow). The river Indus; also the country so called.——*Sindoocam* (सिन्दुक - sinduka, San.). From (syand, san. to shed); used medicinally. Title otherwise Chaste tree. Botanically the Vitex genus, verbenaceæ [vricsham, 102]. Trees or shrubs chiefly tropical; shoots hairy or tomentose; leaves opposite, digitately three to five foliolate; inflorescence terminal and axillary or wholly axillary; drupe globose or obovoid; wood hard, close-grained. The species best known to the natives are:—alata [peacock gingelly], altissima [wild peacock gingelly], leucoxylon [field notchy], negundo [notchy], pubescens [tall notchy], trifolia [water notchy]. Compare also in other genera:—Clerodendron inerme (nírnoççi), water notchy; Jatropha curcas (kárnoççi), black notchy; Justicia gendarussa (karunoççi), black notchy; Vernonia anthelmintica (nírnoççi), water notchy. See gloss. paragraphs.——*Sondahnamak* (सैन्धव - saindhava, San.; ملح الحجر - milhulhajar, Ar.; نمک سنگ - namakisang, Pers.; سیندا نمک - sendánamak, Hind.; سوندا نمک - sondánamak, Dec.; ఇందుప్పు - induppu, Tel.; ഇന്തുപ്പ് - intuppu, Mal.; இந்துப்பு - induppu, Tam.). Title from deccany. San. from (sindhu, san. the river indus). Ar. from (milk, ar. salt + hajar, ar. stone). Pers. from (namak, pers. salt + sang, pers. stone). Hind. from (sindhu, san. indus + namak, hind. salt). Dec. from hindostany. Drav. from (sindhu, san. indus + uppu, tel. salt). Hind. also (sendálon), meaning indus salt. Tel. also (saindhavalavanamu), meaning sindh + salt; (sindhudéshapuuppu), meaning sindh + salt; (chandruduppu), meaning moon + salt; (rátiuppu), meaning rock salt. Tam. also (shindudésavuppu), meaning sindh + salt; (shayíndavalavanam), meaning sindh + salt; (indunáttuppu), meaning sindh + salt; (shómanuppu), meaning moon + salt. Rock salt [ooppoo]. An impure chloride of sodium; occurs in large masses varying in weight from 2 or 3 to 8 or 10 lbs.; dull or brownish-white externally, white and crystalline internally, of a pure saline taste; procurable in all bazaars [q.v.]. Though a mere variety of common salt [ooppoo], possessed medicinally of far stronger purgative properties. Used in native medicine for men, cattle [maud], and horse [ghorah].

SYAUD (स्याद् - syád, *San.*). If there be.——*Syaudvaudy* (स्याद्वादी - syádvádí, San.). From (above + vad, san. to argue). The Jeinas [q.v.] as assertors of probabilities or of what may be; also called Saptavaudies [q.v.], assertors of seven propositions.

SYCE (سائیس - sáís, *Hind.*). From (saasa, ar. to tend). A horsekeeper or groom. Bengal term. In madras Horsekeeper is more common, and in bombay Ghorawallah.

SYDAPETT (سعیداباد - saídábád, *Hind.*; சைதாப்பேட்டை - shaitháppéttai, *Tam.* saidápet *). From (saíd, ar. mah. name + péttai, tam. suburb) [syed].——**(1)** Talook, Chingleput district. Tahsildar's pay Rs. 175. Area 841 square miles. Population 224,472. Language Tamul, Teloogoo. N. coast of district. Bounded E. by Bay of Bengal; N. by Ponnairy and Trivellore talooks; W. by Trivellore and Conjeeveram talooks; and S. by Chingleput talook. The general appearance is flat and uninteresting, but here and there the otherwise flat expanse is studded by ridged or conical hills of no great elevation, on many of which is either a pagoda [q.v.] or a bungalow [q.v.]. Well supplied with roads. The chief are the Great southern trunk road, the High western trunk road, and the Great northern trunk road. The Madras and South indian railways traverse the talook. The Buckingham canal [q.v.] runs along the whole length of the coast. Rainfall averages 42 inches. The soil is of various qualities, being as a rule better in proportion to distance from the sea. Sand [manal], red ferruginous loam [sevval munn], and alluvial [adaimunn, vandalmunn] soils represent the degrees of progressive fertility. Weaving is carried on in several villages, but only for the supply of local wants. In one or two villages red handkerchiefs [roomaul] and Mussalman cloths are manufactured for export, finding their way chiefly to Penang and Singapore. The only noticeable feature as to crops is the taking up of hitherto unremunerative sandy wastes at the seaside for casuarina [chowkmaram] plantation; this tree flourishes on such soils, and being a quick grower and commanding a ready sale as firewood [lukdy], its cultivation has since 1862-63 been a favorite form of investment. Rivers are the Adyar, Cooum and Corteliaur; the last does not contribute directly to the irrigation of the talook, being a mere drainage stream, but water is raised by baling to a small extent. The only two irrigation works of any importance are Red hills and Chembrambaukam tanks. Petty zemindarries:—Chembram- baukam, Chokkanullore, Corattore, Maumbalam, Motharambaid, Palanjore, Pullavaram, Shittoocaud, Shoranjery, Tircoilputt, Tirmanam, Tookkanamputt, Trimalrajapooram, Vanyalnullore. Places of archæological interest:—Coonnatore, Little mount, Maungaud, Mauthavaram, Poonamallee, Poottore, St. Thomas' Mount, St. Thomé, Tinnanore, Tirmoollavauyil, Tirvarcaud, Trivettore. Principal trig. stations:—Andaurcooppam, Eenjam- baukam, Ennore beacon, Ennore D.P.W., Manaly, Maungaud, Mauthavaram, Mauttore, Nanmungalam, Peroombauk, Red hills, St. Thomas' mount, Shadayan cooppam, Teeyambaukam, Vadapoorambaukam, Vilaungaudpaukam, Yelandacherry. The leading places, &c., in the talook are the following.——*Adyar* (அடையாறு - adaiyáru, Tam.). See sep. title.——*Ambattore* (அம்பத்தூர் - ambattúr, Tam. ambatúr *). From (ambu, tam. the lime tree, citrus medica, linn. + úr, tam. village). Village, Railway station; pop. 1,068; acres 1,924; lat. 13° 06'; long. 80° 14'; height 60 feet; from Sydapett N. 6 miles; from the sea W. 9 miles. Contains large tracts of stone quarry. Ambattore formed part of Pozhal cottam [q.v.] in the ancient Tondainaud mundalam [q.v.].——*Andaurcooppam* (ஆண்டார்குப்பம் - ándárkkuppam, Tam.). From (ándán, tam. lord + kuppam, tam. village). Trig. station; lat. 13° 11' 26·60"; long. 80° 18' 4·53"; from Sydapett N. 12 miles; from Shadayan cooppam N.N.W. 2 miles; from the sea W. 4 miles.——*Aroombaukam* (அரும்பாக்கம் - arumbákkam, Tam.). From (arumai, tam. scantiness + pákkam, tam. village). Village; pop. 513; acres 456; lat. 13° 05'; long. 80° 16'; from Sydapett N. 4 miles; from the sea W. 6 miles.——*Avady* (ஆவடி - ávadi, Tam. avadi *). From (á, tam. cattle + vadi, tam. corruption of kudi, tam. village). Village, Railway station; lat. 13° 07'; long. 80° 11'; height 80 feet; from Sydapett N.W. 9 miles; from the sea W. 12 miles. Represents the old Augoody naud. Hamlet of Parookwaukam village.——*Ayanaupooram* (அயனாப்புரம் - ayanáppuram, Tam.). From (aiyyanár, tam. the village deity, so called + pura, san. city). Shrotriem, Village; pop. 5,235; acres 1,421; lat. 13° 06'; long. 80° 18'; from Sydapett N. 5 miles; from the sea W. 4

miles. Sanitarium.——*Chembrambaukam* (செம்பரம்பாக்கம் - shembarambákkam, Tam.). See sep. title.——*Chokkanullore* (சொக்கநல்லூர் - shokkanallúr, Tam.). From (shokkan, tam. shiva, the beautiful + nal, tam. good + úr, tam. village). Zemindarry, Village; pop. 184; acres 280; lat. of village 13° 05′; long. 80° 08′; from Sydapett N.W. 11 miles; from the sea W. 15 miles. Peshcush Rs. 359.——*Cochrane canal* (கொக்கரேன்வாய்க்கால் - kokkarénváykkál, Tam.). See sep. title.——*Codambaukam* (கோடம்பாக்கம் - kódambákkam, Tam.). See sep. title.——*Coonnatore* (குன்னத்தூர் - kunnattúr, Tam.). From (kunram, tam. hill + úr, tam. village). Zemindarry, Peshcush Rs. 123. Village; pop. 1,419; acres 2,369; lat. 13° 00′; long. 80° 10′; from Sydapett S.W. 8 miles; from the sea W. 12 miles. ——*Coottambaukam* (குத்தம்பாக்கம் - kuttambákkam, Tam.). From (kuttam, tam. a pond + pákkam, tam. village). Village; pop. 2,217; acres 1,883; lat. 13° 03′; long. 80° 05′; from Sydapett W. 13 miles; from the sea W. 17 miles. Noted for its fertility. ——*Cooum* (கூவம் - kúvam, Tam.). See sep. title.——*Corattore* (கொறட்டூர் - korattúr, Tam.). From (kurattai, tam. a creeper, trichosanthes palmata, roxb. + úr, tam. village). Zemindarry, Village; pop. 526; acres 562; lat. of village 13° 05′; long. 80° 05′; from Sydapett W. 14 miles; from the sea W. 18 miles. Peshcush Rs. 323.——*Cuttiwaukum* (கத்திவாக்கம் - kattivákkam, Tam.). See sep. title.——*East coast canal* (கீழ்க்கரைவாய்க்கால் - kízhkkaraiváykkál, Tam.). See sep. title. ——*Eenjambaukam* (ஈஞ்சம்பாக்கம் - íñjambákkam, Tam.). From (íñju, tam. date tree, phœnix farinifera, roxb. + pákkam, tam. village). Trig. station; lat. 12° 54′ 51·18″; long. 80° 17 38·41″; height 29 feet; from Cholanginullore N.E. 2 miles; from Sydapett S. 8 miles; from the sea W. 2 miles.——*Ennore* (என்னூர் - ennúr, Tam.). See sep. title.——*Guindy park* (கிண்டித்தோட்டம் - kindittóttam, Tam.). See sep. title. ——*Little mount* (சின்னமலை - shinnamalai, Tam.). See sep. title.——*Manaly* (மணலி - manali, Tam.). Means a bitter kitchen herb, gisekia pharnaceoides, l. Trig. station; lat. 13° 10′ 29·80″; long. 80° 18′ 40·62″; from Shekkaud N. 1 mile; from Sydapett N.E. 10 miles; from the sea W. 4 miles.——*Maumbalam* (மாம்பலம் - mámbalam, Tam.). From (má, tam. mango tree, mangifera indica, linn. + ambalam, tam. an open space). Zemindarry, Village; pop. 6,007; acres 501; lat. 13° 02′; long. 80° 17′; from Sydapett N. 1 mile; from the sea W. 4 miles. Peshcush Rs. 597. Gives its name to Marmelong [q.v.] bridge. ——*Maungaud* (மாங்காடு - mángádu, Tam.). From (má, tam. the mango tree, mangifera indica, linn. + kádu, tam. forest). Village; pop. 4,946; acres 1,397; lat. 13° 02′; long. 80° 11′; from Sydapett W. 7 miles; from the sea W. 12 miles. Old Shiva temple with Grantam [q.v.] inscriptions. Maungaud naud formed part of Pooliyore cottam [q.v.], in the ancient Tondaimundalam [q.v.]. Trig. station in lat. 13° 00′ 24·72″; long. 80° 08′ 25·49″; height 174 feet; from Moonangattalay W. 2 miles; from Sydapett W. 8 miles; from the sea W. 12 miles. ——*Mauthavaram* (மாதவரம் - máthavaram, Tam.). From (máthu, tam. woman + pura, san. town). Sanscrit name (mádhavapura), meaning vishnoo + town. Village; pop. 4,601; acres 4,301; lat. 13° 09′; long. 80° 17′; from Sydapett N. 9 miles; from the sea W. 5 miles. Near Red hills tank, ancient fortress of the Coorumbar [q.v.] before their conquest by the Cholas [q.v.]. Sanitarium. Trig. station in lat. 13° 9′ 13·15″; long. 80° 16′ 5·17″; from Shembyam N.W. 4 miles; from Sydapett N. 9 miles; from the sea W. 7 miles.——*Mauttore* (மாத்தூர் - máttúr, Tam.). From (máttu, tam. barter + úr, tam. village). Trig. station; lat. 13° 10′ 38·73″; long. 80° 17′ 37·29″; from Manjambaukam N.W. 1¼ mile; from Sydapett N. 11 miles; from the sea W. 6 miles.——*Motharambaid* (மொதரம்பேடு - motharambédu, Tam.). From (móthiram, tam. ring + pédu, tam. village). Zemindarry, Village; pop. 89; acres 109; lat. of village 13° 05′; long. 80° 06′; from Sydapett W. 12 miles; from the sea W. 17 miles. Peshcush Rs. 52.——*Nanmungalam* (நன்மங்கலம் - nanmangalam, Tam.). From (nal, tam. good + mangala, san. prosperity). Trig. station; lat. 12° 55′ 33·99″; long. 80° 13′ 05·07″; height 233 feet; from Medavauk W. 3 miles; from Sydapett S.S.W. 8 miles; from the sea W. 7 miles.——*Nundambaukam* (நந்தம்பாக்கம் - nandambákkam, Tam.). From (nandan, tam. cowherd + pákkam, tam. village). Otherwise Mount nundambaukam. Village; pop. 332; acres 652; lat. 13° 01′; long. 80° 15′; from Sydapett W. 2 miles; from the sea W. 6 miles.——*Ooroor* (ஊரூர் - úrúr, Tam.). From (úru, tam. to ooze as water + úr, tam. village). Village; acres 719; lat. 13° 01′; long. 80° 20′; from Sydapett S.E. 4 miles; from the sea W. ½ mile.——*Peroombauk* (பெரும்பாக்கம் - perumbákkam, Tam.). From (perum, tam. big + pákkam, tam. village). Trig. station; lat. 12° 53′ 01·81″; long. 80° 14′ 12·27″; height 262 feet; from Arasankalany N. ¾ mile; from Sydapett S. 10 miles; from the sea W. 4 miles.——*Poonamallee* (பூந்தமல்லி - púndamalli, Tam.). See sep. title. ——*Pozhal* (புழல் - puzhal, Tam.). See sep. title.——*Pullavaram* (பல்லாவரம் - pallávaram, Tam.). See sep. title.——*Red hills tank* (புழலேரி - puzhaléri, Tam.). See sep. title.——*Saint Thomas' mount* (பரங்கிமலை - parangimalai, Tam.). See sep. title.——*Shadayan cooppam* (சடயங்குப்பம் - shadayanguppam, Tam.). From (shadayan, tam. proper name + kuppam, tam. village). Trig. station; lat. 13° 11′ 11·02″; long. 80° 20′ 1·65″; from Cadapaukam S.E. 1½ miles; from Sydapett N.E. 12 miles; from the sea W. 3 miles.——*Shauttancaud* (சாத்தங்காடு - sháttangádu, Tam.). From (sháttan, tam. the god aiyyanár + kádu, tam. forest). Village; pop. 3,758; acres 2,048; lat. 13° 10′; long. 80° 21′; from Sydapett N. 10 miles; from the sea W. 2 miles.——*Shembyam* (செம்பியம் - shembiyam, Tam.). From (shembiyan, tam. title of the chola ruler). Village; pop. 3,651; acres 446; lat. 13° 07′; long. 80° 19′; from Sydapett N. 7 miles; from the sea W. 4 miles.——*Shittoocaud* (சித்துக்காடு - shittukkádu, Tam.). From (shiru, tam. small + kádu, tam. forest). Zemindarry, Village; pop. 895; acres 912; lat. of village 13° 07′; long. 80° 06′; from Sydapett W. 13 miles; from the sea W. 17 miles. Peshcush Rs. 1,023.——*Shorancherry* (சோராஞ்சேரி - shóránjéri, Tam.). From (shózhan, tam. the king + shéri, tam. village). Zemindarry, Village; pop. 1,428; acres 1,829; lat. of village 13° 06′; long. 80° 08′; from Sydapett N.W. 12 miles; from the sea W. 15 miles. Peshcush Rs. 2,461.——*Sirvalore* (சிருவள்ளூர் - shiruvallúr, Tam.). From (shiruvalli, tam. a creeper, dioscorea aculeata, linn. + úr, tam. village). Village; pop. 2,969; acres 222; lat. 13° 07′; long. 80° 18′; from Sydapett N. 6 miles; from the sea W. 4 miles.——*Sydapett* (சைதாப்பேட்டை - shaithappéttai, Tam.). See below.——*Sydapett government farm* (روشن باغ - roshanbágh, Hind.). See Roshanbaug.——*Teeyambaukam* (தீயம்பாக்கம் - tíyambákkam, Tam.). From (tíyan, tam. a hunter + pákkam, tam. village). Trig. station; lat. 13° 11′ 14·90″; long. 80° 16′ 33·25″; from Mauttore W. 3 miles; from Sydapett N. 12 miles; from the sea W. 7 miles.——*Tinnanore* (தின்னனூர் - tinnanúr,* Tam.). From (tinnan, tam. strong man, a hunter + ur, tam. village). Sanscrit name (shrínivásapura), meaning town where shree or lutchmy abides. Title otherwise Tirnindravore, meaning lutchmy + halt + village. Jagheer village, Railway station; pop. 3,115; acres 3,657; lat. 13° 07′; long. 80° 05′; height 117 feet; from Madras W. 17 miles; from Sydapett W.N.W. 14 miles; from the sea W. 18 miles. Vishnoo [q.v.] temple [coil, pagoda] with inscriptions.——*Tirmanam* (திருமணம் - tirmanam, Tam.). From (tiru, tam. sacred + manam, tam. fragrance). Zemindarry, Village; pop. 890; acres 293; lat. of village 13° 06′; long. 80° 07′; from Sydapett W. 11 miles; from the sea W. 15 miles. Peshcush Rs. 728.——*Tirneer mullay* (திருநீர்மலை - tirunírmalai, Tam.). From (tiru, tam. sacred + nír, tam. water + malai, tam. hill). Village; pop. 1,156; acres 1,452; lat. 12° 58′; long. 80° 11′; from Sydapett W.S.W. 8 miles; from the sea W. 10 miles. Vishnoo [q.v.] temple [coil] on top of hill.——*Tirvaumyore* (திருவாமெயூர் - tiruvámeyúr, Tam.). From (tiru, tam. holy + válmíki, san. the sage + úr, tam. village). Sanscrit name (válmíkipura), meaning valmeeky + city. Shrotriem village, Place of pilgrimage; pop. 1,669; acres 1,260; lat. 12° 59′; long. 80° 20′; from Sydapett S.E. 5 miles; from the sea W. ½ mile. An important Bramin settlement, similar to Mylapore. Shiva [q.v.] temple [coil] with handsome square tank attached. Birth place of Valmeeky [q.v.].——*Trivettore* (திருவொத்தியூர் - tiruvottiyúr, Tam.). See sep. title.——*Vadapoorambaukam* (வடப்புரம்பாக்கம் - vadappurambákkam, Tam.). From (vadappuram, tam. northern side + pákkam, tam. village). Trig. station; lat. 13° 10′ 22·44″; long. 80° 16′ 13·46″; from Mauthavaram N.W. 2 miles; from Sydapett N. 10 miles; from the sea W. 7 miles.——*Vauyalnullore* (வாயலாநல்லூர் - váyalánallur, Tam.). From (váyil, tam. gate + nal, tam. good + úr, tam. village). Zemindarry, Village; pop. 963; acres 984; lat. of village 13° 05′; long. 80° 08′; from Sydapett W. 11 miles; from the sea W. 15 miles. Peshcush Rs. 1,511. ——*Vilaungavdpaukam* (விளாங்காட்டுப்பாக்கம் - vilángáttuppákkam, Tam.). From (vilá, tam. the wood-apple tree, feronia elephantum, corr. + kádu, tam. forest + pákkam, tam. village). Trig. station; lat. 13° 11′ 28·07″; long. 80° 15′ 54·31″; from Mauthavaram N.W. 4 miles; from Sydapett N. 12 miles; from the sea W. 8 miles.——*Yelandacherry* (எலந்தச்சேரி - elandaççéri, Tam.). From (ilandai, tam. the jujube tree, zizyphus jujuba, lamk. + shéri, tam. village). Trig. station; lat. 13° 12′ 45·54″; long. 80° 19′ 43·67″; from Cadapaukam N. 1¼ miles; from Sydapett N.E. 12 miles; from the sea W. 4 miles.——*Yernavore* (ஏரணாவூர் - éranávúr, Tam.). From (ézhu, tam. seven + aran, tam. jungle + á, tam. cattle + úr, tam. village). Shrotriem village; pop. 528; acres 1,478; lat. 13° 12′; long. 80° 22′; from Sydapett N.E. 13 miles; from the sea W. ¾ mile. In 1742 held at a pepper-corn rent on shrotriem [q.v.] tenure under a grant from Nawaub saudat oollah khan, Soobahdar of Arcot, dated 4th November 1742. Confirmed by Moghul's firmaun [q.v.], 12th August 1765.——**(2)** Town, Head-quarters of the Collector, also of the Divisional officers, the District forest officer and the Talook offices and Division deputy collector, Railway station; Chingleput dist., Sydapett tal.; pop. 5,702; acres 287; lat. 13° 02′; long. 80° 17′; height 26 feet; from Chingleput N. 28 miles; from Conjeeveram N.E. 37 miles; from Madras S.W. 6 miles; from St. Thomas' mount N.E. 2 miles; from the sea W. 5 miles. On the Mount road. Since 1859 head-

quarters of the Collector. His office and treasury are located in Homes' gardens.

SYED (سيد - saiyid, *Hind.*). From Arabic. Lord, prince, noble. Hence it has become an alaumat [q.v.] or tribal title; see vol. I (106). The title is taken by all descendants of Ally and Fatimah, and also by the children of the other wives of Ally. Ally had altogether nine wives, by whom he had fourteen sons and eighteen daughters. Ally and Fatimah's descendants through Hassan and Hoossain are styled Hassanee and Hoossainy; and Ally's offspring by the other wives, Alavee. Syeds are also styled Meer or prince. Syed women are Seidaunee; the syed race Saudaut. The offspring of a Syed and another mahomedan woman is Shareef [q.v.] or noble. Indian syeds are met with serving as soldiers or in civil avocations, and also following religious duties. Many are Mowlvies [q.v.] or Peers [q.v.], but the poor follow all callings. Amongst the women of the Syeds of Madras most can read the Arabic koran [q.v.] and the Hindostany books of belief and devotion, but they cannot write; about 400 or 500 of them are good needlewomen and embroiderers. Syeds usually give their daughters to men only of their own class, but they will take wives from the other classes of Mussalmans. There was a dynasty of Syeds at Delhi from 1414 to 1451 A.D. The small principality of Bunganapully in the Ceded districts [q.v.] is ruled by Syeds. About 23,000 in presidency, much the greater number being in Bellary and Coimbatore.——*Seedee* (سيدى - sídí, Hind.). From (saiyid, ar. lord). Descendant of natives of Africa on W. coast employed on ships. Formerly held high positions under the Mahomedan sovereigns of the Deccan [q.v.]. Cf. the Spanish Cid.——*Sydapett* (சைதாப்பேட்டை - shaitháppéttai, Tam.). See sep. title.——*Sydapore* (సైదాపురము - saidápuramu, Tel.). From (saíd, hind. fortunate + pura, san. town). Sanscrit name (siddhéshvarapura), meaning siddheshwaran, the deity + town. Village; Nellore dist., Raupore tal.; pop. 1,447; acres 7,287; lat. 14° 11′; long. 79° 47′; from Nellore S.W. 25 miles; from Raupore E. 14 miles. Formerly the seat of the zemindar [q.v.] of the Zoopully family and head-quarters of one of the Western pollems [q.v.]. Shaurngadharan, a prince whose limbs were mutilated, recovered the use of them at this place. Utensils of soft stones [sowcaura cull] manufactured and sent in large quantities to other districts. A temple on a hill called Siddeshwara condah, 3 miles away. Large tank. Vencatagherry river irrigates gardens. On road from Goodoor to Raupore.——*Syed abdool cawder jeelauny* (سيد عبدالقادرجيلانى - saiyidabdulkádirjíláni, Hind.). From (saiyid, ar. tribal title + abd, ar. slave + kádir, ar. god + jílán, ar. birth-place) [abdool cawder]. The highest of the Mahomedan saints [walee] and divines and founder of the Cawdiriya order of fakeers [q.v.].——*Syed ahmed* (سيد آحمد - saiyidahmad, Hind.). Mahomedan proper name; alaumat + alam [ism].

SYRIA (شام - shám, *Ar.*). Country to the north of Arabia, opposed to Yemen which lies to the south.——*Sooryauny* (سريانى - suryání, Hind.). Syrian christian [syrian].——*Syrian* (സുറിയാനി - suryáni, Mal.). Otherwise Syrian christian. This sect found in Malabar and Travancore are called by the other natives Sooryaunies, that is to say Syrians; or Nasraunies [q.v.], that is to say Nazarenes; by Europeans, they are styled Christians of St. Thomas [q.v.].—"*a*" Their own traditions attribute their origin to the Apostle Thomas [st. thomas], who visited India in the first century and preached the Gospel there, making numerous converts, these being joined some centuries afterwards by other Christians from Syria. They may be styled generally the Syrian christians of Malabar, having their analogues in the Syrian christians of Persia. Favorable treatment was accorded to these early Christians, whether colonists or indigenous, by the rulers of the Malabar coast. The privileges given to them are recorded in inscriptions on copper plates which are still in the possession of the Syrians, and preserved in their college at Cottayam. Fac-similes again of these taken by Buchanan Hamilton are in the public library of the Cambridge university, along with copies of similar grants to the chief of the ancient Jewish colony at Cochin [jonaca]. The Syrian plates are nearly ten inches in length and four in breadth, with large letters distinctly graven on both sides. The character is the ancient Vattezhoot [q.v.], common to both Tamul and Malayalam. These grants confer upon the Syrian headman possession of a village, with permission to use certain ornaments and musical instruments, and emblems of authority; to collect particular taxes and duties allotted to him; and to exercise jurisdiction over his own tribe. The dates of these documents are expressed in such ambiguous language that it is difficult to determine their exact period. The Syrians proved serviceable allies to the native rulers, and were therefore treated well and attained to considerable political influence. They were allowed to bear arms, and were regarded as equal in caste to the Nayars [q.v.]. In A.D. 547, the Christian church in Malabar was visited by Cosmas, an Egyptian merchant, who gives some account of their discipline and worship. It is also asserted, in ancient Anglo-Saxon chronicles, that in A.D. 883 King Alfred sent Sighelm, Bishop of Sherburn, to India, to visit these Christians and present gifts at the shrine of St. Thomas, near Madras. He is said to have successfully performed this noteworthy enterprise, and to have returned laden with gems [ratnam] and spices. After the arrival of the Portuguese on the western coast of India, early in the sixteenth century, the Roman catholic priests desired to effect the subjection of this sect to the Papal authority. At first, measures of conciliation were pursued. In 1545 Franciscan friars were sent by the Archbishop of Goa to open a seminary for Syrian youths, who were afterwards ordained as priests but the Syrians refused to admit these to their churches. Stronger measures were then resorted to. Plots were laid to seize Mar Joseph, the Syrian metraun [q.v.], whose influence against Rome was conspicuous. He was made prisoner and sent to Portugal in 1558; but promising to bring over his people to the Church of Rome, he was allowed by the Queen to return to India. On his arrival, he again taught the ancient doctrines. He was recaptured and sent to Rome, where he died. Another metraun, Mar Simeon, who had been sent to India by the Patriarch of Mosul, was taken to Cochin, sent to Rome, and tried as a heretic by the Inquisition. There is reason to believe that he ended his days in Portugal in captivity. In 1525 Alexis da Menezes, who was about to proceed to Goa as Archbishop, received a brief from Pope Clement VIII directing him to make strict inquiry into the faith and obedience of the Syrian bishop and his flock, and to prevent any bishops or priests from Syria from reaching Malabar. Early in 1599 Menezes, attended by Portuguese troops, reached Cochin, and summoned the Syrian Archdeacon George, the late metraun [q.v.] being now dead, to appear before him. The archdeacon at first refused allegiance to the authority of the Church of Rome, but was at last wearied by the perseverance and zeal of Menezes and the threats of the Portuguese power and was induced to sign an acknowledgment of the Pope's supremacy. Menezes visited in person many of the Syrian churches, but they for the most part refused to submit to his authority. The assembling of a council, or synod, was now resolved on. The synod met at Diamper, near Cochin, on 20th June 1599. It was attended by the Romish archbishop, the Syrian archdeacon and 153 Cattanars [q.v.], many Roman priests, and some chief persons among the Portuguese. Decrees were there passed confirming the doctrines of Rome, and repudiating those which had hitherto been held and proclaimed by the Syrian Church. The Roman sacraments and celibacy were established, the ancient records and historical documents of the Syrian Church were destroyed, and a Latin bishop was appointed; but it was found necessary to consent to the continued use of the Syriac language in public worship. Thus were the Syrian christians reduced to a nominal conformity to the Roman church, and brought in reality into subjection to the Portuguese power. This state of things continued for about fifty years. In 1653 many of the Syrians revolted from the Roman power, excluded the Roman priests from their churches, and appointed their archdeacon as metraun, until they could obtain a bishop from their patriarch. When the expected bishop, Mar Attala, at last reached the shores of India, he was taken prisoner and sent to Goa, where he was consigned to a dungeon in the Inquisition, and at last burnt as a heretic A.D. 1654. A few years afterwards the Dutch seized upon Cranganore; and thence forward the Portuguese power declining, the Syrians enjoyed freedom from external violence. Still many continued to adhere to the Church of Rome. In this way arose the two bodies that now exist; the Syrians proper, who retain to a large extent the doctrine and ritual of the ancient church, but to whom the Roman party have attached the title 'Poottancoor' [q.v.], or the new assemblage; and the Romo Syrians, who are under the authority of, and directly connected with, the Church of Rome, governed by the Bishop of Verapoly, and who call themselves 'Pazhayacoor' [q.v.], or the old assemblage.—"*b*" The Syrian hierarchical order and ritual system bear some resemblance to that of the Copts, or, native Egyptian christians. They are governed by a metraun, or metropolitan bishop, who is appointed by the Patriarch of Antioch. The cattanars [q.v.], or priests perform the services of the church, celebrate marriages, bury the dead, &c. They do not receive stated pay, but derive their support from the contributions of the people on festival days, and from marriage and burial fees, &c. The ordinary dress of the priesthood is a long white coat of cotton cloth, tied or buttoned in front, and loose white trousers. The hair is shaven in the form of a tonsure, and the beard is usually worn long.—"*c*" Previous to the Jesuit crusade against the Syrian church, the latter rejected many Papal doctrines such as the dogmas of Papal supremacy and the authority of traditions, the doctrines of transubstantiation and purgatory, &c. They had no images in their churches, nor were extreme unction or auricular confession practised by them. The sacraments they regarded as three, viz., Baptism, Orders, and the Lord's Supper. The clergy were allowed to marry; the bread was dipped in the wine, and the communion thus administered in both kinds. But after that attack the Syrians were led to receive many Roman doctrines which are still retained, though the authority of the church of Rome is repudiated. Transubstantiation, the worship of the Virgin Mary, the invocation of saints, and prayers for the dead are now allowed. The Syrian christians are sometimes called Nestorians; that is to say followers of the doctrine which maintains that Christ was two distinct persons as well as of two distinct natures. It appears that this was their doctrine in the sixth and seventh centuries; but in the eighth century a Jacobite, or Monophysite bishop came from Alexandria, and the Syrian christians thus became dependent on the Jacobite see of Antioch. The Jacobites, so called after Jacobus Baradæus, an

opponent of Nestorianism in the sixth century, contend that in Christ there is but one nature, the human nature being absorbed in the divine, not, say they, like oil and water, but like water and wine, which become mingled and united. This doctrine was readily adopted by the Syrians of Malabar, who thus proceeded from one extreme to the other. The term Nestorian does not now properly apply to them.—"*d*" The Patriarch of Antioch, to whom the Syrians render obedience, is one of the four great Patriarchs of the Eastern christian church, viz., of Constantinople, Alexandria, Antioch, and Jerusalem; of whom the first is supreme. There are three prelates in Syria that claim the title and rank of patriarchs of Antioch; but the head of the Asiatic Jacobite, is he who resides generally in a monastery not far from the city of Mardin in Turkey, in N. lat. 37° 15'; E. long. 40° 40'; his spiritual dominion is extensive. He has an associate in the government, to whose care, under the general direction of the patriarch, are entrusted the more distant eastern churches, and who resides in a monastery at Mosul in Mesopotamia, near the ruins of Nineveh. All the patriarchs of this sect assume the name of Ignatius, and their associates that of Basil.—"*e*" The ancient liturgy in general use throughout the Syrian churches, called St. James's Order, has been translated more than once into English. The small Malayalam prayer books used by the Syrians contain prayers for several occasions, and short prayers to be offered in the course of the public service; but no translation of the prayers offered by the cattanar [q.v.] in the celebration of the mass. Though the Syrian christians speak and write Malayalam as their mother tongue, the style of their religious works in this language is very peculiar, being intermixed with Syriac words in a pure or modified form. Their technical and theological terms are all Syriac. A few of the principal terms are as follows:—Gospel, Evangelion; Epistle, Yencarttah; Psalm, Masmoorah; Apostle, Shleeha; Prophet, Nibyah; Deacon, Meshamshana; Priest, Cattanar; Parish priest, Casheesha; Bishop, Mar; Sexton, Cappiaur; Doctor, Rambaun; Angel, Maulauk; Baptism, Mamodeesa; Mass, Coorbaun; Unction, Ooprisimah; Chancel, Madoobbah; Nave, Haycalah; Holy Ghost, Roohauda coodisha; Jesus Christ, Yaisoo masheeha; Father, Bawa.—"*f*" The personal disputes and party contentions which have occurred in the more recent internal history of this church have excited attention. Rival priests have visited the distant Patriarch of Antioch with their representations, afterwards returning to Malabar to carry on their disputes in the church itself. At various periods several bishops also have simultaneously put forward antagonistic pretensions to primatial authority. In 1848 there were five bishops in Malabar, each describing the others as unauthorized intruders.—"*g*" The Syrian christians are comparatively fair in complexion. Many are engaged in trading and agricultural pursuits, and some are possessed of much wealth. Several of their number occupy good positions as English teachers, astronomers, lawyers, and clerks. Property among the Syrian christians devolves to legitimate children alike by first or second marriage, sons inheriting the bulk of the property in equal shares; daughters can claim only dowry, and are, therefore, not responsible for debts on the estate. The father cannot quite disinherit any of his children, but may, while alive, distribute his property to them by gift in any reasonable manner or proportion that he pleases. If there are no sons, all goes to the daughters, or brothers, or next heirs; if no near relatives, to the church. Persons without children may bequeath all their property to the church, but this is not allowed if they have children. A widow with a family may enjoy her late husband's property till her sons come of age; if she remarries, nothing is given her [jauty]. See vol. I (96); II (100).——*Syrian bead tree* (حب الشام - habbushshám, Hind.). Same as Large neem.——*Syrian bind weed* (لبلاب شامی - lablábishámí, Hind.). Same as Scammony.——*Syrian cassia* (قثائشامی - kissáishámí, Pers.). Same as Carob.——*Syrian hibiscus* (ليلك شامی - lailakishámí, Hind.). Same as Syrian bendy.——*Syrian rue* (سداب شامی - sadábishámí, Hind.). Same as Harmal.

T (ट - ṭa, टा - ṭá, त - ta, ता - tá, *San.*; ٹ - ṭe, ط - toe, ت - te, *Hind.*; ட - ṭa, தா - tá, *Tam.*). San. ता for Lutchmy [q.v.]. Hind. ٹ symbol for 400. Hind. ط numerically symbol for 9, and astronomically the sign [raushy] Capricorn [jaddy, macaram]. Denotes 400 in arithmetic.

TABOOT (تابوت - tábút, *Hind.*). Arabic meaning a chest. Otherwise Taziya. Applied to a bier or coffin. Especially a model of the mausoleum of Hoossain [q.v.], carried in the Moharram [q.v.] processions. It consists of a bamboo [q.v.] frame-work, the interstices being filled up with network of paper, often pasted on mica [abruck]. But every variety of materials is employed, even silver [velly], ivory [dant], ebony [q.v.], sandal-wood [sandal], cedar [deodar], &c. Within it are placed alams [q.v.] or flags to represent those of Hassan and Hoossain; lights are placed within it to illuminate it. At the close of the Moharram [q.v.] procession, the taboots should properly be thrown into water; or if there is not sufficient water they should be buried. But see Shahaudat kah roz. See vol. I (96).

TACCA (تکا - takka, *Malay*). Same as Otaheite salep.

TACORAH (تکورا - takorá, *Hind.*). From (tak, imitative sound). Small kettle drum [paray].

TACSH (तक्ष् - taksh, *San.*). To cut.——*Tacshacan* (तक्षक - takshaka, San.). An artificer. One of the eight serpents [naugam] of mythology.——*Tutchacole* (தச்சக்கோல் - taççakkól, Tam.). From (taççan, tam. carpenter + kól, tam. rod). Carpenter's rod. Linear measure. 44 ungoolams = 1 tutchacole [alavay, 1a]. Approximate actual value, 1 tutchacole = 33 inches. Used in Madura and Tinnevelly. Compare Guz, Ilauhee guz. See vol. I, 609; II, 505, 515, 519.——*Tutchamoolam* (தச்சமுழம் - taççamuzham, Tam.). Carpenter's cubit. Same as Tutchacole.——*Tutchan* (तक्षक - takshaka, San.; بڑھائی - barhaí, Hind.; ಬಡಗಿ - badagi, Can.; వడ్లవాడు - vadlavádu, Tel.; ആശാരി - áshári, Mal.; தச்சன் - taççan, Tam.). Carpenter. One of the village servants [balootah]. Repairs ploughs there, and makes wooden door-frames. The higher class can imitate the most elaborate details, either of art or manufacture. Wood-carving for architectural use is practised with more or less success in almost every village in S. india. Sandal-wood [sandal] carving is carried in Mysore and Travancore and on the Malabar coast generally. According to the Brihatsamhitay [q.v.] of Varauha mihiran [q.v.] the woods most esteemed for furniture are:—Cedrus deodara, loud. [deodar], Dalbergia latifolia, roxb. [malabar blackwood], or bombay blackwood, Diospyros embryopteris, pers., [gaub], Gmelina arborea, linn. [cashmere tree], Mesua ferrea, linn. [nauga champak], Michelia champaca, linn. [champak], Ougeinia dalbergioides, benth. [nemmy], Santalum album, linn. [sandal], Shorea robusta, gærtn. [common saul], Tectona grandis, linn. f. [teak], and Terminalia tomentosa, bedd., var. typica [black murdah]. Artocarpus integrifolia, willd. [common jack], and Cedrela toona, roxb. [toon], both now much used are not named in the list. The Shilpa shastram [q.v.] on mechanics and architecture and some of the pooraunams [q.v.] give detailed directions for felling the trees at particular seasons when their circulation is inactive, and for seasoning the wood afterwards, so as to prevent unequal contractions and cracks in drying. Sandal-wood is according to these authorities the most auspicious of woods for furniture, especially when mounted with gold and jewels. The woods practically most used for furniture are:—for common furniture, chittagongwood [chickrassy], teakwood [teak] toon [q.v.], jack [q.v.]; for carved and ornamental furniture, ebony [q.v.], blackwood [q.v.], satinwood [q.v.], kyabocawood [mochcoondam]. The following are two key-lists of the different kinds of woods [maram] used by the native carpenters of s. india for which vernacular names are known; further information must be traced in the glossary paragraphs through the small-type cross references at the end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of plants in the dravidian languages:—"*a*" Acacia arabica, babool; Acacia ferruginea, anasandra; Acacia sundra, sundra; Adinia cordifolia, model wood; Albizzia lebbek, common sirissa; Anogeissus latifolia, vekkauly; Anthocephalus cadamba, cadamba; Areca catechu, areca; Artocarpus hirsuta, anjely; Artocarpus integrifolia, bread fruit; Bassia longifolia, common mohwah; Berrya ammonilla, trincomalee tree; Borassus flabelliformis, palmyra; Calophyllum inophyllum, common poon; Cedrela toona, toon; Chickrassia tabularis, chickrassy; Chloroxylon swietenia, satin-wood; Cocos nucifera, cocoanut; Dalbergia latifolia, malabar blackwood; Diospyros ebenum, ceylon ebony; Diospyros melanoxylon, coromandel ebony; Diospyros montana, forest gaub; Eriodendron anfractuosum, silk cotton; Erioglossum edule, rusty soapnut; Erythrina indica, common coral tree; Erythroxylon monogynum, deccany deodar; Eugenia jambolana, var. caryophyllifolia, clove-leaved jaumoon; Melia azadirachta, margosa; Morinda umbellata, small ach root; Psidium guyava, var. pyriferum, white guava; Pterocarpus marsupium, malabar kino; Pterocarpus santalinus, red sanders; Santalum album, sandal; Schrebera swietenoides, weaver's beam; Shorea robusta, common saul; Soymida febrifuga, rohan tree; Tamarindus indica, tamarind; Tectona grandis, teak; Terminalia belerica, belleric myrobalan; Terminalia catappa, country almond; Terminalia tomentosa, var. typica, black murdah; Thespesia populnea, portia; Xylia dolabriformis, burmah ironwood; Zizyphus jujuba, bair.—"*b*" Ach root, morinda; Almond, terminalia; Anasandra, acacia; Anjely, artocarpus; Babool, acacia; Bair, zizyphus; Blackwood, dalbergia; Bread fruit, artocarpus; Cadamba, anthocephalus; Chickrassy, chickrassia; Cocoanut, cocos; Coral tree, erythrina; Deodar, erythroxylon; Ebony, diospyros; Gaub, diospyros; Guava, psidium; Ironwood, xylia; Jaumoon, eugenia; Kino, pterocarpus; Margosa, melia; Model wood, adina; Mohwah, bassia; Murdah, terminalia; Myrobalan, terminalia; Palmyra, borassus; Poon, calophyllum; Portia, thespesia; Rohan, soymida; Sandal, santalum; Sanders, pterocarpus; Satinwood, chloroxylon; Saul, shorea; Silk cotton, eriodendron; Sirissa, albizzia; Soapnut, erioglossum; Sundra, acacia; Tamarind, tamarindus; Teak, tectona; Toon, cedrela; Trincomalee tree, berrya; Vekkauly, anogeissus; Weaver's beam, schrebera.——*Tutcholy* (തച്ചോളി - taççóli, Mal.). From (taççan, mal. carpenter + óli, mal. term of respect). Name of a tarwaud [q.v.] in Cadatnaud in North malabar.——*Tutcholy pautt* (തച്ചോളിപ്പാട്ട് - taççólippáttu, Mal.). From (taççóli, mal. the family so called + páttu, mal. song).

Originally ballad relating the deeds of Tutcholy meppayil coonny othainan. Now a generic term. One Tutcholy pautt commemorates the Pychee rajah's rebellion; another, Tippoo sultan.

TADDA (धर्मण - dharmana, *San.*; धामण - dhámana, *Mahr.*; دهامن - dháman, *Hind.*; ತಡಸಲು - tadashalu, *Can.*; తడ - tada, *Tel.*; ଧାମନ - dhamono, *Oor.*; ചടച്ചി - chataççi, *Mal.*; දමිනිය - daminiya, *Singh.*; சடச்சி - shadaççi, *Tam.*). Title from tel. San. from (dhanvá, san. dry soil); from habitat. Mahr. and Hind. from san. Can. and Tel. corrupted [tadoo] from tamul. Mal. from (chata, mal. hairlock), from fibrous bark. Singh. from (damanawá, singh. to tame), devil tamer; from the priest binding the devil he wishes to compel to his service to this tree [falsah]. Tam. from (shadai, tam. matted hair); from fibrous bark [solah]. Can. also (batale). Tel. also (charachi), by corruption from tamul. Tam. also (úná). Title otherwise Lime tree leaved grewia, Matted hair plant, Tame devil. Botanically Grewia [dharmanam] tiliæfolia, vahl., tiliaceæ [vricsham, 27]. Alias Grewia arborea. Tree; leaves five-nerved, roundish-cordate, bluntly toothed, usually oblique at the base, under side sometimes pubescent; stipules auricled on one side at the base; peduncles numerous, three to five-flowered; sepal twice as long as the petals; stigma four-lobed; drupes two-lobed; each lobe with two hemispherical three-celled nuts; flowering during the hot season. Handsome tree; luxuriant foliage; very common; bark thick, white internally, covered externally by a thin grey suber which readily peels off, showing a slightly rough, green surface beneath. Fruit edible, having agreeable acid flavor; leaves make fodder; bark used as cordage. Timber highly prized for strength and elasticity; used for building purposes, bows, buggy shafts, walking sticks, and a variety of other uses; light and rather soft, flexible and fibrous, coarse-grained and durable, of a light pinkish color turning to light brown, easily worked.——*Bird tadda* (గువ్వడడ - guvvadada, Tel.). Title from small size. Tel. from (guvva, tel. bird + tada, tel. grewia tiliæfolia, vahl.). Tel. also (pótushálmali), meaning male + silk-cotton tree, bombax malabaricum, dec.; (peddatarraki); (gubbadára), Botanically Grewia [dharmanam] abutilifolia, juss., tiliaceæ [vricsham, 27]. Alias Grewia aspera. Tree; leaves irregularly and coarsely toothed, roundish-cordate, occasionally lobed; peduncles about half as long as the petiole, three to four-flowered; sepals oblong, longer, than the petals; drupes four-lobed, pubescent and hairy; nuts four, one to two-celled; flowers greenish-white; flowering throughout the year; common. Gives fibre [naur] and wood.——*Round-leaved tadda* (నులితడ - nulitada, Tel.; நெய்ச்சிட்டி - neyççitti, Tam.). Tel. means small tadda [screw tree]. Tam. from (ney, tam. ghee + shitti, tam. small measure). Tel. also (jánachettu); (jenachettu). Title otherwise Jauna. Botanically Grewia [dharmanam] orbiculata, rottl., tiliaceæ [vricsham, 27]. Alias Grewia rotundifolia. Shrub; leaves five to six-nerved, roundish-cordate, or ovate, hoary and softly velvety on both sides, crenulated; peduncles several together, three-flowered; sepals linear; petals slightly two-toothed; style longer than the stamens; stigma four-lobed, crenulated; drupes slightly two-lobed, with one to two usually two-celled nuts in each; flowers purple. Nearly allied to grewia tiliæfolia, vahl. [tadda]; wood of moderate strength.——*Small tadda* (సిరిజాన - sirijána, Tel.; କୁଲୋ - kuló, Oor.; அங்கோலம் - angólam, Tam.). Tel. means small + jauna tree. Tel. also (kólupu); (jána); (jibilikachettu); (tadikachuvva). Title otherwise Small jauna. Botanically Grewia [dharmanam] excelsa, vahl., tiliaceæ [vricsham, 27]. Alias Grewia bicolor, lævigata, rothii, savifolia. Shrub; leaves ovate-oblong, sharply serrulated, under side hoary, tomentose; peduncles two to three, much longer than the petioles, sepals linear, twice the length of the petals; style filiform; stigma dilated; drupe globose, glabrous, with two one to two-celled nuts; flowering during the rainy season; fruit ripens a few months later; fruit small, agreeable to taste. Gives fibre; has a light, ash-colored wood, with a straight grain, hard and strong, much used.

TADOO (தடு - tadu, *Tam.*). To intervene. To resist.——*Tadauthakye* (தடாதகை - tadáthagai, Tam.). From (above + á, tam. negative particle + kai, tam. hand). Irresistible hand. An epithet given in the pooraunam [q.v.] of the Sheiva temple at Madura [tirvilaiyaudal] to Meenautchy [q.v.], who went out to meet and fought with Shiva her future husband.——*Tadda* (తడ - tada, Tel.). Means impediment. Village; Nellore dist., Polore division tal.; lat. 13° 35′; long. 80° 04′; from Nellore S. 60 miles; from Polore S. 8 miles; from Raupore S.E. 54 miles. Has a canal port on the backwater ½ mile from the village. Is on the trunk road from Nellore to Madras. Private chuttram [q.v.] and a Conair [q.v.] pond.——*Talay* (தலை - talai, Tam.). Field-partition [tank].——*Tatty* (ٹٹی - tattí, Hind.; தட்டி - tatti, Tam.). From (tadu, tam. to hinder). Any screen. Especially a screen made of the roots of the fragrant cuscus [q.v.] grass, with which door or window openings are filled up in the season of hot winds [land wind]; the screens being kept wet and the wind blowing through them.

TADPATRY (تارپتری - tárpatri, *Hind.*; తాడిపత్రి - tádiparti, *Tel.* tadpatri *). From (tádi, tel. palmyra tree, borassus flabelliformis, linn. + parti, tel. village) [taulam]. Original name is Taulapully.——(1) Talook, Anantapore. Tahsildar's pay Rs. 200. Area 641 square miles. Population 112,656. Languages Teloogoo and Canarese. N.E. of district. Boundaries:—north, Coilcoontla and Putticondah talooks of Kurnool district; east, Jummalmadoogoo in Cuddapah district, and Coilcoontla in Kurnool; south, Poolivendla in Cuddapah and Anantapore talook; west, Anantapore and Gooty. The country is flat, except on the eastern boundary, where a low range of hills separates it from the Cuddapah and Kurnool districts. Through the centre of the talook the river Pennair flows, and on either side of it are plains of black-cotton soil [regar]. There is hardly any red soil in the talook. Cotton [q.v.] is the principal crop, but a fine kind of cholum [q.v.] is also grown. Tadpatry and Yellanore are the chief markets, and grain and cloths are sent to Bellary and Cuddapah. A large quantity of the cotton grown in the talook is sent down to Madras. The only tanks [q.v.] of any size are the singular double tank at Royalcheroo and one at Bhogasamoodram. Many irrigation channels [q.v.] are taken off from the river. There are ninety-three villages in the talook, which is a small number for the area. Places of archæological interest:—Arcativaimla, Arvaid, Aulore, Cadanacull, Chaugal, Chillavauripully, Chinna polamoda, Coommanamala, Coommeta, Coormaujipett, Cullore, Dauditota, Dosavaid, Goddoomurry, Goottoor, Mullagoondla, Eittore, Pappore, Pautapully, Peddapappore, Pedda polamoda, Polamoda, Saulavaimla, Sadzaldinney, Shanagalgoodoor, Shingavaram, Tadpatry, Velamacore, Vennapoosalapully, Yaudiky, Yellanore. Principal Trig. station:—Nelgonda. The leading places, &c., in the talook are the following.——*Aulore* (ఆలూరు - álúru, Tel. álúr *). From (álu, tel. cattle + úru, tel. village). Village, Place of pilgrimage; pop. 957; acres 5,968; lat. 14° 55′; long. 78° 06′; from Anantapore E.N.E. 33 miles; from Tadpatry E. 3 miles. Cave with a spring in a mountain valley 2 miles.——*Bhogasamoodram* (భోగసముద్రము - bhógasamudramu, Tel.). From (bhóga, tel. proper name + samudra, san. ocean). Called after Bhogamma. Village; pop. 1,375; acres 5,229; lat. 15° 01′; long. 78° 03′; from Anantapore N.E. 35 miles; from Tadpatry N. 7 miles. Large tank.——*Chitrauvaty* (చిత్రావతి - chitrávati, Tel.). See sep. title.——*Chookkalore* (చుక్కలూరు - tsukkalúru, Tel.). From (tsukka, tel. small spot + úru, tel. village). Village; pop. 1,148; acres 2,889; lat. 14° 57′; long. 78° 02′; from Anantapore N.E. 30 miles; from Tadpatry N.N.W. 3 miles.——*Cona oopalpaud* (కోనవుప్పలపాడు - kónavuppalapádu, Tel.). From (kóna, tel. ravine + uppalamu, tel. salt marsh + pádu, tel. village). Village; pop. 720; acres 8,539; lat. 15° 06′; long. 77° 56′; from Anantapore N.N.E. 35 miles; from Tadpatry N.N.W. 15 miles.——*Dauditota* (దాడితోట - dáditóta, Tel.). From (dádi, tel. army + tóta, tel. garden). Village; pop. 2,119; acres 10,309; lat. 14° 36′; long. 78° 00′; from Anantapore E.S.E. 24 miles; from Tadpatry S. 22 miles.——*Igdore* (ఇగుడూరు - igudúru, Tel.). Village; pop. 871; acres 3,339; lat. 14° 58′; long. 77° 59′; from Anantapore N.E. 30 miles; from Tadpatry N.W. 6 miles. Large channel.——*Mootchoocottah* (ముచ్చుకోట - muttsukóta, Tel.). From (muttsu, tel. thief + kóta, tel. fort). Village; pop. 1,608; acres 9,696; lat. 14° 51′; long. 77° 55′; from Anantapore E.N.E. 21 miles; from Tadpatry W.S.W. 10 miles. Yaipy [q.v.] jungles.——*Nagarore* (నగరూరు - nagarúru, Tel.). From (nagaru, tel. palace + úru, tel. village). Village; pop. 1,309; acres 5,147; lat. 15° 00′; long. 77° 52′; from Anantapore N.E. 26 miles; from Tadpatry W.N.W. 13 miles.——*Nelgonda* (నెలగొండ - nelagonda, Tel.). From (néla, tel. ground + konda, tel. hill). Trig. station; lat. 14° 51′ 09·57″; long. 77° 57′ 45·65″; from Anantapore N.E. 25 miles; from Tadpatry S.W. 7 miles.——*Nittore* (నిట్టూరు - nittúru, Tel.). From (nidu, tel. long + úru, tel. village). Village; pop. 1,535; acres 16,616; lat. 15° 03′; long. 77° 59′; from Anantapore N.E. 34 miles; from Tadpatry N.N.W. 10 miles.——*Nundiaulpaud* (నంద్యాలపాడు - nandyálapádu, Tel.). From (nandi, san. bull god + álaya, san. temple + pádu, tel. village). Village; pop. 989; acres 2,954; lat. 14° 55′; long. 78° 02′; from Anantapore N.E. 29 miles; from Tadpatry W. 1½ miles. Site of the Tadpatry railway station.——*Peddapappore* (పెద్దపప్పూరు - peddappúru, Tel.). From (pedda, tel. large + pappu, tel. dholl + úru, tel. village). Village; pop. 1,513; acres 2,025; lat. 14° 56′; long. 77° 55′; from Anantapore N.E. 24 miles; from Tadpatry W. 10 miles. Good silk cloth woven.——*Peddayeckalore* (పెద్దయెక్కలూరు - peddayekkalúru, Tel.). From (pedda, tel. great + ekkali, tel. mound + úru, tel. village). Village; pop. 1,978; acres 3,706; lat. 14° 56′; long. 77° 52′; from Anantapore N.E. 22 miles; from Tadpatry W. 12 miles. Weekly market.——*Pennair* (పెన్నేరు - pennéru, Tel.). See sep. title.——*Royalcheroo* (రాయలచెరువు - ráyalcheruvu, Tel.). See sep. title.——*Shanagalgoodoor* (శనగలగూడూరు - shanagalagúdúru, Tel.). From (shanagalu, tel. bengal gram, cicer arietinum, linn. + gúdúru, tel. place so called). Village; pop. 3,447; acres 12,018; lat. 14° 49′; long. 78° 05′; from Anantapore E.N.E. 30 miles; from Tadpatry S.S.E. 7 miles.——*Tadpatry* (తాడిపత్రి - tádiparti, Tel.). See below.——*Yellanore*——*Yaudiky* (యాడికి - yádiki, Tel.). See sep. title.——*Yellanore* (ఎల్లనూరు - yellanúru, Tel.). From (ella, tel. boundary + úru, tel. village). Village; pop. 3,403; acres 9,860; lat. 14° 42′; long.

78° 07′; from Anantapore E. 31 miles; from Tadpatry S.S.E. 15 miles. On Chitrauvaty, and founded more than 600 years ago by Chikka wodeyar. Its old name was Vellalore. In seventeenth century became the residence of a Mahomedan chief, from whom it was taken by one of the Cuddapah poligars [q.v.].——*Zootoor* (జూటూరు - dzútúru, Tel.). From (dzúti, tel. rogue + úru, tel. village). Village; pop. 3,482; acres 6,691; lat. 14° 57′; long. 77° 57′; from Anantapore N.E. 27 miles; from Tadpatry W.N.W. 7 miles.——**(2)** Town, Talook head-quarters, Subordinate judge's court; Anantapore dist., Tadpatry tal.; pop. 10,283; acres 7,554; lat. 14° 55′; long. 78° 03′; height 783 feet; from Anantapore E.N.E. 30 miles; from Bellary E.S.E. 74 miles; from Gooty S.E. 28 miles; from Madras N.W. 200 miles; from Penoocondah N.E. 64 miles. On right bank of Pennair which flows close underneath its walls. The railway station is at Nundiaulpaud, 2½ miles off. Town was founded by Ramalingam naidoo, a subordinate of the Vijianugger kings, 400 years ago. After Talicote [q.v.] the country round Tadpatry was subdued by the Cootb shahy [q.v.] dynasty [raj], and a Mahomedan governor was appointed. Afterwards the town was captured by Moraury row, and still later by Hyder ally. A great trading centre, and on this account and also on account of its peculiar sanctity, one authority reckoning it next to Benares, it has always been a thriving town. Silk [puttoo] and cotton [q.v.] cloths are woven which are sent to Bangalore and towards Bombay. There is a small trade with Cuddapah in cotton [q.v.] and indigo [q.v.]. Ramalingam naidoo built the temple on the river bank dedicated to Rameshwaran. The other temple in the town called that of Chintaroya was built by his grandson, Timma naidoo, who founded several other villages in the neighbourhood. These two temples are elaborately decorated with sculptures representing the adventures of Krishnan [q.v.], Rama [q.v.], &c. Among the bas-reliefs [jalee] is a figure holding a Grecian bow. The temple on the river bank is the finest, but is not finished. The gopooram [q.v.] of the other temple [coil, pagoda] was struck by lightning some years ago and split in half.

TAEEFA (طائفه - táifah, *Hind.*). From (taafa, ar. to go round). A dancing girl [cunchany, dausy].

TAFAUWAT (تفاوت - tafáwat, *Hind.*). From (fauta, ar. far as under) [firkah]. Discrepancy.

TAFETTA (تافته - táftah, *Hind.*). From (táftan, pers. to twist). A fabric of twisted thread, made both in silk [puttoo] and cotton [q.v.]. Has a wavy lustre [sheelay].

TAFREEK (تفریق - tafrík, *Hind.*). From (fark, ar. separation) [firkah]. Distribution. Extra contribution imposed on villagers. For Maraumut tafreek see Maraumut.

TAFSEEL (تفصیل - tafsíl, *Hind.*). From (fasala, ar. to divide). Particulars [vivaram].

TAFSEER (تفسیر - tafsír, *Hind.*). From (fisr, ar. to explain). A commentary, especially on the Koran [q.v.].

TAFWEEZ (تفویض - tafwíz, *Hind.*). From (fáza, ar. to delegate). Delegation of authority [takdeer]. The doctrine of absolute liberty with regard to the choice of right and wrong maintained by certain sects of Mahomedans.

TAGAR (தகர் - tagar, *Tam.*). To break.——*Tagaram* (कस्तीर - kastíra, San.; قلعی - kalaí, Ar.; ارزیز - arzíz, Pers.; کتھیل - katthíl, Hind.; رنگا - rangá, Dec.; تما - timah, Malay; ತಗರ - tagara, Can.; ತಮರ - tamara, Too.; తగరము - tagaramu, Tel.; തകരം - takaram, Mal.; සුදුඊයම් - suduíyam, Singh.; தகரம் - tagaram, Tam.). Title from tamul. San. from (kásh, san. to shine). Hind. from sanscrit. Mal. from tamul. Singh. from (sudu, singh. white + íyam, tam. lead). Tam. from (tagar, tam. to break to pieces), easily cut. San. also (trapu), meaning bashful, on account of its melting easily; (ranga), meaning tin; (vanga). Ar. also (rasás). Malay also (timahpútih), meaning white tin; (timasari), meaning flower tin. Mal. also (vellíyam), meaning white lead. Tam. also (vellíyam), meaning white lead. Greek κασσίτερος from sanscrit. Tin. Stannum of chemists. Soft, white, brilliant, and inelastic metal [dhautoo, loham]. Its surface is but slowly impaired on exposure to the atmosphere. Is alloyed with copper [taumram], zinc [tootnaug], &c., forming compounds. Black tin is tin and iron [auhan] combined. A valuable pewter [cull eeyam] is antimony [soorma] seventeen parts and tin eighty-three parts. κασσίτερος was exported from Egypt to Mouziris [cranganore] and Nelkunda [cullada] according to the Periplus, but now chiefly brought here from Indian archipelago. Pulvis stanni is known to hakeems [q.v.]; considered anthelmintic; it is purified for medicine by melting it over the fire and pouring the melted fluid into the milky juice of calotropis gigantea [yercum]. Various common uses; chief is in tinning different metals [loham], such as iron [auhan] and copper [taumram]. Tagara raikk is tinfoil; used for ornamenting images, fans, pictures, &c.——*Tagaray* (தகரை - tagarai, Tam.). Means to destroy, useful remedy. Same as Chakondah.

TAGARAM (तगर - tagara, *San.*). Botanically the Tabernæmontana genus, apocynaceæ [vricsham, 87]. Trees or shrubs natives of tropical regions; leaves opposite, entire, mostly smooth, and short-stalked; flowers white, fragrant; fruits consist of two ovoid or oblong or kidney-shaped, smooth or ribbed, dry or fleshy follicles; seeds buried in pulp. The species best known to the natives are shown below. Other s. indian species indigenous or naturalized are:—citrifolia, crispa.——*Adam's apple* (तगर - tagara, San. and Mahr.; تگر - tagar, Hind.; دودھ موگرا - dúdhmográ, Dec.; ನಂದಿಬಟ್ಲು - nandibatlu, Can.; ಕೊಕ್ಕೆ - kokke, Too.; నందివర్ధనము - nandivardhanamu, Tel.; നന്തിയാർവട്ടം - nantiyárvattam, Mal.; තුවරලා - tuvaralá, Singh.; நந்தியாவட்டம் - nandiyávattam, Tam.). Title as the companion of eve's apple [q.v.]. Hind. from sanscrit. Dec. from (dúdh, hind. milk + mográ, hind. jasmine, jasminum sambac, ait.). Can. from (nandi, san. pleasing + batla, can. circle). Tel. from (nandi, san. happiness + vardhana, san. increasing). Mal. from tamul. Tam. from (nandyávarta, san. the plant). San. also (nandyávarta), meaning delight + turning; (vishnupriya), meaning vishnoo + favorite; (nandivriksha), meaning happiness + plant [toon]; (tárávata), meaning star-like. Hind. also (chándní), meaning moonlight. Can. also (nanjavatta), by corruption. Tel. also (grandhitagarapuchettu), probably sanscritized corruption of (gandhatagarapuchettu), meaning fragrant + the tree. Tam. also (adukkunandiyávattai), meaning layer + plant; from double petals; (perunandiyávattai), meaning large + the plant. Title otherwise Broad leaved rose bay, Burra tagar, Ceylon jasmine, Chandnee, Indian rose bay, Milky jasmine, Moonbeam, Tagar, Wax flower. Botanically Tabernæmontana [tagaram] coronaria, br., apocynaceæ [vricsham, 87]. Alias Nerium coronarium, divaricatum; Tabernæmontana divaricata. A shrub six to eight feet leaves opposite, unequal, elliptic-oblong, acute at the base, obtusely acuminated; peduncles from the forks twin, erect, dichotomous, four to six-flowered; flowers white, fragrant at night; flowering nearly all the year; found wild in western jungles, much cultivated in gardens and about temples. Flower religious. Juice of leaves dropped into eyes in ophthalmia. Wood white, moderately hard, close-grained. One garden variety has double flowers.——*Eve's apple* (ഉതളം - utalam, Mal.; දිවිකදුරු - divikaduru, Singh.; காட்டலரி - káttalari, Tam.). Title from resemblance to half-eaten small apple [seb], as well as from being native of ceylon, near which paradise supposed to be situated; the fruit, wholesome once, became a deadly poison after having been tasted by eve. Mal. compare odallam. Singh. from (divi, singh. heaven + kaduru, singh. the forbidden plant, general name for dog's bane). Tam. from (kádu, tam. forest + alari, tam. nerium odorum, soland.). Tam. also (pálai), meaning milky plant [dita, edible paulay, ground paulay, monkey-face paulay, nakchiknee silk cotton, nauga champak, pauchonty, paula indigo, paulay silk cotton, tellicherry bark]. Title otherwise Forbidden fruit [pummelow], Mango like cerbera. Botanically Tabernæmontana [tagaram] dichotoma, roxb., apocynaceæ [vricsham, 87]. Alias Cerbera manghas; Manghas latescens; manghas from mango. Shrub; leaves oblong, acute at the base, obtuse at the apex, coriaceous; petiole dilated at the base, amplectant; cymes terminal, dichotomous, many-flowered, nearly equalling the leaf; peduncles naked, long; bracts ovate, small; calycine lobes ovate, obtuse; segments of the corolla somewhat longer than the tube; follicles recurved, acutish, orange-colored; flowers yellowish-white, slightly fragrant; flowering nearly all the year. Large spreading shrub; broadly lanceolate, rigid, yellow-green leaves, nine or ten inches long; fragrant flowers, similar to vinca alba; fruit like a mango [q.v.] both in color and shape, one side more concave than the other; seeds size of large chestnuts. Seeds of fruit powerfully narcotic; leaves and bark purgative; fruit externally applied as cataplasm in diseases of the skin. Oil [yennay] from seeds.

TAGARAUR (تکرار - takrár, *Hind.*). From (karra, ar. to repeat). Altercation [tantah].

TAGHEIR (تغیر - taghír, *Hind.*). From (ghaira, ar. to change). Dismissal [bartarf, mokoop].

TAGLOOB (تغلب - tagallub, *Hind.*). From (ghaluba, ar. to over-power). Cheating.

TAH (تہ - tah, *Hind.*). Below. Tahband is a petticoat.

TAHITI (تاهیتی - táhití, *Hind.*). Chief of the Society islands. Same as Otaheite.——*Tahiti arrowroot* (காருக்குனை - kárúkkarunai, Tam.). Same as Otaheite salep.

TAHREER (تحریر - tahrír, *Hind.*). Fr. (harra, ar. write). Fee.

TAHSIL (تحصیل - tahsil, *Hind.*). From (hasala, ar. to collect). Collections. Tahsildar is the native collector of revenue and sub-magistrate in charge of a talook [q.v.]. Tahsildar nautacam is a tamul drama by Vishwanautan to ridicule the vices of a Tahsildar.

TAIL (वृश्चिक - vrishchika, *San.*; विंचू - vinchú, *Mahr.*; عقرب - akrab, *Ar.*; کژدم - kazdum, *Pers.*; बिच्छू - bicçhú, *Hind.* an d*Dec.*; کلا - kala, *Malay*; ಚೇಳು - chélu, *Can.*; ತೇಳ್ - tel, *Too.*; తేలు - télu, *Tel.*; തേൾ - tél, *Mal.*; ගෝනුස්සා - gónussá, *Singh.*; தேள் - tél, *Tam.*). Title from tamul. San. from (vrashch, san. to wound). Ar. from (akraba, ar. to twist). Hind. from sanscrit. Mal. from (chel, mal. sharp). Tam. also (nattuváykkáli), meaning lobster-mouthed-legged one. Scorpion,

Some are black colored, but the usual tints are various shades of brown. Plant first term meaning that fruits are like scorpion's tail or the plant is antidote to scorpion-bite or the touch is burning like scorpion sting. Ex., where transl. is of second term :—Heliotropium indicum (télumani), gem ; Martynia diandra (télukondi), sting ; Tragia involucrata (télumanichettu), gem + tree. See gloss. paragraphs.

TAINEE (मधुकर - madhukara, San. ; मधमाशी - madhamáshí, Mahr. ; نحل - nahl, Ar. ; زنبور عسل - zambúriasal, Pers. ; شہد کی مکھی - shahadkímakkhí, Hind. and Dec. ; لابا - lábah, Malay ; ಜೇನುನೊಣ - jénunona, Can. ; ತಿಗತಕೆಲೆಂಜಿ - tigatakelenji, Too. ; తేనీగ - téníga, Tel. ; തേനീച്ച - téníçça, Mal. ; මීපා - mípá, Singh. ; தேனீ - téní, Tam.). Title from tamul [tem]. San. from (madhu, san. honey + kri, san. to do). Mahr. from (madhu, san. honey + makshiká, san. fly). Pers. from (zambúr, pers. bee + asal, pers. honey). Hind. from (shahad, hind. honey + makkhí, hind. fly). Can. from (jénu, can. honey + nona, can. fly). Too. from (tiga, too. honey + kelenji, too. fly). Tel. from (téne, tel. honey + íga, tel. fly). Mal. from (tén, mal. honey + íçça, mal. fly). Singh. from (mí, singh. honey + pá, san. to drink). Tam. from (tén, tam. honey + í, tam. fly). Honey bee. Apis mellifica, aphidæ, hemiptera, hemimetabola, insecta [poochy], of naturalists [jantoo]. Not domesticated here. Some construct their nests in trees, others frequent rocks, and one kind often takes up its abode about the doors or windows of buildings. The natives have a belief that when a swarm of bees builds its nest on a building, it is a sign of some of the inmates being about to change their residence. Honey [shahad] and wax [mom] are chiefly collected by jungle tribes, and when robbing the nests they smear their bodies with a substance which prevents the bees from stinging them. The Yanaudies [q.v.] and Chentsoos [q.v.] of the East coast climb into apparently inaccessible places and over perpendicular cliffs in some places from 100 to 200 feet high. This they do by means of a plaited rope made of young bamboos [q.v.] tied together. The rope being fastened on the top of the cliff, 100 or 200 feet above, by means of a peg driven into the ground, or by a tree, the man swings suspended in the air, armed with a basket and stick. He first burns some brushwood or grass under the hive, which is then relinquished by the majority of the bees. This accomplished, he swings the rope until it brings him close to the hive, which he pokes with his stick, at the same time holding out his basket to catch the pieces broken off from the hive. When the basket is full he shakes the rope, and is drawn up by his companions. The bamboo ropes are never taken away, nor are they used a second time, a fresh one being made on each occasion and at each place. They are to be seen hanging for years until they decay and fall down of themselves. There is a Tamul proverb:—மலைத்தேன் முடவனுக்கு வருமா?—"will mountain honey come to the lame "man?" do not expect too much. The indigenous honey-making bees of Southern india have been referred to the following kinds.——*Flower bee* (पुष्पलिट् - pushpalit, San. ; ಕೊಂಬುಜೇನುಹುಳ - kombujénuhula, Can. ; జుంటితేనీగ - dzuntiténíga, Tel. ; ചെറുതേനീച്ച - cheruténíçça, Mal. ; சிறுதேனீ - shiruthéní, Tam.). San. from (pushpa, san. flower + lih, san. to lick). Can. from (kombu, can. branch + jénu, can. honey + hula, can. insect). Tel. from (dzunnu, tel. cheese + téniga, tel. honey bee). Tam. from (shiru, tam. small + tén, tam. honey + í, tam. fly). Apis floralis, aphidæ, hemiptera, hemimetabola, insecta [poochy], of naturalists. Chiefly confined to the plains, but appears in Wynaud. In habits resemble Apis indica [tree bee].——*Hill bee* (ಹೆದ್ದಜೇನುಹುಳ - heddajénuhula, Can. ; కొండతేనీగ - kondaténíga, Tel. ; മലന്തേനീച്ച - malanténíçça, Mal. ; மலைத்தேனீ - malaitténí, Tam.). Can. from (hedda, can. large + jénu, can. honey + hula, can. insect). Others mean hill bee. Apis dorsata, aphidæ, hemiptera, hemimetabola, insecta [poochy], of naturalists. Found amongst low hills and in forests. Invariably lodges on the branches of trees and in clefts of rocks and has favorite haunts. Although the honey [shahad] be taken year after year, a swarm always occupies the old locality. Comb often several feet in length and over an inch in thickness. Honey collected mostly in the hot season. The sting is painful and dangerous. Apis dorsata, var. testacea, smith, is a large variety, widely distributed, not recognised as distinct from the ordinary large rock bee by natives ; comb, honey, &c., identical with the ordinary Apis dorsata. Apis dorsata, var. zonata, fuer, is dun colored ; resembles the other varieties of dorsata.——*Mosquito bee* (ಸೊಳ್ಳೆಜೇನುಹುಳ - sollejénuhula, Can. ; ముసురుతేనీగ - musuruténíga, Tel. ; கொசுத்தேனீ - kosutténí, Tam.). Title from small size. Can. from (solle, can. musquito + jénu, can. honey + hula, can. insect). Tel. from (musuru, tel. to swarm + téníga, tel. honey bee). Tam. from (kosu, tam. mosquito + tén, tam. honey + í, tam. fly). Tam. also (pondutténí), meaning crevice + bee ; (shiruthéní), meaning small bee. Apis nigrocincta, aphidæ, hemiptera, hemimetabola, insecta [poochy], of naturalists. Confined to the plains and low rocky hills. Builds its nest in crevices of rocks, hollows of trees and ruined buildings. The quantity of honey [shahad] is small and not good.——*Tree bee* (ತುಡುವಿಜೇನುಹುಳ - tuduvijénuhula, Can. ; పుల్లతేనీగ - pullaténíga, Tel. ; കൊമ്പുതേനീച്ച - komputténíçça, Mal. ; கொம்புத்தேனீ - kombutténí, Tam.). All mean branch + bee. Apis indica, aphidæ, hemiptera, hemimetabola, insecta [poochy], of naturalists. Is mostly confined to the plains and low hill ranges, but appears also on the Neilgherries. Attaches its combs to branches or establishes itself in hollows of the trunks of trees. Sting not severe.

TAIR (తేరు - téru, Tel. ; தேர் - tér, Tam.). An idol car [rath]. For mirage or peytair see under Pey.——*Tairottam* (தேரோட்டம் - téróttam, Tam.). Means car + running. Otherwise Ratotsavam. Any Car festival [pundigay, 6d].

TAJAMMOOL (تجمل - tajammul, Ar.). From (jamala, ar. to adorn). Adorned, dignified. Prefixed to an alam forms a lacab ; as Tajammool hoossain, dignity of hoossain [ism].

TAKBEER (تکبیر - takbír, Hind.). From (kibr, ar. great). [cabeer]. Repeating the Mahomedan creed [deen, imaun].

TAKDEER (تقدیر - takdír, Hind.). From (kadara, ar. to measure). Predestination ; the decree of good and evil [tafweez]. Compare the hindoo Carmam and Samsauram.

TAKEE (تقی - takí, Ar.). From (taká, ar. to fear) ; God-fearing, pious. Lacab of the ninth Imaum [q.v.]. Common alam ; as Takee hoossain, double alam [ism].——*Takeeya* (تقیہ - takíyah, Hind.). From (taká, ar. to fear). Caution. An outward conformity with an alien religious belief, a practice held to be permissible by the shiahs [q.v.].

TAKEED (تاکید - tákíd, Hind.). From (akada, ar. to tie fast). Injunction. Written order, generally from superior to inferior.

TAKHALLOOS (تخلص - takhallus, Hind.). From (khalasa, ar. freed). Descriptive names of poets which they assume in consequence of the unpoetical consonance of their own proper names, these not entering into the measure of a verse. Usually found in concluding distich of a poem. Rare in Arabic, oftener in Persian. Takhalloos refers either to the native place of the poet, or to his original trade, profession, special accomplishments, habits, &c. Sometimes taken as an honorary title conferred by patron. See vol. I (106), cl. (6) [ism].

TAKHT (تخت - takht, Hind.). From pers. Throne [pad].

TAKIYA (تکیہ - takiyah, Hind.). From persian. A pillow. The tomb [durgah] of a Mahomedan saint [walee].

TAKKAULY (தக்காளி - takkáli, Tam.). From (takka, tam. fit, proper + ál, tam. to possess) ; of good quality ; medicinal shrub. Botanically Physalis genus, solanaceæ [vricsham, 94]. Annual or perennial herbs ; leaves alternate or twin, entire or lobed ; flowers solitary, extra-axillary ; berry covered by a connivent inflated calyx, globose, two-celled, placentæ thick seeds many, reniform, compressed ; embryo fleshy. The species best known to the natives are :—minima [small indian winter cherry], peruviana [indian winter cherry].

TAKLEED (تقلید - taklíd, Hind.). From (kalada, ar. to invest with authority) [gheir mookallid]. The doctrine of following the exposition and interpretation of law [shareeyat] of certain doctors [moojtahid]. Held by soonnees [q.v.].

TAL (تل - tal, Hind.). Low [taul].——*Talaghaut* (تل گھاٹ - talghát, Hind.). From (above + ghát, hind. hill-pass). Lowlands [payeen ghaut].

TALA (തല - tala, Mal. ; தலை - talai, Tam.). Head, and hence prominent. Prefix in place names ; as Talacaud, meaning principal forest.——*Talamullay* (தலைமலை - talaimalai, Tam.). From (talai, tam. head + malai, tam. hill). Hill, Head assistant's division ; Trichinopoly dist., Moosiry tal. ; lat. 11° 05′ ; long. 78° 22′ ; from Moosiry N.W. 12 miles ; from Trichinopoly N.W. 30 miles. Detached and conspicuous from the railway. Sanitarium for Europeans. On summit a pagoda [hill-station, pagoda].——*Talapully* (തലപ്പിള്ളി - talappalli, Mal.). From (tala, mal. chief + palli, mal. village). Talook, Cochin state ; pop. 113,114. Principal places :—Caccaud, Chemmandatta, Coonnancoolam, Kellarcaud, Matchaud, Moolloorkara, Pazhayanore, Porcalam, Shoranore, Tirvillamala, Venganellore, Yermayputty.——*Talavausal* (தலைவாசல் - talaivásal, Tam.). From (talai, tam. head + vásal, tam. entrance). The chief entrance to the Mysore territory. Village ; Salem dist., Ahtoor tal. ; pop. 1,065 ; acres 772 ; lat. 11° 35′ ; long. 78° 48′ ; from Ahtoor E. 10 miles ; from Salem E. 40 miles. On the Vasishtanuddy and on South arcot frontier. Travellers' bungalow [q.v.]. Indigo [q.v.] factory.——*Talay* (தலை - talai, Tam.). Head. Talay vary is a poll-tax.——*Taliyary* (తలారి - talári, Tel. ; தலையாரி - talaiyári, Tam.). From (talai, tam. head + personal suffix). A head village watchman whose duty it is to give information of offences, guide travellers, &c. [cauvalgar]. See vol. I (102), 154.——*Tellicherry* * (തലശ്ശേരി - talashshéri, Mal.). From (tala, mal. head + shéri, mal. village). Sanscrit name (shvétáranyapurí), meaning white + forest + town ; this name still survives in tirvangaud, a part of the town.—"*a*" Town, Port, Head-quarters of Judge, Sub-collector, Sub-judge, District moonsif, Tahsildar, and District registrar, Lighthouse ;

Malabar dist., Cottayam tal.; pop. 27,196; lat. 11° 45′; long. 75° 32′; height 70 feet; from Bombay S.S.E. 516 miles; from Calicut N.N.W. 39 miles; from Cannanore S.E. 12 miles; from Dharmapatam S.E. 2 miles; from Cottayam S.W. 6 miles; from Madras W.S.W. 336 miles; from Malapooram N.W. 61 miles; from Manantoddy W. 34 miles; from Palghaut N.W. 102 miles; from Ponnany N.N.W. 71 miles; from Talye N.N.W. 1½ miles. Site picturesque, open to sea on west, and on opposite side backed by wooded hills interspersed with valleys and watered by a fine river. Has been called the Montpellier of India. The native town lies to the south. The limits of the port are:—north, boundary pillar 1½ miles north of the custom house; south, boundary pillar 1½ miles south of the custom house; east, seashore between them to within 50 yards of high-water mark, spring tides; west, space enclosed by the two lines running due west from the boundary pillars to nine fathoms water. Light on the fort wall near the beach; lat. 11° 44′ 50″; long. 75° 28′ 30″; white; fixed; 8 miles range. Visible from all directions seaward. Small masonry tower. A harbour light. The best anchorage for large vessels is with the flagstaff N.E. by N. in six fathoms and about 2 miles off shore. Coasting craft come into the bay, lying south of a reef of rocks, which at a distance of about a 1,000 yards from shore runs parallel to the coast line. Vessels of six hundred or eight hundred tons in ballast have been known to pass the monsoon [q.v.] under shelter of this reef. Factory established under a chief and factors by the President of Surat, being the first pepper [q.v.] settlement on the Malabar coast [q.v.], 1683. Factory strengthened 1688. Formal grant obtained for the fort from the Chiracal rajah, 1708. On several occasions between 1708 and 1761 the company obtained from the Colattiry [q.v.] rajah and other local chiefs grants of land in and near Tellicherry, and some important privileges such as right to collect customs, administer justice, &c., within these grants. Limits of settlement extended on south side after a successful war with the Coorangote nayar, 1719. Settlement reduced from a chiefship to a residency, 1776. Besieged by Sirdar khan, Hyder's fowjdar [q.v.] with Chiracal rajah, 1780. H.M.S. Superb of seventy-four guns was lost at Tellicherry in November 1781. Successful sortie under Major Abingdon and the siege raised, 1782. The Chiefship re-established, 1784. Chiefship abolished and the settlement placed directly under the Supervisor of Malabar, 1794. The citadel, still in excellent preservation, stands on rising ground close to the sea and north of the town. The old residency is now occupied by the Sub-collector. Principal modern exports are coffee [q.v.], pepper [q.v.], ginger [q.v.], cardamoms [q.v.], and saudal [q.v.] wood; and imports are rice [q.v.] and salt [ooppoo]. Hindoo pagoda [q.v.] in Tirvangaud dedicated to Shree rama commonly called Brass pagoda, on account of roof. Travellers' bungalow [q.v.].—"*b*" River; Malabar dist., Cottayam tal.; lat. 11° 46′ N.; long. 75° 33′ E. Also called Codoly river, from fort of that name commanding the bay at its mouth. Navigable for boats for only 3½ miles. Small country craft enter its mouth and lie above bridge which spans it. Formerly important as affording protection to English factory at Tellicherry on N. and E. landward sides. It still forms boundary of French Aldée of Pandacull. Total length, about 14 miles. ——*Tellicherry bark* (कुटज - kutaja, San.; कुडा - kudá, Mahr.; لسان العصا فير المر - lisánulasáfírulmurr, Ar.; اندر جو تلخ - indarjauitalkh, Pers.; كڑوا اندر جو - karváindarjú, Hind. and Dec.; ಕೊರಸಿಗ - korisiga, Can.; కొడిశ - kodisha, Tel.; ପତ୍ରକରୁଆ - patrakarvan, Oor.; കുടകപ്പാല - kutakappála, Mal.; කිරිවැල්ල - kirivallá, Singh.; கசப்புவெப்பாலை - kasappuveppálai, Tam.). Title from place of export. San. from (kutila, san. curled + jan. san. to be born); from curled roots; cf. echites. Mahr. from sanscrit. Ar. from (lisán, ar. tongue + asáfír, ar. sparrows + murr, ar. bitter), from resemblance of seed or bean. Pers. from (indrayava, san. the seed + talkh, pers. bitter), as opposed to sweet inderjow from wrightia tinctoria, r. br. [paula indigo]. Hind. from (karvá, hind. bitter + indrayava, san. seed of the plant). Can. and Tel. from sanscrit, by corruption. Oor. from (patra, san. leaf + karvá, hind. bitter); plate leaf + bitter inderjow; cf. (vistrákupála), below in teloogoo. Mal. from (kutaku, mal. the gháts near coorg + pála, mal. milky plant). Singh. from (kiri, singh. milk + vallá, singh. wrightia zeylanica, br.). Tam. from (kasappu, tam. bitter + vedbálai, tam. wrightia tinctoria, r. br.). San. also (kalingá), meaning useful; (chírí), meaning clothed. Mahr. also (dhavalakuda), meaning white conessi tree. Ar. also (tíwáj). Pers. also (zabánikunjashkitalkh), meaning tongue + sparrow + bitter. Hind. also (karaija), meaning sweet inderjow; (dúdhíkílakrí), milk-giving stick. Can. also (kodasiga), from sanscrit by corruption. Tel. also (manupála), meaning earth + milky plant; (kalingamu), from sanscrit [chaltah]; (kolamukki); (peddaankudu), meaning large + the tree; (pálakodisha), meaning milk + the tree; (chédukodisba), meaning bitter + the tree; (ankudu) [gambier, paula indigo]; (pála) [dita, edible paulay, eve's apple, ground paulay, monkey-face paulay, nakchiknee silk cotton, nauga champak, pauchonty, paula indigo, paulay silk cotton]; (kákakodisa), meaning crow + the tree; (indravrikshamu), meaning indra's tree; (vistrákupála), meaning plate leaf + the tree. Oor. also (karva), meaning bitter. Mal. also (kaippakkotakappála), meaning bitter + the plant; (venpála), meaning white + milk plant; (pálappatta), meaning milk plant + bark. Tam. also (veppálai), meaning white + milky plant; (kulappálai), meaning coorg + the plant. Title otherwise Bitter inderjow, Bitter oleander, Bitter sparrow tongue, Codaga plant, Conessi bark, Coorchy bark, Coorg milk plant, Corte de pala, Medicinal echites, Wild bitter. Botanically Holarrhena antidysenterica, wall., apocynaceæ [vricsham, 87]. Alias Chonemorpha antidysenterica; Echites antidysenterica; Holarrhena codaga, pubescens; Nerium antidum; Wrightia antidysenterica. Codaga from malayalam. Large jungle shrub; leaves bright green on each side, opposite, entire, elliptic, very obtuse at the base, acute or abruptly acuminated at the apex; calycine lobes lanceolate; corolla cup-shaped, tube dilated between the base and the middle, throat contracted; stamens inserted between the base and middle of the tube; cymes many-flowered, terminal; flowers puberulous, white; follicles a foot long; common. The young bark is grey and nearly smooth; on the older branches it is externally of a brown color, and scarred from the exfoliation of portions of the suber; internally it is of a cinnamon color, and the cambium layer when present smooth and nearly white; the root bark resembles that of the older stems, but is of a deeper and more rusty brown color. The leaves of paula indigo [q.v.] are so like those of tellicherry bark especially when young that they may be mistaken; a distinction is however the numerous pointed glands on the petiole at the base of the leaf of the present article. Seeds of tellicherry bark are of a cinnamon [q.v.] brown color, convex on one side, and concave and marked with a longitudinal pale line on the other, covered with a downy tuft, resembling the down of the thistle; easily broken, bitter to the taste, and of a heavy unpleasant odour; something like oats [vilauyaty jow]; these also often confounded with seeds of paula indigo. The astringent and bitter bark is a remedy in dysentery, hence specific name; substituted for british cinchona [koinah] bark and ipecacuanha; seeds are astringent and anthelmintic; a thick, scarlet-colored medicinal oil; bark and seeds both in pharm., non-officinal. Leaves used as fodder or litter; ashes used as mordants [cauram]; wood white, soft, even-grained, used for carving and turning. Another species is Mitis.

TALABONE (తలబొను - talabónu, *Tel.*; குழவிப்பாம்பு - kuzhavippámbu, *Tam.*). Tam. from (kuzhavi, tam. roller + pámbu, tam. snake). Title otherwise Bamboo fish. Murænesox talabon, murænidæ [vilaung], physostomi, teleostei [matsyam, 42], of naturalists [jantoo]. Specific name from teloogoo. Alias Conger telabon; Murænesox exodon and serradentata, lanceolata. Upper surface of back and head olive, becoming brown posteriorly; abdomen dull white, becoming silvery inferiorly. The throat, cheeks, and gill covers with golden reflections; vertical fins with dark margins. Sea; 10 feet or more. No other common species here.

TALAM (तल - tala, *San.*). For Stalam [q.v.]. Floor.——*Talautalam* (तलातल - talátala, San; தராதலம் - taráthalam, Tam.). From (above + atala, san. bottomless). The fourth of the seven regions of Pautaulam [bhoogolashastram]. Mauyay [q.v.] reigns over this having been raised to that dignity by Shiva [q.v.] after the destruction of the three cities [tripooran]. ——*Talee* (തളി - tali, Mal.). Means local. Apart from the Punniyore and Chovoor distinction, the Numboory [q.v.] bramins who entered the W. coast formed themselves into four principal and several other petty talees or associations under the Permauls [q.v.], retaining for this purpose in their own hands various executive and fiscal prerogatives. The four principal talees were located at Cranganore, which place all the Permauls with the members of those four talees made their chief abode. These members were called Taliyaudry. Some of the places where the petty talees were originally located still bear the affix; as Calicut talee, Chenganaud talee, Neeleshwara talee, &c. The power and influence of the Permauls however gradually increased, while those of the talees decayed. Distinguish from Talee, the woman's marriage necklace, which is quite another word [taur].——*Taliparamba* * (തളിപ്പറമ്പ - talipparampa, Mal.). From (tali, mal. temple + paramba, mal. high ground). So called after the chief temple of Colatnaud. Sanscrit name (lakshmípura), meaning lutchmy the goddess + town.—"*a*" Deputy tahsildarry, Malabar district. Pay Rs. 70.—"*b*" Town, Amshom, Deputy tahsildar's, Sub-registrar's and Cavvye moonsif's station, Place of pilgrimage; Malabar dist., Chiracal tal.; pop. 9,906; lat. 12° 03′; long. 75° 24′; from Calicut N.N.W. 60 miles; from Cannanore N. 13 miles; from Madras W. 342 miles; from Malapooram N.N.W. 82 miles; from Manantoddy W.N.W. 46 miles; from Palghaut N.W. 122 miles; from Ponnany N.N.W. 93 miles; from Tellicherry N.N.W. 22 miles; from the sea E. 12 miles. Three ancient and important temples, known as Caunyarangaud, Taliparamba and Trichambaram. Rock-cut sepulchres near Travellers' bungalow [q.v.]. Important festival at Trichambaram in March.—"*c*" River; Malabar dist., Chiracal tal.; lat. 12° 16′ N.; long. 75° 33′ E. Rises from lower slopes of W. ghauts. After passing Taliparamba, main branch is joined by one from the east, and the two together spread out into an extensive sheet of water. Bending slightly to the north and passing under a ruined fort of Colattiry the united streams then suddenly turn at Payyangaudy due south and run parallel to the sea till they meet the Belliapatam river, united to which they force for themselves a passage to the sea through the sand shoals

thrown up by the littoral currents. A large tract of fertile garden land has been formed by the continuous action of the littoral currents damming up the mouth of this river. Length about 51 miles. The main branch is navigable at all seasons for boats as far as the lower slopes of the ghaut [q.v.] mountains.——*Taliyaudry* (താലിയാതിരി - taliyátiri, Mal.). Head of a talee.

TALAUB (تالاب - táláb, *Hind.*). From persian. A tank [q.v.] for irrigation [airy, cheroo, kerey].

TALC (طلق - talk, *Ar.*). Same as abruck [q.v.]. Not co-extensive with European term, which is a mineral also capable of foliation, but more greasy and less elastic than Abruck [q.v.] or foliated mica, appearing in commerce as tailor's chalk [balapam]; and generally appearing naturally in the massive form, when it is called steatite or soapstone [sowcaura cull].

TALEEL (تعطیل - tatíl, *Hind.*). From (alla, ar. to assign a cause). Agnosticism; specially that of the ancient pagan arabs.

TALICOTE (తాళికోట - tálikóta, *Tel.*). Town, Bombay; lat. 16° 28′ 10″; long. 76° 21′ 10″. Scene of battle in 1565 in which the empire of Vijianugger was overthrown by a confederacy of the mahomedan kings of the Deccan [q.v.], Adil shahy of Beejapore, Cootb shahy of Beder, and Nizam shahy of Ahmednugger [ram rauz]. See vol. I (153).

TALOOK (تعلقہ - talukah, *Hind.*; ತಾಲೂಕು - tálúku, *Can.*; తాలూకా - tálúká, *Tel.*; താലൂക്ക - tálúkka, *Mal.*; தாலுக்கா - tálúkká, *Tam.*). From (alaka, ar. belong to). A dependency. In this Presidency as in Bombay it is the sub-division of a district [zillah], presided over by a Tahsildar [q.v.]. In Bengal it is applied to tracts of proprietary land, sometimes not distinguishable from zemindarries [q.v.], and sometimes subordinate to zemindars [q.v.]. A Talook sheristadar [q.v.] is here the second officer in a tahsildar's office. The following is a list of the talooks into which the zillahs [q.v.] or administrative districts of the Presidency are divided, showing the district to which each belongs. These are all directly administered by the Government through the Tahsildar. Outside so-called Government talooks are however other areas either not so directly administered, and specially administered, and therefore designated by a special name. Such are added to the list. The entire list shows the segments into which the entire Presidency area is geographically divided. Where there is no special designation, it will be understood that the area is an ordinary Tahsildar's talook:—Adony, bellary; Ahtoor, salem; Amalaupooram, godavery; Ambasamoodram, tinnevelly; Anantapore, anantapore; Ankapully division, vizagapatam; Arcot, north arcot; Arnee jagheer, north arcot; Atmacore, nellore; Aulore, bellary; Baupatla, kistna; Bellary, bellary; Berhampore, ganjam; Bezwada, kistna; Bhadrachellam, godavery; Bhawauny, coimbatore; Bheemavaram, godavery; Bimlipatam division, vizagapatam; Bissemcuttack division, vizagapatam; Bobbily division, vizagapatam; Budwail, cuddapah; Bunder, kistna; Bunganapully, native state, kurnool; Cadiry, cuddapah; Calastry zemindarry, north arcot; Calicut, malabar; Canigherry, nellore; Caricaul territory, tanjore; Caroor, coimbatore; Carvetnugger zemindarry, north arcot; Cassergode, south canara; Cauvaly, nellore; Cheepoorpully division, vizagapatam; Chicacole, ganjam; Chidambaram, south arcot; Chingleput, chingleput; Chiracal, malabar; Chittore, north arcot; Chundragherry, north arcot; Cocanada division, godavery; Cochin, malabar; Coilcoontla, kurnool; Coimbatore, coimbatore; Collegaul, coimbatore; Combaconam, tanjore; Conjeeveram, chingleput; Coodligy, bellary; Coolitalay, trichinopoly; Coondah division, neilgherries; Coondapore, south canara; Cooroombranaud, malabar; Coraputt division, vizagapatam; Coringa division, godavery; Cottayam, malabar; Cuddalore, south arcot; Cuddapah, cuddapah; Cullacoorchy, south arcot; Cumbum, kurnool; Cundoocore, nellore; Cungoondy zemindarry, north arcot; Darshy division, nellore; Dharaupooram, coimbatore; Dharmapoory, salem; Dharmavaram, anantapore; Dindigul, madura; Ellore, godavery; Erode, coimbatore; Gajapatinugger division, vizagapatam; Golcondah, vizagapatam; Goodivauda, kistna; Goodiyattam, north arcot; Goodoor, nellore; Goomsoor, ganjam; Goonapore division, vizagapatam; Guntoor, kistna; Gooty, anantapore; Hindoopore, anantapore; Hoovinhadgully, bellary; Hospett, bellary; Hurpanhully, bellary; Jeypore division, vizagapatam; Jummalmadoogoo, cuddapah; Krishnagherry, salem; Krittivenn zemindarry, kistna; Lingagherry zemindarry, kistna; Madaksira, anantapore; Madanapully, cuddapah; Madrantacam, chingleput; Madras town; Madura, madura; Maliah tracts, ganjam; Mangalore, south canara; Marcapore, kurnool; Mayavaram, tanjore; Meilavaram zemindarry, kistna; Mailore, madura; Merkoonaud division, neilgherries; Moongaula zemindarry, kistna; Moosiry, trichinopoly; Mulkangherry division, vizagapatam; Munnargoody, tanjore; Namcull, salem; Nangoonairy, tinnevelly; Narsapore, godavery; Narasarowpett, kistna; Negapatam, tanjore; Nellore, nellore; Noozveed zemindarry, kistna; Nowrungapore division, vizagapatam; Nundiaul, kurnool; Nundicotcore, kurnool; Nundigauma, kistna; Nunnilam, tanjore; Ongole, nellore; Odamalpett, coimbatore; Oodayagherry, nellore; Oodayarpolliem, trichinopoly; Oodipy, south canara; Ooppinangady, south canara; Ossoor, salem; Ootancaray, salem; Ottapidauram, tinnevelly; Padair division, vizagapatam; Palcondah, vizagapatam; Palghaut, malabar; Paranginaud division, neilgherries; Parvatipore division, vizagapatam; Peddapore, godavery; Penoocondah, anantapore; Perambalore, trichinopoly; Periyacoolam, madura; Pittapore division, godavery; Podily division, nellore; Pollachy, coimbatore; Polore, north arcot; Polore division, nellore; Pondicherry territory, south arcot; Ponnairy, chingleput; Ponnany, malabar; Poodoocottah territory, trichinopoly; Poolivendla, cuddapah; Poolampett, cuddapah; Poonganore zemindarry, north arcot; Pottinghy division, vizagapatam; Proddootore, cuddapah; Pulladam, coimbatore; Pulmanair, north arcot; Pulnaud, kistna; Pulney, madura; Putticondah, kurnool; Puttoocottah, tanjore; Rajahmundry, godavery; Ramalcottah, kurnool; Ramachendrapooram, godavery, Ramnaud zemindarry, madura; Raupore, nellore; Rekapully, godavery; Repully, kistna; Royachoty, cuddapah; Royadroog, bellary; Royagada division, vizagapatam; Rumpa division, godavery; Salem, salem; Sarwasiddhy, vizagapatam; Saulore division, vizagapatam; Shauttore, tinnevelly; Shivagunga zemindarry, madura; Shiyally, tanjore; Shreevillipoottore, tinnevelly; Shunkaraneinarcoil, tinnevelly; Sidhout, cuddapah; Sirwail, kurnool; Srungavarapoocote division, vizagapatam; Sullapully zemindarry, kistna; Sundoor territory, bellary; Suttenapully, kistna; Suttimungalam, coimbatore; Sydapett, chingleput; Tadpatry, anantapore; Tanjore, tanjore; Tanookoo, godavery; Tencaray, tinnevelly; Tencaushy, tinnevelly; Tindivanam, south arcot; Tinnevelly, tinnevelly; Tirmungalam, madura; Todanaud division, neilgherries; Toony division, godavery; Tricalore, south arcot; Trichengode, salem; Trichinopoly, trichinopoly; Trinomallee, south arcot; Tripatore, salem; Tritrapoondy, tanjore; Trivellore, chingleput; Valavanaud, malabar; Valloor zemindarry, kistna; Veeravilly division, vizagapatam; Vellore, north arcot; Vencatagherry division, nellore; Villoopooram, south arcot; Vinoocondah, kistna; Vissanapett division, kistna; Vizagapatam division, vizagapatam; Vizianagram division, vizagapatam; Voilpaud, cuddapah; Vriddhauchellam, south arcot; Wallajahpett, north arcot; Wandiwash, north arcot; Wynaud, malabar; Wynaud south-east division, neilgherries; Yernagoodem, godavery; Yernaud, malabar; Zemindarry tracts, ganjam. See vol. II, 378.——*Talookdar* (تعلق دار - taallukdár, Hind.). From (above + dár, pers. holder). Petty zemindar [q.v.]. None in this presidency.

TAM (तम् - tam, *San.*). Faint.——*Tamal* (तमाल - tamála, San.). From (tamas, san. dark). Same as Cassia cinnamon.——*Tamas* (तमस् - tamas, San.). From (tam, san. to suffocate). Ignorance. The earth's shadow [chauyay] in an eclipse [grahanam].——*Tambauk* (తంబాకు - tambáku, Tel.; തമ്പാക്ക - tampákku, Mal.; தம்பாக்கு - tambákku, Tam.). Title portuguese corruption of (támbaga, malay, from támraka, san. copper). Otherwise tombac from french. Pinchbeck, three parts zinc [tootnaug] to sixteen copper [taumram]; brass [pittalay] being one zinc two copper. Is ruddy like gold [pon].——*Tambool* (ताम्बूल - támbúla, San.; تنبول - tambúl, Hind.). From (tam, san. to faint away). Betel-leaf. Tambooly is a seller of betel [q.v.], tobacco [pogauk], &c.——*Tamogoonam* (तमोगुण - tamóguna, San.). The quality of darkness or malignity [goonam]. The Prabhoolinga leelay makes it inherent in Parvaty [q.v.] as a component part. Some ascribe it to Shiva [q.v.]. As to its influence on transmigration see Samsauram.——*Tamracherry* (താമരശ്ശേരി - támarashshéri, Mal.; támrachéri *). From (támara, mal. lotus, nelumbium speciosum, willd. + shéri, mal. village). Village, ghaut; Malabar dist., Calicut tal.; lat. 11° 25′; long. 75° 59′; from Calicut N.E. 16 miles; from Chevayore N.E. 12 miles; from the sea E. 15 miles. Ghaut [q.v.] on road from Calicut to Goodalore. In Kedavore amshom. Palace belonging to Cottayam rajah. Close to it is a tank 240 by 144 feet. The ghaut is one of Tippoo's military roads. Leads from Calicut through South wynaud to Mysore, and was the line selected by Colonel Wellesley for the operation against the Pychy rajah. Now much used for the export of coffee [q.v.].——*Tamrachoodan* (ताम्रचूड - támrachúda, San.). From (támra, san. copper + chúda, san. crest). Shiva.——*Tamrah* (یاقوت رمانی - yákútirummání, Pers.; تامڑا - támrá, Hind.). Pers. from (yákút, ar. garnet + rummán, ar. pomegranate, punica granatum, linn.); from color. Hind. from (támbá, hind. copper), meaning inferior. Garnet, which is from the Latin granatum, 'grained.' A mineral, crystallizing in the isometric or cubical system, and composed of silicate of alumina and lime of iron; the alumina often replaced by sesquioxide of iron and the lime by magnesia of some other oxide. There are two distinct kinds, the precious and the common. The color of the first is of various shades of red, and hence the name of the mineral [dhautoo], from its supposed resemblance to the flower of the pomegranate [anaur], with sometimes a tinge of yellow or blue, or a smoky aspect. The color of the common garnet is of various shades of brown and green. Garnets are found in Ceylon, in Southern india, and in Burmah Black garnets are occasionally to be met with in Ceylon and in the ghauts [q.v.] near Cape comorin [ratnam].——*Tamrapurny* (താമ്രപൎണ്ണി - támraparni, Mal.; தாம்பிரபரு ணி - támbirapparuni, Tam. támbraparni *). From (támra, san. copper red + parní, san. a tree, as having leaves); after the red sandalwood trees about its source. Otherwise Tamravanny,

or copper-hued, from sand. Real tamul name is Porny simply, and the sanscrit terms are an invention.—"*a*" Tam. also (porundam), meaning mountain stream; also (áni), from auny [mausam] or june, the third solar month as it overflows in the month of June. Greek σωλήν, meaning chunk [q.v.]. In the Mahavanso Tamrapurny [tamravurnam] is said to have been the name of the first setttlement formed by Vijaya and his followers in Ceylon, from which the name came to be applied to the whole island, and hence Greek ταπροβάνη. The settlement of Tamrapurny was near Putlam on the western coast of Ceylon, nearly opposite the mouth of this river in Tinnevelly. Hence perhaps the confusion of names. River; Tinnevelly dist., Ambasamoodram, Tinnevelly, Tencaray tals. Rises in the Western ghauts in lat. 8° 36′ N., and long. 77° 19′ E. Leaving the ghauts [q.v.] in the celebrated Paupanausam fall, it runs in a south-easterly direction to Shermadevy, then north-east between Tinnevelly and Palamcottah, then again south and east falling into the Gulf of Manaar in lat. 8° 40′, long. 78° 10′ close to Poonnacauyal. It receives the Chittaur on the left side in lat. 8° 47′, long. 77° 51′. Other affluents are the Gatananuddy, Manimooctah, Putchayaur and Ramanuddy. Total length, 70 miles. This river like the Cauvery, but unlike most south indian streams, is fed by both monsoons [q.v.], and is seen in full flood twice a year. It flows through a narrow and densely populated but very rich alluvial valley, originally formed by itself through the process of denudation, and then filled up by itself in later periods through the process of sedimentary deposition. With its feeders, it irrigates 65,000 acres of land. There are eight anicuts [q.v.]. For description of these, see vol. I, 404. There is a bar at the mouth of the river preventing the entrance of shipping. 35 miles higher up it is crossed by a fine bridge, connecting Tinnevelly and Palamcottah. Two waterfalls on main stream, Paupanausam and Baunateertam, and one on a tributary Paumbanaroovy. Most chunks [q.v.] used in commerce are found in the sea adjacent to mouth of this river. Every portion of the stream is sacred, but bathing at the water-falls in the upper part of its course is specially meritorious. Another river of the same name, distinguished as the western Tamrapurny, has its source close to this and flows westward into Travancore; see next clause.—"*b*" Otherwise Coolitora, meaning deep ford. River; Travancore state, Pudmanaubhapooram division. Rises in the mountains north of Mahendragherry. Passing first through wild tract, it enters the plains at Tirvattaur, and after a south-westerly course of 23 miles receives the Coday. Reaches the sea at Tengyeputnam. Length 37 miles. Narrow and occasionally rocky bed. Seven miles of its course are navigable, but timber is floated a greater distance; boats only ascend as far as Coolitora. Nunjenaud owes much of its fertility to the waters intercepted by dams at Ponmana, which are conducted partly to the Palayaur; a second channel flows by Pudmanaubhapooram and runs an equally fertile course. Not directly used for cultivation.——*Tamravurnam* (ताम्रवर्ण - támravarna, San.). From (támra, san. copper + varna, san. color), from red color of earth. One of the nine divisions of Bhaurata varsham or Northern india; Ceylon, by transfer.——*Taprobane* (ताम्रपर्ण - támraparna, Tam.). San. from (támra, san. copper + parna, san. leaf). Greek ταπροβάνη [tamrapurny]. Ceylon. Word used by Milton.——*Taumaray* (தாமரை - támarai, Tam.). From (támarasa, san. red lotus). Lotus or water-lily; held sacred. Lutchmy [q.v.] is the lotus [nelumbo] born. It is the poetic flower of the Hindoos. For different varieties of taumaray see Nelumbo.——*Taumbam* (तांब - támba, Mahr.). From (támra, san. copper). The genus Lutjanus, percidæ [panayairy], acanthopterygii, teleostei, pisces [matsyam, 1], of naturalists [jantoo]. Sea-fish. Insipid as food, extensively salted. The species best known to the natives are:—argenti maculatus [red rock cod], bengalensis, erythropterus, fulviflamma, jahngarah, johnii, lineolatus, marginatus [bride fish], rivulatus, sebæ.——*Taumbil* (तंबिल - tambila, Mahr.). From (támba, mahr. red); from appearance. Same as False bummelo.——*Taumram* (ताम्र - támra, San.; तांब्र - támbra, Mahr.; نحاس - noháss, Ar.; مس - mis, Pers.; تانبا - támbá, Hind. and Dec.; تامبكا - támbaga, Malay; ತಾಂಬ್ರ - támbra, Can.; ಚೆಂಬು - chembu, Too.; రాగి - rági, Tel.; ചെമ്പ - chempu, Mal.; තඹ - támba, Singh.; செம்பு - shembu, Tam.). Title from sanscrit. San. from (tám, san. to faint), as losing color when put in fire. Hind. from sanscrit. Can. from sanscrit. Tel. from (rága, san. redness). Mal. from tamul. Singh. from sanscrit. Tam. from (shem, tam. red + pon, tam. metal). San. also (támraka). Tel. also (támbramu). Copper. Cuprum of chemists. The only red-colored metal [loham]. Malleable and ductile, and has a disagreeable taste and smell when rubbed. In dry air becomes covered with a film of sub-oxide of copper, and in moist air with a green crust the carbonate. Found in Jeypore, Travancore, Nellore, &c.; but greater part exposed for sale comes from other countries. χαλκός which may have been either copper or brass was exported from Egypt to west coast according to the Periplus. Is either procured in metallic state, when it is crystallized in form of native copper; or sulphuretted, in combination with iron [auhan], or with iron and arsenic [paushaunam]. The sulphurets are the most abundant ores. Copper fused with tin [tagaram] forms bronze and bell-metal [cunts]; with zinc [tootnaug], or the oxide of zinc, called calamine [madal toottam], it forms brass [pittalay], which the natives know how to prepare in a simple way. Another alloy is pinchbeck [tambauk]. The natives also use an alloy of copper mixed with gold [pon], like the ancient Aes corinthium. The medicinal powder of copper or Taumra paspam [q.v.] is made by plunging copper coin made red hot into acid juice expressed from leaves of tamarind [q.v.] tree; this repeated several times, after which the coin is melted in crucible, with sulphur [gandhac] thrown into it at two different times; this mass is ground, moistening it with the juice of lemons [q.v.], which renders it white. There is another native preparation, which contains copper, egg shells, muriate of ammonia, corrosive sublimate [shavveeram], borax [vengauram], orpiment [hartaul], mercury [rasam] and lime [choonam]; this being administered in leprosy [cooshtam] and cutaneous affections. Clean copper vessels are with safety used for carrying or lifting drinking water, but copper cooking vessels are dangerous, as fatty and acidulous substances dissolve the metal which then gets oxidised and becomes poisonous. For sub-acetate of copper or verdigris, see Zangaur. For sulphate of copper or copperas or blue-stone, see Toottam. Taumram as meaning copper colored is a common plant first term. Ex., where transl. is of second term:—Bauhinia variegata (támrapushpi), flower; Nicotiana tabacum (támrakúta), head; Rubia cordifolia (támbravalli), creeper. See gloss. paragraphs.

TAM (தம் - tam, *Tam.*). Oblique form of (tám), they, themselves. Own.——*Tambaun* (തമ്പാൻ - tampán, Mal.). Short for Tumbiraun.——*Tammenapatam* (తమ్మనపట్నము - tammenapatnamu, Tel.). From (tammudu, tel. brother + pattana, san. town). Built by a brother of krishna deva royel. Village; Nellore dist., Goodoor tal.; acres 9,097; lat. 14° 14′; long. 80° 09′; from Goodoor E.N.E. 18 miles; from Nellore S.S.E. 17 miles; from the sea W. 2 miles. Abounds in palmyra [q.v.] trees.——*Tanam* (తనము - tanamu, Tel.; தனம் - tanam, Tam.). From (tán, tam. one's self). Nature. Suffix in compounds as Puttitanam, meaning looseness of conduct + nature.——*Tumbidoray* (தம்பித்துரை - tambitturai, Tam.). From (tambi, tam. younger brother + turai, tam. prince). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Tumbiraun* (തമ്പുരാൻ - tamburán, Mal.). From (tam, mal. one's own + purán, mal. lord). A prince, a lord, especially male in a royal family. Title of Cochin rajah. Means also in religion supreme god. Term of address among the inferior castes towards members of the superior castes [peyar]. Also headman of a convent. Periya tumbiraun is a form of Shiva, sometimes represented by an image of burnt clay or plaster, worshipped by washermen [dhoby] and others. For Coil tumboorauns see that head.——*Tumboo* (தம்பு - tumbu, Tam.). Familar form of tumby, brother. Hindoo 2nd or pers. name Title of address among Teloogoo shoodras in Tamul districts [peyar].——*Tumboosawmy* (தம்புசாமி - tambusámi, Tam.). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Tumbratty* (തമ്പുരാട്ടി - tampurátti, Mal.). Female in a royal family.——*Tumbraukkal* (തമ്പ്രാക്കൾ - támbrákkal, Mal.; தம்பிராக்கள் - tambirákkal, Tam.). Plural of tumbiraun. Male of a royal family; title of high priest, as Alwancherry tumbraukkal.——*Tumby* (തമ്പി - tampi, Mal.; தம்பி - tambi, Tam.). From (tan, mal. one self + pin, mal. after). A younger brother. A title assumed by the sons of the Rajahs of Travancore. Term of familiar address among non-bramins. Also suffix in proper names among non-bramins as Chinnatumby, Nullatumby [peyar].——*Tummanna* (తమ్మన్న - tammanna, Tel.). From (tammudu, tel. younger brother + anna, tel, elder brother, a title). Hindoo 2nd or pers. name [peyar].——*Tundacoor* (തന്തക്കൂറ - tantakkúru, Mal.). From (tanta, mal. father + kúr, mal, share). Inheritance by the father's side.——*Tundavazhy* (തന്തവഴി - tantavazhi, Mal.). From (tanta, mal. father + vazhi, mal. line). Father's line.——*Tunday* (തന്ത - tanta, Mal.). From (tan, mal. one's own + táyi, mal, parent). Father.——*Tungatchy* (തങ്കച്ചി - tankaççi, Mal.). A younger sister. Daughter of rajah on the West coast. These who, like sons, have no titles of rank, are first married in childhood by a Tirmalpaud [q.v.]; when one attains to maturity, cloth is given by some one who takes her to wife. The nieces on the other hand, who, like nephews, have the titles of Highness and Ranee are married when young to Coil tumboorauns [coil tumbooraun, maryauday, peyar].

TAMANA (تمن کا تیل - tamankátel, *Hind.*). Poon oil.

TAMARIND (तिन्त्रिणी - tintriní, *San.*; चिंच - chincha, *Mahr.* and *Conc.*; تمرهند - tamarihind, *Ar.*; تمرهندی - tamarihindí, *Pers.*; انبلی کا پیڑ - anblíkáper, *Hind.*; املی کا جھاڑ - amlíkájhár, *Dec.*; اسم - asam, *Malay*; ಹುಣಿಸೆ - hunishe, *Can.*; ಪುಂಕೆ - punke, *Too.*; చింత - chinta, *Tel.*; କୋୟାଁ - koyán, *Oor.*; പുളി - puli, *Mal.*; සියඹලා - siyambalá, *Singh.*; புளி - puli, *Tam.*). Title from arabic. San. from (tim, san. to become wet), from exciting saliva in the mouth. Mahr. from (chiñcha, san. tamarind tree). Ar. from (tamar, ar. date, phœnix dactylifera, linn. + hindí, ar. indian). Pers. from arabic. Hind. and Dec. from (ámliká, san.

the plant). Tel. like mahratta. San. also (ámliká), meaning sour plant [sour auray]; (chiñchá), meaning paining, as from sourness; (shukta), meaning sour; (tintidi), by corruption. Mahr. also (amlí), meaning sour. Ar. also (húmar), meaning red referring to the seed; (sabárá), meaning acid. Hind. also (tintirí), from sanscrit. Malay also (kamal); (neghka); (asamjawa); (asamkranj). Can. also (hulimara), meaning sour + tree; (neralamara), meaning shade + tree [common jaumoon]; (hulise); (unaramara); (unanamara); (karangi); (kamal); (asam). Oor. also (tentúli), from sanscrit. Mal. also (madhurappuli), meaning sweet tamarind; (válanpuli), meaning sword tamarind, from pod. Tam. also (indam); (mugini). Greek ὀξυφοινίκα. Title otherwise Amlee, Aumlicah, Chinch, Chinta, Pooliyamaram, Pooly. Botanically Tamarindus indica, linn., leguminosæ [vricsham, 48]. Alias Tamarindus occidentalis, officinalis. Tree, 80 feet; calyx limb bilabiate, reflexed; petals 3, alternate with the segments of the upper lip of the calyx; seven short stamens all sterile, the others longer, fertile; leaves abruptly pinnated; leaflets numerous; legumes linear, more or less curved, one-celled, many-seeded; seeds compressed, bluntly four-angled; flowers in racemes with straw-colored calyx, and yellow petals streaked with red, purple filaments and brown anthers. A common slow-growing, long-lived, and handsome tree; circumference to 25 feet; one of the largest trees in india, with an umbrageous head; common both wild and cultivated; the pod is thick, oblong, 4 to 6 inches long, curved, compressed between each seed, smooth, of greyish-rusty color, externally formed of a double envelope; seeds large, shining, angular, and flat, and covered with a dark pulp; the odour of the pulp is vinous, the taste acid, somewhat astringent, and saccharine; pod is connected with the seeds by tough strings or fibres; from seeds is expressed a clear, bright, fluid oil [yennay]. Commercially there are two kinds of tamarind products:—brown and red tamarinds, the west indian tamarinds, the pulp preserved in sugar [q.v.], this is the form chiefly sold in the shops in england; and black or east indian tamarinds, not preserved in sugar, this is the black pulp as prepared and sold here. There is a considerable export trade of tamarinds from madras; little attention however is paid to the preparation of the fruit in this country; it is simply deprived of its outer covering and then stored in mass; it therefore contains seeds, stringy fibres, and often pieces of the pod. Cultivated in red soil; pits are dug and seed inserted by hand; no nursery; the plants are watered when young; produce obtained after twelve years by persons climbing trees and shaking branches or beating with sticks; produce exposed to sun for four days and then beaten with sticks which separate the shells. Medicinally kernels of seeds reduced to fine powder and boiled form a tenacious paste, this smeared on skin promotes suppuration in indolent boils; seed sometimes given by veidyans [q.v.] in dysentery as a tonic; the pulp is laxative and stomachic, and quenches thirst, increases the action of the sweet purgatives cassia [q.v.] and manna [q.v.], and weakens that of resinous cathartics; pulp substituted for british tartaric and citric acids; a decoction of the acid leaves employed externally in cases requiring repellent fomentation, and for preparing collyria; the tamarind is generally antiscorbutic; gives to pharm. tamarindi pulpa; enters into the composition of confectio sennæ, officinal. Tamarinds are preserved in two ways; by throwing hot sugar from the boiler on the ripe pulp, or by putting alternate layers of tamarinds and powdered sugar into a stone jar; by this last means they preserve their color and taste better; they contain sugar, mucilage, citric acid, tartaric and malic acids; the young leaves are used in pepper-water; the green fruit is an ingredient in chutneys [q.v.]; pulp of ripe fruit is used in curries [q.v.]; also used for sherbet [q.v.]; in times of scarcity the poor eat tamarind fruit and stones; after being roasted, then soaked in water, the dark outer skin comes off, leaving the seeds below white, soft, and in taste not unlike a field bean; these are boiled or fried, and eaten. Black tamarinds are used for adulterating tobacco [pogauk]; a strong infusion mixed with sea salt is used by silversmiths in a mixture for cleaning silver [velly]; the pulverised seeds boiled into a paste with thin glue form one of the strongest wood cements [pattoo]; an infusion of leaf imparts a green color to silk [puttoo] previously dyed with indigo [q.v.]; alone it makes a yellow or reddish hue; used in coloring especially along with safflower [bastard saffron]; flowers also; natives have a prejudice against sleeping under the tree; the acid damp affects the cloth of tents [derah] pitched under it; many plants do not grow under its shade; very largely planted in avenues [shaulay] and topes [q.v.], also round villages for its fruit and shade. Heart-wood generally of small diameter, very hard, close-grained and sometimes finely veined of a dark-reddish hue; hard to be worked, much used for turnery purposes and for pestles, oil presses [gaunam], sugar crushers [aulay], carpenter's mallets and planes, and many other purposes; one of the best fuels for brick kilns [shoolay] as it burns whilst green; excellent for gunpowder charcoal [adoopp kary]; heart-wood is only procurable from very old trees; sap wood is of a dirty white not durable and if not seasoned in water gets worm-eaten; from the liability to become hollow in centre, it is difficult to get a tamarind plank of any width. The three following are varieties according to quality of pulp:—sweet-fruited, sour-fruited, rose-colored; the last makes the best preserve. There is a Tamul proverb:—ஆளை ஆள் அறியவேண்டும் மீனைப் புளியங்காய் அறியவேண்டும்—"man must be tested by man and fish by tamarind "fruit." There is another:—வெறும் புளி தின்றால் பற்கூசும்—"tamarinds if eaten alone will set the teeth on edge." And another:—புளியம்பழத்துக்குப் புளிப்புப்புகுதவிடவருகிறாயோ—"do you try to infuse sourness into tamarind "fruit." And another:—பொங்குங்காலம் புளி பூக்கும் மங்குங்காலம் மா காய்க்கும்—"in propitious seasons the tama-"rind flowers, in times of scarcity the mango fruits." The following is a Hindostany proverb:—گڑیون کی بیاہ مین چنچونکے بیل—"at a doll's marriage the gifts are tamarind seeds;" said of the very poor; tamarind seeds are very small. There is a Teloogoo proverb:—మంచికాలానికి చింతలు చెడుకాలానికి మామిళ్లు—"in a good season look for tamarinds, in a bad for mangoes "[q.v.]." No other species here.——(1) *Tamarind fish* (புளிமீன் - pulimín, Tam.). Fish soured with tamarind [q.v.] juice eaten as a relish. The fish are cut in transverse slices, and preserved in kegs.——*Tamarind stone* (రాతిచింత - rátichinta, Tel.). Tel. from (ráyi, tel. stone + chinta, tel. tamarind tree, tamarindus indica, linn.). Otherwise called Wood stone. Found in great abundance at the village of Tirvacaray, 15 miles west by north from Pondicherry. Supposed to be a petrifaction of the tamarind tree. Retains the appearance of the ligneous texture and is susceptible of a fine polish.——(2) *Bitter tamarind* (ಕೈಪೇರಿಪುಳಿ - kaipéripuli, Too.). Same as Monkey lime.——*Bramin tamarind* (பாப்பாரப்புளி - páppárappuli, Tam.). Tam. corruption from (papparappuli), meaning goozerat tamarind. Same as Baobab.——*Carpenter's tamarind* (املی - amlí, Hind.; పిల్లగుముడు - pillagumudu, Tel.; ମୁନିଆରି - muniári, Oor.; ஆசாரிப்புளி - ásárippuli, Tam.). Title from use of wood. Tel. from (pilla, tel. small + gumudu, tel. gmelina asiatica, linn.). Tam. from (áchárya, san. teacher + puli, tam. tamarindus indica, linn.). Botanically Antidesma [amla shaucam] diandrum, tulasne, euphorbiaceæ [vricsham, 118]. Small tree with smooth, grey bark; shoots glabrous or rusty pubescent; leaves very variable, obtuse acute, or acuminate, the longest 5 by 1 inch, the largest 5 by 2 inches, the smallest 1 by ⅜ inch, thin in texture, rarely slightly pubescent beneath, yellowish green when dry, base always acute, nerves faint; petiole $\frac{1}{10}$–$\frac{1}{8}$ inch, stipules slender; racemes always quite glabrous; bracts short, oblong, obtuse, glabrous, lowest often the longest; flowers minute, a few here and there sessile; disk lobed and quite glabrous; flower very small, greenish. Leaves are acid and eaten, resemble sorrel [auray] and are made into chutney [q.v.]; ripe berries eaten. Wood pinkish-grey, hard, close-grained.——*Crow tamarind* (काकचिंच - kákachiñcha, San.). Title from growing wild and leaf resembling tamarind. Same as Indian liquorice.——*Elephant tamarind* (ஆனைப்புளி - ánaippuli, Tam.). Title from size. Same as Baobab.——*False tamarind* (ಜಾರಿಗೆಹುಳಿ - járigehuli, Can.). Same as Ceylon gamboge.——*Foreign tamarind* (ولایتی املی - viláitíamlí, Hind.; సీమచింత - símachinta, Tel.). Same as Baobab, Malabar gamboge, and Corcapilly.——*Gorakh's tamarind* (گورك چنچا - gorakchinchá, Hind.). Tree under which gorakh taught. Same as Baobab.——*Hill tamarind* (மலைப்புளி - malaippuli, Tam.). Same as Yellow mangosteen.——*Khorassan tamarind* (خراسان کی املی - khurásánkíamlí, Hind.). Same as Portia.——*Malabar tamarind* (കുറുക്കമ്പുളി - kurukkampuli, Mal.). Mal. means short fruit tamarind. Same as Malabar gamboge.——*Pot tamarind* (കുടമ്പുളി - kutampuli, Mal.). From being preserved in pots. Same as Malabar gamboge.——*Red tamarind* (ఎర్రచింత - errachinta, Tel.). Title from reddish brown color of wood. Same as Fragrant sirissa.——*Ship tamarind* (వాడచింత - vádachinta, Tel.). Same as Malabar gamboge.——*Sour tamarind* (పుల్లచింత - pullachinta, Tel.). Same as Malabar mountain ebony and Sour auray.——*Square tamarind* (ചതുരപ്പുളി - chaturappuli, Mal.). From angular fruit. Same as Coromandel gooseberry.——*Water tamarind* (දියසියඹලා - diyasiyambalá, Singh.). Same as Solah.——*White tamarind* (ಬಿಳಿಹುಳಿ - bilihuli, Can.). Same as Small poolay.

TAMAUSH (تماشا - tamáshá, *Hind.*). From (mashí, ar. to walk together). Spectacle.

TAMBATTAM (कोशफल - kóshap'hala, *San.*; गवरी - gavarí, *Mahr.*; کہر سنبل - kharsambal, *Hind.* and *Dec.*; ಶಂಬೆಗಿಡ - shambegida, *Can.*; తమ్మ - tamma, *Tel.*; വാളമര - válamara, *Mal.*; தம்பட்டை - tambattai, *Tam.*). Title from tamul. San. from (kósha, san. sheath + p'hala, san. fruit). Hind. from (khara, san. sharp + shimbí, san. the plant), sword bean. Mal. from (vál, mal. sword + amara, mal. bean, dolichos lablab, linn.); from long flat pods. San. also (shimbí), meaning pod [shimby]. Hind. also (barásem), meaning the large dolichos lablab, linn.; (mukhamsem); (chhotísem), meaning small dolichos; (sufedkharsambal), meaning white sword bean; (lálkharsambal), meaning red sword bean. Can. also (tamatigida). Tel. also (chamma); (tellatamma), meaning white + plant; (yerratamma), meaning red + the plant. Mal. also (kanavázha). Tam. also (kózhiya-

varai), meaning fowl + dolichos lablab, linn.; (shivapputtambattai), meaning red + the plant; (vellaittambattai), meaning white + the plant; (válavarai), meaning sword + dolichos, from sword-shaped pod. Title otherwise Fowl's bean, Hussar bean, Jamaica horse-bean, Jamaica overlook, Sabre-podded horse-eye bean, Sword bean. Botanically Canavalia ensiformis, dec., leguminosæ [vricsham, 48]. Canavalia, from (kanavázha, mal.). Alias Canavalia gladiata, incurva; Dolichos ensiformis, gladiatus; Malschia gladiata. Perennial shrub, twining; leaves pinnately trifoliate; leaflets cordate-ovate, rather acute; calyx unequally bilabiate, upper lip largest, lower lip acutely three-toothed; corolla papilionaceous; vexillum bicallous at the base; keel falcate at a right angle, petals distinct; racemes axillary, many-flowered; flowers in pairs, or threes, purplish; legumes five to ten times longer than broad. An extensive climber ascending to the summit of the loftiest trees; flowers in the rainy season; the pod is large, flat, sword-shaped, full nine inches long, and more than an inch and a quarter wide; seeds large, some bright red, others white; a common plant in hedges and thickets; when cultivated requires very strong stakes. Pod, though coarse-looking, when sliced and boiled exceedingly tender, little inferior to french beans [lobyah]; most wholesome, extensively used at the tables of europeans; plucked when half-ripe; compare the use of dolichos biflorus, linn. [madras horse gram], and vigna catiang, endl. [cow gram]. Varieties, with seeds and flowers of different colors; that with large white seeds and flowers is the most wholesome. Other common species are:—mollis, obtusifolia.

TAMBORE (تنبور - tambúr, *Hind.*). From (tonbá, hind. a small gourd). A sort of lute; no frets [sangeetam].

TAMOORY (താമൂതിരി - támútiri, *Mal.*). A corruption of (sámudri, san. sea king). Same as Zamorin.

TAN (तन् - tan, *San.*). Extend.——*Taag* (ताग - tága, Mahr.). From (tantuka, san. thread). Same as Sunn.——*Tanoo* (तनु - tanu, San.). From (tan, san. to extend). Slender.——*Tanoo madhyaumbaul* (தனுமத்தியாம்பாள் - tanumattiyámbál, *Tam.*). From (tanu, san. slender + madhya, san. waist + ambá, san. mother). Parvaty [q.v.].——*Tantram* (तन्त्र - tantra, San.). From (tan, san. to weave). Thread. Thence ritual. The name of a class of works founded on one of the oopanishads [q.v.]. Properly a Tantram, like a Pooraunam [q.v.], ought to treat of five subjects; viz., the creation, the destruction of the world, the worship of the gods, the attainment of all objects especially of six superhuman faculties [siddhy], the four modes of union [saulokyam] with the supreme spirit [bramh]. A great variety of other subjects however are introduced, and all extant tantrams deal as a first subject with the female energy of deity, personified in the person of his shacty [q.v.] or wife. There are a few tantrams which make Vishnoo's wife or Raudhay [q.v.] the object of devotion, but the great majority of them are devoted to one of the manifold forms of Parvaty [q.v.] the shacty [q.v.] of Shiva [q.v.] and they are commonly written in the form of a dialogue between these two last named deities. There are five requisites for tantram worship, the five Macaurams or five m's:—Madyam, wine; Maumsam, flesh; Matsyam, fish; Mcodrah, parched grain and mystic gesticulations; Meitoonam, intercourse between the sexes. Each shacty is said to have a twofold nature, white and black, gentle and ferocious; but the former are not known in S. india. The later tantrams are merely handbooks or manuals of magic and witchcraft, and collections of muntrams for producing and averting evils. The following are specimens of what they contain:—praise of the female energy; spells for bringing people into subjection; for making them enamoured; for unsettling their minds; for fattening; for destroying sight; for producing dumbness, deafness, and fevers; for bringing on miscarriage; for destroying crops; for preventing various kinds of evil; methods of breathing in certain rites; language of birds, beasts, &c. The tantrams are exceedingly numerous. The principal are the Shyaumah rahasyam, Roodra yaumalam, Muntra mahodadhy, Shauradah tilacam, and Calicah tantram. The Coola choodaumany and Coolaurnavam are allied works. Tantric worship came from North-eastern india. The Shauctas [q.v.] or worshippers of the Shacties are divided into two classes, Dacshinacharries and Vaumacharries, the right-handed and the left-handed; see those heads. The followers of the tantrams profess to consider them as a fifth vedam [q.v.]. See vol. I (87) [matam].——*Tantra vaurticam* (तन्त्रवार्त्तिक - tantravárttika, San.). From (tantra, san. ritual + vártika, san. commentary). A celebrated Mimaumsam [q.v.] treatise by Comaurila bhatt, forming a commentary on the Jeiminy sootrams. It contains earliest known mention in Sanscrit of Dravidian languages.——*Tanty* (தந்தி - tandi, Tam.). From (tantu, san. string). Wire [taur].——*Tanty cullan* (தந்திக்கள்ளன் - tandikkallan, Tam.). From (tandi, tam. wire + kallan, tam. thief). Thug [q.v.].——*Tauga* (تاگا - tágá, Hind.). Hind. from (tantuka, san. thread). Cotton thread. Cutchatauga is rough thread or lamp cotton [q.v.].——*Tauntrica* (तान्त्रिक - tántrika, San.). Follower of the tantram doctrine.

TAN (தண் - tan, *Tam.*). Cool, water.——*Tandalam* (தண்டலம் - tandalam, Tam.). From (above + talam, tam. place). Grove [tope].——*Tannote* (തണ്ണോട്ടു - tannóttu, Mal.). Oblique form of Tannagam. From (tan, mal. water + akam, mal. inside). Hill; Malabar dist., Wynaud tal.; lat. 11° 32′; long. 76° 01′; from Calicut N.E. 24 miles; from Manantoddy S. 18 miles. Overhangs Tamracherry pass [ghaut] into Wynaud.——*Tunniketch* (தண்ணிக்காரிச்சி - tannikkáricci, Tam.). From (tannír, tam. water + káratti, tam. woman-servant). Female water-carrier in the kitchen.——*Tunny* (தண்ணீர் - tannír, Tam.). Means cool + water. A general term for water. For different kinds of water see Neer.——*Tunny paumb* (जलव्याल - jalavyála, San.; پانی کا سانپ - páníkásámp, Hind.; ನೀರುಹಾವು - nírubávu, Can.; నీళ్లపాము - níllapámu, Tel.; നീർക്കോലി - nírkkóli, Mal; தண்ணீர்ப்பாம்பு - tannírppámbu, Tam.). Title and Tam. from (tannír, tam. water + pámbu, tam. snake). San. from (jala, san. water + vyála, san. snake). Hind from (pání, hind. water + sámp, hind. snake). Tel. from (níllu, tel. water + pámu, tel. snake). Mal. from (nír, mal. water + kól, mal. stick). Water-snake. Especially the Tropidonotus plumbicolor, colubridæ [paumb]. Fresh-water snakes are distinguished by the position of the nostrils, which are placed on the top of the snout and by a tapering tail.

TANAKK (زيتون - zaitún, *Hind.*; పొనుకు - ponuku, *Tel.*; தணக்கு - tanakku, *Tam.*). Title from tamul. Hind. means olive [zeitoon]. Tam. from (tana, tam. to go), from use of wood as floats or catamarans [golden silk cotton, odul]. Tel. also (kummaraponuku), meaning potter + the tree; (tanuku); (éruponuku), meaning river + the tree. Tam. also (shendanakku), meaning red + tanakk tree; (kadavu), meaning catamaran tree; (karamanikkáymaram), meaning dark + seed + fruit + tree; (kalámaram). Title otherwise Catamaran wood tree, Potter's tree, Red tanakk. Botanically Gyrocarpus jacquini, roxb., combretaceæ [vricsham, 55]. Alias Gyrocarpus acuminatus, americanus, asiaticus, rugosus, sphenopterus. Large tree; leaves crowded about the extremities of the branchlets, broad cordate, three-nerved often slightly lobed, above smooth, below downy, with two pits on the upper side of the base; petioles downy; panicles terminal, divisions two forked; hermaphrodite flowers solitary, sessile in the division of the panicle; calyx five-sepalled, segments unequal, interior pairs large, wedge-shaped, three-toothed, expanding into two long membranaceous wings; flowers small, yellow; capsule globular, wrinkled, one-celled, one-valved, size of a cherry [q.v.], ending in two long lanceolate membranaceous wings; flowering in december–january. Necklaces [maulay] and rosaries are made from the seeds; the seeds are used by the potters to polish their earthen vessels [chatty]. Wood is very light, soft, and white, much used at Condapully for making light cauvady [q.v.], boxes and toys [moochee wood], takes paint and varnish, also preferred before all other woods for making catamarans [q.v.].——*White tanakk* (پولکی - polkí, Malay; తెల్లపొనుకు - tellaponuku, Tel.; பூத்தாளி - púttáli, Tam.). Title from color of wood. Tel. from (tella, tel. white + ponuku, tel. gyrocarpus jacquini, rox.). Tam. from (pú, tam. flower + táli, tam. running plant, convolvulus). Tam. also (vendáli), meaning white + running plant, convolvulus. Botanically Givotia rottleriformis, griff., euphorbiaceæ [vricsham, 118]. Small tree, much branched; leaves orbicular-ovate, acuminate, coarsely repand-toothed, membranaceous, stellately tomentose, above afterwards glabrescent, indumentum at first whitish, then tawnyish or somewhat rusty; petioles with few glands above the middle; panicles exceeding the leaves, alternately bearing branches; bracts long linear; segments of the calyx obovate, glabrous within; petals obovate; hypogynous disc urceolar, lobed, pubescent; filaments hairy at the base, about twice as long as the anthers; ovary puberulous; styles stiff, spreading, two-cleft to the middle; fruit oblong-ellipsoid, minutely ashy-tomentose; seeds globose-ellipsoid, smooth, pale. Common in dry subalpine forests; seed yields an oil [yennay] valuable for fine machinery; has a light, soft wood, like mango [q.v.] wood, useful for toys, imitation fruit, boxes, &c., and catamarans [q.v.], it takes paint [rangh] very well. No other species here.

TANDAL (తండలు - tandalu, *Tel.*; தண்டல் - tandal, *Tam.*). Tam. from (tandu, tam. to collect). Money collection [inam, vasool].——*Tandalgar* (தண்டற்காரன் - tandargáran, Tam.). From (above + kri, san. to do.). Village revenue collector [moodipp cauran].

TANDOO (தண்டு - tandu, *Tam.*). From (danda, san. column). Army [dandam, dandoo, paday, shervay].——*Tandoomaury* (தண்டுமாரி - tandumári, Tam.). From (above + mári, tam. goddess of small-pox). Village goddess.——*Taundah* (ٹانڈا - tándá, Hind.). From (danda, san. column of troops) [dandam]. A large body of travellers or traders travelling together for mutual security. Movable encampment.

TANGAL (തങ്ങൾ - tannal, *Mal.*). From the malay. Moplah [q.v.] priests, supposed to be syeds [q.v.], and who exercise considerable influence. Under a Tangal are several Lubbays [q.v.], one in each mosque [musjid], who conduct the worship kill sheep [aud] for food with due ceremonial, and conduct marriages.

TANIKY (تنقيح - tankíh, *Hind.*). From (nakaha, ar. to extract the marrow). Examination.

TANJORE (تنجاور - tanjáwar, *Hind.*; தஞ்சாவூர் - tañjávúr, *Tam.*). From (tañjam, tam. asylum + úr, tam. village). Tam. also (tañjai), meaning shelter + place; also (tañjamánagaram), meaning shelter + great + city; also (tañjapuri), meaning shelter + town; also (tañjákkúr), meaning asylum + village. Sanscrit name (tungapura), meaning town of toongeshwaran, or shiva, lord of hills, whose lingam [q.v.] was set up under this name by coolottoonga cholan; also (brihadíshvara), meaning great lord, after the great lingam brought by caricaulan from nerbudda. —(1) Revenue district; situated on the Coromandel coast; between 9° 49′ and 11° 25′ N. lat., and between 78° 45′ and 79° 54′ E. long.; bounded N. by Coleroon river; E. by Bay of Bengal; S. by Bay of Bengal and Madura district; W. by Madura and Trichinopoly districts; square miles 3,708; pop. 2,228,114; language Tamul. Contains rivers Cauvery, Coleroon; ports Adiramputnam, Ammaputnam, Caricaul, Cautmauvady, Codiyampolliem, Cottapatam, Gopaulputnam, Krishnaujiputnam, Moottoopett, Nagore, Negapatam, Point calimere, Topetoray, Tranquebar, Trimal vausal, Velangauny. The whole area of the district is represented by the following sub-areas:—Caricaul territory, Combaconam talook, Mayavaram talook, Munnargoody talook, Negapatam talook, Nunnilam talook, Puttoocottah talook, Shiyally talook, Tanjore talook and Tritrapoondy talook. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Tanjore; Sub-Collector, Combaconam, in charge of Combaconam, Mayavaram and Shiyally talooks; Head assistant collector, Negapatam, in charge of Negapatam and Nunnilam talooks; General deputy collector, Munnargoody, in charge of Munnargoody and Tritrapoondy talooks; General deputy collector, Tanjore, in charge of Tanjore talook; Assistant collector, Tanjore, in charge of Puttoocottah talook. Tahsildars; Combaconam, Rs. 250; Mayavaram, Rs. 225; Munnargoody, Rs. 200; Negapatam, Rs. 250; Nunnilam, Rs. 250; Puttoocottah, Rs. 175; Shiyally, Rs. 150; Tanjore, Rs. 250; Tritrapoondy, Rs. 225. Deputy tahsildars; Arantaungy, Rs. 70, range situated in the south of Puttoocottah talook; Combaconam, Rs. 100, range situated in the centre of the talook; Codavausal, Rs. 70, range situated in the western portion of the Nunnilam talook; Needamungalam, Rs. 70, range situated in the northern portion of the Munnargoody talook; Negapatam, Rs. 100, range situated in the north-eastern portion of the Negapatam talook; Tanjore, Rs. 100, range situated in the centre of the Tanjore talook; Tirvadamaroothore, Rs. 70, range situated in the east of the Combaconam talook; Tranquebar, Rs. 70, range situated in the south-eastern part of the Mayavaram talook; Tirvarore, Rs. 70, range situated on the western extremity of the Negapatam talook; Trivandy, Rs. 70, range situated in the northern portion of the Tanjore talook; Vedaranyam, Rs. 70, range situated in the south-eastern part of the Tritrapoondy talook; Vullam, Rs. 70, range situated in the south and west of the Tanjore talook. Similarly judicial officers:—Judge, Tanjore. Sub-Judges, Combaconam, Negapatam and Tanjore. District Moonsifs, Combaconam, Mayavaram, Munnargoody, Negapatam, Puttoocottah, Shiyally, Tanjore, Tirvarore, Tritrapoondy, Trivaudy, Valangimaun. Contains Registration sub-districts, Arantaungy, Auditchapooram, Combaconam, Madyarjoon, Mayavaram, Milattore, Munnargoody, Negapatam, Nunnilam, Paupanausam, Peralam, Puttoocottah, Sawmymullay, Shiyally, Tanjore, Tircautpully, Tirpoondy, Tirvarore, Tranquebar, Tritrapoondy, Trivaudy, Valangimaun, Vedaranyam and Vullam. Contains Forest ranges, Northern and Southern. Contains Municipalities, Combaconam, Mayavaram, Munnargoody, Negapatam, Tanjore. Contains District board; and Talook boards, Tanjore embracing Tanjore talook, Combaconam embracing Combaconam, Mayavaram and Shiyally talooks, Negapatam embracing the talooks of Negapatam and Nunnilam, Munnargoody embracing Munnargoody and Tritrapoondy talooks, Puttoocottah embracing the talook of Puttoocottah. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; coast survey, II, 159; lighthouses, II, 169; comparative population, II, 172; location of revenue officers, II, 390; registrars' and sub-registrar's stations, II, 421; ports, II, 423; salt factories, II, 426; rain-gauge stations, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; missionary stations, II, 455; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 518; zemindarries, II, 300; special public works, I, 399. A special gazetteer account of the whole district is given at II, 126. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Caricaul, Combaconam, Mayavaram, Munnargoody, Negapatam, Nunnilam, Puttoocottah, Shiyally, Tanjore, Tritrapoondy.

—(2) Talook, Tanjore district. Tahsildar's pay, Rs. 250. Area 689 square miles; population 410,447; language Tamul. W. of district. Boundaries:—North by Coleroon and Combaconam talook, east by Combaconam and Munnargoody talooks, south by Puttoocottah talook and Poodoocottah territory, west by Trichinopoly talook and Poodoocottah territory. Except the south and south-western portions which are elevated the talook is a level country sloping towards the east. The low lands are clayey, while parts of the elevated land are rocky and the rest sandy mixed with red loam. Industries:—Silk-weaving, fine arts, pith [solah] works, painting, sculpture, copper-work wrought in silver; silk and woollen carpets and ordinary cloth. Commerce:—Paddy [q.v.], dholl [q.v.], groundnut [q.v.] and other articles produced in the talook, opium [aphainam], European liquors and cloths of different sorts. Irrigated by the Cauvery, Coodamoorty, Vadavaur, Vennaur and Vettaur, and some minor tanks. The South indian railway enters the talook on the north and leaves it viâ Tanjore city on the west, with a branch from Tanjore city eastward to Negapatam. Zemindarries:—Conoor, Cullacottay, Gandharvacottah. Places of archæological interest:—Adanjiyore, Agaram, Candiyore, Carooppore, Caungayamputty, Cazhoomungalam, Coilady, Comapooram, Conairirajapooram, Cooriyaputty, Covilore, Covilputt, Cutchamungalam, Maroovore, Maungoody, Naimam, Nodiyore, Nulloocherry, Paroodiyapparcoil, Pashoopaticoil, Perambore, Poothoocoodiyadapaudy, Porausacoody, Rajagherry, Shoolamungalam, Siddharcoody, Tanjore, Tingalore, Tircautpully, Tirpandirty, Tirvaulampozhy, Tirvedacoody, Trichendoray, Trivaudy, Vaunarangoody, Vendayamputty, Vishnampett, Vullam. Principal trig. stations:—Arasaputt, Cakkaracottah, Particottah, Poovattore, Rauramoodracottah. The leading places, &c., in the talook are the following.——*Ammapett* அம்மாப்பேட்டை - ammáppéttai, Tam. ammápet *). From (ammá, tam. title of a woman + péttai, tam. village). Town, Railway station; pop. 3,804; lat. 10° 47′; long. 79° 22′; height 106 feet; from Tanjore E. 13 miles. Weaving centre. Fairs every Sunday.——*Arasaputt* (அரசப்பட்டு - arasappattu, Tam.). From (arasu, tam. peepul tree, ficus religiosa, linn. + pattu, tam. village). Trig. station; lat. 10° 43′ 31·18″; long. 79° 20′ 49·19″; height 103 feet.——*Ayyampett* (அய்யம்பேட்டை - ayyambéttai, Tam. ayyampet *). From (aiyyan, tam. the god ayyanár + péttai, tam. village). Town, Railway station; pop. 7,695; lat. 10° 53′; long. 79° 14′; height 114 feet; from Tanjore N.N.E. 8 miles. Includes suburb of the Shoolamungalam and Manojiappa chauvady. Seat of weaving [nesavoo]. Silk [puttoo] cloths and carpets [satranjee] of silk floss, and mats [boriyah] of rushes [coray] are largely made.——*Bhootalore* (பூதலூர் - púthalúr, Tam. búdalúr *). From (bhúta, san. demon + úr, tam. village). Sanscrit name (buddhipura), meaning intellect city. Village, Railway station; pop. 2,054; acres 2,055; lat. 10° 47′; long. 79° 01′; height 188 feet; from Tanjore W. 11 miles. Includes the suburb of Covilputt. Colonel Smith took possession of the pagoda [q.v.] in 1773, when marching from Trichinopoly against Tanjore.——*Cakkaracottah* (கக்கரக்கோட்டை - kakkarakkóttai, Tam.). From (kal, tam. stone + karai, tam. boundary + kóttai, tam. fort). Trig. station; lat. 10° 36′ 17·59″; long. 79° 15′ 08·80″; height 107 feet.——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.——*Coilady* (கோவிலடி - kóviladi, Tam.). From (kóvil, tam. temple + adi, tam. foot). The temple adjoins that of Shreerungam. Town; pop. 2,273; acres 2,372; lat. 10° 51′; long. 78° 56′; from Tanjore W.N.W. 17 miles. Two old Shiva and Vishnoo temples. Formerly a Deputy tahsildar and Sub-magistrate's station. The Grand anicut [q.v.] is five miles from Coilady.——*Coleroon* (கொள்ளடம் - kolladam, Tam.). See sep. title.——*Cullacottay* (கல்லாக்கோட்டை - kallákkóttai, Tam.). From (kal, tam. stone + kóttai, tam. fort). Zemindarry, Village; pop. 1,750; lat. of village 10° 31′; long. 79° 09′; from Tanjore S. 19 miles. Peshcush Rs. 1,701.——*Cunnandagoody* (கண்ணந்தக்குடி - kannandakkudi, Tam.). From (kan, tam. eye + andam, tam. beauty + kudi, tam. village). Village; pop. 1,428; lat. 10° 39′; long. 79° 19′; from Tanjore S.E. 14 miles. Mission station. Country seat of the Rajah's family. A bungalow [q.v.] for European travellers.——*Cutchamungalam* (கச்சமங்கலம் - kaççamangalam, Tam.). From (kaççam, tam. a fish + mangala, san. prosperity). Village; pop. 1,404; acres 608; lat. 10° 50′; long. 78° 56′; from Tanjore W.N.W. 17 miles. Includes suburbs of Tripyore and Mahadevapooram. Old Shiva temple. Site of an ancient anicut [q.v.]. The dam is across the Vennaur where the Pillay vycaul channel branches from its north and the Ananta cauvery channel from its south bank.——*Gandharvacottah* (கந்தருவக்கோட்டை - kandaruvakkóttai, Tam.). See sep. title.——*Manamboochauvady* (மாநோம்புச்சாவடி - mánómbuççávadi, Tam.). From (má, tam. great + nómbu, tam. festival + shávadi, tam. choultry). Village; lat. 10° 47′; long. 79° 11′; from Tanjore S.E. 1½ miles. Included in Municipality of Tanjore. Mostly inhabited by silk-weavers [putnool]. European and Eurasian quarter of Tanjore town.——*Mauriyammancoil* (மாரியம்மன் கோவில் - máriyammangóvil, Tam.). From (máriyamman, tam. the village deity + kóvil, tam. temple). Village; pop. 2,299; lat. 10° 47′; long. 79° 14′; from Tanjore E. 4 miles. Old temple of Mauriyamman [q.v.].—

Milattore (மிலட்டூர் - milattúr, Tam.). From (mél, tam. west + áru, tam. river + úr, tam. village). Town and a Sub-registrar's station; pop. 6,804; acres 7,483; lat. 10° 52′; long. 79° 17′; from Tanjore N.E. 9 miles. On the Vellaur and in the most fertile part of the Cauvery delta [conamoogam]. Considerable Bramin [q.v.] population.——*Ortnaud* (ஒரத்தநாடு - orattanádu, Tam.). From (óram, tam. side + nádu, tam. country). Town, Post office; pop. 3,035; lat. 10° 38′; long. 79° 18′; from Tanjore S.E. 14 miles. Chuttram [q.v.] erected by Rajah sarbhojee in 1800 in honor of his concubine Moocta bye, whose name it bears. Fairs every Saturday.——*Particottah* (பரித்திக்கோட்டை - parittikkóttai, Tam.). From (parutti, tam. cotton, gossypium herbaceum, linn. + kóttai, tam. fort). Trig. station; lat. 10° 41′ 40·36″; long. 79° 26′ 56·59″; height 67 feet; from Munnargoody W. 4 miles; from Tanjore E. 19 miles.——*Ponvausal* (பொன்வாசல் - ponvásal, Tam.). From (pon, tam. gold + vásal, tam. gate). Village; pop. 1,472; acres 1,189; lat. 10° 54′; long. 79° 08′; from Tanjore N.W. 9 miles.——*Poovattore* (பூவத்தூர் - púvattúr, Tam.). From (pú, tam. flower + attu, tam. small + úr, tam. village). Trig. station; lat. 10° 34′ 30·31″; long. 79° 20′ 40·98″; height 82 feet.——*Rauramoodracottah* (இராராமுத்திரைக்கோட்டை - irárámuttiraikkóttai, Tam.). From (iráyar, tam. king + mudrá, san. seal + kóttai, tam. fort). Trig. station; lat. 10° 45′ 59·75″; long. 79° 15′ 10·41″; height 137 feet; from Mauriyamman coil S.E. 2 miles; from Tanjore E. 6 miles.——*Shaulyamungalam* (சாலியமங்கலம் - sháliyamangalam, Tam. sáliyamangalam *). From (sháliyan, tam. one of the weaver caste + mangala, san. prosperity). Village, Railway station; pop. 1,336; acres 1,391; lat. 10° 47′; long. 79° 19′; height 121 feet; from Tanjore E. 10 miles. Ordinary weaving.——*Shingiputty* (சிங்கிப்பட்டி - shingippatti, Tam.). From (shingi, tam. female of the kurava tribe + patti, tam. village). Village; pop. 1,670; acres 4,245; lat. 10° 43′; long. 79° 00′; from Tanjore W.S.W. 13 miles. Former head-quarters of Deputy tahsildar and Sub-magistrate. Centre of tract inhabited by Cullar [q.v.]. Traveller's bungalow [q.v.].——*Tircautpully* (திருக்காட்டுப்பள்ளி - tirukkáttuppalli, Tam.). From (tiru, tam. sacred + kádu, tam. forest + palli, tam. village). Sanscrit name (agníshvara), meaning fire-lord, Shiva. Village, Sub-registrar's office; pop. 2,382; acres 681; lat. 10° 51′; long. 79° 00′; from Tanjore W.N.W. 13 miles. The Coodamoorty branches at this place from the Cauvery. Colonel Smith took possession of the fort in 1773, when marching from Trichinopoly against Tanjore. Old Shiva temple built by a Chola king and containing inscriptions. Fort in ruins. Fairs every Thursday.——*Tittey* (திட்டை - titte, * Tam.). Means elevated ground. Village, Railway station; pop. 971; acres 878; lat. 10° 50′; long. 79° 14′; height 128 feet; from Tanjore N.E. 4 miles.——*Trivaudy* (திருவாதி - tiruváthi, Tam.). See sep. title.——*Tutchancoorchy* (தச்சங்குறிச்சி - taççanguriççi, Tam.). From (taççan, tam. a carpenter + kuriççi, tam. village). Village, Hill; pop. 1,006; acres 2,449; lat. 10° 40′; long. 79° 02′; from Tanjore S.W. 13 miles. Out of the hill granite [caroom cull] stones are dug.——*Vellaur* (வெள்ளாறு - velláru, Tam.). See sep. title.——*Vethiarpooram* (வேதியர்ப்புரம் - véthiyarppuram, Tam.). From (véthiyan, tam. missionary + pura, san. city). Village; pop. 985; lat. 10° 43′; long. 79° 16′; from Tanjore S.E. 8 miles. Sub-station of Wesleyan methodist society. S.P.G. mission school formerly here was abolished some years ago.——*Vullam* (வல்லம் - vallam, Tam.). See sep. title.——*Yelangaud* (எளங்காடு - elangádu, Tam.). From (ilamai, tam. tenderness + kádu, tam. forest). Village; pop. 2,375; lat. 10° 50′; long. 78° 58′; from Tanjore W.N.W. 15 miles. Centre of Cullar [q.v.].——**(3)** Deputy tahsildarry, Tanjore district. Pay Rs. 100.——**(4)** Town, Head-quarters of Judge, Division, Talook, Deputy tahsildar, District moonsif, Sub-judge, Local fund engineer, Executive engineer, District surgeon, Superintendent of Police, Railway station; Tanjore dist., Tanjore tal.; pop. 54,390; lat. 10° 48′; long. 79° 11′; height 193 feet; from Combaconam S.W. 20 miles; from Madras S. 174 miles; from Mayavaram S.W. 41 miles; from Munnargoody W.N.W. 22 miles; from Negapatam W. 47 miles. The European and East indian quarters are in the suburb of Manamboo chauvady [q.v.], south-east of the fort. The native town outside the fort extends also northward about two miles to the Jamboo cauvery channel north of the Vennaur. Its greatest length south and north is about 4, and its greatest breadth east and west about 3 miles. Railway junction for Negapatam. Six miles west is Vullam, the residence of the Collector. For history see vol. II, 126. In 1860 the head-quarters of the Collector, then at Tranquebar, were removed to Tanjore; and in 1863 the District court, till then at Combaconam, was also removed to this station. Tanjore is the principal seat of the S.P.G. in the district. The memory of Schwartz is preserved by a marble monument, executed by Flaxman, which stands in the church in the small fort opposite to the Shivagunga tank. The fort, in which is situated the palace of the late Rajah, now in the occupation of his family, is the most thickly-populated part of the town, and is the residence of the principal inhabitants. It is surrounded by thick masonry walls and a deep moat, and covers an area of 530 acres; the walls are however being gradually removed. This fort also contains a fine library of 8,000 Sanscrit manuscripts. The great temple is one of the oldest in the south and has been preserved with little alteration [staupatyam]. The temple consists of two courts, one a square of about 250 feet originally devoted to minor shrines; but when the temple was fortified by the French in 1777 it was converted into an arsenal and has not been reconsecrated. The temple itself stands on a courtyard 500 feet long by about 250 in breadth. The walls of the temple are covered with inscriptions [shausanam]. Nearly all belong to the reign of Veera cholan. On entering through the two gateways at the east end of the enclosure, there is a small temple, where sacrifices are offered. A figure of the great bull Nundy [q.v.], in solid granite [caroom-cull] over 12 feet high, is directly in front of, and covered by, a mantapam [q.v.]. Further west is the great vimaunam [q.v.] containing the lingam [q.v.], with tower, 200 feet high. The base of the building is covered with inscriptions in old Tamul of the eleventh century, and one of them records the conquest by Veera cholan of Bengal and Northern india. The perpendicular part of its base measures 82 feet square. The pyramid rises in thirteen storeys to a height of 190 feet. The sculptures on the gopoorams [q.v.] relate to Vishnoo [q.v.], while everything in the courtyard is dedicated to Shiva [q.v.]. The shikharam [q.v.] of the great gopooram [q.v.] is composed of a single block of granite 25½ feet square, which was placed in position by means of an inclined plane commencing from the village of Shaurapullam, 4 miles north-east of the town. To the north-west of the enclosure is the temple of Soobramanyan [q.v.]. East of that is a Chundikaishan temple, and further east a small temple to Doorga [q.v.]. At the east fort gate is a tower called the clock-tower, with a curious device for marking the time. During the days of native government Tanjore was a principal seat of manufacturing industry as well as of fine arts. The latter have to a great extent disappeared, but manufactures, chiefly silk-weaving, continue to be carried on to a considerable extent. The Putnoolcaurar [putnool], an early colony from Goozerat, form a principal section of the population of the outside town. They turn out dyed silk [puttoo] yarn of fair quality and make fine carpets [satranjee] of silk floss. Tanjore is also noted for native jewellery [nagay, zewar], pith [solah] toys, lace-work [sarigay], embroidery and flower garlands. The principal workmen at Tanjore are brick-masons. The following are the travelling distances by road from Tanjore to different places:—

TANK (ಕೆರೆ - kere, *Can.*; చెరువు - cheruvu, *Tel.*; ചിറ - chira, *Mal.*; ஏரி - éri, *Tam.*). Portuguese Tanque, Latin Stagnum. Anglo-indian for artificial lake, being a natural depression converging at a point and banked up so as to retain the water. Sometimes in part at any rate excavated. The country abounds with these. The larger are supplied by channels [q.v.] brought from rivers [aur]. The smaller are filled by local rains [mazhay], and do not retain water for more than three or four months. When great drought prevails, small pits are dug in the beds of the tanks. Cultivation of tank-beds silts them up rapidly.

TANNAH (थाना - thána, *Hind.*). From (st'hána, san. a place). A station, especially a police station [chowky]. Tannahdar is a station-house officer.

TANOOKOO (తణుకు - tanuku,* *Tel.*). Means burning. The eastern portion of the talook is identified with old Lunka seema and the western with old Pentapaud seema.——**(1)** Talook, Godavery district. Tahsildar's pay Rs. 200. Area 372 square miles. Composed of 180 villages, 88 being Government, 65 zemindarry [q.v.], and 27 shrotriem [q.v.] agrahaurams [q.v.]. Population 204,048. Language Teloogoo. In the south of the district. Bounded:—north by Ellore and Yernagoodem tolooks, south by Narsapore and Bheemavaram talooks, east by the Vasishta branch of the Godavery and Amalaupooram talook, and

west by Colair lake and Ellore talook. Generally flat, but productive and healthy. Soil is of eight different sorts:—alluvial, permanently improved, regar [q.v.] pure, regar loamy, regar sandy, red clay, red loamy, and red sandy [munn]. Products are chiefly paddy [q.v.], gram [q.v.], gingelly [q.v.] and lamp-oil [q.v.] seeds, hemp [kinnab], coriander [cassibor], fenugreek [maitee], mustard [rayaun], zonna [cholum], cumboo [bajrah], raggy [q.v.], tobacco [pogauk], chillies [q.v.], onions [piyauz], garlic [lussoon], turmeric [country saffron] and cotton [q.v.]. No special industry, the chief trade being in paddy, grain and cotton. There is also toddy drawing and manufacture of arrack [q.v.] and jaggery [q.v.] from toddy [q.v.]. There is a perfect supply of anicut [q.v.] irrigation [pauchal]. The chief canals are the Caucarparroo canal, the Vencayya canal, part of the Ellore canal, Gostanuddy canal and the Attily canal. These are available both for irrigation and navigation. From these several branch channels [q.v.] have been cut for the supply of water. Zemindarry:—Nidadvole. Places of archæological interest:—Attily, Cantair, Caucarparroo, Caunore, Chebrole, Condwapaud, Cundavilly, Doovva, Iragavaram, Mandapauca, Maumoodore, Maurcandapaud, Mooccaumala, Moonipulley, Mullepoody, Mulleshwaram, Nidadvole, Paikair, Pandlaparroo, Paulangy, Pendyaul, Penoogonda, Penoomuntra, Pentapaud, Pipparroo, Rameshwaram, Relangy, Taitaly, Tanookoo, Vaimavaram, Velpoor, Vijayeshwaram, Vipparroo, Yilindraparroo, Zoottiga. The leading places, &c., in the talook are the following.——*Attily* (అత్తిలి - attili, Tel.). From (atti, tel. fig tree, ficus glomerata, miq.). Sanscrit corruption (átréyapurí), meaning atreyan, the sage + town. Town; pop. 7,365; acres 5,338; lat. 16° 41′; long. 81° 39′; from Cocanada W.S.W. 45 miles; from Tanookoo S.W. 7 miles. Two old temples. Once had a fort. The Attily canal 15¾ miles long is navigable to this village. Weekly market on Thursdays and Fridays.——*Caucarparroo* (కాకరపర్రు - kákaraparru, Tel.). From (kákara, tel. momordica charantia, linn. + parra, tel. swamp). Village, Canal; pop. 1,912; acres 1,487; lat. 16° 46′; long. 81° 47′; from Cocanada W.S.W. 34 miles; from Tanookoo E.N.E. 4 miles. Two old temples founded by Rajah narendran, a Chola king. Old temple of Seetay. The canal is a branch of the western main delta canal. Much resorted to for bathing in the Godavery. Mango [q.v.] and plaintain [q.v.] gardens abound.——*Chettipett* (శెట్టిపేట - shettipéta, Tel.). From (shetti, tel. merchant caste + péta, tel. suburb). Zemindarry village; pop. 1,987; acres 2,082; lat. 16° 52′; long. 81° 43′; from Cocanada W. 37 miles; from Tanookoo N. 8 miles. Weir in connection with the Western delta main canal, which separates here into the Caucarparroo and Ellore canals. Head-quarters of Executive engineer, western division.——*Cundavilly* (ఖండవిల్లి - khandavilli, Tel.). From (khandamu, tel. sugar-candy + palli, tel. village). Village; pop. 4,171; acres 3,386; lat. 16° 43′; long. 81° 48′; from Cocanada W.S.W. 35 miles; from Tanookoo S.E. 5 miles. Old temple. On Vasishta godavery. Has an extensive lunka [q.v.]. Plaintain [q.v.] and mango [q.v.] gardens abound.——*Doovva* (దువ్వ - duvva, Tel.). Means dust. Village; pop. 4,029; acres 4,446; lat. 16° 47′; long. 81° 39′; from Cocanada W.S.W. 42 miles; from Tanookoo W.N.W. 5 miles. Temples of great antiquity. A river named Veyyair runs by the side.——*Godavery* (గోదావరి - gódávari, Tel.). See sep. title.——*Gostanuddy* (గోస్తనది - góstanadi, Tel.). See sep. title.——*Mooccaumala* (ముక్కామల - mukkámala, Tel.). From (mukku, tel. nose + mala, tel. hill). Government village; pop. 2,096; acres 2,024; lat. 16° 45′; long. 81° 48′; from Cocanada W.S.W. 34 miles; from Tanookoo E. 5 miles. Old temples.——*Nidadvole* (నిడదవోలు - nidudavólu, Tel.). See sep. title.——*Penoogonda* (పెనుగొండ - penugonda, Tel.). From (penu, tel. great + konda, tel. hill). Town; pop. 4,179; acres 2,749; lat. 16° 39′; long. 81° 47′; from Cocanada S.W. 38 miles; from Tanookoo S.S.E. 8 miles. North of Narsapore canal on the road to Rajahmundry. This road called Forbes' road joins the river bank at Caucarparroo. Former residence of a zemindar [q.v.]. Four temples. Large temple of Comaties [q.v.] largely resorted to by the caste [jauty].——*Pentapaud* (పెంటపాడు - pentapádu, Tel.). See sep. title.——*Rameshwaram* (రామేశ్వరం - rámēshvaram, Tel.). From (ráma, san. the god + íshvara, san. lord); after shiva, rama's lord. Village, Place of pilgrimage; pop. 997; acres 977; lat. 16° 39′; long. 81° 41′; from Cocanada W.S.W. 44 miles; from Tanookoo S.S.W. 7 miles. On the Gostanuddy. Temple of Rameshwara sawmy. Ancient temples. Largely attended festival at Shivarautry [pundigay, 6a].——*Relangy* (రేలంగి - rélangi, Tel.). From (relu, tel. reed, saccharum spontaneum, linn. + angu, tel. beauty). Zemindarry village; pop. 5,467; acres 3,927; lat. of village 16° 42′; long. 81° 41′; from Cocanada W.S.W. 42 miles; from Tanookoo S.W. 5 miles. On the Gostanuddy. Ancient temple.——*Tanookoo* (తణుకు - tanuku, Tel.). See below.——*Teeparroo* (తీపర్రు - típarru, Tel.). From (tippa, tel. elevation + arru, tel. neck). Zemindarry village; pop. 1,333 acres 1,027; lat. 16° 47′; long. 81° 47′; from Cocanada W.S.W. 34 miles; from Tanookoo N.E. 4 miles. On the Godavery.——*Velpoor* (వేల్పూరు - vélpúru, Tel.). From (vélpu, tel. angel + úru, tel. village). Town; pop. 6,649; acres 2,057; lat. 16° 43′; long. 81° 42′; from Cocanada W.S.W. 40 miles; from Tanookoo S.S.W. 3 miles. On the Gostanuddy. Temple with two inscriptions.——*Vijayeshwaram* (విజయేశ్వరము - vijayéshvaramu, Tel.). From (vijaya, san. victory + íshvara, san. lord). Zemindarry; pop. 1,286; acres 663; lat. 16° 55′; long. 81° 46′; from Cocanada W. 33 miles; from Tanookoo N.N.E. 12 miles. Two old temples held sacred. The Vijayeshwaram division of the Godavery anicut [q.v.], constructed in 1849, extended from Maddore island to Chigooroo island, adjoining the right bank of the river. The whole breadth of the river at this spot is 7,000 yards, or 4 miles.——*Zoottiga* (జుత్తిగ - dzuttiga, Tel.). From (dzutta, tel. a span). Zemindarry village; pop. 1,195; acres 1,880; lat. 16° 39′; long. 81° 42′; from Cocanada W.S.W. 43 miles; from Tanookoo S. 7 miles. Ancient temples. Inscriptions. Situated on the Gostanuddy.——**(2)** Village, Talook head-quarters. It contains the District moonsif's court and the Sub-registrar's office; Godavery dist., Tanookoo tal.; pop. 3,801; acres 3,988; lat. 16° 45′; long. 81° 44′; from Cocanada W.S.W. 38 miles; from Coonavarem S.S.E. 62 miles; from Ellore E. 38 miles; from Madras N.N.E. 264 miles; from Narsapore N. 21 miles; from Rajahmundry S.S.W. 18 miles. Temples of Keshava sawmy and of Siddheshwarasawmy.

TANTAH (ٹنٹا - tantá, *Hind.*). Disturbance [tagaraur].

TAP (तप् - tap, *San.*). To heat.——*Tapas* (तपस् - tapas, San.; تپس - tapas, Hind.; தவசு - tavasu, Tam.). Penance. Its merit is proportioned to its length and severity. Its power controls alike gods and men. There are three modes of merit [mocsham]:—carmam [q.v.], bhacty [q.v.], nyaunam [q.v.], or works, faith, wisdom. Carmam includes sacrifices [yanyam], pilgrimage [yautray], bathing [snaunam] and penance. Compare the following from Cooral [q.v.], which inclines however always to internal rather than to external self-mortification:—*உற்ற நோய் நோன்ற லுயிர்க்குறுகண் செய்யாமை யற்றே தவத்திற் குரு*—"the nature of religious discipline consists "in the endurance by the ascetic of the sufferings which it brings "on himself, and in abstaining from giving pain to others."—*வேண்டிய வேண்டியாங் கெய்தலாற் செய்தவ மீண்டு முயலப் படும்*—"religious discipline is practised in this world, "because it secures the attainment of whatever one may wish to "enjoy in the world to come."—*தவஞ்செய்வார் தங்கருமஞ் செய்வார்மற் றல்லா ரவஞ்செய்வா ராசையுட் பட்டு*—"those discharge their duty who perform austerities, all others "accomplish their own destruction through the entanglement "of desire."—*சுடச்சுடரும் பொன்போ லொளிவிடுந் துன்பஞ் சுடச்சுட நோற்கிற் பவர்க்கு*—"just as gold is "purified when heated in the fire, so will those shine who have "endured the burning of pain in frequent austerities."—*தன்னுயிர் தானறப் பெற்றானை யேனைய மன்னுயி ரெல்லாந் தொழும்*—"all other creatures will worship him who has "attained the control of his own soul."—*தவமறைந் தல்லவை செய்தல் புதன்மறைந்து வேட்டுவன் புட்சிமிழ்த் தற்று*—"he who hides himself under the mask of an ascetic "and commits sins, is like a sportsman who conceals himself in "the thicket to catch birds."—*புறங்குன்றி கண்டனைய ரேனு மகங்குன்றி மூக்கிற் கரியா ருடைத்து*—"the world contains "persons whose outside appears as the red berry of the abrus "[indian liquorice], but whose inside is as black as the nose of "that berry."—*மழித்தலு நீட்டலும் வேண்டா வுலகம் பழித்த தொழித்து விடின்*—"there is no need of a shaven "crown nor of tangled hair, if a man abstain from those deeds "which the wise have condemned."—*கொல்லா நலத்தது நோன்மை பிறர்தீமை சொல்லா நலத்தது சால்பு*—"penance consists in the goodness that kills not, and perfection "in the goodness that tells not others' faults."—*சால்பிற்குக் கட்டளை யாதெனிற் றோல்வி துலையல்லார் கண்ணுங் கொளல்*—"the touch-stone of perfection is to receive a defeat "even at the hands of one's inferior."——*Tapolocam* (तपोलोक - tapóloka, San.). From (tapas, san. penance + lóka, san. world). One of the seven upper worlds [locam]. The sphere of penance, inhabited by Veibhraujans or deified sages shining with high penitential merit and lustre and who are unconsumable by fire.——*Taptapauny* (తప్తపాణి - taptapáni, Tel.). From (tapta, san. hot + páníya, san. water). Village; Zemindarry tracts, Chinna kimedy zemindarry; lat. 19° 28′; long. 84° 26′; from Chetterpore W.N.W. 40 miles; from Russellcondah S.S.W. 33 miles. Hot water spring half way up Eastern ghaut [q.v.] above Poudamary. The temperature is 110°, and strong sulphurous vapour. Occasional pilgrimages. Source of the Godahaddoh which eventually falls into the Rooshcoolya.——*Taupasan* (तापस - tápasa, San.). Sage. Cf.:—Cordia sp. (tapasimara), sage's tree; Terminalia catappa (tápasataruvu), sage's tree. See gloss. paragraphs.——*Tupsee* (تپسی - tapsí, Hind.). From long hairs about the mouth looking like a penitent. The Robaul [q.v.]. Otherwise the Pilgrim fish, from going up ganges to benares; also Mango fish, from abounding in the ganges about mango season.

TAPKAH (ٹپکا - tapká, *Hind.*). From (tapakná, hind. to drop). Dripping of water. The best wells in hill forts.

TAPPAH (ٹپّہ - tappah, *Hind.*). Means a leap. A ballad, or a mode in music.

TAPPATTAY (ڈھپڑی - dhaptí, *Hind.*; తప్పెట - tappeta, *Tel.*; தப்பட்டை - tappattai, *Tam.*). From (tappu, tam. to clap). A large drum [paray].

TAPPAUL (ٹپّال - tappál, *Hind.*). From (táppá, mahr. place where letters are stamped + álaya, san. house). A halting place [majil]. Post stage. Thence, the letters delivered [anchey].

TAR (تر - tar, *Hind.*). Moist.——*Tarai* (ترائی - tarái, Hind.). Marshy ground.——*Tooranj been* (ترنجبین - turanjbín, Ar.). From (above + angabín, pers. honey). Arabian manna.

TARAF (طرف - taraf, *Hind.*). From arabic. A side, quarter. Division of a talook [firkah, talook, tookady]. Compare Zillah. A tarafdar means often generally a superintendent.

TARAM (طرح - tarah, *Hind.*; తరము - taramu, *Tel.*; தரம் - taram, *Tam.*). From (tara, san. suffix of comparison). Sort, kind or class. Especially applied to the classification of soils [munn]. As the latter have been assessed with regard to their classification the word is sometimes loosely and improperly used for the assessment [teervay] itself. Taram cummy is a reduction from taram assessment. Taramdar is a person who superintends the classing of lands, classifier. Taram jausty is an extra tax. Tara teervay is the assessment assigned to a particular class of land. See vol. I, 112.

TARCAM (तर्क - tarka, *San.*). From (tark, san. to infer). Logic [mantik]. A regular argument or complete syllogism, nyauyam [q.v.], consists of five members, avayavam, or component parts. First, the Proposition, pratinyay; second, the Reason, haitoo or apadesham; third, the Instance, oodauharanam or nidarshanam; fourth, the Application, oopanayam; fifth, the Conclusion, nigamanam. Example:—This hill is fiery; for it smokes; what smokes, is fiery, as a culinary hearth; accordingly the hill is smoking; therefore it is fiery.

TARDOOD (تردد - taraddud, *Hind.*). From (radda, ar. to go to and fro). Exertion, cultivation [vellaumay].

TARIFF (تعریف - taríf, *Hind.*). From (arafa, ar. to know). Determination, table of rates of duties.

TARISS (தரிசு - tarisu, *Tam.*). From (tari, tam. to stop); place where cultivation is suspended. Waste land [bunjar, haul, paul].——*Terriote* (തരിയോട്ട് - tariyóttu, Mal.). Oblique form of Tariyagam. From (tari, mal. uncultivated + akam, mal. inside). Village; Malabar dist., Wynaud tal.; lat. 11° 39′; long. 76° 03′; from Calicut N.E. 32 miles; from Manantoddy S. 10 miles. Has a Chuttram [q v.].

TARJOOMA (ترجمہ - tarjumah, *Hind.*). From (tarjamah, ar. to interpret). Translation [mozhipeyarpp]. Tarjoomaun is a translator [doobaush], whence Dragoman [q.v.].

TARLAH (తర్లా - tarlá, *Tel.* tarlá*). Ancient zemindarry, Village; Ganjam dist.; pop. 27,035; pop. of village 1,010; area 55 square miles; lat. of village 18° 48′; long. 84° 27′; from Chetterpore S.W. 54 miles; from Chicacole N.E. 47 miles; from the sea W. 9 miles. South of Mundasa. Bounded south by Tekkaly, and west by Parlakimedy. The family originally came from Nagpore and entered the service of the kings of Orissa. The first zemindar's father was killed in battle at Conjeeveram, and Poorshottama gajapaty deo made over the estate to his son, Sadausena soor in A.D. 1436. Number of villages about sixty. Tolerably level and well supplied with water. Peshcush [q.v.] Rs. 4,000. Contains Moorkhy trig. station.

TAROW (ٹھہراؤ - tharáo, *Hind.*; తరావు - t'harávu, *Tel.*). From (t'haraném, mahr. to become fixed). Settlement. The fixed assessment [teervay] of a village based on average collections for the preceding sixteen or seventeen years. Otherwise Sarausary [q.v.] system. Especially the assessment in Canara settled by the English in A.D. 1819. See vol. I, 112.

TARP (ತರ್ಪ - tarpa, *Can.*). Waist cloth of Todahs [q.v.].

TARPANAM (तर्पण - tarpana, *San.*). From (trip, san. to be satisfied). Satisfaction. Propitiatory libations of water to manes of a deceased [pitry], with Til [q.v.] seeds and Coosham [q.v.] grass. Otherwise Neer cadan or water duty; also Oodaca kriyay or water ceremony; also Pitry yanyam or sacrifice to ancestors. Done every Amavausyay [q.v.] and at other times [pundigay, 6d].

TARRY (वेम - véma, *San.*; تانت - tánt, *Hind.*; మగ్గము - maggamu, *Tel.*; തറി - tari, *Mal.*; தறி - tari, *Tam.*). Title from tamul. San. from (vé, san. to weave). Hind. from (tantu, san. thread). Loom [nesavoo].

TARWAR (तरवड - taravada, *Mahr.*; ترور - tarwar, *Hind.*). Same as Tungaid.

TARWAUD (തറവാട് - taravátu, *Mal.*). From (tara, mal. village + pátu, mal. place) [teroo]. Originally one of the heads in the Shoodra village or tara [q.v.] of Malabar. Hence the place of abode of such householder. Hence the joint family as opposed to the village community. In former times each petty rajah under the great Swaroopam [q.v.] rajahs ruled his own portion of territory, designated a Naud [q.v.] or country, and was styled Naudvauly [q.v.] or Boynore [vauzhnore]. Subordinate to the Naudvaulies came other still smaller rulers, who as Deshavaulies administered each his own Deshom [q.v.], which might be styled a parish. Subordinate to the Deshom came the Tara. Sub-divisions of the Tara were the family Tarwauds. Sub-divisions of the Tarwauds were the Tauveries [q.v.]. A Tarwaud corresponds with what the Romans called a gens; with this distinction that whereas in Rome all members of the gens traced their descent from a common ancestor, in Malabar the members of a tarwaud trace their descent from a common ancestress. The large tarwauds set apart property for the common use. So long as that common property exists, an indefinite number of private families may be comprised in the tarwaud. Every member of a tarwaud has an equal share in the common stock; the infant as much as the aged. No member can claim his share, but the tarwaud as a body can make such division as it pleases of the common stock. When partition takes place, the tarwaud becomes disintegrated into as many tarwauds as the members may have settled to form among themselves. This process of disintegration goes on continually, except among the highest classes, who pride themselves in maintaining a large common stock. But even among the highest classes there are as above said in the tarwauds sub-divisions, locally known as Tauveries or branches [tauvery]. A member, with perhaps some assistance from the common stock but more usually with the assistance obtained from his father who under the Maroomakkatoyem [q.v.] system stands in no recognized legal relation to his children, leaves the tarwaud house and lives apart, taking with him one or more female relatives usually a sister or sisters and thus founding a separate tauvery. When a tauvery branch of a Rajah's family is thus founded, it is styled a Covilagam [q.v.]. That word inflected becomes Covilagatt and in speaking the word is pronounced as if it were Coilote; hence the word Culote as written in the old records. Within the tarwaud the entire property is managed by its senior member [carnaven] for the benefit of the family [anandraven]. In inheritance of status in the tarwaud, all tarwauds follow the Maroomakkatoyem [q.v.] rule or descensus a matrice. In theory the property is held to vest in the females only, the males having right of management and claim to support. Practically the males are co-sharers with the females. All members of the family, even the remotest, are entitled to maintenance. The rights of the junior members of a Malabar family are the right of the males to succeed to the headship by seniority, and the right of the males and females to be supported in the family house. A separate maintenance is not allotted to a junior member who voluntarily and without lawful excuse separates himself or herself from the family [maryauday]. See vol. II, 101.——**(1)** The following are the principal Tarwauds in North malabar, with the talook indicated.——*Aralatt numbiyaur* (അറളത്ത് നമ്പ്യാർ - aralattunampyár, Mal.), Cottayam.——*Arattil cundote numbiyaur* (അറത്തിൽ കണ്ടോത്ത് നമ്പ്യാർ - arattilkantóttunampyár, Mal.), Cottayam.——*Arayat numbiyaur* (അരയത്ത് നമ്പ്യാർ - arayattunampyár, Mal.), Chiracal.——*Arayedatt numbiyaur* (അരേടത്ത നമ്പ്യാർ - arétattunampyár, Mal.), Chiracal.——*Arikkara nayar* (അരിക്കരനായർ - aríkkaranáyar, Mal.), Cooroombranaud.——*Ayicote mauvilye numbiyaur* (അഴിക്കോട്ട് മാവിലായിനമ്പ്യാർ - azhikkóttumáviláyinampyár, Mal.), Chiracal.——*Ayilat numbiyaur* (ആയില്യത്ത് നമ്പ്യാർ - áyilyattunampyár, Mal.), Chiracal.——*Capiyatt numbiyaur* (കാപ്പിയത്ത് നമ്പ്യാർ - kapiyattunampyár, Mal.), Chiracal.——*Caunyirote kidauv* (കാഞ്ഞിരോട്ട് കിടാവ് - kaññiróttukitávu, Mal.), Cooroombranaud.——*Chaulal veetil numbiyaur* (ചാലലവീട്ടിൽ നമ്പ്യാർ - chálalavíttilnampyár, Mal.), Chiracal.——*Chaulayil cundote numbiyaur* (ചാലയിൽ കണ്ടോത്ത് നമ്പ്യാർ - chálayilkantóttunampyár, Mal.), Chiracal.——*Chauttote numbiyaur* (ചാത്തോത്ത് നമ്പ്യാർ - cháttóttunampyár, Mal.), Chiracal.——*Cheriyatt numbiyaur* (ചെറിയത്ത് നമ്പ്യാർ - cheriyattunampyár, Mal.), Cooroombranaud.——*Coonnat veetil numbiyaur* (കുന്നത്തുവീട്ടിൽ നമ്പ്യാർ - kunnattuvíttilnampyár, Mal.), Chiracal.——*Coonnatt edattil numbiyaur* (കുന്നത്തെടത്തിൽനമ്പ്യാർ - kunnattetattilnampyár, Mal.), Cottayam.——*Cooroocaut coorpoo* (കുറുക്കാട്ടുകുറുപ്പ് - kurukkáttukuruppu, Mal.), Cooroombranaud.——*Cootauly tayatveetil numbiyaur* (കൂടാളിതാഴത്ത് വീട്ടിൽ നമ്പ്യാർ - kútálitázhattuvíttilnampyár, Mal.). Cottayam.——*Coottipoorat poolairy coorpoo* (കുറ്റിപ്പുറത്തുപൂലേരികുറുപ്പ് - kuttippurattupúlérikkuruppu, Mal.), Cooroombranaud.——*Coottyanttore maunikatt numbiyaur* (കുറ്റിയാറ്റൂർമാണിക്കത്ത് നമ്പ്യാർ - kuttiyáttúrmánikkattunampyár, Mal.), Chiracal.——*Coottyauttorekelote numbiyaur* (കുറ്റിയാറ്റൂർ കേളോത്ത നമ്പ്യാർ - kuttiyáttúrkélóttunampyár, Mal.), Chiracal.——*Cottaurat numbiyaur* (കൊട്ടാരത്ത് നമ്പ്യാർ - kottárattunampyár, Mal.), Cottayam.——*Coykil yedattil numbi-*

yaur (കൊഴുകിൽ എടത്തിൽനമ്പ്യാർ - kozhukiletattilnampyár, Mal.), Cottayam.——*Culyaut numbiyaur* (കല്യാട്ട് നമ്പ്യാർ - kalyáttunampyár, Mal.), Chiracal.——*Cundote nayar* (കണ്ടോത്തു നായർ - kantóttunáyar, Mal.), Cooroombranaud.——*Keipattore yedam nayar* (കൈപ്പത്തൂരെടംനായർ - kaipattúretamnáyar, Mal.), Cooroombranaud.——*Keipautt kidauv* (കൈപ്പാട്ടകിടാവ് - tkaippáttukitávu, Mal.), Cooroombranaud.——*Keithairy chandrote numbiyaur* (കൈതേരിചന്ത്രോത്ത് നമ്പ്യാർ - kaitérichantróttunampyár, Mal.), Cottayam.——*Keithairy kelote numbiyaur* (കൈതേരികേളോത്ത് നമ്പ്യാർ - kaitérikélóttunampyár, Mal.), Cottayam.——*Keithairy yedattil numbiyaur* (കൈതേരിഎടത്തിൽനമ്പ്യാർ - kaitérietattilnampyár, Mal.), Cottayam.——*Mangoottil nayar* (മങ്കൂറ്റിൽനായർ - mankúttilnáyar, Mal.), Cooroombranaud.——*Manmily kidauv* (മന്മിളികിടാവ് - manmilikkitávu, Mal.), Cooroombranaud.——*Moorchilote croopoo* (മൂർച്ചിലോട്ടുകുറുപ്പ് - múrççilóttukuruppu, Mal.), Cooroombranaud.——*Naurangapoorat nayar* (നാരങ്ങാപ്പുറത്തു നായർ - nárannáppuratunáyar, Mal.), Cottayam.——*Nettore chauttote numbiyaur* (നെട്ടൂർചാത്തോത്ത് നമ്പ്യാർ - nettúrcháttóttunampyár, Mal.), Chiracal.——*Ningilairy numbiyaur* (നിങ്കിലേരി നമ്പ്യാർ - ninkilérinampyár, Mal.), Cottayam.——*Nul'acundy corote numbiyaur* (നല്ലകണ്ടികോരോത്ത് നമ്പ്യാർ - nallakantikoróttunampyár, Mal.), Chiracal.——*Padinyautt edattil nayar* (പടിഞ്ഞാറെടത്തിൽ നായർ - pattiññáttetattilnáyar, Mal.), Cooroombranaud.——*Panoly numbiyaur* (പനോളിനമ്പ്യാർ - panólinampyár, Mal.), Cottayam.——*Paryaurattedavan numbiyaur* (പരിയാരത്തെടവൻനമ്പ്യാർ - pariyárattetavannampyár, Mal.), Chiracal.——*Pooliairy ola* (പുളിയേരിഓല - puliyérióla, Mal.), Cooroombranaud.——*Poolyote nayar* (പുളിയോത്ത് നായർ - puliyóttunáyar, Mal.), Cooroombranaud.——*Poonooredattil kidauv* (പൂനൂരെടത്തിൽകിടാവ് - púnúretattilkitávu, Mal.), Cooroombranaud.——*Poothoocherry kidauv* (പുതുശ്ശേരി കിടാവ് - putushshérikitávu, Mal.), Cooroombranaud.——*Punyote numbiyaur* (പന്നിയോട്ട് നമ്പ്യാർ - panniyóttunampyár, Mal.), Cottayam.——*Puttanore yedattil numbiyaur* (പട്ടാനൂരെടത്തിൽ നമ്പ്യാർ - pattánúretattilnampyár, Mal.), Cottayam.——*Tekkedatt nayar* (തെക്കേടത്ത് നായർ - tekkétattunáyar, Mal.), Cooroombranaud.——*Tirwott poolairy coorpoo* (തിരുവത്ത് പൂലേരി കുറുപ്പ് - tiruvattupúlérikuruppu, Mal.), Cooroombranaud.——*Tutchinayinola* (തച്ചിനായിനോല - taççináyinóla, Mal.), Cooroombranaud.——*Vannatancundy numbiyaur* (വണ്ണത്താങ്കണ്ടി നമ്പ്യാർ - vannattánkantinampyár, Mal.), Cooroombranaud.——*Vauricara nayanaur* (വാരിക്കര നായനാർ - várikkaranáyanár, Mal.), Chiracal.——*Vauyote kidauv* (വായോത്ത് കിടാവ് - váyóttukitávu, Mal.), Cooroombranaud.——*Velloova chautote numbiyaur* (വെള്ളുവചാത്തോത്ത് നമ്പ്യാർ - elayáttu, Mal.), Palghaut.

TASDIK (تصديق - tasdík, *Hind.*). From (sidk, ar. truth). Attestation.

TASHEEA (تصحيح - tashíh, *Ar.*). From (sahha, ar. to verify). Muster.——*Tasheea nauma* (تصحيح نامه - tashíhanámah, Hind.). From (above + námah, pers. deed). Deed conferring the privilege of maintaining cavalry [sawaur] under Mahomedan rulers.

TASSAH (تاسه - thassá, *Hind.*). From (thánsná, hind. to stuff). A mould, seal, stamp [moodray, sicca].

TAT (तत् - tat, *San.*). That.——*Tadbhavam* (तद्भव - tadbhava, San.). From (above + bhava, san. birth). Means sprung from that. A Dravidian word derived from Sanscrit, but much altered; as in English from ratio, reason. If a word is only altered in the termination, this is denominated Tatsamam [q.v.] or equivalent; as in the English from ratio, ration. Some Sanscrit words, like some Latin or Greek words in English, are used without any alteration [bhaushay].——*Tadeikyam* (तदैक्य - tadaikya, San.). From (above + aikya, san. union). Unity, or the union of identification [sanyoojyam], as Samyogam is that of contiguity [matam].——*Tanmautram* (तन्मात्र - tanmátra, San.). From (above + mátra, san. measure), only so much; merely that. That in which its own peculiar property resides without change or variety. Subtile element of matter, of which there are five, viz:—Shabdam, sound; Sparsham, torch;

Roopam, form; Rasam, taste; Gandham, smell. These are the archetypes or rudimentary principles from which the five gross elements, otherwise Maha bhootam or Puncha bhootam [q.v.], are evolved; correspond nearly to the πρῶτα στοιχεῖα of Plato. For more details see Saunkhyam and Tatwam.——*Tatparam* (तत्पर - tatpara, San.). From (above + para, san. beyond). A speck. Measure of solar time. 100 trooties or atoms = 1 tatparam or speck; 30 tatparams = 1 nimisham or twinkling [caulam]. Approximate actual value, 1 tatparam = $\frac{2}{675}$ of an english second.——*Tatparan* (तत्पर - tatpara, San.). From (above + para, san. best). Shiva [q.v.], the self-existent.——*Tatsamam* (तत्सम - tatsama, San.). From (above + sama, san. equal). Means equal to that. Pure sanscrit words [tadbhavam]. The Atarvana vyaucaranam or grammar has as follows:—"The "adherents of Andhra vishnoo who then resided on the banks "of the Godavery spoke Tatsamam words. In the course of "time these words, not being properly articulated by the "unlearned, by the change or obliteration of letters, or by "being contracted, a fourth, or a half, became Tadbhavams "[q.v.]. Those words consisting of nouns, verbals, and verbs, "created by the God Bramha [q.v.], before the time of "Hary [q.v.], the lord of Andhram, are called Atchams or pure." ——*Tatwabodhacar* (तत्त्वबोधक - tattvabódhaka, San.; தத்துவ போதகன் - tattuvabóthagan, Tam.). From (tatva, san. truth + bhódhaka, san. teacher). Robert de Nobili. Roman catholic missionaries accompanied the Portuguese expeditions to India, and one of these a jesuit Robert de Nobili or Nobilibus nephew of Cardinal Bellarmine, proceeded to Madura in 1606. He was a distinguished Sanscrit and Tamul scholar. The following is a list of his writings:—Anitya nitya vyatyausam, Autma nirnayam, Cadavool nirnayam, Dooshana dhicauram, Jesoonauthar charitram, Muntramaulay, Muntra vyaukhyaunam, Neetitchol, Nitya jeeva sallaupam, Nyauna deepicay, Nyaunopadesha caundam, Parama sootchmaubhiprauyam, Poonar jenmaucshaipam, Prapuncha virodha vyatyausam, Satyaveda lutchanam, Shacoona nirvauranam, Tapashatam, Tatwa cunnaudy. He founded a mission at Madura A.D. 1624 during the reign of Trimal naick [q.v.]. He was supported by the College of Rome de propaganda fide, founded in 1622 by Pope Gregory XV [veeramaumoony]. ——*Tatwam* (तत्त्व - tattva, San.). From (above + twa, san. suffix of quality). Primordial and eternally existing essence. The saunkhyas reckon twenty-five tatwams or metaphysical entities. For the catalogue see Saunkhyam. The sheivas postulate ninety-six tatwams or constituent principles in nature or operations whether of deity or of creatures, including elements, bodily and mental organs, faculties, matter, &c. According to the Chatoor acarauthy [q.v.] they are the five bhootams [q.v.] or elements, the five poolans or objects of senses [vishayam], the five organs of action or carmendriyam [q.v.], the five organs of perception or nyaunendriyam [q.v.], the four intellectual faculties or antah caranam [q.v.]; these twenty-four being called autmatatwam or powers of the soul [autmam]; the ten naudies or nerves, the five states of soul or avastays [q.v.], the three principles of moral evil, the three cosmic qualities or goonams [q.v.], the three mundalams or regions of sun, moon and fire, the three humours of body [pittam, sheetam, vautam], the eight vicaurams or predominant passions, the six audhaurams or stations of soul [shatstalattaun], the seven dhautoos or constituent elements of body, the ten vayoos [q.v.] or vital airs, the five coshams [q.v.] of soul, the nine doors or vents of body. ——*Tatwa nyaunam* (तत्त्वज्ञान - tatvaññána, San.). From (tatva, san. truth + ñána, san. knowledge). Philosophy.——*Tatwa vivechiny* (तत्त्वविवेचिनी - tattvavivéchiní, San.). From (tatva, san. truth + vivich, san. to discriminate). Vernacular newspaper.

TATAUCAM (तटाक - tatáka, *San.*). From (tat, san. to rise). Pond deep enough for the lotus [nelumbo] and other aquatic flowers [indian water-lily].

TATT (ٹٹو - tattú, *Hind.*). A pony [ghorah]. There is a Tamul proverb:—எண்ணப்பட்ட குதிரை எல்லாம் மண்ணைப் போட்டுக்கொள்ள, தட்டுவாணிக்குதிரை வந்து கொள்ளுக்கு அழுகிறதாம்—"whilst horses of the first class lick the ground the miserable tatt is neighing for gram [q.v.]."

TATT (தட்டு - tattu, *Tam.*). To beat.——*Tatta* (తట్ట - tatta, Tel.). Flat.——*Tattammavauroo* (తట్టమ్మవారు - tattammavàru, Tel.). From (tatta, tel. flat + ammavàru, tel. small-pox); flat eruptions. Measles.——*Tattaun* (தட்டான் - tattán, Tam.). From (tattu, tam. to beat). Goldsmith. The corresponding terms are:—Tel. cumsala, Can. acasauly, Mal. tattaur [jauty]. ——*Tuttapaumb* (دریاکا سانپ - daryákásámp, Hind.; ಸಮುದ್ರಹಾವು - samudrahávu, Can.; తట్టపాము - tattapámu, Tel.; കടൽപാമ്പ് - katalpámbu, Mal.; கடற்பாம்பு - kadarbámbu, Tam.). Hind. from (daryá, hind. sea + sámp, hind. snake). Can. from (samudra, can. sea + hávu, can. snake). Tel. from (tatta, tel. flat + pámu, tel. snake). Mal. and Tam. from (katal, tam. sea + pámbu, tam. snake). The terms may be considered representative of the family Hydrophidæ, ophidii, colubriformes venenosi, ophidia [sarpam], reptilia [sarpy, 28], of naturalists [jantoo]. The Tuttapaumbs or Hydrophidæ pass their whole life in the water; soon die when brought on shore. Most striking feature in the organization is their elevated and compressed tail. The hind part of the body, and sometimes forwards to beyond the middle of its length, is also compressed, and the belly forms a more or less sharp ridge. Their tail answers all the purposes of the same organ in a fish, and their motions in the water are almost as rapid as they are uncertain and awkward when removed out of their proper element. Their nostrils are placed quite at the top of the snout, as in crocodiles [mugger] and in fresh-water snakes [tunny paumb], so that they are enabled to breathe whilst the entire body and the greater part of the head are immersed in the water. They have very capacious lungs, by retaining a portion of the air in these extensive lungs, they are enabled to float on the surface of the water without the slightest effort. The scales of the sea-snakes are different from those of other snakes; they overlap one another in only a few species. The eye is small, with round pupil, which is so much contracted by the light when the snake is taken out of the water that the animal becomes blinded and is unable to hit any object it wants to strike. The tongue is short. Food consists entirely of small fish. All these animals are killed by the poison of the snake before they are swallowed; belong to the most poisonous species of the whole order. They are extremely shy and swim away on the least alarm; cannot endure captivity; viviparous. The young are more brightly colored than the adult. They have formidable enemies in the sea-eagles [machrangah], in sharks [soorah], and in other large raptorial fishes. The greatest size some species attain is about 12 feet. They are all venomous, and inhabit the salt-water estuaries and tidal streams. The fishermen know their dangerous properties and carefully avoid them. The Platurus is a transitional stage between the sea and land snakes. The following are the chief South indian known genera:—Enhydrina [vaulakidy]; Hydrophis [chittal]; Pelamis [nullavaulagily]; Platurus [sea bungaur].

TATTOO (தத்து - tattu, *Tam.*). Leap.——*Tatta* (തത്ത - tatta, Mal.). Parrot.——*Tattamungalam* (തത്തമംഗലം - tattamannalam, Mal.). From (tatta, mal. parrot + mangala, san. prosperity). Village; Cochin state, Chittoor tal.; pop. 8,741; lat. 10° 41′; long. 76° 45′; from Chittoor S.W. 3 miles; from Trichore E.N.E. 34 miles; from Ernacolum N.E. 56 miles; from the sea E. 51 miles. The Ponnany river goes by the name of Tattamungalam near this place.——*Tattoo kily* (جراد - jarád, Ar.; ملخ - malakh, Pers.; ٹڈا - tiddá, Hind. and Dec.; ಮಿಡತೆ - midite, Can.; ಮೊಂಟೆ - monte, Too.; మిడత - midata, Tel.; വെട്ടുകിളി - vettukili, Mal.; தத்துக்கிளி - tattukkili, Tam.). Title from tamul. Ar. from (jarada, ar. to destroy herbage). Tel. from (midiyu, tel. to hop). Mal. from (vettu, mal. to cut + kili, mal. bird). Tam. from (tattu, tam. to leap + kili, tam. grasshopper). Tam. also (vettukkili), meaning cut + grasshopper, from destroying herbage [tiddah]. Grasshopper. Belongs to family gryllidæ, orthoptera, hemimetabola, insecta [poochy], of naturalists [jantoo].

TAUB (تاب - táb, *Hind.*). From (tábídan, pers. to shine). Light. Mahtaub is the firework called Bengal light.——*Taubdaun* (تابدان - tábdán, Hind.). From (above + dán, pers. holder). Sky-light.

TAUHIR (طاهر - táhir, *Ar.*). From (tahara, ar. to be pure). The unsullied. Name of one of the sons of Mahomet. Also lacab of the prophet. Common alam, as Tauhir ally, double alam; Tauhir khan, alam + alaumat [ism].

TAUJ (تاج - táj, *Hind.*). From persian. A cap, generally conical [topee]. Crown. Part of lacab; as Tauj ood deen, crown of faith; Tauj oon nissa begum, diadem of ladies [ism].

TAUK (தாக்கு - tákku, *Tam.*). From (tagai, tam. to restrain), place marked by limits. Place; plot of ground; rice field [talay].

TAUKK (தாக்கு - tákku, *Tam.*). To outweigh.——*Taukkanang* (தாக்கணங்கு - tákkanangu, Tam.). From (above + anangu, tam. beauty). Lutchmy [q.v.]; the goddess whose beauty excels all others.

TAUL (தால் - tál, *Tam.*). Dandling.——*Taulautt* (தாலாட்டு - táláttu, Tam.). From (above + áttu, tam. to rock). Cradle song. Sung to the gods, when at annual festivals [pundigay] they are swung in cradles [oonjal tirnaul]. Mothers also repeat them to their children.

TAUL (தாழ் - tázh, *Tam.*). Low [tal].——*Taulvauram* (தாழ்வாரம் - tázhváram, Tam.). From (above + váram, tam. side). Verandah [q.v.] with sloping roof.

TAULIB (طالب - tálib, *Ar.*). From (talaba, ar. to demand). A petitioner. Lover. Prefixed to an alam forms a lacab; as Taulib ally, lover of ally [ism].

TAULY (ಗೌರಿಬಳ್ಳಿ - gauríballi, *Can.*; தாளி - táli, *Tam.*). Title otherwise Bindweed. Botanically the Convolvulus genus, convolvulaceæ [vricsham, 93]. Herbs or undershrubs, erect prostrate or twining, sometimes spinous; leaves entire toothed or lobed, capsule globose, usually four-seeded; seeds glabrous, usually smooth. The species best known are:—arvensis [deer's

foot], scammonia [scammony]. Other s. indian species indigenous or naturalized are :—flavus, parviflorus, pluricaulis, rottlerianus.

TAUMANY (தாமணி - támaṇi, *Tam.*). From (damaní, san. subduing). A long line with smaller one attached for fastening cattle. Common word in spite of its origin. Applied also to 'sheet' in boat tackle.

TAUN (تھان - thán, *Hind.*). A piece of cloth or lace, &c. Commercial term for piece-goods.

TAUNDAVAM (ताण्डव - tándava, *San.*). From (tad, san. to beat); from violent treading of ground. Dance ——*Taundava moorty* (ताण्डवमूर्ति - tándavamúrti, San.). From (above + múrti, san. embodiment). Shiva [q.v.] in his dancing attitude.

TAUNDRY (தான்றி - tánri, *Tam.*). Belleric myrobalan.——*Taundry kye* (தான்றிக்காய் - tánrikkáy, Tam.). The fruit of the same.

TAUNG (தாங்கு - tángu, *Tam.*). To support.——*Taungal* (தாங்கல் - tángal, Tam.). From (tángu, tam. to support). Pond.——*Taungy* (தாங்கி - tángi, Tam.). One that supports. Plant second term indicating place of growth. Ex., where transl. is of first term:—Andrographis echioides (kóburandángi), tower; Sida carpinifolia (malaithángi), hill. See gloss. paragraphs.

TAUR (कपालनालिका - kapálanáliká, *San.*; పంటి - panti, *Tel.*; താര് - tár, *Mal.*; தார் - tár, *Tam.*). Title from tamul. San. from (kápála, san. cup + náliká, san. hollow reed); from form. Tel. means a pot; from the resemblance in form. Large spindle-like bamboo [q.v.] frames, round which thread is wound prior to skeining [ausmaun, nesavoo].

TAUR (تار - tár, *Hind.*). From (tal, san. to fix) [taulam]. Palmyra [q.v.] palm.——*Tadpatry* (తాడిపర్తి - tádiparti, Tel.). See sep. title.——*Talee* (தாலி - tálí, Tam.). From (tála, san. palmyra), from the original practice of wearing for this purpose palmyra [q.v.] leaf dipped in saffron [country saffron] water. Title is usually spelt like this, but distinguish from Talee a numboory association which is quite another word [talam]. A piece of gold, forming either the centre or the sole ornament of a necklace, which is tied on the neck of the bride by the bridegroom at the time of marriage [calyaunam]; practice common to all the people of S. india [mungala sootram]. The talee is worn till the woman becomes a widow and is then removed by the husband's relations. Many talees are made of two small pieces which separate. Some are cup-shaped. Some are flat and oval. Some have the figures of Vigneshwaran [q.v.], Lutchmy [q.v.], lingam [q.v.], sun [sooryan] and moon [chundran], &c., engraved on them. The talee is fastened round the neck by a string dyed yellow with saffron [country saffron, lutchah, maryauday].——*Talipot* (श्रीताल - shritála, San.; बजरबट्टू - bajarabattú, Mahr.; तलतमाड्डो - talatamáddó, Conc.; بجربتو - bajarbattú, Hind. and Dec.; ಶ್ರೀತಾಳೆ - shrítále, Can.; ಪನೋಲಿ - panóli, Too.; శ్రీతాళము - shrítálamu, Tel.; കുടപ്പന - kutappana, Mal.; තල - tala, Singh.; தாளிப்பனை - tálippanai, Tam.). Title from (tála, san. palm + patra, san. leaf); properly applies to leaf, so to tree. San. from (shrí, san. holy + tála, san. palm); from leaves being employed to write on with iron style. Hind. from mahratta. Can. from sanscrit. Mal. from (kuta, mal. umbrella + pana, mal. palm), from leaves used in making native umbrellas. Tam. from (tála, san. palm + panai, tam. palmyra tree, borassus flabelliformis, linn.). San. also (alpáyushí), meaning short-lived; (karáliká), meaning large; (tálí), meaning small palm [palmyra]. Can. also (baini). Tel. also (dridhatálamu), meaning strong + palm. Mal. also (tálippana); (sítálam), meaning holy palm. Tam. also (kudaippanai), meaning umbrella + palmyra tree, borassus flabelliformis, linn.; (kúndarbanai), meaning woman's hair + palmyra tree, borassus flabelliformis, linn. [bastard sago-palm]; (shiríthálam), meaning holy + palm; (talappamaram), meaning palm + tree; (talappam), meaning palm tree. Title otherwise Ceylon fan palm, Codapanay, Fan palm, Great fan palm, Holy palm, Java fan palm, Umbrella palm. Botanically Corypha umbraculifera, linn., palmaceæ [vricsham, 149]. Trunk 60-70 feet; leaves sublunate, palmate-pinnatifid, plaited; segments forty to fifty pair; petioles armed; inflorescence pyramidal, equalling the trunk of the tree; calyx three-toothed; petals three; ovary three-celled, one-seeded. Each of its enormous fan-like leaves, when laid upon the ground, will form a semi-circle of 16 feet in diameter, and cover an area of 200 superficial feet; the tree flowers but once and dies; stem smooth; flowers green-yellowish, very fragrant; berries spherical, smooth, green, succulent, oily; met with in ceylon and malabar. A kind of sago [q.v.] from the pith of the trunk. Small bowls and other ornaments made from the nuts, and when polished and colored red, are passed off for coral [moongah]; leaves made into fans, mats [boriyah], and umbrellas, and used for thatching; leaves used for native books [grantam], like palmyra [q.v.] leaves, and are written on with an iron style; seeds used as beads by the tauthar [q.v.] or dausaries [q.v.]. Wood soft, with a hard rind composed of black vascular bundles [taur]. No other species here.——*Tallapoody* (తాళ్లపూడి - tállapúdi, Tel.). From (tádu, tel. palmyra, borassus flabelliformis, linn. + púdi, tel. village). Village, Tahsildar's head-quarters; Godavery dist., Yernagoodem tal.; pop. 1,123; lat. 17° 07′; long. 81° 43′; from Cocanada W.N.W. 28 miles; from Coonavaram S.E. 41 miles; from Ellore N.E. 46 miles; from Madras N.N.E. 288 miles; from Narsapore N. 47 miles; from Rajahmundry N.N.W. 10 miles. Tahsildar's head-quarters were formerly at Yernagoodem.——*Talura palm* (ताली - tálí, San.; تارجھار - tárjhár, **Hind.**). Title from bengalee. Distinguish from Taloora saul [saul]. Title otherwise Tara palm. Botanically Corypha taliera, roxb., palmaceæ [vricsham, 149]. Stem 30 feet; fronds orbicular, palmately pinnatifid, segments forty to fifty pairs; spadix ovate-pyramidal, erect, very large, 20 feet; flowers white, fragrant; berries ovate-globose, olive or yellowish green. Flowering in march and april. Uses same as talipot [q.v.].——*Taulam* (ताल - tála, San.). San. from (tal, san. to fix). Originally the palmyra, so generally the Palm class of trees. Belonging to the division of Endogens or Monocotyledons, which comprises also the grasses, sedges [coray], lilies, orchids, and screw-pines [q.v.] and which also stands intermediate between the highest and lowest orders of the vegetable kingdom [vricsham]. In external structure as well as in their internal organization, palms approach the grasses. Cf. the bamboo [q.v.], as a representative of the grasses, by the side of a rattan [q.v.] as a representative of the palms. In habit, the two orders have much in common; their leaves are formed upon exactly the same plan, the only difference being that those of the palms are generally divided. Even the silicious secretions [tabasheer], characteristic of grasses, are observable in rattans. As to flowers, those of the grasses are those of the palms with the floral envelopes removed and only the bracts remaining. Compare tamul Pool [pill] applied to palmyra [q.v.] which is otherwise known as poolpaty grass lord, and pool tauly grass taulam. Compare the sanscrit Trinarajam, grass king, applied to palmyra [q.v.], cocoanut [q.v.], bamboo [q.v.] and sugar-cane [q.v.]. Compare the sanscrit Trinadroomam or Trinavricsham, grass tree, applied to various species of palms, as palmyra [q.v.], cocoanut [q.v.], areca [q.v.], date [kharjooram], talipot [q.v.], and screw-pine [q.v.]. Palms are perennial and woody plants; they are never annual and herbaceous. Most of them attain the size and assume the aspect of trees. The foliage generally forms a crown at the end of the trunk. The leaves, supported on petioles, or leaf stalks, sheathing at the base, are alternate, coriaceous, and often of gigantic size. Palms, after having arrived at the proper age, flower either every year until they die, or only once during the whole course of their existence. The spathe, or sheath enclosing the flowers, consist of one or many valves, is occasionally of a woody texture and presents the phenomenon of bursting suddenly open with an audible report. The fruits being drupaceous, are nut-like, or berried often covered with a fibrous rind, are almost of every color, and occasionally very numerous. Compared with the size of the plants, they are generally small; some are in this respect like peas [calauyam]. The cocoanut is one of the largest. In the tropics the palms can satisfy every want, and almost every luxury. Sugar [q.v.] is obtained from the Palmyra [q.v.], Cocoanut [q.v.], Date [kharjooram], and Gomooty [q.v.]; starch [nishastah] from the Palmyra [q.v.], Sago [q.v.] palm, and Gomooty [q.v.]; oil [yennay] from the Cocoanut; fibre [coir] from the Cocoanut and Gomooty; and toddy [q.v.] from the Palmyra, Date, Cocoanut, and Gomooty; and nearly all of these species have an eatable fruit and cabbage. But great as are the gifts of the order, the cocoanut alone concentrates them all in itself. For the principal palms of S. india see Areca, Cocoanut, Date [kharjooram], Gomooty, Palmyra, Rattan, Sago [q.v.] palm, Talipot.——*Taulavaudy* (தாளவாடி - tálavádi,* Tam.). From (tála, san. palmyra tree, borassus flabelliformis, linn. + vádi, tam. garden). Sanscrit name (tálaváti), meaning same.—"*a*" Deputy tahsildarry, Coimbatore district. Pay Rs. 70. Head-quarters, Gopichettipolliem.—"*b*" Village, Deputy tahsildar's station; Coimbatore dist., Suttimungalam tal.; pop. 860; lat. 11° 45′; long. 77° 10′; from Coimbatore N. 53 miles; from Erode N.W. 57 miles; from Madras W.S.W. 234 miles; from Ootacamund N.E. 36 miles; from Pollachy N. 78 miles; from Suttimungalam N.N.W. 18 miles.——*Taula vilausam* (தாளவிலாசம் - tálavilásam, Tam.). From (above + vilása, san. play). A singhalese poem on the palmyra [q.v.] palm.——*Taulisam* (तालीश - tálísha, San.). Title otherwise Dye pine, Himalayan deal tree, Himalayan silver fir, King pine, Webb's pine. Botanically Abies webbiana, lindl., coniferæ [vricsham]; the leaves and twigs are medicinal; for british liquor ammoniæ acetatis, squill [q.v.] and benzoic acid [sam-brauny poo].——*Taulispatry* (تالیسپتری - tálíspatri, Hind.). The leaf of the Taulisam. The term is however used for that of Cinnamomum iners [country cinnamon], from resemblance.——*Taurbund* (تاربن - tárban, Hind.). From (tár, hind. palmyra + ban, hind. tope). Palmyra tope.——*Tautaparty* (తాటిపర్తి - tátaparti, Tel.). From (tádi, tel. palmyra, borassus flabelliformis, linn. + parti, tel. village). Village, Ghaut; Vizagapatam dist., Veeravilly division, Madgole zemindarry; lat. 18° 02′; long. 82° 45′; from Chodavaram N. W. 20 miles; from Vizagapatam N.W. 45 miles. Better known as Minamullore. This village is

at the head of the pass and Tautaparty at the foot. Leads across Eastern ghauts [q.v.] from Vizagapatam to hill Madgole. ——*Toddy* (تاڑی - tárí, Hind.). See sep. title.

TAUR (تار - tár, *Hind.*). Wire [tanty].——*Taurcush* (تارکش - tárkash, Hind.). From (above + kash, pers. drawer), means wiredrawer. A workman who does the coarse drawing of tinsel wire.

TAURAH (तारा - tárá, *San.*). From (stri, san. to scatter rays of light). Star. Taurah bye was wife of Rajaram, the third Mahratta king of Sattaura.——*Taurah matsyam* (तारामत्स्य - tárámatsya, San.). Star-fish [kavachiny].——*Tauray* (தாரை - tárai, Tam.). From (tára, san. high shrill note). Long reed instrument [sangeetam].

TAURAM (താരം - táram, *Mal.*). A copper coin [naunyam], value 1½ pies. Current at the time of arrival of Portuguese in Calicut.

TAUREEK (تاریخ - táríkh, *Hind.*). From (arakha, ar. to date). Date [taidy]. History [ilm].

TAUT (తాత్ - tát, *Tel.*). Army [dandam, dandoo, paday, shervay].——*Taut rajah* (తాత్రాజా - tátrájá, Tél.). The Rajah of the army; as opposed to Paut rajah, the Rajah of the turban [q.v.] or crown. Chief of the Tooamool zemindarry, a feudatory of Jeypore.

TAUTHAN (தாதன் - táthan, *Tam.*). From (dása, san. servant). Same as Dausary.

TAVVA (తవ్వ - tavva, *Tel.*). Measure of capacity. 2 solas = 1 tavva; 2 tavvas = 1 maunica [alavay, 3b]. In Ganjam 26¼ cubic inches; in Vizagapatam 78¾ cubic inches; in Godavery, 35 cubic inches; in Kistna, 70 cubic inches, the same as pucka seer; in Nellore, 61¼ cubic inches. See vol. I, 609; II, 510, 511, 512, 513, 520.

TAWYID (تائید - táíd, *Hind.*). From (áda, ar. to corroborate). Help. Part of lacab; as Tawyid ood deen, the help of religion [ism].

TAY (تی - te, *Malay*; තේ - té, *Singh.*). Chinese through Malay. Old Anglo-indian pronunciation of Tea [q.v.].

TAYAUR (تیار - taíyár, *Hind.*). Ready.

TAZIYA (تعزیہ - taziyah, *Hind.*). From (azá, ar. to mourn). Same as Taboot. Taziya khana is same as Ashoorkhana [q.v.].

TEA (चहा - chahá, *Mahr.*; صاه - sái, *Ar.*; چاه - chái, *Pers.*; چاه - chá, *Hind.*; تی - te, *Malay*; ಚಾಗಿಡ - chágida, *Can.*; ಚಾ - chá, *Too.*; తేయాకుచెట్టు - téyákuchettu, *Tel.*; ചായ - cháya, *Mal.*; තේ - té, *Singh.*; தேயிலை - téyilai, *Tam.*). Title from malay; cf. tay. Mahr. from persian. Ar., &c., from chinese. Tel. from (té, tel. tea + áku, tel. leaf + chettu, tel. plant). Mal. from chinese through hindostany. Tam. from (té, tam. tea + ilai, tam. leaf). Ar. also (shái). Tel. also (nallatéyáku), meaning black tea + leaf. Tam. also (paççaittéyilai), meaning green + tea; (karupputtéyilai), meaning black + tea. Title otherwise Char, China tea, Tay. Botanically Camellia theifera, griff., ternstromiaceæ [vricsham, 23]. Alias Camellia viridis; Thea assamica, cantoniensis, chinensis, viridis; Theabohea stricta. Shrubby; leaves lanceolate, flat, serrated, three times longer than broad; sepals five to six; petals six to nine; flowers axillary, solitary, erect, white; fruit nodding, dehiscent; capsule tricoccous. Evergreen with thin, grey bark, alternate, very short-stalked leaves, saw-edged and of a deep shining green; flowers resemble those of a bramble, one inch in diameter, produced in great abundance if not pruned. The alkaloid of tea, called theine, is identical with that of coffee [q.v.] or caffeine; the theine is variable in quantity in different teas, south indian samples containing more than those from china and japan; the percentage ranges from one to more than six. Plant was introduced from china to assam in 1830; thence extended to cachar, sylhet, &c.; introduced in s. india in 1837; the peculiarities of madras teas, as contrasted with china teas, are their much greater strength and stronger aroma. In cultivating, small plantations are preferable to large; a rich loamy soil is best; the object is to insure deep soil, free from rocks and stones; a tolerably moist climate, such as may be found at elevations of from 2,500 to 5,000 feet above the level of the sea, is most suitable, and in localities free from all influence of hot winds in summer; the estimated number of seedlings for one acre is about 1,000; for cultivation the ground is cleared as much as possible, marked out in lines, and holes dug at proper distances; plants may be kept in the nursery till they are six months old; after transplanting and when plants are eighteen months old, they are cut down to a short height, and from that time the young shoots are plucked as they appear and manufactured into tea; the bushes require pruning and topping; ground must be kept clean; the young leaves are used and the tree is not allowed to seed as a rule; the flush is ready at intervals varying from seven to fourteen days; produce is manufactured and ready for market in about six weeks. For Neilgherry tea-planting see vol. I, 292. Tea leaves are divided into two classes, green and black, both the products of the same plant but differently prepared for use; the former contains a larger proportion both of theine and of tannin than the latter, their composition in other respects being nearly identical; the green tea leaf is prepared when the plant is in its less mature state, while it contains a quantity of viscid and to a certain degree narcotic juice. Green teas which are or have been commonly met with in s. india are; gunpowder, very strong, being the leaf rolled quite round; hyson, a small leaf, closely curled and bluish green; bloom tea, light green and has loose leaf; singlo, similar; green tea is comparatively little used, owing to its high price, its powerful action on the nervous system when genuine, and its great liability to pernicious adulteration. There are three principal varieties of black tea; in the third or fourth year of the plant's age or later the young shoot is plucked as soon as three leaves have appeared on it; the uppermost leaf scarcely expanded when dried gives pekoe, the second about thirty-six hours old gives souchong, the third of forty-eight to sixty hours' growth gives congoo; a fourth leaf is sometimes plucked and yields bohea, but the proportion of theine diminishes from the topmost leaf downwards and is insignificant in this last variety which is rarely brought to market; all these varieties of leaf are plucked and dried together and separated subsequently by sieves of different-sized meshes, pekoe and souchong passing through the first sieve, leaving congoo behind, and being separated from each other by a further sieving; thus the different kinds of black tea may be distinguished by the different sizes of the leaves expanded by infusion. Leaves slowly dried retain more green color than those that are dried rapidly; the green tea is carefully dried by exposure to the open air in the shade, the black by means of artificial heat in shallow pans over a charcoal fire. The above named classificatory terms are all Chinese. The adulterations of tea leaves are of two kinds, the substitution of leaves of other plants, and the introduction of exhausted tea leaves re-rolled and dried; if green tea be adulterated, put a piece of gall [mauchicoy] into the liquor, which will turn it to a deep-bluish color, this it will not do unless there be either vitriol or copperas [mayil toottam] in it as galls do not tincture the proper tea; counterfeit black tea produces a deeper color by infusion than the real tea, a little copperas put into it will turn it to a light blue, which otherwise ought to be of a deep blue inclining to black; it is with the small, white, pleasant-scented flowers of the osmanthus fragrans, lour., that the chinese give a peculiar flavor to their best teas. The uses of tea need not be here mentioned, but it is to be observed that its narcotic effects on man increase towards the equator. The oil from seeds resembles that of olive [zeitoon], burns with a clear, bright light, and is free from unpleasant odour; not edible but can be utilised in the manufacture of a superior kind of soap [sauboon]. Wood grey, soft. There are at present date three varieties of plant, viz., china, assam, and a hybrid between those two; the china is hardiest, but the hybrid most prolific of leaf and therefore most cultivated. For other leaves used as tea see Sharb.——**(1)** *Tea grass* (ಚಾಹುಲ್ಲು - cháhullu, Can.). Title from use of fresh leaves. Same as Roussa grass.——**(2)** *Ceylon tea* (چاهسیلان - cháisailán, Hind.). Same as Nerija.——*Indian tea* (چاههندی - cháihindí, Hind.). Same as Fragrant toolsy.——*Shiranjy tea* (చిరంజి - chiranji, Tel.). Same as Godaury.——*Wild tea* (بانرا - bánrá, Hind.; ಹುಲುನಿ - huluni, Can.; නෙයඩස්ස - neyadassa, Singh.). Title from leaf like tea-leaf. Hind. also (gonta); (deurá). Botanically Eurya japonica, thun., ternstrœmiaceæ [vricsham, 23]. In leaf and general appearance much resembles tea plant; wood brown, soft, close, grained, sometimes used for fuel.

TEAK (शाक - sháka, *San.*; सागवान - ságavâna, *Mahr.*; टिक्यारूकु - tikyárúku, *Conc.*; ساج - sáj, *Ar.*; سال - sál, *Pers.*; ساکھو - sákhú, *Hind.*; ساگوان - ságwán, *Dec.*; جتی - jati, *Malay*; ತೇಗು - tégu, *Can.*; ತೆಕ್ಕಿ - tekki, *Too.*; టేకు - téku, *Tel.*; ଶିଂଗରୁ - singaru, *Oor.*; തേക്ക - tékka, *Mal.* and *Singh.*; தேக்கு - tékku, *Tam.*). Title from malayalam. San. from (shak, san. to be powerful). Mahr. from hindostany. Ar., &c., from sanscrit [common saul]. San. also (nauvriksha), meaning ship + tree. Can. also (jádi), meaning superior; (ságwan). Tel. also (peddatéku), meaning large + the tree. Mal. also (játi), meaning superior. Title otherwise Indian oak, Saag, Shaucam, Ship tree. Botanically Tectona grandis, linn., verbenaceæ [vricsham, 102]. Alias Tectona theca; Theca ternifolia. Theca from malayalam. Large tree, with an ash-colored and scaly bark; young shoots four-sided, channelled; leaves opposite, oval, scabrous above, whitish and downy beneath; panicles terminal, large, cross-armed, divisions dichotomous, with a sessile fertile flower in each cleft, the whole covered with a colored farina; peduncles quadrangular, sides deeply channelled; flowers numerous, small, white; calyx and corolla five to six-cleft; stamens often six; ovary round, hairy, four-celled; cells one-seeded; nut very hard. Grows straight, and with lofty cross-armed panicles of showy white flowers; flowering in rains; the principal forests are in malabar, canara, travancore; the vertical range of the tree is from the sea-level up to 3,000

feet, but it always avoids exposed situations; in twenty-five years the teak attains the size of two feet in diameter and is considered serviceable timber, but it requires eighty years to arrive at maturity; yields a kind of resin [raul] resembling that of canarium strictum, roxb. [black dammer]; the seeds are of the size and shape of sesamum [gingelly] seeds; they are very oily, but the difficulty of extracting them from the nuts makes the oil expensive; it is a bland, fatty oil [yennay], free from any peculiar odour. The teak takes up from the soil a quantity of silica, hence sandstone [manal cull] and granite [caroom cull] soils are the favorite places for it; to this large secretion of silica must be attributed the strength and durability of the timber; very easily raised from seed; end of august is the proper time to commence cutting down the tree, when the cambium will have been expended; in malabar carried down streams to coast. Plaster of the powdered wood is used medicinally in bilious headaches and for the dispersion of inflammatory swellings; taken internally in doses of 90 to 200 grains, it is beneficial in dyspepsia with burning pain in the stomach arising from an overflow of bile, also as a vermifuge; the charred wood quenched in poppy [aphainam] juice and reduced to a smooth paste is applied to swellings of the eyelids, and to strengthen the sight; the bark is astringent, and the oil of the nuts, which is thick and has an agreeable odour, is used for making the hair grow and removing itchiness of the skin; flowers are diuretic; seeds have similar property; the tar extracted from the wood is used as an application to the sores of draught cattle to prevent maggots breeding. Young teak is not injured by elephants [q.v.]; the tree affords no fodder for animals. Foliage supplies a red dye [shauyam]; oil is applied to wood-work of all sorts, either alone as a natural varnish [rangh] or in combination with certain resins [raul]. Sap-wood white and small; heart-wood when cut green has pleasant and strong aromatic fragrance and a dark golden yellow color, which on seasoning soon darkens into brown mottled with darker streaks, hard, exceedingly durable, and strong; wood does not split, crack, warp, shrink, or alter its shape when once seasoned; does not suffer in contact with iron [auhan], and is rarely if ever attacked by white-ants [q.v.]; durability is due to the aromatic oil contained in the wood; it works easily and takes a good polish; it has some resemblance to oak [belote]; great quantities are used on the western coast for ship-building, for which it is superior to any other kinds of wood, even oak; after the best straight timber has been taken, the crooked pieces called shin-logs are used for many other useful purposes; malabar teak is ranked higher for ship building than tenasserim or pegu teak, on account of its greater durability and power of resisting dry rot; the teak which grows on the sides and tops of mountains is far superior to that which grows in the black heavy soil of the low grounds, though it takes a longer time to attain the same dimensions.——*Bastard teak* (جھوٹا ساگوان - jhútáságwán, Hind.). Same as Common coral tree.——*Cooml teak* (కుమ్ముడుటేకు - gumudutéku, Tel.). Same as Cashmere tree.——*Dog teak* (நாய்த்தேக்கு - náyttékku, Tam.). Same as Small chaltah. ——*Firebrand teak* (चाम्हारी - chámhárí, Mahr.; ನಾರಲೆ - nárale, Can.; నగరుచెట్టు - nagaruchettu, Tel.; බූසේරු - búséru, Singh.; கொள்ளிக்கட்டைத்தேக்கு - kollikkattaittékku, Tam.). Title from color of wood. Tam. from (kollikkattai, tam. firebrand + tékku, tam. teak, tectona grandis, linn. f.). Can. also (íjimara). Tel. also (navuru). Tam. also (podaganárimaram). Botanically Premna [jayah] tomentosa, willd., verbenaceæ [vricsham, 192]. Alias Cornutia corymbosa; Premna flavescens. Small tree; branchlets, young leaves, and cymes everywhere tomentose; leaves petioled, ovate or ovate-oblong, long-acuminate, entire, venoso-rugous, stellato-pubescent on both sides, sparingly above, copiously beneath; panicles large, terminal, many-flowered, compact; flowers small, white. Leaves medicinally diuretic and are given internally and applied externally in dropsy; natives using them soaked in goat's [vellaud] urine or in onion [piyauz] juice; sometimes chebulic myrobalans [q.v.] are added if the bowels are costive. Wood light-brown, the color of teak but lighter, moderately hard, smooth, close and even-grained, seasons and polishes well.——*Saffron teak* (ಅರಸಿನತೇಗ - arasinatéga, Can.). Title from color of wood. Same as Yellow cadamba.——*Small teak* (சிறுதேக்கு - shirutékku, Tam.). Same as Knotted bhraungy.——*Strong teak* (வத்தேக்கு - vattékku, Tam.). Same as Sappan.——*Venteak* (बोंडगा - bóndaga, Mahr.; ಬೆಂಡೇಕು - bendéku, Can.; ನಂದಿ - nandi, Coorg; చెన్నంగి - chennangi, Tel.; വെന്തേക്ക - ventékku, Mal.; வெண்தேக்கு - vendékku, Tam.). Title from malayalam. Can. from (bili, can. white + tégu, can. teak). Tel. from (chennu, tel. beauty + anga, san. body). Mal. from (ven, mal. white + tékku, mal. teak). Tam. from (ven, tam. white + tékku, tam. tectona grandis, linn. f.); from light-colored wood. Can. also (bellaunuttemara); (bilinandi); (bilindu). Tam. also (kaççaikkattai), meaning tender + wood; (velvilá), meaning white + feronia elephantum, corr. Title otherwise Ben teak, White teak, White wood apple. Botanically Lagerstrœmia [cadaly] lanceolata, wall., lythraceæ [vricsham, 58]. Alias Lagerstrœmia microcarpa. Large tree; western forests; leaves from elliptic to ovate, often attenuated or acute at the base, obtusely pointed at the apex, glabrous above, pale beneath, often vary finely downy; panicles axillary and terminal, glabrous or hoary, with minute pubescence; flowers very numerous, white; calyx white outside, with hoary pubescence; six outer stamens longer than the others; capsule scarcely an inch long. Wood light-colored, straight fibred, and elastic; much used for building, flooring, rafters, &c.; if left exposed soon attacked by white-ants [q.v.].——*White teak* (வெண்டேக்கு - vendékku, Tam.). Same as Venteak.

TEAPOY (سہ پائی - sihpáe, *Hind.*). From (sih, pers. three + páe, pers. foot). A small three-legged table [charpoy].

TEE (തീ - tí, *Mal.*). Fire.——*Teeneer* (தீநீர் - tínír, Tam.). Distilled water [neer].——*Teeyauttoonny* (തീയാട്ടുണ്ണി - tíyyáttunni, Mal.). From (above + átu, mal. to dance + unni, mal. boy). Otherwise Teeyaudy. Firedancer; degraded from Bramins [q.v.] because they jump through fire in honor of Bhadra cauly [q.v.].

TEECAY (टीका - tíká, *San.*). From (tík, san. to explain). Commentary.

TEEK (ٹھیک - thík, *Hind.*). Proper, exact.

TEEN (தீன் - tín, *Tam.*). From (tin, tam. to eat). Food. ——*Teeny* (ತೀನಿ - tíni, Can.; తీని - tíni, Tel.; തീന് - tín, Mal.; தீனி - tíni, Tam.). From (tin, tam. to eat). The general name for any meal or for food. The English have adopted it for dinner. Compare Teymez. The night meal [khanah] is universal in Southern india. The following is a Hindostany proverb:— خدا بھوکا اٹھاتا هے پر بھوکا سلا تا نہیں "God wakes the hungry, "but does not send the hungry to sleep." A complete account of the dietary of the natives of s. india was given at vol. I (101), foot-note.——*Tinay* (தினை - tinai, Tam.). See sep. title.

TEER (தீர் - tír, *Tam.*). To decide.——*Teerp* (తీర్పు - tírpu, Tel.; തീര്പ്പ - tírppu, Mal.; தீர்ப்பு - tírppu, Tam.). A decision [feisal, insauf].——*Teervay* (తీర్వ - tírva, Tel.; தீர்வை - tírvai, Tam.). From (tír, tam. to decide). What is fixed; tax, especially on land.——*Teervay cummy* (தீர்வைகம்மி - tírvaigammi, Tam.). Remissions granted on irrigable lands cultivated with a dry crop [dry grain], but which otherwise would have been left waste [tariss].——*Teerray jausty* (తిరువజాస్తి - tíruvajásti, Tel.). From (tírvai, tel. tax + jásti, tel. excess). Charge for water from a Government source taken to dry or to garden lands. The charge varies according to the class of tank [q.v.] or channel [q.v.] from which the water is taken [fusljausty]. See vol. I, 112.

TEERTAM (तीर्थ - tírt'ha, *San.*). From (trí, san. to cross). Ford; place of sacred waters; special spot along the courses of sacred streams or in the vicinity of sacred springs; sacred object; worthy person; epithet of Shiva [q.v.], Arghan [arhat]; title to saints and pious persons; also suffix in proper names as Ananta teertan, Rama teertan [peyar].——*Teertacaran* (तीर्थंकर - tírt'hakara, San.). From (above + kri, san. to make). The saint who has made the passage of the world; epithet of a Jinan [q.v.], who is with jeinas [q.v.] what a Booddha [q.v.] is with booddhists. Also called Jagat prabhoo, lord of the world; Sarwanyan, omniscient; Adheeshwaran, supreme lord; and Devautidevan, god of gods. In the Trishashty pooraunam, a jeina work, sixty-three good dispositions are specified, and he who attains to the whole of them is Teertacaran. Of these deified human beings, the jeinas reckon twenty-four, and each teertacaran is considered to be at the head of a long period of time [avasarpiny, ootsarpiny], like the hindoo Menoo [q.v.], and worshipped as such. An ancient list is as follows:— Nirvauny, Sagaran, Nalanautan, Vimala prabhoo, Shreedharan, Soodantan, Amala prabhoo, Oodaran, Angiran, Soomaty, Sindhoo, Coosoomanjany, Shiva gungay, Ootsauhan, Ganeshwaran, Parameshwaran, Vimaleshwaran, Rasodharan, Crooshtan, Ganamoorty, Siddhamaty, Shreebhadran, Atricatan, Shaunty. A mediæval list, and that now most generally recognized, is as follows, adding the sign or symbol of each:—Rishabhan, bull; Ajitan, elephant; Sambhavan, horse; Abhinandanan, an ape; Soomaty, curlew; Padmaprabhan, a lotus; Soopaurthivan, the swasticam 卐; Chundraprabhan, the moon; Pooshpadantam, macaram; Sheetalan, shree vatsam ❀; Shreyaumshan, a rhinoceros; Vasoopoojan, a buffalo; Vimalan, a boar; Anantan, a falcon; Dharman, vajram, a thunderbolt; Shaunty, an antelope; Coontoo, a goad; Aran, nandavartam, a compound swasticam; Mahy, a jar; Moonisoovratan, a tortoise; Namy, neelotpalam, blue water-lily; Nemy, a shell; Parshwanautan, a serpent; Maha veeran, or Vardhamaunan, a lion. The mediæval twenty-four have colors ascribed to them; the perfection of color in hindoo books is the hiranyam or gold color; this is ascribed to nine of them; the others are red, fair, blue and black. Furthermore, as the spirit of the prophecy is possessed by teertacarans, these have foretold by name a future series of twenty-four as follows:—Mahapudman, Saradevan, Soopaurshwan, Swayam prabhan, Sadautmabhooty, Deva pootan, Coolapootran, Oodancan, Crooshtan, Jaya keerty, Moonisoovratan, Aran, Nepanampan, Nishcashauyan, Vimalacan, Nirmasan, Chitragooptan, Samaudhigooptan, Swayambhoo, Anoovantacan, Jayan, Vimalan, Devapaulan, Anantaveeryan. Colossal statues

of the Teertacarans are placed in the courtyards of the jeina temples [basty]. The best-known is at Shravanabelgola near Chenroyputna in Mysore; its height is 70 feet, 3 inches. There is another at Caurcal on the west coast. See vol. I (95) [matam]. For jeinism or religion of the jeins see Jeina.——*Teerta yautray* (തീൎത്ഥയാത്ര - tírt'hayátra, Mal.). From (above + yátrá, san. journey). A pilgrimage [haj, yautray].

TEETAR (تيتر - títar, *Hind.*). From imitative sound [tittiram]. Perdicinæ, tetraonidæ [tittiram], rasores, aves [pacshy, 33], of naturalists [jantoo]. Partridges. The species best known to the natives are shown below.——*Black partridge* (काळातीतर - kálátítara, Mahr.; دراج اسود - durrájiaswad, Ar.; تيتر سياه - títarisiyáh, Pers.; كالا تيتر - kálátítar, Hind. and Dec.; ಚಕೋರ - chakóra, Can.; కక్కెరకోడి - kakkerakódi, Tel.; କଉଡ଼ୁଚୋଡ଼ି - kaudzuchódi, Oor.). Mahr. from (kálá, mahr. black + títara, mahr. partridge). Ar. from (durráj, ar. partridge + aswad, ar. black). Pers. from (títar, hind. partridge + siyáh, pers. black). Hind. from (kálá, hind. black + títar, hind. partridge). Tel. from (kakkera, tel. crane + kódi, tel. fowl). Oor. means partridge fowl. Title otherwise Painted partridge. Francolinus pictus, perdicinæ [teetar], tetraonidæ [tittiram], rasores [pacshy, 33], of naturalists. Forehead, lores, face, broad supercilium, and ear-coverts ferruginous-chestnut; top of head dark brown with pale edgings; neck all round pale ferruginous; upper part of back and scapulars deep brown, feathers edged laterally creamy white, this gradually passing into markings of wings, which are chestnut with black bands; lower back, rump and upper tail-coverts marked with undulating lines of black and white; tail deep brown, feathers finely cross-barred at base; beneath throat is white, with longitudinal dark lines; whole of rest of lower surface variegated black and white, each feather white, with two dark cross-bands, shaft and tip black; these dark bands gradually narrow towards vent; under tail-coverts chestnut, feathers of flanks and sides of rump tinged with pale ferruginous; bill blackish; irides dark brown; legs yellow-red; length 12 inches. Female differs in having a somewhat ferrugincus tinge beneath, and in the throat being more or less rufous; not known on malabar coast; affects open plains with scattered bushes. Chiefly occurs in pairs. Cock-tird has guttural call or broken crow, chee-kee-kerray—chee-kee-kerray, heard a long way off, answered on all sides.——*Girzah partridge* (گیرزا - gírzá, Hind.; گیرزا - gerzá, Dec.; గెరిజపిట్ట - gerijapitta, Tel.). Title otherwise Jungle bush quail. Perdicula cambayensis, perdicinæ [teetar], tetraonidæ [tittiram], rasores [pacshy, 33], of naturalists. Alias Coturnix pentah; Perdicula rubicola. Male above rich dark reddish brown, mottled dull rufous; long yellowish or rufous white supercilium, narrowly edged black, indistinct pale line from gape; between this and supercilinm rufous brown; shafts of feathers of back of neck and back white; many feathers of back with black markings; scapulars and wing-coverts richly marked on inner webs with pale creamy white and black; primaries red-brown, with fulvous or tawny spots; tail with black bars; beneath chin rich chestnut, rest of under surface white, tinged rufescent on lower abdomen, flanks, vent and lower tail-coverts, with numerous cross bars of black, small on throat and sides of neck, increasing on breast and abdomen, and disappearing towards the vent; bill dusky with reddish tinge; irides light brown; legs yellow-red; length 6½ inches. Female has lower plumage rufous, with whitish shafts in some and black markings of upper plumage less distinct; throat generally darker rufous than rest of lower plumage. Found in wooded districts; rare in low carnatic [q.v.]; found in coveys, all rise at once with a loud whirring noise, uttering cries of alarm, and after a short flight drop down again into the jungle.——*Indian partridge* (तित्तिरि - tittiri, San.; دراج - durráj, Ar.; تيتر - títar, Pers., Hind. and Dec.; ತಿತ್ತಿರಿ - tittiri, Can.; కౌజు - kaudzu, Tel.; ആൾകാട്ടി - álkátti, Mal.; கவுதாரி - kavuthári, Tam.). Ar. from (daraja, ar. to go on foot step by step). Pers. from sanscrit. Tel. from (kapinjala, san. partridge). Mal. from (ál, mal. man + kátti, mal. pointer). Male bird is:—(haikután, ar.). Hind. also (gorátítar), meaning white partridge. Ortygornis ponticerianus, perdicinæ [teetar], tertraonidæ [tittiram], rasores [pacshy, 33], of naturalists. Alias Perdix orientalis. Head above olive brown, rufous on forehead, over eyes, and on nape; lores and face also rufous, with black specks; ear-coverts silky hair-brown; upper plumage, including wing-coverts, upper tail-coverts and central tail-feathers speckled brown, each feather being rich red brown with three bars of creamy yellow, and paler and somewhat olive brown at tip; primaries pale brown; outer tail-feathers rich chestnut brown, with dusky brown terminal band, pale tipped; beneath chin and throat whitish with small dark brown spots, forming triangular mark; rest of lower plumage ochreous white or creamy, most pronounced on breast, with numerous minute cross-bars of brown, somewhat broader on breast and sides of neck, where it mingles with upper plumage; lower tail-coverts ferruginous; bill dusky plumbeous; irides hazel brown; legs dull red; length about 12½–13 inches; male strongly spurred, generally one spur on each leg, occasionally two, second at base of first; females not spurred. Frequents alike bush-jungle, and cultivated lands; associates in coveys, difficult to flush, rises with a whirr; call a loud shrill cry, compared to the word 'pateela-pateela-pateela,' quickly repeated, preceded by a single note uttered two or three times, each time with higher intonation; in flight not unlike English partridge; kept by Mussalmans in cages, sometimes for fighting, as it is highly pugnacious; partridges with double spurs are esteemed the most for fighting; also used as a decoy for wild birds. Common during the season that the small, dry grains [q.v.] are ripe; inferior as food to the same bird in Europe, being dry, and rather insipid. Of partridges, veidyans [q.v.] say, the flesh of the cock bird occasions bile, while that of the hen strengthens the body. Mahomedans hold eggs of partridge in high estimation.——*Lowah partridge* (قطا - katá, Ar.; سنگخواره - sangkhwárah, Pers.; لوا - lawá, Hind. and Dec.; ಲಾವ - láva, Can.; లావుక - lávuka, Tel.; செங்காடை - shengádai, Tam.). Title from deccany. Ar. from its call. Pers. from (sang, pers. stone + khwárah, pers. eater); said to swallow stones. Dec. means iron. Tel. from deccany. Tam. from (shem, tam. red + kádai, tam. quail). Can. also (lavuga). Title otherwise Rock bush quail. Perdicula asiatica, perdicinæ [teetar], tetraonidæ [tittiram], rasores [pacshy, 33], of naturalists. Alias Coturnix argoondah. Male, upper plumage brownish rufous, feathers minutely freckled and lineolated with black and tawny; feathers of head and neck tipped black, and som; of scapulars and wing-coverts with irregular black blotchese primaries dark brown with tawny bars on outer webs; tail with lateral feathers also barred; narrow white line passses over eye from base of bill, bordered by dusky, and another short line below this from gape; rest of the face, chin and throat bright rufous; whole lower parts, including sides of neck, white with numerous cross bars of black, tinged with rufous on flanks, lower belly and thigh-coverts; bill dark slaty; irides brown; orbits pale; legs red; length 6½ inches. Female differs in having upper surface more uniform rufous brown, and the whole of lower parts pale rufous albescent on vent. Frequents rocky hills with low scrub jungle; flesh perfectly white, used for fighting among mussalmans [q.v.].——*Small lowah partridge* (كوكنی لوا - koknílawá, Hind. and Dec.; ನವಿಲುರೆಕ್ಕೆಬೆಬ್ಬಕ್ಕಿ navilu-rekkebebbakki, Can.). Hind. from (kokní, small + lawá, hind. bush quail). Can. from (navilu, can. peacock + rekke, can wing + heççu, can. superior + hakki, can. bird). Title otherwise Painted bush-quail. Perdicula erythrorhyncha, perdicinæ [teetar], tetraonidæ [tittiram], rasores [pacshy, 33], of naturalists. Male forehead, lores, and crown of head black; white frontal band continued as supercilium over each eye; upper plumage rich olive brown, with black lunules; scapulars, wing-coverts and secondaries with large patches of black, shaft pale yellow, and faint cross lines of same; primaries brown, outer webs barred dark rufous; tail brown with black spots, barred with narrow pale yellow lines; beneath chin pure white, bordered black; rest of lower parts rufous, passing into olive brown on sides of neck, spots of black on breast, increasing in size on sides of neck and breast; feathers of flanks with large spots of deep black tipped with white; bill and legs fine red; irides yellow brown; length 6½ inches. Female differs in having chin, supercilium, forehead and face rufous, in place of white; head brown instead of black. Found on high lands; rise with less whirr than other bush quails, plumage generally being softer and not so firm.

TEEV (തീവ് - tívu, *Mal.*; தீவு - tívu, *Tam.*). From (dvípa, san. island). Island [divy, dweepam]. The chief islands of the Presidency are the Laccadive and Maldive islands, consisting of low coral reefs [atoll], south-west of presidency and Ceylon. In the Bay of Bengal there are Rameshwaram and Manaar between the presidency and Ceylon.——*Teeyan* (തീയ്യൻ - tíyyan, Mal.). Means islander. Tribal-title. Numerically the strongest section of the Malabar population. They form the mass of the field laborers, but their chief avocation is to collect and make coarse sugar [jaggery] from the juice of the palm [taar]. They follow polyandric customs. Both men and women are generally handsome, with strong muscular frames; able to undergo much fatigue, and talkatively inclined. The women sometimes carry a small piece of muslin [q.v.] over the shoulder, and draw it across the breast when a European approaches, but the custom of the caste is to leave the bosom bare. The Teeyar follow the rule of descent a matrice [maroomakkatoyem]. They are supposed to have come from Ceylon. Cf. Dweepar. See vol. I (16), (110), and II, 99 [jauty].——*Teeyatty* (തീയാത്തി - tíyatti, Mal.). Teeya woman.

TEILA (ತೈಲ - taila, *Can.*). From (taiyal, tam. beauty). Makes compound personal names; as Teilapa, cadamba ruler of Banavausy and Haungal, A.D. 1099—1124.——*Teily* (தையலி - taili, Tam.). Name of the goddess at Veitheeshwarancoil near Tanjore. Hindoo female proper name [peyar].

TEILAM (तैल - taila, *San.*; तेल - téla, *Mahr.*; دهن - duhn, *Ar.*; روغن - raughan, *Pers.*; تيل - tel, *Hind.*; ತೈಲ - taila, *Can.*; ತೈಲ - taila, *Too.*; తైలము - tailamu, *Tel.*; തൈലം - tailam *Mal.*; தைலம் - tailam, *Tam.*). Title from sanscrit [til]. San. from (tilá, san. sesamum seed). Mahr. from sanscrit. Ar. from (duhna, ar. to anoint). Hind. from sanscrit. Drav. from sanscrit.

Oleo-resin. A sub-division of resins [raul]. Oleo-resins are resins [raul] combined with volatile oil [yennay]; on distillation the oil passes over, leaving a resin behind [gond, raul]. The Tamulians include also balsams [q.v.] under Teilam. The following are two key-lists in the briefest possible terms of the oleo-resins, and balsams of s. india for which vernacular names are known:—further information must be traced in the glossary paragraphs through the small type cross-references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of plants in the dravidian languages.—"*a*" Altingia excelsa, java storax, balsam from bark; Balsamodendron roxburghii, indian bdelluim, gum-resin; Buchanania latifolia, chironjee, varnish; Cedrus deodara, deodar, wood oil; Chloroxylon swietenia, satin wood, wood oil; Dalbergia sissoo, sissoo, wood oil; Dipterocarpus turbinatus, gurjan, oil from wood; Erythroxylon monogynum, deccany deodar, wood oil; Holigarna longifolia, holigarna, oil from fruit; Liquidambar orientale, indian storax, resin from bark; Melaleuca leucadendron, cajeput, oil from leaf; Odina wodier, wodier, varnish; Semecarpus anacardium, marking nut, black varnish from nut shell; Tectona grandis, teak, wood oil.—"*b*" Bdellium, balsamodendron; Cajeput, melaleuca; Chironjee, buchanania; Deodar, cedrus, erythroxylon; Gurjan, dipterocarpus; Marking nut, semecarpus; Satinwood, chloroxylon; Sissoo, dalbergia; Storax, altingia, liquidambar; Teak, tectona; Wodier, odina. ——*Carpoora teilam* (सरलरस - saralarasa, San.; دهن الكافور - duhnulkáfúr, Ar.; عرق كافور - arkikáfúr, Pers.; كافور كا تيلم - káfúrkátailam, Hind.; ಕರ್ಪೂರತೈಲ - karpúrataila, Can. and Too.; కర్పూరతైలము - karpúratailamu, Tel.; കർപ്പൂരതൈലം - karppúratailam, Mal.; கர்ப்பூரத்தைலம் - karppúrattailam, Tam.). Title from tamul. San. from (sarala, san. pinus longifolia, roxb. + rasa, san. juice). Ar. from (duhn, ar. oil + káfúr, ar. camphor). Pers. from (ark, ar. extract + káfúr, ar. camphor). Hind., &c., mean camphor + oil. Hind. also (gandabaríjekátel), meaning oil of pinus longifolia, roxb. Turpentine [ganda firoza] oil. Also called Spirits of turpentine. Oleum terebinthinæ of chemists. The essential oil drawn from turpentine by distillation. Used by moochees [q.v.] in preparing paints and varnishes [rangh].——*Munn teilam* (भूमितैल - bhúmitaila, San.; قفرالیهود - kafralyahúd, Ar. and Pers.; مٹی کا تیل - mittíkátel, Hind. and Dec.; ಮಣ್ಣುಯೆಣ್ಣೆ - mannuyenne, Can.; ಮಣ್ಣೆಣ್ಣೆ - mannenne, Too.; మంటితైలము - mantitailamu, Tel.; മണ്ണെണ്ണ - mannenna, Mal.; மண்ணைதைலம் - mandailam, Tam.). Title from tamul. San. from (bhúmi, san. earth + taila, san. oil). Ar. from (kafr, ar. pitch + yahúd, ar. jew). Hind. from (mittí, hind. earth + tel. hind. oil). Drav. means earth + oil. San. also (prit'hivítaila), meaning earth oil. Mahr. also (mattíkatél), meaning earth + oil. Tel. also (bhúmitailamu), meaning earth + oil; (mantinúne), meaning earth + oil. Mal. also (mantailam), meaning earth oil. Tam. also (shiláthailam), meaning rock + oil; (mannenney), meaning earth oil. Petroleum or fluid bitumen [shilajit]. Otherwise Rock oil. Naphtha [q.v.] and Kerosene oil are finer varieties. Rock oils are liquids formed by the slow decomposition of organic remains, animal or vegetable, or both combined. Munn teilam occurs, semi-liquid somewhat of the consistence of treacle tenacious, semi-transparent of a deep sherry-red or nearly opaque, tar-like brown with a peculiar though not unpleasant aromatic odour and pungent acrid taste; exudes spontaneously from the rocks in volcanic regions, and collects on the surface of certain lakes; can be obtained in nearly every bazaar [q.v.] in the country. The tamul doctors order it as an external application in rheumatic complaints, as also in cases of epilepsy, hysteria, and palsy, in all which affections it is rubbed on the part with the hand in the form of a liniment. Useful in all skin diseases, especially when of a parasitic origin. When mixed with earth or ashes, it serves for fuel. Useful in destroying bugs [moott poochy] in old wood, and in removing white-ants [q.v.]

TEIYIB (طیب - taiyib, *Ar.*). Good, name of a son of Mahomet. Common alam, as Teiyib ally, double alam [ism].

TEJAS (तेजस् - téjas, *San.*; தேயசு - téyasu, *Tam.*). From (tij, san. to sharpen). Light [jyoty] or fire [agny].——*Tejbul* (तम्बुरु - tumburu, San.; فاغرة - fághirah, Ar.; كبابكشادەدهن - kabábikushádahdahan, Pers.; تجبل - tijbal, Hind.; ಜಿಮ್ಮೆ - jimme, Can.). Title from hindostany. San. means coriander, coriandrum sativum, linn.; from flavor and size of fruit. Ar. means mouthed. Pers. from (kabáb, pers. cubebs, piper cubeba, linn. f. + kushádah, pers. open + dahan, pers. mouth). Hind. from (téja, san. pungency + p'hala, san. fruit); from aromatic fruit. Title otherwise Indian toothache tree. Botanically Zanthoxylum [toomroo] alatum, roxb., rutaceæ [vricsham, 32]. Alias Zanthoxylum hostile. Small shrub, armed with straight thorns; leaves pinnate, opposite; leaflets oblong, acuminated at both ends, entire; petioles unarmed; panicles terminal or sub-axillary; flowers small greenish; flowering in the hot season. Seeds and bark aromatic, tonic; aromatic fruit used as a condiment [vadagam]; twigs serve as tooth-brushes; capsules and seeds used for intoxicating fish [common emetic nut, indian berry, indian oak, marotty, round milk-hedge, sooptee, walsoora, zanzibar indigo].——*Tejpat* (तेजपत्त्र - téjapattra, San.; تیج پات - tejpát, Hind.). From (téja, san. pungency + pattra, san. leaf). Leaf of cinnamomum tamala, nees. [cassia cinnamon]. The folium indicum of the english Pharmacopœia. Same as Malabathrum.——*Tendoo* (تیندو - tendú, Hind.). From (tindu, san. from tij, san. to sharpen), from acid exudation of tree. Same as Coromandel ebony.

TEKKALY (టెక్కలి - tekkali, *Tel.* tekkali *). Means robbery.—"*a*" Deputy tahsildarry; Ganjam district. Pay Rs. 100.—"*b*" Proprietary estate; Ganjam dist.; pop. 112,015; square miles 172; lat. 18° 36′; long. 84° 17′; from Balligooda S.S.E. 109 miles; from Berhampore S.W. 60 miles; from Chetterpore S.W. 71 miles; from Chicacole N.E. 30 miles; from Madras N.E. 470 miles; from Russellcondah S.S.W. 93 miles; from the sea W. 9 miles.

TEL (తెలి - teli, *Tel.*). Brightness [tem].——*Telaga* (తెలగ - telaga, obl., Tel.). A teloogoo-speaking man.——*Telaganya* (తెలగాణ్య - telagánya, obl., Tel.). From (telugu, tel. language so called + ánemu, tel. country). A class of Smarta [q.v.] bramins [bramin, jauty].——*Telingan* (தெலுங்கன் - telungan, Tam.). A teloogoo man.——*Telingana* (تلنگانہ - telingánah, Hind.). From (telingá, hind. telugu people + affix showing relationship). Mahomedan name for Teloogoo country. The eastern part of Telingana was from the beginning of the ninth to nearly the end of the eleventh century in the hands of an obscure race of princes known by the name of Yaudava [q.v.]. The grants of the rajahs of this dynasty date from A.D. 808 to A.D. 1080. The capital was at Narrainpooram and the two chief places were Chundragherry and Tripatty. According to tradition there were eighteen rulers of this line, but little or nothing is known about them. In the western part of the country the Chalookya [q.v.] family were the reigning princes. The parent stock established itself at Calyaun on the borders of Carnautam [q.v.] and Maharashtram [q.v.]. This dynasty was contemporary with the earlier Ballaula [q.v.] sovereigns, and they appear to have reigned from the end of the tenth to the end of the twelfth century. Religious disputes dismembered the kingdom, and the last king Bijjala [q.v.] was deposed by his minister, who was soon after assassinated by some fanatics of the Lingayet [q.v.] sect. Another branch of the Chalookya [q.v.] family ruled over Calingam [q.v.], which is the north-eastern portion of Telingana extending along the sea-coast from Dravira to Orissa. This dynasty lasted throughout the whole of the twelfth and thirteenth centuries, when it was overthrown by one of the Ganapaty [q.v.] kings of Andhram [q.v.]. Andhram was the name of the inland part of Telingana, and the capital of this state was at Warangal, about 80 miles north-east of Hyderabad. Tradition gives the names of Vicramadityan [q.v.] and Shalivahanan [q.v.] as some of the earliest monarchs; after them came the Chola [q.v.] rajahs, who were succeeded about A.D. 515 by a race called Yavana [q.v.]. There were nine rajahs of this house and they reigned until the middle of the tenth century. About this time notice first appears of the family of the Ganapaty rajahs, but they did not become famous till the end of the next century. The rajah at this time was Caucateeya [q.v.], from whom the whole dynasty is sometimes named. He is first mentioned as an officer of state of a feudatory of the Chalookya [q.v.] kings. This dynasty was at its greatest power about the end of the thirteenth century, when, according to local tradition, the whole of the country south of the Godavery was subject to it. Friar jordanus, the quilon bishop of the fourteenth century, has the following:—"there be "also other kings, as the king of telenc, who is very potent and "great; the kingdom of telenc abounds in corn [dhaunyam], "rice [q.v.], sugar [q.v.], wax [mom], honey [shahad] and "honey comb, pulse [dholl], eggs, goats [vellaud], buffaloes "[khoolgah], bee-hives, milk [paul], butter, and in oils [yennay] "of diverse kinds, and in many excellent fruits [pazham], more "than any other part of the Indies [india];" Telenc was Andhram [charitram, raj]. See vol. I (10), (147).——*Teloogoo* (తెలుగు - telugu, Tel.). Andhram [q.v.] of Sanscrit writers. Vadoogoo [q.v.] of the tamuls. Formerly called by Portuguese and English Gentoo [q.v.]. Trilingam [q.v.] is a modern Sanscrit pedantic name. Teloogoo originated in Canarese. The ancient Teloogoo rulers are spoken of as Carnautaca [q.v.] doraloo. The use of Sanscrit is the chief feature of its vocabulary. The pronunciation of Sanscrit among the Teloogoos corresponds with the purest pronunciation used at Benares. Teloogoos have always emigrated to other parts of Southern india, but there are no signs of a converse immigration. Teloogoo is the softest of all the Eastern languages, with the exception of the Malay, which has been called the Italian of Asia, but Teloogoo is a very poor language in everything except outward appearances; it is philologically the weakest of the Dravidian languages [bhaushay]. There is a native proverb:—"The Mahratta is sand; the Hindee is dust; the Canarese "is musk; the Teloogoo is honey; the Ooriya is strength." See vol. I (41), (43), (47), (48); II, 185-192, 193.——*Teloogoo new year* (యుగాది - yugádi, Tel.). Vernacular means commencement of yoog [q.v.]. Otherwise Samvatsaraudy. Lunar [chaundra maunam] festival [pundigay, 6d], subject to intercalation [adhicam]. The first day [tity] of the waxing moon [shooclapacsham] in the first lunar month Cheitram [mansam] between 14th March and 12th April. The natives celebrate its return as a holiday. After having anointed themselves and

bathed they offer the flower of the margosa [neem] tree with tamarind [q.v.] juice and sugar [q.v.] to their household deities and afterwards partake of the same themselves. Alms are then distributed among the poor, and during the day the people divert themselves in the hope of being happy through the year, as they believe their happiness during the year depends on the manner in which they begin it [maryauday, new year, samvatsaram, tamul new year, yoogaudy]. See vol. I (92).

TELINI FLY (चन्द्रक - chandraka, *San.*; ذراريح هندى - zarárihihindí, *Ar.*; دبان هندى - dabánihindí, *Pers.*; تيلنى مكهى - telnímakkhí, *Hind.*; எரிவண்டு - erivandu, *Tam.*). Title from hindostany. San. means eye in peacock's tail; from variegated gold color. Ar. from (zarárih, ar. cantharis or spanish fly + hindí, ar. indian). Pers. from (dabán, pers. cantharis + hindí, ar. indian). Hind. from (telní, hind. specific name + makkhí, hind. fly). Tam. from (eri, tam. to burn + vandu, tam. beetle). Hind. also (badbokízírangí), meaning bad smelling cantharis. Also called Blistering beetle. Mylabris cichorii, meloidæ, coleoptera, holometabola, insecta [poochy], of naturalists [jantoo]. Feeds on flowers of cucurbitaceous plants, especially on Hibiscus esculentus [common bendy]. Insect about an inch in length and the third of an inch broad; the elytra or wing-cases of an obscure yellow, with three large somewhat zigzag transverse black bands; the first band is interrupted and sometimes reduced to three or four spots. Have medicinally irritant and vesicant properties, the active principle being the same with that of the official cantharides, viz., cantharidine. Is a substitute for Spanish fly, cantharis vesicatoria. The following other species also are substitutes for cantharides:—Mylabris indica, Mylabris melanura, Mylabris humeralis, Mylabris proxima, Mylabris orientalis, Lytta assamensis, and Epicauta nepalensis.

TELKACHA (تلكهيا - talkhaiya, *Hind.*). Means bitter plant. Same as Indian caper.

TEM (தேம் - tém, *Tam.*). Sweetness [madhoo, tel].——*Tain* (தேன் - tén, Tam.). From (tém, tam. sweetness). Honey [shahad]. Plant first term. Ex., where transl. is of second term:—Ficus carica (ténatti), ficus glomerata; Guazuma tomentosa (ténbaççai), greenness, (téngáymaram), fruit + tree; Holopetala integrifolia (ténbúççimaram), meaning honey bee + tree. See gloss. paragraphs.——*Tainee* (தேனீ - téní, Tam.): See sep. title.——*Tainimullay* (தேனேமலை - ténémalai, Tam.). From (tén, tam. honey + malai, tam. mountain). Range of hills; North arcot dist., Calastry zemindarry; East of Naugalaupooram and running westerly towards Madanambaid and then northerly towards Vaunellore.——*Tainiyaur* (தேனியாறு - téniyáru, Tam.). From (téní, tam. honey bee + áru, tam. river). River; Madura dist., Periyacoolam tal. Tributary of the Shoorooliyaur. Rises in the Travancore hills and drains the Bodinaickanore valley, which lies between the Travancore and Pulney ranges. Joins the Shoorooliyaur at Allingaram after irrigating one Government village and two villages of the Bodinaickanore zemindarry by means of anicuts [q.v.].——*Tamizhmoony* (தமிழ்முனி - tamizhmuni, Tam.). From (tamizh, tam. the language + muni, tam. sage). Agastyan [q.v.].——*Tamizh mullay* (தமிழ்மலை - tamizhmalai, Tam.). Means tamul mountain. Mount Pothiyam [pothigay], the reputed residence of the sage Agastyan [q.v.] father of the tamul language.——*Tamul* (தமிழ் - tamizh, Tam.). Means sweetness. The Tamul language. An old name by which the people have always themselves called it. Cf. the meaning of Teloogoo and Tooloo. See also Dravida. In the Indian segment of the Roman maps called the Peutinger tables, there is a considerable country covered by two names, Andre indi and Damirice, plainly the Teloogoo and Tamul countries. In another place in the same map a district is called Scytia Dymirice, and it appears to have been this word which, by a mistake of Λ for Δ, Ptolemy wrote Λυμιρίκη. The anonymous geographer of Ravenna repeatedly mentions Dimirica as one of the three divisions of India [q.v.], and the one farthest to the east; giving Madura as one of the cities. Cf. ἀριάκη, the Mahratta or Aryan-speaking country [bhaushay]. For tamul grammar see Lacshanam; for tamul poets see Pauvalan. See vol. I (43), (47), (48), (52), (53); II, 185-192, 205, 209.——*Tamul new year* (வருடப்பிறப்பு - varudappirappu, Tam.). Means year + birth. Title otherwise Varsha pirapp, Varsha sancramanam, Varsha sancramam, Samvatsaraudy [pundigay, 6d]. This falls on April 12, the first day of the first solar [madhyamasowra maunam] month Chittray [mausam]. It is observed in the same way as the Teloogoo new year; but no anointment takes place, the day being dedicated on the part of the Bramins [q.v.] to the spirits of departed ancestors [tarpanam]. On the other hand a good work performed on this day is considered to be worth a hundred done at any other time [maryauday, new year, samvatsaraudy, toloogoo new year, yoogaudy]. See vol. I (92).——*Tamul vedam* (தமிழ்வேதம் - tamizhvétham, Tam.). Same as Devauram, and Tirvyemozhy. Also Cooral [q.v.] of tirvulloovar [q.v.], so called in eulogy. ——*Tembauvany* (தேம்பாவணி - témbávani, Tam.). From (above + pá, tam. verse + ani, tam. ornament). A Tamul poetical work by Beschi [veera maumoony]. The following are specimens of this remarkable work.—"*a*" While the holy family are crossing the desert on their return from Egypt, the Saviour is represented as enumerating in prophecy the several devotees, who in succeeding times are there to devote themselves to austerities. Ejesia mariyal celebrated in the extract is St. Mary the Egyptian, the first female recluse on record in the Christian church. She was discovered by St. Zosimus in the desert beyond Jordan, where she had passed forty-seven years:—அவாவென மதத்தின்சீற்றத் தறிவெனப்பாகன் வீழ்த்த வுவாவென வுடலைக் கைக்கொண் டுக்கநற் றேட்டி மாற்றி யிவாவன தவக்க வட்டை யிட்டிரு விரதத்தூணின் மவாவனமுனிவன் சேர்த்தி வானமும் வியப்பச்செய்வான். வீட்டருநாட்டிற்கேற்ற விழுப்பொரு ளாகநாடி யீட்டருஞ் சிலக்குப்பை யேற்றிநல் லுயிரோ டாக்கைகப் பூட்டரு மேராய்ப் பூட்டிப் புனைநசைச் சேற்றுட்செல்லா வாட்டருந் தவத்தின்பண்டி மதித்த கன் கதியிற்சேர்ப்பான். தேனிமிர்முல்லையாகத் திருந் தறத்தொகுதிநட்டு நானிமிர்தவத்திற் காத்த நொறிப் பொறிவேலிகோலி மேனிமிரொழுக்கநீரை விட்டருண் மணலைப்பாய்த்தி வானிமிருலகிறைறும் வனத்திறங் கசோரன்பூப்பான். ஆரறிதவச்செந்தீயி லைம்பொறி யிரும்பிட்டுதி யேற்றியசெருளின்ஞான விரதமிட்டாய பைம்பொன் றேற்றியமறையச்சாகச் சீலநன்பணிகள் சேர்த்திப் போற்றியதேவமார்பிற் புரோதரனணிப்பூ ணுவான். தீயவுநலவுமுள்ளிற் றேறியபெண்ணிற்றேற லாயவுமரிதே முன்னரழிந்த நாண்வேலிதாவி யேவுங் காமத்தழ்ந்த வெசிசியமரியாள் பின்னர் தூயவுமரிதி லோர்ந்து திறந்திவணெடுநா ணிற்பாள். உண்ணமயின் மற்றியாருங் கண்டதன்பிழை காண்பாரார் நுண்மையி னுற்றபாவ நுதலியுட் டானே கண்ட வுண்மையி னுணர்ந்தவுக்க முளதிறகாகவெட் டிப்பெண்மையின் போர்வைநாணம் பிரிவிலள் போர்த்து நோற்பாள். காமமே பறவைத் தேர்மேற் கசடெனும் பாலைசேர்ந் தாள் வீடமே பறவைத் தேர்மேல் விளைதவக்குறிஞ்சி ஞான வாமமே பறவைத் தேர்மேல் வளரறமுல்லை சேர்ந்தென் னமமே பறவைத்தே தர்மே னயப்பவா னட்டைச்சேர்வாள்—"When by the outrageous fury of the "passions the driver has fallen from his seat, Mahauvana moony "having seized and mounted the elephant, which is the body, "governing him by the strong hook of resolution, will bind "him to the pillar of constancy by the rope of penance, and fill "all heaven with admiration. Desirous of obtaining the wealth "peculiar to the kingdom of heaven, Madittagan having heaped "on the car of unceasing penitence a load of holiness and yoked "to it as oxen his body and soul, avoiding the quagmire "of sinful desire he will arrive at salvation. Having planted "the honey-dropping jasmine-vine of perfect virtue; having "surrounded it with a hedge of subdued senses, to protect it by "penance supported by religion; having let in the water of "strict discipline and spread around it the sand of grace, "Asoren will flourish as a garden whose fragrance reacheth to "heaven. Blowing the red furnace of penance and placing "therein the iron of the five senses, adding the mercury of "bright wisdom, Poorodaran poured the pure gold thus obtained "into the mould of religion, and, having enchased it with precious "jewels of virtue, he became an ornament for the breast of the "God he adored. Though women may inwardly resolve on good "or bad, it is difficult for them to persist in their resolution; "thus, though the egyptian Mary overleaping the fence of "modesty had at first plunged into the sea of carnal desire, yet "at last having determined to perform austerities with the "purest devotion, she will retire from the world and long "remain here. The eye perceives not the color by which it is "darkened, and who are they who see their own faults apparent "to all others? but she remembering of herself her minutest "sins and borne on the wings of mental resolution, produced by "reflecting on the truth she perceived, gave herself up to "devotion covered only by the mantle of female modesty. On "the flying chariot of desire she arrived at the desert of sin; "on the flying chariot of fear she repaired to the mountains "of patience; on the flying chariot of resplendent wisdom she "entered the grove of growing virtue; and on the flying "chariot of my name she shall enter the kingdom of heaven."— "*b*" The following is the description of the country of Judæa:—புள்ளுலாம்விசும்பிடை தொறும்பொரும்படை பொருவ வெள்ளுலாமழை வெண்கொடியுருக்கொடு விளங்கித் தெள்ளுலாந்திரை திளைப்பவுண்டெழுந்துயர் பரந்து வள்ளுலாங்கரு மதகரியினமெனத்தோன்ற. போர்புறங்கொடு பொருந்தலுரத்திறேய்த்தெளிர் வேற் சீர்புறங்கொடு திசைதொறுமிருளறமின்னி வார் புறங்கொடு வளர்முரசொலியெனவதிர்ந்து நீர்புறங் கொடு நீள்முகில் முழங்கின மாதோ. படையெனச் செருப் பகைதகப்படர்ந்தனவல்லாற் கடையெனச் செறி கருணையோடுளுற்றியவள்ளற் கொடையெனச் செழுங் குன்றெடு வயின்றொறுங்குளிர மிடையெனச் சொரி வியன்முகில்வரைவிலபொழிய—"As in an army "arrayed for battle, over all the sky, where the birds rove, white "clouds appear resembling white banners; but, having filled

"themselves with the clear waves of the ocean, they spread "abroad and seem like a mighty herd of black and furious "elephants [q.v.]. Like bright spears glancing from the breasts "of enemies in the field of battle, they dart their lightnings "dissipating darkness in every quarter and, trembling as it were "by the reverberating sound of leather-bound cymbals, the black "and watery clouds thunder aloud. Though at first taking the "appearance of an army prepared for horrid battle, at length, "as the liberal-minded bestow their gifts, diffusing coldness "over the mountains and the whole expanse of the earth, the "extended clouds pour down abundant rain [mazhay]."—"*c*" The following is in praise of the Saviour:—மருட்டுருவலியுருவே மருளறு சினவுருவே அருட்டரு தயையுருவே யளவறு திருவுருவே தெருட்டரு கலையுருவே செயிரறுமனுவுருவே பொருட்டருமணியுருவே பொழிமணவடிதொழுதேன். உரையிலகலை நிலையே யுயரறமடையுரையே கரையிலபடர்கடலே கதியுயிர்பெறுகரையே வரையில சுகநிலையே வளர்தவமடைவரையே புரையிலமனுமகனே புதுமலரடிதொழுதேன். பருமலிமலர்நிழலே மறைமலியுயர்பயனே திருமலிகாமுகிலே சிவமலிதனிமுதலே இருமலியுலகுளர்பிணையொடு தொழுமடியே குருமலியறநிறையே கொழுமலரடி தொழுதேன் -"O "thou who hast the power to cause dread, but art not disturbed "by thine anger! O thou by whose mercy grace is vouchsafed "and unnumbered blessings are confirmed! O thou who art the "knowledge which giveth understanding, who in the human "form destroyedst sin! Who art a precious jewel set in gold! "I worship thy feet diffusing fragrance! O thou who possesseth "knowledge not conveyed by words, and art the word by which "the highest virtue is conferred! O thou who art a broad ocean "without a shore, and the shore attained by beautified spirits! "O thou who art eternal happiness without limit, and the limit "to be attained only by unceasing devotion! O thou the Son of "Man without an equal, I worship the newly blown flower of "thy feet! O thou whose protecting grace resembles the shade "of fragrant flowers, who art the exalted sense of the Scripture, "whose hand, bounteous as the clouds, dispenses felicity, who "art alone the cause of salvation, whose feet those dwelling in "the two worlds adore and adorn with flowers, who art both the "teacher and the path of virtue, I worship the blooming flower "of thy feet [bhaushay]." See vol. I (57).

TEN (തെൻ - ten, *Mal.*; தென் - ten, *Tam.*). South [dacshinam, tisay].——*Tekk* (തെക്ക - tekku, Mal.). From (ten, tam. south); dative turned to nominative. South [dacshinam, terkk, tisay].——*Temmala* (തെമ്മല - temmala, Mal.). From (above + mala, mal. mountain). Hill; Malabar dist., Palghaut tal. On south edge of Palghaut gap. Continuation of the Madura hills, and the Pollachy and Anamullay ranges. It includes the Agamala, Poottoondimala, Vellauttimala, &c., and descends towards the coast into the Palcode and Putticaud hills. Above this southern range lies a high land range of ghauts [q.v.], and forest country running southward which terminates in Cape comorin.——*Tencaray* (தென்கரை - tengarai, Tam.). See sep. title.——*Tencaushy* (தென்காசி - tengási, Tam.). See sep. title.——*Tendisaykone* (தென்திசைக்கோன் - tenrisaikkón, Tam.). From (above + dik, san. direction + kón, tam. king). Yaman [q.v.], the god of death and the regent of the south [ashtadicpaulacan].——*Tengalay* (தென்கலை - tengalai, Tam.). Means southern branch. Southern or original sect of the Ramaunoojeeyans [q.v.]; followers of the ritual and interpretation of Manavaula maumoony [q.v.] of Conjeeveram; as opposed to Vadagalays [q.v.] or northern sect of the same. The difference between the two is explained in detail in the foot-note on Hindoo sects at vol. I (89). See Manavaula maumoony, Vadagalay, and Vedaunta charry. The founder of the Tengalay sect was Manavaula maumoony, who lived about 300 years ago. He was the son of Krishnamacharry and a native of Alwar tirnagary in the Tinnevelly district. He was also called Ramya jamautry moony. The three principal seats of the priests of the Tengalay sect are in Vaunamamullay [nangoonairy], called in sanscrit Totaudry, in the tinnevelly district; Shreerungam [q.v.] in the trichinopoly district; and Tripatty [q.v.] in the north arcot district [jauty].——*Tenga yair* (തേങ്ങയേറു - ténnayéru, Mal.). From (ténna, mal. cocoanut + éru, mal. throw). Cocoanut [q.v.] feast of Malabar. Luni-solar [chaundramaunam] festival [pundigay, 6d]. Held in new moon [amavausyay] of fifth solar month of Chingom [mausam], i.e., between 15th August and 14th September. At this time the S.W. monsoon [q.v.] is supposed to have terminated, cocoanuts [q.v.] and other fruits are therefore taken to the sea and launched into it. After this ceremony, the coast is considered open for country crafts from Bombay southwards.——*Tengye* (టెంకాయ - tenkáya, Tel.; തേങ്ങ - ténna, Mal.; தேங்காய் - téngáy, Tam.). From (above + káy, tam. ripening fruit) was introduced from Ceylon. Cocoanut [q.v.].——*Tenkizhakk* (தென்கிழக்கு - tengizhakku, Tam.). South-east [ashtadic, tisay].——*Tenmerkk* (தென்மேற்கு - tenmérgu, Tam.). South-west [ashtadic, tisay].——*Ten mozhy* (தென்மொழி - tenmozhi, Tam.). Southern speech. Tamul, as opposed to Vadamozhy or Sanscrit the northern speech.——*Ten mullay* (தென்மலை - tenmalai, Tam.). Southern mountain. Pothigay [q.v.], the supposed residence of Agastyán [q.v.]. Vadamullay or northern mountain being Meroo [q.v.] or Tripatty [q.v.].——*Tennal* (தென்னல் - tennal, Tam.). South wind [long shore wind].——*Tennaunday mullay* (தென்னாண்டைமலை - tennándaimalai, Tam.). From (above + ándai, tam. ruler + malai, tam. mountain); the hill seat of government in the south. Hill; Salem dist., Salem and Ootancaray tals.; lat. 11° 52′; long. 78° 31′; from Salem N.E. 25 miles. Continuation of the Shevaroy hills. On the north-east of the Munjavandy pass it is known as the Arnoottimullay and farther north again in Ootancaray talook as the Chittairimullay, and may be said to extend as far as Teertamullay itself, towards which it is known as Caurapaudy mullay, Maukkal, Tarsalmullay and Vellay mullay. The range is divided by two breaks into three parts of very different sizes. The southern part, the Tennaunday mullay proper, which is by far the largest, is divided from the northern part by a very steep valley The lofty ridge thus cut off is known as the Caurapaudy mullay, and is itself fairly separated from the Teertamullay by a deep saddle-shaped depression. The Tennaunday mullay proper is deeply cut into by four great ravines, one on the north side at Taltooky, a second on the east in which the village of Dandamputty is situated, and the third and fourth on the south side. From these two, which unite just before their opening into the Salem-Ahtoor valley, emerges the Vellaur river. On the portion known as the Chittairimullay, the gooroo [q.v.] lives who has spiritual charge of all the salem Malayaulies.——*Tenpaundy* (தென்பாண்டி - tenbándi, Tam.). From (above + pándi, tam. pándiya country). One of the twelve districts in the Tamul country in which bad Tamul or Codoon tamul is spoken. Same as Naunjinaud.——*Tenpoolattaur* (தென்புலத்தார் - tenbulattár, Tam.). From (above + pulam, tam. place). The inhabitants of the southern region, to whom ceremonies for the dead are performed. Yaman [q.v.] is their king; hence his name is Tendisaykone [q.v.], the king of the southern region. The expression may indicate the equatorial origin of the Dravidians. The tamul Cooral [q.v.] has the following:—தென்புலத்தார் தெய்வம் விருந்தொக்கலென்றாங் கைம்புலத்தாறோம்பறலை—"the chief duty of "the householder [grihastan] is to preserve the five-fold rule "towards the spirits of the south, the gods, his guests, his "relations, and himself [mahayanyam, yanyam]."——*Tenraltairone* (தென்றற்றேரோன் - tenrattérón, Tam.). From (tenral, tam. south wind + tér, tam. car). One who has the south-wind [tennal] as his car [rath, tair]. Manmatan [q.v.].——*Terkk* (தெற்கு - tergu, Tam.). The south [tisay].

TENALLY (తెనాలి - tenáli, *Tel.*). From (ténu, can. lofty + áli, can. ridge).—"*a*" Deputy tahsildarry, Kistna district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station; Kistna dist., Repully tal.; pop. 6,074; acres 7,080; lat. 16° 15′; long. 80° 41′; from Bezwada S. 19 miles; from Guntoor E.S.E. 14 miles; from Madras N. 218 miles; from Masulipatam W. 32 miles; from Repully N.W. 20 miles; from Vinoocondah E. 62 miles; from the sea N. 24 miles. On the Nizampatam canal. Temples with inscriptions. In the enclosure of the Ramalingeshwarasawmy temple is a colossal image, Booddhist [booddha] or Jeina [q.v.]. Birth-place of Ramalingam, teloogoo poet [cavy] of the court of Krishna deva royel.

TENCARAY (தென்கரை - tengarai, *Tam.* tenkarai). From (ten, tam. south + karai, tam. shore) [ten].——(1) Talook, Tinnevelly district. Tahsildar's pay Rs. 250. Area 542 square miles. Number of villages 153. Population 287,603. Language Tamul. S. coast of district. Bounded N. by Ottapidauram talook, E. by sea, S. by sea and Nangoonairy talook, W. by Nangoonairy and Tinnevelly talooks. The talook may be taken as an epitome of the whole district, as the district is of the presidency. Palmyra [q.v.] forest spreads over all the extreme southern villages, and the Tamrapurny valley has magnificent alluvial belts of rich and well-watered lands on either side. The northern and north-eastern villages above the river are bare, except for a few babool [q.v.] thickets. To the south the country, while bare for miles, is on the whole so covered with the palmyra [q.v.] palm as to deserve being included in the palmyra forest. The coast villages also abound with the babool [q.v.] or acacia [cantalam, vail]. The river valley here as elsewhere abounds in its higher lands with topes [q.v.] of mangoes [q.v.], iloppay [mohwah], cocoanut [q.v.] and other trees. Black-cotton soil [regar] is found to the north, red sand and red clay to the south and west, tairy [q.v.] or blown sand on the sandstone [manal cull] and clay stone ridges parallel to the coast, and white sand on the sea-coast. There are also rocky ridges both of quartz [vencull] and of gneiss and quarries of the finest stone to be found in the district, the clay stones of the tairy formation. Cotton [q.v.], cholum [q.v.] and bengal gram [q.v.] are the products of the cotton soil, rice [q.v.] only of the river belt; palmyras [q.v.], dry rice [q.v.] and horse-gram [q.v.] of the sandy uplands to the south; and plaintains [q.v.], chillies [q.v.], cocoanuts [q.v.] and vegetables of the ooze or spring [oorny] irrigated lands which skirt the tairy ridge. On the sea-coast, a large population, chiefly Paravar and

Roman catholics, is engaged in fishing. At Cauyalputnam is an extensive salt-pan [ooppalam] tract, whence salt [ooppoo] is conveyed by cart to the inland villages of the talook, as well as to Tinnevelly and thence to other places. Large numbers of Shaunaur [q.v.] in the southern and eastern villages are engaged in the manufacture of palmyra [q.v.] jaggery [q.v.]. Four main channels [q.v.], two on either bank of the river from the Maroothoor and Shreeveicoontam anicuts [q.v.], irrigate the rice lands of the talook, supplying 56 river-fed tanks [q.v.] besides a large area of channel-fed lands. There are also 221 rain-fed tanks. River-irrigated lands extend to 34,549 acres and watered from rain-fed tanks to 10,135 acres. The Maroothoor anicut [q.v.] is an ancient work; Shreeveicoontam recent. The talook has two recognized sea-ports, viz., Cauyalputnam and Coolashekharaputnam. Places of archæological interest:—Akkashanlay, Alwar tirnagary, Auditchanullore, Auttore, Caroongoolam, Caunam, Cauyal, Congaroyacoorchy, Coolashekharaputnam, Coorangany, Cooroombore, Cuttaurimungalam, Keel vullanaud, Korkay, Manapaud, Mauramungalam, Maurtaundapacherry, Moorpanaud, Naul mauvady, Peroongoolam, Peroor, Pooliyangoody, Poothoocoody, Pullacoorchy, Pulliputt, Rettay tripatty, Shairacoolam, Shendamungalam, Sholaycoodiyiroopp, Shreeveicoontam, Tencaray, Tentirpairy, Tolappanpunnay, Tricalore, Trichendore, Vadakk caurcherry, Vagoottauncooppam, Veiravam, Vulnaud hill. Principal Trig. stations:—Pillaivalay, Trichendore mantapam, Vulnaud, Yittamoly. The leading places, &c., in the talook are the following.——*Alwar tirnagary* (ஆழ்வார்த்திருநகரி - ázhvárttirunagari, Tam. álvártirunagari *). From (ázhván, tam. vaishnava devotee + tiru, tam. holy + nagarí, san. city); called after nummaulwar who was born there [alwar]. Tam. also (kurugúr), meaning vishnoo, the dwarf + town; also (kurugai), meaning vishnoo, the dwarf + place; also (tirungari), meaning holy + city. Also erroneously Alwar tinnevelly. Town, Place of pilgrimage; pop. 5,077; lat. 8° 36′; long. 77° 59′; from Shreeveicoontam S.E. 4 miles; from Tinnevelly E.S.E. 21 miles; from the sea W. 11 miles. Important town, on right bank of Chindintooray. Large and ancient Vishnoo temple with inscriptions. Annual festivals in February and May.——*Auditchanullore* (ஆதிச்சநல்லூர் - áthiççanallúr, Tam.). From (áditya, san. sun + nal, tam. good + úr, tam. village). Sanscrit name (ádityapura), meaning sun town. Village, Hill; pop. 721; from Shreeveicoontam S. 20 miles; from Tinnevelly S.E. 32 miles; from the sea N. 2 miles. Ancient sepulchral urns found here, containing bones and pottery [mady moottaur tauzhy].——*Aulandalay* (ஆலந்தலை - álandalai, Tam.). From (álam, tam. the banyan tree, ficus bengalensis, linn. + talai, tam. field). Village; lat. 8° 28′; long. 78° 10′; from Shreeveicoontam E.S.E. 18 miles; from Tinnevelly E.S.E. 34 miles. Harbour. A hamlet of Trichendore.——*Auttore* (ஆத்தூர் - áttúr, Tam.). From (áru, tam. river + úr, tam. village). Town; pop. 2,901; acres 2,057; lat. 8° 37′; long. 78° 07′; from Shreeveicoontam E. 11 miles; from Tinnevelly E.S.E. 28 miles; from the sea W. 4 miles. Near mouth of Tamrapurny. Temple with inscriptions. Festivals in February and July.——*Cadautchapooram* (கடாட்சப்புரம் - kadádchappuram, Tam.). From (katáksha, san. favor shown by the glance + pura, san. town). Village; pop. 2,696; acres 2,764; lat. 8° 26′; long. 78° 0′; from Shreeveicoontam S.S.E. 15 miles; from Tinnevelly S.E. 29 miles; from the sea W. 6 miles. Mission station.——*Caraychoott* (கரைச்சுத்து - karaiççuttu, Tam.). From (karai, tam. shore + shuttu, tam. circuit). Town; pop. 5,937; acres 4,443; lat. 8° 25′; long. 78° 05′; from Shreeveicoontam S.S.E. 17 miles; from Tinnevelly S.E. 31 miles; from the sea W. 3 miles. Considerable trade in jaggery [q.v.] and rice [q.v.].——*Cauyal* (காயல் - káyal, Tam.). See sep. title.——*Cauyalputnam* (காயற்பட்டணம் - káyarbattanam, Tam.). See sep. title.——*Christianagaram* (கிறிச்த்துவநகரம் - kiristtuvanagaram, Tam.). Christ's town. Village; lat. 8° 26′; long. 78° 04′; from Shreeveicoontam S.S.E. 16 miles; from Tinnevelly S.E. 31 miles; from the sea W. 3 miles. Mission station. A hamlet of Caraychoott.——*Coolashekharaputnam* (குலசேகரப்பட்டணம் - kulasegarappattanam, Tam.). See sep. title.——*Korkay* (கொற்கை - korgai, Tam.). See sep. title.——*Manapaud* (மணப்பாடு - manappádu, Tam.). See sep. title.——*Mauramungalam* (மாறமங்கலம் - máramangalam, Tam.). See sep. title.——*Meynaunapooram* (மெய்ஞானப்புரம் - meyñánappuram, Tam.). See sep. title.——*Moodalore* (முதலூர் - muthalúr, Tam.). From (muthal, tam. first + úr, tam. village). Village; pop. 2,852; acres 2,833; lat. 8° 25′; long. 78° 00′; from Shreeveicoontam S.S.W. 15 miles; from Tinnevelly S.E. 28 miles; from the sea W. 8 miles. Built by Shaunaur [q.v.] converts in 1799. They were converted in 1797 by one of their own caste, who became a Christian at Taujore and was sent as a catechist.——*Nazareth* (நாசரத்து - násarattu, Tam.). See sep. title.——*Nulloor* (நல்லூர் - nallúr, Tam.). From (nal, tam. good + úr, tam. village). Village; pop. 1,978; acres 1,776; lat. 8° 35′; long. 78° 06′; from Shreeveicoontam E.S.E. 11 miles; from Tinnevelly E.S.E. 28 miles; from the sea W. 6 miles.——*Palaya cauyal* (பழையகாயல் - pazhaiyagáyal, Tam.). See sep. title.——*Pannambauray* (பன்னம்பாறை - pannambárai, Tam.). From (panai, tam. palmyra tree, borassus flabelliformis, linn. + párai, tam. rock). Village; pop. 1,532; acres 5,687; lat. 8° 28′; long. 77° 59′; from Shreeveicoontam S. 11 miles; from Tinnevelly S.E. 25 miles; from the sea W. 12 miles. Quarry for cut-stone.——*Pillaivalay* (பிள்ளைவிளை - pillaivalai, Tam.). From (pillai, tam. a member of the caste + vilai, tam. high dry ground). Trig. station; lat. 8° 42′ 23·24″; long. 78° 11′ 19·04″; height 21 feet; from Palaya cauyal N.E. 4 miles; from Tencaray E.N.E. 15 miles; from the sea W. ½ mile.——*Poonnacauyal* (புன்னக்காயல் - punnakkáyal, Tam.). See sep. title.——*Sawyerpooram* (சாயெர்ப்புரம் - sáyerþpuram, Tam. sawyerpuram *). Called after a missionary. Village; pop. 4,047; acres 1,054; lat. 8° 41′; long. 78° 05′; from Shreeveicoontam E.N.E. 9 miles; from Tinnevelly E. 24 miles; from the sea W. 7 miles. Mission station founded by Dr. Pope.——*Shatauncoolam* (சாத்தான்குளம் - sháttángulam, Tam. sátánkulam *). From (sháttan, tam. aiyyanár, the god + kulam, tam. tank). Town; pop. 5,430; acres 5,315; lat. 8° 26′; long. 77° 57′; from Shreeveicoontam S. 14 miles; from Tinnevelly S.E. 25 miles; from the sea W. 12 miles. Many money lenders.——*Shirtondanullore* (சிறுத்தொண்டநல்லூர் - shiruttondanallúr, Tam.). From (shiruttondan, tam. a shaiva devotee + nal, tam. good + úr, tam. village). Town; pop. 5,914; acres 1,013; lat. 8° 38′ N.; long. 78° 04′ E.; from Shreeveicoontam E. 8 miles; from Tinnevelly E.S.E. 24 miles; from the sea W. 7 miles.——*Shreeveicoontam* (சிரீவைக்குண்டம் - shirívaikkundam, Tam.). See sep. title.——*Tamrapurny* (தாம்பிரப்பருணி - támbirapparuni, Tam.). See sep. title.——*Tencaray* (தென்கரை - tengarai, Tam.). See below.——*Tricalore* (திருக்கழூர் - tirukkalúr, Tam.). From (tiru, tam. holy + kazhu, tam. eagle + úr, tam. village). Village; pop. 1,984; acres 1,107; lat. 8° 35′; long. 78° 00′; from Shreeveicoontam S.E. 5 miles; from Tinnevelly E.S.E. 20 miles; from the sea W. 12 miles. Vishnoo and Shiva temples.——*Trichendore* (திருச்செந்தூர் - tiruççendúr, Tam.). See sep. title.——*Veerapaundiyanputnam* (வீரப்பாண்டியன்பட்டணம் - vírappándiyanbattanam, Tam.). From (vírapándya, san. the pándiya king víran + pattana, san. town). Village, Port; pop. 1,963; acres 2,274; lat. 8° 31′; long. 78° 10′; from Cauyalputnam S.S.W. 3 miles; from Madras S.S.W. 343 miles; from Shreeveicoontam E.S.E. 17 miles; from Tinnevelly E.S.E. 33 miles; from Trichendore N. 2 miles. On Gulf of Manaar. The Trichendore reef affords sheltered anchorage to coasters off this town, which is second only to Tuticorin.——*Vulnaud* (வல்லநாடு - vallanádu, Tam.). From (val, tam. strong + nádu, tam. country). Village, Hill; pop. 2,365; acres 1,437; lat. 8° 43′; long. 77° 53′; from Shreeveicoontam N.N.W. 6 miles; from Tinnevelly E. 11 miles; from the sea W. 21 miles. Of considerable antiquity. Old urn-burying places [mady moottaur tauzhy] in the hill. Annual car festival. Trig. station in lat. 8° 42′ 48·13″; long. 77° 55′ 37·16″; height 1,023 feet; from Tencaray N.N.W. 8 miles; from Vulnaud E. 3 miles; from the sea W. 19 miles.——*Wodangoody* (ஓடன்குடி - odangudi, Tam.). From (ódam, tam. ferry boat + kudi, tam. village). Village, Port; lat. 8° 26′; long. 78° 05′; from Coolashekharaputnam N.W. 2 miles; from Madras S.S.W. 350 miles; from Nangoonairy E. 26 miles; from Tinnevelly S.S.E. 31 miles; from Vijayaputty N.E. 25 miles. On Gulf of Manaar, about 41 miles N.E. of Cape comorin.——*Yittamoly* (இட்டமொழி - ittamozhi, Tam.). From (ittu, tam. small + mózhai, tam. underground stream). Trig. station; lat. 8° 22′ 27·41″; long. 77° 55′ 24·24″; height 219 feet; from Arasore W.N.W. 3 miles; from Tencaray S. 18 miles; from the sea W. 13 miles.——**(2)** Town; Tinnevelly dist.; pop. 5,956; acres 1,876; lat. 8° 36′; long. 77° 59′; from Madras S.S.W. 344 miles; from Palamcottah E.S.E. 16 miles; from Shermadevy E. 26 miles; from Shreevillipoottore S.S.E. 65 miles; from Tinnevelly E.S.E. 19 miles; from Tuticorin S.W. 20 miles; from the sea W. 14 miles. On right bank of Tamrapurny.

TENCAUSHY (தென்காசி - tengási, *Tam.* tenkási *). From (ten, tam. south + káshi, san. benares) [ten]. Sanscrit name (dakshinakáshi), meaning the same.——**(1)** Talook, Tinnevelly district. Tahsildar's pay Rs. 175. Area 374 square miles. Population 154,940. Language Tamul. W. of district. Bounded south by Ambasamoodram talook; east by Shuncaraneinarcoil and Tinnevelly talooks; west by the Western ghauts; and north by Shuncaraneinarcoil talook. This tract was ruled by several independent kings in the time of the Paundy [q.v.] dynasty [raj]. Many of the richest villages in the bay formed by the mountains around Courtallam belong to the Travancore government [shencottah], which in ancient times, and when Tinnevelly was constantly plunged in war, temporarily possessed a considerable area here, as well as in the extreme south of the district. The country is undulating with a succession of hills and valleys. Red clays and loams prevail to the west, sandy and poor soil to the east and south. At the northern boundary a few villages belong to the black cotton series, being outlying patches of the great black cotton plain [regar] of north-eastern Tinnevelly. Agriculture is the chief pursuit of the people; weaving is also prevalent but is declining. Jaggery [q.v.] is manufactured to a small extent. Trade in rice [q.v.] and cloth is carried on with Travancore and coffee [q.v.]; and spices, the

products of the western ghauts [q.v.], are also exported from this talook. The Chittaur, with its various branches, drains an extent of mountains not much less than the basin of the Tamrapurny, and though a much smaller river, irrigates a large area in many villages spread over a wide bay enclosed by a bend in the direction of the range, as well as along its course eastward to the limits of the talook and beyond till it joins the Tamrapurny a few miles north-east of Tinnevelly town. The villages near the foot of the mountains obtain two crops [vellaumay], one from each monsoon [q.v.]; those further out only one in the north-east monsoon. The river and its affluents are crossed by numerous anicuts [q.v.] feeding irrigation channels [q.v.] and many tanks [q.v.]. Zemindarries:—Aunacoolam, Chokkamputty, Coolayanairy, Coonnacoody, Cumbanairy poothoocoody, Mannadicherry, Neinaur agaram, Oormeniyalagyaun, Ootoomullay, Shivanaudanore, Shooranday, Sillarayporavoo, Veiranvicoolam, Vullam. Places of archæological interest:—Courtallam, Panboolly, Shivalaurcoolam, Shooranday, Tencaushy, Yilanjy. The leading places, &c., in the talook are the following.——*Aulangoolam* (ஆலங்குளம் - álangulam, Tam.). From (álam, tam. banyan tree, ficus bengalensis, linn. + kulam, tam. tank). Village; pop. 2,591; acres 3,022; lat. 8° 52′; long. 77° 33′; from cusbah E.S.E 15 miles. Travellers' bungalow [q.v.], and chuttram [q.v.].——*Cadayanullore* (கடையநல்லூர் - kadaiyanallúr, Tam.). From (kadaiyan, tam. a man of the laboring class + nal, tam. good + úr, tam. village). Town; pop. 8,200; acres 5,650; lat. 9° 05′; long. 77° 23′; from Tencaushy N.N.E. 8 miles; from Tinnevelly N.W. 34 miles. Trading town east of a ridge of low hills of same name at junction of Travancore and Atchancoil passes [ghaut]. Cloths largely manufactured by Lubbays [q.v.] for exportation to Travancore. Chuttram [q.v.]. On main road from Courtallam to Madura.——*Chittaur* (சிற்றாறு - shittáru, Tam.). See sep. title.——*Chokkamputty* (சொக்கம்பட்டி - shokkambatti, Tam.). From (shokkan, tam. shiva, the beautiful + patti, tam. village). Village; pop. 6,215; acres 30,363; lat. 9° 08′; long. 77° 24′; from Tencaushy N.N.E. 12 miles; from Tinnevelly N.W. 36 miles. Seat of an ancient zemindarry [q.v.] recently dismembered and now held in eighteen mittahs [q.v.]. Old zemindar's palace in ruins.——*Coolashekharaputty* (குலசேகரப்பட்டி - kulaségarappatti, Tam.). From (kulashékhara, san. the family head, proper name + patti, tam. village). Coolashekharan's hamlet. Village; acres 5,618; lat. 8° 57′; long. 77° 25′; from Tencaushy E S.E. 5 miles; from Tinnevelly N.W. 26 miles. Chuttram [q.v.]. On main road from Courtallam to Tinnevelly. Inhabited principally by Shaunaur [q.v.] who carry on extensive manufacture of palmyra [q.v.] jaggery [q.v.] and sugar-candy [sugar].——*Coolayanairy* (குலையனேரி - kulaiyanéri, Tam.). From (kolaiñan, tam. a hunter who lives by killing + éri, tam. tank). A mittah village; pop. 1,849; lat. 9° 01′; long. 77° 28′; from cusbah E.N.E. 9 miles. One of eighteen mittahs into which old Chokkamputty zemindarry has been split up. Peshcush Rs. 674.——*Courtallam* (குற்றாலம் - kuttálam, Tam.). See sep. title.——*Cumbanairy poothoocoody* (கம்பனேரிப்புதுக்குடி - kambanéripputhukkudi, Tam.). From (kamban, tam. proper name + éri, tam. tank + puthu, tam. new + kudi, tam. village). Zemindarry village; pop. 3,506; square miles $1\frac{5}{16}$; lat. of village 9° 04′; long. 77° 24′; from Tencaushy N.N.E. 9 miles; from Tinnevelly N.W. 32 miles. One of the eighteen mittahs [q.v.] into which old Chokkamputty zemindarry [q.v.] has been split up. Peshcush Rs. 20,063.——*Krishnaupooram* (கிருட்டிணபுரம் - kiruttináppuram, Tam.). From (krishna, san. god vishnu + pura, san. town). Village; pop. 3,683; acres 4,344; lat. 9° 06′; long. 77° 23′; from Tencaushy N.N.E. 10 miles. Inhabited by bramins and has a tank Hanoomanta teertam.——*Melpavoor* (மேலப்பாவூர் - mélappavúr, Tam.). From (mél, tam. west + pávu, tam. yarn + úr, tam. village). Town; pop. 2,156; acres 2,174; lat. 8° 57′; long. 77° 25′; from Tencaushy E. 5 miles; from Tinnevelly N.W. 26 miles. On the right bank of a canal from the Chittaur. Large irrigation tank.——*Oormeniyalagyaun* (ஊர்மேனியழகியான் - úrméniyazhagiyán, Tam.). From (úr, tam. village + méni, tam. color + azhagu, tam. beauty); a beautiful village. Zemindarry village; pop. 2,345; lat. of village 9° 02′; long. 77° 24′; from Tencaushy N.E. 6 miles; from Tinnevelly N.W. 30 miles. One of eighteen mittahs [q.v.] into which old Chokkamputty zemindarry [q.v.] has been split up. Peshcush Rs. 2,122.——*Ootoomullay* (ஊற்றுமலை - úttumalai,* Tam.). From (úttu, tam. spring + malai, tam. hill). Zemindarry village; pop. 2,630; acres 74,049; lat. of village 8° 59′; long. 77° 34′; from Tencaushy E.N.E. 15 miles; from Tinnevelly N.N.W. 21 miles. One of the most important zemindarries in district, consisting of fifty-two villages and 79,850 acres, and paying a peshcush [q.v.] of Rs. 26,962. Contains a considerable area of well-watered land under Chittaur river. Zemindar [q.v.] belongs to Maravar [q.v.] caste, and is a descendant of one of the ancient Tinnevelly poligars [q.v.]. The seat of zemindarry [q.v.] has since been transferred to Veerakeralampoothore a zameen [q.v.] village on the banks of the Chittaur, 7 miles south-west of Ootoomullay.——*Shivanaudanore* (சிவநாடானூர் - shivanádánúr, Tam.). From (shivanádán, tam. proper name + úr, tam. village). Zemindarry village; pop. 1,532; lat. of village 8° 54′; long. 77° 24′; from Tencaushy S.E. 5 miles; from Tinnevelly W.N.W. 25 miles. One of eighteen mittahs into which old Chokkamputty zemindarry has been split up. Peshcush Rs. 474.——*Shooranday* (சுரண்டை - shurandai, Tam.). From (shuram, tam. barren tract + andai, tam. vicinity). Village; pop. Ayan shooranday 4,189; Zameen shooranday 3,290; acres 6,028; lat. 8° 58′; long. 77° 28′; from Tencaushy E.N.E. 8 miles; from Tinnevelly N.W. 25 miles. Shiva temple with inscriptions. Weekly fair on Monday. Mission bungalow [q.v.]. Peshcush Rs. 668.——*Tencaushy* (தென்காசி - tengási, Tam.). See below.——*Veerakeralampoothore* (வீரக்கேரளம்புதூர் - vírakkéralambuthúr, Tam.). From (vírakkéralan, tam. proper name + puthu, tam. new + úr, tam. village); after Veerakeralan one of the princes of Travancore. Zemindarry, Village; pop. 5,198; lat. of village 8° 56′; long. 77° 29′; from Tencaushy E. 10 miles; from Tinnevelly N.W. 22 miles. See Ootoomullay above.——**(2)** Town, Talook head-quarters; Tinnevelly dist., Tencaushy tal.; pop. 12,861; acres 3,813; lat. 8° 58′; long. 77° 21′; from Madras S.W. 344 miles; from Palamcottah W.N.W. 34 miles; from Shermadevy N.W. 26 miles; from Shreevillipoottore S.S.W. 44 miles; from Tinnevelly N.W. 31 miles; from Tuticorin W. 59 miles. On Tinnevelly-Quilon road and in left bank of Seetanuddy. Formerly fortified, but fortifications destroyed during poligar [q.v.] war in 1790. Old Shiva temple with inscriptions. A number of rude stone monuments are to be seen. Five dolmens [coday cull] in the temple of Vishwanauta sawmy. Sepulchral urns [mady moottaur tauzhy] abound. Of the five large temples in present use, three are to Shiva [q.v.] and two to Vishnoo [q.v.]. Of these, Caushy vishwanauta sawmy is finest and best sculptured. Two car festivals [ratotsavam]. Old Roman catholic church built in 1786, at which a festival is celebrated in September. Is a busy centre of trade. One-third of the population are Lubbays [q.v.], principally employed in manufacture of cloths exported to Travancore. Two bridges across Chittaur. There is a Tamul proverb:—தென்காசி ஆசாரம் திருநெல்வேலி உபசாரம்—"the manners of Tencaushy, and the ceremoniousness of Tinnevelly;" both are hollow. The following are the travelling distances by road from Tencaushy to different places:—

To	Viâ	Miles and Furlongs.	
Palamcottah ...	Aulangoolam	34	4
Palamcottah ...	Cadayam	38	3

TENKY (पाकत - pákata, *Mahr.*; తెంకి - tenki, *Tel.*; திருக்கை - tirukkai, *Tam.*). Tam. from (tirugu, tam. to twist); twisted or rugged one. Title otherwise Ray, Skate, Thornback. The genus Trygon, trygonidæ, batoidei, plagiostomata, chondropterygii, pisces [matsyam, 50], of naturalists [jantoo]. Sting rays. Body smooth or with tubercles; color very variable. The species best known to the natives are the Shark tenky and the Tiger tenky to which they add several other genera; see below.——*Banded tenky* (మూకలతెంకి - múkalatenki, Tel.; சப்பைத்திருக்கை - shappaittirukkai, Tam.). Tel. from (múka, tel. crowd + tenki, tel. ray, trygon genus), from going in shoals. Tam. from (shappai, tam. flat + tirukkai, tam. thornback, trygon genus). Tel. also (rájatenkı), meaning shining ray fish. Tam also (tappukkúli), meaning small drum + stunted one, flat, short one. Myliobatis nienhofii, myliobatidæ, batoidei, plagiostomata, chondropterygii [matsyam, 51], of naturalists. Alias Raja and Mookarah tenkee; Raja fasciata, nieuhofii. Raja tenkee from teloogoo; mookarah tenkee from teloogoo. Fleshy prolongation of snout short; body smooth; olive superiorly, tinged externally with reddish hue and a dark outer margin to the disk; young have about seven blue bands across the disk and two more between or close to the eyes; as the fish increases in size, first the bands on the head disappear and finally those on the body; sea. Myliobatis aquila is Eagle ray or Whip ray.——*Black-tail tenky* (राज - rája, San.; ఈలతెంకి - ílitenki, Tel.; തിരണ്ടി - tiranti, Mal.; கருவாற்றிருக்கை - karuváttirukkai, Tam.). San. from (ráj, san. to shine); from variegated back. Tel. from (íla, tel. shyness + tenki, tel. ray, trygon genus). Mal. from (tirá, mal. wave + andu, mal. to approach). Tam. from (karumai, tam. blackness + vál, tam. tail + tirukkai, tam. thornback, trygon genus). Ætobatis narinari, myliobatidæ, batoidei, plagiostomata, chondropterygii [matsyam, 51], of naturalists. Specific name perhaps from bengalee. Alias Ætobatis flagellum, indica, laticeps, latirostris; Goniobatis flagellum, macroptera; Myliobatis eeltenkee, narinari; Raja flagellum, guttata, narinari, quinqueaculeata; Stoasodon narinari. Eeltenkee from teloogoo; raja from sanscrit. Comparative proportions vary greatly with age; grayish-olive sometimes greenish-olive or leaden-gray above, usually covered from beyond the occiput with numerous dirty-white or bluish spots edged with black; abdominal surface white; tail black; iris golden-green, teeth greenish-yellow; in the immature the back is of a deep leaden color, and the spots hardly apparent; seas and estuaries upwards of 6 feet in width;

eaten raw and salted; livers employed to produce oil and fins exported to china with those of other rays, skates and sharks [soorah]; no other common species here.——*Bristly tenky* (राज - rája, San.; முள்ளந்திருக்கை - mullandirukkai, Tam.). Title from spines. San. from (ráj, san. to shine). Tam. from (mul, tam. thorn + tirukkai, tam. thornback, trygon genus). Title otherwise Sting ray. Urogymnus asperrimus, trygonidæ, batoidei, plagiostomata, chondropterygii [matsyam, 50], of naturalists. Alias Anacanthus asperrimus; Raja asperrima; Rhachinotus africanus; Urogymnus africanus. Raja from sanscrit. Snout scarcely projecting; body densely covered with small heart-shaped scales, between which are numerous thorns which are generally erect, and are continued posteriorly to the first fifth of the tail, where they cease; on the pectoral fins are numerous small conical spines, irrespective of those over the body amongst the tubercles; greenish above, white beneath; sea; no other common species here.——*Flat tenky* (மட்டத்திருக்கை - mattattirukkai, Tam). Tam. from (mattam, tam. flat + tirukkai, tam. thornback, trygon genus). Tam. also (kuruvittirukkai), meaning small bird + thornback. Rhinoptera adspersa, myliobatidæ, batoidei, plagiostomata, chondropterygii [matsyam, 51], of naturalists. Notch on snout shallow; greenish brown superiorly, becoming lighter at the edges of the disk; sea; no other common species here.——*Large tenky* (తెంకికుంచె - tenkikunche, Tel.; பெருந்திருக்கை - perundirukkai, Tam.). Tam. from (perum, tam. big + tirukkai, tam. thornback, trygon genus). Tel. also (rájatenkikunche); (rájatenki), maning bright ray fish. Tam. also (tappukkuttit-tirukkai), meaning small tabour + short + thornback, trygon genus. Pteroplatea micrura, trygonidæ, batoidei, plagiostomata, chondropterygii [matsyam, 50], of naturalists. Alias Dasyatis microura; Pastinaca annulata, kunsul; Pteroplatea annulata; Raja tenkee kunsul, micrura, pæcilura; Trygon pæcilurus. Raja tenkee from teloogoo Skin smooth; reddish-brown; tail annulated with white and brown; superiorly in the centre of each light ring there is generally a brown spot; young are covered all over with small brown spots; sea; no other common species here.——*Shark tenky* (गोवालपाकत - góválapákata, Mahr.; ترکامچهی - tirkámaçchí, Hind.; వాలుగతెంకి - válugatenki, Tel.; ஆடுவாலாண்திருக்கை - áduválándirukkai, Tam.). Hind. from tamul, meaning tenky fish. Tel. from (váluga, tel. wallago attu + tenki, tel. ray, trygon genus). Tam. from (ádu, tam. to shake + vál, tam. tail + tirukkai, tam. thorn back, trygon genus). Trygon sephen, trygonidæ, batoidei, plagiostomata, chondropterygii [matsyam, 50], of naturalists. Alias Hypolophus sephen; Raja sancur, sephen; Trygon forskalii. Length of tail three to four times that of the body; snout more obtuse in adults; upper surface of head and body and base of tail covered by thick, concave, or flat-headed, several-sided tubercles; upper surface of immature is reddish-brown; in adult lead-colored, becoming black in two-thirds of the tail; sea; grows to a large size; most common during south-west monsoon, when it approaches shore; from the skin of its back some of the shagreen of commerce used to be prepared; wounds inflicted by the spine of its tail are dangerous.——*Tiger tenky* (పులితెంకి - pulitenki, Tel.; ଶଙ୍କୁଷ - sankush, Oor.; சோனகத்திருக்கை - shónagattirukkai, Tam.). Title from brown markings. Tel. from (puli, tel. tiger + tenki, tel. ray, trygon genus); cf. stegostoma tigrinum. Tam. from (jónaka, mal. mahomedan + tirukkai, tam. thornback, trygon genus); cf. trichiurus haumela. Title otherwise English ray. Trygon uarnak, trygonidæ, batoidei, plagiostomata, chondropterygii [matsyam, 50], of naturalists. Alias Pastinachus uarnak; Raja uarnak; Trygon ellioti, gerrardi, macrurus, pareh, pastinacoides, russellii, uarnacoides, undulatus, variegatus. Tail three to four times as long as body; colors vary according to age; up to when breadth of disk is about 9 inches the body is of a yellowish brown darkest along the back, and the abdomen white; a short distance beyond the commencement of the tail it is irregularly annulated with alternate narrow light brown, and broad or narrow dark-brown rings; as age increases, black spots appear on body, and when it has attained 3 feet across its disk it is light brown or greenish-olive, covered with lighter and in some almost white spots, or reticulated with white lines, whilst the anterior extremity of the tail also shows the remains of the rings; the adult is uniformly brownish or greenish-olive; iris golden; occasionally there are light spots on the posterior portion of the disk; in the cold season, these fish are perceived springing out of water; they devour large quantities of small fish; seas and estuaries; immature captured in backwaters; wounds from their caudal spines are much dreaded; attain 5 feet or more across disk. Trygon vastinaca is Sting ray or Fire flaire.

TEPPAM (తెప్ప - teppa, Tel.; தெப்பம் - teppam, Tam.). From (télu, tel. to float). Floating raft, catamaran [catamaran, inam].——*Teppacoolam* (தெப்பக்குளம் - teppakkulam, Tam.). From (above + kulam, tam. tank). A square stone tank [q.v.] for religious uses, especially for the floating festival [conair].

TEROO (தெரு - teru, Tam.). From (tiri, tam. to walk). Street.——*Tara* (തറ - tara, Mal.). Similar to (teru, tam.). A village or quarter. The tara was formerly the Nayar [q.v.] territorial unit of organization for civil purposes. The taras were governed by representatives of the Nayar caste, styled carnavens [q.v.] or elders. When combined in deliberation, the taras formed a coot [q.v.] or assembly of the naud [q.v.]. Is the west coast equivalent of the village east of the ghauts [q.v.]. See vol. II, 104.——*Tarwaud* (തറവാട് - taraváta, Mal.). See sep. title.——*Toorla* (తుర్ల - turla, Tel.). From (turru, tel. village). Locative plural. Suffix in place names; as Ventoorla, meaning village of the ears of corn.——*Toorty* (తుర్టి - turti, Tel.). Oblique form of (turru, tel. village); cf. toorla. Village.

TETTAH (தேற்று - téttá, Tam.). From (tír, tam. to clean). Same as Clearing nut.

TEVAN (தேவன் - tévan, Tam.). The tamul form of the sanscrit Deva or god. There is a tradition that they are supposed to be descended from Indran [q.v.]. Plural is Tevar. The tribal designation of the Marava race in Ramnaud, Madura, Shivagunga, and Tinnevelly [marava].——*Tegnapatam* (தேவனாம்பட்டணம் - tévanámbattanam, Tam.). Native name of the site of Fort St. David.

TEY (தே - té, Tam.). Grace.——*Teppermaul* (தேப்பெருமாள் - tépperumál, Tam.). From (above + perumál, tam. vishnu, the great god). Vishnoo, the gracious god. Hindoo 2nd or pers name. Common among non-bramin veishnavites [peyar].

TEYMEZ (تی میز - temez, *Hind.*). Breakfast [khanah, teeny].

TEZAUB (अम्ल - amla, *San.*; تیزاب - tezáb, *Pers.* and *Hind.*; اسام - asám, *Malay*; ಹುಳಿ - huli, *Can.*; పులుపు - pulipu, *Too.*; పులుసు - pulusu; *Tel.*; പുളിപ്പ് - pulippu, *Mal.*; புளிப்பு - pulippu, *Tam.*). Title from persian. San. means sour. Pers. from (tez, pers. corrosive + áb, pers. water). Mal. from tamul. Tam. from (puli, tam. sourness). Acid, mineral or vegetable [drauvacam]. Taste is sour; in the stronger kinds acrid and corrosive; combines with water in every proportion, with a condensation of volume and evolution of heat; volatilised or decomposed at a moderate heat; changes the purple colors of vegetables to a bright red; unites in definite proportions with the alkalies [cauram], earths [munn], and metallic oxides [paspam], and forms salts [ooppoo]. The following are principal tezaubs [poolipp]. For Benzoic acid, see Sambrauny poo; for Arsenious acid, Soofaid soombal; for Citric acid, Yelimitchay poolipp.——*Gandhac tezaub* (गन्धकद्रावक - gandhakadrávaka, San.; ماءالکبریت - máulkibrít, Ar.; تیزاب گوگرد - tezábigogird, Pers.; گندک کا تیزاب - gandakkátezáb, Hind. and Dec.; ಗಂಧಕದ್ರಾವಕ - gandhakadrávaka, Can.; గంధకద్రావకము - gandhakadrávakamu, Tel.; ഗന്ധകദ്രാവകം - gandhakadrávakam, Mal.; ගන්ධකරස - gandhakarasa, Singh.; கந்தகத்திராவகம் - kandagattirávagam, Tam.). Title from hindostany. San. from (gandhaka, san. sulphur + drávaka, san. essence). Ar. from (má, ar. water + kibrít, ar. sulphur). Pers. from (tezáb, pers. acid + gogird, pers. sulphur). Hind. from (gandak, hind. sulphur + tezáb, pers. acid). Tel. from sanscrit. Singh. from (gandhaka, san. sulphur + rasa, san. essence). Pers. also (arkigogird), meaning sulphur essence. Hind. also (gandhakkáitr), meaning essence of sulphur. Sulphuric acid. Otherwise Vitriolic acid, Oil of vitriol, Spirits of vitriol. Acidum sulphuricum of chemists. Colorless oily fluid, acrid, corrosive, and intensely sour. Procured by burning a mixture of about eight parts of sulphur [gandhac] and one of nitre [shorah] in a furnace so placed that the resulting fumes may pass into close chamber containing water; the water gradually becomes a dilute sulphuric acid, and the acid itself is procured by evaporation; its manufacture here is very ancient. Is a corrosive poison. Astringent properties render it a valuable medicine in weakness, and relaxation of the digestive organs.——*Namak tezaub* (लवणद्रावक - lavanadrávaka, San.; ماءالملح - máulmilh, Ar.; تیزاب نمك - tezábinimak, Pers.; نمك كا تیزاب - namakkátezáb, Hind. and Dec.; లవణద్రావకము - lavanadrávakamu, Tel.; ഉപ്പുദ്രാവകം - uppudrávakam, Mal.; ලුණුරස - lunurasa, Singh.; உப்புத்திராவகம் - upputtirávagam, Tam.). Ar. from (má, ar. water + milh, ar. salt). Pers. from (tezáb, pers. acid + nimak, pers. salt). Hind. from (namak, pers. salt + tezáb, pers. acid). Tel. from (lavana, san. salt + drávaka, san. essence). Singh. means salt + essence. Mal. and Tam. from (uppu, tam. salt + drávaka, san. liquid). Pers. also (arkinimak), meaning salt essence. Muriatic acid. Otherwise Marine acid, Spirit of salt, Hydrochloric acid, Chlorohydric acid. Acidum hydrochloricum of chemists. Pungent colorless incombustible gas with intensely acid properties; in solution, much used as a solvent. When pure it is colorless. Veidyans [q.v.] prepare it in the following manner:—take of common salt [ooppoo] 8 pollums [q.v.], of alum [padicauram] 6 pollums, of bengal gram vinegar [caudy] 8 pollums; let the common salt and alum be first well dried and pounded together, then add the other ingredient, and distill till the whole of the muriatic acid is disengaged and condensed in the receiver. Used diluted in medicine as antalkaline and tonic; acts locally as a caustic. Used specially as a solvent of metals [loham].——*Shoreyka tezaub* (यवक्षारद्रावक - yavaksháradrávaka, San.; ماءالبکر - máulabkar, Ar.; تیزاب شوره - tezábishorá, Pers.; شوره

شوره کا تیزاب - shorekátezáb, Hind. and Dec.; ಸೊರುಪ್ಪುದ್ರಾವಕ - sóruppudrávaka, Can.; పెట్లుప్పుద్రావకము - petluppudrávakamu, Tel.; വെടിയുപ്പുദ്രാവകം - vetiyuppudrávakam, Mal.; වෙඩිලුණුරස - vedilunurasa, Singh.; பொட்டிலுப்புத்திராவகம் - pottilupputtirávagam, Tam.). Title from hindostany. San. from (yavakshára, san. saltpetre + drávaka, san. essence). Ar. from (má, ar. water + abkar, ar. nitre). Pers. from (tezáb, pers. acid + shorá, pers. nitre). Hind. from (shorá, hind. saltpetre + tezáb, pers. acid). Can. from (sóruppu, can. saltpetre + drávaka, can. acid). Tel. from (petluppu, can. saltpetre + drávaka, san. essence). Mal. from (vetiyuppu, mal. saltpetre + drávaka, san. essence). Singh. from (vedilunu, singh. saltpetre + rasa, san. essence). Tam. from (pottiluppu, tam. saltpetre + drávaka, san. liquid). Pers. also (arakishorá), meaning saltpetre essence. Nitric acid. Otherwise Aqua fortis. Acidum nitricum of chemists. Dense, colorless fluid; emits white, disagreeable fumes; taste is extremely sour and acrid, and the skin is idelibly tinged a yellow color by it. Veidyans [q.v.] prepare it as follows:—take of saltpetre [shorah] 20 pollums, of alum [padicauram] 16 pollums, of bengal gram vinegar [candy] 18 pollums; mix and distill with an increasing heat till the whole of the acid is condensed in the receiver; the operation is conducted in common earthen vessels; the product is a mixture of nitrous and nitric acids. A corrosive poison; when diluted, it forms a lotion for indolent ulcers. Employed in chemical processes in dyeing [shauyam] and in medicine Impure nitric acid is Tezaub i noocrah.——*Sirkeyka tezaub* (سرکے کا تیزاب - sirkekátezáb, Hind.). Hind. from (sirkah, pers. vinegar + above). Acetic acid. Otherwise Methyloxalic acid, Methylformic acid, Pyroligneous acid, Wood acid, Wood vinegar. Acidum aceticum of chemists. Obtained by the fermentation of saccharine matter and the distillation of wood. ——*Tezaub i faurook* (تیزاب فاروق - tezábifárúk, Hind.). From (above + fárúk, ar. distinguishing). Nitro muriatic acid. Otherwise Aqua regia, Nitro hydrochloric acid. A mixture of nitric and hydrochloric acid, which will dissolve gold [pon] and platinum [goorootwam].——*Tezaub i noocrah* (تیزاب نقرہ - tezábinukrah, Hind.). From (above + nukrah, pers. silver). Impure nitric acid [shoreyka tezaub].

THAKOOR (ٹھاکر - thákur, *Hind.*). Chief. Also barber. There is a Hindostany proverb:—نائی کی برات میں سبھی ٹھاکر— "in a barber's marriage procession all are thakoors."

THUG (स्थग - st'haga, *San.*; ٹھگ - thug, *Hind.*; ತಂತಿಕಳ್ಳ - tantikalla, *Can.*; ఉర్లవాడు - urlavádu, *Tel.*; உரித்துலுக்கன் - urittulukkan, *Tam.*). Title from sanscrit. San. means a cheat. Can. from (tanti, can. wire + kalla, can. thief), from stretching wire across the road, over which travellers trip and fall, though this is not their usual method. Tel. from (uri, tel. noose + vádu, tel. personal suffix), from using noose. Tam. from (uri, tam. noose + tulakkan, tam. mahomedan). Hind. also (phánsigar), meaning noose doer or strangler. A robber and assassin of a peculiar class, who sallying forth in a gang of smaller or larger numbers, and in the character of wayfarers either on business or pilgrimage, fall in with other travellers on the road, and having gained their confidence take a favorable opportunity of strangling them by throwing a turban [q.v.] or handkerchief [roomaul] from behind round their necks. This is the name best known in the north. Thugs have slang terms and phrases; and Ramoosy [q.v.], or slang phraseology of thugs, is the same all over india, being extremely ancient. The thugs state that in immolating the victims they obey the deity of their worship, namely the goddess Bhawauny [q.v.]; notwithstanding the adherence to hindoo rites of worship observable among them, a very considerable number are mussalmans [q.v.]. The symbol of worship is a pickaxe of iron, known by the name of Nishaun [q.v.]; with every gang there is carried a Nishaun, which is their standard. Previous to commencing an expedition, the Nishaun is taken into the open fields, in the expectation of an omen [shacoonam]; if an owl [ooloocam], jay [indian jay], jackal [q.v.], or ass [gadhah], calls out, or moves to the right-hand side, the omen is looked upon as favorable; but if to the left, it is considered unfavorable and the project is abandoned. Thugs disdain every species of stealing that has not been preceded by the perpetration of murder; they adopt no other method of killing but strangulation; the implement is a handkerchief [roomaul] or any other convenient strip of cloth; after a murder they invariably bury the body immediately. The crime is hereditary in families; they recruit their numbers from all classes. In every gang of thugs there are one or more Jemadars [q.v.] who hold that rank in consequence of their wealth and influence; the jemadars assigns to every thug the particular duty he is to undertake. Next to the jemadar, the most important person is the Bhuttote, or strangler; his handkerchief is a piece of fine strong cotton [q.v.] cloth, about a yard long; at one end a knot is made, and the cloth is kept ready for use in front of the waist band; the handkerchief is called Roomaul [q.v.]; the bhuttote follows the person, and on the pre-concerted signal being given, the handkerchief is seized, with the knot in the left hand, and right hand being some inches further up; in which manner it is thrown over the head of the person to be strangled from behind; the two hands are crossed as the victim falls. To aid the bhuttote, another thug is appointed under the denomination of Sumsoonah; to seize the person by the wrists if he be on foot, and by one of his legs if he be on horseback, and so to pull him down. A convenient spot to murder is denominated a Bhill. Of mussalman thugs, some are to be found of every sect, Sheikh [q.v.], Syed [q.v.], Moghul [q.v.] and Pataun [q.v.]; among the hindoos, the castes chiefly to be met with are Bramins [q.v.], Rajpoots [q.v.] and Holeyar [q.v.]. All, as above said, worship Bhawauny [bhawauny, jauty].

TICCA (ٹھیکا - thíká, *Hind.*). Fare, fixed price on contract. Ticcagharry is a hired carriage.

TICKOR (ٹیکر - tíkor, *Hind.*). Distinguish from Tikhar under Tvak. Botanically Garcinia [ractaumram] pedunculata, roxb.; guttiferæ [vricsham, 22]. Tree, 60 feet; leaves opposite, short-petioled, oblong or obovate-oblong, entire, smooth on both sides, with large parallel veins; flowers terminal, peduncled; male ones numerous, forming small trichotomous panicles on separate trees; females solitary; calyx of two opposite pairs of nearly equal sepals; petals four, alternate with the segments of the calyx, and nearly of the same length; berry large, round, smooth, yellow when ripe; seeds ten, reniform, arillate. Fruit very large; rich yellow when ripe; exceedingly acid; used in curries [q.v.] and for acidulating water.

TIDAL (திடல் - tidal, *Tam.*). Rising ground; a flat shoal in a river.

TIDDAH (शलभ - shalabha, *San.*; टोळ - tóla, *Mahr.*; جراد - jarád, *Ar.*; ملخ - malakh, *Pers.*; ٹڈا - tiddá, *Hind.* and *Dec.*; ಮಿಡಿತೆ - midite, *Can.*; ಮೊಂಟೆ - monte, *Too.*; మిడత - midata, *Tel.*; വെട്ടുകിളി - vettukili, *Mal.*; வெட்டுக்கிளி - vettukkili, *Tam.*). Title from hindostany. San. from (shal, san. to shake). Ar. from (jarada, ar. to strip off herbage). Tel. from (midiyu, tel. to hop). Mal. from (vettu, mal. to cut + kili, mal. bird). Tam. from (vettu, tam. to cut + kili, tam. grasshopper) [tattoo kily]. Tam. also (mazhaikkili), meaning grain grasshopper, locust appearing before rains; (tavittukkili), meaning bran-brown locust, the small locust. Terms synonymous with family Locustidæ, orthoptera, hemimetabola, insecta [poochy], of naturalists [jantoo]. Locusts. Upwards of twenty species are known. They appear in large flights, committing great damage during progress. The small locust is edible.

TIGALA (ತಿಗಳ - tigala, *Can.*). From (tikka, can. stammering). The canarese for Tamulian.

TIGER (व्याघ्र - vyághra, *San.*). Prefix [pooly].——*Tiger's claw* (विंचू - vinchú, Mahr.; بچھو - bicçhú, Hind.; తేలుకొండి - télukondi, Tel.; தேள்கொடுக்கி - télgodukki, Tam.). Title from color and spots of flowers. Mahr. from (vrishchika, san. scorpion). Hind. means scorpion, from curved hooks of fruit resembling scorpion's tail. Tel. from (télu, tel. scorpion + kondi, tel. sting). Tam. from (tél, tam. scorpion + kodukku, tam. sting). Hind. also (hálhjorí). Tel. also (garudamukku), meaning braminy kite + beak. Title otherwise Devil's claw, Garoodan's beak, Scorpion sting. Botanically Martynia diandra, glox., pedalineæ [vricsham, 100]. Bush 3–4 feet with large coarse leaves, of rampant growth; flowers two inches, white, pale, rose-colored, stained with orange below on the inside, and stained on the limb above with five central dark purple spots; rather disagreeable odour; the seed pods are size of an almond [baudam], black, with two long horns proceeding from one end. ——*Tiger's foot* (మేకమడుగు - mekamadugu, Tel.; പുലിച്ചുവട് - puliççuvatu, Mal.; දිවිඅඩිය - diviadiya, Singh.; சிவதை - shivathai, Tam.). Title from resemblance of leaf. Tel. from (mekamu, tel. beast + adugu, tel. foot). Mal. from (puli, mal. tiger + chuvatu, mal. foot mark). Singh. from (divi, singh. tiger + adiya, singh. foot). Tam. from (shiva, tam. to redden). Singh. also (divipasuru), meaning tiger's foot; (divipahuru), meaning tiger's claws. Tam. also (púnaikkírai), meaning cat greens, from silky hairy leaves. Title otherwise Cat's greens, Tiger's claw. Botanically Ipomæa [calamby] pestigridis, linn., convolvulaceæ [vricsham, 93]. Alias Convolvulus pestigridis. Stems round, hairy; leaves palmately five to seven-lobed; lobes ovate-acute, silky and hairy; peduncles many-flowered, as long as the leaf; heads of flowers surrounded by six to eight ovate-linear hairy bracts; corolla white, hairy; common in hedges, flowering nearly all the year. Sand-binder [manal]. ——*Tiger's milk* (अगरु - agaru, San.; گیوا - gewá, Pers.; کیوگہرو - kayugahru, Malay; తెల్లచెట్టు - tellachettu, Tel.; ତେଲକିରିଆ - telakíriya, Oor.; കമ്മട്ടി - kammatti, Mal.; තෙලකිරිය - telakiriya, Singh.; அகில் - agil, Tam.). Title from quality of juice and smoke. San. from (a, san. privative suffix + guru, san. heavy), light [eagle-wood]. Malay from (kayu, malay, wood + gahru, malay, from sanscrit). Tel. from (tella, tel. white + chettu, tel. tree). Mal. from (karma, san. work + kri, san. to perform); used for procuring abortion. Tel. also (tillachettu), from tamul; (chilla). Tam. also (tillai), meaning seashore tree. Title otherwise Blinding tree, Cametty eagle-wood, Gava, Gheria, Spurgewort. Botanically Excæcaria [agaroo] agallocha, müller,

var. camettia, euphorbiaceæ [vricsham, 118]. Alias Arbor excæcans; Commia cochin-chinensis; Excæcaria camettia. Excæcaria, producing blindness. Agallocha, from false supposition that it yielded eagle-wood [q.v.]. Camettia from malayalam Small tree or shrub; leaves ovate or elliptic; obtuse at the base, entire or crenate-serrulate; male spikes amentiform, dense-flowered, cylindric; female racemes shorter than the male spikes, and in separate branches, both axillary, solitary, or rarely twin; bracts destitute of distinct glands; male calyx sessile, covered by the bract, female sepals ovate, with one gland on both sides of the base inside; anthers long-exserted after flowering; capsule sulcately three-lobed; flowers greenish; sea-coast tree; common in salt backwaters [cauyal]. Juice which exudes from green bark is poisonous and blinding; even smoke has same effect; juice applied to inveterate ulcers; leaves also in decoction; a caoutchouc [pauchonty] may be prepared from juice. Wood only used for fuel and charcoal [adooppkary]; very soft; spongy.

TIKRY (पुनर्नवा - punarnavá, *San.*; घेटोळी - ghétóli, *Mahr.*; ٹکڑی - tikrí, *Hind.*; ٹھکری کا جھاڑ - thikríkájhár, *Dec.*; ಬಳೆವಡಕಿಗಿಡ - balevadakigida, *Can.*; అటికమామిడి - atikamámidi, *Tel.*; തവിഴാമ - tavizháma, *Mal.*; முக்கரட்டை - múkkarattai, *Tam.*). Title from hindostany. San. from (punar, san. again + nava, san. new); growing when cut [shauranay]. Can. from (bale, can. surrounding + vadaku, can. fracture + gida, can. plant). Tel. from (atika, tel. pot + mámidi, tel. mangifera indica, linn.); used as potherb. Mal. from (tavizhu, mal. to creep along); spreading. Tam. from (múkku, tam. nose + arattu, tam. to whirl). San. also (sinádiká), meaning having white leaf-stalks; (shót'haghní), meaning swelling destroyer; (punarbhava), meaning again born; applied specially to the red variety. Hind. also (gadhaparná); (sánt). Can. also (sanádikágida), meaning nervous plant; (bekkinaajjeballi), meaning cat + arabian jasmine, jasminum sambac, ait. + creeper. Tel. also (ádaatukumámidi), meaning female + the plant. Mal. also (tazhutáma); (tamizháma), by corruption. Tam. also (kadiyirattam), meaning intensity + blood; (periyamúkkarattai), meaning large + the plant; (sháttaranai); (shattiççáranai), meaning vomiting + trianthema monogyna, linn.; from root as an emetic. Title otherwise Cat's jasmine, Female pot mango, Pot mango, Spreading hogweed, Vomit shauranay. Botanically Bœrhaavia repens, linn., var. diffusa, nyctagineæ [vricsham, 105]. Alias Bœrhaavia diandra, diffusa, polimorpha. Low creeping plant with many diffused stalks, about two feet long; flowers pale rose-colored, much scattered on long branching peduncles from the axils and at the end of the branches; seeds brown, oblong, striated, very rough; leaves ovate, rather roundish, bright green above, whitish below; sometimes curled at the edges; white, or rose-colored flowers; flowering all year. Root given medicinally in powder as laxative and in infusion as vermifuge; taste slightly bitter and nauseous; a good expectorant, and prescribed in asthma; taken largely, acts as an emetic; poultice of leaves useful in abscesses; in pharm. nonofficinal. Small round leaves at joint of stalks are eaten. The variety procumbens is American or Upright hogweed, small red flowers. Other common species are:—repanda, verticillata.

TIL (तिल - tila, *San.*; تل - til, *Hind.*). From (til, san. to anoint). Gingelly seed [teilam]. Cf. Ramtii.——*Teilam* (तैल - taila, San.). See sep. title.——*Tel* (تیل - tel, Hind.). From (tila, san. sesa num indicum, linn.). Oil [yennay]. Telee is an oil man.——*Tilacam* (तिलक - tilaka, San.). Mark, compared to a seed of sesamum. A mark on the forehead and between the eyebrows, either as an ornament or a sectarial distinction [naumam, pottoo], generally the latter [matam]. Hence any ornament. Means also spotted or freckled. In composition expresses greatness or distinction. Plant name common to:—Cinnamomum iners, Clerodendron phlomoides, Vitex alata; see gloss. paragraphs.

TILLAY (தில்லை - tillai, *Tam.*). From (tirai, tam. sea), the tree affecting seashore situations. The plant Excæcaria agallocha [tiger's milk]. So Chidambaram, from the tree being there found.——*Tillainayagam* (தில்லைநாயகம் - tillaináyagam, Tam.). From (above + náyaka, san. lord). Epithet of Shiva, as worshipped at Chidambaram. Hindoo 2nd or pers. name. Common among non-bramins [peyar]. Appears short as Tillay.

TIMINGILAM (वाजातिमि - vájatimi, *San.*; مگرمچھی - magarmaççhí, *Hind.*; ತಿಮಿಂಗಿಲ - timingila, *Can.*; తిమింగిలము - timingilamu, *Tel.*; തിമിംഗിലം - timingilam, *Mal.*; சிறைத் திமிங்கிலம் - shiraittimingilam, *Tam.*). San. from (vája, san. wing + timi, sán. whale). Hind. from (magar, hind. alligator + maççhí, hind. fish). Tel. from (timi, san. whale + gila, san. devourer). Tam. from (shirai, tam. fin + timingilam, tam. whale devourer). Title otherwise Finback, Finner, Pikewhale, Rorqual. Balænoptera indica, balænidæ, cetacea, mammalia [sastanam, 31], of naturalists [jantoo]. Mysticete or Whalebone whales are distinguished from sperm whales which belong to the family Physeteridæ by having baleen or whalebone in their mouths instead of teeth. They comprise genus Balæna or right-whales, and genus Balænoptera or fin-whales. The Right-whales have no fin on the back. They are not found in the intertropical seas. Fin-whales are distinguished by their longer and narrower bodies, rather smaller heads being one-fourth instead of one-third the length of the body, smaller mouths, shorter baleen, plaited throats, and smaller flippers; they have a dorsal fin behind the middle of the back, and the root of the tail is complessed laterally. They are more muscular and active animals than the Right-whales, and have a less amount of blubber and much shorter whalebone, consequently are not so much sought after by whalers, as the risk in attacking them is not compensated for by the commercial results. Many of them grow to enormous size, far exceeding any of the Right-whales. The whalebone hanging from roof of mouth on each side of tongue forms a sieve through which the animal strains his food from the vast gulps of water he takes in whilst feeding. The lower jaw has neither teeth nor baleen, but is furnished with fleshy lips. The Maldives and Seychelles are the head-quarters of such whalers as seek these whales. Nearchus, in B.C. 327, mentions having met with these whales in the Persian gulf. In 1858 one of 90 feet was standard at Quilon. American ships call at Cochin for stores during their cruises after these animals. But they are little hunted, being active and dangerous, and yielding indifferent whalebone, which is generally obtained from the Right whale. Whalebone is an albuminous tissue resembling horn [sing] and hair and forming the transition between those two substances. For the sperm-whale see Hoot.

TIMIRY (திமிரி - timiri, *Tam.*). From (timir, tam. dullness). Village; North arcot dist., arcot tal.; pop. 4,459; acres 2,874; lat. 12° 50′; long. 79° 21′; height 722 feet; from Arcot S.S.W. 6 miles; from Chittore S.S.E. 30 miles. On Arnee road. Small fort built by Timmakkaul, sister of Bommy reddy, who constructed the Vellore fort. After Mahomedans obtained possession of place, it was given, with a jagheer [q.v.] worth a lakh [q.v.] of rupees [q.v.], by the emperor Mahomed shah to a son of one of his ministers. Afterwards resumed by Nawaub Mahomed ally. Captured by Clive in 1751, and held by British till 1758, when it surrendered to D'Estainge. Major Munro recovered the town in 1760. Peroontimiry naud meant the great Timiry country, part of Palcoondra cottam in the ancient Tondaimundalam [q.v.].

TIMMA (తిమ్మడు - timmadu, *Tel.*). Monkey god. Feminine Timmy. Familiarly Timmoo. Hindoo 2nd or pers. name [peyar]. Similarly Timmappa, Timmayya. Timmy reddy was the ruler of Vellore locally believed to have built the fort of Arcot.

TINAY (कंगु - kangu, *San.*; वरी - vari, *Mahr.*; वरयि - varayi, *Conc.*; دخن - dukhn, *Ar.*; ارزن - arzan, *Pers.*; کنگنی - kangní, *Hind.*; کنگونی - kanguní, *Dec.*; ನವಣೆ - navane, *Can.*; ನವಣೆ - navane, *Too.*; కొఱ్ఱ - korra, *Tel.*; କଙ୍ଗୁ - kangu, *Oor.*; തിന - tina, *Mal.*; තණහල් - tanahal, *Singh.*; தினை - tinai, *Tam.*). Title from tamul [teen]. San. from (kank, san. to go); useful seed [bajrah]. Arabic; cf. seed toolsy. Hind. and Dec. from sanscrit. Tam. from (tin, tam. to eat). Sán. also (priyangu), meaning valued plant; (shyámá), meaning dark brown [shammay, white datura]. Pers. also (ghal); (ulam). Hind. also (chenna), meaning cicer arietinum, linn. [bengal gram]; (rálá), meaning a variety of millet; (rál), panicum miliaceum, linn.; (kangu); (birtiya); (kálákangní), meaning black variety. Can. also (kango); (árike); (tene); (sámeakki); (neraakki). Tam. also (korali), meaning inferior [mecca cholum, white tinay]; (shendinai), meaning red millet; (açççittinai), meaning acheen millet, a small variety from acheen; (anilváttinai), meaning squirrel-tail millet, a kind of white variety with ears supposed to resemble the tail of the squirrel [anil]. Greek κέγχρος; late greek ἔλυμον. Latin milium. Title otherwise Bengal grass, Cangny, Caucam, Chinese corn, Corra, Fine panic grass, Italian millet. Botanically Panicum [priyangoo] italicum, linn., gramînaceæ [vricsham, 156]. Alias Echinolæna erythrosperma; Panicum erythrospermum, glomeratum; Pennisetum italicum; Setaria italica, melinis. Cereal; culms erect, 3-5 feet, round, smooth; roots issuing from the lower joints; margins of leaves hispid; mouths of sheaths bearded; spikes nodding; spikelets scattered; pedicels two to four-flowered, with smooth intermediate bristles; seeds small, roundish, straw-colored, pericarp brittle, with a round and partially pellucid grain. Cultivated in red loam; dry ground prepared in south in auvany [mausam] or august, on coromandel in aushweejam or october and caurteecam or november two months later; the land is ploughed four or five times, sheep-folded and cowdung applied; seed sown in south in arpisy or october, on coromandel in caurteecam or november and margashiram or december; sown broadcast while under growth two hoeings are used and there must be rain after each hoeing; cut after three or four months by hand or sickles, the sheaves are dried and brought to the threshing floor [calam]; then they are beaten with sticks and seeds are winnowed from the chaff; produce brought to market at once; average price, 16 imperial seers for 1 rupee. Boiled with milk, makes light diet for invalids. Good for pastry; nutritious, rather heating, sometimes parched; the quantity of straw, about 10 feet long and an inch in circumference, makes a fair compensation for the meanness of the ear. Two varieties; one straw yellow and the other reddish yellow. There is a Tamul proverb:—மலை அத்

தினை சுவாமிக்குத் தினை அத்தினை புஷ்பம்—"a flower, as "small as a millet-seed, is dedicated to an idol as large as a "mountain;" the grain is small.——*Black tinay* (ಕರಿಕೊರಲೆ - karikorale, Can.; కారుసొద - kárusoda, Tel.; கருந்தினை - karundinai, Tam.). Title from color of seed. Can. from (kari, can. black + korale, can. panicum glaucum, linn.). Tel. from (káru, tel. wild + soda, tel. panicum paludosum, roxb.). Tam. from (karumai, tam. blackness + tinai, tam. the millet). Botanically Panicum [priyangoo] indicum, linn., graminaceæ [vricsham, 156]. Culm prostrate, thin, branched; sheaths glabrous; leaves linear, glabrous or scattered above with a few hairs; thyrses very narrow, rays simple, very short, shorter than the spikelets; spikelets ovate, acute, glabrous; lower glume a half shorter than the florets, three-upper ones seven to eleven-nerved. Useless for feeding purposes; will not make hay, as it has but little undergrowth.——*Forest tinay* (ಕಾಡುನವಣೆ - kádunavane, Can.). Same as Wild coraly.——*Jackal tinay* (నక్క కొర్ర - nakkakorra, Tel.). Title from inferiority of plant. Tel. from (nakka, tel. fox + korra, tel. panicum italicum, linn.). Tel. also (nakirigaddi). Botanically Panicum [priyangoo] helvolum, l., graminaceæ [vricsham, 156]. Alias Panicum glaucum. Culm branched, 6 feet, sterile branches shorter; leaves towards the base, above beset with spreading white hairs; spike simple, about 7 inches, florets without order; involucels one-flowered, bristles fascicled, greyish-yellow; hermaphrodite flower striated lengthways; on cultivated land.——*Trembling tinay* (చెంగలిగడ్డి - chengaligaddi, Tel.; தினை - tinai, Tam.). Tel. from (tsangu, tel. to tremble as by wind + gaddi, tel. grass), from slender stalk. Tam. from (tin, tam. to eat). Botanically Panicum [priyangoo] ciliare, retz., graminaceæ [vricsham, 156]. Spikes four to five, digitate, undivided; leaves lanceolate, waved, rather hairy; sheaths smooth; florets imbricated; outer valve of the glume very minute, nerveless; inner one half the length of the flower.——*White tinay* (ಬಿಳಿಕೊರಲೆ - bilikorale, Can.; నకిరిగడ్డి - nakirigaddi, Tel.; கொறலி - korali, Tam.). Title from color of seed. Can. from (bili, can. white + korale, can. panic seed, panicum italicum, linn.). Tam. from (kuru, tam. short); small grain. Can. also (korali), meaning small grain; (korre), meaning panic seed. Tel. also (nakkakorra), meaning fox + panicum italicum, linn.; (verritsámalu), meaning mad + panicum frumentaceum, roxb. Tam. also (vellaittinai), meaning white tinay. Title otherwise Coraly [mecca cholum, tinay]. Botanically Panicum [priyangoo] glaucum, linn., graminaceæ [vricsham, 156]. Alias Setaria glauca. Culm erect, branched; leaves internally slightly scabrous, subglaucescent, scabrous at the margin; spike cylindric; involucre with many bristles much longer than the one to four-nous spikelets; glumes glabrous; hermaphrodite floret transversely waved; male two-paleaceous. Staple food with hill tribes on the neilgherries.

TINCAL (تنکار - tinkál, *Hind.*). Tibetan word. Crude borax [swauga, venganram].

TINDAL (تندل - tandel, *Hind.*; തണ്ടൽ - tandal, *Mal.*). From (tandu, mal. oar + vali, mal. to pull). The head of a body of men, especially of a gang of laborers or the crew of a ship. Thence captain of a native vessel [nacodah, nahah, serang].

TINDIVANAM* (திண்டிவனம் - tindivanam, *Tam.*). From (tintidí, san. tamarind tree, tamarindus indica, linn. + vana, san. jungle). Sanskrit name (tintidívana), meaning same.——**(1)** Talook, South arcot district. Tahsildar's pay Rs. 225. The South indian railway runs through the talook from north to south for about 17 miles, with three railway stations. Population 316,018; language Tamul. N. coast of district. Boundaries:—N. Polore and Wandiwash talooks, N. Arcot district, and Madrantacam talook in Chingleput; E. Bay of Bengal; S. French territory, and Villoopooram talook; W. Polore in N. Arcot and Trinomallee talooks. The talook is a plain rising gradually westwards from the coast and broken near Jinjee by a cluster of small hills over an area of about 40 square miles. Soils principally regar [q.v.] and sundry and sedimentary origin. Manufacture of jaggery [q.v.] and cloths, and trade in indigo [q.v.] and groundnut [q.v.]. The latter is chiefly sent to Pondicherry for export. Irrigation by tanks [q.v.] with some anicuts [q.v.] across Varauhanuddy and Condamore rivers. Camping grounds:—Saram, Vilangampaudy, near Chundoor and Jinjee. Places of archæological interest:—Auttipaukam, Avalore, Chaivore, Chittanore, Conimere, Devanore, Dhautaupooram, Eyil, Gengapooram, Jinjee, Kedangal, Melacherry, Moonnore, Olacore, Permacoil, Permandore, Pervalore, Shauttambaudy, Shembaid, Shingavaram, Shirvalore, Tayanore, Teevanore, Tindivanam, Tondore, Veeranamore. Principal trig. stations:—Jinjee rock, Permacoil. The leading places, &c., in the talook are the following.——*Ariancooppam* (அரியங்குப்பம் - ariyanguppam, Tam.). See sep. title.——*Aulapaukam* (ஆலப்பாக்கம் - álappákkam, Tam.). From (ál, tam. banyan tree, ficus bengalensis, linn. + pákkam, tam. village). Pop. 972; acres 570; lat. 12° 10′; long. 79° 58′; from Cuddalare N.N.E. 32 miles; from Tindivanam E.S.E. 19 miles; from the sea W. 1¼ miles.——*Chuckly droog* (சக்கிலித்துருக்கம் - shakkilitturukkam, Tam.). From (shakkili, tam. one of that caste + durga, san. fort). Sanskrit name (mátangadurga), meaning chundaulan + fort. Hill. A fortified hill most difficult of ascent one mile from Jinjee.——*Chundoor* (சந்தூர் - shandúr, Tam.). From (shandu, tam. a place where four roads meet + úr, tam. village). Pop. 1,488; acres 1,591; lat. 12° 07′; long. 79° 38′; from Cuddalore N.N.W. 30 miles; from Tindivanam S.S.W. 9 miles; from the sea W. 22 miles.——*Chundrayya doorgam* (చంద్రయ్యదుర్గము - chandrayyadurgamu, Tel.). From (chandrayya, tel. proper name + durga, san. fort). Hill. One of the three peaks of Jinjee.——*Conimere* (கூனிமேடு - kúnimédu, Tam.). See sep. title.——*Jinjee* (செஞ்சி - shenji, Tam.). See sep. title.——*Kilyanore* (கிளியனூர் - kiliyanúr, Tam.). From (kiliyál, tam. proper name + úr, tam. village); called after kilyaul, the daughter of a ruler who founded the village. Pop. 2,026; acres 3,877; lat. 12° 06′; long. 79° 48′; from Cuddalore N. 26 miles; from Tindivanam S.E. 11 miles; from the sea W. 10 miles. An ancient ruler had five daughters; Kilyaul, Nullaul, Oolagaul, Peraul and Teilaul. He founded five villages after their names. The others, viz., Nullavore, Oolagaupooram, Peravore, and Teilaupooram also lie within a radius of 4 miles.——*Krishnagherry* (கிருட்டிணகிரி - kiruttinagiri, Tam.). From (krishna, san. black + giri, san. mountain); called after a person of that name. Hill; lat. 12° 16′; long. 79° 27′; from Cuddalore N.W. 43 miles; from Tindivanam W. 16 miles; from the sea W. 39 miles. One of the three hills of Jinjee.——*Malayanore* (மலையனூர் - malaiyanúr, Tam.). From (malaiyan, tam. hill-chief, epithet of the chéra rulers + úr, tam. village). Village, Place of pilgrimage; pop. 2,144; acres 1,610; lat. 12° 20′; long. 79° 22′; from Cuddalore N.W. 51 miles; from Tindivanam W.N.W. 23 miles; from the sea W. 24 miles. Large annual bullock [maud] fair held during Ancaulamman [q.v.] festival about March every year.——*Meilam* (மயிலம் - mailam, Tam.). From (mayil, tam. peacock). Sanskrit name (mayúrapura), meaning peacock + town. Village, Place of pilgrimage; pop. 1,505; acres 1,374; lat. 12° 07′; long. 79° 40′; height 162 feet; from Cuddalore N.N.W. 28 miles; from Tindivanam S. 8 miles; from the sea W. 19 miles. Annual festival in July. Cattle [maud] fair. Pilgrims resort at Caurtigay [pundigay, 5c] to worship Soobramanya sawmy whose temple is on top of Meilam hill.——*Mercanum* (மரக்காணம் - marakkánam, Tam.). See sep. title.——*Olacore* (உலக்கூர் - olakkúr, Tam.). From (ulakkai, tam. waste + úr, tam. village). Railway station; pop. 2,377; acres 4,124; lat. 12° 19′; long. 79° 46′; height 129 feet; from Cuddalore N. 39 miles; from Tindivanam N.E. 6 miles; from the sea W. 20 miles. West of village at foot of hill are stones with inscriptions.——*Paumbayaur* (பாம்பையாறு - pámbaiyáru, Tam.). From (pámbu, tam. snake + áru, tam. river). River. Tributary of the Varauhanuddy.——*Permacoil* (பெருமுக்கல் - perumukkal, Tam.). See sep. title.——*Rajagherry* (இராசகிரி - irásagiri, Tam.). From (rájá, san. king + giri, san. mountain). Hill. One of three hills of Jinjee.——*Saram* (சாரம் - sháram, Tam.). Means fertility; lat. 12° 17′; long. 79° 45′; from Cuddalore N. 38 miles; from Tindivanam N.E. 4 miles; from the sea W. 20 miles. Camping ground.——*Shingavaram* (சிங்கவரம் - shingavaram, Tam.). From (simha, san. lion + varam, san. town). Sanskrit name (simhapura), means same. Hill, Place of pilgrimage; pop. 469; acres 1,044; lat. 12° 17′; long. 79° 27′; from Cuddalore N.W. 45 miles; from Tindivanam W.N.W. 17 miles; from the sea W. 40 miles. Old Vishnoo temple, partly rock-cut. North is another temple in ruins with many inscriptions.——*Tindivanam* (திண்டிவனம் - tindivanam, Tam.). See below.——*Tirnautar coondroo* (திருநாதர்க்குன்று - tirunátharkkunru, Tam.). From (tiru, tam. sacred + nát'ha, san. lord + kunru, tam. hill). Hill. Contains Jeina [q.v.] sculptures.——*Tondayaur* (தொண்டியாறு - tondiyáru, Tam.). See sep. title.——*Tondore* (தொண்டூர் - tondúr, Tam.). From (tondu, tam. divine service + úr, tam. village). Pop. 871; acres 1,134; lat. 21° 21′; long. 79° 31′; from Cuddalore N.N.W. 48 miles; from Tindivanam N.W. 15 miles; from the sea W. 40 miles. Three rock-cut caves and sculptures. Jeina [q.v.] statue.——*Varauhanuddy* (வராகநதி - varáganathi, Tam.). See sep. title.——**(2)** Town, Railway station, Head-quarters of Subcollector and talook; South arcot dist., Tindivanam tal.; pop. 9,191; acres 840; lat. 12° 14′; long. 79° 42′; height 145 feet; from Chidambaram N. 56 miles; from Cuddalore N.N.W. 36 miles; from Madras S.S.W. 71 miles; from Tricalore N.E. 36 miles; from Vriddhauchellam N.N.E. 54 miles; from the sea W. 22 miles Consists of a congeries of hamlets, viz., Avarapaukam, Cauverypauk, Gidangal, Jafferabad, Moorongapaukam and Tindivanam proper. Gidangal was formerly fortified. There was a Soobahdar [q.v.] at Tindivanam in the service of the Mahrattas when Ramrauz ruled at Jinjee. The pagoda [q.v.] is sacred to Tintrineevana eeshwarasawmy. Considerable trade in tanning skins [chamrah], and in groundnut [q.v.] sent to Pondicherry for export.

TINGAL (ತಿಂಗಳು - tingalu, *Can.*; திங்கள் - tingal, *Tam.*). From (tigazh, tam. to shine). The moon [chundran]. A month [maheena, mausam] in general. Monday [vauram]. 4 kishamays or weeks = 1 tingal, 12 tingals = 1 aundoo or year [caulam, 1].

TINNEVELLY (திருநெல்வேலி - tirunelvéli, *Tam.*). From (tiru, tam. sacred + nel, tam. paddy + véli, tam. village) [tir]. Sanscrit name (malakúta), meaning sin + peak; also (dárukávana), meaning wooden figure + forest; from the lingam [q.v.] in the wood worshipped by rishies [rishy] here.——(1) Revenue district; situated on the extreme southern and eastern part of the Presidency; between 8° 08′ and 9° 44′ N. lat. and between 77° 15′ and 78° 25′ E. long.; bounded N. by Madura district, E. by Madura district and Gulf of Manaar, S. by Gulf of Manaar, W. by Southern ghauts; square miles 5,389; pop. 1,916,095; language Tamul. Contains rivers Chittaur, Tamrapurny, Veippaur; ports Cauyalputnam, Tuticorin, Veippaur; mountains Southern ghauts; sanitaria Courtallam, Trichendore. The whole area of the district is represented by the following sub-areas:—Ambasamoodram talook, Nangoonairy talook, Ottapidauram talook, Shauttore talook, Shreevillipoottore talook, Shuncaraneinarcoil talook, Tencaray talook, Tencaushy talook, Tinnevelly talook. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Palamcottah; Sub-collector, Tuticorin, in charge of Tencaray and Ottapidauram talooks; Head assistant collector, Shermadevy, in charge of Ambasamoodram, Nangoonairy and Tencaushy talooks; General deputy collector, Shreevillipoottore, in charge of Shreevillipoottore, Shuncaraneinarcoil and Shauttore talooks; Assistant collector, Tinnevelly, in charge of Tinnevelly talook. Tahsildars; Ambasamoodram, Rs. 225; Nangoonairy, Rs. 200; Ottapidauram, Rs. 150; Shauttore, Rs. 150; Shreevillipoottore, Rs. 200; Shuncaraneinarcoil, Rs. 200; Tencaray, Rs. 250; Tencaushy, Rs. 175; Tinnevelly, Rs. 225. Deputy tahsildars; Coolashekharaputnam, Rs. 100, range situated in the south of Tencaray talook; Palamcottah, Rs. 70, range situated in the south of Tinnevelly talook; Raudhaupooram, Rs. 70, range situated in the south of Nangoonairy talook; Tuticorin, Rs. 100, range situated in the east of Ottapidauram talook; Vilauticoolam, Rs. 70, range situated in the north of Ottapidauram talook; Viroothooputty, Rs. 70, range situated in the north of Shauttore talook; Watrap, Rs 70, range situated in the north of Shreevillipoottore talook. Sub-magistrate, Shreeveicoontam, Rs. 100, jurisdiction extending over the whole of Tencaray talook excepting Coolashekharaputnam range. Similarly judicial officers:—Judge, Palamcottah; Subordinate judge, Palamcottah. District moonsifs, Tuticorin with jurisdiction extending to the Ottapidauram talook, Shreevillipoottore with jurisdiction extending to the Shreevillipoottore and Shauttore talooks, Ambasamoodram with jurisdiction extending to Ambasamoodram, Tencaushy and Nangoonairy talooks excluding Raudhaupooram division, Tinnevelly with jurisdiction extending to the Tinnevelly and Shuncaraneinarcoil talooks, Shreeveicoontam with jurisdiction extending to Tencaray talook and Raudhaupooram division of Nangoonairy talook. Similarly Public works officers:—Executive engineer, Palamcottah, in charge of the division, which consists of Tencaray sub-division comprising Tencaray and Ottapidauram talooks; Shermadevy sub-division comprising Ambasamoodram, Tencaushy and Shuncaraneinarcoil talooks; head-quarter sub-division comprising Tinnevelly, Nangoonairy, Shreevillipoottore and Shauttore talooks. Contains Registration sub-districts:—Alwar tirnagary, Ambasamoodram, Cadayam, Cayataur, Coilputty, Moorpanaud, Nangoonairy, Ottapidauram, Palamcottah, Pettah, Raudhaupooram, Shatauncoolam, Shauttore, Shermadevy, Shivacaushy, Shivagherry, Shooranday, Shreevillipoottore, Shuncaraneinarcoil, Tencaray, Tencaushy, Trichendore, Tuticorin, Vilauticoolam, Viroothooputty, Watrap. Contains Forest ranges northern, southern and central. Contains Municipalities Palamcottah, Tinnevelly, Tuticorin. Contains District board and Talook boards, Tuticorin T. B. embracing Tencaray and Ottapidauram talooks, Shermadevy T. B. embracing Tencaushy, Ambasamoodram and Nangoonairy talooks, Shreevillipoottore T. B. embracing Sreevillipoottore, Shuncaraneinarcoil and Shauttore talooks, Tinnevelly T. B. embracing Tinnevelly talook. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; coast survey, II, 158; lighthouses, II, 169; comparative population, II, 172; location of revenue officers, II, 391; revenue settlement of the district, II, 417; registrars' and sub-registrars' stations, II, 422; ports, II, 423; salt factories, II, 426; rain-gauge stations, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; missionary stations, II, 455; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weight and measures of the district, II, 518; zemindarries, II, 300; special public works, I, 401. A special gazetteer account of the whole district is given at II, 130. For the detailed topography of the district, reference should be made to the talook notices, in the present volume, viz.:—Ambasamoodram, Nangoonairy, Ottapidauram, Shauttore, Shreevillipoottore, Shuncaraneinarcoil, Tencaray, Tencaushy, Tinnevelly.——(2) Talook, Tinnevelly district. Tahsildar's pay Rs. 225. Area 327 square miles. Contains 143 villages, of which 103 are Government, 40 inam. Population 184,728. Language Tamul. Centre of district. Bounded N. by Shuncaraneinarcoil and Ottapidauram talooks, E. by Ottapidauram and Tencaray talooks, S. by Nangoonairy talook, W. by Ambasamoodram and Tencaushy talooks. Consists, as respects soil and general features, of two distinct portions, viz., the valleys of the Tamrapurny and Chittaur and the high and dry lands which lie between these rivers and on either side of them. The dry lands, south of the Tamrapurny and Chittaur, are of the red and sandy series, and cultivated but once in the rainy season, yielding poor crops of gram [q.v.] or shaumay [q.v.]. These lands are largely left fallow. There are a considerable number of palmyra [q.v.] topes [q.v.] scattered about in this portion, which may be considered the northern limit of the Palmyra forest. Some villages of the north-eastern portion belong to the black cotton [regar] series, being at southern edge of these extensive plains. Most of the garden cultivation under wells belongs to this group; cotton [q.v.], cholum [q.v.] and gram [q.v.] are the staple crops of this soil, besides tobacco [pogauk], chillies [q.v.], and vegetable [keeray] under wells. On either side of the Tamrapurny is a broad belt, a quarter to half a mile wide, of irrigated land, which yearly bears two unfailing crops of rice [q.v.]; plantains [q.v.], betel [q.v.] gardens, cocoanuts [q.v.] also abound, and in the higher portions of the river alluvial fine topes [q.v.] of mangoes [q.v.], ilooppay [mohwah] and other trees. Trade is comparatively small; the chief item is rice, which in favorable seasons is exported in large quantity to the dry talooks of Tinnevelly. A considerable import business in Europe cotton [q.v.] and other articles is also carried on. Cloths of a superior description are woven in Melapolliem. Metal utensils are made in Tinnevelly. Water is derived from the Tamrapurny by means of three channels [q.v.], viz., the Codagam, Polliem, Tinnevelly, leading from anicuts [q.v.] on the river. These are supplemented by ninety tanks [q.v.], which they supply in their course. The Chittaur supplies eight channels in the talook, and these again twenty-six to tanks scattered about over the north-eastern portion wherever there was found by the ancient rulers of the province a suitable site for such a reservoir. The Putchayaur feeds twenty-nine tanks but only in the pishaunam [q.v.] or October monsoon [q.v.] season, and joins the Tamrapurny near the western boundary of the talook. There are also seventy-five rain-fed tanks filled in the October rains [mazhay] and cultivated but once. Camping grounds:—Palamcottah, Ponnacoody, Seetaparpanullore, and Shadhikhan chuttram. Places of archæological interest:—Coonnattore, Gungaycondaun, Krishnaupooram, Manapaday veed, Maunore, Oograncottay, Palamcottah, Pullicottah, Shoottamully, Tinnevelly, Trimalpooram. Principal Trig. stations:—Coonnattorepottay, Coottaitutty, Palamcottah base, east end, Palamcottah base, west end, Taulaiyoottpottay. The leading places, &c., in the talook are the following.——*Chindintooray* (சிந்துப்பூந்துறை - shinduppúndurai, Tam.). From (shindu, tam. river + pú, tam. flower + turai, tam. ford). Village; pop. 2,254; acres 364; lat. 8° 44′; long. 77° 45′; from Tinnevelly E. 2 miles. On left bank of Tamrapurny. Celebrated pagoda [q.v.]. In bed of river is the Shiva teertam mantapam [q.v.] where floating festival takes place in January. Gives its name to a mutt [q.v.].——*Chittaur* (சிற்றாறு - shittáru, Tam.). See sep. title.——*Coonnattorepottay* (குன்னத்தூர்ப்பொட்டை - kunnattúrp-pottai, Tam.). From (kunnattúr, tam. place so called + pottai, tam. hillock). Trig. station; lat. 8° 41′ 45·89″; long. 77° 42′ 54·16″; height 470 feet; from Coonnattore S. ¼ mile; from Tinnevelly S.S.W. 2 miles.——*Coottaitutty* (குட்டைத்தட்டி - kuttaittatti, Tam.). From (kuttai, tam. pond + tatti, tam. defence). Trig. station; lat. 8° 51′ 24·59″; long. 77° 38′ 20·35″; height 595 feet; from Tinnevelly N.W. 12 miles; from Yettaungoolam W. 1½ miles.——*Gungaycondaun* (கங்கைகொண்டான் - kangaikkondán, Tam. gangaikondán *). From (gangá, san. ganges river + kondán, tam. he who obtained); from gungaycondaun, the real name of soondra paundyan, the chola king. Sanscrit name (gangádharapura), meaning shiva, the ganges bearer + town. Village, Railway station; pop. 2,971; acres 11,195; lat. 8° 51′; long. 77° 49′; height 139 feet; from Tinnevelly N.N.E. 11 miles. Large ancient Shiva temple on banks of river, richly sculptured with inscriptions.——*Manaar* (மன்னார் - mannár, Tam.). See sep. title.——*Manapaday veed* (மணப்படைவீடு - manappadaivídu, Tam.). From (manam, tam. marriage + padai, tam. multitude + vídu, tam. house). Sanscrit name (kalyánapura), meaning marriage city. Village; pop. 678; acres 329; lat. 8° 46′; long. 77° 48′, from Tinnevelly E.N.E. 6 miles. Of considerable antiquity on right bank of Tamrapurny. The ancient Calyaunapooram. Temple with inscriptions.——*Maroothoor* (மருதூர் - marúthúr, Tam.). From (marutham, tam. terminalia tomentosa, bedd., var. typica + úr, tam. village). Village; pop. 769; acres 715; lat. 8° 45′; long. 77° 51′; from Tinnevelly E.N.E. 9 miles. Very ancient village on right bank of Tamrapurny, across which is an anicut.——*Melapolliem* (மேலப்பாளையம் - mélappálaiyam, Tam. melapálaiyam *). From (mél, tam. western + pálaiyam, tam. fortified village). Town; pop. 7,661; acres 1,334; lat. 8° 42′; long. 77° 45′ 13″; from Tinnevelly S.E. 2¼ miles. Site of a

Vijianuggar ruler's encampment. Superior cloths woven.——*Narsinganullore* (நரசிங்கநல்லூர் - narasinganallúr, Tam.). From (narasimha, san. man-lion, incarnation of vishnu + nal, tam. good + úr, tam. village). Village; pop. 2,349; acres 1,479; lat. 8° 45′; long. 77° 39′; from Tinnevelly W. 6 miles. On left bank of Aryanaickanpooram canal. On north is high rising ground. Chiefly inhabited by herdsmen and artizans and a few Paravar [q.v.] roman catholics.——*Oograncottay* (உக்கிரங்கோட்டை - ukkirangótta', Tam.). From (ugra, san fierce + kóttai, tam. fort); called after oogra paundyan. Village; pop. 1,877; acres 2,365; lat. 8° 54′; long. 77° 38′; from Tinnevelly N.N.W. 14 miles. Lies on N. bank of Chittaur and is most N.W. village of talook. Shiva temple. Inscription of Paundy [q.v.] dynasty [raj] on a rock called Anaimottaypauray.——*Palamcottah* (பாளையங்கோட்டை - pálaiyangóttai, Tam.). See sep. title.——*Pettah* (பேட்டை - péttai, Tam.). Suburb. Town, Post office; pop. 9,642; acres 1,199; lat. 8° 43′; long. 77° 42′; from Tinnevelly W. 3 miles. Large trading Mahomedan population.——*Seeviliperry* (சிவிலிப்பேரி - shívilippéri, Tam.). From (shívili, tam. proper name + éri, tam. tank); after seevily, an ancient ruler of the place. Village; pop. 3,229; acres 6,389; lat. 8° 47′; long. 77° 51′; from Tinnevelly E.N.E. 9 miles. At junction of the Tamrapurny and Chittaur. Temple to Krishnasawmy. Cattle [maud] fair in April. Weekly fairs on Monday. Paravar [q.v.] roman catholics have a chapel.——*Shoottamully* (சுத்தமல்லி - shuttamalli, Tam.). From (shuddha, san. pure + malli, san. jasmine, jasminum sambac, ait.). Village; pop. 3,062; acres 2,945; lat. 8° 42′; long. 77° 41′; from Tinnevelly S.W. 5 miles. On canal of same name. Divided by canal and bridge into two parts. Important anicut across Tamrapurny. Shiva temple with inscriptions. Car festivals in April and October.——*Tamrapurny* (தாம்பிரபருணி - támbirapparuni, Tam.). See sep. title.——*Taulaiyoottpottay* (தாழையூத்துப்பொட்டை - tázhaiyúttuppottai, Tam). From (tázhai, tam. screw-pine, pandanus odoratissimus, linn. + úttu, tam. spring + pottai, tam. hillock). Trig. station; lat. 8° 48′ 55·17″; long. 77° 43′ 54·91″; height 489 feet; from Taulaiyoott E. 1½ miles; from Tinnevelly N.N.E. 7 miles.——*Tinnevelly* (திருநெல்வேலி - tirunelvéli, Tam.). See below.——**(3)** Town, Head-quarters of Tahsildar and District moonsif, Railway station; Tinnevelly dist., Tinnevelly tal.; pop. 24,768; acres 1,093; lat. 8° 44′; long. 77° 44′; height 213 feet; from Madras S.S.W. 344 miles; from Palamcottah W. 4 miles; from Shermadevy E. 9 miles; from Shreevillipoottore S. 54 miles; from Tuticorin W. 36 miles by rail. 1½ miles from the left bank of the Tamrapurny. Largest town in district but administrative head-quarters of district are at Palamcottah on other side of the river. When the district was subject to the Naicks [q.v.] of Madura, their governor lived in state at Tinnevelly. About 1560, Vishwanautan, the founder of the Naick [q.v.] dynasty [raj] of Madura, rebuilt the town, and erected many temples, &c. Terminus of a branch of the South indian railway. Active centre of Protestant mission in South india. It has lately been created a diocese and bishop appointed. Car procession in July. Weekly fair on Thursday. Large Shiva temple beautifully sculptured and containing many inscriptions. Is on a typical pattern [maunasauram, staupatyam]. Divided into equal portions, of which one is to Shiva [q.v.], the other to Paravaty [q.v.]. The great thousand-pillared portico in the temple consists of a mass of pillars, 10 deep and extending to 100 in length, without any break or any open space or arrangement. There is a fine Mahomedan tomb raised in memory of a chief who died here. A substantial bridge of 11 arches of 60 feet span crosses the river, connecting Tinnevelly and Palamcottah.

TIPPA (ತಿಪ್ಪ - tippa, *Tel.*; திப்பை - tippai, *Tam.*). Mound [dibba].

TIPPOO (ٹیپو - típú, *Hind.*). Name of a saint, whose tomb is at Arcot, the patron saint of Hyder ally, who named his son Tippoo [tippoo sultan] after him. Mahomedan alam; as Tippoo bee, alam + alaumat [ism].——*Tippoo sultan* (ٹیپو سلطان - típúsultán, Hind.). From (above + sovereign title). Son of Hyder ally, ruler of Mysore, whose capital was Seringapatam. Succeeded to the throne of Mysore, January 2, 1783. The Nizam and Mahrattas united to overthrow his power, 1786. Attacked Travancore and was defeated, December 29, 1789. He successfully renewed the attempt, 1790. Treaty of peace, March 18, 1792. Fresh misunderstandings, November 8, 1798. War declared, February 1799. Action at Malvully in which the Sultan's troops were defeated, March 6, 1799. Seringapatam taken; death of Tippoo, May 4, 1799 [charitram]. See vol. I (183)—(185), 20.

TIR (ತಿರು - tiru, *Can.*; തിരു - tiru, *Mal.*; திரு - tiru, *Tam.*). The Dravidian dialectal change from Shree [q.v.]. An adjective signifying venerable, divine, or sacred; prefixed to many names. A prefix to holy places; as Tripatore, Tripatty. Also to religious books and to names of writers on religion. Also name of Lutchmy.——*Teriry* (ತೆರಿರಿ - teriri, Can.). Short for tiriyairy [q.v.]. Temple of the Todah [q.v.] tribe.——*Tinnevelly* (திருநெல்வேலி - tirunelvéli, Tam.). See sep. title.——*Tircalicoondram* (திருக்கழிக்குன்றம் - tirukkazhikkunram, Tam. tirukalikundram*). From (tiru, tam. sacred + kazhu, tam. kite + kunram, tam. hill). Tam. also (kazhukkunram), meaning kite + hill. Sanscrit name (pakshitírt'ha), meaning bird + sacred place; also (gridhráchala), meaning vulture + mountain; also (védagiri), meaning sacred writing + mountain [narsimhacondah]; also (védáchalam), meaning the same. Village, Hill, Place of pilgrimage; Chingleput dist., Chingleput tal.; pop. 3,566; acres 2,722; lat. 12° 36′; long. 80° 07′; height 500 feet; from Chingleput S.E. 8 miles; from Sydapett S. 30 miles; from the sea W. 9 miles. Half way between Chingleput and coast on road to Sadras. Hill is termination of a ridge. Was endowed by Cholan [q.v.] and Paundyan [q.v.] rulers, its soil and water furnishing a cure of leprosy [cooshtam]. Still place of pilgrimage. Former head-quarters of a Tahsildar [q.v.]. On hill stands part of a temple to Shiva, main building and offices being in town at foot. The idol is Vedagiry eeshwaran, the hill is Vedachellam. The temple was once Jeina [q.v.] and is mentioned by Taranautan in his Thibetan history of Indian booddhism [booddha], under the name of Pacshiteertam or Bird convent. Every day two birds of the kite [gridhram] species come to the hill and are fed by a pundauram [q.v.]. They are believed to be Rishies [q.v.], condemned to bathe every morning in Ganges at Benares, to take food at Tircalicoondram, and to sleep at Rameshwaram. Indran [q.v.] is said to anoint the god by sending down a thunderbolt [vajram] once in twelve years which falls exactly on the top of the conical tower in which the god is placed making a circuit around the god thrice without injuring the building or any person in it. There is a tank called Shankha teertam or chunk [q.v.] shell pond. It is said that once in twelve years a chunk shell comes out of this pond. Two or three days before, a roaring noise comes from the waters which assume a frothy appearance. The people watch carefully and take out the shell with ceremony. Trig. station in lat. 12° 36′ 30·95″; long. 80° 6′ 5·23″; from Chingleput S.E. 8 miles; from the sea W. 9 miles [mahadeva mullay].——*Tircalyaunam* (திருக்கலியாணம் - tirukkaliyánam, Tam.). Sacred wedding. Marriage of a god [pundigay, 6d]. Especially festival for Shiva's marriage with Parvaty. The festival lasts usually nine or ten days, during which the daily offering are made on a larger scale; and Shiva [q.v.], Parvaty [q.v.], Vigneshwaran [q.v.], Soobramanyan [q.v.], &c., are carried about morning and evening in the streets.——*Tircanchy* (திருக்காஞ்சி - tirukkáñji, Tam.). From (tiru, tam. holy + káñji, tam. the town). Sanscrit name (káñchí). Another name of Canjy or Cutchy [q.v.].——*Tircaumayyan* (திருக்காமய்யன் - tirukkámayyan, Tam.). From (above + káma, san. love short for kámákshi, or párvatí + aiyyan, tam. master, titular affix). Hindoo 2nd or pers name [peyar].——*Tircaurtigay* (திருக்கார்த்திகை - tirukkárttigai, Tam.). Means holy + third lunar asterism. Same as Caurtigay.——*Tirchoornam* (திருச்சூரணம் - tiruccúranam, Tam.). From (above + chúrna, san. powder). Holy paste to mark the fore-head with [naumam, shree choornam].——*Tiriyairy* (ತಿರಿಯೇರಿ ಮಂದು - tiriyérimandu, Can.). From (above + ér, can. buffalo + mandu, can. todah village). Sacred mund [q.v.] of the Todahs [q.v.]. There are about nineteen Tiriyairies on the hills.——*Tirmagal* (திருமகள் - tirumagal, Tam.). From (above + magal, tam. daughter). The divine daughter; Lutchmy [q.v.].——*Tirmagalmaindan* (திருமகள்மைந்தன் - tirumagalmaindan, Tam.). From (above + magal, tam. daughter + maindan, tam. son). Manmatan [q.v.] in his birth as Pradyoomnan, or the radiant deity, son of krishnan [q.v.] and roocminy [q.v.].——*Tirmagan* (திருமகன் - tirumagan, Tam.). From (above + magan, tam. son). Krishnan [q.v.] or Vishnoo [q.v.].——*Tirmalasawmy* (திருமலைசாமி - tirumalaisámi, Tam.). From (above + malai, tam. mountain + svámi, san. lord). Epithet of Shiva, the lord of Keilausam, the holy mountain. Also of Vishnoo as lord of Tripatty. Hindoo 2nd or pers. name [peyar].——*Tirmaley* (ತಿರುಮಲ - tirumala, Tel.; திருமலை - tirumalai, Tam.). From (tiru, tam. holy + malai, tam. hill). Tam. also (tiru-véngadam), means holy vencatam; also (véngadam), meaning white mountain; also (vadavéngadam), meaning north vencata as distinguished from Tenvengadam or the Alagar hills near Madura; also (vadamalai), meaning north + mountain. Sanscrit name (shésháchala), meaning sheshan, the serpent + mountain; also (vénkatáchala), means vishnoo, the sin destroyer + hill; also (vénkatádri); also (venkatagiri) [vengadam]; also (añjanáchala), meaning anjanay, the mother of hanooman + mountain; also (anjanágiri). Village, Hill, Place of pilgrimage; North arcot dist., Chundragherry tal.; pop. 1,517; acres 31,166; lat. 13° 41′; long. 79° 24′; from Chittore N.N.E. 37 miles; from Chundragherry N.N.E. 7 miles. Otherwise called Upper tripatty. On top of range and near its S.W. angle, 6 miles from Lower tripatty. Is in shape of a parallelogram and is ill-built. Most buildings are choultries [q.v.]; some modern, built by rajahs of Mysore and Cochin and zemindars of Calastry and Vencatagherry; but most are long stone corridors [praucauram] skirting streets and rudely carved. Opposite to the temple are shops. Around the town a belt of gardens contain mango [q.v.], jack [q.v.], tamarind [q.v.], orange [q.v.], sandal [q.v.], champak [q.v.], &c., for use of temple. The range has several peaks, each sacred. Near Sheshachellam peak stands the temple, and the whole range is called after this peak. Several teertams [q.v.];

principal is Toomboor cona. Different ascents to hills, most frequented being from Lower tripatty and from Chundragherry. The temple is simple, but richest shrine in S. india. The jewels, &c., are worth about 50 lakhs [q.v.], and it has the same in cash [q.v.]. Originally dedicated to Shiva [q.v.], now a temple of Vishnoo [q.v.]. Ramaunoojacharry [ramaunoojan] effected this change. The principal temple was formerly larger than now; main street of modern town being outer praucauram [q.v.], of which ruined gopoorams [q v.] remain at four corners. Adjoining the temple are the principal bathing pool called the Sawmy-pooshcarny, the thousand-pillared mantapam [q.v.], &c. The whole is very much decayed. The idol [shilay, vigraham], which has no consort, is a figure of Shiva converted into Vishnoo by addition of chunk [q.v.] and chuckram [q.v.] in gold [pon]. No European has yet entered the temple gate. The divinity has 1,008 names. The chief are Shreenivasa sawmy, Vencatachellapaty, Vencateshwarasawmy and Sheshachellapaty. Hindoos from bengal call him Baulajee [q.v.]. In front of the adytum and ante-room is a mantapam [q.v.] supported on stone pillars, in the middle of which is a brass vessel in which hangs a bag open at the bottom and suspended from the roof. Into this money and jewels are thrown. On either side of it hangs a gong [q.v.]; that on the left side when struck utters the name Govindan [q.v.], and its companion on the right Narayanan [q.v.]. On the way up there are three portals, at the first of which Christians and Mahomedans must stop. Temple records state that the principal part of the temple was built by Tondiman chuckravurty athonday, son of Coolotoonga cholan, in the year 499 of the Kaliyoog [q.v.] or B.C. 3100, when it was prophesied that worship would continue for only 5,000 years. By this only five years remain. A village called Tondaimundalam still exists not far from the town. A monastery belonging to the mahant [q.v.] is on rising ground, where beiraugies [q.v.] are fed. Under Mahomedans, revenues of temple were all paid to ruling power of the country. There are three authorities on the establishment of the temple, the two jiyyangars [q.v.] and the mahant [q.v.]. Of these the great and the small jiyyangar [q.v.] are the most holy, and regarded almost as divinities. They are the religious heads. The mahant is the secular head. He is always a northern bramin, surrounded by beiraugies, one of whom he nominates during his life time to be his successor. The importance of this office has greatly increased since 1843, when Government surrendered management. The principal festival, Bramhotsavam [pundigay, 6a], in which the marriage of the sawmy with Pudmauvaty is celebrated, is in September. It lasts ten days. The most popular procession is that of Garooda ootsavam [pundigay, 6a] on fifth day; on the ninth day when the car [q.v.] goes round the town the people disperse. Other periodical feasts are Shivarautry [pundigay, 6a], Mooccoty ootsavam [pundigay, 3e], and Rata saptamy [pundigay, 3e]. The number of pilgrims on ordinary days amounts to 200 or 300; during the annual festival, 50,000. The pilgrims perform their vows on Upper tripatty hill, then visit the idol below and return to their homes. The principal part of the vow in the up-hill temple consists in shaving completely the heads of men and women indiscriminately. A very large part walk up the hill, but the rich go in small portable cots [dhooly]. Sickness and the desire of male offspring are the chief causes which induce persons to make a vow to the Tripatty idol; when the object is attained the vow must be fulfilled at some time, but not necessarily at once. Hindoos visit it as pilgrims from great distances, usually in bands and of all ages under a leader, the members of the party calling out Govindan [q.v.]. Offerings are made of every degree of value; gems, jewels, gold and silver cloths, always the hair of the head, from the lame a silver leg, from the blind a gold or silver eye, &c. Its immense revenues are derived from offerings, and there are villages and lands held by the officers of the temple. The gifts of pilgrims are recorded as a repayment of the nuptial expenses of the idol. The great Sheiva vedantist Shuncaracharry [shuncaran] resided here for some time. There is a Tamul stanza:—*இரணியநாட்டா னிரணியனீனைந் தலையன்கஞ்சன் முரணியகோட்டி னகத்திற்சரத்தன் மூன்றுளிற்றஞ்சத், தாணியிற்குத்தி யிடந்தெய்துதைத் தவன் சர்ப்பவெமபன், அரணியகேழ லரிராகவன்கண் ணனிவந்தே*—"the god of tripatty is he who, assuming the "forms of a hog [varauha avatar], of a lion [narsimha avatar], "of rama [q.v.], and of krishnan [q.v.], pierced, lacerated, shot "and kicked, by means of his tusk, claws, arrow and feet; "so that these four personages, hiranyaucshan, hiranyan, the "ten-headed ravanan [q.v.], and cumsan, were killed."——*Tirmalpaud* (തിരുമുൽപ്പാട - tirumulppátu, Mal.). From (above + mun, mal. front + pátu, mal. chief, a title). Rank of a Bramin [q.v.] or Cshatriya [q.v.]. A member of a royal family. ——*Tirmanass* (തിരുമനസ്സ - tirumanassu, Mal.). From (above + manas, san. will). Holy will, an honorific form of addressing a king [peyar].——*Tirmanjan* (திருமஞ்சன் - tirumañjan, Tam.). From (above + majjana, san. ablution). Hindoo 2nd or pers. name [peyar].——*Tirmanjanam* (திருமஞ்சனம் - tirumañjanam, Tam.). From (above + majjana, san. bathing). Bathing the idols [shilay, vigraham]. For this it is the practice to bring water from sacred tanks, wells or rivers [teertam]. The water is usually brought on the head of a Bramin [q.v.] accompanied by music in large temples.——*Tirmany moottaur* (திருமணிமுத்தாறு - tirumanimuttáru, Tam.). From (tiru, tam. sacred + mani, tam. beauty + muktá, san. pearl + áru, tam. river). Tam. also (tirumaniyáru); also (manimuttáru). Sanscrit name (manimuktánadí), meaning crystal + pearl + river. River; Salem dist., Salem, Trichengode and Namcull tals. Rises in the Shevaroy hills, and flowing through the western portion of the talook, passes by Paramatty and Salem supplying on its way the Idoomban coolam tank, and joins the Cauvery near Yeddayaur.——*Tirmaul* (திருமால் - tirumál, Tam.). From (above + mál, tam. greatness). Vishnoo [q.v.]. ——*Tirmoodishevagar* (திருமுடிச்சேவகர் - tirumudiççévagar, Tam.). From (above + mudi, tam. crown + sévaka, san. servant). The warrior with the sacred crown. Ayenaur [ayen] as tutelary god of a village [grauma devatay].——*Tirmoomboo* (തിരുമുമ്പു - tirumumpu, Mal.). From (above + mumpu, mal. presence). Title among bramins of Chiracal who have adopted the Maroomakkatoyem [q.v.] law of inheritance [dauyam]. Hindoo third name [peyar].——*Tirmozhy* (திருமொழி - tirumozhi, Tam.). Sacred word or speech [tirvye, tirvye mozhy]. ——*Tirmullay* (திருமலை - tirumalai, Tam.). From (above + malai, tam. mountain). Epithet of Keilausam [q.v.] and of Tripatty [q.v.]. Hindoo 2nd or pers. name [peyar].——*Tirmungalam* (திருமங்கலம் - tirumangalam, Tam.). See sep. title.——*Tirmunn* (திருமண் - tiruman, Tam.). From (above man, tam. earth). Clay with which Veishnavas draw lines on their foreheads [naumam].——*Tirnarayanan* (திருநாராயணன் - tirunáráyanan, Tam.). From (above + náráyana, san. vishnu, the mover on waters). Hindoo 2nd or pers. name [peyar].——*Tirnaul* (திருநாள் - tirunál, Tam.). Means sacred day [pundigay, 6d]. Any festival day. Veishnavite term and corresponds to the Ootsavam [q.v.] of Sheiveites. Also called Tirvizhah. Tirnauleipovaun is a festival-goer, specially applied to nundan [q.v.], the pariah [q.v.] devotee of shiva [q.v.], who obtained mocsham [q.v.] at chidambaram on the occasion of his visiting it on the tirvauthiray festival [ardrah darshanam]; he is one of the sixty-three devotees of shiva [aroopatt moover].——*Tirnaumam* (திருநாமம் - tirunámam, Tam.). See Naumam. ——*Tirnávoya* (തിരുനാവായ - tirunáyáya, Mal.). From (tiru, mal. holy + náva, san. ship). Sanscrit name (shrínavayógipura), meaning holy + nine + saint + town; also (shrínávápura), meaning holy + ship + town. Village, Place of pilgrimage; Malabar dist., Ponnany tal.; pop. 8,925. Close to railway at 382nd mile from Madras, about half way between Coottipooram and Tiroor stations. Here is a bund [q.v.] across some fields, where formerly the Maha magham [q.v.] festival used to take place at the enthronement of the kings every twelve years. The last occurred 180 years ago. Near the road from Codacull to Coottipooram, and about 20 yards from the spot where the king used to stand during the ceremonies, is a rockcut cave. Old temple in the village dedicated to Rama [q.v], the most famous in the district.——*Tirneer* (திருநீறு - tiruníru, Tam.). From (above + níru, tam. burnt ashes). Burnt ashes [neeroo] of cowdung [shauny] used by Sheivites to smear the body with [vibhooty].——*Tiroor* (തിരൂർ - tirúr, * Mal.). From (tiru, mal. good fortune + úr, mal village). Village, Railway station, Travellers' bungalow, Market on Sundays; Malabar dist., Ponnany tal.; pop. 5,734; lat 10° 56′; long. 75° 59′; height 17 feet; from Calicut S.S.E. 24 miles; from Ponnany N. 10 miles; from the sea E. 4 miles. Present terminus of the Canal viâ Ponnany to Cochin.——*Tiroorangaudy* (തിരൂരങ്ങാടി - tirúran-náti, Mal. tirurangadi *). From (tiru, mal. prosperous + úr, mal. village + annáti, mal. bazaar). Bazaar in the prosperous Chernaud.—"*a*" Deputy tahsildarry, Malabar district. Pay Rs. 70.—"*b*" Town, Deputy tahsildar's station; Malabar dist., Yernaud tal.; lat. 11° 03′; long. 75° 58′; from Calicut S.S.E. 18 miles; from Cannanore S.S.E. 67 miles; from Madras W.S.W. 326 miles; from Malapooram W. 9 miles; from Manantoddy S. 51 miles; from Munjery W.S.W. 14 miles; from Palghaut W.N.W. 52 miles; from Ponnany N. 17 miles; from Tellicherry S.S.E. 52 miles; from the sea E. 5 miles. Remains of a fort where a victory was gained by General Hartley over Tippoo's troops in 1790.——*Tirpanimautt* (திருப்பணிமாற்று - tiruppanimáttu, Tam.). From (above + pani, tam. work + máttu, tam. to change). Repairs in temples.——*Tirpauvauday* (திருப்பாவாடை - tiruppávádai, Tam.). From (above + pávai, tam. woman + ádai, tam. dress). A long cloth on which offerings of rice [q.v.] are presented to idols [shilay, vigraham].——*Tirporore* (திருப்போரூர் - tiruppórúr, Tam. tiruporúr *). From (tiru, tam. sacred + pór, tam. war + úr, tam. village); from caurtikeyan, the god of war; tam. also (pórúr), meaning war + village; also (póri), meaning war place. Village, Place of pilgrimage; Chingleput dist., Chingleput tal.; pop. 2,186; acres 1,538; lat. 12° 44′; long. 80° 14′; from Chingleput E. 14 miles; from Madras S. 25; from Saidapett S. 21 miles; from the sea W. 3 miles. On East coast canal. Former cusbah [q.v.] or a talook, subsequently station of a deputy tahsildar [q.v.]. Shiva pagoda [q.v.]. Crowds flock to its monthly festivals called Kritticay [caurtey, pundigay].——*Tirshooly* (திருச்சுழி - tiruççuzhi, Tam. tirushuli *). From (tiru, tam. holy + shuzhi, tam. circle). Tam. also (shuzhigai), meaning toddy. Sanscrit name

(trishúlapura), meaning trident town; also (pannagakshétra), meaning serpent + sacred place; also (kaléshvarakshétra), meaning shiva + lord + sacred place.—"a" Deputy tahsildarry, Madura district. Pay Rs. 100.—"b" Village, Head-quarters of Deputy tahsildar and sub-registrar; Madura dist., Ramnaud zemindarry; pop. 3,769; lat. 9° 32′; long. 78° 15′; from Dindigul S.S.E. 60 miles; from Kodaykarnal S.E. 66 miles; from Madras S.S.W. 280 miles; from Madura S.S.E. 27 miles; from Rameshwaram W.N.W. 78 miles; from Ramnaud W.N.W. 44 miles; from the sea S.E. 32 miles. On the south bank of the Goondaur. Head-quarters of a talook. Of great antiquity and much resorted to by pilgrims. Large sculptured Shiva temple built by Paraucrama paundyan. Several fine bathing reservoirs. Two miles east on a small hill is an old Shiva temple. Three annual festivals in April, July and August. Weekly market on Wednesday.——*Tirvadamaroothore* (திருவிடைமருதூர் - tiruvidaimaruthúr, Tam. tiruvadamarudúr *). From (tiru, tam. sacred + idai, tam. middle + marutham, tam. terminalia tomentosa, bedd. + úr, tam. town). Place in the middle of which is an arjoon tree. Sanscrit name (madhyárjuna), meaning middle + arjoon tree, terminalia tomentosa, bedd. [murdah].—"a" Deputy tahsildarry, Tanjore district. Pay Rs. 70.—"b" Village, Deputy tahsildar's station, Railway station; Tanjore dist., Combaconam tal.; pop. 2,580; lat. 11° 00′; long. 79° 30′; height 73 feet; from Combaconam E.N.E. 6 miles; from Madras S.S.W. 153 miles; from Mayavaram S.W. 15 miles; from Munnargoody N. 23 miles; from Negapatam W.N.W. 31 miles; from Tanjore E.N.E. 25 miles. Residence of some of the Tanjore family. Old and well sculptured Shiva temple with fine gopooram [q.v.], containing inscriptions.——*Tirvadaunay* (திருவாடானை - tiruvádánai, Tam.). From (tiru, tam. holy + ádu, tam. sheep + ánai, tam. elephant); from the temple idol with head of a goat and body of elephant [q.v.].—"a" Deputy tahsildarry, Madura district. Pay Rs. 70.—"b" Village, Head-quarters of Deputy tahsildar and Sub-registrar; Madura dist., Ramnaud zemindarry; pop. 1,110; lat. 9° 47′; long. 78° 58′; from Dindigul E.S.E. 76 miles; from Kodaykarnal E.S.E. 100 miles; from Madras S.S.W. 243 miles; from Madura E.S.E. 56 miles; from Rameshwaram N. 42 miles; from Ramnaud N. 29 miles; from the sea W. 10 miles. On the road from Shivagunga to Tondy. Old sculptured Shiva temple surrounded by a wall with two copper-plate shausanams [q.v.], dated A.D. 1679, recording grants by Hiranya garbha saitoopaty. Annual festival in April. Weekly market on Monday.——*Tirvallam* (തിരുവല്ലം - tiruvallam, Mal.). From (tiru, mal. holy + vallabha, san. lord). Village, Place of pilgrimage; Travancore state, Trivandrum division, Neittincara tal.; lat. 8° 21′; long. 77° 07′; from Neittincara S. 4 miles; from Trivandrum S.E. 12 miles; from the sea E. 3 miles. Situated at the junction of the Caramana and Kiliyaur and about four miles to the south of Trivandrum. Pagoda [q.v.] to Bramha [q.v.]. Considered by Malayaulies as sacred as Gayay in N. india.——*Tirvancode* (തിരുവാങ്കോട് - tiruvánkótu, Mal.). From (tiru, mal. goddess of prosperity + vázhu, mal. reside + kótu, mal. fort). Sanscrit name (shrívarddhanapurí), meaning lutchmy + prosperity + town. Town; Travancore state, Pudmanaubhapooram division, Yerraneel tal.; pop. 7,402; lat. 8° 14′; long. 77° 21′; from Yerraneel N. 3 miles; from Trivandrum S.E. 28 miles; from the sea N. 8 miles. Once the capital of Travancore. Two miles to the south of Pudmanaubhapooram. Gives its name to the whole state. Former residence of the court, now almost deserted. Trivandrum, the modern capital, was in former days merely the summer residence of the rajah. Ruins of an old fortress. It is now largely inhabited by Mahomedans, most of whom deal in bell-metal [cunts] vessels. Has a mosque [musjid] where the Chandanacoodam [sandal] ceremony is annually performed. Has a very old Shiva temple.——*Tirvanjicoolam* (തിരുവഞ്ചിക്കുളം - tiruvañchikkulam, Mal.). From (tiru, mal. prosperous + vañchi, mal. the country so called + kóvilakam, mal. palace). Mal. also (tiruvañcházhimukham), meaning holy + vanchy, the country so called + sea + face; the prosperous sea-port of the vanchy country. Sanscrit name (jayarátéshvara), meaning victory + giving + shiva, the lord. Village; Cochin state, Moocoondapooram tal.; lat. 10° 13′; long. 76° 15′; from Irinyaulacode S. 10 miles; from Ernacolum N.N.W. 16 miles; from the sea E. 4 miles. Ancient capital of Keralam [q.v.]. The temple to Shiva, by Cherma permaul.——*Tirvarore* (திருவாரூர் - tiruvárúr, Tam.). From (tiru, tam. holy + ár, tam. the tree, cassia fistula, linn. + úr, tam. village); holy place with condray [q.v.] trees. Tam. also (árúr), meaning condray tree, cassia fistula, linn. + village; it also means village of bauhinia racemosa, lam. whose flowers are sacred to shiva as well; also (kamalai), meaning lotus + place. Sanscrit name (kamalálaya), meaning lotus [nelumbo], temple. Otherwise Trivelore.—"a" Deputy tahsildarry, Tanjore district. Pay Rs. 70.—"b" Town, Railway station, Moonsif's station; Tanjore dist., Negapatam tal.; pop. 9,415; acres 1,011; lat. 10° 47′; long. 79° 41′; height 39 feet; from Negapatam W. 15 miles; from Tanjore E. 33 miles; from the sea W. 14 miles. Sacred to Shiva. Noted for temple and car festival. Former cusbah [q.v.] of a talook [q.v.] now merged in Negapatam talook. Wesleyan mission station. There is a Tamul proverb:—அரிசிப்பொதியுடன் திருவாரூர்—"tirvarore with a bag of rice." Spoken of a double benefit. And another:—காசியிலிறக்க முத்தி கமலையிற்பிறக்கமுத்தி—"death at Caushy, birth at Camalay obtains salvation." Referred to by certain astronomical tables. According to Hindoo geography it lies 3° 32′ 58″ E. of Lunka [q.v.] in longitude [deshauntaram] and in 10° 44′ N. latitude [acsham].——*Tirvauchacam* (திருவாசகம் - tiruvásagam, Tam.). From (above + váchaka, san. word). Collection of hymns to Shiva [q.v.] by Maunicavauchacan [q.v.]. Still current. There is a Tamul proverb:—திருவாசகத்திற்கு உருகாதார் ஒரு வாசகத்திற்கும் உருகார்—"those who are unaffected by Tirvauchacam will "not be moved by any other composition [devauram]." Cf. the Naulauyira prabandham to Vishnoo [q.v.]. See vol. I (56).——*Tirvausal* (திருவாசல் - tiruvásal, Tam.). From (above + vásal, tam. gateway). The gateway [gopooram] of temple [coil, pagoda.]——*Tirvausy* (திருவாசி - tiruvási, Tam.). From (above + vási, tam. contraction of vásigai, tam. garland). The arch or bow over the head of an idol [shilay, vigraham].——*Tirvauthiray* (திருவாதிரை - tiruváthirai, Tam.). From (tiru, tam. auspicious + árdrá, san. sixth lunar mansion). Same as Ardrah darshanam.——*Tirveeraroyan* (തിരുവീരരായൻ - tiruvíraráyan, Mal.). From (above + víra, mal. a hero + ráyan, mal. a king). Hindoo 2nd or pers. name [peyar].——*Tirvengadam* (திருவேங்கடம் - tiruvéngadam, Tam.). From (above + venkata, san. the mountain). Tripatty, the holy mountain [tirmaley]. Hindoo 2nd or pers. name [peyar].——*Tirvengadamoodeiyal* (திருவேங்கடமுடையாள் - tiruvéngadamudaiyál, Tam.). The possessor of Tripatty, Lutchmy [q.v.].——*Tirvengadasawmy* (திருவேங்கடசாமி - tiruvéngadasámi, Tam.). From (above + venkata, san. mountain + svámí, san. master). Lord of holy tripatty. Hindoo 2nd or pers. name [peyar]. Similarly Tirvengadiah.——*Tirvilaiyaudal* (திருவிளையாடல் - tiruvilaiyádal, Tam.). From (above + vilaiyádal, tam. sport). Sacred sports [leelay] of the deity, applied to the 64 sports of Shiva as Soondreshwaran at Madura. Otherwise Madura pooraunam [q.v.]. By Paranjoty tumbiraun [q.v.], a Pundauram [q.v.] or Sheiva priest, in reign of Hary veera paundyan, in the Shalivahanan [q.v.] year 973 or A.D. 1051. Paraphrase in tamul of sanscrit legend Halausya mahautmyam [q.v.], a section of the Scaundapooraunam [q.v.]. See vol. I (123).——*Tirvilakkammay* (திருவிளக்கம்மை - tiruvilakkammai, Tam.). The goddess of the sacred lamps; Lutchmy [q.v.].——*Tirvore* (తిరువూరు - tiruvúru, Tel.). From (tiru, tam. holy + úru, tel. village). Zemindarry, Village, Deputy tahsildar's station; Kistna dist., Vissanapett division; pop. 2,796; lat. of village 17° 07′; long. 80° 39′; from Bezwada N. 41 miles; from Guntoor N. 57 miles; from Madras N. 275 miles; from Masulipatam N.N.W. 71 miles; from Vinoocondah N.E. 94 miles. The zemindars of this place claim descent from the Vellanky family [calagara]. Peshcush Rs. 4,396.——*Tirvulloovan* (திருவள்ளுவன் - tiruvalluvan, Tam.). The holy pariah. Literary name of author of Cooral [q.v.]. Real name unknown. His parents were Bhagavan and Adiyaul, a Bramin and a Pariah. Brought up by a Vulloovan [q.v.], or priest of the Pariah [q.v.] caste, at Mylapore. Tirvulloovar lived during the lifetime of Oogra vazhoothy paundyan, whose reign was the last in which the Madura college existed. He worked at the loom [tarry], wrote his Cooral, and took it to the Madura college [q.v.]. He has many titles, as Deva poolavan divine poet, Moothal pauvalar first of poets, Pernavalar great poet, etc. [pauvalan]. When he died his body was according to his own desire exposed outside the town to be eaten by crows [caurvam]. See vol. I (55).——*Tirvye* (திருவாய் - tiruváy, Tam.). From (above + váy, tam. word). Word of a deity [tirmozhy, tirvye mozhy].——*Tirvyemozhy* (திருவாய்மொழி - tiruváymozhi, Tam.). From (above + váy, tam. mouth + mozhi, tam. word). Otherwise Prabandham. Four thousand stanzas by veishnava alwars [q.v.]. Called by veishnavas the Tamul vedam. In four books. The first part sacred words, relates the story of Krishnan's child-hood, and contains hymns in praise of temples. The second part, called the great sacred words, is chiefly about Veishnava temples. The third part is termed words of the sacred mouth; the divinity of Vishnoo, how to meditate on him, a message sent to the deity by a bird, duty of men to the deity, are some of the subjects. The fourth part contains prayers to Vishnoo, meditations, &c. Compare the Sheiva tirvauchacam [q.v.]. See vol. I (56). There is a Tamul proverb:—பெருமான் படிக்கிறது திருவாய்மொழி, இடிக்கிறது பெருமாள் கோவில்—"to read Tirvyemozhy and to break down the "temple of Vishnoo;" hypocrisy.——*Travancore* (തിരുവിതാംകൂർ - tiruvitánkúr, Mal.). See sep. title.——*Tricalore* (திருக்கோயிலூர் - tirukkóyilúr, Tam.). See sep. title.——*Trichendore* (திருச்செந்தூர் - tiruççendúr, Tam. tiruchendúr *). From (above + shéndan, tam. skanda + úr, tam. village). Tam. also (alaiváy), meaning wave + mouth; also (tiruççiralaiváy), meaning holy + beauty + wave + mouth; also (shendil), corruption of (jayanti, san.), meaning doorga, the victorious; also (shendil), meaning same. Sanscrit name (jayantipura), meaning doorga + town. Town, Port, Place of pilgrimage; Tinnevelly dist., Tencaray tal.; pop. 9,689; acres 9,482; lat. 8° 30′; long. 78° 10′; from Coolashekharaputnam N.E.

8 miles; from Madras S.S.W. 344 miles; from Shreeveicoontam E.S.E. 18 miles; from Tinnevelly E.S.E. 34 miles; from Veerapandiyanputnam S. 1½ miles. On Gulf of Manaar. Large and important temple built out into the sea, much frequented and containing excellent sculpture. On the shore, a few miles south is a group of sixteen pillars, each bearing an inscription. One of the six places sacred to Soobramanyan [q.v.]. Annual festival in March, when a cattle [maud] fair also takes place. Trig. station at Trichendore mantapam in lat. 8° 29′ 46·36″; long. 78° 10′ 17·22″; height 50 feet; from Tencaray E.S.E. 16 miles; from Trichendore E. ½ mile; from the sea W. ¼ mile.——*Trichengode* (திருச்செங்கோடு - tiruççhengódu, Tam.). See sep. title.——*Trichinopoly* (திருச்சிராப்பள்ளி - tiruççináppalli, Tam.). See sep. title.——*Trichore* (തൃശ്ശിവപ്പേരൂർ - trishshivappérúr, Mal.). From (above + shiva, san. the god + peru, mal. great + úr, mal. village). Sanscrit name (parashurámapurí), meaning parshooraman, the hero + town; also (shríshivaméru), meaning holy + shiva, the god + the mountain, so called.—"*a*" Talook, Cochin state; pop. 104,695. Principal places:—Andicaud, Arimbore, Arnautkara, Cotticaud, Moondore, Olloor, Oorgam, Peringotekara, Permanam, Putticaud, Trichore, Veeyore, Yedacoonny, Yenamacull.—"*b*" Town, Head-quarters of Peshcar, Divisional officer, Zillah judge, Táhsildar and Moonsif, Telegraph office; Cochin state, Trichore tal.; pop. 11,638; lat. 10° 32′; long. 76° 15′; height 29 feet; from Bangalore S.W. 190 miles; from Bombay S.S.E. 588 miles; from Chetwye E. 12 miles; from Chittoor W.S.W. 37 miles; from Chowghaut E.S.E. 13 miles; from Cochin city N. 38 miles; from Ernacolum N. 38 miles; from Madras W.S.W. 325 miles; from Tripoontora N.N.W. 41 miles; from the sea E. 13 miles. Very old town on the Malabar coast said to have been founded by Parshooraman sixth incarnation [avatar] of Vishnoo. Chief centre of Braminism. The site is advantageous, being close to the eastern coast of the backwater by which it communicates with Chowghaut, Calicut, and the city of Cochin; by land the only route is that proceeding northeast to Palghaut, being a defile through jungles infested with wild elephants and other wild animals, and very unhealthy from November to March. The town is considered healthy. The Cochin rajah has a fine country residence situated within a ruined mud fort. The fortifications erected in 1774 have been destroyed. A detachment of Native infantry under the British government is stationed here. Active trade with Palghaut and Cochin. One Malayalam weekly paper and one monthly magazine published here.—"*c*" Lake; Cochin state; Trichore tal.; lat. 10° 25′ to 10° 35′ N.; long. 76° 09′ to 76° 15′ E.; from Ernacolum N. 30 miles. Otherwise called Yenamacull mouth. Of great value, and deserves notice, if only for the singular struggle of human industry against the forces of nature, which the cultivation of its bed demands. From the subsidence of the floods of one year to the commencement of the following rains the time is barely sufficient for the garnering of a crop. At the close of the rains the water in the lake, which is protected from tidal influences by a masonry dam at Yenamacull, is drained off by ceaseless labor day and night with Persian wheels [chuckram] aided not unfrequently by patent pumps driven by portable steam-engines. Every foot of reclaimed ground is protected by fences of wattle and mud and is planted up with rice seedlings [nautt]. Spaces are left between the fields, and into these channels the water drawn from the fields is poured; so that boats have to be employed for visiting the different fields, the dry beds of which lie some three or four feet below the level of the water in the canals. The bulwarks of the fields are frequently breached and the unmatured crop drowned [colpoonjah]. A small portion only of this lake lies in British territory. The major portion belongs to the Cochin state. The original dam was formed during the eighteenth century by united efforts of the Zamorin and Cochin rajahs. It is now annually repaired at the joint cost of the British and Cochin governments.——*Trimal* (திருமலை - tirumalai, Tam.). From (above + malai, tam. mountain). Epithet of Tripatty.——*Trimal deva* (తిరుమలదేవ - tirumaladéva, Tel.). From (tirumalai, tam. the holy mountain + déva, san. god). Name of two rajahs of Vijianugger of the Rama rajah dynasty [charitram].——*Trimal naick* (திருமலைநாயக்கன் - tirumalaináyakkan, Tam.). Name + third name. Naick [q.v.] ruler of Paundya [q.v.]. A.D. 1623–1659. See vol. I (121), (154); vol. II, 96, 250. Fifteen rulers of the Naick race are enumerated as having borne sway over Madura and Tinnevelly between 1559 and 1736. By far the most distinguished was this prince, whose magnificent tastes are attested by the buildings he erected at Madura, especially his palace, a Saracenic structure which is the grandest building of its kind in Southern india [maunasauram, stanpatyam]. What is now a palace was originally little more than the hall of audience. He erected another palace of much smaller dimensions, but in the same style of architecture at Shreevillipoottore in Tinnevelly, where, it is said, he liked to reside occasionally. The remains of this palace are now utilized as the Tahsildar's cutcherry [q.v.]. The greater part of Trimal naick's reign however was disfigured by exhausting and impolitic wars [charitram].——*Trimal saitoopaty* (திருமலைசேதுபதி - tirumalaisétluppathi, Tam.). Name + title. Otherwise Raghoonaut tevar. Ruler of Ramnaud from 1645 to 1670. Drove back a Mysore invasion. Introduced the Navaratry [pundigay, 6d] festival at Ramnaud. See vol. I (124).——*Trimal shree runga* (తిరుమలశ్రీరంగ - tirumalashríranga, Tel.). From (tirumala, tel. holy hill, tripatty + shrí, san. holy + ranga, san. island, also vishnu), vishnoo, the god of shreerungam at tripatty. Rajah of Vijianugger of the Rama rajah dynasty. A.D. 1564–1585. See vol. II, 251.——*Trinomallee* (திருவண்ணாமலை - tiruvannámalai, Tam.). See sep. title.——*Tripah* (തൃപ - tripa, Mal.). From (tri, mal. fortunate + pá, san. to protect). Title of Travancore rajah.——*Tripah swaroopam* (തൃപ്പാസ്വരൂപം - trippásvarúpam, Mal.). From (tripa, san. auspicious ruler + svarúpa, san. dynasty). The dynasty of Travancore or Venaud.——*Tripassore* (திருப்பாசூர் - tiruppásúr, Tam.). From (above + pásu, tam. green + úr, tam. village). Sanscrit name (vamsháranya), meaning bamboo + forest.—"*a*" Zemindarry; Chingleput dist., Trivellore tal.; pop. 2,656; square miles 3; lat. 13° 09′; long. 79° 56′. Peshcush Rs. 2,554.—"*b*" Village; Chingleput dist., Trivellore tal.; pop. 2,656; acres 1,685; lat. 13° 09′; long. 79° 56′; from Sydapett N.W. 25 miles; from Trivellore W. 2 miles. Formerly a cantonment and station for cadets in Company's service, more recently same for pensioned European soldiers. The old fort served as a protection to adjacent country from ravages of neighbouring poligars. Captured by Sir Eyre Coote in 1781. Old Shiva temple with Chola inscriptions. The level of the plain is 183 feet above the sea.——*Tripatore* (திருப்பத்தூர் - tiruppattúr, Tam.). See sep. title.——*Tripatty* (తిరుపతి - tirupati, Tel.; திருப்பதி - tiruppathi, Tam. tirupati*). From (above + pathi, tam. village). Sanscrit name (govindarájapattana), means town of the king govindan or vishnoo.—"*a*" Deputy tahsildarry, North arcot district. Pay Rs. 70.—"*b*" Town, Head-quarters of Deputy tahsildar and District moonsif; North arcot dist., Chundragherry tal.; pop. 14,242; acres 7,182; lat. 13° 38′; long. 79° 28′; height 635 feet; from Arnee N. 67 miles; from Chittore N.E. 36 miles; from Chundragherry E.N.E. 8 miles; from Madras W.N.W. 70 miles; from Ranipett N. 49 miles; from Vellore N.N.E. 53 miles. On the road from Madras to Cuddapah, at foot of Eastern ghauts [q.v.], in valley between Tripatty hills and those of Carvetnugger. Swarnamookhy passes a mile south. Lower tripatty in contradistinction to that on the hill. Is an extremely old town with ruined temples. There are 15 temples, many insignificant. The chief are of Govindarajasawmy and Ramasawmy. The former sawmy is brother of Vencateshwaran, and in his honor Tripatty is sometimes called Govindrajputnam. In September the town is full, owing to Bramhotsavam [pundigay, 6a] feast at Upper tripatty. In April or May is the Gungah yautray [pundigay, 6a] feast, 10 days. A waterfall, Capila teertam, descends from hill north of town, up to corridors of stone supported upon carved pillars. It is the duty of every pilgrim to bathe in Capila teertam before ascending the hills, and if he can swim to go and sit upon a figure of Hanooman [q.v.] over which the water falls [aroovy]. Bazaars brisk. There is a Tamul proverb:—திருப்பதிக்குப் போனாலும் துடைப்பம் ஒரு காசு—"though taken to Tripatty, a broom "will fetch only a cash." For Upper tripatty, the place of pilgrimage, see Tirmaley.——*Tripoontora* (തൃപ്പൂണിത്തുറ - trippúnittara, Mal.). From (above + púnuka, mal. to embrace + tara, mal. village). Sanscrit name (shrípúrnapura), means fortune + full + town. Latin Tropinæ. Village; Cochin state, Canyanore tal.; lat. 9° 57′; long. 76° 23′; from Chittoor S.S.W. 60 miles; from Cochin E.S.E. 7 miles; from Ernacolum E.S.E. 5 miles; from Madras S.W. 340 miles; from Trichore S.S.E. 41 miles; from the sea E. 7 miles. Enclosed village. Residence of the Royal family of Cochin.——*Tritrapoondy* (திருத்துறைப்பூண்டி - tirutturaippúndi, Tam.). See sep. title.——*Trittany* (திருத்தணி - tiruttani, Tam. tirutani*). From (above + tanigai, tam. ancient name for the place). Sanscrit name (kshanikáchala), means leisure + mountain. Ancient Tamul name (tanigai), place of relief.—"*a*" Submagistrate's division, Carvetnugger zemindarry, North arcot district. Pay Rs. 100.—"*b*" Village, Hill, Railway station, Place of pilgrimage, Headquarters of Zemindar's revenue talook and of Sub-magistrate's division; North arcot dist., Carvetnugger zemindarry; pop. 3,504; lat. 13° 11′; long. 79° 40′; height 283 feet; from Arnee N.N.E. 42 miles; from Carvetnugger S.S.E. 20 miles; from Chittore E. 34 miles; from Madras W. 47 miles; from Ranipett N.E. 25 miles; from Tripatty S.S.E. 35 miles; from Vellore E.N.E. 36 miles. In south of zemindarry. The town includes four villages, Amoortapooram, Mattamgraumam, Nullanigoonta, and Trittany proper. Mattamgraumam the most holy. Name from mutts [q.v.], choultries [q.v.], and mantapams [q.v.]. The temple stands upon a low range of hills. To Soobramanya sawmy, with wives Devasenay or devayaunay [q.v.] and Vulliyammay [q.v.]. The ascent is by two flights of stone steps on the east and west. Almost all the houses are of local stone. There are nine Teertams [q.v.]:—Agastyan, Bramha, Comaura, Indra, Naurada, Rama, Sapta rishy, Shesha, and Vishnoo. In the temple itself is Keilausa teertam. There are also nine separate lingams [q.v.]. On S. of hill are the seven pools, around which are built the temples of the seven celebrated virgins and Veerabhadra sawmy. Trade in grain and cloths during the Nacshatram [q.v.], feasts once in every lunar month. Particularly in Audy or july, Caurtigay or november, and Maushy [mausam] or february. Bramhotsavams [pundigay,

6a] for ten days in Maushy or february and Chittray [mausam] or april.—"*c*" River; North arcot dist., Carvetnugger zemindarry. Takes its source in Sholinghur hills, runs east and joins Cooshastaly near Arcot-cooppam. Flows between August and December. Crossed by the railway bridge N. of Trittany railway station.——*Trivandrum* (തിരുവനന്തപുരം - tiruvanantapuram, Mal.). From (above + ananta san. serpent, the eternal one + pura, san. city). Sanscrit name (anantashayana), meaning vishnoo, whose bed is the serpent god and to whom pagoda is dedicated as tutelary deity of maharajahs of travancore.—"*a*" Revenue division, Travancore state; pop. 352,679. The smallest of the four divisions, divided into 4 talooks.—"*b*" Talook, Travancore state, Trivandrum division; pop. 102,986. Subdivided into ten praverties [q.v.] or adhicaurams, and containing eighty-eight caras [q.v.] or villages. Bounded N. by Nedoovengaud talook, E. by Neittincara talook, S. by the Indian ocean and W. by Cherankeel talook. Presents a variety of aspects; consisting of hills, valleys, mountains, riversides, seashore, &c.—"*c*" Town, Headquarters of Resident, Divisional and Judges' headquarters, Place of pilgrimage, Cantonment. It is the capital of the Travancore state, the residence of H.H. The Maharajah, Head-quarters of the Travancore government. Seat of the Huzoor [q.v.] cutcherry [q.v.] and other public offices, of the High court and of the chief educational institutions of Government including a college educating up to the highest standard. Travancore state, Trivandrum division, Trivandrum tal.; pop. 41,173 including the fort, fort alone 3,521; lat. 8° 28′; long. 76° 59′; from Alleppey S.S.E. 80 miles; from Bombay S.S.E. 760 miles; from Cannanore S.E. 255 miles; from Cottayam S.S.E. 80 miles; from Madras S.W. 386 miles; from Nagarcoil W.N.W. 38 miles; from Paravore S.S.E. 123 miles; from Quilon S.E. 37 miles; from the sea E. 2 miles; from Veily E.S.E. 5 miles. The Caramana and Kiliyaur intersect the town; and several other minor streams find their way to the sea in the vicinity. As the outfall is imperfect, lower parts of town are unhealthy. Several public buildings, country houses of the Maharajah and princes, houses of European and wealthy natives, &c., are built on isolated laterite [q.v.] hills rising from 50 to 200 feet above sea-level and commanding beautiful scenery. The fort and a great part of the native town are on the low level. The fort, which is of no military value, is surrounded by a high wall. There are extensive Bramin streets both in the fort and in suburbs adjoining the same. The Kiliyaur feeds a large tank within the fort which is largely used by the public. Within the fort are the palaces of the Maharajah and of the princes and princesses of the ruling family, and the great temple of Pudmanaubhan. These buildings are picturesque, and display the local characteristics of high-pitched gables projecting ridges, deep eaves, overhanging balconies, verandahs [q.v.] with massive wooden pillars and elaborate wood-carving, testifying alike to the profusion of timber in the State and the skill of its artisans. The temple is crowned with a lofty tower over its entrance, from the summit of which there is fine view of the surrounding country. The temple is of great antiquity, and is held in the highest regard. The temple enjoys a land revenue of Rs. 75,000, and is almost independent of the State. The frequent religious ceremonies required of Travancore princes, which can only be performed with efficacy at the shrine of Pudmanaubhan, will probably long necessitate the residence of the Maharajah in the immediate neighbourhood of the temple. The cantonment with Nayar brigade is north of town. The town is opened on all sides by well-formed roads covering a space of ground over 6 miles in length. An observatory was built by the Maharajah in 1836. The first astronomer was appointed in 1837. In 1854 a branch observatory was established on Agastya mullay, but in 1865 this establishment was broken up. The main observatory is now under native management. The most interesting modern building is the Napier museum, which has been erected in the public gardens, on plans embracing the prominent features of Malayalam architecture. Among the well built public buildings may be mentioned the public offices, the college and the preparatory school, the residency at Tekkaud and the General hospital. There is no regular port; the surf on the coast is high, and the few vessels which touch have to lie out a long way from the shore. A succession of canals running along the coast to the north connects the local backwaters, and puts the town in direct communication with the great backwater system of northern Travancore and Cochin and with the Madras railway. There was formerly a break at Warkully, about 20 miles north of Trivandrum, where high laterite headlands abut on the sea. Heavy works consisting of two tunnels have been completed at a cost of 18 lakhs and have surmounted this.——*Trivaudy* (திருவாதி - tiruváthi, Tam. tiruvádi *). From (above + ádi, san. shiva). The first god. Tam. also (tiruvaiyár), meaning holy + five + river. Sanscrit name (pañchanada), meaning five rivers. They are the Coleroon, the Cauvery proper, the Coodamoorty, the Vellaur and the Vennaur all running parallel within the breadth of six miles.—"*a*" Deputy tahsildarry, Tanjore district. Pay Rs. 70.—"*b*" Town, Head-quarters of Deputy tahsildar and Registrar, and Moonsif's court; Tanjore dist., Tanjore tal.; pop. 7,907; acres 1,227; lat. 10° 53′; long. 79° 09′; from Combaconam W.S.W. 19 miles; from Madras S.S.W. 169 miles; from Mayavaram W.S.W. 39 miles; from Munnargoody W.N.W. 27 miles; from Negapatam W.N.W. 50 miles; from Tanjore N.N.W. 7 miles. On the right bank of the Cauvery in the midst of the most richly cultivated and productive rice-fields in the delta [conamoogam] of that river. In this neighbourhood, the river margins and isolated spots of dry and elevated ground produce immense quantities of vegetables and green-crops; while village sites are covered with thick clumps of high trees, such as cocoanut [q.v.], mango [q.v.], tamarind [q.v.] and ilooppay [mohwah], and with bamboo [q.v.] bushes, which grow to a great height. Paddy [q.v.] land in this neighbourhood sells at about Rs. 500 an acre, but in some cases it cannot be had at even double this price. Shivajee halted here in his first descent on Tanjore. Before 1860 this was head-quarters of the Trivaudy talook. One of the principal centres of Braminical religion with a large temple, which is held more than ordinarily sacred, and is considered to impart special merit to ablutions in the Cauvery at this particular spot. It is the general resort of aged and pious Bramins, who terminate their existence here. Old Shiva temple with Chola inscription. On sacred and festival days, in April and January, streams of visitors may be seen flowing into the town from Tanjore.——*Trivellore* (திருவள்ளூர் - tiruvallúr, Tam.). See sep. title.——*Trivettore* (திருவொற்றியூர் - tiruvottiyúr, Tam.). From (above + áthi, tam. shiva, the first one + úr, tam. village). Sanscrit name (ádipura), meaning shiva, the first one + town. Town, Place of pilgrimage; Chingleput dist., Sydapett tal.; pop. 7,429; acres 1,726; lat. 13° 10′; long. 80° 22′; from Sydapett N.N.E. 11 miles; from the sea W. ¾ mile. Visited by Fryer in 1673 and mentioned in his Travels. He calls it Triblitore. Cuttiwaukum, Shauttancaud and Trivettore were granted on 25th September 1708 by a Purwanna [q.v.] from Davood khan, Nawaub [q.v.] and Fowjdar [q.v.] of the Carnatic [q.v.] portion of the Golcondah soobah [q.v.]. Resumed by Nawaub saad ool lah-khan, 1713. Firmaun [q.v.] from the emperor Feroksere, cancelling this resumption and confirming the grant, 5th January 1716. Confirmed again by the general firmaun of the Moghul, 12th August 1765. Old Shiva temple with inscriptions. Grand annual festival during February.——*Trivettore* (திருவத்தூர் - tiruvattúr, Tam. tiruvetipuram *). From (above + ottumai, tam. joint + úr, tam. village). Tam. also (ottiyúr), meaning clubbed village; also (otti), meaning dependent village. Sanscrit name (védapurí), means city of the sacred writing. Otherwise Wottiyore and Wotty. Village, Place of pilgrimage; North arcot dist., Arcot tal.; pop. 1,866; includes five villages which form the town; acres 728; lat. 12° 39′; long. 79° 35′; from Arcot S.E. 23 miles; from Chittore S.E. 50 miles. Close to N. bank of Cheyaur. Once of importance as head-quarters of the old Trivettore talook and of a District moonsif. Originally a stronghold of Jeinas [q.v.]. When they denied truth of Shiva [q.v.] religion, it was agreed that the rival Vedams [q.v.] should be subjected to ordeal by being dropped into Cheyaur. The Jeina vedams floated down the river as far as Anaputtoor, while the Bramin vedams moved against the stream for 2 miles to Cheyyautvendraun. Some Jeinas were therefore hanged, some cut to pieces, some crushed in oil mills. These executions are represented by sculptures on walls of temple. A sculpture, 8 feet high cut out of a single stone and placed under a small mantapam [q.v.] in the temple, represents a palmyra [q.v.] tree bearing male blossoms on one side and female blossoms on the other. Held to be work of Shiva as a representation of himself and Parvaty [q.v.], in one body as Ardha naureeshwaran [ardhanaury].——*Trivetty* (திருவதி - tiruvathi, Tam. tiruvadi *). From (above + pathi, tam. place). Place of pilgrimage; South arcot dist., Cuddalore tal.; pop. 5,068; acres 2,841; lat. 11° 46′; long. 79° 37′; height 166 feet; from Cuddalore W.N.W. 14 miles; from the sea W. 15 miles. On the Guddilam. Former headquarters of a Deputy tahsildar. In June 1750, during the absence of Nauzir jung and Mahomed ally at Arcot, Dupleix possessed himself of the place. Mahomed ally with the assistance of a body of English troops marched to retake it in the July following. The commander refused to surrender, but the Nawaub declined the assault, and the English returned to Fort st. david. Mahomed ally's army was routed by Dupleix in the neighbourhood and the latter at once marched on and took Jinjee. In 1752, after the death of Chundah sahib, the garrison surrendered to the English, who with Mahomed ally's forces encamped here; from this the English made excursions into the country to secure the districts for the Nawaub [q.v.]. In September 1752, Major Lawrence marched hence to attack Wandiwash which was ransomed. On the 3rd January 1753, the united forces of the French and Mahrattas, the latter under Moraury row, entrenched themselves on the banks of the Pennair in sight of Trivetty. They attacked Lawrence on the 9th May, but were repulsed. On the 1st of April the English force under Lawrence defeated the Mahrattas and the French. Lawrence and most of his troops were now summoned to Trichinopoly, as were most of the French force. The remainder attacked Trivetty in April 1753 and, after having been driven back twice, succeeded in taking the Pettah [q.v.], owing to mutiny in the garrison. After the capture of Vardoor in April 1769, Trivetty surrendered without resistance to a small English force.

TIRAUNA (कर्णिकार - karnikára, *San.*; ರಾಯಬೊರೆ - ráyabóre, *Can.*; కొండపాపట - kondapápata, *Tel.*; କଚୁରିଆଚାଲ - kachúriyachál, *Oor.*; കുപ്പിപ്പൂ - kuppippú, *Mal.*; தரண - tarana,

Singh.; திருணப்பழம் - tirunáppazham, *Tam.*). Title from singhalese. San. means resembling an ear-ring [hemp bendy, kaniyaur]. Can. from (ráya, can. king, hence large + bóre, can. the jujube tree, zizyphus jujuba, lamk.). Tel. from (konda, tel. hill + pápata, tel. pavetta indica, linn.). Mal. from (kuppi, mal. bottle + pú, mal. flower). San. also (vyádhiripu), meaning enemy to disease; (drumótpala), meaning tree + water-lily, nymphæa lotus, linn.; (pragrahá), meaning stretching forth; (kritamála), meaning made into garland; (parivyádha), meaning struck on all sides; (rájataru), meaning king's tree [common condray]; (sup'halá), meaning having good fruit [plantain]; (páдapótpala), meaning tree + water-lily. Can. also (pápatigida), properly pavetta. Tel. also (bommapápata), meaning doll + pavetta indica, linn.; (kommi). Mal. also (puliyáyini), meaning sour, artocarpus hirsuta, lamk. Tam. also (kurá); (kódilam); (velvedchi), meaning white + ixora coccinea, linn. Title otherwise Bottle flower tree, Commy, Tree water-lily. Botanically Webera corymbosa, willd., rubiaceæ [vricsham, 71]. Alias Canthium corymbosum; Cupia corymbosa; Gardenia pavetta; Ixora alba; Pavetta wightiana; Polyozus maderaspatanus; Rondeletia asiatica; Stylocoryne webera; Tarenna zeylanica. Webera asiatica, cerifera, zeylanica. Pavetta from (pávattai, tam. pavetta indica, linn.); Tarenna from singhalese. Shrub, glabrous; leaves polished leathery, lanceolate oblong; shining; corymbs trichotomous, terminal; calyx five-cleft; tube of corolla short, twice the length of the calyx tube, widened and bearded at the mouth, segments of limb recurved, villous at the base along the middle, about twice as long as the tube; berry two-celled; cells four to eight seeded; flowers small white, afterwards, cream-colored, fragrant; young shoots are frequently covered with resinous exudation [raul]; the fruit is a small black berry, edible. Hard wood, but very small; used in ceylon for fishing boats. There are other species:—lucens, monosperma.

TIRMUNGALAM (திருமங்கலம் - tirumangalam,* *Tam.*). From (tiru, tam. holy + mangala, san. prosperity) [shree, tir]. —(1) Talook, Madura district. Tahsildar's pay Rs. 200. Area 745 square miles. Population 264,621. Language tamul; a coarse sort of Teloogoo is spoken by Reddies. S. inland part of district. Bounded on the north by Dindigul and Madura talooks, on the east by Madura talook, Shivagunga and Ramnaud zemindarries, on the south by Ramnaud zemindarry, Shauttore and Shreevillipoottore talooks of Tinnevelly district, on the west by Periyacoolam talook. The talook is one vast plain with rugged rocks and verdure here and there. The western boundary consists of a chain of hills which are a continuation of the Western ghauts [q.v.]. Soil generally fertile, but suited better for dry than for wet crops [q.v.]. The soils are black cotton soil [regar], red soil, and gravelly soil. No Industry of note, except dyeing [shauyam], for which Tirmungalam town is remarkable. Tanks [q.v.] mostly fed by rain [mazhay] and a few by the jungle streams called Goondaur and Gowndanuddy. Camping grounds:—Calloottputty, Culligoody and Tirmungalam. Places of archæological interest:—Calloottputty, Cattacaroopanputty, Cooppalnuttam, Devancoorchy, Mailattimaunikam, Poottore, Shilarputty, Sindooputty, Tidiyan, Vicramungalam. Principal trig. stations:—Gopaulsawmy pagoda, Shathooragherry. The leading places, &c., in the talook are the following.——*Carmattore* (கருமாத்தூர் - karumáttúr, Tam.). From (karu, tam. black + máthu, tam. woman + úr, tam. village); from the amman. Village; pop. 3,452; acres 4,025; lat. 9° 56'; long. 77° 58'; from Madura W. 12 miles; from Tirmungalam N.N.W. 8 miles.——*Culligoody* (கள்ளிக்குடி - kallikkudi, Tam. kalligudi*). From (kalli, tam. milk-hedge, euphorbia tirucalli, linn. + kudi, tam. village). Village, Railway station; pop. 3,327; acres 4,808; lat. 9° 56'; long. 78° 00'; height 362 feet; from Madura S.S.W. 19 miles; from Tirmungalam S.S.W. 9 miles.——*Doddappa naickanore* (தொட்டப்பநாயக்கனூர் - tottappanáyakkanúr, Tam.). From (doddappanáyakudu, tel. proper name + úr, tam. village). Zemindarry, Village; pop. 5,627; lat. 9° 56'; long. 77° 53'; from Madura W.N.W. 26 miles; from Tirmungalam N.W. 13 miles. Peshcush of zemindarry Rs. 2,179.——*Goondaur* (குண்டாறு - kundáru, Tam.). See sep. title.——*Gopaulsawmy pagoda* (கோபாலசாமிக்கோவில் - kóbálasámikkóvil, Tam.). From (kóbálasámi, tam. deity + kóvil, tam. pagoda). Sanscrit name (garudaparvata), meaning braminy kite + mountain. Trig. station; lat. 9° 39' 18·70"; long. 77° 50' 27·02"; height 671 feet; from Mothagam S.S.W. 1¾ miles; from Pauraputty E. 1½ miles; from Tirmungalam S.W. 17 miles.——*Jotila naickanore* (சோதிலநாயக்கனூர் - shóthilanáyakkanúr, Tam.). From (shóthilinganáyakkan, tam. proper name + úr, tam. village). Zemindarry, Village; pop. 1,486; square miles 5¼; lat. of village 9° 55'; long. 77° 49'; from Madura W. 24 miles; from Tirmungalam W.N.W. 15 miles. Peshcush Rs. 1,070.——*Keelcottah* (கீழ்க்கோட்டை - kízhkóttai, Tam.). From (kízh, tam. east + kóttai, tam. fort). Zemindarry, Village; pop. 667; square miles 3; lat. of village 9° 47'; long. 78° 03'; from Madura S.W. 11 miles; from Tirmungalam S.S.E. 3 miles. Peshcush Rs. 480.——*Melacottah* (மேலக்கோட்டை - mélakkóttai, Tam.). From (mél, tam. west + kóttai, tam. fort). Zemindarry, Village; square miles 1¾; lat. of village 9° 47'; long. 78° 02'; from Madura S.W. 11 miles; from Tirmungalam S. 3 miles. Peshcush Rs. 910.——*Nadoocottah* (நடுக்கோட்டை - nadukkóttai, Tam.). From (nadu, tam. central + kóttai, tam. fort). Zemindarry, Village; pop. 787; square miles 1½; lat. of village 9° 48'; long. 78° 02'; from Madura S.W. 12 miles; from Tirmungalam S.S.E. 2 miles. Peshcush Rs. 773.——*Oosilamputty* (உசிலம்பட்டி - usilambatti, Tam.). See sep. title.——*Ottapa naickanore* (உத்தப்பநாயக்கனூர் - uttappanáyakkanúr, Tam.). From (uttappanáyakkan, tam. proper name + úr, tam. village). Zemindarry, Village; pop. 3,223; acres 10,391; lat. of village 10° 02'; long. 77° 50'; from Madura W.N.W. 24 miles; from Tirmungalam N.W. 20 miles. Zemindarry pays peshcush [q.v.] of Rs. 2,583.——*Peraiyoor* (பேரையூர் - péraiyúr, Tam. peraiyúr *). From (pér, tam. large + ai, tam. place + úr, tam. village). Zemindarry, Village; pop. 3,480; lat. of village 9° 44'; long. 77° 50'; from Madura S.W. 26 miles; from Tirmungalam W.S.W. 14 miles. Zemindarry [q.v.] pays peshcush [q.v.] of Rs. 11,857.——*Pooliyangoolam* (புளியங்குளம் - puliyangulam, Tam.). From (puli, tam. tamarind tree, tamarindus indica, linn. + kulam, tam. tank). Zemindarry, Village; pop. 2,811; square miles 5; lat. of village 9° 40'; long. 77° 57'; from Madura S.W. 23 miles; from Tirmungalam S.S.W. 13 miles. Peshcush Rs. 1,931.——*Poottore* (புத்தூர் - puttúr, Tam.). From (puthu, tam. new + úr, tam. village). Village; pop. 7,625; lat. 2° 57'; long. 77° 51'; from Madura W. 21 miles; from Tirmungalam N.W. 14 miles. Old shiva temple with inscriptions.——*Shandaiyoor* (சந்தையூர் - shandaiyúr, Tam.). From (shandai, tam. market + úr, tam. village). Zemindarry, Village; pop. 1,311; lat. of village 9° 42'; long. 77° 48'; from Madura S.W. 30 miles; from Tirmungalam W.S.W. 17 miles. Peshcush of zemindarry Rs. 3,697.——*Shathooragherry* (சதுரகிரி - shathuragiri, Tam.). From (chatura, san. square + giri, san. mountain). Sanscrit name (chaturáchala), meaning same. Trig. station; lat. 9° 44' 20·30"; long. 77° 43' 07·26"; height 4,172 feet; from Shauptore W.S.W. 5 miles; from Tirmungalam W.S.W. 22 miles.——*Shauptore* (சாப்பட்டூர் - sháppattúr, Tam. sáptúr *). From (shá, tam. death + pattu, tam. village + úr, tam. village). Zemindarry, Village; pop. 2,540; lat. of village 9° 46'; long. 77° 47'; from Madura W.S.W. 27 miles; from Tirmungalam W.S.W. 16 miles. Zemindarry pays peshcush [q.v.] of Rs. 8,833.——*Sindooputty* (சிந்துப்பட்டி - shinduppatti, Tam.). From (shindu, tam. river + patti, tam. village). Village; pop. 1,370; acres 1,821; lat. 9° 53'; long. 77° 55'; from Madura W. 16 miles; from Tirmungalam W.N.W. 9 miles. Temples with Paundy [q.v.] inscriptions.——*Tirmungalam* (திருமங்கலம் - tirumangalam, Tam.). See below.——*Vicramungalam* (விக்கிரமங்கலம் - vikkiramangalam, Tam.). From (vikrama, san. proper name + mangala, san. prosperity). Village; pop. 2,284; acres 3,092; lat. 10° 01'; long. 77° 58'; from Madura N. 14 miles; from Tirmungalam W.N.W. 12 miles. Inscriptions of Paundy dynasty at the Shiva temple.——*Yelqomullay* (எழுமலை - ezhumalai, Tam.). From (ezhumai, tam. height + malai, tam. mountain). Zemindarry, Village; pop. 4,820; lat. of village 9° 52'; long. 77° 44'; from Madura W. 28 miles; from Tirmungalam W. 19 miles. Peshcush of zemindarry Rs. 3,612.—(2) Town; Railway station, Talook head-quarters, Sub-registrar's office, Madura dist., Tirmungalam tal.; pop. 6,451; acres 77; lat. 9° 49'; long. 78° 02'; height 416 feet; from Dindigul S. 37 miles; from Kodaykarnal S.E. 44 miles; from Madras S.S.W. 270 miles; from Madura S.W. 11 miles; from Rameshwaram W.N.W. 98 miles; from Ramnaud N.W. 66 miles. Vellaula [q.v.] colony established in 1566 by Ariya naick moodelly, deputy of Vijianugger.

TIROO (திரு - tiru, *Tam.*). To turn.——*Tirootauly* (पर्णक - parnaka, San.; ऐरण - airana, Mahr.; ತಗ್ಗಿಬಳ್ಳಿ - taggiballi, Can.; తెక్కలి - tekkali, Tel.; തിരുതാളി - tirutáli, Mal.; தழுதாழை - tazhuthazhai, Tam.). Title from malayalam. San. from (parna, san. leaf). Can. from (taggu, can. low + balli, can. creeper). Mal. from (tiru, mal. to turn + táli, mal. creeper), twisting creeper. Tam. from (tazhuvu, tam. to entwine + tázhai, tam. screw-pine, pandanus odoratissimus, linn.). San. also (vátaghni), meaning wind + destroyer. Tel. also (talúki); (tukadi); (tilaka), meaning ornamental as the forehead mark [country cinnamon, peacock gingelly]; (nelli) [buffalo moonnay, curry moonnay]. Tam. also (váthamadakki), meaning wind + suppresser; useful in flatulency. Title otherwise Creeping screwpine, Wind killer. Botanically Clerodendron [bhaurgam] phlomoides, linn. f., verbenaceæ [vricsham, 102]. Alias Volkameria multiflora. Shrub or small tree, branchlets terete, and like the petioles and peduncles, whitish tomentose; leaves membranaceous, opposite, petioled, ovate, or ovate-rhomboid, acuminate, somewhat obtuse, entire at both ends, irregularly and bluntly serrated in the middle; glabrous above, puberulous beneath; panicles terminal, large, fastigiate, leafy below; cymes trichotomous, lax; bracteoles oblong; clayx glabrous, campanulate-ventricose, half five-cleft, segments sub-ovate, acute; tube of the corolla subglandulose, thrice the length of the calyx; flowers white; flowering nearly all the year; very sweet-scented particularly at night. Juice of leaves somewhat bitter, and medicinally alterative; prescribed in syphilitic complaints and rheumatism. There is a variety with red flowers.——*Tirye* (திராய் - tiráy, Tam.). See sep. title.

TIRTIRA (ترترا - tharthará, *Hind.*; నూనెబుడ్డిగాడు - núne-buddigádu, *Tel.*). Hind. means shaking; from motion of its tail. Tel. from (núne, tel. oil + buddi, tel. bottle + gádu, tel. personal suffix); from glossy black of back and wings. Ruticilla rufiventris, ruticillinæ, sylviadæ [calacuntam], dentirostres, insessores [pacshy, 23], of naturalists [jantoo]. Alias Phœnicura atrata; Ruticilla indica, nipalensis. Frequents groves, gardens, old buildings and houses; feeds on the ground, on various insects.

TIRYAUK (تریاق - tiryák, *Hind.*). From (rík, ar. spittle of serpents). Theriaca andromachi, or Venice treacle. A medicine in the form of an electuary supposed to be an antidote to the poison of venomous animals. Invented or introduced into europe by Andromachus of Crete. It was a mixture of seventy ingredients, some inert, others antagonistic to one another. The title revived by some native practitioners [hakeem, veidyan].

TIRYE (ग्रीष्मसुन्दर - gríshmasundara, *San.*; చాతరాశి - chátaráshi, *Tel.*; ചെറുചോനകപ്പുല്ല് - cheruchónakappullu, *Mal.*; திராய் - tiráy, *Tam.*). Title from tamul [tiroo]. San. from (gríshma, san. summer + sundara, san. beauty). Mal. from (cheru, mal. small + chónakappullu, mal. the grass, medicago esculenta). Tam. from (tiri, tam. to ramble); from straggling habit [pitpapra]. San. also (gríshmajá), meaning born in summer. Tel. also (pilakasáre). Tam. also (perundiráy), meaning large + the plant; (oduvadakki), meaning boil subduer [cooppamainy]. Title otherwise Bed straw plant, Carpetweed, Indian chickweed. Botanically Mollugo [parpatam] spergula, linn., ficoideæ [vricsham, 66]. Alias Mollugo parviflora, verticellata; Pharnaceum mollugo, parviflorum. Small herbaceous plant; stem very straggling and branched; leaves more or less succulent, oblong or obovate, mucronate, alternated towards their base; pedicels one-flowered, several together, forming a simple sessile umbel; stamens three to five or ten; petals narrow, cleft to the middle, or none; seeds rough with numerous tubercles; flowers small, white; flowering nearly all year. Bitter leaves medicinally stomachic, aperient and antiseptic; leaf used as famine food.——*Small tirye* (చిరుచాతరాశి - chirichátaráshi, Tel.). Tel. from (chiru, tel. small + chátaráshi, tel. mollugo spergula, linn.). Title otherwise Australian tooth flower, the petals having on either side a small tooth-like process. Botanically Dentella repens, forst., rubiaceæ [vricsham, 71]. Alias Hedyotis repens; Oldenlandia repens. Herbaceous, annual, tufty, creeping; stems filiform, branched; leaves oblong, attenuated at the base; glabrous or with the petioles ciliated at the base; corolla funnel-shaped; tube longer than the calyx-limb, slightly hairy on the inside near the base; limb five-cleft, spreading; segments ovate, acute, with an acute tooth on each side above the middle; stigmas two, long narrow-linear, slightly spreading; flowers white, small, axillary, solitary, alternate, very shortly-pedicelled; common in moist places, shady banks of rivers and water-courses throughout the country.——*Wild tirye* (पर्पटक - parpátaka, San.; ಪರ್ಪಟಕ - parpátaka, Can.; వెర్రిచాతరాశి - verrichátaráshi, Tel.; ପିତଗୋହଂ - pitagoham, Oor.; குத்துத்திராய் - kuttuttiráy, Tam.). Tel. from (verri, tel. wild + chátaráshi, tel. mollugo spergula, linn.). Tam. from (kuttu, tam. upright + tiráy, tam. the plant); low erect plant. San. also (kshétraparpatí), meaning field + mollugo. Title otherwise Wild indian chickweed. Botanically Mollugo [parpatam] stricta, linn., ficoideæ [vricsham, 66]. Alias Mollugo linkii, paniculata, pentaphylla, radiata, triphylla; Pharnaceum pentaphyllum, strictum, triphyllum. Annual, glabrous, stems diffuse at the base, afterwards erect, angled; leaves linear-lanceolate, pointed; panicles elongated, many-flowered; stamens three; petals wanting; seeds minutely tubercled; flowers small, white.

TISAY (திசை - tisai, *Tam.*). From (dish, san. to point out). Point of the compass. Quarter, region [dic]. Ascertaining direction is a matter of importance in many details of native daily life. Special directions are prescribed in hindoo shastrams for bathing, worshipping household gods, eating and sleeping; for instance one should not sleep with the head to the north as that is the position for a corpse. Shoolam is the supposed position of the trident of shiva [q.v.] at any given time according to the days of the week, hence called vaura shoolam, during which it is considered unlucky to set out on a journey in the direction in which it lies and the reverse. Compare Trishoolam. Direction again is an important factor in settling the import of omens [shacoonam]. On occasions of festivals [pundigay], especially festivals of village deities [grauma devatay], before beginning the festival proper care is taken first to guard the place on all sides by fortifying the eight cardinal points with incantations [muntram] and by invoking the protection of their regents; this is done by turning to each point repeating the incantation indraaya nama or salutation to indran [q.v.], beginning with the east and making prostrations to him as the regent and offering him oblation [baly], and then turning to the next point; this ceremony is called in sanscrit dicbandhanam and in tamul tisay cutt, both meaning binding the cardinal points. For the method of fixing directions in hindoo astronomy, see Shunk. For detailed information about the eight cardinal points and their regents as protectors of the earth see Ashtadic and Ashtadic paulacan. For the mythological elephants of the cardinal points, considered as supporters of the earth, see Ashtadic gajam. For the importance of directions in connection with the site and construction of houses see Veed. For the direction of the signs of the zodiac see Raushy. For the native method of ascertaining bearings at sea see Dhony. For direction among mahomedans compare Rijaul ool gheib and Janauza. The following are the different vernacular names for the points of the compass; with their presiding deities, &c., in the hindoo system according to hindoo shastrams:—

No.	English.	Sanscrit.	Arabic.	Persian.	Hindostany.	Canarese.	Tooloo.	Teloogoo.	Malayalam.	Tamul.	Presiding deities [ashtadic paulacan].	Animals of the quarters [ashtadic].	Elephants of the quarters [ashtadic gajam] in pairs.	Direction of shoolam [shoolam, trishoolam] on week days.

The following are the same with their etymologies.——*Agneyam* (आग्नेय - ágnéya, San.; ಆಗ್ನೇಯ - ágnéya, Can.; ఆగ్నేయము - ágné, yamu, Tel.). From (agni, san. fire); from the presiding deity. South-east.——*Badagoo* (ಬಡಗು - badagu, Can.). From (vadakku, tam. north). North.——*Badakye* (ಬಡಕಯಿ - badakayi, Too.). From (vadakku, tam. north). North.——*Badakye puddye* (ಬಡಕಯಿಪಡ್ಡಯಿ - badakayipaddayi, Too.). North-west.——*Bauyeb* (بائب - báeb, Hind.). From (váyavya, san. the quarter) [vauyavyam]. North-west.——*Dacshinam* (दक्षिण - dakshina, San.; దక్షిణము - dakshinamu, Tel.). Means right. Applied by the Aryans to the country on their right hand. South.——*Dakkhan* (دکهن - dakkhan, Hind.). From sanscrit. South [dacshinam]. Cf. Deccan.——*Dakkhan pacham* (دکهن پچهم - dakkhanpaççham, Hind.). From (dakshinapashchima, san. south-west). South-west.——*Dakkhan poorab* (دکهن پورب - dakkhanpúrab, Hind.). From (dakshinapúrva, san. south-east). South-east.——*Eesaun* (ایسان - ísán, Hind.). From (íshána, san. shiva, the presiding deity). North-east [eeshaunyam].——*Eeshaunyam* (ईशान्य - íshánya, San.; ಈಶಾನ್ಯ - íshánya, Can.; ఈశాన్యము - íshányamu, Tel.). From (íshána, san. shiva), from the presiding deity. North-east. Cf. Eesaun.——*Joonoob* (جنوب - junúb, Ar. and Pers.). From (janab, ar. side). South.——*Joonoob maghrib* (جنوب مغرب - junúbmaghrib, Pers.). South-west.——*Joonoob mashrik* (جنوب مشرق - junúbmashrik, Pers.). South-east.——*Joonoob ool gharbee* (جنوبي الغربي - junúbiulgharbí, Ar.). South-west.——*Joonoob oosh sharkee* (جنوبي الشرقي - junúbiyushsharkí, Ar.). South-east.——*Kizhakk* (കിഴക്ക - kizhakku, Mal.; கிழக்கு - kizhakku, Tam.). From (kízh, tam. downward). East.——*Maghrib* (مغرب - maghrib, Ar. and Pers.). From (gharaba, ar. to set), direction of sun-setting. West.——*Mashrik* (مشرق - mashrik, Ar. and Pers.). From (sharaka, ar, to rise); direction of sunrising. East.——*Merkk* (மேற்கு - mérgu, Tam.). From (mél, tam. above). West.——*Moodloo* (ಮೂಡ್ಲು - múdlu, Can.). From (múdu, can. to rise). East.——*Moodye* (ಮುಡಯಿ - mudayi, Too.). From (múdu, can. to rise). East.——*Moodye badakye* (ಮುಡಯಿಬಡಕಯಿ - mudayibadakayi, Too.). North-east.——*Moodye tenkye* (ಮುಡಯಿತೆನ್ಕಾಯಿ - mudayitenkáyi, Too.). South-east.——*Neirritam* (नैरृत - nairrita, San.; నైరృతము - nairritamu, Tel.). From (nirriti, san. the presiding deity). South-west.——*Oottar* (اتر - uttar, Hind.). From sanscrit. North [oottaram].——*Oottaram* (उत्तर - uttara, San.; ఉత్తరము - uttaramu, Tel.). From (ut, san. up + tara, san. comparative suffix). North. Cf. Oottar.——*Oottar pacham* (اتر پچهم - uttarpachchham, Hind.). From (uttarapashchima, san. north-west). Also called Bauyeb. North-west.——*Pacham* (پچهم - paççham, Hind.). From (pashchima, san. west). West [pashchimam].——*Padinyaur* (പടിഞ്ഞാറ - patiññáru, Mal.). From (patiyu, mal. to sink + ñáyar, mal. sun). West.——*Padoovaloo* (ಪಡುವಲು - paduvalu, Can.). From (padu, can. to lie down). West.——*Pashchimam* (पश्चिम - pashchima, San.). Means behind. West. Cf. Pacham.——*Poorab* (پورب - púrab, Hind.). From (púrva, san. east). East [poorvam].——*Poorvam* (पूर्व - púrva, San.). Means front; so called by the conquering Aryans [q.v.] who came from the west. East. Cf. Poorab.——*Puddye* (ಪಡ್ಡಾಯಿ - paddáyi, Too.). From (padu, can. to lie down). West.——*Shoomaul* (شمال - shimál, Ar. and Pers.). From (shamala, ar. left hand); i.e., of mecca. North.——*Shoomaul maghrib* (شمال مغرب - shimálmaghrib, Pers.). North-west.——*Shoomaul mashrik* (شمال مشرق - shimálmashrik, Pers.). North-east.——*Shoomaul ool gharbee* (شمالي الغربي - shimáliyulgharbí, Ar.). North-west.——*Shoomaul oosh sharkee* (شمالي الشرقي - shimáliyushsharkí, Ar.). North-east.——*Tekk* (തെക്ക - tekku, Mal.). South.——*Tek kizhakk* (തെക്ക കിഴക്ക - tekkukizhakku, Mal.). South-east.——*Tekk padinyaur* (തെക്ക പടിഞ്ഞാറ - tekkupatiññáru, Mal.). South-west.——*Temmoodloo* (ತೆಂಮೂಡಲು - temmúdalu, Can.). South-east.——*Tempadoovaloo* (ತೆಂಪಡುವಲು - tempaduvalu, Can.). South-west.——*Tenka* (ತೆಂಕ - tenka, Can.). South.——*Ten kizhakk* (தென்கிழக்கு - tengizhakku, Tam.). South-east.——*Tenkye* (ತೆನ್ಕಾಯಿ - tenkáyi, Too.). From tamul. South.——*Tenkye puddye* (ತೆನ್ಕಾಯಿಪಡ್ಡಾಯಿ - tenkáyipaddáyi, Too.). South-west.——*Ten merkk* (தென்மேற்கு - tenmérgu, Tam.). South-west.——*Terkk* (தெற்கு - tergu, Tam.). South.——*Vada kizhakk* (வடகிழக்கு - vadagizhakku, Tam.). North-east.——*Vadakk* (വടക്ക - vatakku, Mal.; வடக்கு - vadakku, Tam.). North [vada].——*Vadak kizhakk* (വടക്ക കിഴക്ക - vatakkukizhakku, Mal.). North-east.——*Vadakk padinyaur* (വടക്ക പടിഞ്ഞാറ - vatakkupatiññáru, Mal.). North-west.——*Vada merkk* (வடமேற்கு - vadamérgu, Tam.). North-west.——*Vauyavyam* (वायव्य - váyavya, San.; ವಾಯವ್ಯ - váyavya, Can.; వాయవ్యము - váyavyam, Tel.). From (váyu, san. air deity); from the presiding deity. North-west. Cf. Bauyeb.

TISSO (تیسو کا پهول - tesúkáphúl, *Hind.*). Palaus flower.

TITT (திட்டு - tittu, *Tam.*). Hillock.——*Tittagoody* (திட்டக்குடி - tittakkudi, Tam. titagudi *). From (tittai, tam. elevation + kudi, tam. village). Sanscrit name (vasisht'hakshétra), meaning vasishtan, the sage + sacred place.—"*a*" Deputy tahsildarry, Vriddhauchellam talook, South arcot district. Pay Rs. 70.—"*b*" Deputy tahsildar's head-quarters; pop. 2,245; acres 318; lat. 11° 24′; long. 79° 10′; from Chidambaram W. 38 miles; from Cuddalore S.W. 48 miles; from Madras S.W. 140 miles; from Tindivanam S.S.W. 67 miles; from Tricalore S.S.W. 38 miles; from Vriddhauchellam S.W. 16 miles. Important Shiva temple.

TITTIRAM (तित्तिर - tittira, *San.*). From sound. Tetraonidæ family, rasores, aves [pacshy, 33], of naturalists [jantoo]. Partridges and quails. Form is heavy, stout, and massive; neck short; bill stout and short; often no difference between sexes; game plumage; affect open grass lands, moors, fields, and low scattered jungle; associate in bevies, and in flocks in winter; flesh of all is good and high flavored. Sub-family Tetraoninæ, or grouse, not here represented. The following are the sub-families which occur:—"*a*" Perdicinæ. Tarsus not feathered; orbits plumed or wanting nude eyebrow of grouse; tarsus often spurred. Moderate or small size, frequenting fields, pastures, reeds, moors, and rocky hill sides, very rarely preferring forests or jungles. Beak is generally short and tolerably compressed, margin entire, and nostrils protected by a hard scale. Lay numerous eggs, and feed on grain, berries, insects [poochy], and small molluscs [chippy]. Several distinct types of form. Partridges occurring may be divided into Francolins, Chakors, Grey-partridges, Wood-partridges, and Bush-quails [teetar].—"*b*" Coturnicinæ, Quails. Wings pointed, rather long; bill moderate; tarsi not spurred; small size. Sexes differ somewhat in coloration [batair].——*Teetar* (تيتر - títar, Hind.). See sep. title.

TITY (तिथि - tit'hi, *San.*). From (at, san. to move). A lunar [chaundramaunam] day.—"*a*" A mean tity is the time during which the moon moves through 12° of her synodical orbit [cacsham] supposed to be divided into 360°; its duration is therefore 59g 3v 38p hindoo time [caulam, 4], or 23h 37′ 27½″ european time. Of these there are very nearly 371 in a solar year. Teloogoo astronomers allow something more for the length of the mean tity which according to them is of 59g 3v 40p 23s. Sixty-four mean tities are very nearly equal to sixty-three solar days, and this difference of one day is the occasion of the expunged tities, which in the calendars are called Avamauham or Sprik, and which recur once in about sixty-four days. When no tity begins or ends in a solar day, the preceding tity is repeated in the calendar [punchaungam], and the same numeral answers to two solar days [dinam]; it is then called Adhy or Adhicam [q.v.]. When two tities end in the same solar day, the intermediate tity is expunged and called Cshayam [q.v.]. The synodical month is divided into two parts [pacsham], consisting of fifteen tities each; the first fourteen tities of each part are named after the numerals from one to fourteen; the last tity of each part, that is, the 15th and 30th of the month, are called respectively Powrnimay [q.v.] and Amavausyay [q.v.], or Amavausyay and Powrnimay, according as the Shooclaudy [q.v.] or Krishnaudy [q.v.] method is followed. See also Mookhyam and Gownam. The following is the list of Tities:—Pratamay or Paudyamy, Dwiteeyay or Vidiya, Triteeyay or Tadiya, Chatoorty or Chowty, Punchamy, Shashty, Saptamy, Ashtamy, Navamy, Dashamy, Yecaudashy, Dwaudashy, Trayodashy, Chatoordashy, Poonnama or powrnimay for shooddham, and Amavausyay for bahoolam [jyotisham]. The following is the scale:—2 caranams or half lunar days = 1 tity; 15 tities = 1 pacsham or lunar fortnight [caulam, 4]. Compare Nairam [caulam, 1].—"*b*" All religious and funeral rites are regulated by tities; so much so that in common usage a tity means an anniversary day [shrauddham]. The astrological lords of the fifteen lunar days are respectively:—first Bramha [q.v.], second Vidhautry, third Hary [q.v.], fourth Yaman [q.v.], fifth Moon [chundran], sixth Soobramanyan [q.v.], seventh Indran [q.v.], eighth Vasoo [q.v.], ninth Sarpam, tenth Dharman [q.v.], eleventh Shiva [q.v.], twelfth Savitry [q.v.], thirteenth Manmatan [q.v.], fourteenth Cauly [q.v.] and fifteenth Vishwédevah [q.v.]. The new-moon day [amavausyay] is sacred to the Pitries [q.v.]. A person should commence works suited to the devas presiding over particular lunar days. The first, sixth and eleventh lunar days are known as Nundam [nundy]; the second, seventh, and twelfth lunar days are known as Bhadram; the third, eighth and thirteenth lunar days are known as Vijayam [jayay]; the fourth, ninth, and fourteenth lunar days are known as Rictam; and the fifth, tenth and fifteenth lunar days are known as Poornam. Works directed to be done in particular Nacshatrams should be done on lunar days sacred to the lords of those Nacshatrams [q.v.].—"*c*" The same remarks apply to Caranams [q.v.] and Moohoortams [q.v.].—"*d*" Caranam is half a lunar day, and is according to circumstances either Adhroovam movable, or Dhroovam fixed; see Caranam. The astrological lords of the seven movable caranams, Bavam, Baulavam, Cowlavam, Teitilam, Garam, Vanikk, and Vishty or bhadram, are respectively Indran [q.v.], Bramha [q.v.], Mitran, Aryaman, Bhoo [q.v.], Shree [q.v.] and Yaman [q.v.]. These seven when eight times repeated occupy

the space from the second-half of the first day in the moon's increase [shooclapacsham] to the first-half of the fourteenth day in its wane [krishnapacsham]. The astrological lords of the four fixed caranams, Shacoony, Chatooshpadam, Naugavam, Kimstoognam, are Cauly, Vrisham, Sarpam and Vayoo. These begin from the second-half of the fourteenth day of the waning moon [krishnapacsham]. In a Bava caranam according to shastrams should be done deeds of an auspicious, a movable or a fixed character, as well as deeds for the promotion of a person's health and comfort. In a Baulava caranam should be done acts of charity and acts of help to bramins. In a Cowlava caranam should be done joyful deeds and those for the acquisition of friends. In a Teitila caranam should be done deeds liked by the public at large, and houses should be built. In a Gara caranam lands should be tilled, seeds sown, houses built, and the like. In a Vanikk caranam, works of a fixed nature should be done, as well as dealings with merchants. In a Vishty or bhadra caranam, auspicious deeds should not be done but acts aimed at the ruin of enemies; those connected with poison will be done. In a Shacoony caranam a person should do acts for the increase of his health and comfort, should take medicine, and should learn and repeat the moola muntrams [q.v.] or magical formulæ. In a Chatooshpada caranam a person should do deeds connected with cows, bramins, the pitries, and the king. In a Nauga caranam a person will do works of a fixed nature, cruel deeds, acts of stealth and wicked deeds. In a Kimstoogna caranam, a person should do any work for the increase of his health and comfort, as well as auspicious deeds.—"*e*" A Moohoortam [q.v.] is 48 minutes. The 12 hours of day and 12 hours of night are each divided into 15 Moohoortams. The 15 day-Moohoortams are sacred respectively to:—1st Roodran [q.v.], 2nd Sarpam, 3rd Mitran, 4th Pitries [q.v.], 5th Vasoo [q.v.], 6th Vara, 7th Vishwedevah [q.v.], 8th Vidhy, 9th Bramha [q.v.], 10th Indran [q.v.], 11th Indraugny, 12th Deityan [q.v.], 13th Varoonan [q.v.], 14th Aryaman and 15th Bhagan. The 15 night-Moohoortams are sacred respectively to:—1st Eeshwaran [q.v.], 2nd Ajapaudan, 3rd Ahirboodnay, 4th Pooshan [q.v.], 5th Nausatyan, 6th Yaman [q.v.], 7th Vanhy, 8th Dhautry, 9th Shashy, 10th Audityan [q.v.], 11th Gooroo [q.v.], 12th Atchootan, 13th Arcan [q.v.], 14th Twashtry and 15th Vayoo [q.v.]. Of the 15 night-Moohoortams, the 1st, 2nd, 6th, and 7th, should be rejected for all auspicious purposes. ——*Taidy* (తేది - tédi, Tel.). From (tit'hi, san. lunar day). A date [taureek], according to solar account.

TOCUSSA (توکسا - tukassá, *Hind.*). African for raggy.

TODAH (ತೊದವ - todava, *Can.*). From (toru, tam. a herd). A hill tribe found on the Neilgherries, who have passed there at some excessively ancient date from the low hills N.E. of Neilgherries.—"*a*" Their language is a dialect of old Canarese. It has more sounds than any other Dravidian dialect, and some of these are peculiar to it, seeming to have been modified by the position and habits of the tribe; they chiefly converse for instance in the open air calling to each other from one hill top to another. The language was once highly inflectional, but has lost most of its inflections, the people as the result of isolation not having replaced them by significant particles or auxiliaries to the same extent as the other South indian tribes, and the language having thus dwindled down to a mere skeleton. A few tamul forms were introduced by the poligars [q.v.]. Of teloogoo influence there is no trace. Nor is there a resemblance in Todah to malayalam in any of the points where that dialect differs from its sisters. The pectoral pronunciation of the Todahs in speaking their language is the reason why so many Europeans, who heard them speak, formerly believed that it had no relationship at all with any of the S. indian languages. The whole life of a Todah being concentrated in his buffaloes [khoolgah] it is difficult to discover among them words for abstract terms. Most of their verbs have only one tense, and they help themselves by adverbs of time to express the future and past tenses. They have no pure "a" as it occurs in other Indian languages but their "a" is pronounced as "a" in tall. They use no written character, and have never apparently done so; they are wholly illiterate [bhaushay]. There is a slight difference in the dialects even of the different tribes of the Todahs.—"*b*" The Todahs are considered by the other hill tribes to be the lords of the soil, and are accordingly paid a tribute in kind by them in acknowledgment of this right; they themselves say that they came from the jungle tract of inferior hills situated between the canarese and tamul districts, in the direction of the hassanore pass in the eastern ghauts [q.v.], north-east of the neilgherries; though this was their origin, they with their buffaloes [khoolgah] approached the hills from the western side.—"*c*" Notwithstanding the long residence of the todahs in a cold, cloudy mountain region, the color of their skin is considerably darker than that of the more modern hill race, the badagas, a race of people who immigrated from the canarese country more recently, and is many shades darker than that of the majority of the natives of the malabar coast; the darkness of the complexion of the todahs tends to prove that they came originally from the eastern or sunburnt side of the range of ghauts [q.v.]. The mode of wearing the hair also points the same way; the luxuriant crop of hair, which is their pride, differs but little from the rough, shaggy and unkempt hair of many of the pariah [q.v.] and wandering castes of the carnatic [q.v.] and deccan [q.v.], except that it is oiled and combed. The hazel or brown eye of the Todah is also met with in the wild castes of the eastern plains. The todahs surpass all the other tribes in physique and dignity of bearing, but they are not so tall as the badagas; still they may be spoken of as tall, the height of the men averaging 5 feet 3·30 inches, that of the women 5 feet 0·25 inches; their features may best be described as european, with roman noses and bright hazel eyes, good teeth and an abundance of rather coarse but glossy black hair, which is worn in a crop by the men and in long thick ringlets by the women; the expression of their countenances is open, fearless, and agreeable, and their smile invariably pleasant although rather vacant; their faces have sometimes a general resemblance to the jewish type, but nothing whatever in their customs or traditions connects them with the jews [jonaca]; the ideas once held on this point are quite fanciful; as regards strength of body they will not bear comparison with the teloogoo caupoos [q.v.] and palankeen [q.v.] bearers [boy]. The dress of the todahs is simple in the extreme, but not ungraceful; it consists of a coarse species of cloth woven at coimbatore, and white when new, having one or two bars of color, generally red, woven into it at each end; by the men it is worn wound round the body, so as to form a kilt or petticoat, leaving the legs nearly bare; then it is brought under the right arm and the end is thrown over the left shoulder; in general effect it is not unlike a roman toga; the men also wear the lungooty [q.v.] or waist cloth called by them coov or kone; they never on any occasion wear a turban [q.v.]. The female dress consists of the same kind of cloth, but it is merely thrown over the shoulders and held together in front, and is not worn so gracefully as by the men; women also wear heavy brass armlets generally two on one arm, called toovagy, weight about 5 lb.; they have necklaces of twisted hair or black thread with silver clasps, and here and there a bead or a bunch of cowry [q.v.] shells, and sometimes a silver chain; they wear silver bracelets of rather a pretty pattern, and silver rings on their fingers and thumbs, also iron bracelets of peculiar design, one like a snake; sometimes a silver chain is worn round the waist, to which is attached a small silver box opening with a screw, and used for carrying small coins; their hair-dressing is the most elaborate feature of their toilette, and the curling of their ringlets on long sticks occupies a considerable time every evening. From the entire want of records among these people it is impossible to ascertain with exactness what is in general their length of life, but it is supposed that a few of the todahs have attained the age of ninety, or even a hundred years, and in one or two instances a new set of teeth, it is said, has appeared after that period.—"*d*" The religion of the Todahs is wholly rudimental. Such words as god, sin, ghost are almost pure sanscrit, whilst the words which relate to ideas, which they have borrowed from the badagas [q.v.], are canarese [q.v.]. They have a distinct idea of a life after death to be spent in a country, sometimes called 'the other district;' as their buffaloes [khoolgah] are their chief food in this world, they kill a sufficient number at each funeral [kerd] to supply the dead with milk in the next; the spirits of men and buffaloes are supposed to leap together into the other world from macoorty peak; the todah has an awe of anything unusual or beyond his comprehension, and soon exalts such things into objects of reverence. The actual worship of the todahs is confined to one material object, the sacred buffalo-bell, which is hung round the neck of the best buffalo of the sacred herd, and is looked upon by them as the representative of hiredeva [q.v.] or the chief deity; besides this deity they have quite a pantheon of presiding gods, one in fact for each mund [q.v.], and a hunting god called baidagan [q.v.] whose temple is at numbalagode in wynaud; the latter is the son of dirkish, the son of yen, the first todah, and is now, they say, attended by bramins [q.v.]; but to these gods they do not pray; some old men make salaam [q.v.] to the rising sun [sooryan] and at some seasons to the moon [chundran] and fast at eclipses [grahanam], and occasionally they prostrate themselves at the door of the paultchy [q.v.], but no one except the poojarry [q.v.] attempts anything beyond this; 'may all be well,' or 'may the buffaloes be well' is the only form of prayer; in fact the names of their gods, like some of their funeral ceremonies, seem more like remains of an extinct religion than parts of a living creed; it is also a curious fact that the todah does not pray by deputy; his priest, so far from offering up prayers for the people, regards himself as a god who does not need to pray. In spite of this apparent apathy, one division of the todahs, the Peikies, is devoted to the priesthood. There are five kinds of priests. The highest are the paulauls [q.v.] a mixture of herdsmen and priests; they live in isolated holy munds [q.v.] or groves called tiriyairy [q.v.]; no female may approach the mund [q.v.], and no man may converse with the paulaul except from a distance, much less touch him; his own father must bow down before him; he is attended by a herdsman called the cauvalaul or watchman, who is also an ascetic, but by no means so holy as the paulaul, being merely his servant; he may converse with the paulaul, but may not touch him; both paulaul and cauvalaul are generally married men, and only lead a celibate life during their term of office; the preparation which a paulaul must undergo is by no means light; the aspirant is expected to retire to the jungles and there to live for eight days without any clothing to protect him from the severity of the weather and with hardly any food; after thirty days of this exposure in the wilds, he is

allowed to enter upon his duties, and from henceforth he inhabits a small hut in the lonely tiriyairy mund; the office of paulaul is seldom, if ever, held for life; there are instances of its being held for fourteen years, but the ordinary period is from two to three years; the dress of a paulaul [q.v.] consists of a scanty black cloth; these are woven by the badagas [q.v.] of jackanairy. Priests of the second order are called varzhaul; they go through the same ceremonies as the paulaul, but hold office for a shorter period and are employed as milkmen; they wear only the lungooty [q.v.]. The next two orders seem to be identical with the varzhaul but their designation depends upon the munds to which they belong; they are called respectively kokyauly and coorpooly. The last, paulcapauls, i.e., milk watchers, are a lower order; they are not obliged to lead a celibate life and may wear the pootooly [q.v.]. The paulaul appropriates all the milk of the sacred herd; it is considered too holy to be sold as milk, but what remains when the paulaul and cauvalaul have had their shares is made into ghee [q.v.], and in that state sold to the laity and the badagas. There are two kinds of temples. One, called boa [q.v.] or boath, is a conical-roofed building surrounded by a wall; there are four boas in the hills:—manboa at moottinaud mund about four miles from ootacamund on the left of the seegore road; kinej, at the tiriyairy mund, near sholore; tarzcauv, at the tiriyairy mund on the coondahs; metterzhva, near brikaputty; there was formerly a fifth called katedva near macoorty, but it is now in ruins; the boa temples do not seem properly to belong to the todahs, but to some earlier race; they are not attended by priests of the highest, but of the second grade. The second kind of temple is called a paultchy; it resembles an ordinary house, but is larger; there are two varieties, one is merely a dairy house, such as every mund possesses, the other is something more, and its importance appears to depend upon the relics it contains; these are called coorpoos and the paultchy in which they are kept is looked upon as a shrine; munds where they are found are called yetad, or great munds, in contradistinction to boory, or common munds.—"*e*" The todahs are essentially a pastoral people, and in a measure nomadic, that is to say the inhabitants of each mund or village possess one or two other munds, and move from one to the other as they may find it convenient or necessary to do so, either to secure pasture for their herds or shelter from the monsoons which are more felt in some localities than in others; they never make any attempt to cultivate their lands; the goodoo [q.v.], which they levy in kind from the badagas [q.v.] and kotahs [q.v.], supplies them with grain, and beyond this they depend entirely upon their large herds of buffaloes [khoolgah] for support; besides their simple household duties, the women do a coarse kind of embroidery in blue and white thread obtained from the low country; they use neilgherry nettle-thread for sewing their cloths and english needles. The polyandry of the todahs, being that of several brothers or near kinsmen having one wife is a less gross institution than that existing among other polyandrists in south india; polyandry is now on the decline, and those men who can afford it have each their own wife; female infanticide, undoubtedly existed as a practice among them, but has now ceased; they claim the children on the principle of seniority, thus, the first child is given to the eldest brother, the second to the next and so on; inheritence ordinarily goes in the male line, not in the female as amongst the polyandrist of the west coast; it is remarkable, however, that in regard to the sacred buffaloes [khoolgah], the descent is through the females. Their mode of saluting one another is peculiar to themselves; a woman when she meets a man, lifts his feet, first one and then the other, to her head as she crouches before him; in the case of an old woman, the ceremony reversed, and she places her foot on the head of the man. Badagas are called mauv, or fathers-in-law, by the todahs in token of respect; a badaga greets a todah by laying his hand on the head of the latter. The todahs burn their dead, and bury weapons and personal ornaments with the remains [shavacaud]; their cemetery and place of funeral sacrifice is a green spot, partially enclosed by a stone wall, rendered gloomy by a thick wood on one side and lofty hills on the other; it is their practice to sacrifice buffaloes on the demise of a todah, and a strongly-walled area is set apart for the reception of these animals, whose bones and horns are strewed on the ground; the funeral procession enters the green and moves towards the centre; the deceased is dressed in a new garment and mantle, and arrayed in all the ornaments which he had worn during life; he is carried on a bier formed of branches and herbs, and followed by a number of mourners, male and female, who chant the lament, whilst others carry wood for the funeral pile and provisions for the evening meal; a herd of buffaloes is driven into the walled area, and the men, armed with clubs, enter with exciting shouts, and perform a wild dance amongst the buffaloes; these soon became excited to the highest pitch, and, at a signal, a bell is attached to the neck of each infuriated animal; two young men throw themselves on the animal's neck, seize it by its horns, and others run to their assistance, and eight or ten men then hang on the neck of one animal, whilst others increase its rage by blows of their clubs, and goad it on with yells and gestures; three or four animals are thus attacked at one time, and the bell attached to the neck of each; but meanwhile the general assemblage which line the walls are weeping, exulting, or sending forth shrieks of horror whenever a man is wounded, a buffalo overpowered, or a relative in imminent danger; on the next day, the victims are finally sacrificed; the men strike the animals behind the horns with a wood-cutter's axe, and a single blow always produces death; after the sacrifice, several wild dances follow, during which the men feign to cut and lacerate themselves; on the third day, the deceased is burned on the funeral pile. There are no marriage ceremonies among them; the eldest brother of a family applies for a young girl to her mother, and, on consent being obtained, two buffaloes are given by the father of the girl as a provision for her; the bridegroom also gives her a few buffaloes according to his circumstances; afterwards the bridegroom, followed by all his brothers, conducts her home. Todahs all live in small communities, not exceeding a dozen persons, and their habitations are usually 6 feet high, and 6 feet wide, being curious oblong huts, formed of bamboos [q.v.], bent into long, narrow gothic arches, covered neatly with thick thatch, and closed at both ends with wicker work of bamboo, and plastered over with mud; in one end there is a small opening, close to the ground, not quite 2 feet high, and 15 inches wide, through which the inhabitants creep; three or four huts form the hamlet or mund as it is called, usually placed in a highly picturesque and luxuriant spot, affording shelter to themselves, and food for their cattle; in each mund there is a separate hut of a better structure and materials, and larger size than the others, devoted to their religious rites. The poorer class serve those who are in good circumstances, and live upon their earnings, added to what they receive from the badagas as tribute; they never serve any but their own caste.—"*f*" The numbers of the Todahs is considerably under 1,000. They are divided into two classes, Devaulayaul and Tarserzhaul. The first consists of the Peiky clan, corresponding in some slight respect to the Bramins; the second consists of the four remaining clans, called respectively Pekhans, Coottans, Kennans and Todies. None of the clans intermarry.—"*g*" See vol. I (14) (36), (69); II, 108, 233.——*Todamund* (ತೋಡಮುಂದು — tódamandu, Can.). The village of todahs.——*Todanaud* (ತೋಡನಾಡು - tódanádu, Can.). Division, Neilgherries; area 216,903 acres; pop. 14,489, exclusive of Ootacamund municipality. Occupies the whole of the plateau north-west of the other three nauds, the tableland at the foot of the northern slopes. The Ouchterlony valley may now be regarded as appertaining to this naud [q.v.]. Consists of the minor divisions of Boodnattam, Seegore, Sembanattam and Todanaud. Divided by the hill tribes into two divisions known as Mailnaud and Keeinaud. The town of Ootacamund lies within Mailnaud, though the southern portion of the settlement, including the Lawrence asylum appertains to Merkoonaud. Boundaries:—N. Moyaur river, S. Paranginaud, Merkoonaud and Coondahs, E. Paranginaud and Coimbatore district, W. Malabar district, Ouchterlony valley and S.E. Wynaud.

TODAY (தொடை - todai, *Tam.*). Thigh.——*Tadappanay* (തുടപ്പന - tutappana, Mal.). Means thigh + palm; as high as thigh. Same as Indian sago palm.

TODDALY (काञ्चन - káñchana, *San.*; जंगलीकाळीमिरची - jangalíkálímirachí, *Mahr.*; गाळायि - gáláyi, *Conc.*; جنگلی کالی مرچ کا پیڑ - janglíkálímirchkáper, *Hind.*; جنگلی کالی مرچی کا جہاڑ - janglíkálímirchíkájhár, *Dec.*; ಕಾಡುಮೆಣಸು - kádumenasu, *Can.*; ಕಾಡುಕಾರೆ - kádukáre, *Too.*; కొండకసింద - kondakasinda, *Tel.*; ତୁଣ୍ଡୁପର - tundupara, *Oor.*; തുടലി - tutali, *Mal.*; කුඩුමිරිස් - kudumiris, *Singh.*; மிளகரணை - milagaranai, *Tam.*). Title from malayalam. San. means golden; from orange color of fruit [champak, purple mountain ebony, white mountain ebony]. Mahr. from hindostany. Hind. from (janglí, hind. wild + kálí, hind. black + mirch, hind. pepper, piper nigrum, linn. + per, hind. tree); from pungency of berries. Dec. from hindostany. Can. from (kádu, can. wild + menasu, can. black pepper, piper nigrum, linn.). Too. from (kádu, too. wild + káre, too. thorny webera, canthium parviflorum, lamk.). Tel. from (konda, tel. hill + kasinda, tel. cassia occidentalis, linn.). Mal. from (tutar, mal. chain) [small bair]. Singh. from (kudu, singh. small + miris, singh. pepper). Tam. from (milagu, tam. pepper, piper nigrum, linn. + arani, tam. jungle). San. also (dahana), meaning burning; from pungent berries. Hind. also (kánj), from sanscrit; (dahan), from sanscrit meaning burning, referring to pungent berries. Dec. also (lopazkájhár). Can. also (káduhákukáre), meaning wild + thorny webera. Tel. also (mirapakándra), meaning pepper + plant so called; (varagóki); (varrakashimi). Mal. also (kára), meaning black [cauray]; (kákkattutali), meaning crow + plant; (mulakutánni), meaning pepper + terminalia belerica, roxb. Title otherwise Lopez root, Milagarandy, Prickly scopolia, Prickly toddalia. Botanically Toddalia aculeata, pers., rutaceæ [vricsham, 32]. Generic name from malayalam. Alias, Paullinia asiatica; Scopolia aculeata; Toddalia asiatica, floribunda, nitida, rubricaulis. Six feet; stem and branches prickly; leaflets sessile, from oblong to broad-lanceolate, crenulate, glabrous; midrib beneath, and petioles prickly or occasionally unarmed; racemes simple or compound; fruit five-furrowed, with three to five perfect cells; petals five, spreading; leaves alternate, digitately trifoliate; flowers small, white, fragrant. Ramous prickly shrub; common on coromandel; stem irregular, bark corky, branches exceedingly numerous, climbing; prickles innumerable.

The flowers are white, scented, in racemes, and are succeeded by three to five-celled orange-colored berries as large as a pea [calauyam], and having a hot peppery taste when unripe; the dry berries are dark brown or nearly black, and have a pungent, aromatic, and very agreeable flavor like citron [q.v.]. The bark is about $\frac{1}{12}$th of an inch thick, and consists of a soft, yellow, corky external layer, wrinkled longitudinally, a thin bright yellow layer, and a firm brown middle cortical layer and liber. The root is woody and in cylindrical flexuose pieces, from $\frac{1}{2}$-2 inches in diameter. The root-bark occurs in hollow pieces, varying in length from 2-5 inches, and in thickness from $\frac{3}{4}$ to $1\frac{1}{2}$ lines; it is more or less flexuous, often partially quilled, and covered with a yellowish corky epidermis; it possesses no particular odour; but is bitter in taste; in the fresh state it is aromatic and pungent and has an odour of citron [q.v.]. The root-bark is medicinally antiperiodic, antipyretic, diaphoretic, carminative and tonic. Decoction; take of the root-bark, in coarse powder, six ounces; water, two pints and-a-half; boil on a slow fire till the liquid is reduced to one pint and strain when cool. Tincture; take of the root-bark, in coarse powder, six ounces; proof spirit, one pint; macerate for seven days in a closed vessel with occasional agitation; filter and add more spirit to make one pint. Watery extract; take of the root-bark in coarse powder one portion; water, six portions; boil till the liquid is reduced to one-third; strain the latter through cloth while hot and evaporate it on a sand-bath to the consistence of an extract. Simple powder; the root-bark pulverized in the ordinary way after scraping off the corky epidermis, and passed through a fine sieve or cloth. Doses; of decoction, from two to six fluid ounces; of tincture, from two to four fluid drachms; of watery extract, from forty to eighty grains; of simple powder, from one to two drachms. Substituted; for quinine [koinah] and other alkaloids of cinchona [koinah], as an antiperiodic; for warburg's tincture, antipyrin, antifebrin, phenacetin and pulv. jacobi vera, as a diaphoretic and antipyretic; and for gentian [chiretta] and calumba [q.v.], as a tonic. One of the most valuable drugs in this country; medical properties very analogous to berberry [q.v.]; all the parts are febrifugal; under the name of lopez-root, once enjoyed celebrity in europe as a remedy for diarrhœa; gives to pharm. toddaliæ radix, aromatic tonic, and stimulant, antiperiodic; like cusparia bark, officinal. The fresh leaves are eaten raw in stomach complaints. The ripe berries are as pungent as pepper [q.v.] and make excellent pickles [chutney]. Fresh leaves eaten raw. The root-bark contains a yellow coloring matter [shauyam]. The wood is hard, yellow, and without taste or smell; its pores are arranged in a concentric manner, and the medullary rays are numerous and narrow. Another species is bilocularis.

TODDY (मधु - madhu, *San.*; سیندی - sendí, *Hind.*; ಹೆಂಡ - henda, *Can.*; కల్లు - kallu, *Tel.*; കള്ള് - kallu, *Mal.*; கள்ளு - kallu, *Tam.*). Title from inflected form of teloogoo for palmyra [taulam]. San. means sweet. A saccharine juice obtained by the excision of the spadix or young flowering branch of the palmyra [q.v.], cocoanut [q.v.], and other palms [taur]; when the juice exudes and drops into earthern pots [chatty], which are attached to the stem to receive it [shaunaur]. Taken fresh from the tree, early in the morning before the sun is up, it forms a pleasant drink [neerah]. When exposed to the air it undergoes various fermentation and becomes the common intoxicating drink of the lower classes. The following are the views of the Cooral about drunkenness:—உட்கப் படாஅ ரொளியிழப்ப ரெஞ்ஞான்றுங் கட்காதல் கொண்டொழுகு வார்—"those who always thirst after drink will neither inspire fear "in others nor retain the light of their fame."—உண்ணற்க கள்ளை யுணிலுண்க சான்ரோரா னெண்ணப் படவேண்டா தார்—"let no liquor be drunk; if it is desired, let it be "drunk by those who care not for the esteem of the puncti-"lious."—ஈன்ருண் முகத்தேயு மின்னாதா லென்மற்றுச் சான்ரோர் முகத்துக் களி—"intoxication is painful even in "the presence of one's mother; what will it not then be in that "of the wise?"—நாணென்னு நல்லாள் புறங்கொடுக்குங் கள்ளென்னும் பேணுப் பெருங்குற்றத் தார்க்கு—"the "fair maid of modesty will turn her back on those who are "guilty of the great and abominable crime of drunkenness."—துஞ்சினார் செத்தாரின் வேறல்ல ரெஞ்ஞான்று நஞ்சுண் பார் கள்ளுண் பவர்—"they that sleep resemble the dead; "likewise they that drink are no other than poison-eaters."—உள்ளொற்றி யுள்ளூர் நகப்படுவ ரெஞ்ஞான்றுங் கள்ளொற்றிக் கண்சாய் பவர்—"those who always intoxicate "themselves by a private indulgence in drink, will have their "secrets detected and laughed at by their fellow-townsmen."—களித்தானைக் காரணங் காட்டுதல் கீழ்நீர்க் குளித்தானைத் தீத்துரீஇ யற்று—"reasoning with a drunkard is like "going under water with a torch in search of a drowned man." Other uses near towns are for making arrack [q.v.], sugar [q.v.], and vinegar [caudy]. The name is the origin of the Scottish term for punch. The different toddies, particularly that of the cocoanut, are used by bakers as a leaven for raising bread. Veidyans [q.v.] prescribe it in consumptive cases [mooskiraut, sharaub]. There are toddies also from juice of bark of the fig [atty] and other trees, mostly used in medicine. ——(1) *Toddy bird* (بیّیا - baiyá, Hind.). Title from its attachment to toddy tree or palmyra [q.v.] where it hangs its curious pensile nests. Same as Weaver bird.——*Toddy cat* (ताडीमार्जार - tádímárjára, San.; ऊद - úda, Mahr.; جھاڑکا کتا - jhárkákuttá, Hind.; میو سنگ - musang, Malay; ಕರಿಬೆಕ್ಕು - karí-bekku, Can.; మానుపిల్లి - mánupilli, Tel.; മരപ്പട്ടി - marappatti, Mal.; උගුඩුවා - uguduvá, Singh.; வெருகு - verugu, Tam.). Title from supposed fondness for toddy. San. from (tádi, san. palm + márjara, san. cat). Mahr. from (udra, san. otter). Hind. from (jhár, hind. tree + kuttá, hind. dog). Can. from (kari, can. black + bekku, can. cat). Tel. from (mánu, tel. tree + pilli, tel. cat). Mal. from (maram, mal. tree + patti, mal. bitch). Tam. strictly means a tom cat or male cat. Malay also (pandung), meaning night-robber. Title otherwise Common tree cat, Fitchet, Pole cat, Screw tail; called in Ceylon the Palm cat. Paradoxurus niger, viverrinæ, viverridæ, digitigrada, carnivora, mammalia [sastanam, 11], of naturalists [jantoo]. Alias Paradoxurus hermaphroditus, hirsutus, musanga, typus; Platyschista pallasii; Viverra nigra. General color brownish black, with some dingy yellowish stripes on each side, more or less distinct, and sometimes not noticeable; a white spot, above and below each eye, and the forehead with a whitish band in some; a black line from the top of the head down the centre of the nose is generally observable, variations are owing to the state of abrasion of the fur, which is yellowish at the base and blackish at the tip, individuals occur with the tail spirally twisted, so that the extremity has the lower surface uppermost; and, it was an individual similar to this on which the genus was founded. There is a Tamul proverb:—வாழுகிற வீட்டில் மரநாய்கட்டினதுபோல—"as a toddy-"cat was tied up in a house occupied by a prosperous family;" it being considered an inauspicious animal. It infests houses, especially where there is a ceiling of cloth. Lurks by day among the fronds of the cocoanut [q.v.] palms, rolled up as a ball. It will live for months in confinement on vegetable food, but preferring flesh. It is said to consume toddy [q.v.]. Indian species not here found are:—Paradoxurus hermaphroditus or terai musang, Paradoxurus grayii or hill musang, Paradoxurus aureus or golden musang.——*Toddy palm* (सुरमाड - surámáda, Mahr.). Title from product. Same as Bastard sago palm.——(2) The following are the different toddies, the principal being the Cocoanut [q.v.] and Palmyra [q.v.].——*Cocoanut toddy* (नारिकेलमधु - nárikélamadhu, San.; ناریلی - nárelí, Hind.; ತೆಂಗಿನಹೆಂಡ - tenginahenda, Can.; టెంకాయకల్లు - tenkáyakallu, Tel.; തെങ്ങിൻകള്ള് - tenninkallu, Mal.; தென்னங்கள்ளு - tennangallu, Tam.). Product of Cocos nucifera, linn. [cocoanut], palmaceæ. The best of the palm-toddies.——*Date toddy* (खर्जूरमधु - kharjúramadhu, San.; سیندی - sendí, Hind.; ಈಚಲಹೆಂಡ - íchalahenda, Can.; ఈతకల్లు - ítakallu, Tel.; ഈന്തിൻകള്ള് - íntinkallu, Mal.; ஈச்சங்கள்ளு - íççangallu, Tam.). Product of Phœnix sylvestris, roxb. [wild date], palmaceæ. Coarse, but better than palmyra [q.v.]. Much used in Mysore.——*Fig toddy* (उडुम्बरमधु - udumbaramadhu, San.; گلرکا نیرا - gullarkánírá, Hind.; ಅತ್ತೀಹೆಂಡ - attíhenda, Can.; అత్తికల్లు - attikallu, Tel.; അത്തിക്കള്ള് - attikkallu, Mal.; அத்திக்கள்ளு - attikkallu, Tam.). Product of Ficus glomerata, miq. [cluster fig], moraceæ. Used by veidyans [q.v.] as a powerful tonic.——*Margosa toddy* (निम्बमधु - nimbamadhu, San.; نیم کا نیرا - nímkánírá, Hind.; ಬೇವುಹೆಂಡ - bévuhenda, Can.; వేపకల్లు - vépakallu, Tel.; വേപ്പിൻകള്ള് - véppankallu, Mal.; வேப்பங்கள்ளு - véppangallu, Tam.). Product of Melia azadirachta, linn. [neem], meliaceæ. Veidyans [q.v.] prescribe as stomachic.——*Palmyra toddy* (तालमधु - tálamadhu, San.; تاڑی - tárí, Hind.; ತಾಳೇಹೆಂಡ - táléhenda, Can.; తాటికల్లు - tátikallu, Tel.; പനങ്കള്ള് - panankallu, Mal.; பனங்கள்ளு - panangallu, Tam.). Product of Borassus flabelliformis, linn. [palmyra], palmaceæ. The worst of the palm-toddies. Good only for distilling arrack [q.v.].——*Peepul toddy* (पिप्पलमधु - pippalumadhu, San.; گلرکا نیرا - gullarkánírá, Hind.; ಅರಸೇಹೆಂಡ - arasé-henda, Can.; రావికల్లు - rávikallu, Tel.; അരയാലിൻകള്ള് - arayálinkallu, Mal.; அரசங்கள்ளு - arasangallu, Tam.). Product of Ficus religiosa, linn. [peepul], moraceæ. Use medicinal.——*Prickly-pear toddy* (विदरमधु - vidaramadhu, San.; چپل سینڈھ کی تاڑی - chappalsendhkítárí, Hind.; ಮುಳ್ಳುಗಳ್ಳಿಹೆಂಡ - mullugallihenda, Can.; నాగజెముడుకల్లు - nágájemudukallu, Tel.; നാഗതാളിക്കള്ള് - nágatálikkallu, Mal.; சப்பாத்துக்கள்ளு - shappáttukkallu, Tam.). Product of Opuntia dillenii, haw. [prickly-pear], cacteæ. A purgative.——*Sago-palm toddy* (ماڑی کی سیندی - márikísendí, Hind.; ಬೈನಿಹೆಂಡ - bainihenda, Can.; చిరుగుకల్లు - chirugukallu, Tel.; ഇരുമ്പനങ്കള്ള് - írumpanankallu, Mal.; கூந்தற்பனங்கள்ளு - kúndarbanangallu, Tam.). Product of Caryota urens, linn. [bastard sago palm], palmaceæ. Inferior and chiefly used on Malabar coast.

TODE (തോട് - tótu, *Mal.*). From (tóndu, mal. to dig). Artificial canal. Suffix in place names as Andattode.——*Toty* (ತೋಟೀಗ - tótíga, Can.; தோட்டி - tótti, Tam.). From (tóndu,

tam. to dig). Digger [wodda]; village servant of low caste, who waits upon the villagers generally, is set to watch the crops, and assists in measuring them, &c.; menial domestic servant [inam]. See vol. I, 154, 158.

TOGAR (తొగరు - togaru, *Tel.*). Red color.——*Togar mogaly* (తొగరుమొగలి - togarumogali, Tel.). Meaning red color + pandanus odoratissimus, linn. Same as Dyeing mulberry.

TOGH (طوغ - togh, *Turk.*). Standard.——*Toghdar* (حباری - hubára, Ar.; هوبره - húbarah, Pers.; توغدار - toghdár, Hind. and Dec.; బట్టమేక - battaméka, Tel.; நீலநாரை - nílanárai, Tam.). Title from deccany. Ar. from (hubara, ar. ash-color). Pers. from arabic. Hind. from turkish, meaning standard-bearer; from feathers in front. Tel. from (batta, tel. stripe + méka, tel. goat). Tam. from (níla, san. blue + nárai, tam. stork). Male bird is:—Ar. (kharab). Hind. also (sohau); (gaganbher), meaning sky lamb; (gurain). Tel. also (burrachirata), meaning gourd shell + leopard. Title otherwise Indian bustard. Eupodotis edwardsii, otididæ, pressirostres, grallatores [pacshy, 35], of naturalists [jantoo]. Alias Otis nigriceps. Male, top of head with crest black; face, nape, and whole neck white, feathers somewhat lengthened and hackled in front; back and upper plumage, including shoulder of wings and the inner wing-coverts, pale olive brown, or buff, beautifully mottled and variegated with minute lines of black; outer wing-coverts black, white tipped; greater coverts slaty-grey, also tipped with white, as is winglet; primaries dark slaty, more dusky on outer edges, white-tipped; tail as back with dark subterminal band not always, distinct on central feathers; blackish brown band across breast; lower parts, with thigh-coverts, white; flanks dark olive brown; vent and lower tail-coverts same but lighter; bill dusky above, yellowish beneath; irides pale yellow with brownish specks; legs and feet dingy pale yellow; length 4½–5 feet. Female one-third less at least, white of neck less pure, generally, rufous about face and eyes; pectoral band incomplete, abdomen less pure white, flanks paler brown more spotted; length 3½ feet. Fully grown adult male stands above 4 feet. Gular sac able to hold about three quarts of water. Not known on malabar coast; frequents open plains; when raised, generally takes long flight, sometimes three or four miles.——*Toghlak* (تغلق - toghlak, Hind.). From turkish, meaning standard bearer. The third of the Ghory dynasties [charitram]; see vol. I (143).

TOHFA (تحفه - tohfah, *Hind.*). From (tahafa, ar. to present). Tribute from inferior to superior [bhet, caunicay, nuzzer, wolfa].

TOKKY (తొక్కి - tokki, *Tel.*). Human sacrifice festival formerly held among the Sowrahs. See vol. I (72). This festival was annually held, and forty or fifty villages united in its celebration, choosing one village by turn for the site of operation. It was held in honor of Jaugrata devatay, the local numen. The most important part of the preparation was made four or five months before the time fixed on for the festival, by selecting some friendless man or woman of the age of twenty-five or twenty-six years, who was put into confinement, being highly fed and allowed the free use of intoxicating beverages. At the time of sacrifice, this victim was taken out in public procession for eight or nine successive days, proceeding round the village wherein the sacrifice was to be held. The precise act was held at four o'clock in the morning, or an hour or two before sunrise. The victim was then killed by a weapon termed gandagoddaly, and the blood was used as an offering to the idol [shilay, vigraham]. The person was always kept in a state of intoxication, and was usually insensible at the time of sacrifice. The Sowrahs considered that by this sacrifice they increased the fertility of their lands and rendered their villages more valuable [sowrah]. Compare Poorshamedham or human sacrifice under Yanyam.

TOKRAH (पिटक - pitaka, *San.*; ٹوکرا - tokrá, *Hind.*; ಪುಟಿಕೆ - putike, *Can.*; గంప - gampa, *Tel.*; കൊട്ട - kotta, *Mal.*; கூடை - kúdai, *Tam.*). Title from hindostany. San. from (pit, san. to collect). Can. from sanscrit. Tam. from (kúdu, tam. to collect). Basket. Generally manufactured by the Coravars [q.v.] and Yerkalas [q.v.]. But bamboo [q.v.] baskets are made by Maidaries [q.v.]. The following is a key-list of the articles generally used for basket-work in this Presidency:—Bambusa arundinacea, common bamboo, split stem; Bambusa stricta, male bamboo, split stem; Borassus flabelliformis, palmyra, leaf; Calamus rotang, country rattan, stem; Caryota urens, bastard sago palm, leaf stalk; Cocos nucifera, cocoanut, leaf; Maba buxifolia, neilgherry satin-wood, split stalk; Phœnix sylvestris, wild date, fibrous leaflets, fibre from petioles; Saccharum sara, moonshee grass, split stalk; Salix babylonica, weeping willow, branches and twigs; Salix tetrasperma, indian willow, twigs; Tephrosia purpurea, zanzibar indigo, split stalk; Vitex negundo, notchy, split stalk.

TOL (ٹول - tol, *Hind.*). Bengalee word for a Sanscrit college.

TOL (தொல் - tol, *Tam.*). Old.——*Tolgauppyam* (தொல்காப்பியம் - tolgáppiyam, Tam.). From (above + kávya, san. poem). Tamul grammar [lacshanam] by Tolgauppyan of Madura, pupil of Agastyan [q.v.], whose large grammar, consisting of 80,000 rules, he abridged, reducing the number to 8,000. The Tolgauppyam complete should consist of three parts; on letters, words and prosody, or rather versification as an art. Of these the last part cannot be found complete. Tolgauppyam has had three commentaries written upon it by Nutchinarkiny, Yilampooran, and Shenauvareiyan [nunnool]. See vol. I (49).——*Tonnool* (தொன்னூல் - tonnúl, Tam.). From (above + núl, tam. science). Ancient science or book. Tamul grammar [lacshanam] by Beschi [veeramaumoony]; based on Nunnool, but the arrangement different.

TOLE (തോൽ - tól, *Mal.*). Hide [chamrah].——*Tolcollan* (തോൽകൊല്ലൻ - tólkollan, Mal.). From (above + kollan, mal. artificer). Tanner [jauty].

TOMATO (تماتی - tamátí, *Malay*). Same as Europe brinjaul.

TOMAUN (تومان - tomán, *Hind.*). Persian gold coin, answering to the english sovereign.

TOMI-TOMI (تومی تومی - tomitomi, *Malay*; ವುಬ್ಬೊಲು - vubbolu, *Can.*; ලොවිලොවි - lovilovi, *Singh.*; சொட்டைக்களா - shottaikkalá, *Tam.*). Title from malay. Tam. from (shottai, tam. decayed + kalá, tam. the plant, carissa genus). Tam. also (shottai). Title otherwise Lovi-lovi. Botanically Flacourtia [swaudoocantacam] inermis, roxb., bixineæ [vricsham, 14]. Young branches puberulous; leaves 4–8 by 2–3½ inches, base acute or rounded, shining, thin, coriaceous, midrib below pubescent; petiole ⅓–½ inch; disk covered with orange fleshy glands; ovary five-celled, cells two-ovuled; stigmas four to eight, two-lobed; fruit size of a cherry [q.v.], red, acid, pyrenes eight to ten. Tree from moluccas; flowers small greenish, flowers in hot weather, ripens fruit in september; berry very smooth; used in cookery, but inferior to flacourtia cataphracta, roxb. [indian plum].

TOM-TOM (తప్పెట - tappeta, *Tel.*; தம்பட்டம் - tambattam, *Tam.*). Small drum. There are several kinds, generally made of jack-wood [jack], and covered with deer-skin [mrigam], from which the hair has been removed. The skin is laid on in a wet state, and dried in the sun. There is a Tamul proverb:—உரல் போய் மத்தளத்தோடே முறையிட்டதுபோல—"as the "mortar went to the tom-tom with its complaints;" the mortar is beaten at one end only, whereas the tom-tom is beaten at both ends. Compare Paray.

TONDAY (தொண்டை - tondai, *Tam.*). From (áthondai, tam. a creeper, capparis horrida). The Tonday country. Also called Valanaud [q.v.], meaning fertile country. Ancient Chola province between E. ghauts and Palaur, corresponding with modern districts of N. & S. Arcot. See vol. I (13), (141). The following is the Dravidian legendary history. After the deluge [pralayam] the country was a vast forest inhabited by wild beasts. A wild race of men arose, who destroying the wild beasts dwelt in certain districts. There were then no forts, only huts, no kings, no religion, no civilisation, no books; men were naked savages; no marriage institutions. Many years after the Coorumbar [q.v.] arose in the Carnauta [q.v.] country; they had a certain kind of religion, they were murderers, they derived the name of Coorumbar from their cruelty. Some of them spread into Dravida desham as far as the Tondaimundalam country. They are now found near Ootramallore, but more civilised. They ruled the country some time, but falling into strife among themselves they at length agreed to select a chief who should unite them altogether. They chose a man who had some knowledge of books, who was chief of the Dravida [q.v.] country, and was called Coorumba prabhoo and Pozhal rajah. He built a fort in Pozhalore. He divided the Coorumba [q.v.] land into twenty-four parts and constructed a fort in each district. While they were ruling, there was a commerce carried on by ships. As the merchants of Cauveripoomputnam sought trading intercourse with them, the Coorumbar built the following forts for trade:—Aulambaray, Cuddalore, Mercaunum, Meyyore, Pattipoolam, Shaulacooppam, Shaulapaukam; whence, by means of merchants from Cauveripoomputnam and the Coorumbar a commercial intercourse by vessels was carried on. They flourished in consequence, and while without any religion a Jeina ascetic came and turned them to the Jeina [q.v.] credence. The basty [q.v.] which the Pozhal [q.v.] king built after the name of that ascetic is still remaining, together with other basty and some Jeina images in different places; but some are dilapidated and some destroyed by the hatred of the Bramins [q.v.]. They were similar to the Jeinas of the present day. They were shepherds, weavers, lime-sellers, traders. While living thus, various kings of civilised countries made inroads upon them, as the Chola [q.v.] and Paundyan [q.v.] kings and others; and being a wild people who cared not for their lives, they successfully resisted their invaders and had some of the invading chiefs imprisoned in fetters, in front of the Pozhal fort. Besides, they constrained all young people to enter the Jeina religion; in consequence of which vexation a cry arose in the neighbouring countries. At length Athonday of Tanjore formed the design of subduing them; and, he invading them, a fierce battle was fought in front of the Pozhal fort, in which the Coorumba king's troops fought and fell with great

bravery, and two-thirds of Athonday's army were cut up. He retreated to a distance overwhelmed with grief and the place where he halted is still called Cholan paid. While thinking of returning to Tanjore, Shiva that night appeared to him in a dream and promised him victory over the Coorumbar, guaranteed by a sign. The sign occurred and the Coorumba troops were the same day routed with great slaughter; the king was taken, the Pozhal fort was thrown down, and its bell-metal [cunts] gate was fixed in front of the shrine at Tanjore. A temple was built where the sign occurred, and a remarkable pillar of the fort was fixed there; the place is called Trimal vausal. A sort of commemorative ceremony is practised there. After more fighting the other forts were taken and the Coorumbar destroyed. Athonday placed the Vellaular [q.v.] as his deputed authorities, having called them into the country to supply the deficiency of inhabitants from the Tooloova [q.v.] desham. They are called Tooloova vellaular to the present day. Some were brought from the Chola [q.v.] desham, still called Chola vellaular. He called from the north certain Bramins by birth, whom he fixed as accountants. The Condeicutty vellaular were appointed by him. He acquired the name of Chuckravurty from rescuing the people from their troubles. The name of Coorumba bhoomy was discontinued, the country was called Tondaimundalam and common consent ascribes to Athonday the regulation of the country. The following list shows the twenty-four cottams [q.v.] and seventy-nine nauds [q.v.]:—Aumore cottam; coomily naud, padoovore naud. Cadigay cottam; naugavaid naud, paraunjy naud, peroongaunjy naud. Calattore cottam; cooroombranaud, nadoonaud, pauttore naud, vullipoora naud. Cauliyore cottam; cauliyore naud, pauvore naud, tirpoolivana naud, vitpaid naud, yerikeel naud. Chundricay cottam; aroongoola naud, aulatore naud, polore naud, valacoolam naud. Coondraputra cottam; maugaula naud, mungala naud, nindray naud. Eecautt cottam; caucalore naud, cutchy naud. Eethore cottam; aramorangah naud. Manavorecottam; cunnore naud, illatore naud, pausaulay naud, permoor naud, poorisay naud. Ootcaud cottam; coondra naud, neevalore naud, pauleiyore naud, tammanore naud. Padoovore cottam; arcaud naud, shengoondram naud. Palcoondra cottam; meyyore naud, parasore naud, peroontimiry naud, singamportavala naud, tutchore naud. Peiyore cottam; cunny naud, shenore naud, vengaly naud, vitputty naud. Pooliyore cottam; amarore naud, coondratore naud, cottore naud, maungaud naud, peroor naud. Pozhal cottam; ambattore naud, augoody naud, auttore naud, nayar naud, yezhoomore naud. Shembore cottam; moogoondore naud, puttana naud, pireiyore naud. Shengautt cottam; athigattore naud, pennalore naud. Sircaray cottam; oynda naud. Daumal cottam; cariveed naud, vadacaray vullam naud. Veloor cottam; mauttore naud, nenmely naud, ozhcaray naud. Vengada cottam; coodacaray naud, pottapy naud, tondiman naud. Yilangautt cottam; maragoona naud, ponnore naud, tennatore naud [charitram].——*Tondaimundalam* (தொண்டைமண்டலம் - tondaimandalam, Tam.). The realm of Tonday.——*Tondayaur* (தொண்டியாறு - tondiyáru, Tam.). From (above + áru, tam. river). River; South arcot dist., Tindivanam and Villoopooram tals.; Tributary of the Varauhanuddy.——*Tondeeran* (தொண்டீரன் - tondíran, Tam.). The chief of the Tonday country.——*Tondiman* (தொண்டமான் - tondamán, Tam.). From (above + mán, tam. suffix of possession). Title of the chiefs of Poodoocottah in Trichinopoly district. See vol. I, 40.

TONDRAL (தோன்றல் - tónral, *Tam.*). From (tónru, tam. to appear), conspicuous one. Title of the ruler in a forest tract [desham, moollay].

TONDY (തൊണ്ടി - tondi, *Mal.*). Thick rind.——*Tondy teragam* (തൊണ്ടിത്തേരകം - tonditterakam, Mal.). Mal. from (above + térakam, mal. ficus asperrima, roxb.). Mal. also (tonti), meaning thick-skinned. Title otherwise Downy callicarpa, Folhas da raspa macho, Groot rijf blad, Woolly callicarpa. Botanically Callicarpa lanata, linn., verbenaceæ [vricsham, 102]. Alias Callicarpa americana, cana, tomentosa. From 20–40 feet in height, the young branches are cinnamoneous [cinnamon], shaggy and woolly, the leaves 4–8 inches long, ovate lanceolate, stellately tomentose beneath; if the tomentum is removed, numerous oil glands are visible; both leaves and bark are faintly aromatic and bitterish, and afford much mucilage when boiled. Has in medicine mucilaginous emollient and diuretic properties; is also sub-aromatic and bitter; leaves boiled in milk [paul] are used as a wash for aphthæ of the mouth; bark and root boiled in water yield a decoction which is used to lessen febrile heat and remove hepatic obstruction and herpetic eruptions; leaves, roots, and bark are used by the natives of ceylon in skin diseases.

TONDY (தொண்டி - tondi,* *Tam.*). Means toddy. Village, Port; Madura dist., Tirvaudaunay tal.; pop. 8,823; lat. 9° 45′; long. 79° C4″; from Damodaraputnam S.W. 5 miles; from Madras S.S.W. 246 miles; from Madura E.S.E. 62 miles; from Numboodalay N.E. 1½ miles; from Ramnaud N.N.E. 28 miles. On Palk's bay connected by road with the interior. Inhabitants are principally Mussalmans [q.v.], but there are also a few Caraiyaur [q.v.]; the former are engaged in manufacturing long cloths, and the latter are fishermen. Inland commodities, consisting of grain, tamarinds [q.v.], cloths, &c., are exported, as also chunks [q.v.], in great abundance. Trade with Colombo. Government treasure is generally shipped for Madras by steamer from here.*

TONGA (تانگا - tángá, *Hind.*). A two-wheeled, four-seated low carriage of strong construction for use on rough ground; drawn by a pair of ponies abreast.

TONGUE (நாக்கு - nákku, *Tam.*). Prefix. For bull's tongue see Gowzabaun. For naukkmeen see Indian sole.——*Tongue grass* (நாக்கறுத்தான்புல் - nákkaruttánbul, Tam.). From sharp blades. Same as Darbhay.

TONJON (تام جهام - támjhám, *Hind.*). Hind. from (thám, hind. support + jháng, san. thigh). A sedan or portable chair, open in front and on each side, carried by single pole [dandam], on men's shoulders [dhooly].

TOOCAJEE (ತುಕೋಜಿ - tukójí, *Can.*). From (tukáí, mahr. párvati + jí, hind. master). Mahratta name [peyar].

TOOGLOOT (ತುಗ್ಲುಟಿ - tugluti, *Can.*). Hill quagmire.

TOOK (தூக்கு - túkku, *Tam.*). Means weight. Bazaar weight. 1¼ visses = 1 took; 2 tooks = 1 yeday [niray, 2a]. Approximate actual value, 1 took = 3 lbs. 13 oz. 11⅔ drs. avoir. Tamul districts. See vol. I, 609; II, 507, 509.

TOOKADY (تکڑی - tukrí, *Hind.*). From (tukrá, hind. a piece). A division or district [firkah, taraf, zillah]. Tookry, corruption of tookridar, is a village-watcher.

TOOLAM (तुला - tulá, *San.*; துலம் - tolam, *Tam.*). From (tul, san. to weigh). Balance.——*Tolah* (तुला - tulá, San.; تولہ - tolah, Hind.). From (tul, san. to weigh). A weight formerly regarded as equivalent to the weight of the sicca [q.v.] rupee or 179·666 troy grains. Now fixed at 180 troy grains, the weight of the current rupee [q.v.]. British rupees 38·9 weigh 1 lb. avoir. 350 tolahs = 9 lb. Weight of a florin is 174·54 grains. According to Mahomedan calculations tolah = 12 maushams. According to Sanscrit calculations tolah = 8 maushams. See vol. I, 609; II, 505.——*Tool* (طول - tul, Hind.; తుల - tula, Tel.). From (tul, san. to weigh). The measurement of a heap of grain by means of a cord over the top.——*Toolabhauram* (तुलाभार - tulábhára, San.). From (tulá, san. balance + bhára, san. weight). A ceremony performed once in the life-time of each maharajah [q.v.] retained at Travancore. The Maharajah is seated on one scale of an ornamental balance, with his sword and shield; and in the other scale his weight is heaped in gold coins [naunyam] having the name of the god inscribed thereon, which are afterwards distributed to the Bramins [q.v.] in various proportions according to their dignity and claims. One ruler performed this ceremony a second time in silver at the end of his reign.——*Toolaum* (തുലാം - tulám, Mal.; துலாம் - tulám, Tam.). Bazaar weight. 100 pollums = 1 toolaum; 20 toolaums = 1 bhauram [niray, 2d]. Approximate actual value, 1 toolaum = 25 pounds avoir. Variable. The Tamul toolaums are much smaller. Same as Shiroopuddy in Tinnevelly. Compare Maund. See vol. I, 609; II, 509, 515, 518, 519.——*Toolsy* (तुलसी - tulasí, San.). See sep. title.——*Toolyabhauga* (తుల్యభాగ - tulyabhága, Tel.). From (tulya, san. equal + bhága, san. division). A mouth of the Godavery; near Chollangy.

TOOLOO (ತುಳು - tulu, *Can.*). Means mild. Language once prevalent throughout Canara, but now spoken mostly in the neighbourhood of Mangalore. Holds a position midway between Canarese and Malayalam, but more resembles former [bhaushay]. See vol. I (51).——*Tooloo rajyam* (തുളുരാജ്യം - tulurájyam, Mal.). From (above + rájya, san. kingdom). Northern keralam [q.v.] from Gocurnam to Cassergode river. See vol. I (127).——*Tooloovam* (ತುಳು - tulu, Can.; തുളുവം - tuluvam, Mal.; துளுவம் - tuluvam, Tam.). From (tulu, can. the language). Canara from Chundragherry river in south to Bhadragherry river in north. One of the fifty-six countries [bhoogola shastram].——*Tooloovan* (ತುಳುವನು - tuluvanu, Can.; துளுவன் - tuluvan, Tam.). Inhabitants of the Tooloo country. Tooloova bramins [q.v.] belong neither to Gowda [q.v.] nor Dravida [q.v.]. They do not intermarry with the other Bramins on the Malabar coast. They resemble the Numboories [q.v.]. They are divided between the sects of Shuncaracharry [shuncaran] and Madhwacharry [madhwa].

TOOLSY (तुलसी - tulasí, *San.*). From (tul, san. weigh); grave, holy [toolam]. Title otherwise Basil. Botanically the Ocimum genus, labiatæ [vricsham, 103]. Strongly scented herbs, undershrubs or shrubs. The species best known to the natives are shown below. Includes also one species of melissa and two of sphæranthus. Toolsy as a name is applied to males and females among Madhwas [peyar].——(1) *Toolasingam* (துளசிங்கம் - tulasingam, Tam.). From (above + simha, san. lion, short for narsimha, the man-lion god); meaning vishnoo as crowned or adorned with toolsy garland. Hindoo 2nd or

pers. name [peyar].——*Toolsajee* (تلساجي - tulsájí, Hind.). Holy basil + mahratta honorific title. Son of Prataup sing, rajah of Tanjore, 1765–1787. Tanjore captured and the rajah taken prisoner by Oomdat ool oomrah, who was aided by the English. Subsequently reinstated. Nagore settlement, consisting of 277 villages, was ceded and Tanjore became a protected state. See vol. I, 50; II, 126.——*Toolsimany tauvadam* (துளசிமணித்தாவடம் - tulasimanittávadam, Tam.). From (above + mani, san. bead + tázh, tam. pendent + vadam, tam. string). A rosary [maulay] of toolsy.——*Toolsy bye* (ತುಳಸೀಬಾಯಿ - tulasibáyi, Can.). From (above + báyi, can. title). A ranee of Indore, well known in history.——*Toolsy toongaury* (తులసితుంగారి - tulasitungári, Tel.). From (above + tunga, san. high + giri, san. mountain). Range of hills; Vizagapatam district, Jeypore zemindarry, Mulkangherry magisterial division; separate Ramgherry and Mulkangherry zemindarries. Stretch into the state of Bustar. Average elevation 3,000 feet. Highest peak, Toolsy, 3,928 feet.——**(2)** *Common toolsy* (तुलसी - tulasí, San.; तुळशी - tulashí, Mahr.; कालितुलसि - kálitulasi, Conc.; بادروج - bádrúj, *Ar.*; تلسی - tulsí, Hind. and Dec.; سالسی - sálasi, Malay; ತುಳಶಿ - tulashi, Can.; కప్పుతులచి - kapputulachi, Too.; తులసి - tulasi, Tel.; തുളസി - tulasi, Mal.; මදුරුතලා - madurutalá, Singh.; துளசி - tulasi, Tam.). Title from hindostany. San. from (tul, san. to weigh), meaning of great weight or importance. Mahr. from sanscrit. Conc. from (kála, san. black + tulasí, san. the plant). Ar. means ocimum basilicum, linn. Hind. from sanscrit. Malay from sanscrit. Too. from (kappu, too. black + tulasí, san. basil). Tel. from sanscrit. Mal. from sanscrit. Singh. from. (maduru, singh. the mount méru + talá, singh. basil). Tam. from sanscrit. San. also (bháratí), meaning indian; (bhútaka), meaning demon plant, useful in incantations; (divyá), meaning divine; (krishnamúla), meaning dark-rooted; (ájaka), meaning pertaining to goat; (parnása), meaning leaf + dropping, from shedding old leaves; (arjaka), meaning procuring, from utility; (surasá), meaning good juice [notchy]; (krishnatulasí), meaning black basil. Hind. also (kálátulsí), meaning black toolsy; (krishnatulsí), meaning black toolsy; (varindá), by corruption (barandá), from (brindá, san. holy basil). Dec. also (tulsíkámankah), meaning toolsy bead; (tulsíkíjar), meaning toolsy root. Can. also (karitulashi), meaning black + basil; (kálatulashi), meaning black + basil; (kural). Tel. also (gaggera); (nallagaggera), meaning black + the plant; (nallatulasi), meaning black + toolsy plant; (brinda). Mal. also (nallatrittávu), meaning good basil; (shivatulasi), meaning shiva's basil. Tam. also (alangai), meaning shining, from use as garlands to deities; (pirundam), from (brindá, san. holy basil); (karundulasi), meaning black + holy basil. Title otherwise Holy basil, Monk's basil, Purple stalked basil, Sacred basil. Botanically Ocimum [toolsy] sanctum, linn., labiatæ [vriesham, 103]. Alias Basilicum agreste; Lumnitzera tenuiflora; Ocimum frutescens, hirsutum, inodorum, monachorum, scutellarioides, tenuiflorum, tomentosum, villosum, zeylanicum; Plectranthus monachorum. Small plant, 1-2 feet; stems and petioles pilose, dull red purple; profusely branched; branches also clothed with dark purple hairs; leaves same color, 1½ inches long, 1 inch broad, petiolate, oval, obtuse, toothed, pubescent; floral leaves sessile, shorter than the pedicels; racemes slender, simple or branched at the base; calyx shorter than the pedicels, smoothish, upper tooth obovate, concave; corolla hardly exceeding the calyx; flowers small, fragrant, pale purple; generally cultivated in pots, in gardens and near pagodas [q.v.]. Sacred to vishnoo [q.v.]; said to have been produced from hair of a nymph beloved by him as krishnan [q.v.]; the veishnava rosaries [maulay] are composed of 108 beads made of the wood; oaths are made on leaves steeped in water; these are held in the hand, and after the oath are swallowed; venerated by hindoos like the vervein was amongst the romans; may be often seen occupying a prominent position in front of hindoo houses; when thus kept it has to be watered and worshipped daily. Medicinally much like fragrant toolsy; dried plant aromatic stimulant, expectorant and diaphoretic; used mixed with lime-juice [lime], in cutaneous affections and ringworm; in pharm non-officinal. There is a Canarese proverb:—ಮಾಡೋದು ದುರಾಚಾರ, ಮನೆಯ ಮುಂದೆ ವೃಂದಾವನ—"acts wickedly, but rears a toolsy in front of his house."——*Fever toolsy* (சுரக்காந்தை - shurakkarandai, Tam.). Title from cure against fever. Tam. from (jvara, san. fever + karandai, tam. sweet basil, ocimum basilicum, linn.). Tam. also (shivakkarandai), meaning shiva + sweet basil. Title otherwise Ceylon toolsy. Botanically Sphæranthus [moondy] amaranthoides, burm., compositæ [vriesham, 74]. Alias Oligolepis amaranthoides; Sphæranthus zeylanicus. Annual, glabrous; leaves lanceolate entire, serrated, glabrous, shortly decurrent; capitula ovate-globose, subsessile; peduncles very short, wingless; bracts very much acuminated, involucre usually one scale to each flower, that of the hermaphrodite much larger and forming a common involucre to the capitulum, those of the females linear-obtuse, mucronate or truncated, folded round the flower and adhering to the pedicel. Found in rice fields; used in fever and cutaneous diseases.——*Fragrant toolsy* (वर्वर - varvara, San.; सबजा - sabajá, Mahr.; कामकस्तुरि - kámakastúri, Conc.; شاهسفرم - sháhasfaram, Ar.; ريحان - raihán, Pers.; سبزه - sabzah, Hind. and Dec.; سالسی - sálasi, Malay; ಬಿಳಿಕಮ್ಮಗಗ್ಗರಿ - bilikammagaggari, Can.; ನಾಯಿತುಳಚಿ - náyitulachi, Too.; వేపుడుపత్త - vépudupattsa, Tel.; ଧଳାତୁଳସୀ - dhálatulasi, Oor.; വെള്ളത്തുളസി - vellattulasi, Mal.; සුවඳතලා - suvandatalá, Singh.; திருநீற்றுப்பச்சை - tirunírtuppaççai, Tam.). Title from qualities of all parts of plant. San. from (vri, san. to cover) [babool, knotted bhraungy, vailay]. Mahr. from hindostany. Conc. from (káma, san. desire + kastúri, san. musk). Ar. from (sháh, pers. king + asparam, pers. basil, ocimum). Pers. from (ráih, ar. fragrance). Hind. from (sabz, pers. green). Malay from (tulasí, san. basil). Can. from (bili, can. white + kammagaggari, can. the plant, ocimum sanctum, linn). Too. from (náyi, too. dog + tulachi, too. the holy basil, ocimum sanctum, linn.). Tel. from (vétsu, tel. to fry + pattsa, tel. green). Oor. means white basil. Mal. from (vella, mal. white + tulasí, san. holy basil). Singh. from (suvanda, singh. fragrant + talá, singh. basil). Tam. from (tiru, tam. holy + níru, tam. ashes + paççai, tam. plant); from its fragrant evergreen leaves used in perfuming sacred ashes [tirneer, vibhooty]. San. also (vishvatulasí), meaning world + holy basil; (ájaka), meaning relating to goat; (gambhíra), meaning secret, from supposed virtues; (gandhap'hanijjhaka), meaning fragrant basil; (mañjariká), meaning having a cluster of flowers; (arjaka), meaning procuring, useful. Mahr. also (tukumaráí), meaning the seed of the plant; (pándharítulasí), meaning white basil. Ar. also (sultánurrayáhín), meaning king of ocimum species; (raihánimutlak), meaning absolute sweet basil; (asábiulfatiyát), meaning fingers of a girl; (badrúj); (bakalatul'zabb), meaning porpoise potherb. Pers. also (názbú); (dabánsháb); (angushtikhúnizakn), meaning finger + blood + chin. Hind. also (janglítulsí), meaning wild holy basil; (bábarí), by corr. from sanscrit; (bábrítulsí); (mane), (kálátulsí), meaning black toolsy. Dec. also (ujlítulsí), meaning white basil. Malay also (sulasi). Can. also (kámakastúri), meaning desire + musk; (nírutulasi), meaning water + basil; (náyitulasi), meaning dog + basil; (rámatulasi), meaning the hero + basil. Too. also (kámakastúri), meaning desire + musk. Tel. also (bhútulasi), meaning ground + toolsy plant; (tellatulasi), meaning white + toolsy plant; (vibúdipatri), meaning sacred ashes + leaf; (nírutulasi), meaning water + toolsy plant; (kukkatulasi), meaning dog toolsy; (rudrajada), meaning shiva + matted hair. Mal. also (tirunírtuppaçça), meaning holy + ashes + green; (paççapushpam), meaning greenish flower; (nákkanni), meaning dog-eyed; (rámatulasi), meaning rama's basil; (káttturámatulasi), meaning wild rama's basil; (tulasittrittávu), meaning holy basil. Tam. also (kañjángórai) [persian toolsy, white toolsy], cf. sankhvel; (tirunírtuppattiri), meaning holy + ashes + leaf; (karandai); (uruttirasadai), meaning shiva + matted hair; (náyttulasi), meaning dog + holy basil; (mañjilikkán), meaning rice-field plant; (shunaikkarandai), meaning sharp + the plant. Greek ὤκιμον. Title otherwise Ciliated basil, Holy ashes leaf, Indian tea, Roodra's hair, Royal basil, Sabzah, Sweet basil, Wild mint. Botanically Ocimum [toolsy] basilicum, linn., labiatæ [vriesham, 103]. Alias Basilicum indicum, Ocimum album, americanum, anisatum, caryophyllatum, ciliatum, hispidum, hispidulum, integerrimum, lanceolatum, laxum, minimum, pilosum. Herbaceous, erect, glabrous; leaves petiolate, ovate or oblong, narrowed at the base, slightly toothed; petioles ciliated; racemes simple; calyxes longer than the pedicels; upper teeth ovate, concave, shortly acuminated; whorls about six, rarely ten-flowered; flowers small, white; flowering nearly all year; whole plant aromatic fragrant. Juice of leaves used for ringworm, and bruised leaves for scorpion stings; juice of leaves is squeezed into ear in earache; seeds and flowers stimulant, diuretic and demulcent; seed are a favorite medicine with hindoo women for relieving the afterpains of parturition; seeds steeped in water swell and form a jelly; leaves and seeds in pharm. non-officinal. Plant often used for seasoning in cookery; infusion of leaves dried in shade used as a tea [q.v.]; an aromatic ethereal oil is obtained from the root. There are several varieties. Compare the following compounds, where translation is of first term:—Brachycome assamica (shirugotta'kkarandai), small + seed; Grangea maderaspatana (shinnappúkkottaikkarandai), small + flower + seed; Laggera aurita (nárungarandai), smell; Melissa officinalis (pársigañjángórai), persian; Salvia plebia (káttukkañjángórai), wild; Sphæranthus amaranthoides (shivakkarandai), shiva, (shurakkarandai), fever; Sphæranthus indicus (kódálakkarandai), meaning axe-like, from use against disease, (kottaikkarandai), seed, (vittunukkarandai), vishnoo. See glossary paragraphs.——*Mecca toolsy* (مكه سبزه - makkahsabzah, Dec.). Same as Persian toolsy.——*Persian toolsy* (مفرح القلب - mufarrihulkalb, Ar.; بادرنگبویه - bádrangbúyah, Pers.; رام تلسی - rámtulsí, Hind.; مکه سبزه - makkahsabzah, Dec.; பார்சிகஞ்சாங்கோரை - pársigañjángórai, Tam.). Title from habitat. Ar. from (mufarrih, ar. stimulant + kalb, ar. heart). Pers. from (bádrang, pers. ocimum canum, sims. + búyah, pers. fragrant). Hind. from (rám, hind. rama + tulsí, hind. holy basil, ocimum sanctum, linn.) [rama toolsy]. Dec. from (makkah, hind. mecca + sabzah, hind. sweet basil, ocimum basilicum, linn.). Tam. from (pársi, tam. persia + kañjángórai, tam. white-basil, ocimum canum, sim.). Ar. also (bakalatulfaristún); (bakalatulutrujiyat), meaning citrus medica, linn. + potherb; (habakituranján), meaning citrus + mint, mentha pulegium, linn. Hind. also (billílotan), meaning

valerian spikenard, nardostachys jatamansi, dec. Tam. also (kañjángórai), meaning white basil, ocimum basilicum, linn. [fragrant toolsy, white toolsy]; cf. sankhvel. Greek μελισσο-φύλλον, μελιτταίνα. Title otherwise Arabian balm, Balm mint, Citrago, Mecca toolsy. Botanically Melissa officinalis, linn., labiatæ [vricsham, 103]. Perennial deciduous creeper ligneous or herbaceous, 1 foot high; leaves ovate-acute, serrated; whorls halved, subsessile; bracts oblong, stalked; flowers white, flowering in june and october; originally brought from arabia; flower white or pale yellow; employed as a tea [q.v.] and diluent in fevers; expectorant, febrifuge, stomachic.——*Rama toolsy* (रामतुलसी - rámatulasí, San.; रामतुळशी - rámatulashí, Mahr.; فرنجمشک - faranjmishk, Ar.; پلنگمشک - palangmishk, Pers.; رام تلسی - rámtulsí, Hind. and Dec.; ರಾಮತುಳಸಿ - rámatulasi, Can.; రామతులసి - rámatulasi, Tel.; കാട്ടുതൃത്താവ് - káttutrittávu, Mal.; எலுமிச்சந்துளசி - elumiççandulasi, Tam.). Title from sanscrit. San. from (ráma, san. white + tulasí, san. holy basil, ocimum sanctum, linn.), from ash-colored stems. Mahr. from sanscrit. Ar. from (faranj, ar. frank + mishk, ar. musk). Pers. from arabic. Hind. from (rám, hind. rama + tulsí, hind. holy basil) [persian toolsy]. Can. and Tel. from sanscrit. Mal. from (kátu, mal. forest + trittávu, mal. holy basil). Tam. from (elumiççai, tam. lemon tree, citrus medica, linn., var. acida, brandis + tulasí, san. holy basil); from fragrance. San. also (arjaka), meaning procuring. Tel. also (nimmatulasi), meaning lime + toolsy plant. Mal. also (rámatulasi). Tam. also (perundulasi), meaning big + holy basil. Title otherwise Frank musk, Garden clove, Large basil, Lemon basil, Shrubby basil. Botanically Ocimum [toolsy] gratissimum, linn., labiatæ [vricsham, 103]. Alias Ocimum frutescens, petiolare, zeylanicum. Stem rather glabrous; leaves petioled, ovate-acute, crenated or coarsely toothed, narrowed at the base, glabrous or pubescent along the veins; floral leaves like bracts, lanceolate-acuminate, hastate at the base; racemes simple or slightly branched, pubescent; calyx pedicelled; lateral teeth minute, upper united into a bimucronate tip; corolla scarcely longer than the calyx; stamens exserted; flowers white or pale-yellow; common in gardens, flowering all the year. Leaves have a remarkably grateful lemon [q.v.] odour and taste, and are a cooling remedy in gonorrhœa; a decoction of seeds is demulcent; gives to pharm. seeds, non-officinal. Leaves made into chutney [q.v.].——*Rough toolsy* (अर्जक - arjaka, San.; తెల్లగగ్గెర - tellagaggera, Tel.; குழிமிட்டான் - kuzhimittán, Tam.). Title from villose leaf. San. from (arj, san. to procure); from being useful and medicinal. Tel. from (tella, tel. white + gaggera, tel. holy basil, ocimum sanctum, linn.). Tam. from (kuzhisi, tam. pot + vidu, tam. to set), as growing in pot. Title otherwise Rough basil. Botanically Ocimum [toolsy] sanctum, linn., var. hirsuta, labiatæ [vricsham, 103]. Alias Ocimum villosum. Aromatic small herb, clothed with white or pale green hairs; leaves ovate, oblong, crenate, serrate, obtuse, from 1 to 2 inches long.——*Seed toolsy* (मुण्डितिका - munditiká, San.; मुंडी - mundí, Mahr.; कळंचो - kalanchó, Conc.; كمازريوس - kamázariyús, Ar.; كمادريوس - kamádariyús, Pers.; منڈی - mundí, Hind.; مونڈی - múndí, Dec.; ಕರಂಡೆ - karande, Can. and Too.; బోడతరము - bódataramu, Tel.; അടക്കമണിയൻ - atakkamaniyan, Mal.; මුඩමහන - mudamahana, Singh.; கொட்டைக்கரந்தை - kottaikkarandai, Tam.). Title from officinal part. San. from (mund, san. to shave). Mahr. from sanscrit. Ar. from greek. Pers. from arabic. Hind. and Dec. from sanscrit. Can. from (karandai, tam. fragrant toolsy). Mal. from (atakka, mal. areca nut + mani, mal. grain); from sub-globular flowers. Singh. from (muda, singh. bald + mahana, singh. ascetic); perhaps from the globular flowers. Tam. from (kottai, tam. seed + karandai, tam. sweet basil, ocimum basilicum, linn.). Ar. also (tukhn) [tinay]. Pers. also (zakhmihayát), meaning life wound. Hind. also (mundíbutí), meaning the globe-thistle herb. Can. also (múdugattina); (bódukodale). Tel. also (bódasaramu). Mal. also (minánkanni), meaning fish eye. Singh. also (atmudamahana). Tam. also (vittunukkarandai), meaning vishnoo + sweet basil, ocimum basilicum, linn.; (tirilóki), meaning indran, a valuable plant; (kódálakkarandai), meaning axe-like basil, from being a curative. Title otherwise Bald ascetic, Fish eye, Indian globe-thistle, Vishnoo caranday. Botanically Sphæranthus [moondy] indicus, linn., compositæ [vricsham, 74]. Alias Sphæranthus africanus, hirtus, mollis. Annual, winged; leaves sessile, decurrent, long-obovate, bristly-serrated, downy and glutinous; heads of flowers solitary, leaf-opposed or terminal; peduncles winged; flowers rose-colored or purple; common in rice-fields, flowering nearly all the year; the whole plant is remarkably fragrant. Small oblong seeds brown, with delicate whitish bristles are anthelmintic, prescribed in powder; powder of root stomachic; bark ground small and mixed with whey a remedy for piles. There is a Tamul proverb:—விடாச்சுரத்துக்கு விஷ்ணுகரந்தை—"vishnoo caranday is a specific "remedy for continued fever."——*Upland toolsy* (మెట్టతులసి - mettatulasi, Tel.). Same as Wild toolsy.——*White toolsy* (विश्वतुलसी - vishvatulasí, San.; بادروج ابیض - bádrújiabyaz, Ar.; ریحان کوهی - raihánikohí, Pers.; سفید تلسی - sufedtulsí, Hind.; ککا تلسی - kukkátulsí, Dec.; ನಾಯಿತುಳಸಿ - náyitulasi, Can.; కుక్కతులసి - kukkatulasi, Tel.; നാക്കണ്ണി - nákkanni, Mal.; හින්තලා - hintalá, Singh.; கஞ்சாங்கோரை - kañjángórai, Tam.). Title from leaf. San. from (vishva, san. world + tulasí, san. holy basil, ocimum sanctum, linn.). Ar. from (bádrúj, ar. wild basil + abyaz, ar. white). Pers. from (raihán, pers. sweet basil, ocimum basilicum, linn. + koh, pers. mountain). Hind. from (sufed, hind. white + tulasi, san. basil). Dec. from teloogoo. Can. from (náyi, can. dog + tulasí, san. holy basil). Tel. from (kukka, tel. dog + tulasí, san. holy basil). Mal. from (náya, mal. dog + kan, mal. eye). Tam. from (kañjá, tam. plant, cannabis sativa, linn. + kórai, tam. the plant, cyperus rotundus, linn.) [fragrant toolsy, persian toolsy]; cf. sankhvel. San. also (arjaka), meaning procuring. Pers. also (turrahi khurásání), meaning khorassan basil. Hind. also (janglítulsí), meaning wild basil; (bábú); (kálátulsí), meaning black toolsy. Tel. also (krishnatulasi), meaning black + toolsy plant. Tam. also (náyttulasi), meaning dog + holy basil; (tulasi). Title otherwise Hoary basil, White basil. Botanically Ocimum [toolsy] canum, sims., labiatæ [vricsham, 103]. Alias Ocimum album, americanum, stamineum. Stem herbaceous, erect, pubescent; leaves petioled, ovate, removed at both ends, denticulate or entire, rather hoary beneath; petioles ciliated; verticils of the fruit bearing raceme, numerous, approximated; calyx small, a little ciliated; flowers white; common everywhere, flowering at all seasons. Shrub about a foot high, chiefly grown in native gardens; leaves have pleasant aromatic taste and smell. Gives tea [q.v.] like fragrant toolsy [q.v.].——*Wild toolsy* (جنگلی تلسی - janglítulsí, Hind. and Dec.; ಕರಿಕಮ್ಮಗಗ್ಗರಿ - karikammagaggari, Can.; మెట్టతులసి - mettatulasi, Tel.; കാട്ടുതുളസി - káttutulasi, Mal.; காட்டுத்துளசி - káttuttulasi, Tam.). Title from hindostany. Hind. from (jánglí, hind. wild + tulsí, hind. holy basil). Can. from (kari, can. black + kammagaggari, can. holy basil). Tel. from (metta, tel. high land + tulasí, san. holy basil). Mal. from (kátu, mal. forest + tulasí, san. holy basil). Tam. from (kádu, tam. forest + tulasí, san. holy basil, ocimum sanctum, linn.). Can. also (kastúrikammagaggari), meaning musk + basil; (kádutulasi), meaning wild + ocimum. Tel. also (lakshmitulasi), meaning lutchmy the goddess + ocimum. Title otherwise Upland toolsy, Wild basil. Botanically Ocimum [toolsy] adscendens, willd., labiatæ [vricsham, 103]. Alias Ocimum cristatum, indicum; Plectranthus indicus. Stem prostrate; branches pubescent; leaves petioled, ovate-oblong, obtuse, slightly toothed, narrowed at the base, pubescent; floral leaves like bracts, deciduous; racemes simple; calyx in fruit drooping, the tube striated; wings of the upper tooth reaching to the middle of the calyx; lateral teeth truncated, lower very shortly setaceous, acuminated; corolla twice the length of the calyx; stamens much exserted; flowers pale rose; common, flowering in the rains; scentless.

TOOM (తూము - túmu, *Tel.*; தூம் - túmu, *Tam.*).—"*a*" Measure of capacity. The indian Bushel. 4 coonchams = 1 toom; 20 tooms = 1 pootty or candy [alavay, 3 b]. Very variable. In Bellary 2 cubic feet 1,234 cubic inches; in Cuddapah 1 cubic foot 582 cubic inches; in Ganjam 227½ cubic inches; in Godavery 1,120 cubic inches; in Kistna 1 cubic foot 1,632 cubic inches; in Nellore 2 cubic feet 464 cubic inches. Teloogoo people in the south translate mercaul into toom. Same as Cooncham in Ganjam. See vol. I, 609; II, 508, 510, 511, 512, 513, 516, 519.—"*b*" Bazaar weight. 4 addas = 1 toom; 4 tooms = 1 navitey [niray, 2b]. Approximate actual value, 1 toom = 6 lbs. 4 oz. avoir. Ganjam. Same as Dhadiyam or Yettoo. Compare Yeday.

TOOMBAY (தும்பை - tumbai, *Tam.*). Botanically Leucas genus, labiatæ [vricsham, 103]. Herbs or shrubs; natives of tropical asia and africa; flowers white, rarely purple. The species best known to the natives are shown below. Includes also one species of each of the genera:—alhagi, andrographis, anisomeles, dysophylla, impatiens, trichodesma.——*Benares toombay* (காசித்தும்பை - kásittumbai, Tam.). Same as Gool mindie.——*Black toombay* (കരിന്തുമ്പ - karintumba, Mal.). Title from flowers. Same as Malabar catmint.——*Donkey toombay* (چهوٹا کھرفا - chhotákhurfá, Dec.; గువ్వగుత్తి - guvvagutti, Tel.; கழுதைத்தும்பை - kazhuthaittumbai, Tam.). Title from growing in waste places. Dec. from (chhotá, hind. small + khurfá, hind. purslane, portulaca oleracea, linn.). Tel. from (guvva, tel. bird + gutti, tel. cluster). Tam. from (kazhuthai, tam. ass + tumbai, tam. plant, leucas). Title otherwise Indian borage, Small purslane. Botanically Trichodesma indicum, br., boragineæ [vricsham, 92]. Alias Borago indica. Diffuse or erect; stem shortly villous; leaves usually opposite, narrow-lanceolate, half-stem-clasping, sessile; pedicels opposite-flowered or lateral one-flowered; calyx villous, acutely auricled at the base, lobes increased by a subulate point; limb of the corolla spreading, reflexed; flowers pale blue; grown in waste places. Is repute in snake-bites; diuretic; blood purifier; cold infusion of leaves is depurative; in pharm. non-officinal. Ceylon borage is zeylanicum; leaves used as emollient poultice; in pharm. non-officinal.——*Dung toombay* (പിത്തുമ്പ - píttumba, Mal.). Same as Coromandel chiretta.——*Flower toombay* (द्रोणपुष्पी - drónapushpí, San.; تمبا - tumbá, Hind.; ಒಲ್ಲೆತುಂಬೆ - olletumbe, Can.; పులతుమ్మి - púlatummi, Tel.; காசித்தும்பை - kásittumbai,

Tam.). San. from (dróna, san. cup + pushpa, san. flower). Hind. from tamul. Can. from (olle, can. good + tumbe, can. leucas). Tel. from (puvvu, tel. flower + tummi, tel. leucas indica, r. br.); to distinguish from fruit bearing kind. Tam. from (káshí, san. shining, also benares + tumbai, tam. the plant); from shining flowers. Tam. also (péyttumbai), meaning devil + the plant. Botanically Leucas [toombay] linifolia, spreng., labiatæ [vricsham, 103]. Alias Leonurus indicus, lavandulæfolia; Phlomis linifolia, zeylanica. Herbaceous, erect, slightly pubescent or tomentose; leaves oblong-linear, entire or remotely serrated; verticels dense, sub-equal, many-flowered; bracts linear, hoary; calyx elongated above, mouth very oblique, lower teeth very short, upper longest; flowers white; the fresh juice is employed in headache and colds.——*Hill toombay* (மலைத்தும்பை - malaittumbai, Tam.). Tam. from (malai, tam. mountain + tumbai, tam. the plant, leucas, sp.). Tam. also (kavizhttumbai), meaning stooping + the plant. Botanically Leucas [toombay] procumbens, desf., labiatæ [vricsham, 103]. Alias Nepeta indica; Phlomis biflora. Herbaceous; diffuse; leaves ovate-lanceolate, sub-serrate, glabrous; verticils two to six-flowered; bracts minute; calyx tubular, throat equal, teeth lanceolate-subulate, erect; flowers white; flowering nearly all the year.——*Large toombay* (तुंबी - tumbí, Mahr.; పెద్దతుమ్మి - peddatummi, Tel.). Tel. from (pedda, tel. large + tummi, tel. leucas indica, r. br.). Botanically Leucas [toombay] cephalotes, spreng., labiatæ [vricsham, 103]. Alias Leucas capitata; Phlomis cephalotes. Herbaceous; hairy and pubescent; leaves ovate, or oblong, subserrate, green; verticils subsolitary, large, globose, densely many-flowered; bracts ovate-lanceolate, acute, imbricated; calyx striated and subvillous at the apex; mouth oblique, teeth subulate, short; uppermost leaves coming out of the top of the verticel; flowering nearly all the year. Flowers sacred to shiva [q.v.] leaves eaten [keeray]; gives an oil.——*Rough toombay* (तुंबी - tumbí, Mahr.; تمبی کاپتا - tumbíkápattá, Hind.; ತುಂಬೆ - tumbe, Can.; தும்பை - tumbai, Tam.). Title otherwise Bitter leucas. Botanically Leucas [toombay] aspera, spreng., labiatæ [vricsham, 103]. Alias Phlomis aspera, esculenta, plukenetii, wightiana. Herbaceous; hairy and pubescent; leaves oblong or linear, subcrenate, green; verticils dense, equal; bracts oblong-linear or subulate, hairy; calyx smooth at the base, striated at the apex, subincurved, mouth oblique, teeth short; flowers white; flowering nearly all the year. The dried plant, an application for itch and other skin diseases; reputed antidote for snake bites; quoted in pharm. non-officinal; leaves used as greens [keeray].——*Ship toombay* (കപ്പത്തുമ്പ - kappattumba, Mal.). Same as Arabian manna.——*Small toombay* (சண்ணத்தும்பை - shannattumbai, Tam.). Tam. from (shannam, tam. smallness + tumbai, tam. leucas indica, r. br.). Botanically Leucas [toombay] rosmarinifolia, benth., labiatæ [vricsham, 103]. Suffruticose; branches villous with adpressed hairs; leaves sessile, linear, quite entire, scabrously hairy above, white-tomentose or hoary beneath, hispid at the rib; bracts lanceolate-linear; throat of the villous calyx truncated, villous; teeth very short, somewhat spreading; flowering nearly all the year.——*Wild toombay* (కారుతుమ్మి - kárutummi, Tel.). Tel. from (káru, tel. forest + tummi, tel. the plant, leucas indica, r. br.). Botanically Dysophylla cruciata, benth., labiatæ [vricsham, 103]. Alias Dysophylla tetraphylla; Mentha quadrifolia. Hirsute with soft spreading hairs; stems long, procumbent, somewhat simple; leaves in fours, rarely in fives or sixes, lanceolate or sublinear, obtuse, quite entire, revolute at the margin; floral ones lanceolate, nearly equalling the flowers; teeth of the villous calyx rather obtuse, sub-erect.

TOOMBY (தும்பி - tumbi, *Tam.*). Means beetle; from colored markings. The genus Pterois, scorpænidæ, acanthopterygii, teleostei, pisces [matsyam, 7], of naturalists [jantoo]. The species best known to the natives are shown below.——*Black toomby* (රතුගිනිමහා - ratuginimaha, Singh.; கருந்தும்பி - karundumbi, Tam.). Title from dark markings. Singh. means from (ratu, singh. red + ginimaha, singh. pterois volitans). Tam. from (karumai, tam. blackness + tumbi, tam. pterois genus). Pterois [toomby] miles, scorpænidæ, acanthopterygii, teleostei [matsyam, 7], of naturalists. Alias Macrochyrus miles; Pterois geniserra, muricata; Scorpæna miles. Interorbital space convex but not deeply so; scales present in interorbital space and on nape; colors red, with many dark vertical bands much wider than ground-color, in first two-thirds of body ground-color appears like narrow light bands; in last third of body the dark bands are wider apart with from one to three intermediate narrow ones; head banded, bands mostly radiating from eye, two of an S. shape over chest; white spot surrounded by black in axilla; dorsal spines with from five to six dark rings; soft dorsal, caudal, and anal covered with small black spots; pectoral with large black blotches on lighter ground; ventral nearly black, with white and light brown spots; sea; 14 inches in length.——*Flying toomby* (कोंबडा - kómbadá, Mahr.; కోడిపుంజు - kódipundzu, Tel.; പറവ - parava, Mal.; ගිනිමහා - ginimaha, Singh.). Tel. from (kódi, tel. fowl + pundzu, tel. cock). Mal. means flying. Singh. from (gini, singh. fire + maha, singh. fish); from pinky brown color and from dread of its wound. Title otherwise Red fire fish. Pterois [toomby] volitans, scorpænidæ, acanthopterygii, teleostei [matsyam, 7], of naturalists. Alias Gasterosteus volitans; Pseudomonopterus volitans; Scorpæna mahe, volitans. Interorbital space deeply concave, it and nape scaleless, or with very rudimentary scales; traversed by two low ridges; reddish, with vertical brown bands having narrower and lighter intermediate ones; three or four broad ones radiate from eye; one passes over nape, and seven or eight more are present on body, the third and fourth usually coalescing under middle of pectoral fin; black mark in axilla, having pure white spot in centre; dorsal spines annulated with black; soft dorsal, caudal, and anal spotted; pectoral greyish with light-colored spots; ventral slate-colored with white spots; sea.

TOOMMA (తుమ్మ - tumma, *Tel.*). A general name for certain Acacias [babool, cantalam, vail].——*Toomaracote* (తుమ్మరకోట - tummarakóta, Tel.). From (above + ráyi, tel. stone + kóta, tel. fort).—"*a*" Deputy tahsildarry, Kistna district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station, Kistna dist., Pulnaud tal.; pop. 2,048; acres 4,725; lat. 16° 33′; long. 79° 30′; from Dauchepully W. 19 miles; from Guntoor W.N.W. 68 miles; from Madras N.N.W. 243 miles; from Masulipatam W.N.W. 113 miles; from Vinoocondah N.N.W. 38 miles. Fort was surprised in 1793 by a rabble of about one thousand peons [q.v.], who came across from the Nizam's side of the river. They killed the garrison of Company's sepoys [q.v.] and tortured the towns people to make them disclose hidden treasure, but were put to flight by a detachment sent from Vinoocondah. Fine mosque [musjid] and durgah [q.v.].——*Toommalair* (తుమ్మలేరు - tummaléru, Tel.). From (above + éru, tel. river). River; Cuddapah district, Sidhout talook. Rises in Budwail talook. Flows through the north-eastern portion of Sidhout talook and joins the Pennair below the junction of the Saglair near Bookkayapully.——*Toommalapenta* (తుమ్మలపెంట - tummalapenta,* Tel.). From (above + penta, tel. heap). Village, Port; Nellore dist., Cauvaly tal.; pop. 3,271; acres 13,045; lat. 14° 54′; long. 80° 07′; from Cauvaly E. 5 miles; from Chennayapollem S. 6 miles; from Madras N. 125 miles; from Nellore N. 32 miles; from Zoovvaldinney N. 6 miles. Open roadstead. Formerly a salt factory. Vishnoo temple of Keshava permaul in ruins. Large tank [q.v.], six miles long, with bund [q.v.] on both sides. Numerous palmyra [q.v.] trees. Good sport in neighbourhood.

TOOMROO (तुम्बुरु - tumburu, *San.*; تمرو - tumrú, *Hind.*). From (kustumbaru, san. coriander seed); from size and aroma of seeds. Toothache tree. Botanically the Zanthoxylum genus, rutaceæ [vricsham, 32]. Shrubs or trees, often armed with stout prickles; leaves alternate, three-foliolate or unequally pinnate; leaflets opposite or alternate, entire or crenate, often oblique, dotted; flowers small, in axillary or terminal stalked broad or narrow cymes, white pink or greenish; fruit of 1 to 5 globose coriaceous or fleshy one-seeded carpels; seeds blue or black-shining. The species best known to the natives are:—alatum [tejbul], rhetsa [q.v.]. Other s. indian species indigenous or naturalized are:—ovalifolium, tetraspermum.

TOON (तुन्न - tunna, *San.*; تون - tún, *Hind.* and *Dec.*; ತುಂಡು - tundu, *Can.*; ನೊಗೆ - nogé, *Coorg*; నంది - nandi, *Tel.*; ମହଲିମ୍ବୋ - mahalimbo, *Oor.*; അരണ - arana, *Mal.*; தூனுமரம் - túnumaram, *Tam.*). Title from sanskrit through hindostany. San. from (tud, san. to give pain); as eaten by elephants. Hind. from sanscrit. Can. from (tundu, can. short). Tel. from (nandivriksha, san. the tree) [turbith]. Oor. means large neem. Mal. from (arani, san. the tree, producing fire by attrition, premna integrifolia, linn.). Tam. from sanscrit. San. also (nandivriksha), meaning happy tree [adam's apple]; (kubéraka), meaning bad + body; (apíta), meaning not yellow; (kántalaka), meaning eaten by elephants; (patuka); (kachha), meaning destroyed; (kánta), meaning shining; (nandaka), meaning happy one. Hind. also (mahánim), meaning large melia azadirachta, linn. [large neem]. Can. also (kempugandagheri); (suolamura). Coorg also (belandi). Tam. also (shandanavémbu), meaning sandal, santalum album, linn. + neem tree, melia azadirachta, linn. Title otherwise Bastard cedar, Chittagong wood [chickrassy], Happy tree, Indian cedar, Indian mahogany, Moulmein cedar, Sandal neem, Singapore cedar, White cedar. Botanically Cedrela toona, roxb., meliaceæ [vricsham; 36]. Alias Cedrela hexandra, serrata. Specific name from sanscrit. Tree 50 to 60 feet; trunk quite erect; bark smooth and grey; branches numerous, forming a large shady head; leaves abruptly pinnate; leaflets six to twelve pairs, ovate-lanceolate, acuminated, slightly undulated on the margins, quite entire or slightly and distinctly toothed, glabrous; calyx small, five cleft; petals five, ciliated; panicles drooping, terminal; capsule oblong, five celled; dehiscent. Flowers very numerous, small, white and possessing a fragrance like fresh honey [shahad]; prevalent in south canara. Bark powerfully astringent in medicine; though not bitter is a fair substitute for peruvian bark [koinah], particularly when united with powdered bonduc [q.v.] nut. The bark contains a resinous matter, a brown astringent true gum [gond], and a gummy brown extractive matter resembling ulmine. Seeds used to feed cattle. Good avenue [shaulay] tree; flower yields a red and a yellow dye [shauyam] used for dyeing cotton [q.v.]. The timber is like a poor mahogany; brick-red, soft, shining, even

but open-grained, fragrant, seasons readily, does not split nor warp; annual rings distinctly marked by a belt of large and numerous pores; durable not eaten by white-ants [q.v.]; valued and universally used for furniture of all kinds, door panels and carving; often sold in madras under the general name of chittagong wood [q.v.]; it is the most valuable of the woods known by that commercial name. No other common species here.

TOOND (తుండు - tundu, *Tel.*; துண்டு - tundu, *Tam.*). From (tundi, tam. to cut). A piece of anything.——*Toondam* (துண்டம் - tundam, Tam.). From (tunu, tam. to cut). Section; a small channel.——*Toondchit* (துண்டுச்சீட்டு - tunduççittu, Tam.). From (above + shittu, tam. note). A small note [chit].——*Toond irsaul* (துண்டிர்சால் - tundirsál, Tam.). From (above + irsál, hind. remittance). A remittance made frequently.——*Toondoorauram* (துண்டுவாரம் - tunduváram, Tam.). From (above + vára, san. quantity). The share of the landlord from lands cultivated by temporary cultivators [mailvauram].——*Toony* (తుని - tuni, Tel.). See sep. title.

TOONGA (తుంగ - tunga, *Tel.*). Same as Common sedge.——*Round toonga* (గుండతుంగ - gundatunga, Tel.). Same as Club grass.

TOONGABUDRA (تمبدرا - tumbadrá, *Hind.*; తుంగభద్ర - tungabhadra,* *Tel.*). From (tungá, san. river so named meaning high or excellent + bhadrá, san. river so named, meaning auspicious). River; Bellary and Kurnool districts. Formed by the junction of the Toonga and Bhadra. Both rise near the south-west frontier of Mysore, on the eastern slopes of the high range of hills bordering South canara. Their junction takes place in lat. 14° north, and long. 75° 42′ east, in Mysore, in front of the Bramin village of Coodaly in Shimoga district. The united stream, flowing north and north-east, forms the northern boundary of Bellary district and of Madras presidency. Shortly after receiving the Hagary in Bellary district, it becomes the boundary between Kurnool district and the Doab. It then runs due east to Kurnool where it unites with the Hindry, and winding northward, and thereby becoming particularly holy, joins the Kistna at Coodaly sangam, 16 miles N.N.E. of Kurnool, in lat. 15° 58′; long. 78° 18′. Total length, 400 miles. Chief tributaries on the left bank are the Coomadvaty and the Wurdah, both rising in the north of Mysore and traversing the southern portion of Dharwar district; and on the right bank, the Hagary in Bellary and the Hindry in Kurnool. Though running low during the hot weather, in the south-west monsoon or from June to October the river is over half a mile in breadth, with a depth of from 15 to 25 feet. Timber is then floated down it from the western forests. The stream is rapid, but is fordable from the end of December to the end of May, when it becomes clear and is then 300 yards in breadth and little more than knee deep. When not fordable, it is crossed by means of basket boats. The boats are generally from 6 to 11 feet in diameter. The bed consists of sand and pebbles, and opposite Kurnool it is very rocky. The average fall of the river is one foot and-a-half per mile. Its water is to a considerable extent used for irrigation. The Vijianugger kings built seven gigantic dams across the river to the east and west of Anagoondy. From these dams irrigation canals are led along both sides of the river. In 1860 an anicut was thrown across the river by the Irrigation canal company at Soonkesala. The river abounds in crocodiles [mugger], and it is reputed to have the sweetest water in India. There is a Teloogoo proverb:—గంగా స్నానం తుంగా పానం—"bathe in the ganges and drink in the "toonga." The chief towns on the banks of the river are:—Hurrihur in Mysore; Humpasaugar, Hospett, Humpy, Ramporam, and Cumply, in Bellary district; and Kurnool. At Hurrihur it is crossed by a fine bridge of stone and bricks, constructed in 1868, and by the Railway bridge recently constructed. The Madras railway crosses it at Rampore in Bellary by a bridge built on 52 piers. The Southern mahratta railway crosses it by a bridge at Hosoor in Hospett talook.

TOONY (తుని - tuni, *Tel.*). From (tuniya, tel. piece) [toond].——(1) Division, Godavery. Area 320 square miles. Population 81,601. Language Teloogoo. E. coast of district. Bounded:—north by Golcondah talook, Vizagapatam district; east by Sarwasiddhy talook, Vizagapatam district; south by Bay of Bengal and Pittapore division; west by Peddapore talook. The northern side contains forests and hills. The chief of the hills are Naugal hill, Totapully hill and Penoocondah hill. Soil red loamy but of indifferent quality mixed with gravel in some places. Agriculture the chief occupation of the people. Preparation of jaggery and manufacture of jewellery [nagay, zewar] give employment to many. All sorts of grains, jaggery [q.v.], tamarind [q.v.], honey [shahad], skins [chamrah], &c., are brought for sale to Toony market. These are exported to Vizagapatam district, Rajhamundry and Cocanada by bandies [q.v.]. Irrigated by spring channels [q.v.], jungle streams, and tanks [q.v.]. Camping grounds:—Annavaram and Toony. Zemindarry:—Cottaum. Places of archæological interest:—Bendapoody, Narendraputnam, Naumagherry. Principal trig. station:—Cuppacondah, Goondaulamma, Lutchmeepooram, Naugaula. The leading places, &c., in the division are the following.——*Annavaram aurempoody* (అన్నవరమారెంపూడి - annavaramárempúdi, Tel.). From two villages clubbed. Mokhausa village, Camping ground, Proprietor's choultry, Travellers' bungalow; pop. 2,854; lat. 17° 17′; long. 82° 27′; from Cocanada N.N.E. 26 miles; from Toony W.S.W. 10 miles. Pampauty river irrigates.——*Cottaum* (కొట్టము - kottámu, Tel.). Means a shed. Zemindarry village; pop. 1,534; lat. 17° 27′; long. 82° 30′; from Cocanada N.N.E. 38 miles; from Toony N.W. 9 miles. Peshcush Rs. 26,422.——*Cuppacondah* (కప్పకొండ - kappakonda, Tel.). From (kappa, tel. frog + konda, tel. hill). Trig. station; lat. 17° 20′ 09·18″; long. 82° 31′ 03·46″; height 1,102 feet; from Cottore S.W. 1¾ miles.——*Goondaulamma* (గుండాలమ్మ - gundálamma, Tel.). From (gundamu, tel. deep gorge + amma, tel. mother). Trig. station; lat. 17° 31′ 30·04″; long. 82° 21′ 51·74″; height 2,671 feet; from Lododdy N.E. 2 miles.——*Lutchmeepooram* (లక్ష్మీపురము - lakshmípuramu, Tel.). From (lakshmí, san. the goddess + pura, san. town). Trig. station; lat. 17° 00′ 13·56″; long. 81° 37′ 09·27″; height 332 feet; from Hamsavaram W.S.W. 63 miles.——*Naugaula* (నాగాల - nágála, Tel.). From (nága, san. snake). Trig. station; lat. 17° 21′ 31·03″; long. 82° 13′ 13·87″; height 1,657 feet; from Simsore N. 1¾ miles.——*Toony* (తుని - tuni, Tel.). See below.——*Totapully* (తోటపల్లె - tótapalle, Tel.). From (tóta, tel. garden + palle, tel. village). Zemindarry village; pop. 112; lat. of village 17° 18′; long. 82° 20′; from Cocanada N. 25 miles; from Toony W.S.W. 17 miles. The estates of Totapully and Jaddangy were formerly held under the Zemindar of Peddapore, on whose behalf they were bound to provide an armed force to repel incursions from the hills.——(2) Deputy tahsildarry, Godavery district. Pay Rs. 100.——(3) Village; Godavery dist., Toony division; pop. 7,773 including Toonypetts, Veeravaram and Toony proper; lat. 17° 21′; long. 82° 35′; from Cocanada N.E. 34 miles; from Coonavaram E.S.E. 84 miles; from Ellore E.N.E. 104 miles; from Madras N.N.E. 325 miles; from Narsapore N.E. 82 miles; from Rajahmundry E.N.E. 56 miles. Principal market for transport of goods to Vizagapatam.

TOONY (തൂണി - túni, *Mal.*). From (dróna, san. a measure).—"*a*" A hollow piece of bamboo [q.v.] used as measure of grain. 6 nauzhies = 1 toony [alavay, 3d]. Approximate actual value, 1 toony = 170¼ cubic inches. It is a measure of seed sufficient to sow 100 yards of rice field and contains 86,400 seed grains. Same as Cootty.—"*b*" Measure of capacity. 2 pathakks = 1 toony; 3 toonies = 1 calam [alavay, 3a]. Varies with the mercaul.

TOOR (تور - tuvvar, *Dec.*). From (tuvarí, san.). Same as Dholl [common dholl].——*Tora* (തോര - tóra, Mal.). From (tuvara, san. dholl plant). A linear measure indicating the space occupied by such a seed. 8 yenmanies = 1 tora; 8 toras = 1 viral [alavay, 1d]. Approximate actual value, 1 tora = ·09375 inch. Same as San. yavam, Hind. jow, Can. yavey, Tam. nel.

TOORANJ (துரிஞ்சி - turiñji, *Tam.*). From persian. Same as Citron.

TOORAY (துறை - turai, *Tam.*). A kind of Tamul verse. It consists of four lines, each of five feet, and always takes ஏ at its close. The grammar [lacshanam] Caurigay, treating of poetry, is in this metre.

TOORINJIL (துரிஞ்சில் - turiñjil, *Tam.*). From (turu, tam. to be thick); from dense foliage. Same as Dark sirissa.——*Toorinjalaur* (துரிஞ்சலாறு - turiñjaláru, Tam.). From (above + áru, tam. river). River; South arcot dist., Trinomallee and Tricalore tals. Jungle stream. Rises in a hill in Trinomallee talook and joins the Ponniaur at Manampoondy in Tricalore talook. Has water even in hot weather, as there are good springs. Shiva temple on western band at Velancoolam.

TOORSY (துருசி - turusi, *Tam.*). From (turu, tam. rust). Sulphate of copper [toottam].

TOORTOORY (تُرتُری - turturí, *Hind.*; తుతార - tutára, *Tel.*). Imitative. A kind of trumpet [sangeetam].

TOORTY (துருத்தி - turutti, *Tam.*). From (driti, san. a leather bag). Bagpipe. This comprises the entire skin [chamrah] of a sheep [aud] or goat [velland], freed of hair, and having all the openings closed, excepting two pipes of reed, one of which is inserted in the neck, and the other at one of the extremities; one is to blow with, and the other through which the air issues, produces a low, moaning sound [magady, jeenboorra].

TOORVOO (துரவு - turavu, *Tam.*). From (tura, tam. to dig). An unwalled well [doroovoo].

TOOTH-BRUSH TREE (पीलु - pílu, *San.* and *Mahr.*; درخت مسواک - darakhtimiswák, *Pers.*; اراكجبلی - arákijabalí, *Ar.*; چهوٹاپیلو - chhotápílú, *Hind.* and *Dec.*; ಗೋಣಿಮರ - gónimara, *Can.*; వరగోగు - varagógu, *Tel.*; களர்வா - kalarvá, *Tam.*). Title from use. San. from (pil, san. to check), medicinal; cf. coomby. Ar. from (arák, ar. the tooth-brush tree + jabal, ar. hill). Pers. from (darakht, pers. tree + miswák, pers.

tooth brush). Hind. from (chhotá, hind. small + pílú, san. the tree + jhár, hind. tree). Can. from (góni, can. sack + mara, can. tree). Tel. from (vara, san. superior + gógu, tel. the hemp plant, hibiscus cannabinus, linn.). Tam. from (kalar, tam. brackish soil), from habitat. San. also (gauli), meaning white, from wood. Hind. also (pílú), from sanscrit. Tel. also (chinnavaragógu), meaning small + the plant; (pinnavaragógu), meaning small + the plant; (gónechettu), meaning gunny bag + plant. Tam. also (shirugalarvá), meaning small + the tree; (ubá); (ugá), meaning to please, from the leaf; (kárgolmaram), meaning sea-side tree. Title otherwise Kikuel oil plant [curry leaf tree], Mahomedan tooth brush tree, Mustard tree, Sack tree, Small calarvah. Giving Oogah fruit. Mustard seed of scripture. Botanically Salvadora persica, linn., salvadoraceæ [vricsham, 86]. Alias Cissus arborea; Embelia burmanni, grossularia; Pella ribesioides; Rivina paniculata; Salvadora indica, wightiana. Small thick-stemmed, soft-wooded tree; trunk generally crooked from eight to ten feet high to the branches, and one foot in diameter; bark deeply cracked; branches numerous, spreading, pendulous at their extremities; leaves opposite, petioled, oval or oblong, entire, very smooth, shining on both surfaces, veinless; panicles terminal, and from the exterior axils; flowers small, numerous, greenish yellow; berry minute, smooth, red, juicy, one-seeded; calyx four-toothed, corolla one-petalled. Flowering and fruiting nearly all year; common in low lands particularly in salt soil. The root-bark when fresh is of a light brown color and nearly smooth, studded with scabrous corky warts, either single or arranged in transversely extended patches; the substance and inner surface of the bark is white and soft; fracture short; odour like cress; taste warm and pungent. Fruits are medicinally deobstruent, carminative and diuretic; leaves used in poultice to relieve pain of tumours, piles, &c.; wood used as a tooth brush to strengthen the gums; the bark used in decoction in low fever, tonic and stimulant; bruised bark of the root vesicant; in snake-bites, seeds administered internally, purgative; gives to pharm. leaves, bark, and fruit, non-officinal. Berries have aromatic smell and taste, not unlike garden cress [haleem]; shoots and leaves are pungent, eaten as salad and given as fodder to camels. Gives an oil [yennay]. Wood white and soft. The small branches and roots of other plants especially those with colorless sap are used as tooth brushes by Hindoos. The following are in general use:—Acacia catechu [catechu]; Achyranthes aspera [indian burr]; Ægle marmelos [bael]; Albizzia lebbek [sirissa]; Anthocephalus cadamba [cadamba]; Butea frondosa [palaus]; Calotropis gigantea [yercum]; Feronia elephantum [wood-apple]; Mangifera indica [mango]; Wrightia tinctoria [paulâ indigo]; Zizyphus jujuba [bair].——*Large tooth-brush tree* (पीलु - pílu, Mahr.; اراك برى - arákibarrí, Ar.; درخت مسواك - darakhtimiswák, Pers.; بڑا پیلو - barápílú, Hind.; پیلو کا جھاڑ - pílúkájhár, Dec.; పెద్దవరగోగు - peddavaragógu, Tel.; பெருகளர்வா - perugalarvá, Tam.). Ar. from (arák, ar. tooth-brush tree, salvadora persica, linn. + barr, ar. forest). Pers. from (darakht, pers. tree + miswák, pers. tooth brush). Hind. from (bará, hind. large + pílu, san. tooth-brush tree, salvadora persica, linn.). Dec. from (pílu, san. tooth-brush tree, salvadora persica, linn. + jhár, hind. tree). Tel. from (pedda, tel. large + varagógu, tel. the plant, salvadora persica, linn.). Tam. from (pérumai, tam. greatness + kalarvá, tam. the plant, salvadora persica, linn.). San. also (rasana), meaning tongue, applies to the leaves. Tam. also (kárgolmaram), meaning sea-side tree. Title otherwise Calarvah, Miswauk. Botanically Salvadora oleoides, dcne., salvadoraceæ [vricsham, 16]. Alias Salvadora indica. Tree; leaves broad, ovate oval, obtuse, glabrous; panicles terminal and axillary, diffuse; flowers longish-pedicelled; bracts somewhat persistent; berry about twice the length of the clayx, red, embraced by the withering corolla; flowers white; common everywhere, in low damp ground. Oil [yennay] expressed from seeds is a bright green fat of the consistence of butter; in bazaar much adulterated. Oil is medicinally stimulant; root-bark is vesicant; both in pharm. non-officinal. Fruit dried for future use, and has then appearance and flavor of currants; leaves serve as fodder for camels [ottagam]. Galls used as mordant [cauram]. Wood light-red, moderately hard, with small, irregular, purple heart-wood.

TOOTROO (توترو - totrú, *Hind.*). Imitative. Turtle doves. Turturinæ, columbidæ [capotam], gemitores, aves [paeshy, 29], of naturalists [jantoo]. The species best known to the natives are shown below.——*Common dove* (होला - hólá, Mahr.; فاختہ - fákhtah, Ar., Pers., Hind. and Dec.; చిట్టిబెల్లగువ్వ - chittibellaguvva, Tel.; தவிட்டுப்புறா - tavittuppurá, Tam.). Ar. from (fakhtu, ar. light of the new moon), from its color. Tel. from (chiru, tel. small + bellaguvva, tel. dove). Tam. from (tavidu, tam. bran + purá, tam. pigeon); from pale color. Ar. also (urfiyah). Pers. also (kúkú), from its call. Hind. also (tutrúfákhtah). Tel. also (tavatiguvva), meaning bran + dove; from color. Turtur cambayensis. Alias Turtur maculicollis, senegalensis. Above brown; head and upper part of neck pinkish vinaceous; wing-coverts, except towards scapulars, pure light grey; winglet, primaries, and their coverts, dusky; secondaries tinged grey; tail with middle feathers brown; others black at base, white for nearly their terminal half; beneath neck and breast pinkish vinaceous, paling below, passing to white on belly and lower tail-coverts; sides of neck with patch on each side, nearly meeting, black at base, rufous tipped, black hardly apparent except when neck is stretched; bill blackish; irides dark brown, with whitish inner circle; legs lake red; length 10½ inches; tail graduated to upwards of an inch, and feathers slightly narrowed towards their tips; abundant in low bushy jungles; its coo is a dissyllabic sound, repeated four or five times successively.——*Ring dove* (قمری - kumrí, Ar., Pers., Hind. and Dec.; పెద్దబెల్లగువ్వ - peddabellaguvva, Tel.; മണിപ്രാവു - maniprávu, Mal.; மணிப்புறா - manippurá, Tam.). Title from black collar. Ar. from (akmar, ar. dusky white). Tel. from (pedda, tel. large + bellaguvva, tel. dove). Mal. from tamul. Tam. from (mani, tam. blackness + purá, tam. pigeon); from black collar. Male bird is:—Ar. (sákihurr), from cry of young one. Pers. also (kúkú), from cry. Hind. also (dhorfákhtah), meaning squint-eyed dove. Beng. also (halhak); (**kahalaki**); (pankghughu). Turtur risoria. Head delicate pale vinous-grey, whitish on forehead; nape vinaceous; narrow black collar on nape set off with whitish above, slightly so below; upper plumage uniform light grey-brown; edge of wing pure ashy; primaries dusky, slight whitish margins bordering their tips; middle tail feathers uniform with back above; lateral feathers marked black about middle, passing to greyish on basal half, and to white on terminal, these successively more pronounced externally; beneath very pale vinaceous, whitish on throat, passing to light greyish towards vent, lower tail-coverts pure ashy; wings underneath greyish-white; bill black; irides crimson; orbitar skin whitish; feet dark pink-red; length 13 inches; common in neighbourhood of cultivation; the coo may be expressed by kookookoo, kookookoo.——*Spotted dove* (چیتل فاختہ - chítalfákhtah, Hind.; పొడబెల్లగువ్వ - podabellaguvva, Tel.; പുള്ളിപ്രാവു - pulliprávu, Mal.; புள்ளிப்புறா - pulippurá, Tam.). Hind. from (chítal, hind. spotted deer + fákhtah, hind. dove). Tel. from (poda, tel. spot + bellaguvva, tel. dove). Mal. from (pulli, mal. spotted + práva, mal. pigeon). Tam. from (puli, tam. tiger + purá, tam. pigeon). Hind. also (kangskiri); (chitta), meaning spotted deer; (chitrúfákhtah), meaning leopard dove. Mal. also (puliprávu), meaning tiger pigeon. Beng. also (chavalghughu); (teliaghughu). Turtur suratensis. Alias Turtur ceylonensis, tigrina. Head pale vinaceous, greyish on forehead; upper parts generally dusky, each feather with two pale rufous isabelline terminal spots, enlarging and spreading up each side of feather upon wing-coverts, blackish contracting to central streak, having broad pale vinaceous lateral borders; edge of wing, with some nearest coverts, light grey; tail with central feather brown; outermost ones black at base, white for terminal half, others intermediate in coloring; lower parts pale vinaceous, more or less albescent on throat, passing to white on vent and lower tail-coverts; bill dull leaden-black; irides dark hazel, surrounded by reddish sclerotic; legs dark purplish red; length about 12 inches; nearly as familiar as common dove, entering gardens, feeding on roads, near houses; the coo is something like oot-raow-oo—oot-raow-oo.

TOOTTAM (तुत्थ - tutt'ha, *San.*; துத்தம் - tuttam, *Tam.*). From (tud, san. to pain). Vitriol, or glass-like oil.——*Madal toottam* (دستہ - dastah, Hind.; மடற்றுத்தம் - madattoottam, Tam.). Title and Tam. from (madal, tam. leaf + above), from scaly appearance in ore. Cadmia of Pliny. Calamine, so called from having reedy appearance when melted. Otherwise Carbonate of zinc, Zinc spar. Carbonas zinci impurus of chemists. Used as astringent lotion to ulcers, &c.——*Mayil toottam* (तुत्थाञ्जन - tutt'háñjana, San.; زاج اخضر - zájiakhzar, Ar.; زاك سبز - zákisabz, Pers.; نیلا تھو تھا - níláthúthá, Hind.; مھورتتہ - mhortuttah, Dec.; ترسی - tursí, Malay; ಮೈಲ್ತುತ್ತ - mailtutta, Can.; మయిలుతుత్తము - mayilututtamu, Tel.; തുരിശു - turishu, Mal.; පල්මාණික්කම් - palmánikkam, Singh.; மயிற்றுத்தம் - mayittuttam, Tam.). Title from tamul. San. from (tutt'ha, san vitriol + añjana, san ointment). Ar. from (záj, ar. copperas + akhzar, ar. blue). Pers. from (zák, pers. copperas + sabz, pers. green). Hind. from (nílá, hind. blue + thúthá, hind. vitriol). Dec. from (mhor, hind. peacock + tuttah, hind. vitriol). Can. and Tel. from tamul. Mal. from (turuvu, mal. rust). Tam. from (mayil, tam. peacock + tutt'ha, san. blue vitriol), from color. Ar. also (kalkand). Mal. also (mayiltuttam). Tam. also (turisu), meaning rust. Copperas. Otherwise Sulphate of copper, Blue stone, Blue vitriol, Cyprian vitriol, Roman vitriol. Cupri sulphas, Cuprum vitriolátum, Vitroleum. Appears in crystalline masses of an elegant sapphire blue color, hard, compact, and semi-transparent; when perfectly crystallised, of a flattish rhomboidal, decahedral figure; taste nauseous. Procurable in most bazaars; should be without any light-green or whitish powder adherent on the surface; not known to occur in nature, but is largely made in s. india from copper [táumram] ore by pulverising the ore, which is then thrown into earthen vessels filled with water, and after filtration the crystals form. In large doses is an irritant poison; chronic poisoning may occur from the use of copper vessels in preparing food; in medicinal doses sulphate of copper is astringent, and in sufficient quantity emetic; externally it is escharotic, and is also used in solution as a lotion or collyrium. In veterinary practice, as tonic in drachm doses daily;

as caustic either in powder or in solution. Applied in solution to floors and matting to check or prevent the attacks of white-ants [q.v.]; used in leather-dyeing [shauyam] along with lime [choonam] to produce a light blue. Green copperas is sulphate of iron [annabhaidy]. White copperas is sulphate of zinc [vellay toottam]. For the sub-acetate of copper see Zangaur.——*Tootnaug* (नाग - nága, San.; तुत्तिनाग - tuttinága, Mahr.; جست - jast, Hind.; جس - jas, Dec.; تمباگ پوتيه - támbagaputih, Malay; ಸತ್ತು - sattu, Can.; తుత్తినాగము - tuttinágamu, Tel.; നാഗം - nágam, Mal.; துத்துநாகம் - tuttunágam, Tam.). Title from tamul. San. from (naga, san. mountain). Mahr. from (tutt'ha, san. blue vitriol + nága, san. lead). Malay from (támbaga, malay, copper + putih, malay, white). Tel. from (tutt'ha, san. blue vitriol + nága, san. lead). Mal. from sanscrit. Tam. from (tutt'ha, san. blue vitriol + nága, san. lead), from bluish grey color. San. also (yashada), meaning bright. Zinc. Zincum of chemists. Bluish-white metal which slowly tarnishes in the air, forming a film of oxide which prevents further oxidation; malleable, and when rubbed with the fingers emits a peculiar smell. Zinc, oxidized in the ore, is called calamine [madal toottam]; its constituent parts are varying proportions of oxide of zinc and carbonic acid [kary poolipp]. Zinc has been discovered in southern districts combined with sulphur [gandhac] and iron [auhan], forming what is called blende; the greater part however is brought from cochin-china, or china, where both the calamine and blende are common; it is from the last, or the sulphuret, that this metal is usually obtained for commerce, and it is then called spelter; the metal may be procured pure by dissolving this zinc of commerce in diluted sulphuric acid [tezaub], and immersing a plate of zinc for some hours in the solution, which is then filtered and decomposed by carbonate of potassa, and the precipitate ignited with charcoal [adoopp kary] in an iron pot. Pharm. has various and well known articles. Used in the arts chiefly in the fabrication of brass [pittalay] and other gold-colored mixtures, and in making bronze, by fusing together tin [tagaram], copper [taumram], and zinc; it is now applied to many of the purposes for which copper was formerly used; oxide of zinc is a substitute for white lead, as a pigment not liable to change and not subject to those deleterious consequences so frequently attendant on preparations of lead [eeyam]; gold [pon], silver [velly], platina [goorootwam], and nickel, are rendered brittle by it, but with bismuth and lead it enters into no combination in fusing; of all known bodies, except manganese [q.v.], zinc unites the most readily with oxygen, hence it acts very rapidly on acids [tezaub]. For white vitriol or sulphate of zinc see Vellaytoottam.——*Tootnaug paspam* (नागभस्म - nágabhasma, San.; دستا - dastá, Hind.; جس - jas, Dec.; ಸತ್ತುಭಸ್ಮ - sattubhasma, Can.; తుత్తినాగభస్మము - tuttinágabhasmamu, Tel.; നാഗഭസ്മം - nágabhasmam, Mal.; துத்துநாகப்பற்பம் - tuttunágapparbam, Tam.). Title and Tam. from (tuttunágam, tam. zinc + bhasma, san. ashes). Latin, lana philosophica. Flowers of zinc. Native preparation is as follows:—Zinc is fused in an earthern pot, green leaves of the Euphorbia nereifolia [leafy milk-hedge] being thrown into the melted mass, which is constantly stirred with an iron spoon; it inflames in the usual manner, leaving ashes, which are kept in the fire till they acquire a fine white color; only finest parts of these are preserved for medical use, and are separated from the rest by sifting through a piece of fine muslin [q.v.]. Tootnaug paspam is employed by veidyans [q.v.] in gonorrhœa, &c.——*Vellay toottam* (سفيد توتا - sufedtútah, Hind.; سفيد تتہ - sufedtuttah, Dec.; ಬಿಳಿತುತ್ತ - bilítuttá, Can.; పాలతుత్తము - pálatuttamu, Tel.; പാൽതുത്തം - páltutt'ham, Mal.; வெள்ளைத்துத்தம் - vellaittuttam, Tam.). Title and Tam. from (vellai, tam. white + tutt'ha, san. blue vitriol), from color. Hind. from (sufed, hind. white + tútah, hind. vitriol). Dec. from hindostany. Mal. from (pál, mal. milk + tut'ha, san. vitriol). Tam. also (páttuttam), meaning milk white vitriol. Sulphate of zinc. Otherwise White vitriol. Zinci sulphas of chemists. A salt formed by the union of sulphuric acid [tezaub] with the oxide of zinc. In large doses an irritant poison; in moderate doses emetic; in small doses a nervine tonic and antispasmodic. In veterinary practice, combined with sugar of lead, as lotion to sprains, &c., a drachm of the latter to a scruple of the former in a bucket of water. Hindoos and Mahomedans only know it through their connection with Europeans. Used in dyeing [shauyam].

TOOTTY (चक्रभेंड - chakrabhénda, *Mahr.*; مشط الغول - mashtulghaul, *Ar.*; درخت شانہ - darakhtishánah, *Pers.*; کنگوئی کا جہاڑ - kangoikájhár, *Hind.*; ڈبے کا جہاڑ - dabbekájhár, *Dec.*; ಹೆತ್ತುತ್ತಿಗಿಡ - hétuttigida, *Can.*; ඌරික - urki, *Too.*; తుత్తిరి - tuttiri, *Tel.*; തുത്തി - tutti, *Mal.*; අනෝදා - anódá, *Singh.*; துத்தி - tutti, *Tam.*). Title from tamul. Mahr. from (chakra, san. wheel + bhéndá, mahr. the okro plant, hibiscus esculentus, linn.); from circular fruit and leaves like okro leaf. Ar. from (masht, ar. comb + ghaul, ar. demon); from shape of leaves. Pers. from (darakht, pers. tree + shánah, pers. comb). Hind. from (kangoí, hind. comb + jhár, hind. tree). Dec. from (dabbá, hind. oil bag + jhár, hind. tree). Can. from (héru, can. great + tuttigida, can. the tree) [shrubby balah]. Tel. and Mal. from tamul. Tam. from (tu, tam. to eat). Ar. also (daishár). Can. also (shrímudrigida), meaning beauty + seal + plant, from circular fruit; (kisangigida), meaning red + branch + plant; (gidurtingi); (hetakisa); (tuttigida). Tel. also (tutti), means to eat; (tuttiribenda), meaning plant + hibiscus esculentus, linn.; (núgubenda), meaning down + the plant; (adavibenda), meaning forest + the plant; (bottabenda), meaning hamper + the plant. Mal. also (úram), meaning creeping; (vellúram), meaning white + creeper; (káttúram), meaning forest + creeper. Tam. also (perunduttí), meaning big + the plant; (paniyárattutti), meaning cake + the plant. Title otherwise Cake mallow, Comb tree, Country liquorice [indian liquorice], Country mallow, Demon's comb, Indian mallow, Indian marsh mallow, Round bendy. Giving Balbij seeds. Botanically Abutilon indicum, g. don., malvaceæ [vricsham, 25]. Shrub, 2-3 feet; leaves cordate, somewhat lobed, soft, shortly tomentose, unequally toothed; calyx five-cleft, without an involucel; pedicels erect, axillary, longer than the petioles, jointed near the flowers; corolla spreading; capsules truncated; carpels eleven-twenty, acute, not awned; hairy; flowers longish, orange-colored; flowering nearly all year. The seeds are small, being about a line in length and half a line in breadth and thickness; ash-colored when fresh, brown if old; somewhat kidney-shaped; odourless; taste mucilaginous. The bark occurs in long, thin, tough, fibrous strips, which are very strong; externally it is striated and covered by a cinnamon-colored epidermis, internally it is white and striated; the taste is feebly astringent and bitter. The leaves, seeds and bark are medicinal; leaves emollient, seeds demulcent and slightly diuretic; decoction of leaves for external use, by boiling fresh leaves with water, one handful to one pint; simple powder of seeds prepared as usual; doses of powder, from one to two drachms, three or four times in the twenty-four hours; substituted for marsh-mallow, copaiba, uva ursi and buchu. Boiled milk, whisked with the fibrous twigs, coagulates. Stem yields a fibre [naur], clean and strong, fit for rope. There is a variety, distinguished by blue or purple color of its stem, branches, petioles, &c., and found growing in hedges, called black tootty. Crispum, g. don., is a species called creeping tootty; has a yellow, middle-sized flower. Graveolens, w. &. a., is a strong smelling species, flowers large, orange with a dark centre. Muticum, g. don., alias tomentosum, has flowers large, light orange. Polyandrum, schlecht, is called Peepul-leaved tootty; flowers largish, yellow. The last two have long silky fibre, resembling hemp [kinnab], fit for ropes.——*Double thread tootty* (இரட்டைகத்துத்தி - irattagattutti, Tam.). Same as Musk bendy.——*Foreign tootty* (गुलखैरा - gulakhairá, Mahr.; خطمی - khitmí, Ar.; خيرو - khairo, Pers.; خطمی کا پیڑ - khitmíkáper, Hind.; خطمی کا جہاڑ - khitmíkájhár, Dec.; சீமைத்துத்தி - shímaittutti, Tam.). Title from being introduced from western asia or europe. Mahr. from (gul, mahr. red + khairo, pers. marsh mallow). Hind. from (khitmí, ar. marsh mallow + per, hind. tree) [small foreign tootty]. Dec. from hindostany. Tam. from (shímai, tam. foreign + tutti, tam. abutilon indicum, g. don.). Hind. also (gulikhairokájhár), meaning marsh mallow flower tree. Greek ἀλθαία. Title otherwise Goolkheir, Guimauve, Holly hock, Marsh mallow. Botanically Althæa officinalis, linn., malvaceæ [vricsham, 25]. Stem erect, 2-3 feet; leaves ovoid, angular, base scarcely cordate, unequally toothed; stipules linear-subulate; flowers 1-2 inches diameter, rosy; bractioles half the length of the sepals. By nature a perennial, in this country an annual; the calyx is thick, and covered with simple hairs, very closely set, and arranged in star-like tufts; the flower has five petals, which in the dry articles are bluish green at the base, the blades being purple; both calyx and flowers are mucilaginous; the carpels are large and pubescent. The different parts of the plant used here are generally imported from persia. Seeds medicinally demulcent, diuretic, febrifuge; flowers cooling and diuretic; roots, radix altheæ, astringent and demulcent, boiled with sugar form a decoction used in coughs, &c.; leaves used as a poultice or fomentation, mixed with oil, applied to burns or sores caused by snake-bites. Leaves yield blue coloring matter [shauyam] not inferior to indigo [q.v.]; stem gives fibre [naur]. The species rosea is the English holly hock; with three or four varieties named according to color of flower as red, white, purple, &c. The althæa of portuguese at goa is the root of Grewia scabrophylla, roxb. The roots of shoe-flower [q.v.] are dried and sold in shops as substitute for Foreign tootty.——*Lowly tootty* (నేలతుత్తి - nélatutti, Tel.). Same as Dwarf balah.——*Small foreign tootty* (خبازی - khubází, Ar.; خطمی کوچک - khitmíkochak, Pers. ಸಣ್ಣಬಿಂದಿಗೆ - sannabindige, Can.). Ar. from (khubz, ar. bread), from flat round fruit. Pers. means small, althæa officinalis, linn. Can. from (sanna, can. small + bindige, can. metallic water vessel). Ar. also (khatmí), meaning althæa officinalis, linn. [foreign tootty]; from similarity of properties; (anjíl). Pers. also (nánikulágh), meaning crow's bread. Greek μαλάχη χεραaία. Title otherwise Common mallow, Marsh mallow, Maul, Maws, Round dock. Botanically Malva [khoobauzy] sylvestris, linn., malvaceæ [vricsham, 25]. Annual, 1-3 feet high; leaves cordate rounded, lobed; petiole 4-5 inches; peduncles about 1 inch; bractioles ovate, entire, shorter than the bell-shaped calyx; corolla $1\frac{1}{2}$ inches diameter; petals notched, claw bearded; carpels reticulated, downy or glabrous. Carpel and seed are medicinal.——*Wild tootty* (காட்டுத்துத்தி - káttuttutti, Tam.). Same as Wild jute.

TOOTY COORA (कलम्बी - kalambí, *San.*; తూటికూర - túti-kúra, *Tel.*; വള്ളൽ - vallal, *Mal.*; කංකුන් - kankun, *Singh.*; வள்ளை - vallai, *Tam.*). Title from teloogoo. San. from (ka, san. water + lamb, san. to hang); aquatic. Tel. from (tútu, tel. hole + kúra, tel. pot-herb); from the eye in flower. Mal. means encompassing. Tam. from (val, tam. beauty). Mal. also (mundavalli), meaning branchless creeper [moon-flower]. Title otherwise Aquatic convolvulus, Creeping bindweed, Botanically Ipomæa [calamby] aquatica, forsk., convolvulaceæ [vriesham, 93]. Alias Convolvulus adansonii, repens, reptans; Ipomæa repens, reptans; Stems creeping and rooting, fistulous, smooth; leaves sagittate, lanceolate; petioles glabrous; peduncles one to five flowered, nearly as long as the petioles; sepals ovate, glabrous; corolla tubulose, campanulate, rose color; flowering nearly all the year. A creeping annual, found about the borders of tanks and moist places. Tender tops and leaves are much eaten [keeray].

TOPASS (തോപ്പാശി - tópáshi, *Mal.*). Corruption of the hindostany doobash [q.v.]. A native Christian sprung from a Portuguese father and Indian mother; in the early history of the Company extensively enlisted as soldiers; now used on ships.

TOP BOAT (गुप्तिनौका - guptinauká, *San.*; چھتکا پروا - chhat-káparvá, *Hind.*; కప్పుపడవ - kappupadava, *Tel.*; കേവുവള്ളം - kévuvallam, *Mal.*; கூட்டுப்படகு - kúttuppadagu, *Tam.*). Tel. from (kappu, tel. cover + padava, tel. boat). Boats provided with movable tops and floorings for passengers; these can be removed when it is wished to use the boats for cargo only; the tops are carried on stanchions, and can be made fairly weather-tight by tarpaulins. Vary in size from three to seven tons, and carry about sixteen native passengers.

TOPE (स्तूप - stúpa, *San.*). San. from (stúp, san. to pile up). Title is an Anglo-Indian corruption through the Pali, on the analogy of the tamul Tope [q.v.] which means a grove. Booddhist ring temple. These form one of the three groups of Booddhist [booddha] buildings erected in India since the time of Asoca; the other two groups being Cheityams [q.v.] which in form and purpose are almost identical with the early churches of the Christians, and Vihaurams [q.v.] or monasteries. They are the derivative successors of the funeral tumulus, which, from the earliest age to which antiquarian knowledge extends, the Turanian races are found to have raised over the graves of their dead. There are two peculiarities which distinguish the Booddhist tope from ordinary tumuli [aursham]. The first is that being of brick [shengal] or stone [cull], they could readily be made of a rounded or domical form, while the earthen tumulus was generally straight-lined. The second peculiarity is that, instead of being the last resting place of a body, they had now become depositories of relics only. In addition to its primary and general use as a relic shrine, the Booddhist tope was also not uncommonly used as a memorial tower to mark a sacred spot. Of the 84,000 topes which Asoca is traditionally said to have erected, it is gathered from the Chinese travellers that one-half at least were erected to mark spots where Booddha [q.v.] or some Bodhisatwan [q.v.] had performed a miracle, or done an act worthy of note. Booddhist topes occur in the valley of the Kistna [amravatty, staupatyam].

TOPE (توپ - top, *Hind.*). From the turkish. A cannon. Tope khauna is an arsenal.——*Toopauky* (توپکی - túpak, Hind.). Turkish word. A small cannon. A musket.

TOPE (తోపు - tópu, *Tel.*; தோப்பு - tóppu, *Tam.*). From (togu, tam. to collect). A grove of many kinds of trees; usually however of mango [q.v.] or tamarind [q.v.] trees; largely planted in charity as one of the seven santaunams [q.v.] or meritorious acts [inam, tandalam, tote].——*Topetoray* (தோப்புத்துறை - tópputturai, Tam.). From (above + turai, tam. seaport). Town, Port, Customs house, Sea; Tanjore dist., Tritrapoondy tal.; pop. 2,921; lat. 10° 24′; long. 79° 54′; from Madras S. 186 miles; from Tanjore S.E. 54 miles; from Tritrapoondy S.E. 17 miles; from Vedaranyam N. 2 miles; from Velangauny S. 19 miles; from the sea W. 1 mile. At the mouth of the Adappaur. The trade with Ceylon considerable. Inhabited largely by Lubbays [q.v.].——*Toppoor* (தொப்பூர் - toppúr, Tam.). From (above + úr, tam. village); from margosa [neem] grove. Tam. also (véppádi), meaning margosa tree, melia azadirachta, linn. + village. Zemindarry, Village, Pass; Salem dist., Dharmapoory tal.; pop. 851; lat. of village 11° 56′; long. 78° 06′; height 1017 feet, from Dharmapoory S.S.W. 16 miles; from Salem N.N.W. 20 miles. On the north of the river of the same name, which is bridged a little to the west of the old fort. The pass [ghaut] is southern entrance to Dharmapoory talook. Scene of Tippoo's flight from a British force on the 18th November 1790. The pass is approachable on this quarter by two routes, the one from Salem viâ Omalore and the other from the Ahtoor ghaut and Shevaroy hill railway station viâ Candyamputty, both converging near Deevatiputty. From Toppoor the ghaut [q.v.] road winds north in numerous zigzags. From Deevatiputty towards Toppoor the rise is gentle, but after leaving Toppoor, between the 195th and 190th mile stones, near the latter of which is Munro's goonta [q.v.], the ascent is considerable, the ghaut attaining its greatest elevation between the 190th and 191st mile stones. Between the 189th and 188th mile stones the country is more open, and a vast plateau some 30 to 20 miles in extent opens out.

TOPEE (ٹوپی - topí, *Hind.*). From (topná, hind. to cover). Skull-cap, made up from various materials, worn temporarily as a substitute for the turban [puggry]. A common form is a cap of dyed cotton cloth, which sits close to the head and descends with two flaps over the ears. The Moplahs wear a stiff cap made of twisted silk [puttoo] thread, or of pasteboard; around which a roomaul [q.v.] is sometimes wound. There is no special or made-up head-dress among women; the embroidered skull-cap however is occasionally used. Term generally used for european hats and caps. Topee wallah now denotes a european; originally all, persians and moghuls, who wore turbans.——*Topicull* (தொப்பிக்கல் - toppikkal, Tam.). From (above + kal, tam. stone). Hat stone; another name of Coday cull [paundoocull].

TOPRAH (توبرہ - tobrah, *Hind.*). Horse's nose bag for food.

TORANAM (तोरण - tórana, *San.*). From (tur, san. to go forward). Passage. An arched gateway [gopooram].

TORAY (ತೊರೆ - tore, *Can.*; തുറ - tura, *Mal.*; துறை - turai, *Tam.*). From (turu, tam. to crowd); place of resort. A river ford. More commonly the haven of a sea, or port. Suffix in place names, as Audootoray, Tonitoray, Topetoray. The principal sea-ports are, on the east coast, Ganjam, Mansoorcottah or Gopalpore, Calingapatam, Bimlipatam, Vizagapatam, Cocanada and Coringa, Masulipatam, Madras, Cuddalore, Porto novo, Tranquebar, Negapatam and Nagore, Paumben, Tuticorin; and on the west coast, Alleppey, Cochin, Ponnany, Beypore, Calicut, Quilandy, Badagara, Tellicherry, Cannanore and Mangalore. See the foot-note at page 253 of volume I with regard to changes in the coast. For a complete list of the ports and sub-ports of this Presidency arranged from east to west, see vol. II, appendix LXIV. Toray also means a place of descent into a tank or stream [ghaut].——*Toorayore* (துறையூர் - turaiyúr, Tam.). From (above + úr, tam. town). Sanscrit name (tírt'hapurí), meaning ford + city.—"*a*" Deputy tahsildarry, Trichinopoly district. Pay Rs. 100.—"*b*" Zemindarry; Trichinopoly dist., Moosiry tal.; pop. 7,467. Formerly extended 80 miles from east to west, and 40 miles from south to north being in effect a large country. The polliem [q.v.] was overrun by the Mysoreans and the French. In 1755 the new chief was deposed and one of his cousins put in his place. From Toorayore the French marched against the poligars of Ariyalore and Oodayarpolliem. Captain Calliaud, then commanding in Trichinopoly, advanced against them, and they were left unmolested. In 1756 the Toorayore poligar [q.v.] again failing to pay his tribute was deposed by the French, his immediate predecessor taking his place. The poligar expelled by the French in 1757 was befriended by the poligars of Ariyalore and Oodayarpolliem, and in 1758, with the assistance of the English, the reigning chief of Toorayore was expelled and escaped to Mysore. The latter continued to plunder the country between Toorayore and Ootatoor. In November 1758, three of the five companies garrisoning Toorayore were recalled to Trichinopoly. The deposed poligar took advantage of this opportunity, and captured the town. He then made terms with the Nawaub, who confirmed him in the Government. In 1773, the son of the poligar quarrelled with his father and sought the aid of the Nawaub [q.v.]. On agreeing to raise the peshcush [q.v.] of the polliem from 1,50,000 to 1,75,000 rupees, the young chief was in 1786 appointed poligar, and his father removed to Madras. The latter on offering to increase the peshcush to 2,00,000 rupees if the estate was placed under his authority was restored to the polliem in 1787. In 1789 the son, by the offer of 1,00,000 rupees as a present to the Nawaub and on engaging to pay the same peshcush [q.v.] as his father had agreed to, was again reinstated. The young chief being unable to fulfil his engagements was removed in 1793, and his father placed in the management of the polliem for the third time, having previously engaged to pay a peshcush of 2,75,000 rupees. The polliem in its impoverished state was unable to pay this increased tribute and in 1795 the old chief and his son became reconciled and took refuge in Tanjore, where the father soon afterwards died. His son in 1796 taking advantage of the disturbances in Oodayarpolliem and the distracted state of the country collected a considerable number of men, and laid waste all parts of the polliems. He agreed however to retire to Tanjore, on promise of a monthly allowance of Rs. 1,000 from the Nawaub and permission to levy annually an assessment on the inhabitants of Toorayore, which was to bear a proportion of 25 per cent. to the revenue of the State. This arrangement continued till the assignment of the Carnatic [q.v.] to the Company. Present peshcush Rs. 700.—"*c*" Town, Deputy tahsildar's station, Head assistant collector's division; Trichinopoly dist., Moosiry tal.; pop. 7,467; lat. 11° 09′; long. 78° 40′; from Ariyalore W. 32 miles; from Madras S.W. 172 miles; from Moosiry N.N.E. 8 miles; from Shreerungam N.N.W. 21 miles; from Trichinopoly N. 25 miles. Largest village in talook. Residence of Toorayore zemindar. The head-quarters of the old Toorayore talook was Cannanore, a village 6 miles from Toorayore

on the road to Moosiry. Large tank with curious half-ruined three-storeyed building in centre, formerly occasional residence of the Zemindar [q.v.]. Small hill with elaborately sculptured Vishnoo temple.

TORCH TREE (مشعل کا جہاڑ - mashalkájhár, *Hind.*). From use of boughs. Same as Large jungle geranium.

TORYE (తురాయి - turáyi, *Tel.*). Means an ornament for the head. Same as Gold mohur tree.

TOTAH (शुक - shuka, *San.*; ببغا - babaghá, *Ar.*; طوطی - túti, *Pers.*; توتا - totá, *Hind.* and *Dec.*; نوری - nuri, *Malay*; ಗಿಣಿ - gini, *Can.*; చిలుక - chiluka, *Tel.*; തത്ത - tatta, *Mal.*; ගිරවා - giravá, *Singh.*; கிளி - kili, *Tam.*). Title from deccany. Pers. from (tút, pers. mulberry); from its appearing in that season. Hind. and Dec. from persian. Tel. from sanscrit. Mal. from (tattu, mal. to leap). Tam. from (killu, tam. to take up as with the beak). Tam. also (kilippillai), meaning parrot + affix to the names of small birds. Parrots. Palæorninæ, psittacidæ [keeram], scansores, insessores [pacshy, 12], of naturalists [jantoo]. There is a Tamul proverb:—சொன்னதைச் சொல்லும் கிளிப் பிள்ளை—"the parrot will utter what it is taught." The species best known to the natives are shown below.——*Lahbar totah* (कीर - kíra, San.; राघू - rághú, Mahr.; لہبرتوتا - lahbartotá, Hind.; చిలుక - chiluka, Tel.; തത്ത - tatta, Mal.; கிளி - kili, Tam.). Title from hindostany. San. from (kír, san. to lisp). Mahr. from (rága, san. color). Hind. from (lahbar, hind. parrakeet so called + totá, hind. parrot). Tel. from (shuka, san. parrot). Mal. from (tattu, mal. to trip). Tam. from (killu, tam. to take up as with the beak). Tel. also (rámachiluka), meaning beautiful + parrot. Title otherwise Rama's parrot, Rose-ringed parrakeet. Palæornis torquatus, palæorninæ [totah], psittacidæ [keeram] scansores, insessores [pacshy, 12], of naturalists. Colors as in Roy totah, without the red shoulder spot; black band in front extends under the chin; bill cherry-red [cherry]; irides pale yellow; feet cinereous, length 16½ inches; female wants the rose collar, but has a bright emeraldine narrow green collar in its place; extremely common; habitually found about towns and villages; destructive to grain and fruit gardens; has a harsh cry; owls [ooloocam] attack these birds by night.——*Madangowr totah* (مدنگور توتا - madangúrtotá, Hind.; مدن توتا - madanatotá, Dec.; கருங்கிளி - karungili, Tam.). Title from hindostany. Hind. from (madana, san. delighting + gaura, san. yellowish white + totá, hind. parrot). Dec. from (madana, san. pleasing + totá, hind. parrot). Tam. from (karumai, tam. blackness + kili, tam. parrot). Title otherwise Black parrot, Blue-winged parrakeet. Palæornis columboides, palæorninæ [totah], psittacidæ [keeram], scansores, insessores [pacshy, 12], of naturalists. Alias Palæornis melanorhynchus. Head, hind neck, plumage beneath generally pale dove-grey, purest on head and cheeks; verdigris-green patch on forehead, lores and below eye; black collar round neck, meeting at chin; in front of this a verdigris-green [zangaur] collar, which widens on upper part of neck; lower part of back, rump and upper tail-coverts blue-green; wing-coverts and scapulars dark blue-green; feathers edged pale; quills darkish blue, faintly edged with green externally, and dusky on the inner webs; tail-coverts, with centre feathers, blue, tipped with yellowish-white; next pair blue on outer web, greenish near base, tipped yellow; all others green externally, yellow internally; beneath all tail-feathers yellow; lower abdomen, vent, and under tail-coverts, pale verdigris-green; female wants the collar, or has only a faint indication of it; the bill is black; bill cherry-red above, dusky beneath; legs greenish plumbeous; length 15 inches; frequents only loftiest trees; associates in small flocks; cry mellow, subdued.——*Roy totah* (رای توتا - ráitotá, Hind. and Dec.; పెద్దచిలుక - peddachiluka, Tel.; பெரியகிளி - periyagili, Tam.). Hind. from (rái, hind. prince + totá, hind. parrot); from large size and color. Tel. from (pedda, tel. large + chiluka, tel. parrot). Tam. from (periya, tam. big + kili, tam. parrot). Tel. also (kerieuri), from ghond. Title otherwise Alexandrine parakeet. Palæornis alexandri, palæorninæ [totah], psittacidæ [keeram], scansores, insessores [pacshy, 12], of naturalists. Alias Palæornis nipalensis. Adult male, green, brilliant, emeraldine on head and face, duller on the back, paler beneath, dingy on the breast, yellowish on chin and lower tail-coverts; quills bluish, tail with two centre feathers bright green at base, pale bluish-green for remaining two thirds, tipped yellowish; outer feathers light green on outer webs, yellowish-green internally; black stripe crossing round behind the ears, demi-collar of peach-rose on nape and sides of neck; dark red spot on shoulders of wings, some feathers of wing narrowly edged with dusky; narrow line from nostrils to eye tinged with black; bill deep red, yellowish beneath; feet plumbeous; irides pale yellow; length 21 inches, female wants the collar of the male, generally less brightly colored; beak very large and strong; taken to europe by alexander; feeds on fruits and grain.——*Tooria totah* (توریاتوتا - turiátotá, Hind. and Dec.; రామచిలుక - rámachiluka, Tel.; சிவப்புத்தலைக்கிளி - shivapputtalaikkili, Tam.). Title from hindostany. Tel. from (ráma, san. beautiful + chiluka, tel. parrot). Tam. from (shivappu, tam. redness + talai, tam. head + kili, tam. parrot). Hind. also (faryádí), meaning plaintive or complainer; (kákátuá). Title otherwise Rama's parrot, Rose-headed parrakeet. Palæornis rosa, palæorninæ [totah], psittacidæ [keeram], scansores, insessores [pacshy, 12], of naturalists. Alias Palæornis bengalensis, cyanocephalus, flavicollaris. Adult male, head and face pale roseate, tinged with plum [auloo chah] bloom posteriorly and inferiorly; black spot from base of lower mandible, uniting into narrow complete collar, meeting its opposite one at chin, which is thus broadly black; behind the collar, hind neck verdigris-green [zangaur]; upper portion of back yellow-green; lower back, rump, upper tail-coverts, pale blue-green; wings green, with small red spot on lesser coverts; shoulders bluish-green; webs of most quills dusky; tail, with two centre feathers, cobalt blue, tipped white; next pair blue also tipped white; others pale green on outer webs, yellowish internally; plumage beneath bright siskin, or yellow-green; some less brightly colored, more of uniform green with less yellow; old males have cap much brighter deeper colored than juniors; female head plum-blue, wants the black collar; yellow demi-collar in front and on the sides; breast is much tinged with oil yellow; young birds green throughout; centre tail-feathers always blue, usually faint indication of pale collar of the female; length 14–15 inches; flight very swift.——*Totakahauny* (طوطاکہانی - totákahání, Hind.). Tales of a parrot. Book of thirty-eight didactic tales related by a parrot one each evening to its mistress, thereby dissuading her from turning her affections towards a stranger during the absence of her husband on a journey.

TOTE (తోట - tóta, *Tel.*; தோட்டம் - tóttam, *Tam.*). Tam. from (tódu, tam. collection). A garden, an orchard [baugh, tope].——*Totacqul* (தோட்டக்கால் - tóttakkál, Tam.). From (above + kál, tam. place). Land on which garden products, as chillies [q.v.], tobacco [pogauk], turmeric [country saffron], &c., are raised [baughayet, vellaumay].

TOTTILA (प्रियंगु - priyangu, *San.*; ತೊಟ್ಟಿಲಕಾಯಿ - tottilakáyi, *Can.*). San. from (priya, san. beloved + anga, san. body [priyangoo]. Can. from (tottu, can. peduncle of leaf or fruit + illa, can. having not + káyi, can. fruit). San. also (shyámá), meaning black [shaumay, shyaumalatay, white datura]; (kántatva), meaning shining; (nandiní), meaning gladdening; (p'haliní), meaning fruit-bearing; (latá), meaning creeper. Title otherwise Priyangoo. Botanically Aglaia roxburghiana, miq., meliaceæ [vricsham, 36]. Alias Milnea roxburghiana. A large tree with pinnate leaves and yellow flowers; fruit ⅓–½ inch in diameter, sub-globose, very minutely pilose, one to two celled and seeded, buffcolored when fresh, brown and wrinkled when dry; it consists of a thin shell inclosing one or two brown seeds, covered by a pink fleshy aril; the seeds are flat, of somewhat irregular outline, with one side slightly convex; they are nearly half an inch in diameter and remarkably acid and astringent; when dry they have an aromatic odour. The fruit is used in native medicine, cooling and astringent, and useful in inflammatory, bilious, and febrile complaints; also beneficial in leprosy [cooshtam]; seeds are the part to which its medicinal reputation is due.

TOTTIYAN (தொட்டியன் - tottiyan, *Tam.*). From (tottiyam, tam. witchcraft); from the practice of magic. People originally from the north, settled in Coimbatore [janty]. Some 60,000 in number. See vol. II, 228.

TOURMALINE (तोरमल्ली - tóramallí, *Mahr.*; تورملی - turmalí, *Hind.*; తోరమల్లె - tóramalle, *Tel.*; තෝරමල්ලි - tóramalli, *Singh.*; துவரைமல்லி - tuvaraimalli, *Tam.*). All from singhalese. Mineral presenting brown, blue, green and red colors; the blue called indicolite, the red bubellite; green and red esteemed in jewelry when clear and large, crystals when heated exhibit electric polarity; ceylon jewellers apply it to zircon or ceylon or madura diamonds.

TOWHEED (توحید - tauhíd, *Hind.*). From (wahada, ar. to declare to be one). Unity of god.

TOWVAY (தௌவை - tauvai, *Tam.*). Elder sister. Goddess of misfortune [moodevy]. There is a Tamul proverb:—தௌவையின் மனதுக்கு ஒவ்வுதல் இல்லை—"nothing gives satisfaction to towvay."

TRAIL GRASS (ಮಂಚದಕಾಲುಹುಲ್ಲು - manchadakáluhullu, *Can.*; కొండజెర్రి - kondajeri, *Tel.*; കൊണ്ടപ്പുല്ല് - kondappullu, *Mal.*; மயிர்கொண்டைப்புல் - mayirgondaippul, *Tam.*). Title from spreading habit. Can. from (mancha, can. cot + kálu, can. leg + hullu, can. grass). Tel. from (konda, tel. hill + jerri, tel. centipede). Mal. from (konda, mal. tuft of hair + pullu, mal. grass). Tam. from (mayil, tam. peacock + kondai, tam. crest + pul, tam. grass), from flowering head. Can. also (hennuganjalugarikehullu), meaning female + cluster + a kind of bent grass. Tel. also (adavigódhumalu), meaning wild wheat, triticum vulgare, vill. Tam. also (kudaippul), meaning umbrella + grass. Title otherwise Bearded chloris, Centipede grass, Peacock crest grass, Trailing grass, Umbrella grass, Wild wheat. Botanically Chloris barbata, swartz., graminaceæ [vric-

sham, 156]. Alias Andropogon barbatus; chloris caribæa. Culm one foot, compressed, branched; leaves acute, a little hairy above; spikes digitate, four to twelve, spikelets sessile; imbricated, hermaphrodite; corolla ciliated, awned, neuter of two-awned valves; very common; grows in large tufts; resembles hurrially [q.v.]. Cattle eat it till in flower; may be converted into hay [ghaus]. Other species are:—digitata, montana, roxburghiana, tetrameris, wightiana.

TRANQUEBAR* (தரங்கம்பாடி - tarangambádi, *Tam.*). From (taranga, san. wave + pádi, tam. village). Place against which the waves dash.—"*a*" Deputy tahsildarry, Tanjore district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station; Tanjore dist., Mayavaram tal.; pop. 4,947; lat. 11° 02′; long. 79° 54′; from Caricaul N. 8 miles; from Combaconam E.N.E. 32 miles; from Madras S.S.W. 143 miles; from Mayavaram E.S.E. 14½ miles; from Munnargoody N.E. 36 miles; from Negapatam N. 18 miles; from Tanjore E.N.E. 50 miles; from Trimal vausal S. 14 miles. Surrounded by walls and protected by the Dansborg, which being white, as well as most of the houses, the place is conspicuous when viewed from the sea. There is a slight curvature in the shore here, concave towards the sea. In 1616 the first Danish vessel that visited India sent by the Danish east india company, established in 1612, was wrecked off Tranquebar. The captain obtained for the Company Tranquebar with land around, 5 miles long and 3 miles broad, at an annual rent of Rs. 4,000 paid to the Rajah of Tanjore. A fort was built. In 1624, Tranquebar became the property of the king of Denmark, to whom the Company owed money. For supplying arms to the Nawaub of Arcot, Hyder ally in 1780 exacted a fine of Rs. 1,40,000 from the Danes. Tranquebar was taken by the English with all other Danish settlements in India in 1807, but restored in 1814. Bought by the English in 1845, for Rs. 12,50,000. From 1845 to 1860 Tranquebar was the head-quarters of the Collector, now transferred to Tanjore; and from 1860 to 1874 it contained the District and Sessions court, afterwards removed to Negapatam. In 1878 the North tanjore district court, which had been in abeyance for two years, was re-established at Tranquebar. Since again discontinued. Tranquebar is also interesting as the first settlement of Protestant missionaries in India. See vol. I, 622. In 1847 the mission passed from the Danes to the Leipzic evangelical lutheran mission, who have a printing press. The fort is on the shore, separated from the cultivated land by a broad sandy tract. It is a square, of which the shore forms one side, and on which the sea is gradually encroaching, having already swept away the first church built by Ziegenbalg. All the European houses are within the fort, and the absence of compounds gives the place an appearance unusual in an Indian station. The bulk of the native population live outside the fort. The walls are well preserved, and the former citadel, the Dansborg, is now used as a jail. The fort also contains two Protestant churches, and a small Roman catholic church, under the jurisdiction of the Archbishop of Goa. The principal Catholic church is outside the fort, and belong to the Vicariates apostolic of Pondicherry. In the fort is an old Shiva [q.v.] temple with an inscription. The temple authorities possess a copper-plate grant. Another temple dedicated to Vishnoo [q.v.] contains a copper-plate grant [shausanam], dated A.D. 1609. A number of carved Dutch tombstones are to be seen in the cemetery, some very handsomely sculptured. In Danish times Tranquebar was a busy port, and contained a number of Danish families. Under English rule the revenue increased rapidly; and as the port affords better anchorage than Negapatam, it soon drew away the trade of the latter place. The completion of the South indian railway line from Negapatam to Tanjore in 1861 and to Trichinopoly in 1862 restored the trade to Negapatam, and Tranquebar is now almost ruined. Tranquebar tower forms a trig. station; lat. 11° 01′ 23·06″; long. 79° 58′ 53·57″; from Mayavaram E.S.E. 14 miles.

TRAVANCORE (തിരുവിതാംകൂർ - tiruvítánkúr, *Mal.*). From (tiru, mal. goddess of prosperity + vázhu, mal. to reside + kúr, mal. part) [shree, tir]. Sanscrit name (shrívardhanapurí), meaning lutchmy + prosperity + town. Tam. name (tiruvázhumgódu), meaning the place where the goddess of prosperity resides.—(1) Native state; situated on the south-west extremity of the presidency; between 8° 4′ and 10° 22′ N. lat., and between 76° 13′ and 77° 38′ E. long.; bounded N. by Cochin state and Coimbatore district, E. by Madura and Tinnevelly districts, S. and W. by the Indian ocean; pop. 2,401,158; language Malayalam. Rivers:—Atchancoil, Coolitora, Cullada, Pambah, Periyaur. Ports:—Alleppey, Anjengo, Caracoolam, Cauttore, Colachel, Manacodam, Manacoody, Paliport, Paravore, Poondora, Poovaur, Poracaud, Quilon, Rajakkal mungalam, Tengyeputnam, Vilinjam. Mountains:—Anamullays, Cardamom hills, Travancore hills. The whole area of the state is represented by the following talooks:—Agasteeshwaram, Ambalapoya, Aulangaud, Caroonaggapully, Caurtigapully, Chenganore, Cherankeel, Chungacherry, Coonnat naud, Coonnatore, Cottaura cara, Cottayam, Cullcoolam, Mauvelicara, Meenachel, Mooatpoya, Nedoovengaud, Neittincara, Paravore, Putnapooram, Quilon, Shencottah, Shertála, Tiroovalla, Todoopoya, Tovaula, Trivandrum, Velavancode, Wycome, Yaittmanore, Yerraneel. For administrative purposes, the state is also divided into the following divisions:—Southern or Pudmanaubhapooram division, Trivandrum division, Quilon division, and Northern or Cottayam division. The following general references should be made to the preceeding volumes:—general geograpy, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology II, 8; fauna, II, 21; flora, II, 26; mineralogy, II. 29. The following references in the preceding volumes will furnish details special to the district:—particulars about towns, II, 48; coast survey, II, 149; light-houses, II, 168; ports, II, 423. A special gazetteer account of the whole district is given at II, 133 and 287. Places of archæological interest:—Agasteeshwaram, Alagya paundyapooram, Anantapooram, Anjengo, Aramana, Atchancoil, Aurdeshaputt, Bramhapooram, Cadiapatam, Capiyara, Chenganore, Colachel, Coolatore, Cottaur, Cottayam, Cullada, Cullcoolam, Madaulam, Mail pidaugay, Maudavoreparra, Mauvelicara, Nadoovoo pidaugay, Nattaulam, Neendacara, Parakye, Periyacoil, Ponmana, Poorayore, Sooshindram, Tairoor, Taulacoody, Tirnundicara, Tiroovalla, Tirvancode, Tirvattaur, Tovaula, Tricaroor, Tungacherry, Vadácherry, Valavancode, Yerraneel. The leading places, &c., in the state are the following.—*Agasteeshwaram* (അഗസ്തീശ്വരം - agastíshvaram, Mal.). See sep. title.—*Alagya paundyapooram* (അഴകിയപാണ്ഡ്യപുരം - azhakiyapándyapuram, Mal.). From (azhakiya, mal. beautiful + pándya, san. the kingdom so called + pura, san. city); the beautiful city of the paundyan chief. Village; Pudmanaubhapooram division, Tovaula tal.; lat. 8° 18′; long. 77° 29′; from Tovaula N.N.W. 7 miles; from Trivandrum E.S.E. 35 miles; from the sea N. 15 miles. Extensive Agrahaurams [q.v.]. The Naunjy coravar, who had for some time sovereignty of Naunjinaud [q.v.] were succeeded by Moodelliars [q.v.] with head-quarters here.—*Alleppey* (ആലപ്പുഴ - álappuzha, Mal.). See sep. title.—*Alwye* (ആലുവായ - áluváya, Mal.). See sep. title.—*Ambalapoya* (അമ്പലപ്പുഴ - ambalappuzha, Mal.). See sep. title.—*Anamoody* (ആനമുടി - ánamuti, Mal.). See sep. title.—*Anjandud* (അഞ്ചനാട - añchanátu, Mal.). See sep. title.—*Anjengo* (അഞ്ചുതെങ്ങ - añchutennu, Mal.). See sep. title.—*Aramboly* (ആരുവാമൊഴി - áruvámozhi, Mal.). See sep. title.—*Aripaud* (അരിപ്പാട് - arippátu, Mal.). From (ari, mal. vishnu, the god + pátí, mal. village); from the temple of shreekrishnan. Village, Tahsildar's station; Quilon division, Caurtígapully tal.; pop. 6,104; lat. 9° 17′ N.; long. 76° 30′ E.; from Alleppey S.S.E. 16 miles; from Cottayam S.S.W. 21 miles; from Madras S.W. 365 miles; from Nagarcoil N.W. 100 miles; from Paravore S.S.E. 60 miles; from Quilon N.N.W. 28 miles; from Trivandrum N.N.W. 63 miles; from the sea E. 4 miles. In a fertile and populous tract. Sacred shrine of Soobramanyan [q.v.], supported by the State. Annual festival in April lasts ten days.—*Aryancauv* (ആരിയങ്കാവു - áriyankávu, Mal.). See sep. title.—*Ashamboo* (അശമ്പു - ashambu, Mal.). See sep. title.—*Ashtamoody* (അഷ്ടമുടി - ashtamuti, Mal.). See sep. title.—*Atchancoil* (അച്ചങ്കോവിൽ - aççankóvil, Mal.). See sep. title.—*Attingal* (ആറ്റുങ്ങൽ - áttunnal, Mal.). See sep. title.—*Aulangaud* (ആലങ്ങാട - álannátu, Mal.). See sep. title.—*Bhootapaundy* (ഭൂതപ്പാണ്ടി - bhútappánti, Mal.). From (bhúta, san. demon + pándya, san. pándyan king). Village, Tahsildar's and Registrar's station; pudmanaubhapooram division, Tovaula tal.; lat. 8° 16′; long. 77° 29′; from Alleppey S.E. 111 miles; from Cottayam S.S.E. 109 miles; from Madras S.S.W. 380 miles; from Nagarcoil N. 6 miles; from Pavavore S.S.E. 152 miles; from Quilon S.E. 71 miles; from Trivandrum E.S.E. 36 miles; from the sea N. 12 miles. At the foot of the ghauts [q.v.] and about 8 miles north-west of Aramboly pass. Ancient town, once in the possession of the Paundyan [q.v.] rajahs. Old pagoda [q.v.] on the bank of a small stream branching off from the Palayaur. Remarkable for its monkeys [bandar]. Extensive agrahaurams [q.v.].—*Cadambanaud* (കടമ്പനാട് - kadambanátu, Mal.). From (kadamba, san. a tree. anthocephalus cadamba, miq. + nátu, mal. country). Village; Quilon division, Coonnatore tal.; lat. 9° 06′; long. 76° 44′; from Goonnatore N. 2 miles; from Trivandrum N.N.W. 45 miles; from the sea E. 13 miles. Ancient Syrian [q.v.] church.—*Cadapooram* (കടപ്പുറം - katappuram, Mal.). From (katal, mal. sea + puram, mal. side). Village; Quilon division, Tiroovalla tal.; pop. 11,916; lat. 9° 20′; long. 76° 35′; from Cochin S.E. 46 miles; from Quilon N. 31 miles; from Tiroovalla S.S.W. 3 miles; from Trivandrum N.N.W. 64 miles; from the sea E. 11 miles.—*Cadiapatam* (കടിയപട്ടണം - katiyapattanam, Mal.). See sep. title.—*Candiyore* (കണ്ടിയൂർ - kantiyúr, Mal.). From (kanti, mal. high ground + úr, mal. village). Village; Quilon division, Mauvelicara tal.; lat. 9° 15′; long. 76° 35′; from Mauvelicara W. 1 mile; from Trivandrum N.N.W. 59 miles; from the sea 8 miles. Ancient village near Mauvelicara. Once the field of a battle in which Travancore obtained a decisive victory over the Canyancollam rajah, this leading to the annexation of the latter principality to the state. Large ancient pagoda [q.v.] and palace.—*Capiyore* (കപിയൂർ - kapiyúr, Mal.). From (kapi, san. monkey + úr, mal. village);

so called from the pagoda dedicated to hanooman, the monkey chief. Village; Quilon division, Tiroovalla tal.; pop. 15,300; lat. 9° 24′; long. 76° 39′; from Tiroovalla E.N.E. 4 miles; from Trivandrum N.N.W. 66 miles; from the sea E. 17 miles. On the Manimala. Inhabited by Nayars. Large pagoda [q.v.] to Hanooman [q.v.] and reservoir. There is a regular street of Nayar [q.v.] houses.——*Caracoolam* (കരക്കുളം - karakkulam, Mal.). From (kara, mal. village + kulam, mal. tank). Village, Port; Trivandrum division, Nedoovengaud tal.; pop. 4,425; lat. 8° 34′; long. 77° 01′; from Anjengo E.S.E. 16 miles; from Bombay S.S.E. 750 miles; from Trivandrum N.N.E. 7 miles; from Veily E.N.E. 8 miles; from Nedoovengaud S.S.W. 3 miles. ——*Caramana* (കരമന - karamana, Mal.). See sep. title.——*Cardamom hills* (ഏലമല - élamala, Mal.). See sep. title.——*Caroonaugapully* (കരുനാഗപ്പള്ളി - karunágappalli, Mal.). From (karu, mal. black + nága, san. serpent + palli, mal. village). Talook, Quilon division; lat. 8° 56′ to 9° 11′; long. 76° 31′ to 76° 40′; pop. 101,039. The talook is sub-divided into 8 praverties [q.v.] and consists of 104 caras [q.v.] or villages. It is bounded N. by Caurtigapully talook, E. by Mauvelicara and Coonnatore talooks, S by Quilon talook, W. by the Indian ocean. Its greatest length, N. to S., is 15 and its greatest breadth, E. to S., is 8 miles. Its area 89 square miles. Thickly populated. Soil alluvial. Good screw-pine [q.v.] mats [boriyah] are made. The talook is well watered and irrigated by small canals. The village of same name is in lat. 9° 05′; long. 76° 35′; from Cochin S.E. 63 miles; from Padanayarcoolangara N. 1 mile; from Trivandrum N.N.W. 48 miles; from the sea E. 3 miles; on the coast at the northern extremity of an extensive inlet communicating with the sea. There are hills of the same name. ——*Caumapooram* (കാമപുരം - kámapuram, Mal.). From (káma, san. indian god of love + pura, san. city). Town; Quilon division, Ambalapoya tal.; lat. 9° 18′; long. 76° 28′; from Ambalapoya S.E. 7 miles; from Quilon N.N.W. 31 miles; from Trivandrum N.N.W. 65 miles; from the sea E. 3 miles. A pagoda [q.v.]. Travellers' bungalow [q.v.].——*Caunyirapully* (കാഞ്ഞിരപ്പള്ളി - káññirappalli, Mal.). From (káññiram, mal. strychnos nux-vomica, linn. + palli, mal. village). Village; Cottayam division, Chungacherry tal.; pop. 19,520; lat. 9° 34′; long. 76° 50′; from Chungacherry E.N.E. 19 miles; from Trivandrum N. 75 miles; from the sea E. 32 miles. Trading town at foot of a ghaut [q.v.], and on the main road from Cottayam to Madura. Christians and Lubbays [q.v.]. Fra Paolino di S. Bartolomeo mentions it specially. Romo-syrian church [syrian]. ——*Caurtigapully* (കാർത്തികപ്പള്ളി - kárttikappalli, Mal.). From (krittiká, san. the asterism of that name + palli, mal. village); called after the king born under caurtigay [q.v.]. Talook; Quilon division; pop. 81,969. Sub-divided into 10 praverties and comprises 93 caras or villages. It is bounded N. by Ambalapoya talook, E. by Chenganore and Mauvelicara talooks, S. by Caroonaugapully talook and W. by the Indian ocean. Its greatest length, N. to S., is 15 miles and its greatest breadth, E. to W., is 7 miles. Its area is 70 square miles. Soil alluvial. Well watered by canals and rivulets. The village of same name is in lat. 9° 16′; long. 76° 30′; from Aripaud S. 1¾ miles; from Trivandrum N.N.W. 63 miles; from the sea E. 3 miles. Syrian [q.v.] church and town encompassed by a mound.——*Cauttore* (കാട്ടൂർ - káttúr, Mal.). From (kátu, mal. forest + úr, mal. village). Village, Port; Cottayam division, Shertala tal.; lat. 9° 34′; long. 76° 22′; from Alleppey N. 5 miles; from Bombay S.S.E. 675 miles; from Cottayam W.S.W. 13 miles; from Trivandrum N.N.W. 84 miles; from Shertala S. 8 miles. ——*Cauyancollam* (കായങ്കുളം - káyankulam, Mal.). See sep. title.——*Chenganore* (ചെങ്ങന്നൂർ - chennannúr, Mal.). See sep. title.——*Cherankeel* (ചിറയിൻകീഴ് - chirayinkízh, Mal.). See sep. title.——*Chungamnaud** (ചങ്ങമനാട് - channamanátu, Mal.). From (sangama, san. joining + nádu, mal. country). Village; Cottayam division, Aulangaud tal.; pop. 8,023; lat. 10° 10′; long. 76° 23′; from Aulangaud N.N.E. 4 miles; from Trivandrum N.N.W. 120 miles; from the sea E. 12 miles. Extensive Nayar village, with celebrated ancient temple in ruins.——*Codamungalam* (കൊടമംഗലം - kotamannalam, Mal.). From (kodai, tam. gift + mangala, san. prosperity). Town; Cottayam division, Mooatpoya tal.; pop. 7,876; lat. 10° 4′; long. 76° 40′; from Mooatpoya N.N.E. 6 miles; from Coimbatore S.S.W. 68 miles; from Trivandrum N. 109 miles; from the sea E. 27 miles. On the Mooatpoya river. Formerly of importance on account of trade with Tinnevelly and Dindigul. Chief seat of Mahomedans. ——*Codayaur* (കോതയാർ - kótayár, Mal.). See sep. title.——*Codwully* (കൊടുവള്ളി - kotuvalli, Mal.). From (kotu, mal. steep + palli, mal. village). Village; Cottayam division, Paravore tal.; pop. 7,542; lat. 10° 07′; long. 76° 18′; from Paravore S.S.E. 3 miles; from Trivandrum N.N.W. 120 miles; from the sea E. 4 miles. Handsome pagoda [q.v.] with annual festival.——*Colachel* (കൊല്ലച്ചൽ - kollácçal, Mal.). See sep. title.——*Comorin* (കന്യാകുമാരി - kanyákumári, Mal.). See sep. title.——*Connemow* (കുന്നുമാവ് - kunnumávu, Mal.). See sep. title.——*Coolelly* (കുലേലി - kulelli, Mal.). From (kulayalli, mal. palm-blossoms). Village; lat. 9° 12′; long. 76° 56′; from Trivandrum N. 49 miles; from Tinnevelly W.N.W. 63 miles; from the sea E. 29 miles.——*Coolitora* (കുഴിത്തുറ - kuzhittura, Mal.). See sep. title. ——*Coondaly* (കുണ്ടലി - kuntali, Mal.). From (kundu, mal. deep + azhi, mal. river-mouth). Town; lat. 10° 9′; long. 77° 12′; from Trivandrum N. 114 miles; from Coimbatore S.E. 60 miles. ——*Coondara* (കുണ്ടറ - kuntara, Mal.). Means dungeon. Town; Quilon division, Cottaura cara tal.; lat. 8° 58′; long. 76° 44′; from Cottaura cara W.S.W. 6 miles; from Trivandrum N.N.W. 37 miles; from the sea E. 10 miles. A small but somewhat regular town, situated amidst some fine open heights.——*Coonnat naud* (കുന്നത്തുനാട് - kunnattunátu, Mal.). From (kunnu, mal. hill + nátu, mal. country). Talook; Cottayam division; pop. 109,625. The greatest length, N. to S., is 20 miles. Greatest breadth, E. to W., is 18 miles. Sub-divided into 11 praverties and consists of 166 caras or villages. Bounded N. by Aulangaud talook, E. by Mooatpoya talook, S. and W. by the Cochin territory. Irrigated by the Alwye river.——*Coonnatore* (കുന്നത്തൂർ - kunnattúr, Mal.). From (kunnu, mal. hill + úr, mal. village). Talook, Quilon division; pop. 62,700. Greatest length, N. to S., 14 miles. Greatest breadth, E. to W., 25 miles. Sub-divided into 9 praverties and contains 123 caras or villages. Bounded N. by Mauvelicara and Chenganore talooks, E. by the hills, S. by Pudmanaubhapooram, Cottaura cara and Quilon talooks, and W. by Caroonaugapully talook. Irrigated by Cullada river. The Village and tahsildar's station is in lat. 9° 4′ N.; long. 76° 44′ E.; from Alleppey S.E. 37 miles; from Cottayam S.S.E. 37 miles; from Madras S.W. 365 miles; from Nagarcoil N.W. 78 miles; from Paravore S.S.E. 79 miles; from Quilon N.N.E. 13 miles; from Trivandrum N.N.W. 44 miles; from the sea E. 12 miles. A large but irregular town. There is another village of same name in Pudmanaubhapooram division, Velavancode tal.; lat. 8° 18′; long. 77° 14′; from Coolitora S.S.W. 2 miles; from Trivandrum S.E. 21 miles; from the sea N. 6 miles.——*Coonny alam* (കുഞ്ഞിയളം - kuññiyalam, Mal.). From (kuññi, mal. small + alam, mal. salt marsh). Portion of cardamom [q.v.] hills.——*Cottacoolangara* (കോട്ടക്കുളങ്ങര - kóttakkulannara, Mal.). From (kótta, mal. fort + kulam, mal. tank + kara, mal. shore). Village; Cottayam division, Aulangaud tal.; lat. 10° 13′; long. 76° 25′; from Aulangaud N.E. 8 miles; from Trivandrum N.N.W. 123 miles; from the sea E. 15 miles. Large Nayar village.——*Cottaur* (കോട്ടാർ - kóttár, Mal.). See sep. title.——*Cottaura cara* (കൊട്ടാരക്കര - kottárakkara, Mal.). From (kottáram, mal. palace + kara, mal. village). Talook; Quilon division; pop. 55,924. The greatest length, N. to S., is 21 miles and greatest breadth, E. to W., is 10 miles. Sub-divided into 8 praverties and consists of 137 caras or villages. Bounded N. and E. by Putnapooram talook, S. by Nedoovengaud and Cherankeel talook and W. by Quilon talook. Soil is laterite [q.v.]. The town and Head-quarters of talook is in lat. 9° 00′; long. 76° 49′; from Alleppey S.E. 44 miles; from Cottayam S.S.E. 44 miles; from Madras S.W. 365 miles; from Nagarcoil N.W. 71 miles; from Paravore S.S.E. 86 miles; from Quilon E.N.E. 14 miles; from Trivandrum N.N.W. 38 miles; from the sea E. 16 miles. Straggling town, surrounded by picturesque scenery. Pagoda [q.v.], palace and the most southern Syrian [q.v.] church.——*Cottayam* (കോട്ടയം - kóttayam, Mal.). See sep. title.——*Coralam* (കോവളം - kóvalam, Mal.). Means headland. Mal. also (rattara), meaning double village [ruttera]. Village, Port; Trivandrum division, Trivandrum talook. The small bay affords tolerable landing in fine season.——*Cuddamuttam* (കടമറ്റം - katamattam, Mal.). From (kata, mal. last + mattu, mal. limit). Village; Cottayam division, Mooatpoya tal.; lat. 9° 59′; long. 76° 33′; from Mooatpoya W. 5 miles; from Trivandrum N.N.W. 105 miles; from the sea E. 18 miles. Christians have a large church and a village.——*Cullada* (കല്ലട - kallata, Mal.). See sep. title.——*Cullcoolam* (കൽക്കുളം - kalkkulam, Mal.). From (kal, mal. stone + kulam, mal. tank). Talook; Pudmanaubhapooram division; pop. 60,908. Its greatest length, N. to S., is 24 miles; and its greatest breadth, E. to W., is 10 miles. Sub-divided into 8 praverties [q.v.] and containing 108 caras [q.v.] or villages. Bounded N. by the Tinnevelly district, E. by Tovaula talook, S. by Yerraneel talook, and W. by Velavancode talook. Slopes to the south and west. Had a sanitarium known as Moottcooly vayal, where there is a Circar [q.v.] bungalow [q.v.]. Contains Pudmanaubhapooram. Small fresh-water lake called Cauyalcara, 6 miles from Pudmanabhapooram. Weaving on a small scale, agriculture chief industry. River-fed and rain-fed tanks [q.v.]. ——*Diamper* (ഉദയംപേരൂർ - udayampérúr, Mal.). See sep. title. ——*Irore* (ഇരൂർ - irúr, Mal.). From (iru, mal. two + úr, mal. village). Village; Quilon division, Tiroovalla tal.; pop. 20,615; lat. 9° 21′; long. 76° 46′; from Tiroovalla E. 11 miles; from Trivandrum N.N.W. 60 miles; from the sea E. 24 miles. Mart frequented by Tinnevelly merchants.——*Itticara* (ഇത്തിക്കര - ittikkara, Mal.). See sep. title.——*Ivica* (അഴീക്കൽ - azhimukham, Mal.). See sep. title.——*Jyemannam* (ജൈമന്നം - jaimannam, Mal.). From (jaya, san. victory + mannam, mal. judgment seat). Title otherwise Eimanam, by corruption. Village;

Cottayam division, Yaittmanore tal.; pop. 9,702; lat. 9° 37′; long. 76° 32′; from Yaittmanore W.S.W. 6 miles; from Trivandrum N.N.W. 83 miles; from the sea E. 13 miles. Dense Nayar population scattered in extensive plantations. Pagoda picturesquely caps the summit of a low insulated top.——*Kericaud* (കേരിക്കാട് - kérikkátu, Mal.). From (kéram, mal. cocoanut, cocos nucifera, linn. + kátu, mal. forest). Quilon division, Caurtigapully tal.; lat. 9° 11′; long. 76° 32′; from Aripaud S. 7 miles; from Trivandrum N.N.W. 58 miles; from the sea E. 3 miles. A small Nayar village on the east coast of the Cauyancollam lake.——*Kilimanore* (കിളിമാനൂർ - kilimánúr, Mal.). From (kili, mal. parrot + mán, mal. deer + úr, mal. village). Village; Trivandrum division, Cherankeel tal.; pop. 6,595; lat. 8° 46′; long. 76° 55′; from Attingal N.N.E. 6 miles; from Trivandrum N.N.W. 20 miles; from the sea E. 12 miles. On road from Trivandrum to Sheucottah, viâ Nedoovengaud. Residence and jenm [q.v.] property of Coil tumboorauns [q.v.], who are allied to the Travancore royal family by marriage.——*Kiliyaur* (കിളിയാർ - kiliyár, Mal.). From (kili, mal. parrot + áru, mal. river). River; Trivandrum division, Nedoovengaud and Trivandrum talooks. Small river rising in the Nedoovengaud forests and after a devious but generally a southerly course joining the Cáramana at Trivallam near Trivandrum. Length, 15 miles. Irrigates a small tract of rice [q.v.] land.——*Kistnapooram* (കൃഷ്ണപുരം - krishnapuram, Mal.). From (krishna, san. the god + pura, san. town). Village, District moonsif's station; Quilon division, Caroonaugapully tal.; pop. 13,608; lat. 9° 9′; long. 76° 34′; from Quilon N. 18 miles; from Cauyancollam S.E. 2 miles; from Padanayarcoolangara N. 6 miles; from Trivandrum N.N.W. 54 miles; from the sea E. 4 miles. Former military station of the Cauyancollam rajahs. Here the Cauyancollam army was defeated by Travancore. Contains a palace and a large square fort in good repair to the west. Temple of Krishnasawmy. Annual festival lasting thirty days. Its once active sea-borne trade has now disappeared. Canal leads to Cauyancollam.——*Kyepully* (കൈപ്പള്ളി - kaippalli, Mal.). From (kai, mal. branch + palli, mal. village). Village; Cottayam division, Yaittmanore tal.; pop. 9,611; lat. 9° 40′; long. 76° 33′; from Yaittmanore W. 4 miles; from Trivandrum N.N.W. 85 miles; from the sea E. 14 miles. Small church and an interesting scenery.——*Laulam* (പള്ളിപ്പേട്ട - pallippétta, Mal.). From (palli, mal. church + pétta, mal. bazaar). Called also Paula, Pully or Paulah. Town, Tahsildar's station; Cottayam division, Meenachel tal.; pop. 8,168; lat. 9° 43′; long. 76° 44′; from Alleppey N.E. 28 miles; from Cottayam N.E. 14 miles; from Madras S.W. 335 miles; from Nagarcoil N.N.W. 115 miles; from Paravore S.E. 43 miles; from Quilon N. 55 miles; from Trivandrum N.N.W. 85 miles; from the sea E. 26 miles; from Cochin S.E. 35 miles. On a fine navigable stream. Capital of Meenachel district. Inhabited almost entirely by Romo-syrian christians of the earlier persuasion. Many are engaged in the areca-nut [q.v.], pepper [q.v.] trade, which form the chief articles of traffic. The town is accessible by the Cottayam river.——*Mahendragherry* (മഹേന്ദ്രഗിരി - mahéndragiri, Mal.). See sep. title.——*Manacoody* (മണക്കുടി - manakkuti, Mal). See sep. title.——*Manarchaul* (മണാർച്ചാല - manárççála, Mal.). See sep. title.——*Manimala* (മണിമല - manimala, Mal.). From (mani, san. gem + mala, mal. hill). River; Quilon and Cottayam divisions, Tiroovalla and Chungacherry talooks. Small river which rises in the Coodamoorty hills and joins the Pambah at Tiroovalla. Useful for sugar-cane [q.v.] cultivation. Navigable for about 35 miles. Culloorpaura and Tiroovalla are on its banks. After receiving several small streams it unites with the Pambah about 15 miles above the mouth of that river. It afterwards separates from that river and flows into the Vembanaud lake by several mouths.——*Margary alam* (മങ്കരി യാളം - markariyalam, Mal.). Portion of Cardamom hills.——*Mauvelicara* (മാവേലിക്കര - mávélikkara, Mal.). See sep. title.——*Meenachel* (മീനച്ചിൽ - mínaççil, Mal.). See sep. title.——*Meilaudy* (മൈലാടി - mailáti, Mal.). From (mayil, mal. peacock + átu, mal. to play). Village; Pudmanaubhapooram division, Tovaula tal.; lat. 8° 09′; long. 77° 33′; from Bhootapaundy S.S.E. 9 miles; from Trivandrum E.S.E. 43 miles; from the sea N. 6 miles. Considerable village near the base of the southern hills. Contains the first Protestant missionary church built in Travancore, viz., in 1810.——*Mooatpoya* (മൂവാറ്റുപുഴ - múváttupuzha, Mal.). See sep. title.——*Moondipolliem* (മുണ്ടിപ്പാളയം - muntippálayam, Mal.). From (mundiyan, mal. dwarf, forest deity + pálayam, mal. camp). Town; lat. 9° 11′; long. 76° 54′; from Trivandrum N. 49 miles; from the sea E. 27 miles.——*Moottam* (മുട്ടം - muttam, Mal.). See sep. title.——*Mundacaud* (മണ്ടക്കാട് - mantakkátu, Mal.). From (manta, mal. skull + kátu, mal. jungle). Village; Pudmanaubhapooram division, Yerraneel tal.; lat. 8° 14′; long. 77° 18′; from Yerraneel W.N.W. 4 miles; from Trivandrum S.E. 27 miles; from the sea N. 4 miles. Situated on the coast a little inland, a few miles to the north-east of Colachel. Shrine with annual festival.——*Munjaudicara* (മഞ്ചാടിക്കര - mañchátikkara, Mal.). From (mañcháti, mal. adenanthera pavonina, linn. + kara, mal. village). Town; Cottayam division, Chungacherry tal.; pop. 12,024; lat. 9° 27′ N.; long. 76° 34′ E.; from Chungacherry N.W. 1 mile; from Trivandrum N.N.W. 72 miles; from the sea E. 13 miles. Trading town between Madura and Cottayam.——*Munnanjainy* (മണ്ണഞ്ചേരി - mannañchéni, Mal.). From (mannan, mal. king + chéni, corruption of chéri, mal. village). Village; Cottayam division, Shertala tal.; lat. 9° 55′; long. 76° 18′; from Shertala N.N.W. 17 miles; from Trivandrum N.N.W. 108 miles; from the sea E. ½ mile. Pagoda [q.v.] and a street of bazaar [q.v.]. Once a mart. Large vessels may approach it.——*Munnpully* (മണ്ണപ്പള്ളി - mannappalli, Mal.). See sep. title.——*Munyaly* (മഞ്ഞളി - maññali, Mal.). From (maññа, mal. yellow). Village; Cottayam division, Aulangaud tal.; lat. 10° 09′; long. 76° 18′; from Aulangaud N.W. 3 miles; from Trivandrum N.N.W. 122 miles; from the sea E. 6 miles. Large market.——*Munyappara* (മഞ്ഞപ്പറ - maññappara, Mal.). From (maññа, mal. yellow + para, mal. large field). Village; Cottayam division, Aulangaud tal.; pop. 7,993; lat. 10° 13′; long. 76° 30′; from Aulangaud E.N.E. 12 miles; from Trivandrum N.N.W. 122 miles; from the sea E. 20 miles. Small Christian village with church. Capital of one of the divisions of Aulangaud. The neighbouring country has been partly deserted.——*Nagarcoil* (നാഗർകോവിൽ - nágarkóvil, Mal.). See sep. title.——*Nairanam* (നേരണം - néranam, Mal.). Village; Quilon division, Tiroovalla tal.; lat. 9° 21′; long. 76° 30′; from Tiroovalla W.S.W. 7 miles; from Trivandrum N.N.W. 68 miles; from the sea E. 7 miles. One of the most ancient Syrian [q.v.] churches.——*Navoycoolam* (നാവായിക്കുളം - náváyikulam, Mal.). From (nál, mal. four + váya, mal. mouth + kulam, mal. tank). Town; Trivandrum division, Cherankeel tal.; pop. 6,028; lat. 8° 47′; long. 76° 49′; from Attingal N.N.W. 6 miles; from Trivandrum N.N.W. 23 miles; from Tinnevelly W. 61 miles; from the sea E. 7 miles.——*Nedoovengaud* (നെടുവന്നാട് - netuvannátu, Mal.). From (netu, mal. long + van, mal. large + kátu, mal. forest). Often called Yellavaloornaud, a state, the race of whose chief is now extinct. Talook; pop. 52,211; Sub-divided into 8 praverties [q.v.] and consisting of 68 caras [q.v.] or villages. Greatest length, N. to S., 25 miles; greatest breadth, E. to W., 29 miles. Bounded N. by Cottaura cara and Putnapooram talooks, E. by Tinnevelly district, S. by Neittincara talook and W. by Trivandrum and Cherankeel talooks. There is a waterfall at Aroovy cara and a sanitarium at the Ponmoody hills. Bamboo mat [boriyah] making. There are no tanks, but some rivers. The Village and Tahsildar's station is in lat. 8° 37′; long. 77° 03′; from Alleppey S.E. 74 miles; from Cottayam S.S.E. 74 miles; from Madras S.W. 375 miles; from Nagarcoil N.W. 41 miles; from Paravore S.S.E. 117 miles; from Quilon S.E. 33 miles; from Trivandrum N.N.E. 10 miles; from the sea E. 13 miles. Pagoda [q.v.].——*Neittincara* (നെയ്യാറ്റിങ്കര - neyyáttinkara, Mal.). From (ney, mal. ghee + áru, mal. river + kara, mal. village). Talook; Trivandrum division; area 213 square miles; villages or caras, 151; pop. 110,410; Sub-divided into 10 praverties and containing 151 caras or villages. Greatest length, N. to S. 25 miles. Greatest breadth, E. to W., 16 miles. Bounded N. by Tinnevelly district, E. by Velavancode talook, S. by the Indian ocean, and W. by Trivandrum and Nedoovengaud talooks. Weaving coarse cloth. There are some tanks and a river, viz., Neyyaur. The town and Tahsildar's station; pop. 23,107; is in lat. 8° 24′; long. 77° 08′; from Alleppey S.E. 89 miles; from Cottayam S.S.E. 89 miles; from Madras S.W. 385 miles; from Nagarcoil W. 28 miles; from Paravore S.S.E. 131 miles; from Quilon S.E. 47 miles; from Trivandrum E.S.E. 11 miles; from the sea E. 8 miles. Large Nayar [q.v.] town with pagoda [q.v.] and Cottauram [q.v.].——*Neyttode* (നെയ്ത്തോട് - neytótu, Mal.). From (ney, mal. ghee + tótu, mal. canal). Village; Cottayam division, Aulangaud tal.; lat. 10° 10′; long. 76° 27′; from Aulangaud E.N.E. 8 miles; from Trivandrum N.N.W. 119 miles; from the sea E. 16 miles. Celebrated pagoda.——*Neyyaur* (നെയ്യാർ - neyyár, Mal.). From (ney, mal. ghee + áru, mal. river). Sanscrit name (ghritamálá), meaning ghee + garland. River; Trivandrum division, Nedoovengaud and Neittincara talooks. Rises near Agastyacootam peak, passes through Neittincara and Nedoovengaud, and flows south-west into the sea near Poovaur having previously dilated into a small lagoon. Length, 35 miles. Not much used for cultivation. The river is rapid and navigable for boats for only 8 miles from its mouth, boats not proceeding beyond Neittincara, though timber rafts may be floated down from the hills. A succession of small water-falls occurs in the early part of its course, and it descends into the plains in a cataract of considerable size [aroovy].——*Ochira* (ഓച്ചിറ - óççara, Mal.). See sep. title.——*Oodayagherry* (ഉദയഗിരി - udayagiri, Mal.). See sep. title.——*Ooloor* (ഉള്ളൂർ - ullúr, Mal.). From (ul, mal. interior + úr, mal. village). Village; Trivandrum division, Trivandrum tal.; pop. 6,614; lat. 8° 32′; long. 76° 58′; from Cape comorin N.W. 52 miles; from Trivandrum N. 4 miles; from the sea E. 5 miles. Temple to Soobramanya sawmy [soobramanyan]. Annual festival. The Maharajah visits the pagoda [q.v.] on Tircaurtigay [pundigay;

5c] in December.——*Padanayarcoolangara* (പടനായർകുളങ്ങര - patanáyarkulannara, Mal.). From (patanáyar, mal. náyar sepoy + kulannara, mal. tank side); a place for nayar sepoys. Village, Head-quarters of Tahsildar and Registrar; Quilon division, Caroonaugapully tal.; lat. 9° 04′; long. 76° 35′; from Alleppey S.S.E. 32 miles; from Cottayam S. 36 miles; from Madras S.W. 370 miles; from Nagarcoil N.W. 84 miles; from Paravore S.S.E. 77 miles; from Quilon N.N.W. 12 miles; from Trivandrum N.W. 48 miles; from the sea E. 3 miles. About 3 miles east of the main line of water communication from Quilon to Cochin. Former possession of the Cauyancollam rajahs and used by them as a military station.——*Palayaur* (പഴയാർ - pazhayár, Mal.). See sep. title.——*Paliport* (പള്ളിപ്പുറം - pallippuram, Mal.). See sep. title.——*Pambah* (പമ്പാനദി - pampánadi, Mal.). See sep. title.——*Paravore* (പറവൂർ - paravúr, Mal.). See sep. title.——*Paulore* (പാലൂർ - pálúr, Mal.). From (pál, mal. milk + úr, mal. village). Village; Pudmanaubhapooram division, Yerraneel tal.; lat. 8° 15′; long. 77° 16′; from Yerraneel W.N.W. 7 miles; from Trivandrum S.E. 24 miles; from the sea N. 5 miles.——*Peeravanam* (പിറവനം - píravanam, Mal.). From (pír, hind. saint + vana, san. forest). Title otherwise Piravam. Village; Cottayam division, Mooatpoya tal.; lat. 9° 53′; long. 76° 23′; from Mooatpoya S.W. 10 miles; from Trivandrum N.N.W. 100 miles; from the sea E. 15 miles. On the margin of a fine river. Church and pagoda.——*Peermaid* (പീരുമേട് - pírumétu, Mal.). See sep. title.——*Perambavore* (പെരുമ്പാവൂർ - perumpávúr, Mal.). From (perum, mal. large + pál, mal. milk + úr, mal. village). Title otherwise Perambalore. Town, Tahsildar's station; Cottayam division, Coonnatnaud tal.; lat. 10° 07′; long. 76° 31′; from Alleppey N.N.E. 43 miles; from Cottayam N. 36 miles; from Madras S.W. 325 miles; from Nagarcoil N.N.W. 145 miles; from Paravore E.S.E. 17 miles; from Quilon N. 83 miles; from Trivandrum N.N.W. 116 miles; from the sea E. 18 miles. Capital of a district.——*Periyaur* (പെരിയാർ - periyár, Mal.). See sep. title.——*Poonalore* (പുനലൂർ - punalúr, Mal.). From (punal, mal. river + úr, mal. village). Town; Trivandrum division, Neittincara tal.; lat. 8° 25′; long. 77° 5′; from Neittincara W.N.W. 4 miles; from Trivandrum E.S.E. 7 miles; from the sea E. 6 miles. Modern and flourishing town, founded by Oommany tumby.——*Vaumanapooram* (വാമനപുരം - vámanapuram, Mal.). See sep. title.——*Vauriyore* (വാരിയൂർ - váriyúr, Mal.). From (vári, san. water + úr, mal. village). Village; Pudmanaubhapooram division, Agasteeshwaram tal.; lat. 8° 08′; long. 77° 36′; from Sooshindram E. 6 miles; from Trivandrum E.S.E. 46 miles; from the sea W. 1¼ miles. On the coast north-east of Cape comorin. Salt manufactured on a small scale.——*Veily* (വൈലി - vaili, Mal.). Village, Port; Trivandrum division, Trivandrum tal.; lat. 8° 31′; long. 76° 55′; from Bombay S.S.E. 760 miles; from Caracoolam W.S.W. 8 miles; from Trivandrum W.N.W. 5 miles. Near mouth of a small backwater of same name.——*Veippore* (വൈപ്പൂർ - vaippúr, Mal.). From (veppu, mal. deposit + úr, mal. village). Village; Quilon division, Tiroovalla tal.; lat. 9° 27′; long. 76° 44′; from Tiroovalla E.N.E. 11 miles; from Trivandrum N.N.W. 69 miles; from the sea E. 25 miles. On the Manimala; church.——*Velavancode* (വെലവങ്കോട് - velavankótu, Mal.). From (vélavan, mal. spear-man + kótu, mal. fort). Talook; Pudmanaubhapooram division; pop. 69,688. Extreme length, N. to S., 24 miles; extreme breadth, E. to W., 7 miles. Sub-divided into 8 praverties and containing 114 caras or villages. Bounded N. by Tinnevelly district, E. by Cullcoolam and Yerraneel talooks, S. by the Indian ocean and W. by Neittincara talooks. The Tamrapurny which flows through the talook is of little use to cultivation. The village is in lat. 8° 18′; long. 77° 14′; from Coolitora W.S.W. 1 mile; from Trivandrum S.E. 20 miles; from the sea E. 7 miles.——*Vellangore* (വെള്ളങ്കൂർ - vellankúr, Mal.). From (vellam, mal. water + kúr, mal. share). Village; lat. 10° 3′; long. 76° 28′; from Trivandrum N.N.W. 111 miles; from Cochin E.N.E. 14 miles; from the sea E. 14 miles.——*Vembanaud* (വെമ്പനാട് - vempanátu, Mal.). See sep. title.—*Verapoly* (വരാഹപ്പുഴ - varáhappuzha, Mal.). See sep. title.——*Vijiapooram* (വിജയപുരം - vijayapuram, Mal.). From (vijaya, san. victory + pura, san. city). Village; Cottayam division, Cottayam, tal.; pop. 15,619; lat. 9° 36′; long. 76° 38′; from Cottayam E. 5 milas; from Trivandrum N.N.W. 80 miles; from the sea E. 18 miles. Large Nayar [q.v.] village with conspicuous pagoda [q.v.].——*Vilinjam* (വിഴിഞ്ഞം - vizhiññam, Mal.). Village; Trivandrum division, Neittincara tal.; lat. 8° 23′; long. 77° 02′; from Neittincara W. 7 miles; from Trivandrum S.S.E. 7 miles. Small fishing village on the coast. Vessels take in cargoes of fish. Former seat of a Dutch factory.——*Waddiyaur* (വടിയാർ - vatiyár, Mal.). From (vati, mal. to empty + áru, mal. river). River in which so many rivers empty their contents. Village; Cottayam division, Wycome tal.; pop. 8,645. Large market town. Formerly of great note.——*Warkully* (വർക്കല - varkkala, Mal.). See sep. title.——*Wuttacottah* (വട്ടക്കോട്ട - vattakkótta, Mal.). From (vatta, mal. round + kótta, mal. fort). Village; Pudmanaubhapooram division, Agasteeshwaram tal.; lat. 8° 07′; long. 77° 36′; from Sooshindıam E. 7 miles; from Trivandrum E.S.E. 48 miles; on the seashore. Fort near Cape comorin built into the sea, now deserted.——*Wycome* (വൈക്കം - vaikkam, Mal.). See sep. title.——*Yaittmanore* (ഏറ്റുമാനൂർ - éttumánúr, Mal.). From (éttumán, mal. bullman, epithet of shiva + úr, mal. village). Talook; Cottayam division; pop. 79,058. Extreme length, N. to S., 12 miles, extreme breadth, E. to W., 25 miles; sub-divided into 6 praverties [q.v.] and containing 76 caras [q.v.] or villages. Bounded N. by Wycome talook and the Cochin State, E. by Mooatpoya and Meenachel talooks, S. by Cottayam talook and W. by the Vembanaud lake. Irrigated by the Meenachel river. The village, Tahsildar's station, Place of pilgrimage is in lat. 9° 40′; long. 76° 36′; from Alleppey N.E. 20 miles; from Cottayam N.N.E. 7 miles; from Nagarcoil N.N.W. 116 miles; from Paravore S.S.E. 40 miles; from Quilon N. 53 miles; from Trivandrum N.N.W. 84 miles; from the sea E. 18 miles. Chiefly occupied by Puttar [q.v.] bramins engaged in traffic. Celebrated Shiva temple. Annual festival. As place of pilgrimage next in importance to Wycome.——*Yeddowa* (ഇടവഴി - itavazhi, Mal.). From (ita, mal. middle + vazhi, mal. way). Village, Port; Trivandrum division, Cherankeel tal.; lat. 8° 46′; long. 76° 45′; from Attingal W. 9 miles; from Trivandrum N.W. 25 miles. A small village two miles from Warkully. Boxes and other materials of cane [rattan] manufactured.——*Yerraneel* (ഇരണിയൽ - iraniyal, Mal.). See sep. title.——*Yidapully* (ഇടപ്പള്ളി - itappalli, Mal.). See sep. title.——**(2)** *Travancore hills* (തിരുവിതാംകൂർമല - tiruvitámkúrmala, Mal.). Hills; Travancore state. The portion of Western ghauts [q.v.] or Sahya parvatam, which is situated along eastern frontier of Travancore, running by side of the following talooks:—Tovaula, Cullcoolam, Velavancode, Neittincara, Nedoovengaud, Cottaura cara, Putnapooram, Shencottah, Chenganore and Todoopoya. This range forms also the extreme southern portion of Eastern ghauts. The course of the Travancore hills is very irregular, forming a concourse of distinct ridges rather than a single chain. The outline in the north is bold, but tolerably uniform, a few cliffs and conical summits alone breaking its regularity. Towards south it is broken into every variety of form. Westwards and southwards from these high ridges the country presents a succession of clusters of hills of various heights, more or less distinct from each other, and of low but intricate chains and spurs. The highest hills are usually naked in their summits, and a large portion of their slopes is also free from forests. The ravines and bases of the mountain are covered with dense forests of lofty trees, which abound with wild animals. From these hills to the sea-coast and borders of the lake, especially in the more southern districts, these highlands gradually slope downwards to an undulating tableland, which falls gently to the level of the plains. Amongst the labyrinth of mountains there are some rough elevated tablelands, but the transition from hill to dale is,

in most cases, too rapid to allow of any large extent of waving upland. The form of the separate hills is generally in the northern parts rather round with considerable but gradual declivities, than precipitous; but towards the south, bleak and craggy tops of very irregular shape are frequent. The valleys dilate in width as the elevation of the hills diminishes. The more important ridges in the mountainous parts are steep and precipitous in their declivity, narrow in their summits and furrowed by chasms or ravines whose contracted breadth scarcely allows space for the winding rivulets which drain them. The hills lying between Periyaur and Dindigul enclose within their recesses some small open elevated plains copiously watered and affording pasturage for cattle of the neighbouring country and enjoying a good climate for a part of the year. Average altitude of summits of these ghauts [q.v.] is about 4,000 feet. Amongst the more important of the summits are the following:—Agastyacootam, Anamullay, Anwartamala, Chunganaud, Codiyattore mala, Cullanaud peak, Mahendragherry, Maroothamala, Nedoombauray, Paupanausam peak, Peermaid, Periyamullay.——*Travancore lines* (നെടുങ്കോട്ട - netunkótta, Mal.). Means long fort. A mud wall, with stone bastions and forts at intervals, extending from Paliport to the Ghauts a distance of 40 miles, constructed in 1766 by Travancore government as a means of protection from the encroachments of Mysorians. Here in 1789 Tippoo was repulsed in an attempt to force an entrance through the wall. Ruins visible here and there. Also another from Aramboly to sea on Tinnevelly frontier.

TRAVELLER'S PALM (*நீர்வாழை* - nírvágai, *Tam.*). Title from usefulness. Tam. from (nír, tam. water + vázhai, tam. plantain, musa paradisiaca, linn.), from leaves like plantain and holding water at their bases. Title otherwise Madagascar palm. Botanically Ravenalia madagascariensis, som., musaceæ [vricsham, 142]. Thick succulent stem, long, broad leaves like those of the plantain [q.v.], only less fragile, and rising not round the stalk but in two lines on opposite sides; tree presents appearance of a large open fan; many thirty feet from the ground to lowest leaves; containing fresh water in thick firm ends of the stalks of the leaves. No other species here.

TREE SNAKE (गोनास - gónása *San.*; جہاڑ کا سانپ - jhárkásámp, *Hind.*; చెట్టురుకుపాము - chetturukupámu, *Tel.*; കൊമ്പേരിമൂർഖൻ - kompérimúrkhan, *Mal.*; கொம்பேரிமூக்கன் - kombérimúkkan, *Tam.*). Title from haunt. San. from (gó, san. cow + nású, san. nose); ox-nosed. Hind. from (jhár, hind. tree + sámp, hind. snake). Tel. from (chettu, tel. tree + uruku, tel. to leap + pámu, tel. snake). Mal. from tamul. Tam. from (kombu, tam. branch + éru, tam. to climb + múkku, tam. nose). Tel. also (parugudupámu), meaning running + snake. The terms may be considered co-extensive with the family Dendrophidæ ophidii colubriformes, ophidia [sarpám], reptilia [sarpy, 20], of naturalists [jantoo]. However many other snakes mount trees. The Dendrophidæ have the body and tail much compressed or very slender and elongate; head generally elongate, narrow, flat, depressed, distinct from the slender neck; snout rather long, obtuse or rounded in front; cleft of the mouth wide; nostril lateral; eye of moderate size or large with round pupil; shields of the head normal; scales generally narrow and much imbricate; ventral shields generally with two keels, rising on the sides; sub-caudals two-rowed; no large fang either in front or in the middle of the upper jaw. Diurnal species, living in trees, feeding chiefly on tree-lizards. There is a Tamul proverb:—சுடுகாட்டுப் புகையைப் பார்க்கும் கொம்பேறி மூக்கன்—"the tree snake looks anxiously for the smoke of "the funeral pyre;" referring to certainty of death. The two South indian genera are Clerysopelea and Dendrophis [combairy mookkan].

TRI (त्रि - tri, *San.*). Three. Prefix in place names; as Tricootam, meaning three peaks.——*Tadiya* (తదియ - tadiya, Tel.). Corruption of (tritíyá, san. third). Third tity [q.v.] of either waxing or waning moon [pacsham] of any month [acsha tadiya]. Same as Triteeyay.——*Teora* (تیورا - teurá, Beng.). From (triputi, san. lathyrus sativus, linn.). Same as Casauree.——*Teory* (تیوری - teori, Beng.). From (trivrit, san. turbith). Same as Turbith.——*Teyrah* (تیرا - terá, Hind.). Thirteen.——*Teyrah teyzee* (تیرا تیزی - terátezí, Hind.). From (terá, hind. thirteen + tezí, hind. bitter day). Observances on the first thirteen days of Safar [maheena] especially by lower classes. See vol. I (96).——*Trayam* (त्रय - traya, San.). Three.——*Trayodashy* (త్రయోదశి - trayódashi, Tel.). From (traya, san. three + dash, san. ten). Lunar [chaundramaunam] festival [pundigay, 3e]. The thirteenth tity [q.v.] of the waxing [shooclapacsham] or the waning [krishnapacsham] moon of any month. Thirteenth or twenty-eighth lunar day.——*Treiraushy* (त्रैराशि - trairáshi, San.). From (above + ráshi, san. quantity). The common rule of three.——*Treivarnica* (त्रैवर्णिक - traivarnika, San.). From (above + varna, san. caste). A generic name for the three superior castes. Also sometimes for Comaties [q.v.], as people of the third caste [jauty].——*Tretay* (त्रेता - trétá, San.). From (tri, san. three). The second age of the four ages or yoogs [q.v.] of the world represented by the series 4, 3, 2 and 1.——*Tribhoovanamulla* (ತ್ರಿಭುವನಮಲ್ಲ - tribhuvanamalla, Can.). From (above + bhuvana, san. world + malla, san. wrestler). Cadamba [q.v.] royal title.——*Tricalasham* (त्रिकलश - trikalasha, San.). From (above + kalasha, san. peak). Island [britastaun].——*Tricalingam* (त्रिकलिङ्ग - trikalinga, San.). From (above + kalinga, san. the country so called). The three Calingams [trilingam].——*Tricarashoory* (திரிகரசூரி - tirigarasúri, Tam.). From (above + kara, san. hand + shúrí, san. heroine). One of the seven matrons [mautah] in the temple of Ayenaur [ayen].——*Trijyay* (त्रिज्या - trijyá, San.). From (jyá, san. sine). Literally sine of three; meaning of three signs [raushy] or 90 degrees [bhaugam]. Radius.——*Trijye* (త్రిజాయి - trijáyi, Tel.). Mahratta word. One-third of the assessment [trishwaicam].——*Trikonam* (त्रिकोण - trikóna, San.). From (above + kóna, san. angle). Triangle. Sama trikonam is equilateral; Vishama trikonam is scalene; Dwisama trikonam is isosceles. Coty is the upright side of a right-angled triangle [mookkonam]. The equilateral triangle in Hindoo mythology, when the apex points downwards, is symbolical of Vishnoo [q.v.], considered as the principle of humidity, to descend being the property of water. When with the apex upwards, it is a symbol of Shiva [q.v.] as fire.——*Trilingam* (त्रिलिङ्ग - trilinga, San.). Country of the three lingams [q.v.]. Sanscrit corruption for Tricalingam, or the three Calingams [q.v.]. By Appacavy regarded as the derivation of Teloogoo, which is fanciful; there is no reason why the teloogoos should not have a name for their own language, as have each of the other dravidian nations [calingam, lingam, teloogoo]. Trilingam occurs in the Amara cosham, Bramhottara khandam, chapter xvi, applied not to language but to the Tripoondram [q.v.], or triple line drawn by sheiveites across the forehead. See vol. I (3), (132).——*Trilocam* (त्रिलोक - trilóka, San.). Three worlds [locam]; earth, sky, and heaven.——*Trilochanan* (त्रिलोचन - trilóchana, San.). From (above + lóchana, san. eye). Three-eyed Shiva. Name of a Pahlava [q.v.] king. See vol. I (129).——*Trimoorty* (त्रिमूर्ति - trimúrti, San; திருமூர்த்தி - tirumúrtti, Tam.). From (above + múrti, san. form). Moommoorty [q.v.] among the Tamulians. Hindoo trinity of gods. It was foreshadowed in the Vedic association of the three gods, Agny [q.v.], Vayoo [q.v.] and Sooryan [q.v.]; fire, wind and sun. Philosophers endeavoured to unite the conflicting claims of Shiva [q.v.] and Vishnoo [q.v.], and first conceived of Hariharan [q.v.], who combined the two. Then the original Bramha [q.v.] was added, making a triad. The acceptance of the triad as an article of creed was of late growth and special to Southern india. Philosophically the Trimoorty implies the unity of the three principles of creation, preservation, destruction. When represented, the Trimoorty is one body with three heads; in the middle that of Bramha, at its right that of Vishnoo, at its left that of Shiva. The symbol of the Trimoorty is the mystical syllable Om [q.v.]. The Bhaugavata pooraunam [q.v.] specially maintains the essential oneness of the three deities. The Vayoo pooraunam says that the three names signify the sautwicam, raujasam, and taumasa goonams [q.v.] or qualities. By other authorities Bramha is the earth, Vishnoo the sun, and Shiva the moon. By others again Bramha is time, Vishnoo is water, and Shiva is fire. Some poets make Bramha the sky by day, Vishnoo dark blue the sky at night, and Shiva pale or ashy the sky by moonlight. The legend of the Veishnava pooraunams is that from the navel of Narayanan [q.v.] or the original first cause sleeping on the sea, a lotus [nelumbo] stalk proceeded, in the flower of which Bramha was born, who made Vishnoo and Shiva to preserve and destroy. The Hebrews held the existence of three sephiroth or lights in the one deity; these were represented by three yods on the letter shin or by three yods in a circle. See vol. I (74), (78) [matam]. Trimoorty also serves as a Hindoo 2nd or pers. name [peyar].——*Trincomalee* (திருக்கோணமலை - tirukkónamalai, Tam.). From (above + kóna, san. corner + malai, san. mountain). A port with a fine harbour on the E. coast of Ceylon [q.v.]. Distinguish from Trinomallee.——*Trincomalee tree* (సరళదేవదారు - saraladévadáru, Tel.; හල්මිලිල - halmilila, Singh; திருக்கோணமலைமரம் - tirukkónamalaimaram, Tam.). Title after the town in ceylon. Tel. from (sarala, san. straight + dévadáru, san. tree, erythroxylon monogynum, roxb.). Tam. from (tirukkónamalai, tam. trincomalee + maram, tam. tree). Singh. also (somendilla). Tam. also (shavandalai), by corruption from singhalese. Title otherwise Ceylon ash, Trincomalee red wood. Botanically Berrya ammonilla, roxb., tiliaceæ [vricsham, 27]. Specific from singhalese. Large tree; leaves 4–8 by 2½–3 inches; petiole 1½ and upwards; stipules ensiform; pedicels 1 inch, pubescent; calyx ⅙ inch; downy; petals linear-oblong, twice the length of the calayx filaments half the length of the petals; ovary-ovate; style short, stigma three-cleft; capsule six-winged, rounded, wings netted, villose; seeds one to four in each cell; flower small, white, with gold-colored anthers; common, cultivated. Heart-wood dark red, very hard, close-grained, but apt to split; it has even when old a smooth, rather damp feel; very durable; used for carts, agricultural implements and spear-handles, and for masulah [q.v.] boats; inferior to saul [q.v.] for spokes and to babool [q.v.] for some other purposes, but is comparatively light and easily worked; largely imported into madras from ceylon;

answers all the purposes of ash in england.——*Trinetra cadamba* (ತ್ರಿನೇತ್ರಕದಂಬ - trinétrakadamba, Can.). From (above + nétra, san. eye + kadamba, san. member of the dynasty so called). Also called Jayanta trilochana. Founder of the Cadamba [q.v.] family of Bavanausy.——*Tripalam* (त्रफल - trip'hala, San.). See sep. title.——*Tripatagay* (त्रिपथगा - tripat'hagá, San.). From (above + pa'tha, san. way + gam, san. to go). The mythological Ganges as flowing through the three worlds [trilocam]. Sometimes identified in astronomy with the Milky way [kahkashaun].——*Tripitacam* (त्रिपिटक - tripitaka, San.). From (above + pitaka, san. basket). The Booddhist sacred canon, written in the ancient language called Pali [q.v.]. Its name denotes its distribution under three divisions. The first basket contains all that has reference to morality or Vinayam; the second contains the Sootrams, i.e., the discourses of Booddha [q.v.]; the third includes all works treating of dogmatic philosophy or metaphysics. The second and third baskets are sometimes comprehended under the general name of dharmam or law, and it has become usual to apply to the third basket the name of Abhidharmam, or bye-law. See vol. I (95).——*Tripoondram* (त्रिपुण्ड् - tripundra, San.). From (above + pundra, san. line). A name given by Sheivas to the triple horizontal, or in a few cases curvilinear, lines of ashes marked on the forehead, shoulders, and breast of votaries. Compare Keet naumam. Smartas [q.v.] add a black spot [pottoo, tilacam] on the centre of the middle line to designate the feminine energy [shacty]. The marks should properly be made with the ashes taken from the fire of an Agny hotra bramin. But they may be the ashes of burnt cowdung from an oblation offered to the idol. See Gopichandanam, Pottoo, Ungooly toranam, Vibhooty. See vol. I (86) [matam].——*Tripooran* (त्रिपुर - tripura, San.). From (above + pura, san. town). A giant in the form of three towns whom Shiva destroyed. Relates to some historic incident. Tripoora soondary, from (above + sundara, san. beautiful) is parvaty, term of very frequent usage by the shactibhactans. Tripoora soondran is Shiva.——*Tripooty* (त्रिपुटी - triputí, San.). From (above + puti, san. fold). The three qualities, viz., knowledge, that which is to be known, and the knower or the soul——*Trishashty* (त्रिषष्टि - trishashti, San.). From (above + shashti, san. sixty). A man who has attained the sixty-three special dispositions among the Jeinas [q.v.], becoming after death a Teertacaran [q.v.]——*Trishoolam* (त्रिशूल - trishúla, San.). From (above + shúla, san. pike). A trident, the weapon of Shiva [shoolam]. Compare the Chuckram [q.v.] of Vishnoo [q.v.], the Vajram [q.v.] of Indran [q.v.]. The trishoolam is considered to be in continual motion over the face of the universe to guard and preserve its creatures. To oppose its course is to incur immediate death. Its motion is regular, but varies according to the days in the week [vauram]. Thus on Monday and Saturday, Shiva holds his trident from the east. No one should, on these days, travel in that direction. It is unlucky to proceed towards the west on Sundays and Fridays, to the northward on Tuesdays and Wednesdays, and to the southward on Thursdays [shoolam, tisay, vauram].——*Trishwaicam* (त्रिश्वेक - trishvéka, San.). From (trishu, san. in three + éka, san. one). Revenue grant in which one-third part of the produce is given for rent [trijye]. See vol. I, 112.——*Triteeyay* (తృతీయ - tritíya, Tel.; திரிதியை - tirithiyai, Tam.). Lunar [chaundramaunam] festival [pundigay, 3e]. The third tity [q.v.] of the waxing [shooclapacsham] or the waning [krishnapacsham] moon of any month. The third and the eighteenth days of the lunar month [acshaya tadiya].——*Tritwam* (त्रित्व - tritva, San.; திரித்துவம் - tirittuvam, Tam.). From (above + tva, san. suffix of quality). Trinity, threeness [moommay]. See Trimoorty.——*Trivicraman* (त्रिविक्रम - trivikrama, San.). From (above + vikrama, san. step). Vishnoo, who measured the three worlds by three steps [vaumanan]. There are several interpretations of the three steps; some say that they mean morning, noon and evening, as Vishnoo was originally a solar deity.——*Trivicrama roya* (ತ್ರಿವಿಕ್ರಮರಾಯ - trivikramaráya Can.). From (above + vikrama, san. step + rájá, san. king). Chera King in Malabar.——*Triyacshan* (त्र्यक्ष - tryaksha, San.). From (above + aksha, san. eye). Shiva, the three-eyed god.——*Triyambacan* (त्र्यम्बक - tryambaka, San.). From (above + ambaka, san. eye). Shiva, the three-eyed god. Hindoo 2nd or pers. name [peyar].——*Turbith* (त्रिवृत् - trivrit, San.; तेड - téda, Mahr.; तिगडे - tigadé, Conc.; تربد - turbud, Ar.; نسوت - nisút, Hind.; تکرا - tikrá, Dec.; ತಿಗಡೆ - tigade, Can.; తెగడ - tegada, Tel.; ത്രികോല്പക്കൊന്ന - trikólpakkonna, Mal.; ත්‍රස්තවාලු - trastavália, Singh.; சிவதை - shivathai, Tam.). Title from arabic. San. from (tri, san. three + vrit, san. to exist), from three-fold property antiphlegmatic, antibilious and cathartic. Ar. from sanscrit. Tel. means cutting; from the purgative property. Mal. from (tri, san. three + kól, mal. stick + pakunna, mal. the plant). Tam. from (shiva, tam. to become red); perhaps from brownish root. San. also (triputá), meaning three + fold, from three folds covering young shoots; (trivritá), meaning covered by three folds; (nandí), meaning gladdening [toon]; (laghuróchaní), meaning slightly stomachic; (kumbhadhátrí), meaning pot preserver; (sarvánubhúti), meaning perception of all tastes, from the sweet, acrid root; (aruná), meaning red [munjeet, galangal]; (paripákiní), meaning digestive; (réchaní), meaning purgative [chebulic myrobalan]; (masúravidalá), meaning split like ervum lens, linn.; (saralá), meaning purgative; (sushénaká), meaning binding tight; cf. carondah. Mahr. also (dúdhakalamí), meaning milk + ipomea hederacea, jack; (dudháni), meaning milky. Ar. also (habbulzangí), meaning black seed. Hind. also (teurí), by corruption; (dúdkulmí), from mahratta; (nákpattar); (pithorí). Can. also (áltigudu); (dévadanti), meaning deity + croton tiglium; (bilenágadanti), meaning white + elephant + croton tiglium. Tel. also (tellategada), meaning white + the plant; (talantutíga), meaning head + anointing + creeper; (errategada), meaning red + the plant. Mal. also (chíváka). Singh. also (trivrit). Tam. also (kunagandi); (paganrai), meaning creeper. Title otherwise Indian jalap, Indian rhubarb, Square-stalked bind weed, Teory, Turpeth root. Botanically Ipomœa [calamby] turpethum, r. br., convolvulaceæ [vricsham, 93]. Specific name from arabic. Alias Convolvulus gandichaudii, riedlei, turpethum. Perennial, twining; stem angular, winged, glabrous or a little downy; leaves alternate, cordate, ovate, acuminatad, sometimes entire or angularly sinuated or crenated; peduncles axillary, one to four flowered, bracteate at the apex; outer sepals the largest, ovate roundish; corolla twice as long as the calyx, white; capsule four-sided, four-celled; seeds round, black, one in each cell; flowers white, with a tinge of cream color. Root long, fleshy, thickness of finger, brownish; in dried state sweetish yet nauseous taste; a resinous substance exudes from root when wounded, altogether soluble in spirits of wine, has a taste at first sweetish, afterwards slightly acid. The turbith of commerce consists of the root and stem of the plant cut in short lengths, usually from ½–2 inches in diameter; the central woody portion is often removed by splitting the bark on one side; the exterior surface has a twisted rope-like or columnar appearance, and is of a dull grey color; a transverse section shows a porous surface of a dirty white color, and loaded with pale yellowish white resin; through this substance pass numerous bundles composed of large vessels and woody fibre; the drug is free from smell, but has a nauseous taste, which is only perceptible after it has been sometime in the mouth. Bark medicinally purgative, rubbed up with milk free from nauseous taste or smell; substituted for british jalap [q.v.] and rhubarb [indian rhubarb]; in pharm. non-officinal. Cattle do not eat it. Gives a dye [shauyam]. Two varieties, white and black; black poisonous.

TRICALORE (திருக்கோயிலூர் - tirukkóyilúr, *Tam.* tirukoilúr *). From (tiru, tam. holy + kóyil, tam. temple + úr, tam. village); from the vishnoo temple [shree, tir]. Sanscrit name (krishnapura), means vishnoo + town; also (krishnáranya), meaning vishnoo + forest.——**(1)** Talook, South arcot district. Tahsildar's pay Rs. 200; area 584 square miles; pop. 257,132. Language Tamul. Centre of district. Boundaries:—north, Trinomallee and Villooporam talooks; east, Villoopooram and Cuddalore talooks; south, Vriddhauchellam talook; west, Cullacoorchy talook. Talook is a plain intercepted by two rivers Ponniaur and Guddilam which run parallel to each other. Soil sandy and clayey. Agriculture, cloth and indigo [q.v.] manufacture, trade in cloth and sundry articles. Irrigation by wells, tanks, Ponniaur, Guddilam, Toorinjalaur anicuts [q.v.] and river channels [q.v.]. Camping grounds Arasore, Asanore, and Oolandoorpett. Places of archæological interest:—Arcandalore, Aumore, Collore, Devanore, Graumam, Jambaday, Meyyore, Oolandaundarcoil, Pervidayaur, Shendamungalam, Siddhilingam, Tayanore, Tirnaumanullore, Tirpalpandal, Tirvennanullore, Tricalore, Yedeiyore, Yelavanausore. Principal trig. stations:—Kiliyore rock, Oolandoorpett, Shendamungalam. The leading places, &c., in the talook are the following.——*Coovaugam* (கூவாக்கம் - kúvvákkam, Tam.). From (kúvu, tam. to crow as a cock + pákkam, tam. village); from sacrifice of fowls. Village; pop. 1,291; acres 1,980; lat. 11° 49′; long. 79° 24′; from Cuddalore W. 29 miles; from Tricalore S.E. 14 miles. Annual festival in honor of Coottaundaur, a village god, at which thousands of sheep [aud] and fowls [moorghy], are sacrificed. Also noted for bullock [maud] fair, largely attended.——*Guddilam* (கடிலம் - kadilam, Tam.). See sep. title.——*Kiliyore rock* (கிளியூர் - kiliyúr, Tam.). From (kili, tam. parrot + úr, tam. village). Trig. station; lat. 11° 47′ 54·13″; long. 79° 17′ 17·00″; height 328 feet; from Kiliyore S. 1 mile; from Tricalore S.S.E. 12 miles.——*Malattaur* (மலட்டாறு - malattáru, Tam.). See sep. title.——*Manaloorpett* (மணலூர்ப்பேட்டை - manalúrppéttai, Tam.). From (manal, tam. sand + úr, tam. village + péttai, tam. village). Village pop. 2,922; acres 1,833; lat. 12° 00′; long. 79° 08′; from Cuddalore W.N.W. 50 miles; from Tricalore W.N.W. 8 miles. On the north bank of the Ponniaur [q.v.]. Two Hindoo temples and two mosques [musjid]. From twenty to thirty thousand pilgrims attend the annual Ponniaur ootsavam festival, when the image [shilay, vigraham] of Shiva [q.v.] is brought from Trinomallee. Superior native cloths are manufactured and silk-dyeing [shauyam] is carried on.——*Oolandoorpett* (உளுந்தூர்ப்பேட்டை - ulundúrppéttai, Tam.). See sep. title.——*Ponniaur* (பெண்ணையாறு - pennaiyáru, Tam.). See sep. title.——*Shendamungalam* (சேந்தமங்கலம் - shéndamangalam, Tam.). From (shéndan, tam. the god skanda + mangala, san. prosperity). Trig. station

lat. 11° 43′ 43·65″ ; long. 79° 24′ 48·21″ ; height 265 feet ; from Shendamungalam S. 1 mile ; from Tricalore S.S.E. 20 miles. ——*Tirnarooncoondram* (திருநறுங்குன்றம் - tirunarungunram, Tam.). From (tiru, tam. holy + naru, tam. fragrant + kunram, tam. hill). Pop. 243 ; acres 1,446 ; lat. 11° 49′ ; long. 79° 20′ ; from Cuddalore W.N.W. 32 miles ; from Tricalore S.S.E. 12 miles. Jeina [q.v.] temple on a hillock by the side of a large reservoir, visited by pilgrims from all parts of India.——*Tirnaumanullore* (திருநாமநல்லூர் - tirunámanallúr, Tam.). From (tiru, tam. holy + námam, tam. name + nal, tam. good + úr, tam. village). Pop. 1,902 ; acres 2,495 ; lat. 11° 52′ ; long. 79° 27 ; from Cuddalore W.N.W. 29 miles ; from Tricalore S.E. 13 miles. Inscriptions of Chola [q.v.] dynasty [raj].——*Tirvennanullore* (திருவெண்ணநல்லூர் - tiruvennanallúr, * Tam.). From (tiru, tam. holy + vennai, tam. butter + nal, tam. good + úr, tam. village). Place of pilgrimage ; pop. 3,469 ; acres 1,607 ; lat. 11° 52′ ; long. 79° 24′ ; from Cuddalore W.N.W. 29 miles ; from Tricalore S.E. 13 miles. Shiva and Vishnoo temples. Sugar [q.v.] factory.——*Toorinjalaur* (துரிஞ்சலாறு - turiñjaláru, Tam.). See sep. title.——*Tricalore* (திருக்கோயிலூர் - tirukkóyilúr, Tam.). See below.——*Yelavanausore* (எலவானாசூர் - elavánásúr,* Tam.). From sanscrit. Sanscrit name (lavanásurapura), meaning lavanan, an asooran + town. Pop. 2,450 ; acres 2,685 ; lat. 11° 43′ ; long. 79° 14′ ; height 358 feet ; from Cuddalore W. 39 miles ; from Tricalore S. 17 miles. Former head-quarters of Tahsildar. Large Shiva temple, and smaller one dedicated to Hanooman [q.v.]. In the Shiva temple, the nundies [q.v.] do not face towards Shiva as they ordinarily do but are placed with their tails towards him. It is said that the reason of this is that Shiva ordered the bulls to be ready for war with an asooran [q.v.]. Fort said to have existed here——**(2)** Town Head-quarters of talook and Deputy collector, South arcot dist., Tricalore tal. ; pop. 5,732 ; acres 2,606 ; lat. 11° 58′ ; long. 79° 15′ ; height 456 feet ; from Chidambaram N.W. 50 miles ; from Cuddalore W.N.W. 41 miles ; from Madras S.W. 107 miles ; from Tindivanam S.W. 36 miles ; from Vriddhauchellam N.N.W. 32 miles. On the south bank of the Ponniaur. Large and elaborately sculptured Vishnoo temple of Trivicraman with inscriptions. Old Mahomedan mosque [musjid]. Shiva temple with gopooram [q.v.] of eight storeys. It is said that a portion of the temple was a century ago used for storing Government salt [ooppoo]. Weekly fair on Wednesday. In the bed of the river is a large boulder on which stands a temple. In the suburb of Keelore is an old Shiva temple, and near Keelore on a small hill on the opposite side of the river is a deserted temple.

TRICHENGODE (திருச்செங்கோடு - tiruççengódu, *Tam.* tiruchengód *). From (tiru, tam. holy + shem, tam. red + kódu, tam. peak) [shree, tir]. Sanscrit name (nágáchalapura), meaning snake + mountain + town.——**(1)** Talook, Salem district. Tahsildar's pay Rs. 225. Area 637 square miles. Averages about 25 miles in length and breadth, extremes being 35 miles from east to west and 33 miles from north to south. Population 248,679. Language Tamul. S.W. of district. Between N. lat. 11° 15′ and 11° 45′ and E. long. 77° 44′ to 78° 15′. Bounded north and north-east by Salem talook ; south and south-east by Namcull talook ; and west by the Cauvery, which separates it from Coimbatore district. The talook is exceptional in its configuration as compared with the rest of the district, being one bleak glaring plain with only a few hills, of which Shunkerrydroog only is of importance, and no hill ranges. The centre is high ground sloping towards the Cauvery ; on the north and east are two valleys in which run the Sharabhunganuddy and Tirmany moottaur. Poolamputty hill is in the north-west corner. Soil red. Weaving goes on in all large villages, more especially at Trichengode. Raggy [q.v.] is the staple of consumption. Trichengode enjoys a great reputation for its milch cows [pashoo], which though small fetch from 35 to 50 rupees or even more. Exports are paddy [q.v.], horse-gram [q.v.], gingelly [q.v.] seed, cumboo [bajrah], ghee [q.v.], palmyra [q.v.] jaggery [q.v.] and lamp oil [q.v.]. Imports are salt [ooppoo], jaggery [q.v.], wheat [geung], betel-nut [q.v.], raggy [q.v.], tobacco [pogauk], saffron [country saffron], plantains [q.v.] and coriander [cassibor] seed. The only rivers are the Sharabhunganuddy and the Tirmany moottaur. There are ferries at Calavadangam, Cauveryputty agrahauram, Cokkaroyanpettah, Conairyputty agrahauram, Jalacantapooram, Kailamputty, Molasy, Mungalam, Nedooncoolam, Pillagowndenputty, Poolamputty-cauvery, Pulipolliem agrahauram, Puttalore, Samayasagily agrahauram, Shiloovamputty and Yerayamungalam. The following are the principal irrigation works in the talook :—Auvaniperore-veppamputty anicut, Chinnappanputty anicut, Connaiyaur anicut, Mullasamoodramkeelmookhan large tank, Mungalam tank, Navany tank, Paroottipully amritasaugaram tank, Yedapaudy anicut, Yeloor tank. Camping grounds :—Chinnappanputty, Comaurapolliem, McDonald's choultry, Pullipolliem, Shunkerry droog. Zemindarries :—Animor mittah, Carmanore mittah, Cautpolliem, Chinnamanaly, Cokkaley, Cokkaroyanpettah, Comauramungalam, Comaurapolliem, Conganapooram, Cottay varoothamputty, Culyauny, Gowndenpolliem, Iroogalore, Manapauray, Minnampully, Molipully, Moonjanore, Morangam, Oonjiny, Palamode, Periyamanaly, Poottore, Shittalandore, Shuncagherry, Toccavaudy. Places of archæological interest :—Aundipolliem, Auvaniperore, Cadayampett, Carveppamputty, Comauramungalam mittah, Comaurapolliem, Devanancoorchy, Molipully, Palayapolliem, Poolamputty, Rajahpolliem, Shittalandore, Shunkerrydroog, Trichengode, Varagooranputty, Vellirivully, Woddaputty, Yedagansaulay, Yedapaudy. [Principal trig. station :—Moroor. The leading places, &c., in the talook are the following.——*Animore mittah* (அணிமூர்மிட்டா - animúrmitta, Tam. animúrmitta *). From (ani, tel. battle + úr, tel. village + mitthá, hind. estate). Zemindarry, Village ; pop. 751 ; square miles 14 ; lat. of village 11° 20′ ; long. 77° 55′ ; from Salem S.W. 31 miles ; from Trichengode S.S.W. 4 miles. Peshcush Rs. 6,401.——*Canacagherry* (கனககிரி - kanagagiri, Tam.). From (kanaka, san. gold + giri, san. mountain). Village ; pop. 602 ; acres 773 ; lat. 11° 34′ ; long. 78° 03′ ; from Salem W. 13 miles ; from Trichengode N. 15 miles.——*Carmanore mittah* (கருமனூர்மிட்டா - karumanúrmittá, Tam. karumanurmitta *). From (karumán, tam. blacksmith + úr, tam. village + mitthá, hind. estate). Zemindarry, Village ; pop. 1,456 ; square miles $9\frac{7}{16}$; lat. of village 11° 27′ ; long. 78° 03′ ; from Salem S.W. 19 miles ; from Trichengode N.E. 9 miles. Peshcush Rs. 5,558.——*Caulipputty* (காளிப்பட்டி - kálippatti, Tam.). From (káli, san. the goddess + patti, tam. cattle-fold). Village ; pop. 2,253 ; lat. 11° 31′ ; long. 78° 05′ ; from Salem S.W. 13 miles ; from Trichengode N.E. 14 miles. About 5,000 persons attended the Cundaswamy car festival held about 21st January. At this festival pilgrims carry cauvadies [q.v.] in fulfilment of vows.——*Cautpolliem* (காட்டுப்பாளையம் - káttuppálaiyam, Tam.). From (kádu, tam. forest + pálaiyam, tam. fortified village). Zemindarry, Village ; pop. 200 ; lat. of village 11° 27′ ; long. 78° 05′ ; from Salem S.S.W. 17 miles ; from Trichengode E.N.E. 11 miles. Peshcush Rs. 657.——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.——*Chinnamanaly* (சின்னமணலி - shinnamanali, Tam.). From (shinna, tam. small + manali, tam. plant, gisekia pharnaceoides, linn.). Zemindarry, Village ; pop. 1,255 ; lat. of village 11° 35′ ; long. 77° 53′ ; from Salem W.S.W. 23 miles ; from Trichengode N.N.W. 15 miles. Peshcush Rs. 1,538.——*Cokkaley* (கொக்களே - kókkalé, Tam.). From (kokku, can. crane + halli, can. village). Zemindarry, Village ; pop. 1,659 ; square miles 5 ; lat. of village 11° 22′ ; long. 78° 06′ ; from Salem S.S.W. 21 miles ; from Trichengode E. 11 miles. Peshcush Rs. 2,425.——*Cokkaroyanpettah* (கொக்கராயன்பேட்டை - kokkaráyanbéttai, Tam. kokáráyanpet *). Means cokkaroyen's village. Sanscrit name (brahmapurí), meaning bramha's town. Zemindarry, Village ; pop. 2,001 ; square miles 23¼ ; lat. of village 11° 19′ ; long. 77° 50′ ; from Salem S.W. 35 miles ; from Trichengode W.S.W. 9 miles. Peshcush Rs. 8,661.——*Comauramungalam* (குமாரமங்கலம் - kumáramangalam, Tam. komáramangalam *). From (kumára, san. skanda + mangala, san. prosperity). Zemindarry, Village ; pop. 2,911 ; square miles 9¼ ; lat. of village 11° 24′ ; long. 77° 58′ ; from Salem S.W. 25 miles ; from Trichengode N.E. 2 miles. Peshcush Rs. 5,901.——*Comaurapolliem* (குமாரப்பாளையம் - kumárappálaiyam, Tam.). From (kumára, san. skanda, the god + pálaiyam, tam. fortified village). Zemindarry, Village ; pop. of village 1,863 ; acres 3,539 ; lat. 11° 26′ ; long. 77° 44′ ; from Salem W.S.W. 36 miles ; from Trichengode W.N.W. 15 miles. Inhabited chiefly by Canarese weavers. Copper-plate grant [shausanam]. Peshcush Rs. 3,648.——*Conganapooram* (கொங்கணப்புரம் - konganappuram, Tam. konganapuram *). From (kónkana, san. people, so called + pura, san. town).
